VOLUME XIX, PART X.

CONGRESSIONAL RECORD,

FIFTIETH CONGRESS, FIRST SESSION.

cratic Secretary of the Treasury, who it is said has himself contributed $10,000 to the campaign, and of whom it is said, whether truthfully or not I do not know, that his nearest relative has contributed twice as much.

It seems to me to be pretty small business for the Democratic party to be now attempting to get money out of the subordinate officials and clerks of the Government with the vast agencies that they have for the collection of money. In looking over the deposits in the national banks I found several banks that held a million dollars of the people's money. I found some banks that held $1,100,000 of the people's money, and for that they had deposited simply $1,000,000 of Government bonds. I do not say but that it is safe. I do not say but that the money is safe in the national banks, but I do say when the Government is a debtor to the extent of a thousand million dollars and more, drawing on an average more than 4 per cent., it would have been in the interest of public economy and public decency that this money should have been paid on the public debt, when it might have been paid on the public debt in such a way as to have saved to the Government at least 2 or 2½ per cent. upon the money from which no benefit whatever is now derived, except, as suggested on my right, for campaign purposes.

Before the session closes I propose to go into details to show the enormous amount of money that has been lying in the Treasury of the United States when bonds might have been bought at prices that would have paid the Government on its money a fair interest, an interest almost equal to what the Government investors are now realizing on their bonds when you consider the premium.

But, Mr. President, I do not propose upon this resolution to go into any examination of this question. I only rose to reply to what the Senator from Missouri had said on one point. I want to add further before I sit down that I do not myself know, when there is certified to a public officer from the Civil Service Commission a list to be appointed, how it is possible for him to know, without a violation of his official oath, whether they are Democrats or whether they are Republicans. I understand that the man who whispers in his ear that the appointee is either a Democrat or Republican is guilty of a misdemeanor under the law, and I understand that he who communicates that secret is no more guilty than the man who receives it.

If to-day there is in the administration of public affairs any method adopted or winked at by which the appointing power can know the political position or political belief or political affiliation of the men appointed, not only is that officer guilty of an infraction of the law, but some citizen must also have been guilty of an infraction of the law who furnishes him with the information. I called attention to that yesterday, and I only want now to call attention to the statute, because the Senator from Missouri seemed to think that it was perfectly consistent with proper administration that the Department should know, and should then, if it saw fit, make a selection of Democrats to the exclusion of Republicans. Section 5 of the act of January 16, 1883, declares that if any person shall—

Report upon the examination or proper standing of any person examined hereunder, or aid in so doing, or who shall willfully and corruptly make any false representations concerning the same or concerning the person examined, or who shall willfully and corruptly furnish to any person any special or secret information for the purpose of either improving or injuring the prospects or chances of any person so examined, or to be examined, being appointed, employed, or promoted, shall for each such offense be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than $100, nor more than $1,000, or by imprisonment not less than ten days, nor more than one year, or by both such fine and imprisonment.

I repeat, if there is any knowledge as to the political condition of these applicants conveyed to any officer who has the power of appointment, unless it is conveyed by the applicant himself, the conveyor and the receiver are both guilty of a misdemeanor under the law.

The PRESIDENT *pro tempore*. The question is on agreeing to the resolutions submitted by the Senator from Maine [Mr. HALE].

Mr. BUTLER. Let the resolutions be read.

Mr. HALE. There is an amendment pending.

The PRESIDENT *pro tempore*. The Senator from Maine had a right to modify his original resolution. It will be treated as one proposition, with the modification included.

The Secretary read the resolutions, as follows:

Whereas it is alleged that an order has been issued from the War Department in form and terms as follows:

"[Confidential.]

"WAR DEPARTMENT, ORDNANCE OFFICE,
"*Washington, D. C., January 4, 1886.*

"*To the commanding officers of the national armories at Springfield, Mass., and Rock Island, Ill., and of the United States arsenals at New York, West Troy, N. Y., and Philadelphia, Pa., Boston, Mass., Benicia, Cal., etc.:*

"SIR: While arsenals and the armories are not intended to be converted into political machines, two political parties in this country are recognized. It is therefore ordered that hereafter, in employing and discharging employés of any and all grades, other things being equal and qualifications satisfactory, Democrats will be favored; the object being to divide the force in the different grades gradually between Democrats and Republicans. This rule will apply to women and children, as well as to men, and will be strictly enforced.

"Respectfully, your obedient servant,

"S. V. BENÉT,
"*Brigadier-General, Chief of Ordnance, U. S. Army.*"

And whereas it is further alleged that, in pursuance of such order, changes and removals of persons employed by the Government in the United States arsenals and armories have been made, and that honorably discharged soldiers of the Union Army and their wives and children have thus been removed: Therefore,

Resolved, That the Secretary of War be, and is hereby, directed to forthwith transmit to the Senate full information as to the order above named, and to state fully what necessities of the Department required that said order should be issued; and to further inform the Senate why an order issued from the military department of the Government upon public business was marked "confidential;" and also to report fully all changes that have been made of persons employed in the United States arsenals and armories since said order was issued, and especially to inform the Senate whether, at the Rock Island arsenal, the wife and children of a former Union soldier have been removed under said order.

Resolved, That the Secretary of War is further directed to transmit to the Senate copies of any further orders or circulars relating to the employment of persons in any part of said Department since March 4, 1885, together with copies of all correspondence between the Department and any of its officers or subordinates or any other person relating to the politics of any of its employés.

Mr. HOAR. I should like for my own satisfaction, if the mover of the resolution has no objection, to ascertain also another fact, and that is what measures have been taken by the War Department to learn the political opinions of the women and children in its employ. I will move to add that to the resolution.

The PRESIDENT *pro tempore*. Will the Senator from Massachusetts send the proposed amendment to the desk?

Mr. HOAR. I will dictate it to the Secretary. At the end of the first resolution I move to add:

And also to inform the Senate what measures have been taken by the War Department to learn the political opinions of the women and children in its employ.

Mr. HALE. I have no objection to that. I think it is a proper amendment.

The PRESIDENT *pro tempore*. The Chair understands the Senator from Maine to modify his first resolution so as to include what has been dictated.

Mr. HALE. Yes, sir.

The PRESIDENT *pro tempore*. The resolutions will be read as modified.

The Secretary read as follows:

Resolved, That the Secretary of War be, and is hereby, directed to forthwith transmit to the Senate full information as to the order above named, and to state fully what necessities of the Department required that said order should be issued; and to further inform the Senate why an order issued from the military department of the Government, upon public business, was marked "confidential;" and also to report fully all changes that have been made of persons employed in the United States arsenals and armories since said order was issued; and especially to inform the Senate whether, at the Rock Island arsenal, the wife and children of a former Union soldier have been removed under said order; and also to inform the Senate what measures have been taken by the War Department to learn the political opinions of the women and children in its employ.

Resolved, That the Secretary of War is further directed to transmit to the Senate copies of any further orders or circulars relating to the employment of persons in any part of said Department since March 4, 1885, together with copies of all correspondence between the Department and any of its officers or subordinates or any other person relating to the politics of any of its employés.

Mr. SAULSBURY. Mr. President, I suppose this resolution has answered the purpose for which it was brought before the Senate. It has furnished the text for a tirade against the Administration and the Democratic party and against the people of the South, and I suppose that was the object proposed in offering the resolution. I do not desire to enter into the kind of discussion that has been indulged in with reference to it, but I want to express my opinion in regard to the character of the debate which has ensued upon it. In my humble judgment such debate in such a cause and on such a resolution is disreputable to this body.

The Federal Administration has been attacked, been misrepresented, been traduced, simply for the purpose of capturing votes in this country in the next Presidential election. That is the truth and the whole truth about this entire debate. The President of the United States has been held up as a violator of every pledge he has ever made in reference to the subject of civil-service reform. While he has kept in office a very large percentage of Republicans opposed to him and men who voted to keep him out of the Presidential office, while he has given, as I believe, just cause of complaint to his own political friends for the favor which he has shown to the other side of this Chamber, and to the friends of the other side of this Chamber, he is now, on the eve of a Presidential election, traduced as a violator of plighted faith and pledges, and held up before the country in that character without any justification or excuse whatever.

It is true that many changes have been made since President Cleveland came into office, but I venture nothing in saying that in the great majority of cases where the changes have occurred they have taken place upon the expiration of the terms of the incumbents that he found in office. There have been some removals and there ought to have been many more, but he has been lenient towards his political foes and suffered them to hold on to the offices which they occupied when he came into power until their terms of office had expired. In the State in which I live we have but one collector of customs, not a very important office, because the State is a very small State; the late incumbent of that office was appointed in the last few months of President Arthur's term, and yet he was permitted by President Cleveland to fill

out his term of office, having at his command a certain class of patronage affecting light-houses down in the Delaware Bay as well as the assistant collectors of customs, etc., throughout the State. With that fact standing out—and it is not an isolated fact, for similar cases have occurred, if not with reference to collectors of customs with reference to other officers all over this country—the President has suffered the party's term to expire of its own limitation and then filled the office with a friend of his Administration. Yet he has been maligned, been misrepresented both as to his motives and his action.

This resolution was introduced for the purpose of furnishing an occasion, I suppose, to indulge in these harangues and tirades against the Federal Administration. I want to express myself with reference to this resolution. What does it mean? It seems the Secretary of War, or some official under him, gave an order the purpose of which he says was to equalize the employés between the two great parties. He says, in so many words, that the object of that order was to divide the force in the different grades gradually between Democrats and Republicans. He found these places filled by Republicans, and very naturally he desired, as his party desires, and as the country knows he has a right, to give to the men of his own way of thinking an equal share in the emoluments that are derived from these offices.

There have not been as many changes as ought to have been made. I heard some time ago of a bureau in the Treasury Department where there were from twenty to twenty-five officials above the class that are subject to the civil-service law, and not more than four or five changes have been made in that bureau since the Administration came into power. I do not hesitate to say that if I had been Secretary of the Treasury and any bureau officer under me had retained such a proportion of his political enemies in his office, I should dismiss him from the office and put in a man who would make proper changes, and if I were the President of the United States, I would see that every head of Department should mete out justice in his appointments to the party that placed me in power. I should be guilty of ingratitude if I did not do it, if I had knowledge that such was not the case.

I have not much respect for this civil-service reform, I mean for the statutory form provided for. I believe in civil-service reform and I believe that the parties charged by the Constitution and laws of this country with the responsibility of administering the Government ought to see that the agents it has in its employ are men of capacity, men of integrity, men of honesty, men of fidelity to the trust reposed in them. I believe in that kind of civil-service reform. I believe that every man selected for public office ought to be faithful to the duties intrusted to his care. Whether he is a Democrat or Republican, he should be a faithful man. I would not be a public butcher and cut the throat of every man who differs from me in politics; but I would give to the Republican party, if I were President, no advantage over my own friends in the distribution of the patronage of the Government. While I believe in that kind of civil-service reform which holds the agents of the Government to the strictest responsibility and the strictest fidelity, I do not believe in that kind of civil-service reform that provides for a competitive examination, and that a man who can pass before a commission the best examination, a man giving the best answers to the questions propounded, must necessarily be preferred to other men.

There is many a dead-beat, there is many a man that has not character enough to sustain him in his neighborhood, who can pass a better civil-service examination than many worthy men fully competent to discharge all the duties and who would be faithful in the discharge of the duties committed to their care; and yet because the fellow has had a better education, has been sent perhaps to some college and graduated there, with not energy enough to make the money that buys the bread to feed him, too lazy or too indolent often to be of any service in any position in life, is selected because he has passed a civil-service examination at a higher grade than some worthy man fully competent and familiar with the duties required of him. He is kept in the background while this dead-beat, this man whose advantages in early life were superior may have the place which ought to have been given to this worthy man. I believe in no such civil-service reform as that.

If I had my way, I would repeal the statute and revoke every rule and order that has been made under it by President Cleveland or anybody else. I have but little patience with that kind of civil-service reform. You may go through now any of these Departments, and there are men whom President Cleveland found there, some of whom are destitute of character and many of them destitute of that industry and those qualifications which fit men for the positions. I went myself to one of the Secretaries some two or three years ago and I said to him, "You have a man in your employ that I meet occasionally; he is drunk every time I see him." "Well, sir," said he, "tell me who he is and I will turn him out." "I will not do it," said I, "because you will not let me have anything to say as to who will fill his place. If you will not allow me any consideration as to who shall fill his place, I am not willing to act as a spy on your men and have them turned out. I shall not assist you, because you will not assist me and my friends in getting places."

There is that class of men in the service, and they ought to be turned out, whether Mr. Cleveland or Mr. Harrison is elected. I would not discharge a faithful official simply because he was a Republican, provided there was not an undue proportion of Republicans in the service over which I presided; but I would turn out, whether he was a Democrat or a Republican, every man who was inefficient, every man who was a lazy drone, every man who did not perform his duties satisfactorily to me as head of the department.

I shall not enter into this general discussion about the people of the South indulged in by the Senator from Colorado. Reckless assertions are frequently made without evidence, too frequently made for the good reputation of the Senate of the United States. I shall not enter into the discussion about the contributions to political funds.

I suppose that men have always given something to defray the legitimate expenses of the party to which they belong. I suppose they will always do it. The Senator from Massachusetts [Mr. HOAR] bravely acknowledged that he would do it, and he intended to do it in this campaign to the extent of his ability. I suppose men do that everywhere, contribute something of their means to the support and maintenance and defraying the legitimate expenses of the party to which they belong. All these criticisms about the check of the President, about the checks of the heads of departments, and all such stuff falls idly upon the public mind.

We flatter ourselves, I suppose, that we shape public opinion and make votes for our party by these discussions, but I have no hesitation in saying that there has been no discussion within the last thirty days in this Chamber that has had any effect upon the public mind, or will change the public vote in any section of this country. In the earlier stages of this session, when the tariff question was brought prominently before the mind of the American people by the vigorous message of the President of the United States, there was discussion which was necessary and proper for the information of the country; but the people have drunk in the wholesome sentiments of the President's message, and are imbued with the sentiments which he has advanced, and all these discussions of late amount to but little. In fact, so far as the influencing of votes is concerned, I would rather have the influence of a half a dozen green grocers located at the cross-roads throughout the country than all the influence which these political tirades in this Chamber can make for any party.

Mr. President, I shall not enter into those discussions. I could arraign the Republican party for its past malfeasance and misfeasance and wrong-doings if I saw proper, but I stand here to say that no man can lay his hands upon any corruption of the present Administration. Whatever may be the faults of Mr. Cleveland in other respects, his administration has been clean and pure. There have been no contracts given out with the distinct understanding that contributions should be made by the contractors in the public service to aid the political party to which they belonged. I do not say that such contracts ever were made, but men have been greatly slandered who have held public positions in this country if such were not the fact; but so far as this Administration is concerned I defy any living man to bring home to the Administration, to the knowledge of President Cleveland or any head of Department, any single instance of corruption, direct or indirect, remote or immediate. While I have not been myself the most fulsome flatterer of the President of the United States, yet I take it upon myself to say that no administration has ever been cleaner and purer, or more honest in its purposes and conduct with regard to the high functions committed to its care than the present Administration. And, sir, while President Cleveland may be traduced during this canvass in the vain hope that it will clip his wings in the flight he is to make over this country in November, he will live in the estimation of his countrymen, live in the history of his country, long after his traducers are forgotten.

Mr. DAWES. I do not wonder, Mr. President, that the Senator from Delaware [Mr. SAULSBURY] is tired of this debate. I am a little surprised that in a peroration of such a flight and such a bold assertion of the immortality of the present Administration, he should not take more concern to assure the people for what it would live so long and for what it might be remembered so long. History discloses many instances of people who will live on its pages and in the memory of the world, not for any great good they have accomplished or any great achievement, but for far other reasons; and the wicked will be remembered, I am afraid, in these degenerate times, quite as long as any good that can be discovered in this present Administration.

I rose, however, simply to state that the revelations of this debate are but the fulfillment of prophecy. Those who were here when the civil-service law was enacted, and will call to mind the debate which then occurred, will discover in what has been unfolded under this Administration just what the public were told was capable of being accomplished under this law, even by those earnestly in favor, if possible, of some legislation that would work a cure of an evil so inbred as to be incurable by enactment and the result could come only by conversion.

There were those who voted for this bill in sincerity and in an earnest effort to join with those who had more confidence in the efficacy of the bill than they had and who tried to the best of their ability to find some other form of law that would reach this great evil. They were told then that under an administration so disposed this law might

be wrenched into the most efficient instrument of the spoils system possible to be invented, and what clearer demonstration, what more perfect fulfillment of prophecy than the revelations of this debate?

After all, it teaches us what little confidence can be placed in profession, and how impotent is the skill of man in devising legal instrumentalities to prevent the evil minded, if they have the power, from accomplishing their ends. If a man in the administration of public affairs with this law before him, is so disposed, he can accomplish marvelous good with it and lift up the civil-service out of the mire and degradation of the past into a higher plane and a more effective and honest administration of the public service. But with it, if he is so disposed, he can administer it as I have stated, as has been done so plainly under an administration that reached power by professing greater desire and purpose of accomplishing good under it than anybody else. And yet, after all, by manipulation it has accomplished what has been unfolded here to the people of this country in the name of the civil-service law, the like of which can not be found on the records of the past, unjustifiable as was the conduct of the past, and so gross was it as to force upon the country some sort of legislation to cure it.

Until this nation shall put in authority an administration that shall have the courage and the power behind it to hold every official under it to a personal responsibility for the result, no attempt by legislation or by preaching to elevate the civil service of the country will accomplish anything. When a President of the United States shall have the disposition, the courage, and the moral backing behind him on entering the White House to assemble seven men and say to each one of them, "Into your hands I place this portfolio, and I clothe you with all the power I have for the administration of the duties of your portfolio, but if it goes wrong I hold you personally responsible for your head;" and when that minister shall assemble the heads of the bureaus under him necessary for the discharge of his duties and says to each one of them, "I hold you personally responsible for the proper discharge of the duties of this bureau, and I give you *carte blanche* as to the instrumentality to work out that result, but what goes wrong in that bureau falls on your head"—I say when the time comes when a President, whether he be a Democrat or a Republican, can stand in the White House and inaugurate such a system as that, the civil service, in my opinion, will be put on a proper basis. It will be improved or prostituted just according to the heart and purpose of the party that puts the President in the White House.

When such a system of individual and personal responsibility for the discharge of the duties of each office shall prevail, from the President clear down to the most immaterial official, holding each one personally responsible to his own head for what is accomplished under him, no official will stop in the employment of any man under him to inquire whether he be Republican or Democrat, but only whether he is the best man possible for him to select to accomplish what must be accomplished on pain of official death.

That is the responsibility I long to see inaugurated in this Government. That is the only responsibility I expect ever to see that will lift this civil service up out of party work and party dirt to a true and exclusive devotion to the public service; and the depth of the mire into which it will be dragged in each succeeding administration will be measured only by the disposition of those who are clothed for the time being with the power of administration.

So it was thought and so it was put upon record when this law was enacted. So it has proved in the first administration called upon to administer it. Never in all the history of party politics as connected with official life has there been such a demonstration of the difference between profession and practice in this regard as in this Administration—an administration with all these practices brought home to it, with all these violations of professions which were accepted by those who placed it in power, before the country with solicitations for contributions contrived by a thin device deliberately for the purpose of escaping the phraseology of the law, with an extension of solicitation from the highest officer in the Government down to the humblest policeman who walks in the shadows of the night about the streets of Washington City, with a universal address to all officers called upon, with percentage of salary named and fixed, to contribute their share in support of the party in power, now coming before the country in these colors and in these garments for the verdict of the people.

If this Administration with all its sins of commission and omission upon its shoulders shall be accepted again by the people, do they not have the indorsement that there is no length or depth of degradation and prostitution of the civil service to party behests that they are not justified in the future to indulge in?

The Senator from Delaware may think this an unpleasant and perhaps he may think it an unprofitable subject of debate, when the conduct and course of this Administration is presented to the public for approval or disapproval, but to my mind if these practices, if these violations of pledges and professions shall go for naught with the American people, the civil service of this country has nothing to hope of elevation, efficiency, or purity under this Administration.

Mr. STEWART. Mr. President, I have been observing the operations of this civil-service law since its passage, hoping that a means had been devised and put into practice that would remedy the objections to the former mode of appointing officers and that would be better than the general provisions of the Constitution without special legislation. I have come to the conclusion, without reference to party at all, that the law is a bad one; that instead of fixing responsibility and securing reliable officers it has a tendency directly the other way. It removes responsibility from the proper place and places it where the community are utterly unable to know who has done the deed.

Under the system that formerly existed appointments to office were made on the recommendation of gentlemen in Congress and out of Congress. Their recommendations were made matter of record, and they were held responsible in their districts and by the country, and whatever may be said it was dangerous for any Senator or Representative to recommend worthless men or worthless women to office. He might go on for a little while, but his constituents would discuss it at his coming election, and as a rule ambitious and honorable men took great care to recommend to office only suitable persons. Of course they made mistakes occasionally. The system was not perfect. Abuses grew up which called the attention of the country to it. Besides, abuses that did not exist were alleged, and such abuses as did exist were exaggerated by those who were unable to secure appointments; and the press took up the question and demanded a reform in that respect.

What is the reform? What kind of a law have we? In the first place it does not and could not take from the President the appointing power. That is lodged with the President by the Constitution. The law provides that the President shall appoint three commisioners. They are appointed and removable at his pleasure. Of course he can secure men who will do his bidding. That is the first proposition. The next proposition is that there shall be an examination under certain rules. Here is a chance for great partiality in the examination. If by examination you could ascertain exactly the qualifications, moral as well as intellectual, of all persons applying for office, if you could determine by an examination the fitness of person for office, that would be right. But still there is every opportunity to favor particular classes and individuals, to furnish them in advance the questions to be answered, to help them through, and to embarrass those it is desired to keep out. It is impossible in human nature to make that examination perfectly fair, I do not care how it is provided for. It is necessarily held in secret. It is not in human nature to make it fair where there are contending parties, and you can not have a secret examination of that kind, the result to be determined by men belonging to different parties, which is fair to all applicants for place. If it could be so, as was well stated by the Senator from Delaware, you would not necessarily determine the fitness for office, you would not determine the moral qualities by a mere examination. There are other things to be taken into account. Character, responsibility, can not be determined by giving the answers to a few questions.

I say that the test is insufficient, it is too narrow. The chance for fraud and deception exists everywhere in that step. Then comes the next step. Four persons are selected and sent to the appointing officer, from whom he is to select. Is there any law which will prevent him from ascertaining who these four persons are and what their politics are? You may have all the law you will, but the officer who makes the selection will know by some means, by some wink, and you can not punish him for it. The more criminal statutes you have the more they will be violated. It is impossible to execute such a law; and consequently when the names of four are sent to the head of a Department he selects the one he desires to appoint to accommodate some friend or for some purpose that is not known to the public, and the responsibility rests nowhere.

A member of Congress is not even allowed to testify as to the qualifications of an applicant. He can only say whether or not he is of a good moral character, and it is an ungrateful task to file a protest against the moral character of applicants. If the applicant has not such a character that a Member of Congress can conscientiously recommend him, he would not do so, but he does not want to be put into the position of being an accuser. Consequently the man who represents the people has no power to prevent the appointment, because he is unwilling to become a public accuser, although he may know very well that this person has not such a character, such business habits, and such a standing in the community as would entitle him to first-class confidence; that he is not such a man as he would select. Then the applicant is slipped in and the responsibility is nowhere. You can not fix the responsibility. An officer has been put in, and you may go the rounds and nobody is responsible for the transaction.

It is a secret machine and it will work a demoralization of the civil service. Besides, it places all the power in the hands of the President, if he is disposed to use it. He can remove the civil-service examiners; he can remove the Civil Service Commissioners. It places the whole power in his hands, a power that he is unable to execute himself and must trust to others, to secret agents in fact. The President of the United States can not know the people in the various districts over this vast country. Somebody must select them. There must be some mode of selecting them, and I say the mode devised is a mode that will not work well because it removes responsibility from everybody. No-

body is responsible, for it is a secret institution; nobody is responsible for its workings. It can be said "according to the best examination this man has gone through;" and you have the places filled by unworthy men and nobody is responsible for the appointments. I say the old system of the Constitution, under which appointments were made on the recommendations of citizens, including members of Congress, whose recommendations were on file, so that somebody was responsible, was better than this secret system of thimble-rigging that has been recently invented.

Mr. President, this law ought to be repealed for one reason if for no other: it is a law to promote duplicity and lying. It is a law the very execution of which will breed a race of rascals, because its method is secret and there is no responsibility anywhere. The people will learn of the secret ways of manipulation. The President himself can not tell, nobody can tell the machinery by which men are worked into office. There is an examination on questions which may be as irrelevant to what the man is to do, what is required to be done, as possible, having no reference to it, and when that is done he gets a certificate. If it is fairly done, it is an accident. This one or that one will get a position in advance or will by accident answer some very easy questions, have hard questions put to him and get through by accident without any real test of his qualifications for the place desired. Then comes the manipulation of the four names that are certified.

The members of Congress who represent their districts are excluded; in fact, this law disqualifies them as witnesses. The testimony of a member of Congress can not be taken as to the qualifications of an applicant for office. The testimony of the representatives of the people is inadmissible. The presumption is that the representatives of the people are not competent to testify before an officer having the appointing power. Think of the idea that we are not! If that were true, if they are not as a mass fit to be believed on this question, this Government can not last a year. If the testimony of the representatives of the people of the United States in Congress assembled, who have been selected by the suffrages of the people of the various States, can not be taken as to the qualifications of persons for office, the country has reached a point where it can not exist. Such an idea is absurd. Their testimony ought to be received.

This law goes on the supposition that the people only elect rogues to Congress, men who lie, whose testimony can not be received by those officials having the power of appointment. It is degrading to the public service to put such a provision in the law. It is demoralizing to it to say that members of Congress, who are responsible to their constituents, can not testify as to the qualifications of an applicant, while some secret emissary, for money or for gain or for corruption can, by various arts, worm himself or some other person into office under this irresponsible régime or arrangement and you can not put your hand on a responsible party.

I say, for the honor of Congress, for the good of the service, we ought to return to the practice of holding somebody responsible for recommending persons to office. I know no better class to hold responsible than Senators and Members of Congress. It is said they used their power for patronage; that they advanced themselves; that they got into office by this means their friends. I tell you, sir, if they make bad recommendations their appointments never do them any good. I have known many Members of Congress and Senators to be defeated for re-election because they made bad recommendations.

But how will you defeat these secret, under-ground proceedings? How will you defeat the schemers who manipulate civil-service reform? Why should it be presumed that three men selected by the President who will take the position of commissioners will be better men than those selected by the people, when those three men are shielded from all responsibility by pretending that they are doing it according to the rules, and that if anybody is to blame it is the rules and not they? I ask what presumption is there that these three men will be better men than members of Congress, and what presumption is there that these three men will know more? They can not know the character and standing of the applicants. It is impossible. No one man in this country can have a universal acquaintance. Their acquaintance is limited; they are liable to be imposed upon every day, and nobody is responsible, and nobody can be called to account when a mistake is made in these examinations.

Then, when the examination is over, four names are sent to the appointing officer, and he shields himself under the certificate of examination, and he is not responsible; and when you appeal to the President he says, "All this is done under the civil-service rules; it is done in pursuance of the law; I can not control it; I can not remedy the evil."

This is the system. There is no redress anywhere. You may fill all the offices with irresponsible, worthless men under this system and there is no remedy. I say unless a better remedy than this can be devised, unless something better than the civil-service law can be invented, it had better be repealed and a law passed that nobody shall be prosecuted for what has already occurred under it. I think that would be a good idea right now before Congress adjourns to repeal the law and pass an act of oblivion, and let us know who appoints to office, let us know who is responsible for it, and let us know something about it.

I do not believe in secret machines; I do not believe in secret organizations, because rogues who have time to attend to such matters will succeed and honest men will fail. I believe the honor of the country requires that an act of oblivion be passed for all violations of this law, which are numerous and which never can be punished in the very nature of things, and, perhaps, ought not to be punished because the law itself is so defective. I think we ought to have an act of oblivion and start anew under the Constitution and let us know who puts men in office and why they are put there and let our constituents know, and then I think we shall be able to make some improvement.

We have now the spoils system under this law intensified; the spoils system placed in the hands of spoilsmen alone, not placed in the hands of a man who is indorsed by his people, but placed in the hands of men who have the time to manipulate the system, in the hands of men who have no interest in the country, in the hands of secret agents, secret workers, and as long as you have this law you will have scandals under any administration, because as long as human nature remains the same trickery and fraud will be practiced where trickery and fraud are encouraged by law.

The PRESIDENT *pro tempore*. Is the Senate ready for the question on the passage of the resolutions?

Mr. VEST. Let the resolutions be read.

The PRESIDENT *pro tempore*. The resolutions will be again read.

The Secretary read the resolutions of Mr. HALE as modified.

Mr. VEST. Mr. President, I have not the slightest disposition to say a word about these resolutions, and to be very frank I care nothing about them, but there are one or two expressions contained in them which I think entirely improper in resolutions of inquiry. If I caught the reading correctly, and I listened as attentively as I could, the language is, "What orders have been issued as to the politics"—please read that over, Mr. Secretary. I object to the assumption of a fact which I know nothing about and care very little about and do not believe to exist.

The PRESIDENT *pro tempore*. The Secretary will read the clause referred to by the Senator from Missouri.

Mr. VEST. The part as to what orders were issued or what measures taken to ascertain the politics.

Mr. HALE. The last clause of the first resolution.

The Secretary read as follows:

And also to inform the Senate what measures have been taken by the War Department to learn the political opinions of the women and children in its employ.

Mr. VEST. I object to that form of expression in a resolution of inquiry, not because it is on this subject, but on any other. It should read "whether any measures have been taken to ascertain the politics; and if so, what."

Mr. HALE. "What measures, if any."

Mr. VEST. That will do.

Mr. HALE. The suggestion is correct. The language to which the Senator refers was not in the original resolution. It was suggested by another Senator.

Mr. VEST. I do not know anything about it.

The PRESIDENT *pro tempore*. Does the Senator from Maine propose to modify the resolution by inserting the words "if any?"

Mr. HALE. Yes, sir.

The PRESIDENT *pro tempore*. The modification will be stated from the desk.

The SECRETARY. After the word "measures" it is proposed to insert "if any;" so as to read:

And also to inform the Senate what measures, if any, have been taken by the War Department to learn the political opinions of the women and children in its employ.

Mr. VEST. The same thing occurs in another part of the resolution, I think. I am not familiar with it, and not able to specify it, but I so recollect it. As to women and children, I think it is.

Mr. HALE. I think it does not occur in any other place.

The PRESIDENT *pro tempore*. The clause has just been read.

Mr. VEST. Then it is in another one. It occurs twice, it seems to me.

The PRESIDENT *pro tempore*. The resolutions will be sent to the Senator from Missouri [Mr. VEST] for his inspection.

Mr. VEST. I believe I was mistaken as to the language of the resolution.

Mr. HALE. I do not remember any other place where the language alluded to occurs.

The PRESIDENT *pro tempore*. The question is on agreeing to the resolutions of the Senator from Maine [Mr. HALE].

The resolutions were agreed to.

FOURTH-CLASS POSTMASTERS.

The PRESIDENT *pro tempore*. If there be no further morning business, the Calendar under Rule VIII is in order.

Mr. REAGAN. I ask the indulgence of the Senate to call up Senate bill 3501, Order of Business 2284.

The PRESIDENT *pro tempore*. The title of the bill will be stated.

The SECRETARY. A bill (S. 3501) relating to the classification of post-offices and amendatory of the act approved March 3, 1883, entitled "An act to adjust the salaries of postmasters."

Mr. DAWES. At the adjournment last night the Senate had under consideration a bill called up by the Senator from Minnesota [Mr. SABIN]. The Senator from Minnesota had the promise informally that if an adjournment was had the bill should be taken up this morning on the motion of the Senator from Vermont [Mr. EDMUNDS] and completed. The Senator from Minnesota was obliged to leave this morning, and the Senator from Vermont is not here.

The PRESIDENT *pro tempore*. The Chair therefore recognized the Senator from Texas [Mr. REAGAN].

Mr. DAWES. I venture to ask that the Senate may redeem the plighted pledge made last night to the Senator from Minnesota.

The PRESIDENT *pro tempore*. Does the Senator from Texas yield?

Mr. REAGAN. I ask the Senator from Massachusetts if the bill alluded to by him will take much time?

Mr. DAWES. I do not think any discussion will be had upon it.

Mr. REAGAN. The bill to which I have called attention is one which relates to the interest of 50,000 postmasters and the postal service otherwise. It is a bill that I do not think, when it is read, Senators will object to.

The PRESIDENT *pro tempore*. If there be no objection, the bill called up by the Senator from Texas will be considered as in Committee of the Whole.

Mr. DAWES. I would like the ruling of the Chair as to the unfinished business.

The PRESIDENT *pro tempore*. There is no unfinished business during the morning hour.

Mr. DAWES. Will there be at 2 o'clock?

The PRESIDENT *pro tempore*. The unfinished business at 2 o'clock will be House bill 9151, known as the Northern Pacific forfeiture act.

Mr. DAWES. I have done my duty to the absent Senator. I do not feel under any further obligation.

Mr. ALLISON. I have been compelled to be absent from the Chamber for some days, and ask the indulgence of the Senate to call up a small private bill.

The PRESIDENT *pro tempore*. The Chair has recognized the Senator from Texas [Mr. REAGAN], and his bill is before the Senate as in Committee of the Whole, and was about being read.

Mr. ALLISON. Very well; I shall not interpose. I was not aware of it.

The PRESIDENT *pro tempore*. The reading of the bill will proceed.

The bill S. 3501 was read and considered as in Committee of the Whole.

Mr. HALE. I want to ask the Senator from Texas one question. I ask that in the course of any remarks which he has to submit on this bill he will explain whether there is any class of postmasters covered in its provisions whose salaries are not increased by this measure.

Mr. REAGAN. Yes, sir, I will.

Mr. President, I think a brief explanation of the pending bill will be sufficient. It will be remembered by Senators that petitions have been received from all parts of the country for the increase of the compensation of fourth-class postmasters. There was application for the increase of the compensation of second and third class postmasters, but that was provided for, as will be remembered by the Senator from Maine, in the bill appropriating for the expenditures of the Post-Office Department by allowing pay for rents, fuel, and lights. Nothing in that bill, however, affected the interests of fourth-class postmasters.

There are of this class of postmasters, as appears by the letter of the Postmaster-General of May 3, 51,592. The bill provides to increase their pay. Under the law as it now is when the receipts of an office are $50 a quarter, amounting to $200 a year, or less, the percentage allowed to the postmaster is 100 per cent. This bill provides that up to the amount of $60 a quarter, that is, $240 a year, they are to have 100 per cent., and in that proportion. It is a very small increase, but it is an increase.

The aggregate amount which the bill would carry above the present aggregate for the payment of this class of postmasters is estimated by the Postmaster-General to be $287,043. By a calculation which I have made that would make an average annual increase of compensation of fourth-class postmasters of $5.52, and it would make an average increase of their quarterly pay of $1.35. Some of course would get more and others less. I merely refer to that to show the rate of increase.

I suppose Senators are so well informed upon this subject that it is hardly necessary to take up the time of the Senate by any protracted discussion of the question. Formerly the rates of postage were higher than now. When we reduced the postage on letters, for instance, from 3 to 2 cents a letter, there was a corresponding reduction of the percentage on postage-stamps that went to the postmasters, and a reduction of their compensation. The reduction of the postage on letters and the reduction of the postage on other mail matter, especially fourth-class matter, has very largely increased the labors of these fourth-class postmasters.

The PRESIDENT *pro tempore*. The hour of 2 o'clock having arrived, the Senate, as in Committee of the Whole, resumes the consideration of the unfinished business, which is the bill (H. R. 9151) to forfeit certain lands granted to the Northern Pacific Railroad Company, and for other purposes.

Mr. REAGAN. I ask permission to have the pending bill continued.

The PRESIDENT *pro tempore*. The Senator from Texas asks unanimous consent that the unfinished business be informally laid aside. It will be so ordered if there be no objection, and the consideration of the bill called up by him will be continued.

Mr. REAGAN. I was explaining that while the duties and the labors of this class of postmasters have been increased their compensation has been reduced, and the Department believe that an increase is proper, and this bill was prepared in the Department as it is. The Senate Committee on Post-Offices and Post-Roads believe this increase ought to be made, and have instructed me by the unanimous consent of those of the committee who were present to report the bill to the Senate and ask the favorable action of it.

What I have said shows how the necessity for this increase comes about, and it is an increase to but a small extent and is in response to petitions which certainly are based upon justice. Surely there should be some increase. The Post-Office Department recommend this increase and the Senate committee recommend it.

In response to the inquiry of the Senator from Maine [Mr. HALE] I ought to say that there is no increase in the bill for any postmasters except fourth-class postmasters.

There are some other provisions in the bill that are simply intended to remedy the administration of the Post-Office by preventing postmasters from making commissions of postage-stamps and stamped envelopes, which the Department deem to be necessary and which I suppose is to prevent such things as selling postage-stamps for goods in order to get an increase of percentage. The postmasters ought to be confined to the legitimate selling of stamps for the business of the Department.

This covers the idea embraced in the bill, and unless something more is called for I will not occupy the time of the Senate.

Mr. TELLER. I should like to ask the Senator what the percentage of increase is by this bill?

Mr. REAGAN. The precise percentage I can hardly state. Perhaps it is 3 or 4 per cent.

Mr. TELLER. Three or four per cent. on the present salaries of these postmasters?

Mr. REAGAN. I gave this illustration: Under the present law, where a postmaster gets $50 or less for a quarter, making $200 or less for a year, he gets 100 per cent., with a gradual reduction of his percentage as the receipts go up. Under this bill he would get 100 per cent. on the first $60 a quarter; he would get 100 per cent. on the first $240; and then there is a corresponding reduction. It is a very slight increase in the compensation. Of over $8,000,000 paid to fourth-class postmasters, according to last year's statement, it will make an increase of two hundred and eighty and odd thousand dollars, or an average of $5.52 to each of these postmasters for a year, or an average of $1.35 a quarter.

I shall be glad to have the favorable action of the Senate upon the bill, for it is certainly one that appeals to our sense of justice, and has the indorsement of the Department and the committee.

Mr. ALLISON. I call the attention of the Senator from Texas to the fact that this bill is to take effect on the 1st day of July, 1888. I suppose the object of that provision is that these postmasters' salaries may relate back to that particular moment of time. Is that it?

Mr. REAGAN. The recommendation upon which the bill was prepared and sent here by the Department is dated September 11, and I suppose the object is to make this increase take effect from the 1st day of July now past.

Mr. ALLISON. I think it had better take effect at the end of the present fiscal year. I think it had better take effect on the 1st of July, 1889. Then there would be an opportunity of adjusting the appropriations in accordance with it. I think that would be better.

The PRESIDENT *pro tempore*. Does the Senator move an amendment?

Mr. ALLISON. I should like to hear the last section of the bill read.

The PRESIDENT *pro tempore*. Section 5 will be read.

The Secretary read as follows:

SEC. 5. That this act shall take effect and become operative on the 1st day of July, 1888, and not sooner, except that it shall so far take effect from the 1st day of April, 1888, as to require the Postmaster-General to classify the post-offices as third-class offices which become so by virtue of this act and fix the salaries, and make any allowances they may be entitled to by law, to take effect July 1, 1888.

Mr. ALLISON. Certainly this statute should not be retroactive. We shall get into the trouble that we have been in for some years about what is known as the Spalding act if we undertake to make this retroactive. It ought to take effect in the future, and so far in the future as to make it absolutely certain that nobody will come here with a claim. I think a bill of this importance, increasing the compensation of postmasters all along the line in various ways, certainly should not

take effect until the beginning of the next fiscal year; and I submit that to the Senator from Texas as a wise provision.

Mr. REAGAN. Ordinarily I should agree with the Senator from Iowa, but the returns are all in in this case and the justice and necessity for this change are so manifest that, unless it would work inconvenience, I should regret very much to see these postmasters denied an increase of salary for another year when the returns to enable the Department to make the adjustment are now in, and show as well as they will show at the expiration of another year who would be entitled to the benefit of this increase.

Mr. ALLISON. There are some penal provisions in the bill which I think might make it a little awkward to have it take effect retroactively, and besides this is a small compensation to each postmaster and they have got on with the present compensation for a great many years. I think in increasing their compensation in this way we had better make it take effect in the future. Therefore I suggest some future day, either the 1st of July, 1889, or the 1st of April, 1889.

Mr. EDMUNDS. It ought to be the fiscal year.

Mr. ALLISON. It ought to begin with the first of the fiscal year, and I make that motion if the Senator from Texas will not agree to modify the bill.

Mr. REAGAN. I need only repeat what I have said, that by the reduction of the postage and the loading of the mails with a large additional amount of mail-matter, the result of the percentage of postage-stamps canceled by postmasters was reduced and their salaries were reduced. The injustice is so manifest that petitions have been universal from them asking a restoration of the rates or a compensation proportioned to the labor which they render.

This amendment perhaps about brings the compensation back to where it was before, and it is in answer to the demand made from the country generally, as I have stated, a demand which covers the claims of fifty-one thousand and odd postmasters, and is so just that the Department first recommended in a communication to the other House and then in a communication to the Senate that this measure of relief should be given to take effect at the date prescribed, and the Senate Committee on Post-Offices and Post-Roads concur with the Postmaster-General in the belief that this is just.

There is no trouble, as I understand; and I do not see how any trouble can arise in making the classification on the returns that were in at the close of the last fiscal year, so that if the act takes effect from the beginning of the present fiscal year there will be no more difficulty than there would be in making the classification under the returns at the end of this fiscal year. It is simply a question whether we will do justice to these postmasters now, or defer that justice to the end of the fiscal year. I trust the amendment of the Senator from Iowa will not be adopted.

The PRESIDING OFFICER (Mr. PASCO in the chair). The Secretary will report the amendment.

The SECRETARY. In section 5, line 3, it is proposed to strike out the word "eight" and insert "nine;" so as to read:

That this act shall take effect and become operative on the 1st day of July, 1889.

The PRESIDING OFFICER. The question is on the amendment. [Putting the question.] The ayes appear to have it. The ayes have it, and the amendment is agreed to.

Mr. REAGAN. I will not call for a division on the amendment, as there may not be a quorum here.

The PRESIDING OFFICER. The Chair will call the attention of the Senator from Texas to the remainder of the section to see whether any other changes should be made to correspond with the amendment just adopted.

Mr. REAGAN. I suppose that would make it proper to strike out the words commencing after "1888," in the third line, down to the work "1889," in the fourth line.

The PRESIDING OFFICER. The proposed amendment will be stated.

The SECRETARY. In line 3, after the date "1888," it is proposed to strike out:

And not sooner, except that it shall so far take effect from the 1st day of April, 1888.

The PRESIDING OFFICER. The proposed amendment will be agreed to if there is no objection. The Chair hears none, and it is agreed to.

Mr. ALLISON. Then "1888" ought to be struck out at the end of the section and "1889" inserted.

Mr. EDMUNDS. Let the section be reported as it stands.

The PRESIDING OFFICER. The section will be read as amended.

The Secretary read as follows:

SEC. 5. That this act shall take effect and become operative on the 1st day of July, 1889, as to require the Postmaster-General to classify the post-offices as third-class offices which become so by virtue of this act, and fix the salaries and make any allowances they may be entitled to by law, to take effect July 1, 1888.

Mr. REAGAN. Instead of saying "as to require," it should read:

And the Postmaster-General shall classify the post-offices as third-class offices which become so by virtue of this act.

The PRESIDING OFFICER. The amendment will be reported.

The SECRETARY. It is proposed to amend the section so as to make it read:

That this act shall take effect and become operative on the 1st day of July, 1889, and the Postmaster-General shall classify the post-offices as third-class offices which become so by virtue of this act, and fix the salaries and make any allowances they may be entitled to by law, to take effect July 1, 1888.

Mr. ALLISON. "To take effect from and after the 1st day of July, 1889," it should be. The object I have in view is to have this law take effect thereafter and that there shall be no adjustment of accounts prior to that time, because unless we do that all these postmasters' accounts must be readjusted on the basis of this new law.

Mr. REAGAN. There is no objection to that. The first amendment being adopted, that is proper.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In section 5, line 8, after the word "effect," it is proposed to insert "from and after;" so as to read:

And make any allowances they may be entitled to by law, to take effect from and after July 1, 1889.

Mr. EDMUNDS. I move to amend that by striking out the printed words "to take effect;" so as to read:

Entitled to by law from and after July 1, 1889.

That will make it clear that it operates *in futuro*. Just strike out the printed words "to take effect," and then we shall all understand it alike.

The PRESIDING OFFICER. The amendment will be reported.

The SECRETARY. In section 5, line 8, after the word "law," it is proposed to strike out the words "to take effect;" so as to read:

And make any allowances they may be entitled to by law from and after July 1, 1889.

The amendment was agreed to.

Mr. REAGAN. I did not exactly understand that. The idea of that provision must be embraced there because this law would make some third-class offices that are not now third-class offices, and the idea was that the law in relation to classification should be carried out. Is that stricken out?

Mr. EDMUNDS. No, sir; it is the allowance to take effect from and after the 1st of July, 1889; so that making this classification their right to readjusted salary will commence on the 1st of July next. That is what I meant to do.

Mr. REAGAN. Let it be reported again.

The PRESIDING OFFICER. The Secretary will report the entire section as amended.

The Secretary read the section as amended, as follows:

SEC. 5. That this act shall take effect and become operative on the 1st day of July, 1889, and the Postmaster-General shall classify the post-offices as third-class offices which become so by virtue of this act and fix the salaries, and make any allowances they may be entitled to by law, from and after July 1, 1889.

Mr. REAGAN. That is all right.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FORT BROOKE MILITARY RESERVATION.

Mr. CALL. I ask the Senate to take up for consideration the bill (S. 3340) for the donation of Fort Brooke military reservation at Tampa, Fla., for free schools and other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. EDMUNDS. Let it be read for information.

Mr. TELLER. I shall have to object to that bill. It has not been to the committee, as I understand. I will inquire if that bill has been before the Committee on Public Lands or any other committee?

Mr. CALL. It was reported from the Committee on Public Lands.

The PRESIDING OFFICER. The bill was reported from the Committee on Public Lands, and has once been before the Senate for consideration.

Mr. TELLER. Then it is a different bill from the one I supposed.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. EDMUNDS. Let it be read for information.

The PRESIDING OFFICER. The bill will be read for information.

The Secretary read the bill, and, by unanimous consent, the Senate, as in Committee of the Whole, resumed its consideration.

The PRESIDING OFFICER. The Chair understands that an amendment is pending, which was offered by the Senator from Connecticut [Mr. HAWLEY]. The amendment will be stated.

The SECRETARY. In section 1, line 14, after the word "hereby," it is proposed to strike out "granted" and to insert "allotted;" so as to read:

Five acres for a marine hospital, and 25 acres which is hereby allotted to the city of Tampa for a public park.

Mr. EDMUNDS. I do not object to the amendment, but I should like to inquire whether there is any written report on the bill?

The PRESIDING OFFICER. The Chair is informed that there is no written report on the bill.

Mr. EDMUNDS. This bill has not been to the Committee on Military Affairs, which has to do with military reservations.

The PRESIDING OFFICER. The bill was reported from the Committee on Public Lands, the Chair is informed.

Mr. CALL. Will the Senator from Vermont allow me to explain the matter to him? Under the act of Congress for that purpose this reservation was surrendered to the Interior Department for disposal as a part of the public lands of the United States. It was surrendered several years ago, and it has been a matter of contention in regard to the method in which it should be disposed of. There have been various claims made against it, some of scrip location and some attempts to make homestead entry, all of which have been disposed of by two different Secretaries of the Interior in the same way.

The reservation lies adjacent to the city of Tampa, right alongside of it, and it is necessary that something should be done in order to allow the extension of the town in that direction; otherwise the people who are locating there will be compelled to seek homes and lots for business purposes in another and not so desirable portion of the city. There is a very decided feeling, I am told, on the part of the people of Tampa that the matter should be settled, so that the land can be made use of for the convenience and advantage of the town.

Mr. EDMUNDS. I should have supposed that, considering the situation of Tampa and its growing importance as a seaport, it would have been the interest of the United States to preserve this military reservation in order that at the proper time, which I have no doubt will come, suitable fortifications and other military structures, etc., may be erected there, instead of disposing of the reservation, now that railways and steam-ships meet at that place, making it a port which will require the usual defensive works. This land ought to have been kept for that purpose; but if Congress has already decided that it shall not be, and it is turned over to the public lands of the United States, that may be another question.

Mr. CALL. I will state further to the Senator from Vermont that the location of the reservation is, in the opinion of military authorities, not desirable as a place for a fortification of any kind. It is on the Hillsborough River, which is some distance removed from the entrance to the bay; while on either side of the Bay of Tampa there are eligible positions for commanding the channel or any approach into the deep water of the harbor. Those points are at least 10 or 20 miles from the present reservation. This reservation was made at a time when it was desirable to protect the country from the Indians. It is an old reservation, having been used exclusively for that purpose.

The great object that I have had in view in the matter was to have this bill so amended that the proceeds of the sale of the lots might be donated to the town of Tampa for the industrial education of her people. The committee, however, have not approved of that idea. I thought I would submit to the Senate a motion to amend the bill, simply appropriating the proceeds of the sale of the lots as provided for in the bill to the town of Tampa for educational purposes under any limitation that might be prescribed by the Secretary of the Interior.

Mr. EDMUNDS. If I may interrupt my friend, I notice by the bill that that particular proposition has already been disagreed to.

Mr. CALL. I do not so understand it.

Mr. EDMUNDS. It is so noted on the file copy, so far as I can read it.

Mr. CALL. When the bill was up before, that motion to amend was made; but the bill went over pending the discussion of the proposition, as I remember.

Mr. BERRY. Mr. President——

The PRESIDING OFFICER. The amendment referred to by the Senator from Florida was disagreed to as in Committee of the Whole. The pending amendment is the amendment which was offered by the Senator from Connecticut [Mr. HAWLEY]. Of course the Senator from Florida will be at liberty to offer the same amendment in the Senate when the bill reaches the Senate.

Mr. BERRY. I rose simply to make the statement which has been made by the Chair. The amendment was disagreed to as in Committee of the Whole, but the senior Senator from Florida gave notice that he would renew it in the Senate. The bill did not reach the Senate upon its former consideration, and therefore the amendment was not offered.

The PRESIDING OFFICER. The pending question is on agreeing to the amendment offered by the Senator from Connecticut [Mr. HAWLEY] to strike out in line 14 of section 1 the word "granted" and insert the word "allotted;" so as to read:

And 25 acres which is hereby allotted to the city of Tampa for a public park.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The PRESIDING OFFICER. Are there amendments to be offered to the bill in the Senate?

Mr. EDMUNDS. I think the Senator from Florida desires to renew the amendment he offered before. It is written already on the file copy, probably just as the Senator would like to renew it.

Mr. CALL. I renew the amendment in that form.

The PRESIDING OFFICER. The amendment proposed by the Senator from Florida will be stated.

The SECRETARY. It is proposed to add as an additional section:

SEC. 4. That the proceeds of the sales of the lots shall be donated to the city of Tampa for the support of an industrial school.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Florida [Mr. CALL].

Mr. CALL. I hope the Senate will adopt the amendment. This little piece of ground, of 140 acres, I believe it is now, has been made valuable entirely by the settlement and growth of the town, and by the improvements which the people have made there. It is immediately adjacent to the region of country in which are Indians who have no home and no settled location, but for whom a provision has been made in the Indian appropriation bill of this year, with the recommendation of the Committee on Indian Affairs, I believe, at least with the approval of the chairman of that committee.

I think it very desirable that as many institutions as may be available should be established there for the education of that class of people and others who are like them inhabiting the everglades of Florida, and who are upon the outskirts of a settled country. In that point of view, considering the population that is found upon the coast, I urge the amendment. They are a very excellent class of people, some from the West Indies, some from Cuba, and they are poor. They subsist by cigar-making and by fishing and gathering sponges and coral. I think it very desirable that as extensive privileges of education as can possibly be obtained should be furnished to them, and especially industrial education.

Under those circumstances I have for years been seeking to obtain an appropriation of the proceeds of the sale of this property for the cause of education in that locality. It is a somewhat peculiar and exceptional case, though similar to the case at Fort Smith, Ark., where the reservation under almost exactly similar conditions was donated to the town for the purposes of education.

Mr. EDMUNDS. May I ask the Senator from Florida how much land has already been given to the State of Florida by the United States for the support of schools?

Mr. CALL. I do not remember exactly the amount. I think the Government gave the sixteenth section in each township.

Mr. EDMUNDS. The sixteenth and thirty-sixth sections, was it not?

Mr. CALL. I know the sixteenth was given. I am not quite sure about the thirty-sixth.

Mr. EDMUNDS. That would be two sections in each township.

Mr. CALL. Only the sixteenth section was given, I am informed by the Senator from Arkansas [Mr. BERRY], who is upon the Committee on Public Lands. The sixteenth is the only one given, I remember. The Government gave, in addition to that, a large number of acres of land, I think less than 50,000 acres, for two seminaries, many years ago, which are now existing and maintained, the land having sold for a very inconsiderable sum, as it was at a time when land had very little value in Florida.

The money was invested and the State has assumed the payment, and is paying it. The funds were lost, I think, during the war, but the investment is made good by the State. The State of Florida is now maintaining those schools and paying the interest upon the money as it originally agreed to do; but it has had no large appropriations of public land for public schools, there having been only the ordinary sixteenth section.

Mr. EDMUNDS. I was under the impression that in all the admitted, new States, the sixteenth and thirty-sixth sections in each township were granted to those States for the use of schools. Perhaps I am mistaken. But certainly the State of Florida has had more than one special grant, and pretty large ones, of land there for the benefit of seminaries of learning and for other educational purposes, agricultural colleges, etc., and has shared well with all the other people of the States, new and old, in all the beneficence of the Government concerning the disposition of public lands. In that State in particular, I suppose, the amount of what were called swamp and overflowed lands that have been granted to that State would be something very large, indeed; and we all know that what forty years ago were called swamp and overflowed lands have turned out in a very large proportion to be lands of the greatest agricultural value.

So I can not see upon what principle of justice to the rest of the people of the United States the public authorities of any part of the State of Florida should take the sum of money, great or small, which is to be got from the sale of this property of the United States, for the purposes of their schools. It does not appear to me to be just.

Mr. BERRY. The Senator from Vermont is mistaken in the opinion that the Southern States received two sections of land for school purposes. The sixteenth section only I think was given to all the Southern States. The Western and Northwestern States at a subsequent period did receive two sections of land.

However, the amendment offered by the Senator from Florida was thoroughly considered by the Committee on Public Lands. The chairman of that committee is absent in Kansas. He was very much op-

posed to the amendment for various reasons, and the committee unanimously reported the bill as it now stands.

One objection made to the amendment was that there were other reservations, especially one in Kansas, at Leavenworth, that would have to be disposed of at subsequent periods, and there were reservations in various other States. If this money was given to the town of Tampa, then it would be proper to make the same donation to other towns.

Another objection urged against the amendment by the chairman of the committee was that the people in Tampa, the citizens who reside in the town, have no greater right to receive this benefit than the entire county in which it is located, or the State of Florida; that it was selecting them out and giving them particular advantages where others were entitled to equal advantages.

Those were the reasons which induced the committee to report adversely to this proposition. It is true there is a precedent, and probably more than one precedent. There is one in my own State. The reservation at Fort Smith in my State was given to the town of Fort Smith perhaps three or four years ago. For that reason it was very strongly urged that we should follow the precedent.

I felt it my duty to state the objections that were urged by the chairman of the committee in his absence.

Then the amendment, as offered by the Senator from Florida, it strikes me, is simply to establish an industrial school without any conditions attached as to the character of the school, or any security that the money will be applied in that way.

When the money was given to Fort Smith it was accompanied by various conditions about how the land was to be sold and the money received. Only the interest was to be used for school purposes, and various other conditions that I can not now recite were prescribed. The pending amendment simply provides for the support of an industrial school without stating the character of the school or whether any school of that kind has already been established.

All these, in my opinion, are objections to the amendment. They were urged, however, more strongly by the chairman of the committee than any one else upon the committee; and in his absence I felt it my duty to state his objection to the amendment, and then let the Senate determine the matter.

Mr. TELLER. The case that the Senator from Arkansas cites in his own State, which he says was used before the committee, could hardly be a precedent, because there were peculiar circumstances attending that case which I need not go into now. There was there quite a different condition of affairs from what exists in connection with this place.

As a general rule, I am quite disposed to be liberal with reference to appropriations for school purposes; but having adopted a policy to dispose of these reservations for the public good, for the interest of the entire country, I do not see why we should make an exception in this case. If we do it in this case we must take a great number of military posts in different parts of the country that have been abandoned and turn them over to the local authorities. Unless Congress is prepared to enter upon that sort of a system there can be no special reason why in this case the property should be donated to the people of the city of Tampa.

I think the committee were unanimous in rejecting the present suggestion, although one member of the committee, I believe, was in favor of donating the proceeds of the land to the public schools of the State, or the city, or county, I do not remember which; but nobody was in favor of the proposition as now made.

Besides, from all the evidence the committee could get, the people of the town of Tampa are entirely satisfied with the proposition contained in the bill. This property has been lying there unoccupied for many years. The reservation of the park is a very valuable provision for the city. It is a very delightful portion of the reservation and the most valuable part of it. While this is not an absolute donation to the city, yet practically that is what it amounts to. It will probably never be resumed by the Government for any purpose of the Government, and it is a very valuable donation.

In addition to that, we have set apart other ground for public buildings, which if the Government should ever build on would furnish an additional park, because the grounds reserved are much larger than the public buildings will ever occupy or require. If the Government does not use that part of the reservation it will inure to the benefit of the city. So, on the whole, it is a very liberal donation to the city of Tampa.

I repeat that I was satisfied myself that the city of Tampa is anxious to have this reservation disposed of in such a way that it may be occupied. The portion of it that will be sold as a park might be put in proper order to make the place attractive.

I believe I do not misstate the fact when I say that the people of Tampa are interested in this bill in the shape it now stands, and it is much more likely to become a law if it passes in the shape that we have reported it than if it should be amended in the way the Senator from Florida suggests. I do not believe it is in the interest of the people of Florida to put on the amendment he suggests.

I should like to say further that the State of Florida has no right to complain of the munificence of the Government with respect to the public lands. They got their sixteenth section of school lands; they got their agricultural college lands; they got their internal improvement lands, and they got the general amount of lands, a large amount, that the Government donated to the new States. Indeed, they got nearly the entire State; and I have thought when I have listened to the Senator from Florida on various occasions that they had got all the State. They certainly got all the swamp land there was in the State. On various occasions the Senator has told us that under the pretense of getting swamp land the State had gobbled up, using a Western phrase, all the dry land besides. So if that is true, putting the two together, they have got all the land in the State. They ought to be satisfied to let the Government retain this small reservation, having got a very large donation in every way for schools, for colleges, and as swamp lands, and everything else, and now a very handsome donation is made in this bill itself. While it is not an absolute gift, I repeat, it is practically a donation. It looks to me as rather being a little bit avaricious for the Senator to claim any more.

I am willing to deal liberally with them, and the committee thought we had dealt very liberally when we selected 30 acres of the finest land on that whole reservation, which is worth several thousand dollars an acre at least, as a practical donation to the city. I think the Senator ought to be content with that.

Mr. CALL rose.

ADJOURNMENT TO MONDAY.

Mr. EDMUNDS. I move that when the Senate adjourn to-day it be to meet on Monday next.

The PRESIDENT *pro tempore*. The question is on agreeing to the motion of the Senator from Vermont.

Mr. BLAIR. I ask unanimous consent to say a word before that motion is put. This session is not too active for the business of the country. There are a great many bills that require action; there is a great deal of talk to be made before the discussion of the tariff bill can be properly in order. I hope the Senate will not consume the slight intervening time that there is before that debate is expected to commence by this thoughtless adjournment. There is a good deal to be done upon the Calendar. I hope the Senate will remain in session and devote itself to the public business to-morrow at least, if not on Saturday.

The PRESIDENT *pro tempore*. The question is on agreeing to the motion of the Senator from Vermont. [Putting the question.] The ayes appear to have it. The ayes have it, and the motion is agreed to.

Mr. CULLOM. I ask leave to submit a conference report.

Mr. BLAIR. I call for a division on the motion of the Senator from Vermont.

The PRESIDENT *pro tempore*. The Senator from New Hampshire asks for a division. Senators in favor of the motion will rise and stand until counted.

The Senate proceeded to divide; and the ayes were 20.

Mr. HARRIS. The Senator from New Hampshire, I trust, will not demand a further count. Twenty have voted in the affirmative.

The PRESIDENT *pro tempore*. More than a majority of a quorum have voted in the affirmative.

Mr. BLAIR. There are several bills upon the Calendar that ought to be acted upon. There are several that I have been waiting months to ask the attention of the Senate to, and, like the man at the pool of Bethesda, just as I thought I was ready to get cured, somebody else who was not half so badly off, who did not need the public attention to anything the extent those bills did, got in with comparatively unimportant matters, and received attention from the Senate, and those bills were passed.

It has come to be that there are some three or four bills which ought to be acted upon before the final adjournment of the session that I fear will receive no attention unless they can receive it between now and next Monday, when, I understand, the tariff discussion is likely to be up. It is with that view, not because I am not as desirous of rest or of relief from these daily sessions as anybody else, that I oppose this motion. I hope the Senator from Vermont will not press it.

One Senator has given notice, I observe, of a desire to address the Senate upon some question to-morrow, Friday, and unless we are to have some system invented and inaugurated by which the whole Senate can talk through a single wire, like the modern duplex telegraph wire, we are not going to have time to relieve ourselves from the public business that is pending and pressing. To adjourn over and spoil the next two days is, I think, entirely wrong and trifling with the public interests. Therefore I hope the Senator will not press the motion. If he does, I shall feel under the necessity of appealing to the yeas and nays.

Mr. CULLOM. Will the Senator yield to me to submit a conference report?

Mr. HARRIS. Before the conference report is submitted (and I wish to submit one immediately afterwards) I desire to suggest to the Senator from New Hampshire that a demand for a further division or a further count may result in our inability to proceed with any business whatever; and if he presses it I for one promise him that it will require a voting quorum to pass any bill or do any other business in this body.

Mr. BLAIR. We shall have to deal with difficulties of that kind when we come to them. If Senators choose to take the responsibility of obstructing business that they otherwise would not, because some members of the Senate feel it to be their duty to go along as far as they can in the ordinary and usual method of procedure, the responsibility will be with those Senators and not with others who, like myself, desire to go on until we come to obstacles.

Mr. HARRIS. I beg to suggest to the Senator, if he will allow me, that it has come to the exact point now where the question referred to by him arises.

Mr. BLAIR. I do not think it has come to the exact point.

Mr. DAWES rose.

Mr. BLAIR. I am proceeding by unanimous consent.

The PRESIDENT *pro tempore*. The Senator will pause one moment. Is there objection to the Senator from New Hampshire proceeding? ["No objection."]

Mr. BLAIR. The question pending has not been decided, and unanimous consent has been given to debate. It is not apparent that I represent a minority of Senators upon the floor, and therefore the Senator from Tennessee is premature in his assumption of fact. I am urging reasons why there is, as I think there should be, a majority opposed to this motion, and I am serious in regard to it. As I said, if we must find out at some time whether we can do business here, I shall endeavor to secure a record by the yeas and nays upon the motion if it becomes necessary.

Mr. DAWES. Mr. President——

The PRESIDENT *pro tempore*. Is there objection to the Senator from Massachusetts proceeding? The Chair hears none.

Mr. DAWES. I simply want to make an inquiry of the Senator from Tennessee. I understand him to say that unless we can adjourn over to-morrow we shall not do any more business. Is that the threat the Senator announces?

Mr. HARRIS. The statement of the Senator from Tennessee was that if the Senator from New Hampshire pressed a further count and developed the want of a quorum, the Senator from Tennessee would be here to see that no business should be done without a quorum. That was the statement of the Senator from Tennessee, and the Senator from Massachusetts can draw whatever inferences or deductions (in which he is immensely fertile) that he chooses.

Mr. DAWES. So I understand the Senator from Tennessee announced that unless he can have his way and adjourn the Senate over to-morrow, he will see to it that no business is done hereafter until a quorum is brought back here.

Mr. CALL. I appeal to the Senator from Vermont to withdraw his motion at present. It has intervened in the midst of the consideration of the bill which has been under discussion, and if pressed now it may defeat the further consideration of the bill.

Mr. CULLOM. Is it in order to submit a conference report?

The PRESIDENT *pro tempore*. Twenty Senators have voted in the affirmative on the motion of the Senator from Vermont that when the Senate adjourn to-day it be to meet on Monday next.

Mr. EDMUNDS. I ask unanimous consent to say a word.

The PRESIDENT *pro tempore*. Is there objection? The Chair hears none. The Senator from Vermont will proceed.

Mr. EDMUNDS. I wish to appeal to the Senator from New Hampshire, in the interest of getting on with a few little things this afternoon, to withdraw his insisting upon a division. At the present moment undoubtedly a quorum of the Senate is within reach, for we ought not to do any business at all without a quorum. The Constitution requires the presence of a quorum.

What the Senator from Tennessee has said ought to be said every day by everybody. If I did not suppose that at this moment a quorum was within reach, could be got within half an hour, and is therefore practically here, I should object to any business being done. The Constitution expressly requires that the number of members of this body who are entitled to do business is a majority of Senators elected, and any less number is not entitled to do business according to the Constitution that we have all pledged ourselves to sustain.

I have stood on that proposition ever since I have been a member of this body, and think it to be a duty to do so. Whether at this moment there may or may not be within this Chamber the requisite thirty-nine Senators, I do not know; and therefore, inasmuch as what would be a majority of thirty-nine have voted in favor of adjourning over, I thought it not unfair to appeal to the Senator from New Hampshire to let the business go on in that way. I did not intend to interfere with the bill that has been under consideration.

Mr. BLAIR. I understand the Senator's point is this, that no business should be done without a quorum.

Mr. EDMUNDS. No business ought to be done without a quorum.

Mr. BLAIR. I propose to see that we do not adjourn over until Monday without a quorum; that is all.

Mr. EDMUNDS. That is right.

Mr. HARRIS. I beg permission to say a single word.

Mr. BLAIR. I ask the Senator from Vermont, however, to withdraw his motion. I do not wish to have it pressed to an issue at this time.

The PRESIDENT *pro tempore*. If there be no objection, the Senator from Tennessee will proceed.

Mr. HARRIS. The motion that when the Senate adjourn to-day it be to meet on Monday next was, as the RECORD will show, not my motion. If the want of a quorum shall be developed at this time, then no business can be done. I know that there are certain matters of public interest and of public business that ought to be done to-day, and I am anxious that they shall be done to-day. Therefore, if the Senator from New Hampshire chooses to develop a condition of things that may prevent our looking after and performing those duties that devolve upon us to-day, I give notice, and I shall stand by it, that I shall insist upon the presence of a quorum.

Mr. EDMUNDS. There is a quorum here now, I am satisfied.

Mr. BLAIR. Before the matter is decided I wish to protest against being made the poor dog Tray of this business. I have been standing upon the conceded right to find out whether this motion commands a majority of the Senate, which it should require, as both the Senator from Vermont and the Senator from Tennessee say, being out of the usual order of adjournment, a majority in order that it may be carried. I was trying to find out whether there was a majority of a quorum in favor of an adjournment over to Monday, and thus losing a day beyond our usual custom. I suggest to the Senator from Vermont that he withdraw his motion for the present. No doubt there will be unanimous consent given for that purpose.

Mr. EDMUNDS. I am satisfied there is a quorum here, and it is a good time to determine the question now that we have a quorum. As it is no party question, everybody is permitted to vote.

The PRESIDENT *pro tempore*. Twenty Senators have voted in the affirmative. The noes will rise. [A pause.] Twelve Senators have voted in the negative.

Mr. EDMUNDS. Let us have the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. TELLER (when his name was called). I am paired with the Senator from Louisiana [Mr. GIBSON]. I do not know how he would vote, and therefore I refrain from voting.

The roll-call was concluded.

Mr. CULLOM. The Senator from Rhode Island [Mr. CHACE] is paired with the Senator from Georgia [Mr. COLQUITT].

Mr. BLAIR (after having voted in the negative). I desire to change my vote. I vote "yea."

The result was announced—yeas 35, nays 9; as follows:

YEAS—35.

Aldrich,	Coke,	Harris,	Platt,
Allison,	Cullom,	Hawley,	Pugh,
Bate,	Davis,	Ingalls,	Saulsbury,
Berry,	Dolph,	Jones of Arkansas,	Spooner,
Blair,	Edmunds,	Manderson,	Vest,
Bowen,	Eustis,	Morgan,	Walthall,
Butler,	Farwell,	Paddock,	Wilson of Iowa,
Cameron,	Gray,	Pasco,	Wilson of Md.
Cockrell,	Hampton,	Payne,	

NAYS—9.

Call,	Hoar,	Sawyer,	Vance,
Chandler,	Mitchell,	Stockbridge,	Voorhees.
Dawes,			

ABSENT—32.

Beck,	Faulkner,	Jones of Nevada,	Reagan,
Blackburn,	Frye,	Kenna,	Riddleberger,
Blodgett,	George,	McPherson,	Sabin,
Brown,	Gibson,	Morrill,	Sherman,
Chace,	Gorman,	Palmer,	Stanford,
Colquitt,	Hale,	Plumb,	Stewart,
Daniel,	Hearst,	Quay,	Teller,
Evarts,	Hiscock,	Ransom,	Turpie.

So the motion was agreed to.

Mr. BLAIR. I move to reconsider the vote just taken, and I do so with the design of withdrawing the motion to reconsider in a moment. Now, sir——

The PRESIDENT *pro tempore*. The motion is not debatable.

Mr. HARRIS. I object to any debate on the question.

Mr. CALL. Mr. President——

Mr. CULLOM. I rise to submit a conference report which I have been trying to get in for some time.

The PRESIDENT *pro tempore*. The conference report can not be received at this time.

Mr. BLAIR. I withdraw the motion to reconsider, and will say what I have to say upon some other occasion.

LIFE-SAVING STATION.

Mr. CULLOM. I rise to submit a conference report.

The PRESIDENT *pro tempore*. Is there objection?

Mr. CALL. That is not in order. The bill which was under consideration by the Senate must be proceeded with.

The PRESIDENT *pro tempore*. The Chair understands that the conference report would be in order except when some Senator was upon the floor.

Mr. CULLOM. I was on the floor myself.

The PRESIDENT *pro tempore*. The Chair understands that the

Senator from Florida [Mr. CALL] had the floor upon the bill that was pending when the motion to adjourn over was entered.

Mr. CULLOM. Can a Senator hold the floor while the yeas and nays are taken on another question?

The PRESIDENT *pro tempore*. Certainly.

Mr. HOAR. I desire to submit respectfully to the Chair, in order that the observation of the Chair may not go as a precedent, that I understand a conference report can be submitted when a Senator is speaking, taking him off his feet.

The PRESIDENT *pro tempore*. That question does not arise now, but if it were up the Chair would decide against the suggestion made.

Mr. CULLOM. I believe the Senator from Florida yields. There will be no controversy over the report.

Mr. HARRIS. The Senator from Florida yields to the Senator from Illinois.

Mr. CALL. Yes, I yield.

Mr. CULLOM submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1856) to establish a life-saving station on the Atlantic coast between Indian River Inlet, Delaware, and Ocean City, Md., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

JNO. P. JONES,
WM. P. FRYE,
Managers on the part of the Senate.
TH. H. BAYLY BROWNE,
T. E. TARSNEY,
Managers on the part of the House.

The PRESIDENT *pro tempore*. The report requires no action on the part of the Senate.

BRIGHTWOOD RAILWAY COMPANY.

Mr. HARRIS. The Senator from Florida kindly consents to yield to me that I may submit a conference report.

The PRESIDENT *pro tempore*. The report will be received.

Mr. HARRIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2742) to incorporate the Brightwood Railway Company of the District of Columbia, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment numbered 1, and agree to the same with an amendment as follows: After the words "single or," in line 8, insert "with the approval of the commissioners of the District, a;" so as to read: "And by that name may sue and be sued, implead and be impleaded, with authority to construct and lay down a single or, with the approval of the commissioners of the District, a double track, etc."

That the Senate recede from its disagreement to the amendment of the House numbered 2, inserting, after the word "cents," in line 12, page 2, the words "*Provided*, If electric wires or cables are used, the same shall be placed underground;" and agree to the same.

That the Senate insist on its disagreement to the amendment of the House numbered 3, and the House recede from the same, the amendment being to insert, after the word "jurisdiction," in line 7, page 6, the words "*Provided*, That the full amount of the capital stock subscribed shall be paid in full in cash before said company shall operate the said road."

That the House recede from its amendment numbered 4, inserting, after the word "construction," in line 16, page 9, the words "*Provided*, That it shall exercise no powers not herein expressly granted."

ISHAM G. HARRIS,
C. B. FARWELL,
JOHN C. SPOONER,
Conferees on the part of the Senate.
BARNES COMPTON,
JOHN T. HEARD,
M. S. BREWER,
Conferees on the part of the House of Representatives.

ADDITIONAL REPORTS OF COMMITTEES.

Mr. SAWYER. I ask the Senator from Florida to yield to me that I may make a report from the Committee on Pensions.

The PRESIDENT *pro tempore*. The report will be received if there be no objection.

Mr. SAWYER, from the Committee on Pensions, to whom was referred the bill (H. R. 2499) increasing the pension of Miss Sarah Mary Carroll, reported it without amendment, and submitted a report thereon.

Mr. VEST, from the Committee on Commerce, to whom was referred the bill (H. R. 11139) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis., reported it with amendments.

He also, from the same committee, to whom was referred the bill (S. 3606) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis., reported adversely thereon, and the bill was postponed indefinitely.

Mr. HAMPTON, from the Committee on Military Affairs, to whom was referred the bill (H. R. 2267) to pay Thompson McKinley $375 for service voucher issued to him during the late war by Capt. George W. Harrison, assistant quartermaster United States Army, submitted an adverse report thereon, which was agreed to; and the bill was postponed indefinitely.

BILLS INTRODUCED.

Mr. COCKRELL introduced a bill (S. 3615) for the relief of the St. Louis and Mississippi Valley Transportation Company; which was read twice by its title, and referred to the Committee on Claims.

Mr. COCKRELL. I present the petition of the president, Henry C. Haarstick, of that company, and ask that it be received and referred to the Committee on Claims to accompany the bill.

The PRESIDENT *pro tempore*. The petition will be received and referred to the Committee on Claims.

FORT BROOKE MILITARY RESERVATION.

The Senate resumed the consideration of the bill (S. 3340) for the donation of Fort Brooke military reservation at Tampa, Fla., for free schools and other purposes, the pending question being on the amendment proposed by Mr. CALL.

Mr. CALL. Mr. President, I hope the Senator from Vermont [Mr. EDMUNDS] will withdraw his opposition to this amendment. I had counted with some degree of certainty upon those Senators who had been in favor of the appropriation of the public lands in large quantities for the cause of education, and expected that they would support this amendment to the bill. The circumstances of the case are precisely those of the Fort Smith reservation in Arkansas. I am somewhat astonished that the Senator from Arkansas [Mr. BERRY] should make an objection to the amendment. The quantity of public lands that the State of Florida has received has nothing to do with the matter.

If it is possible, I shall be in favor of reclaiming every acre of the public lands that any State has unlawfully obtained, giving them, as the law has given them, to the settler and not respecting any decisions of the Department which, in violation of law, have given away the lands which were donated to the people for homesteads. In all cases any disposition of the public land by the Interior Department to any other purpose than as homes for the people has been unlawful and is absolutely void. The law has been notice to every one, and no executive officer could by any act not authorized by law give any kind of a right or title to it any more than I could give a title to any one of this Capitol by executing a deed purporting to convey it. We all know that this is the law, and we know but for the poverty of the people and their inability to pay the expenses of a lawsuit it would be so decided without any further legislation.

Therefore it is no objection, so far as I am concerned, that the State of Florida or any other State has obtained in violation of law public lands which should belong to the people for homestead settlement and given them to corporations. Wherever the law has been violated I am in favor of the lands being reclaimed and restored to the people. Unless we follow this rule, we shall find some day that the Capitol has been given away by the Interior Department, and no doubt some kind of law will be claimed to justify it.

But, Mr. President, I shall not delay the Senate further. There is no better use that could be made of the proceeds of this reservation than to educate the people who are local to the place; that is, of the city, county, or district. If there be a reservation at Leavenworth or in Oregon or anywhere else in the United States, not too large in proportions, my vote shall always be given for the appropriation of that reservation and its proceeds to the benefit of the people in that locality; that is, for education and public buildings. I should be very willing to vote such proceeds for the benefit of the cause of education in the State of Vermont if the Senator from Vermont should want it done.

I see nothing in the proposition that the locality may not be benefited by the proceeds of the sale of the land in proper and reasonable quantities applied to the education of the people there. The question of what the State of Florida has received, or rather what individuals or corporations have received in the name of the State, has nothing to do with it. I am looking to the interest of the people of Tampa and South Florida, and to the education of the boys and girls in all useful knowledge.

There are many reasons why this should be done. The agricultural school fund of the State of Florida was in a large measure destroyed by the mismanagement of certain individuals; and I shall not make any partisan or political allusion here. The people there are now paying out of their labor for that misappropriation.

As respects this little piece of land at Tampa, it has been made valuable altogether by the settlement and residence of the people there, and it would furnish a fund that would largely advance the educational interest and the interest of industrial education, which I particularly regard more than all other education.

The interest upon this little fund which the amendment provides would be used not as the Senator from Arkansas says, without limitation, but subject to the direction of the Secretary of the Interior, and it would do a great benefit, more than the money could do under any other possible circumstances.

Mr. BLAIR. Mr. President, I was the member of the Committee on Public Lands alluded to as having favored the substance of this amendment in the committee. I favored the appropriation of the proceeds of this piece of land to the support of the common schools of the city of Tampa. It seemed to me that the appropriation of this money to an industrial school at that place would be somewhat experimental in its nature. The industrial school system is now being established at suitable and favorable points in the older and more generally settled and wealthier portions of the country; and it seemed to me that at that point was hardly to be found a good place to make the experiment. But the appropriation of the money for the support of the common

schools of that city would be sure to be a judicious appropriation, it seemed to me, if the common schools are worthy of support anywhere. There is a great necessity for an increased efficiency on the part of the schools at that place, and they are without the money, whether they ought to be or ought not to be, and they are likely to remain so.

I do not suppose there is a place in the State of Florida or in any State where an efficient system of common schools is more to be desired or of more imperative need of aid coming from abroad to establish and sustain the system than in Tampa or in the vicinity of Tampa.

As the value of this land is not the work of the United States, whose Treasury would be benefited if we pass the slight amount to be received for it into the Treasury, but the result of the settlement, the industry, the exertion of the community where the soil is, it seems to me that what it sells for ought to go to the people who have given it value. They found that a wilderness, or worse than a wilderness. They have given this land value by the improvements with which they have surrounded it. The United States has no longer use for the land, and is to dispose of it in some way. If it sells for $50,000 instead of 50 cents at the present time, it is not by reason of what the United States has done, but by reason of what that community has done to give that land larger value, a salable value, when it is no longer needed for Government uses.

In that view it seemed to me that the precedent established in the Fort Smith case ought to be applied in this instance. That matter came up on the application of the predecessor, I think the direct predecessor of the Senator from Arkansas [Mr. BERRY], involving the appropriation of proceeds from the military reservation at Fort Smith for the common schools of that city, and it met with universal favor in the Senate. It met with the favor of the Senator from Vermont. I am confident that the Senator from Vermont voted for or favored that appropriation, and so did Senators generally. I do not remember that there was scarcely any division or opposition on the final vote to the passage of that bill, and the reasons were precisely the same as in this instance.

A city had been established at Fort Smith. The land had been made valuable by the work of the community surrounding it. They needed the money. And when the Government no longer needed the land for military or other uses, it was sold, and the proceeds appropriated to the benefit of the common-school system of that city with very favorable results. I think the Senator from Arkansas will testify, as other prominent citizens of that State have said to me, that the schools of Fort Smith have received a very great impetus from the appropriation of the proceeds of that military reservation.

Tampa is a needy point. It is the extreme south of the country. Good schools there will clean up the city and help to cure the yellow fever, and help to fill that part of the country with the sort of population that will have the intellectual and physical vigor to retain such a knowledge of sanitary and other conditions as will enable them to make their peninsula a healthy locality, and it will be for the common defense, to put intelligence into the southern part of the State of Florida to a greater extent than it now exists. The masses of the people there need the school; they need it for a thousand reasons, and we need that they should have it.

If the Senator from Florida would be willing to modify his amendment so that this money, if the Senate should see fit to appropriate it, might go to the general good, instead of testing an experiment which in any event would only reach a portion of the people, I should be very glad indeed to support his amendment, and I should hope that the Senate would do the same, as they have done formerly.

Mr. BERRY. Mr. President, I was not a member of the Senate at the time the bill passed granting the Fort Smith reservation to the city of Fort Smith for the benefit of common schools, as stated by the Senator from New Hampshire. I stated before the committee, and I state here, that the reservation was sold in the most fortunate way, so as to yield a large amount of money. I say furthermore, as I stated there, that the effect has been to give an impetus to common schools at Fort Smith that they did not have before. It has builded up a fine school system in the city of Fort Smith.

That the citizens of the city of Fort Smith were very much in favor of that bill there can be no question. It has been a matter that has been discussed since that time in the State. A great deal of opposition was developed outside, in Sebastian County, some claiming that the money should have gone to the entire school district of the locality, or the township; others that it should have gone to the county; others to the Congressional district, or to the State.

The objection urged to this character of appropriations is that it is land which belongs to the entire people, that it is taken and given to the citizens of a particular locality, thereby making others contribute to the education of children in that particular locality when they receive none of the benefits of it. But, as I said, I do not care to discuss that point, because the Fort Smith matter was determined before I came here and is a matter with which I had nothing to do. But if this reservation is to be given to the city of Tampa then every other reservation that has been turned over as a part of the public domain should be given to the city or town nearest to which it is located.

Mr. BLAIR. May I ask the Senator a question?

Mr. BERRY. Certainly.

Mr. BLAIR. What is the objection to doing that? We have military reservations. They will not amount to much. The money will go to the community that by its personal work has made the land valuable. Can there be any objection to it?

Mr. BERRY. I will state to the Senator that the objection I have to it is the same objection I have to every other species of class legislation, which takes part of that which belongs to the whole people to be used for the benefit of a specified few as against the many. That is the objection I have to it.

Mr. BLAIR. May I ask the Senator another question?

Mr. BERRY. Certainly.

Mr. BLAIR. Are we not doing that every day, taking the money that belongs to the whole people to erect public buildings in this, that, and the other locality, which are no sort of accommodation to one out of twenty of the population of the entire country? Who of the rural population ever has anything of the benefits of any of the numerous public buildings we are erecting, except in the indirect, emotional, fanciful, mental influence that they may exert by being visible to the eye once in a year, being visited on great occasions, it may be because of art or cultivation and the training of the taste? Who gets any real benefit from scarcely any of the individual appropriations that we are making for public buildings or for the improvement of our rivers and harbors, except in this indirect way? Is it not the fact, if you make Fort Smith a large, flourishing, and intelligent city, a center of intellectual life and moral influence, and if you make Tampa the same, in the ultimate result, you are accomplishing as much for the country at large as you could do by putting the money into the Treasury and expending it for other and far less worthy purposes?

Mr. BERRY. The Senator from New Hampshire asks if we are not every day legislating for classes. I answer him that, unfortunately, I think we are, but the instances that he gives are not the ones that I would give. In regard to the public buildings, they are buildings of the Government; they are owned by the Government; they are located at those places where they will most benefit the Government. They are not given to the town; they are not intended to be built for the town especially; but they are built for the accommodation of the courts, the custom-houses, and the post-offices, which belong to the Government. The illustration is not in point in any way that I can see.

Mr. BLAIR. May I ask the Senator a question? What are the post-offices in the various communities but for the benefit of those communities? Is the United States Government anything but a great intangible entity that uses no post-office at all? Is it not the people who use all these things?

Mr. BERRY. I do not propose this evening to go into a discussion of the general question suggested by the interrogatory of the Senator from New Hampshire. I will state, however, that the class legislation I had in my mind is that which the Senator has supported here on various occasions, for instance, taking generals in the Army who resigned and engaged in civil life and failed to succeed at that, and placing them upon the retired-list now for the sole purpose of allowing them to draw money from the Treasury of the United States.

Mr. BLAIR rose.

Mr. BERRY. Wait a minute. If the Senator is going to place men of that character on the retired-list, the private soldiers throughout the country ought to have an equal chance. That is what I call class legislation, and that is what I alluded to.

Mr. BLAIR. Mr. President——

Mr. BERRY. I do not propose to discuss that matter, and I do not wish to be interrupted right now either.

Mr. BLAIR. Does the Senator decline to be interrupted?

Mr. BERRY. Now.

The PRESIDENT *pro tempore*. The Senator from Arkansas declines to yield.

Mr. BLAIR. I was simply going to suggest whether the pension-list is not of the same kind.

Mr. BERRY. It does not seem to matter much to the Senator from New Hampshire whether I decline to yield or do not, so far as making a speech is concerned.

Mr. BLAIR. It does not injure the Senator's speech.

Mr. BERRY. As I stated in the beginning, I think that the gift of money to Fort Smith is a precedent for the giving of it to Tampa. For that reason and because it was within my own State I made no special objection to it, provided the money went to the common schools; but I was very much opposed to it in the loose way in which it was suggested by the Senator from Florida.

I stated the objections which were specially urged by the chairman of the Committee on Public Lands, and I confess, since the Senator from New Hampshire has pressed me, those objections have great weight with me. The objection was that this Government property, which belonged to the people of the entire country, should be taken and sold and the money appropriated for the particular benefit of the school children who happen to live within the limits of that city, while the children of the poor men who live just beyond that limit get no benefit from it, and yet those children have the same interest in the matter as the children who live in the city of Tampa.

In addition to that there is the fact that there are other reservations all over the country, and this would serve as a precedent, and very soon throughout the United States where there is a reservation located the people of that community would come and ask Congress to give them the proceeds of the reservation, and thereby build up the schools of the town, leaving the children who live outside of those places unprovided for.

These are my objections to the amendment, and they are the objections urged by the committee. The committee in addition to that thought they were dealing liberally with Tampa. They gave in the bill over 25 acres for a park. They agreed to sell the land on long credit, giving every man an opportunity to bid at the sale. They adopted every suggestion that was made, I believe, by the Senator from Florida save and except in regard to the proceeds. I believe it is a precedent that ought not to be followed, and that the Government property and the Government money should be used for the good of the whole people of the country, and not for select individuals to be selected by the Member of Congress or the Senator who introduces the bill.

Mr. BLAIR. Unless this money can be reasonably concentrated, its dissipation will be as useless as the mist. For that reason, if it is to be appropriated at all, I think it should go to the city of Tampa, the support of whose schools will absorb the whole of it if they be made reasonably efficient. It will be impossible to distribute the interest upon this money as it accrues from year to year throughout the county or throughout the State, for its effect would be inappreciable.

With reference to class legislation, the Senator's case is hardly opportune so far as regards myself personally. Though I would be in favor of placing such men as General Frémont upon the retired-list, and while in very exceptional cases where very great public service has been rendered by a military officer who had failed to preserve his connection with the roster, I might be induced to place him on the retired-list, I have no recollection of having done so at any time except in the case of General Frémont, when, no doubt, I was justified in so doing.

I said nothing of class legislation. If there is any legislation whatever that is not class legislation, it is that which goes for the support and maintenance of a school system in which and by which every child of the United States born, as all children are, illiterate, can be qualified for the proper discharge of the duties of citizenship. The instances the Senator seems to have in his mind are certainly very far-fetched. They do not apply to the appropriations for the support of common schools.

As I said before, the people there seem to need these common schools. They need just such a light set on the shore, just such a beacon light at Tampa as this money would help to establish. It would be of infinitely more use to the American people than any other conceivable appropriation that could be made here, it seems to me.

As I said before, this particular community, having given all of the value there is to this particular land, it does seem to me like a species of robbery (which we have a right to do because we have the power and can enact the law) to take it from that locality and pour it into the general Treasury and appropriate it in a way that the community which made the value will get next to nothing from it.

I hope the Senator from Florida will modify his amendment. I understand the Senator from Arkansas is not especially opposed to the amendment in the form I suggest.

Mr. CALL. I will very cheerfully modify my amendment, if the Senator from New Hampshire desires it. I only wish to say one word in regard to it, and I intend to say but one.

I wish to say that the people of Tampa are, many of them, the most excellent people in the United States. They are gathered from all parts of the country. They are a very enterprising people, and they have progressed in every way and have developed a large and beautiful city there.

There is also the class of people there of whom I have spoken, men who came into the country from Cuba and the West Indies, engaged in all kinds of occupations, largely devoted to gaining a living from the waters of the ocean, from sponges, coral, fish, and oysters.

Those people have had very little opportunity for education; their time is occupied with severe labor, and they are a poor class of people. In addition to that there are the roaming Indians.

There being separate schools, which is an indispensable thing in that community, between the white and colored races, I am willing for every child everywhere in the State to go there who is willing to go. Of course there will be very few from outside, and none but the local people will attend; but it will do away with the idea of the Senator from Arkansas about class legislation.

I only wish to say that if the Senator from Arkansas is consistent he will never give a vote in this body of any kind whatever, for he will never vote for anything that will embrace every man, woman, and child in the United States. There can not be such an appropriation made except in its incidental effects, and all this idea of class legislation as applied to this kind of an appropriation is utterly unfounded in reason.

The general benefits of all legislation are those which embrace in some of their consequences, direct or indirect, the whole country and all the people in it. That is the only definition you can give it. There never was and there never will be a law passed which embraces every person and affects each one exactly in the same way. The education of each boy and girl in Tampa in some respects benefits all the people of the United States.

If the Senate is willing to pass this amendment in any form for the common schools, as much as I prefer industrial education, believing, as I said, that it is the only education that is advantageous to the great mass of the people, and with which all education will come, I shall gladly accept the modification proposed by the Senator from New Hampshire and agree to any amendment he or any Senator may suggest to carry out that object.

Mr. DOLPH. Mr. President, I am opposed to this amendment. This matter was fully discussed in the Committee on Public Lands, and the committee determined to report the bill without the amendment desired by the Senator from Florida. I believe there are about 37,000,000 acres of land in the State of Florida. Of this quantity over 20,000,000 acres have been selected by the State and claimed by the State as granted to it by the act of 1850, known as the swamp-land grant. Something over 15,000,000 acres, or nearly half the area of the State, have been patented to the State as swamp land. Considerable grants of land have been made to the State in addition to aid in the construction of railroads.

Mr. CALL. Will the Senator allow me to interrupt him?

Mr. DOLPH. Certainly.

Mr. CALL. I ask the Senator if I have not been urging him and the Committee on Public Lands to reclaim every acre of that land which was improperly selected, and if I have not asked that a special committee be appointed for the purpose of examining that very subject?

Mr. DOLPH. I was not speaking of what was improperly selected. The Senator from Florida has been urging some impracticable thing. The Committee on Public Lands has had his resolution before it and has made a report which is in print. Any Senator can obtain full information in regard to the condition of the swamp lands in Florida from that report.

I repeat what I have said before, that out of 37,000,000 acres over 20,000,000 acres have been selected and claimed by the State of Florida as swamp land under the act of 1850, and over 15,000,000 acres have been patented to that State. In addition to that there have been considerable quantities of land granted to the State to aid in the construction of railroads. I understand the State of Florida has also received in addition every sixteenth section of public land in each township for public schools, and other grants, for an agricultural college and for university purposes, have been made.

Mr. EDMUNDS. And her share of the proceeds of the sales of all the public lands within her limits.

Mr. DOLPH. And her share of the proceeds of the sales of public lands, in the division that was made by Congress, I think, in 1841—probably in 1841 and 1843. This would appear to be a pretty good showing for the State of Florida in regard to the public lands.

I wholly disagree with the Senator from New Hampshire in his proposition that the lands reserved for this military reservation were made valuable by the acts of the citizens of Florida. I think very likely the land adjacent to this reservation and even the town of Tampa was largely built up by the fact that this was a military reservation and was occupied by the United States forces which had to be supplied at that point; and I know of no reason why, after there has been a reservation of public lands belonging to the United States, and they have been improved by lapse of time and by the general improvement of the country, the Government should not have the benefit of the improved value of the lands. Therefore I see no special or particular claim of the town of Tampa to the proceeds of these lands.

Again, I agree with the Senator from Arkansas, that if we establish precedents of this kind, they must be followed, and every town will claim the proceeds of the sale of the reservation which has been located near it whenever it is offered for sale.

Besides, after the matter has been fully investigated by a committee of the Senate and, as the Senator from New Hampshire knows, carefully and thoroughly, and the committee has made a report, I think that report ought to be acted upon and adopted by the Senate. I hope the amendment will not prevail.

Mr. BLAIR. Mr. President, I never was a believer in the sanctity of committee reports. A committee report is entitled to that consideration in open Senate to which the reasons on which it is based may be entitled; and if this report of the Committee on Public Lands is sustained by the better reason the report should be sustained. I do not think the Senator from Oregon probably means to claim for it any greater degree of sanctity than that which I have indicated.

Mr. DOLPH. The Senator from New Hampshire will permit me——

Mr. BLAIR. We are now acting as a Committee of the Whole and not the Committee on Public Lands, and I suppose the work of the Committee of the Whole should be as free from embarrassment as possible and that we should consider nothing but the reasons bearing upon the merits of the case. To be sure, the opinion of the Committee on

Public Lands is entitled to consideration, and the opinion of the majority of the committee was against the appropriation of this money to an industrial school. That was the decision of the committee.

In regard to the Senator's reply to the suggestion I made that the value of this land is owing to the exertion of the war power by the Government, I have to say that he gets the vehicle before the horse. The Government is the creature of the people; the war power is the creature of the people; and the war power was exerted in Florida because there was a people in Florida, the people of the United States, a portion of them, were there, and they were entitled to have the war power exerted in their defense. The people of the United States as a unity acquired that territory and the people as a whole defended that territory, as they have every inch of our frontier and a great deal of our interior, indeed all of our interior from time to time as it was our frontier.

So now these people in Tampa, the portion of the American people settled in Tampa and who conquered the difficulties of nature and made that soil, that locality prosperous and productive and a suitable home for a portion of this nation as a peaceful people and not as a portion of the war power, are entitled to the pecuniary value which they have given to the soil whereon they live. And now that the United States has no longer as a whole nation to discharge that portion of its duty in the exertion of the war power at that particular locality, needs it no longer, it belongs to the people of that locality, and the cultivation which surrounds this particular tract, being the work of the local community, it is only by reason of what they have done that it is longer desirable at all or has any salable value. It is now desirable for places of residences and in small tracts for building lots. Would it be so but for this city, which these people have established and built up there? Certainly not. Therefore it is, I submit, that unless the war powers of the Government are to be looked upon as the creators rather than the instrumentalities of the nation, the value was given to this particular locality by the people and not by the exertion of the war power under the Constitution.

Now, when this tract comes to be sold and we need it no longer for the purposes of war, and it comes to be appropriated for the purposes of peace and sold by the Government, I think that the community which has given the land value ought to have the value to themselves.

Mr. DOLPH. Mr. President, the same argument advanced by the Senator from New Hampshire in regard to the military reservation near the town of Tampa could be applied in the case of the removal of the capital of the United States to St. Louis or Chicago or San Francisco, and the Government reservations and lots upon which the public buildings stand in the city of Washington should be no longer needed for Government purposes and were to be disposed of by sale by the Government. It seems to me with just as much force the Senator could contend that the value of this property had been given to it by the people of the city of Washington, and therefore all the proceeds of the property should go to the support of schools or for some other public purpose in the city of Washington.

I think the fallacy of that sort of argument will be apparent at once. This city has become what it is, not so much by the efforts of the inhabitants of the city as from the fact that the capital of the United States is here, and that the United States has expended millions of money in erecting public buildings, and in opening streets, and in beautifying the streets, and in the payment of the employés of the Government located here, which money is expended in the community and which has built up the city. I say that upon the same principle undoubtedly the military reservation near the town of Tampa, if there were troops stationed there year after year, officers and men, who had to depend upon the surrounding country for subsistence, the very fact that they were stationed there tended to build up the town of Tampa and make the property of the citizens valuable, and it is not the action of the citizens that has made the military reservation valuable.

I do not see force in the expression of the Senator from New Hampshire to the effect that the citizens of the town of Tampa have either any legal or equitable interest in this property. It is a strange argument to me that people can acquire an interest in property the title of which they do not own simply by the improvement of their own property. I can not understand what either the legal or equitable claim of the people of Tampa is to this property. I think, as was said by the Senator from Arkansas, it is the property of all the people, and no such special showing has been made in regard to the wants of the community there as to justify the diversion of the proceeds of this land, which belong to the Government, from the Treasury of the United States to their benefit.

If it was a case where there were some special wants to be supplied, which it was proper for the General Government to supply, then that would be another question and the propriety of the appropriation would depend entirely on the propriety of supplying that want of the people of Tampa. But when the Senator undertakes to show that there is some sort of claim on the part of the people of Tampa to the proceeds of this property, it seems to me that his argument, if it is worth anything, would go to the extent of showing that the people of Washington would have an equitable right to the proceeds of all the public property in this city should the capital at any time be transferred or removed and the property sold.

Mr. BLAIR. Mr. President, I will put this question to the Senator from Oregon: Suppose there were not a human being living in the city of Tampa, it was just as necessary that there should have been this military occupation at that point on our coast as now, or as at any previous time whatever. That was a point which it was necessary to occupy for the general defense of the United States as well as the people who might settle in that particular locality. The Senator will not dispute that. In a general sense that is true at least.

Now, suppose that no human being lived there and there is no longer occasion for this military occupation and the United States should offer the land for sale, what would they get for it? It would not sell for 50 cents an acre. Its value is entirely owing to the fact that human beings, a portion of this nation, who with the rest of the United States were entitled to defense at that point because it was an accessible point on our coast where an invading enemy might land and so endanger the whole country—but for the fact, I say, that those people went there and established homes, this land would not be worth anything, would not be worth the time we are spending over it in debate, as the Senator well knows; and if when we withdraw our forces and the forts are dismantled we offer it for sale we get nothing for it, but on the contrary, offering it for sale, as we do now, it being no longer necessary for the general defense to occupy it, it sells for fifty or one hundred thousand dollars, it is not so much what that local community have done, but the fact that they are there and will remain there that gives value to that soil.

I am not talking about—and it is not the proposition before the Senate—disposing of the barracks and personal property that may be on this reservation for the benefit of the people there. There would be some little ground for the Senator's argument, though not much, then; but it is the soil, it is the reservation of land that we are talking about, something that the Government can not carry away. No purchaser can be found for it unless the soil be inhabitable, and it is valuable just in proportion as it is desirable as a place of habitation, and the people there have made it that and given it all of its value. I insist that my argument is a sound one.

Now, take the Senator's illustration as to the city of Washington. To be sure, the Government has given some value, great value, to the city of Washington. People have come here and have settled in consequence of the advantages which the Government has given to this locality. If it should be necessary for the general good to take these public buildings away and establish the capital elsewhere, I admit that the Government would have a right and ought to dispose of these public buildings to the best advantage it could; but could it sell them for anything unless it could remove them? Could it sell these buildings for anything unless somebody lived here or it could be made a good place of habitation? These public buildings are wholly inappropriate for any private use.

The result would be that, if the Government should change from the occupation of its property here, now so valuable, it would be the loser of its substantial value and could not sell it at all, while down at Tampa that piece of land which has been occupied for military purposes can be sold for a large amount of money that can be put into the Treasury. It could sell the soil where the Capitol and the other public buildings stand for something, but it could sell this soil for nothing unless by reason of the fact that somebody would remain and live here.

Everybody would be damaged, of course. The surrounding community by an act of that kind would be robbed of three-fourths of its property undoubtedly, by the fact that the Government chose to get up and locate itself somewhere else. They would suffer largely and the Government would be a total loser of everything, unless some portion of the American people chose to remain here and give value to the locality which we should abandon by reason of its being made appropriate for private and personal use.

So I insist upon it that it is not the Government that does this business for the country, which gives value to these things. The Government exercises its function for only general purposes. The war power is exerted for the general good, and it is specifically put forth where the enemy is likely to be found; but it is put forth not for the special defense of that people, though they are included, of course, in the people at large, but for the defense of the whole country; and when, as down there, we no longer need to meet an enemy at that point and the land is to be given to a private corporation, and we are dependent upon private purchasers for whatever we get for it, I say the people who are there and who have given it its purchasable value are entitled to the proceeds for their own use. We have a right to direct it to a public purpose which may be for the general benefit, as in the case of common schools, or at least we may undertake to exercise that right.

And so generally wherever the local community gives all the value that there is to property which the Government is abandoning—I mean property which can not be removed, like real estate—I say there is an equitable claim that in that locality, for such general public uses as may be needed, we should give them the benefit of the proceeds if there be need, especially as in this case. Surely you can imagine no stronger

case than this. We ought to give this money to Tampa whether there is any public reservation there or not.

Mr. DOLPH. Why?

Mr. BLAIR. Because they need it. On the same principle we passed the common-school bill, and divided the fund it appropriated where the illiteracy is prevalent, in proportion to illiteracy. Did the Senator vote for the school bill? I remember that he did so.

Mr. DOLPH. I did, but I did not vote for a bill for the benefit of one single town or one single community.

Mr. BLAIR. But you voted for the benefit of every town where illiteracy prevailed, and gave in proportion to the prevalence of illiteracy. I do not know any way that the people of Tampa can go to work and recover this money. I do not know any way that anybody can get money out of the Treasury but by act of Congress, unless he has the physical force to do it.

But it seems to me there is no argument which has been offered here, which is not very easily exploded, why this money should not be given to the people of Tampa under the circumstances of this case. They need it. Put it upon the ground of an act of benevolence and charity, and why should they not have it? What location in the United States is so needy as the southern extremity of Florida? Consider the class of population that is there. But few of the more intelligent people of the country are located there. You find descendants of Indians, half-breeds, and foreigners, and all of them educated in the general principles of yellow fever rather than of ordinary intelligence and of the capacity of American citizenship; and if we can put a common school there by expending $50,000 or $100,000 we are doing a great thing for the United States at large.

I wish the Senator from Florida would modify his amendment. I do not propose to go into that part of the question. I will vote for it; but if he would say "common school" instead of "industrial school" I should prefer it.

Mr. CALL. Mr. President, I shall feel under the necessity, after the suggestion of Senators, in order to pass the bill, to withdraw the amendment I offered. Before doing so, however, I desire to say just a word.

The people of Tampa are not such as my friend from New Hampshire, with the best motives, has described them. There are not many half-breeds there or any kind of mixture of races. They are a very enterprising and very intelligent and very moral and industrious people, perhaps equal to any to be found anywhere in the world; but there is a considerable mixture of Cubans there and of men who have followed the sea for a living, and they have but small accumulations. Therefore it would be very desirable that the public-school education, either common-school or industrial, should be largely aided.

I understand the Senator from Oregon to oppose this amendment on the principle that he will vote against all bills to appropriate the reservations in Oregon for the benefit of the people of Oregon in those particular localities where they may be found, and as this is a matter of principle, I withdraw the amendment and ask for a vote on the bill. ["Vote!" "Vote!"]

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the disposition of Fort Brooke military reservation at Tampa, Fla., and for other purposes."

THE LOUISIANA ELECTION.

Mr. CHANDLER. I move to proceed to the consideration of the resolution to investigate the Louisiana election.

The motion was agreed to.

The PRESIDENT *pro tempore*. The question recurs on agreeing to the resolution.

Mr. EUSTIS. I call for the yeas and nays on the passage of the resolution.

The yeas and nays were ordered.

Mr. BLAIR. Mr. President, at the close of the debate the other day I desired to say a few words upon this resolution, but failing the opportunity, I will briefly state now what I desired then to submit.

The resolution is one for investigation and against which, it seems to me, no Senator can well cast his vote. The one great function certainly of legislative power is to investigate, and to limit the power of investigation or to pursue a policy which limits that power or looks to its limitation, even where there be no certainty of the discovery of important matter, is to pursue a policy which will be likely to result in imperfect, ill-founded action, or the neglect of legislative duty; and for that reason, if for no other, I should support the resolution as I would a resolution to investigate grave charges of this or any other kind against the Commonwealth or conduct of citizenship in the Commonwealth where I reside. On former occasions the Democracy of the Senate have not hesitated to support like resolutions. I remember serving upon a committee when I first had the honor to become a member of the Senate which made like inquiries and investigations in the States of Pennsylvania, New York, Massachusetts, and Rhode Island, and possibly in other of the Northern States; and the charges against the conduct of citizens in those States were of as grave a character as those embraced in the present resolution.

The development of the existence of public evils must certainly be encouraged, for nothing is gained by their suppression. The evil is not lessened by its invisibility. It becomes greater if it remains unexposed within the system, poisoning the blood of the body-politic, and inevitably a catastrophe comes sooner or later, and all the sooner from the failure to investigate, to expose, and so open the way to remedy, to cure.

I anticipate as a result of this investigation, should it be ordered, that substantially everything that is alleged in the resolution of inquiry will be proven. Like investigations on former occasions have had that result, and I have little doubt that it is the general conviction of the country that most of these things asserted have come to be the existing status of several of the States of the United States, or a status has come to be out of which things of this kind inevitably grow, and therefore it is that as the results of these investigations there has come to be comparatively so little demonstration of popular interest.

It seems to be understood that here is this great trouble which should be remedied; but after we discover the disease we do not know how to cure it. Nothing has as yet been done except in so far as the forces of popular general opinion of mankind at large can affect to change or modify the conditions in which our friends in the South have found themselves involved.

I desire, the investigation being made, that the primary object should be to find the remedy, and have therefore for some time, against the patience of the Senate it may be, but I think not against the patience of the American people, certainly not against a great public necessity, urged that we pursue a course of legislation which is substantially and affirmatively remedial in its nature; and there is no way, in my opinion, in which we can reach this Southern difficulty so as to give a permanent cure, and there is no way in which we can prevent the like difficulties coming to every State of this Union but by making it an indestructible principle of action on the part of the nation at large that every human being born on our soil shall either by the parent or by the State or by the nation become fully qualified for the discharge of the duties of American citizenship, to which end the common education of the people is the first step.

And so it is that bearing upon this resolution and with something of the feeling that the old Roman senator is said to have had when he closed what little he had to say on any occasion, and I presume commenced also, with the asseveration that Carthage must be destroyed, I insist upon it that illiteracy in this country must be destroyed; and upon this resolution I have just a word to say in that direction, especially appropriate to the State of Louisiana.

It has been demonstrated by the proceedings and records relating to the very election which is proposed to be investigated that the illiteracy and consequent incompetency of the voting population of that great State is upon the increase. It is now greater than it was in the year 1880. The illiteracy of the white voters is in a rapid state of increase in the State of Louisiana. This is not an evil which is confined to the negro population; it is not an evil which is increasing only with the negro population; but it is increasing with the whole voting population of the State of Louisiana. As long as this condition of things exists and becomes deeper and denser, and larger and higher, and more and more formidable, the evils of which we complain in that State, and which are not absent in other States, will be upon the increase also; and to investigate without a view to the application of some remedy—and this is the only remedy that seems to be within our reach—is the idlest thing in the world.

My colleague has done well to introduce this resolution; but if, as a result of the investigation, nothing should be done save only the development of a difficulty, it will be time wasted and the efforts of the nation thrown away.

Now, Mr. President, I proceed to the establishment of the fact which I have alleged in reference to the condition of intelligence among the voting population of the State of Louisiana.

I will state that I myself wrote to the secretary of state of Louisiana some little time since, and have from him a communication establishing all that I have asserted; and I shall be glad, if I have not mislaid the figures which he gave me, to present them. But his communication showed this in substance, that the increase of illiteracy among the white voters of that State, was some 7 per cent. since the year 1880. The per cent. was larger of the colored voting population.

Still more recently, I wrote to the editor of the New Orleans Times-Democrat, a good paper, a strong and influential paper, Democratic, of course, politically, but a paper of character and position, not inferior, probably, to any other in the country in the regards of which I now speak, and I received in return this communication:

THE TIMES-DEMOCRAT, 58 CAMP STREET,
New Orleans, July 13, 1888.

DEAR SIR: Your letter of July 10th to the editors of The Times-Democrat, of whom I am one, was handed me to-day. The article to which you allude, on "the increase of illiteracy in Louisiana," was not published in the The Times-Democrat, but originally in the New York Sun, of which paper I am correspondent here. I wrote the article and sent it to the Sun early in May, but unfortunately—

And I hope some one will find that article, for it is a very telling article—

but unfortunately gave away the only copy of the paper containing it. I inclose, however, some statistics from it which I have saved. They are official,

from the reports of the several supervisors of registration, made to the late secretary of state, Mr. Oscar Arroyo, and are, of course, beyond question. I will be glad to furnish you more data on the subject, if you wish it, showing the steady increase in illiteracy in certain of the parishes (counties), and the fact that in many of them this illiteracy is not confined to the negroes, a large majority of the whites also being unable to read and write. I have interested myself greatly in education here, and have struggled to secure some improvement in our school facilities with but little success. I will, therefore, gladly co-operate with you and assist you in any way I can in this matter. The friends of education in the North can help us materially here by pointing out the condition of affairs shown by such statistics as I send you, as this may help to shame some of our people into making a better provision for public education.

There are a number of facts in regard to education in Louisiana that I would like to call your attention to if you think you can use them.

Yours, respectfully,

NORMAN WALKER.

Hon. H. W. BLAIR.

He incloses these statistics, and I will read them with some care and ask the attention of the Senate to their significance:

Illiteracy in Louisiana.

	White voters.		Colored voters.	
	Literate.	Illiterate.	Literate.	Illiterate.
1888*	99,945	23,986	23,010	102,942
1886†	89,856	20,464	16,570	91,987
1880‡	92,443	16,377	21,422	86,555

This shows an increase of illiterate white voters from 1880 to 1886 of 4,000 and over, and from 1886 to 1888 of 3,000 and over, nearly three and a half thousand, and the increase of illiteracy among colored voters from 1880 to 1886 is about 5,500, and from 1886 to 1888 there are about 11,000, from 91,987 to 102,942 during the last two years.

Now come the total voters of both colors consolidated and the percentages:

	Total voters.		Percentages.	
	Literate.	Illiterate.	Literate.	Illiterate.
1888*	122,955	126,938	49.2	50.8
1886†	106,426	112,452	48.7	51.3
1880‡	113,865	102,932	52.3	47.7

What I call special attention to is the increase in the percentage of illiteracy during this period of time. Illiteracy has increased; the intelligence of voters has decreased from 52.3 to 49.2 per cent.; the ignorance or illiteracy has increased from 47.7 to 50.8 per cent.

Then follow the percentages of white voters and colored voters, dealt with in separate columns.

Percentages.

	White voters.		Colored voters.	
	Literate.	Illiterate.	Literate.	Illiterate.
1888*	80.7	19.3	15.1	84.9
1886†	81.7	18.3	15.4	84.6
1880‡	84.9	15.1	18.0	82.0

As will be observed, there is a steady increase of illiteracy among the white voters, as shown by the percentages, and the literate colored vote has decreased from 18 per cent. down to 15 per cent. during the last eight years.

At the end of the statistics which I have just read Mr. Walker says:

Notice that in 1880 a majority of voters were literate. It has changed since. Notice also that in the new voters, or rather the increase in voters, there were added in eight years:

Whites who can read and write	7,502
Negroes who can read and write	1,588
Total literate	9,090
Whites unable to read, etc	7,609
Negroes unable to read, etc	16,387
Total illiterate	23,996

Of the new white voters a majority were illiterate; of the new negro voters ten out of eleven were illiterate.

Now, Mr. President, there is nothing so significant, so terrible that is developed in the existing data relating to the status of things in this country, as these figures bearing upon illiteracy; and the nation seems to be utterly stunned by their abundance and universal prevalence over vast portions of our country, geographically considered, and among vast masses of our population.

Mr. President, it is not a pleasant thing to be continually harping upon this subject of illiteracy. I am not anxious to do it, but I feel that it is a duty that I must perform.

This matter comes perhaps more naturally to my observation than that of many other Senators, and I feel bound to lay these figures before the Senate and before the country, and to insist upon it that our republican institutions are rapidly becoming neither more nor less than a humbug, and they may as well so be considered when the intelligence of the voter is eliminated from American citizenship. We know that elimination to be increasing everywhere, and the callousness of the public mind on the subject is increasing rather than decreasing. Unlike the continual dropping of water which ordinarily wears away the stone, it seems to me that the obduracy of the public conscience, of the public sensibility, is rather increasing than otherwise. This may continue for a time.

This country and its institutions may be perishing of dry-rot without our observation; but, all the same, the process is going on and the living members of this generation are not to retire to the last receptacle of all flesh, and sleep quietly in the soil of America, without seeing demonstrations of disorder, insurrection, turbulence, bloodshed, and destruction, of which hitherto we have not even dreamed, unless the American people pay attention to this subject and to the fact that the citizenship of this country is becoming incompetent to perform its functions.

I have nothing more to say, except to end as I began, with the asseveration that illiteracy must be destroyed or illiteracy will destroy the country.

THE REVENUE LAWS.

Mr. ALDRICH. I ask leave out of order to make a report.

The PRESIDENT *pro tempore*. The report will be received, if there be no objection.

Mr. ALDRICH. I present the report of the Committee on Finance upon the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

The PRESIDENT *pro tempore*. The Senator from Rhode Island from the Committee on Finance submits a report to accompany House bill 9051, which will be printed.

Mr. ALDRICH. I ask that the report and the views of the minority, which will be presented by the Senator from Tennessee [Mr. HARRIS], may be printed in the RECORD, and I ask that an order be made that they may be printed in brevier type for the convenience of Senators.

The PRESIDENT *pro tempore*. It will be so ordered if there be no objection. The Chair hears none.

Mr. HARRIS. I present the views of the minority of the Committee on Finance upon the same bill.

The PRESIDENT *pro tempore*. They will be received and printed in the RECORD with the report of the committee in the type indicated by the Senator from Rhode Island.

Mr. HARRIS. Mr. President, in behalf of the Senator from Kentucky [Mr. BECK], who is absent on account of sickness, I present the paper which I send to the desk as his views, he being of the minority.

The PRESIDENT *pro tempore*. They will be received and printed in the same way.

Mr. HARRIS. Printed in connection with the other reports?

The PRESIDETT *pro tempore*. In the RECORD?

Mr. HARRIS. In the RECORD and in document form.

The PRESIDENT *pro tempore*. They will be printed in the RECORD and as a document in connection with the report of the majority and views of the minority of the committee.

Mr. HARRIS. The majority and minority reports and views of the minority of the minority.

The PRESIDENT *pro tempore*. So the Chair understands.

Mr. ALDRICH, from the Committee on Finance, submitted the following report (to accompany bill H. R. 9051):

The Committee on Finance, to whom was referred the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue, respectfully report:

The demand for a careful and thorough revision of our revenue laws is imperative. This revision is necessary:

1. To reduce the national revenues, which are now excessive.

No valid reason can be given why we should, under existing circumstances, continue to collect annually a sum approximating $60,000,000 in excess of the amount required to administer the Government economically and to keep the pledges of public faith.

2. To protect honest importers and domestic producers from the disastrous consequences resulting from fraudulent undervaluations of imported merchandise on which ad valorem rates of duty are levied.

The alarming extent of this dishonest practice and its demoralizing and destructive effect upon public and private interests and the necessity for prompt adoption of remedial legislation have been repeatedly brought to the attention of Congress by successive Secretaries of the

* Report secretary of state. Full registration; State election.
† Report of secretary of state. Small registration; election only for members of Congress.
‡ United States census. Males over twenty-one.

Treasury. The enormous increase from year to year in the quantity of importations of manufactured and other articles of merchandise which are subject to ad valorem duties is largely attributable to this cause. Duties which are nominally protective to American industries, and which would be actually so if honestly collected, prove both delusive and destructive when, through defective laws and negligent or corrupt administration, but a fraction of the amounts lawfully due are levied and collected.

3. To remedy the defects, anomalies, and incongruities which have been from time to time discovered in the tariff schedules, or which have been created by erroneous decisions of the Treasury Department.

The interpretation given to the seventh section of the act of March 3, 1883, by which the cost of coverings and charges of all kinds is excluded from consideration in the assessment of dutiable values, has had the effect, without changing nominal rates, to reduce largely, but in an irregular and unequal manner, the amount of duties collected on imports.

4. To secure the proper readjustment and equalization of tariff rates rendered necessary by modified business conditions, improvements in methods of production, radical changes in prices, or by new elements or sources of competition.

5. To give relief and protection to many industries which are now suffering on account of the inadequate rates levied on competing products.

The public demand for a reduction of revenue is more urgent on account of the inexcusable retention in the national Treasury or on deposit in national banks of vast sums of money in excess of the amount required to pay the current demands upon the Treasury and to meet the maturing obligations of the Government. This sum, with the additions which will accrue within the next four months and before any legislative action reducing the revenues can be effective, will be sufficient to pay in full the outstanding 4½ per cent. bonds due in 1891, $221,000,000.

The existence of this immense surplus furnishes occasion for constant anxiety and apprehension of possible financial disaster. The failure to prevent this dangerous accumulation, inciting, as it does, extravagant expenditures, and constituting an ever-present menace to the prosperity and enterprise of all our people, can not be too severely condemned; but it is a failure for which the executive department of the Government is alone responsible.

This accumulation could and should have been profitably avoided, and the possibility of business disaster averted, by a prompt return of the money collected from the people to the channels of trade through the purchase of United States bonds that could at all times have been obtained for prices which, to the Government, would have been equal to an investment, of otherwise unprofitable funds, at a rate of interest of not less than 2 per cent. per annum.

It is probably true that the $60,000,000 deposited in national banks can not now be withdrawn without peril to the business interests of the respective communities where the banks are located, and that this sum must remain, for an indefinite period, a permanent loan to favored institutions without interest. This unfortunate situation, however, must have been foreseen when the deposits were made, and it should not be aggravated by further deposits, nor should it furnish an excuse for the failure to promptly dispose of the much larger sum remaining in the Treasury in the manner indicated.

To amend the provisions of law which enforce the collection of excessive revenue, and to remedy the defects which we have enumerated, are within the scope of legislative relief, and Congress may properly be held responsible for any evils resulting from a continuance of existing conditions. It may, however, be fairly said that responsibility for delay in the adoption of legislative remedies rests upon the party in control of the House of Representatives, which by the Constitution has sole power to originate revenue bills. The participation of the Senate in any effort to cure existing evils by proper legislation has not been possible, from the fact that the bill under consideration is the first that has reached the Senate in more than five years giving them jurisdiction over the subject.

In view of the universal demand for relief from the unsatisfactory condition in which we find ourselves the inaction of those whose anxiety for reform has been manifested by repeated declarations is remarkable. It would have been easy at any time when Congress has been in session since the 3d of March, 1885—and its sessions have covered at least twenty months of that period—to have secured the concurrence of the two Houses upon a measure which would have reduced the revenue and amended the administrative features of our customs laws in a satisfactory manner.

The refusal to adopt or even to consider a measure of this kind has been publicly declared by a leading member of the House of Representatives (Hon. SAMUEL J. RANDALL) to have been "owing to the fact that a majority of the Committee on Ways and Means seem to have determined that unless their own peculiar views can be incorporated into law in regard to customs taxation and the continuance of the internal-revenue system without reduction or modification they will prevent any reform in this direction."

It has been the evident purpose of those who have controlled the policy of the party in power to delay action, to magnify causes for uneasiness, and to multiply and intensify evils until the people of the country should imperatively demand relief, and then to assume that the evils and embarrassments from which we are suffering are the necessary incidents of the protective system, and that relief can only be found in the emasculation or destruction of that system.

The known attachment of the great mass of the wage-earners of the country to a system which has been productive to them of unexampled prosperity prevented the adoption of a policy of open attack, and made it necessary that some plausible reason should be found for the stealthy accomplishment of their destructive designs.

Your committee, after a thorough examination of the provisions of the bill (H. R. 9051) referred to them by the Senate, have become convinced of its inadequacy as a remedial measure in view of the condition which confronts us.

1. Its adoption would probably result in an increase instead of a reduction of the revenue from customs.

It is claimed by the friends of the bill that the reduction of revenue from this source would amount to $49,486,240.75; but we are confident that the large reduction in rates proposed would result in greatly increased importations. When American producers supply a considerable portion of our market with articles in general use, and the rates on these are reduced below the protective point, both importations and revenue must increase.

By the acts of July 14, 1870, May 1 and June 6, 1872, important reductions in tariff rates were made and the free-list greatly enlarged. It was officially estimated at the time of the passage of the various acts that these changes would result in a reduction of the revenue from customs of $57,227,510. The revenue from this source in 1869 was $176,114,904, and in 1873 it was $184,929,542, or an increase of $8,814,138, instead of a reduction of $57,227,510. This increase took place notwithstanding the fact that free importations increased in value $157,707,264 between 1869 and 1873. Similar results may be reasonably expected should the House bill become a law.

If foreign manufacturers should, through the changes made in the cotton and woolen schedules, secure a quarter of the market now held by our cotton and woolen manufacturers—and this is certainly a very conservative estimate—the additional amount of duty collected from increased importations would amount to at least $60,000,000 annually. The expansion of imports which would surely follow the reduction of rates on china, porcelain, common window-glass, manufactures of iron and steel, flax, jute, hemp, and a large number of minor manufactures, would greatly augment the revenue.

2. It provides no remedy for undervaluations, but, on the contrary, it invites and gives immunity to unlimited fraud by the substitution of ad valorem for specific duties.

3. It does not remedy any of the inequalities or anomalies, or cure any of the defects of existing law. While it perpetuates existing infirmities, it creates, by its obscurities of purpose and phraseology, and by its faulty construction, doubts and ambiguities which must multiply indefinitely the confusion now existing. The bill does not preserve the classification of dutiable articles in schedules, and it is impossible to say in many instances to what clause of existing law the amendments proposed by the bill were intended to apply, or what their effect would be. Although the different paragraphs in the various schedules have been numbered for reference at the Treasury Department, they have never received any such legal designation as would permit accurate description or identification for purposes of amendment or repeal, and the difficulties which would certainly arise in the interpretation of various provisions of the bill would unavoidably lead to endless litigation and serious loss to the Treasury. Some of the defective provisions now in force have caused great injury to important industries. For instance, the paragraph fixing rates on hat materials reads as follows:

Hats, and so forth, materials for: Braids, plaits, flats, laces, trimmings, tissues, willow sheets and squares, used for making or ornamenting hats, bonnets, and hoods, composed of straw, chip, grass, palm leaf, willow, hair, whalebone, or any other substance or material, not specially enumerated or provided for in this act, 20 per cent. ad valorem.

This has been construed by the Treasury Department and the courts to admit silks, satins, laces, and a large variety of other expensive articles as "materials for hats," which are really used for other purposes, at the low rate of duty of 20 per cent. ad valorem, when for other uses the same articles are dutiable at 40 to 50 per cent. ad valorem. The clause in the bill under consideration which provides for the duty on hat materials reads as follows:

Hats, materials for: Braids, plaits, flats, willow sheets and squares, fit only for use in making or ornamenting hats, bonnets, and hoods, composed of straw, chip, grass, palm leaf, willow, hair, whalebone, or any vegetable material, not specially enumerated or provided for, 20 per cent. ad valorem.

It was probably the intention of the framers of the bill to remedy the defects alluded to, but it is clear from a comparison of the two paragraphs that the provisions of existing law in regard to materials for hats, composed of "any other substance or material" than straw, chip, etc., would still remain in force and unrepealed, and the practice of importing silks, laces, etc., as hat materials, at 20 per cent. ad valorem would continue. Similar failures of amendments to amend are

found in all parts of the bill. To illustrate cases of this kind we have appended to our report (Appendix F) a list of paragraphs of doubtful meaning, together with some of those where any probable interpretation would increase existing confusion.

The results, however, which would flow from the failures of the bill as a corrective measure would be much less disastrous to the material interests of the country than those which must surely follow the adoption of its vicious affirmative propositions.

AD VALOREM DUTIES.

The feature of the bill which most clearly indicates its purpose is the proposed substitution of ad valorem for specific duties. This substitution could have no other result than to change rates now protective for others which would not protect. The promoters of this bill must have been familiar with the testimony submitted to Congress by Secretary Manning disclosing enormous frauds upon the revenue and honest merchants through the use of ad valorem rates. The frequency and notoriety of these frauds and the widespread demoralization resulting from them should have prevented any attempts to extend the system.

The use of ad valorem rates has been condemned by the experience of every commercial nation in the world, by the judgment of those who have been intrusted with the responsibility of customs administration, and by honest importers and merchants, as well as by intelligent political economists and legislators of every shade of economic belief. The reasons for this general and sweeping condemnation are obvious; ad valorem rates are equally unsatisfactory and uncertain whether levied for revenue or for protective purposes; duties based on foreign market value are, even under the most favorable circumstances, with honesty of purpose on the part of the importer and the highest degree of knowledge and unquestioned integrity on the part of the appraising officers, necessarily uncertain and unequal; but when, as now, many foreign importers deem the successful evasion of our revenue laws by unscrupulous methods the highest evidence of business capacity, ad valorem rates fail lamentably of their purpose. They greatly exaggerate variations in foreign prices. When business is depressed and foreign prices are abnormally low, when foreign competition is most to be dreaded, and when a defensive barrier is most needed by domestic producers, then ad valorem rates are lowest, protection is reduced, and depression is intensified. On the other hand, when foreign values are highest, rates are highest, and restriction enlarges into prohibition.

If it is desirable that a sliding scale of duties should be adopted, rates should increase as foreign prices diminish. Ad valorem rates afford facilities for the grossest frauds upon the revenue; through undervaluations they invite evasions of the law and reward dishonest importers, while they destroy the business alike of honest importers and of domestic manufacturers. The foreign manufacturer practically fixes the duty which he is willing to pay, and in many cases the only limitation upon the amount of foreign importations is the extent to which the fear of detection influences the persons who make the invoices. The evils which flow from ad valorem rates are so great and so manifest that this plan of collecting duties has no advocates but professional and political revenue reformers and dishonest consignors.

In illustration of the effect of the House bill to increase importations and break down domestic producers, we cite the application of ad valorem rates to the manufacture of fine cotton cloths. The specific rates now levied upon cotton cloths furnish no reasonable grounds for adverse criticism, either by the producers or consumers of cotton manufactures. The inevitable effect of the substitution would be to largely increase the importation of all the finer and more expensive classes of these goods, and to produce disorganization and depression in this important industry. The uniform rate of 40 per cent. proposed, bears very unevenly upon the various grades of goods. It would be if collected upon an honest valuation protective upon the coarser and commoner kinds which are largely consumed by all classes of our people, but it would encourage the importation without restraint of those fine fabrics which may be properly designated as luxuries.

The leading cotton manufacturers of the country joined in an emphatic protest to the framers of the bill against the adoption of ad valorem rates, and submitted the following strong statement of their objections to the system:

> While the ad valorem method seems to theoretically have the merits of simplicity and equity, it is in practice found to be unreliable, a prolific source of undervaluation, false invoicing, and false oaths, and a premium upon commercial dishonesty, and to tend toward a transfer of legitimate business from honorable importers to the most irresponsible and unscrupulous class of foreign traders. A reference to the records of revenue from the customs department and the United States courts, or inquiry among importing houses, will convince you, it is believed, of the truth of the foregoing assertion, and that the gravity of the danger inherent from the ad valorem system is not exaggerated.
>
> It is therefore thought to be proper to call your attention to this proposition of the adoption of ad valorem rates pure and simple, and to urge in the strongest manner that no such backward step be taken, however enticing it may appear theoretically, but that the ad valorem rates be used only where the specific form is inapplicable, or to supplement the latter in order to better equalize rates, as it is wisely applied in the present tariff.
>
> While no classification of cotton cloths can be equitable, and discrepancies will from time to time appear and disappear, consequent on changes in processes and the fickleness of fashion, these inequalities are found in practice under the specific form to be so inconsiderable in amount as to have but an insignificant bearing upon the principle and a trifling effect upon the revenue or volume of business, and any objection based upon such inequalities would be found to be imaginary rather than real.

The proposal to apply this principle to all manufactures of wool would be equally unsatisfactory and destructive. The rate proposed in the woolen schedule would prevent importation of the low grades of flannels, blankets, and hats of wool, and all low and medium grades of cassimeres and other cloths which enter into the clothing of the great mass of our people, but would be insufficient upon all the finer classes of dress goods and cloths for men's wear. All the articles in both these schedules which could be classed as necessaries of life, and which are worn by our working men and women, would be protected by the rates proposed to the extent of exclusion of the foreign article, while upon all the finer and more expensive products, which are in the nature of luxuries and purchased largely by the rich, the rates would place no restraint upon importations, and would furnish no protection to the American producer.

Specific duties have been advocated by all our Secretaries of the Treasury, with one notable exception, Mr. Robert J. Walker, from Hamilton, to the present incumbent of the office. The opinions of these officers are given in Appendix A. All the leading statesmen and financiers of Europe, and all acknowledged authorities on taxation on either side of the Atlantic, have advocated specific duties. They have been commended by all the principal administrative officers of customs, by the leading merchants, and by the chambers of commerce, in all of our large cities, for their simplicity and certainty in execution. No expert knowledge is required for their enforcement by customs officials, as the articles upon which they are levied have only to be counted, weighed, or measured. While specific duties are less liable to evasion and are certain and uniform in their operations, giving greater stability to the revenues, they also have the beneficial tendency to exclude from the country inferior, adulterated, and worthless goods.

INJURIOUS REDUCTIONS IN RATES MADE BY THE HOUSE BILL.

That the Senate may be fully advised of the injurious character of the radical reductions in rates which are proposed by the House bill, a table is appended to this report (Appendix G) which shows in parallel columns existing rates, the rates proposed, and the percentage of reduction in each case.

The rates proposed in the schedules imposing duties on silks, wines, liquors, and tobacco are not changed by the terms of the House bill, and but slight reduction is made in the rate of duty on sugar.

With the exceptions named, every tariff schedule is invaded by alterations made with the hostile spirit which pervades the bill, and nearly all of our industries would feel the blighting effect of changes which are either inconsiderate or purposely destructive. The following list contains a statement of some of the manufactures which would be seriously injured by these reductions:

Articles on the dutiable-list injuriously affected by the Mills bill.

Manufactures of cotton.
All manufactures of wool.
All manufactures of hemp, flax, and jute.
Paper envelopes and other manufactures of paper.
Steel railway bars.
Manufactures, articles, and wares of iron, steel, and other metals.
All manufactures of manila, sisal grass, and other vegetable fibers.
China, porcelain, Parian, and other wares.
Common window-glass and the manufactures of glass.
Lead products.
Paints and colors.
Iron and steel rivets, bolts, etc.
Wrought-iron and steel spikes, etc.
Horse, mule, and ox shoes, etc.
Cut tacks, brads, and sprigs.
Horseshoe, hob, and wire nails, etc.
Boiler and other tubes.
Chains of all kinds.
Files, file blanks, rasps, etc.
Iron and steel beams, etc.
Lead in ore and in pigs.
Needles.
Metallic pens.
Type-metal.
Blacking of all kinds.
Manufactures of gutta-percha, hard rubber, etc.
Manufactures of hair.
Ink of all kinds.
Brushes of all kinds.
Marble sawed and dressed, and manufactures of marble.
Manufactures of papier-maché.
Philosophical instruments and apparatus.
Webbing composed of cotton, flax, and other materials.
Zinc, dry and ground in oil.
Confectionery of all kinds.

The committee estimate the value of the annual product of these industries to be at least $2,000,000,000, and that in their prosecution employment is given to not less than 1,250,000 persons, while at least 5,650,000 are directly dependent for support on their continued existence and prosperity.

The testimony taken by your committee and herewith submitted to the Senate contains abundant evidence in detail from manufacturers and workmen alike of the destructive results sure to follow the adoption of the House bill.

From the representatives of imperiled industries a voice of universal protest has been raised and the action of the Senate has been earnestly invoked to preserve great enterprises from ruthless and unnecessary ruin.

For weeks we have patiently listened to persons employed in the various pursuits and from every section, and with doors open to all, we have received the advice and counsel of the men whose labor, enterprise, and skill have made the United States the foremost industrial country of the world, and not one person has appeared to approve or to advocate the bill under consideration.

The free-trade tendencies which are partly concealed in these propositions to cripple or destroy numerous industries are clearly brought into view by an examination of the list of articles which the bill proposes to place upon the free-list. Of the one hundred and four times

from which the duties are removed, nearly one-half, forty-eight in number, are manufactured articles, sixteen are agricultural products, eleven are articles which are now free of duty or without commercial importance, and twenty-one are articles which now pay a small revenue duty, but which are of such a character that removal of duties is unobjectionable.

The following is a list of the manufactured articles from which the duties are removed:

Timber, hewn, sawed, or used for spars or wharves.
Timber, squared or sided.
Sawed boards, planks, deals, and all other sawed lumber.
Hubs for wheels, posts, and all kinds of blocks, rough-hewn or sawed.
Staves of wood.
Machinery for the manufacture of cotton bagging.
Iron or steel sheets coated with tin or lead, known as tin-plates, terne-plates, or taggers' tin.
Glycerine.
Phosphorus.
Soap, hard or soft.
Extracts for tanning.
Indigo, extracts of and carmined.
Iodine, resublimed.
Oil:
  Croton.
  Hempseed and Rapeseed.
Oils:
  Olive oil.
  Cotton-seed oil.
  Salad oil.
  Neat's-foot oil.
  Whale oil.
  Seal oil.
Barks, beans, berries, etc., advanced by refining or grinding.
Cotton ties or hoops for baling or other purposes.
Needles.
Pickets and palings.
Laths.
Shingles.
Clapboards, pine or spruce.
Salt in packages or in bulk.
Burlaps, not exceeding 60 inches in width.
Bags of jute for grain.
Alumina, alum, etc.
Borax and boracic acid.
Copper, sulphate of, or blue vitriol.
Iron, sulphate, or copperas.
Soda:
  Sulphate of, or niter cake.
  Sulphate of, or Glauber's-salt.
Sulphur, refined, in rolls.
Coal-tar products.
Coal-tars, not colors or dyes.
Logwood and other dye-woods, extracts of.
Quicksilver.
Brick.
German looking-glass plates.
Chickory, roasted and ground.
Cocoa and chocolate, prepared.
Grindstones, finished.
Ocher and ochery earths, etc., dry and ground in oil.
Acorns and substitutes for coffee, prepared.
Osier and willow, prepared, for basket-makers' use.
Curled hair for beds and mattresses.
Manufactures from non-dutiable crude minerals, not otherwise provided for.
Finishing powder.
Rattans and reeds, manufactured.

This is free trade in the concrete, and the list furnishes conclusive evidence of the intent of the House bill, which can not be neutralized by the eleventh-hour disclaimers of its supporters.

Upon investigation it will be found that, with the exception of tin-plates, the supply of the above articles for home consumption is now furnished to a great extent by domestic producers, whose business would be in most instances at once destroyed by the adoption of this bill.

The committee have not been able to secure accurate statistics of the aggregate value of these manufactures or of the number of persons employed in their production. It is evident, however, from an examination of the list and of the testimony taken by your committee and the reported value of the products of 1880 that at least $500,000,000 of capital and 300,000 workingmen are now so employed. These items seem to have been taken indiscriminately from the present dutiable-list, and there is no reason for the removal of duties upon them which would not apply with equal force to hundreds of other manufactures which are now dutiable. They owe the distinction of having been designated for the first sacrifice on the free-trade altar to the fact that neither the interests of a section nor the political control of a district demanded their preservation.

In many cases where the manufactured article is placed on the free-list a duty is retained on the materials from which it is manufactured. It is needless to say that this discrimination would act as a prohibition upon production in this country.

Soap is placed on the free-list, while duties are retained upon caustic soda and essential oils and a tax is retained upon alcohol. This would undoubtedly result in the destruction of a large industry which gives employment to nearly twenty-five thousand persons.

German looking-glass plates are placed on the free-list, while a duty is maintained on polished cylinder and plate glass, not silvered, or from 2.5 to 45 cents per square foot, equal in some cases to 152 per cent. ad valorem. A duty is also retained on nitrate of silver and tin-foil used in the silvering process.

Tin-plates, or iron and steel sheets coated with tin or lead, are placed on the free-list; while iron ore and pig-iron, as well as the iron bars or steel billets and slabs from which these sheets must be rolled, are dutiable at from 45 to 60 per cent. ad valorem. A duty is also placed by the bill on common black sheet-iron of from 1 to 1.4 cents a pound, and iron and steel sheets, when galvanized with zinc or coated with any other metal except tin or lead, are required to pay an additional duty of from one-fourth to three-fourths of a cent a pound above these rates. There is also a duty levied of 1½ cents a pound upon pig-lead.

Iron and steel cotton-ties and hoops for baling or other purposes, not thinner than No. 20 wire gauge, are made free; while other hoop, band, or scroll iron is dutiable at rates varying from 1 to 1.3 cents a pound, and an additional rate of one-fourth of a cent a pound is levied on articles wholly or partially manufactured from hoop-iron. The iron bars or steel slabs from which cotton-ties or hoops must be manufactured are dutiable at from 45 to 60 per cent.

Needles are placed upon the free-list, while the duties on steel remain unchanged at not less than 45 per cent. ad valorem.

The duty is removed from ocher and ochery earths, and umber and umbery earths, dry and ground in oil, while a duty of 15 cents per gallon is retained on linseed-oil.

In the manufacture of the chemical and other products which are placed on the free-list the use of expensive apparatus and machinery is required, and these remain dutiable. Alcohol, upon which a tax of nearly 400 per cent. ad valorem is retained, is largely used in some of the products on which the duties are removed or greatly reduced.

In a considerable number of cases the admission of important manufactured products free of duty while a duty is retained on materials would not only extinguish the industry directly affected, but would effectually destroy important collateral industries.

The free admission of iron or steel sheets of all thicknesses coated with tin or lead would not only prevent the production of tin-plates in this country, but it would cause a substitution of imported tin-plates or sheets in most cases for roofing, and other building purposes, and for domestic uses, where galvanized or other sheet iron or steel is now used, and thus large and important American industries, now fully established, would be annihilated.

The provision to admit German looking-glass plates free of duty would not only destroy the business of silvering plates in this country, but the much larger and more important industry of manufacturing plate or other polished glass for all purposes. As the glass referred to is of the finest quality and highly polished, it would not only take the place of plate or other polished glass for looking-glasses, but of glass for other purposes, as it could be cheaply silvered and the silver removed at an expense which would be insignificant compared with the duty on foreign glass. This provision also contains, we believe, the first attempt which has been made in an American tariff to discriminate between the productions of various foreign states, and it can be safely assumed that the producers of France, Belgium, and England would not consent to this discrimination in favor of German manufacturers.

Placing curled hair upon the free-list would ruin a useful trade, and it would also deprive the farmers of the United States of a profitable market for millions of pounds of hair.

In many cases the duty is removed not only from materials, but also from the manufactured product in various stages as well. Raw wool is free of duty, and no duty is levied on washed or scoured wool, or on wool tops or other manufactures of wool less advanced in condition than yarns.

Jute is put upon the free-list, and the duties are also removed from burlaps and bags of jute for grain.

If Canada consents, round and square timber and sawed boards are all free from duty, while the duty on planed lumber is left an uncertain quantity.

Several important crude minerals, like copper, quicksilver, and antimony, are placed on the free-list, and the duty is also removed from the unenumerated manufactured products of these and of the crude minerals, gold, silver, aluminum, bromine, bismuth, and many others of importance which are now free. It is impossible to say what the effect of this sweeping provision would be; it certainly would admit free of duty a large number of valuable manufactured articles which are now dutiable.

Crude and refined borax and boracic acid, coal-tar, and coal-tar products, and grindstones, finished and unfinished, are placed on the free-list.

It is evident that in these, and in many similar cases, free raw materials would not benefit the domestic manufacturers.

In several cases articles are free under one description and dutiable under another.

For example, iron hoops for other purposes than baling are free, while iron hoops for all purposes except cotton-ties, which are specially provided for, are dutiable at from 1 to 1.3 cents a pound. All vegetable fibers, including flax, are free, while hackled flax is also dutiable at $10 per ton. All earths and clays unwrought are free, while china clay, or kaolin, unwrought, is dutiable. All unmanufactured or undressed monumental or building stone, including marble, is free, while undressed marble is also dutiable at 40 cents per cubic foot. Cocoa prepared and manufactured is free, while chocolate, a preparation of cocoa, is dutiable at 2 cents a pound.

In a great number of instances materials used by the manufacturer are dutiable at one rate, while the finished product is dutiable at a lower rate. This want of relation in rates, which extends to every schedule in which changes are made, will affect injuriously all of our important industries.

For instance, white lead when dry, ground, or mixed in oil is dutiable at 2 cents a pound, while orange mineral, a manufactured product of white lead, is dutiable at 1½ cents a pound; the rate on red lead and litharge, two other lead products, is but one-fourth of a cent above the duty on pig-lead; while the rates on brown and white acetates of lead are so low that production would cease in the United States if this bill should become a law. The rates on structural iron and steel are reduced to six-tenths of a cent a pound, while the duty of 1 cent a pound is retained on bar-iron, from which iron beams must be manufactured.

The duty on sugar above No. 20 Dutch standard in color is fixed by the bill at 2.8 cents a pound, which is equivalent to nearly 85 per cent.

ad valorem. The duty on colored and other confectionery is 40 per cent. ad valorem. Refined sugar could be manufactured into confectionery by machinery at an additional cost of one-half cent a pound, and imported at a rate of duty which would be about one-half of that imposed on the sugar before it was manufactured. Prepared and manufactured cocoa, which contains 75 per cent. of pure sugar, is admitted free, and under this description chocolate confectionery would also be admitted free. We should have then under the House bill refined sugar dutiable at 2.8 cents a pound as sugar, dutiable at half this amount as confectionery, and free as manufactured cocoa. The effect of these provisions upon the manufacturers of confectionery, cocoa, and chocolate, and upon the business of refining sugar in this country can be readily understood. The value of the domestic manufactures of these articles by the census of 1880 was $182,424,602.

Several important manufactures of iron and steel, including files and file-blanks, cut tacks and brads, and steel pens, which now have a specific rate, are given an ad valorem rate of 35 per cent., while the steel from which they are made is dutiable at not less than 45 per cent. ad valorem.

Type-metal is dutiable at 15 per cent. ad valorem, while the lead of which it is largely composed is dutiable at 1¼ cents a pound, or 50 per cent. ad valorem. Lead imported as type-metal would pay a duty of three-eighths of a cent per pound, instead of 1¼ cents if imported as pig-lead. The lead could be recovered by the sweating process at a cost of about one-half of a cent per pound, and still a saving of three-eighths of a cent per pound could be made in duties.

Machinery, hardware, and other articles and wares composed wholly or in part of copper, are dutiable by the bill under consideration at 35 per cent. ad valorem, while machinery, hardware, and other manufactures of iron, steel, or other metals, or of which these metals are the component material of chief value, are dutiable at 40 per cent. ad valorem. Very much the larger portion of all the machinery and hardware now manufactured is composed in part of copper or brass, and if this bill should become a law all machinery and hardware would contain copper or brass, and in this way the duty on all such manufactures would be reduced from 45 per cent. ad valorem, the present rate, to 35 per cent. The effect of this large reduction on the finest manufactured products of iron and steel and other metals, while the duty on the materials of which they are composed remains practically unchanged at much higher rates, would certainly be disastrous to many very important American industries. Machinery is still further discriminated against in the section authorizing the collection of a duty upon packages.

A duty of 25 per cent. ad valorem is placed on paper, while the duty on paper envelopes, the raw material of which is paper, is reduced to 20 per cent., and the duty on the various manufactures of paper not otherwise provided for is fixed at 15 per cent.

Buttons, braids, fringes, and trimmings of all kinds, of wool or silk, are dutiable at 50 per cent. ad valorem, while cloaks and other garments for ladies' and children's wear, made up, are dutiable at 45 per cent. ad valorem.

Ground rice and rice meal are dutiable at 15 per cent. ad valorem, while paddy, or rice with the outer hull on, is dutiable at 1 cent a pound, or 100 per cent. ad valorem. Rice starch, an advanced manufacture of rice, is also dutiable at 1 cent a pound, while by a change in classification the rate on uncleaned rice is advanced one-half a cent per pound beyond existing rates.

Oil-cloths are dutiable at 25 per cent.; oil-cloth foundations bear the same rate, while linseed-oil and many other materials used in the production of oil-cloth are dutiable at a higher rate.

The inconsistencies of the bill are numberless.

Cotton bagging is dutiable at three-eighths of a cent a pound, while a portion of the machinery for manufacturing cotton bagging is admitted free. Jute bags and burlaps which can be used for covering cotton are free, while the machinery for the manufacture of burlaps or jute bags is dutiable at 35 or 40 per cent. ad valorem. Bags of jute for grain are free, while bags of jute for flour, fruit, vegetables, or other purposes are dutiable at three-eighths of a cent a pound. Burlaps not exceeding 60 inches in width are free, while burlaps exceeding 60 inches in width are dutiable at 25 per cent. ad valorem.

Bibles and other books in foreign languages, printed for gratuitous distribution, are free, while Bibles and other books in foreign languages, if printed for sale, are dutiable at 25 per cent. ad valorem.

Needles and looking-glass plates are free, while protective duties are levied on iron-ore and soda-ash.

Extract of hemlock bark is free, and extract of sumac is dutiable.

Beans and pease are free, while rice is dutiable at $1.28 per bushel.

Wool and salt are free, while sugar and coal are given high duties.

Copper-ore is free, and nickel and zinc ores are protected.

One clause of the bill fixes the duties on screens, covers, and a large number of other articles of silk, jute, or vegetable material, at 40 per cent. ad valorem, while other provisions of the bill fix rates on the same articles at from 15 to 50 per cent.

We have enumerated but a few of the many defects and incongruities of the House bill, as every correct principle of tariff construction has been violated in selecting articles for the free-list and those upon which large reductions in rates are made.

FREE RAW MATERIALS.

We have shown the deceptive character of the claim that the proposition of the House bill to place certain materials on the free-list would stimulate manufactures.

All protectionists agree that crude materials used in manufactures, or articles of any description which can not be produced to any considerable extent in this country, or which from climatic or other causes (not depending upon the cost of labor), can not be produced here under as favorable conditions as elsewhere, should be placed on the free-list. With few unimportant exceptions, all the materials which may be fairly said to be included in this description are now free. Those upon which a revenue duty is now retained are transferred to the free-list in the substitute to the House bill proposed by your committee. The great number of articles which have been added to the free-list since 1870 in pursuance of this policy is elsewhere alluded to. The percentage of importations of free and dutiable articles under the various tariffs which have been in existence from 1846, inclusive, is shown by the following table:

Period.	Dutiable.	Free.
	Per cent.	*Per Cent.*
1847 to 1857	88	12
1858 to 1861	78	22
1879 to 1883	70	30
1884 to 1887	66	34

It will be seen that with protective legislation we have had a much larger and constantly increasing amount of free importations. The protective policy contemplates the free admission of all non-competing articles and of all those in the production of which the benefactions of nature have given other countries permanent advantages over our own.

The doctrine of free raw materials, as advocated by tariff reformers, is a difficult one to enforce in legislation. In the usual division of labor the finished product of one man becomes the raw material of his industrial successor. If each man in this series becomes a tariff reformer, and insists that every article which he buys shall be considered a raw material and placed on the free-list, and that every article which he sells shall be deemed a manufactured product and protected, a practical solution of the problem of tariff construction is impossible.

As we have already shown, but very few of the articles placed on the free-list by the House bill can possibly be classed as raw materials

In the small number of cases where duties have been properly removed from crude materials such a reduction has been made on the manufactured product that the change would prove an injury rather than a benefit to the manufacturer.

It is claimed that the bill seeks to reduce the duties on the necessaries of life, but the fact is, that of the long list of articles put upon the free-list salt is the only one which could be called a necessary of life, and of the changes made in the dutiable-list the insignificant reductions on sugar and rice are the only ones which could be credited to this purpose. In marked contrast with these trivial reductions is the action taken in reducing rates of duty on luxuries, as shown by the following table:

Articles.	Existing duties.	Proposed duties.
Artificial feathers, flowers, and millinery ornaments.	50 per cent.	30 per cent.
Dolls and toys	35 per cent.	Do.
Kid gloves	50 per cent.	40 per cent.
Cosmetics, pomades, and toilet powders.	do.	30 per cent.
Cut, engraved, and stained glass	45 per cent.	40 per cent.
Manufactures of rosewood, mahogany, and satinwood.	35 per cent.	30 per cent.
Proprietary preparations, pills, etc	50 per cent.	Do.
Olive, salad, and other oils	Various	Free.
Fine confectionery	10 cents per pound..	5 cents per pound.
	50 per cent.	40 per cent.
Prepared cocoa and chocolate	2 cents per pound...	Free.
Manufactures of marble	50 per cent.	30 per cent.
Percussion caps	40 per cent.	Do.
Fine linen cloths of all kinds	35 per cent.	25 per cent.

FREE WOOL.

We have been recently advised by the President of the United States that in any tariff revision "such reliance upon present revenue arrangements as has been invited or encouraged should be fairly and justly regarded," and assured that in the reforms inaugurated by his party friends "abrupt and radical changes which might endanger such enterprises and injuriously affect the interests of labor dependent upon their success and continuance are not contemplated or intended."

There can be no better test of the sincerity of these sounding declarations than the proposition to put wool on the free-list. Wool has been dutiable since 1816, and through all the tariff mutations which have taken place since no suggestion has been made by any political party, up to the inauguration of the present Administration, for the removal of duties. The wool-growers of the country produce annually 300,000,000 pounds of wool, valued at $100,000,000. They sup-

ply nine-tenths of the clothing wool used by American manufacturers, and they have raised the United States to the first rank among the wool-producing countries of the world.

Those who have by their patient labor and intelligent efforts built up this great industry, relying for security upon the protection of "present revenue arrangements," are certainly entitled to fair treatment and reasonable consideration. They are refused either by this proposal. It is neither fair nor reasonable to suddenly force this large portion of our people into unequal and ruinous competition with the underpaid or semi barbaric labor of other wool-producing countries. It will afford no consolation to the numerous wool-growers of the country to tell them that their ruin may benefit the woolen manufacturers, or that we must have free wool because England, Germany, and France, under circumstances and conditions entirely different from ours, have removed the duties. If we are to look to the interests of the people of the United States alone, and to have in view the development of our own great natural resources, the adequate protection and care of wool producing must continue a feature of our American policy. Even the government of the Southern Confederacy, with a provision in its constitution which forbade the imposition of protective duties, recognized the importance of encouraging wool production, and levied a duty on raw wool.

Scarcely any other branch of American industry is more important to the American people or more necessary to their industrial prosperity and independence than wool-growing and wool-manufacturing. Scarcely any other branch has so fully vindicated the policy of protective duties by remarkable growth since the enactment of the protective tariff of 1861. In selecting these branches of industry for the radical changes which free-trade theories enforce, the President and his party have made it perfectly understood, in this country and abroad, that their acceptance of these theories is complete, and that they intend to put the ax to the root of the protective system.

The only reason given for advocating a repeal of the duties on wool, which have so greatly benefited agriculture, is that cheaper raw materials would help the manufacturer and benefit the consumer. In the same breath it is asserted that the prices of wool have been lower with protective duties than with revenue duties. The attempt to make the wool-grower believe that free trade will raise the price of wool, and at the same time make the manufacturer believe that the same change will render his materials cheaper, can not be said to have been entirely successful. In a large portion of our country wool-growing is co-extensive with farming, and the incidental benefits to the farmer, in many thousands of cases, make agriculture profitable where it would otherwise be profitless. It is by no means to the farmer who devotes his attention exclusively or mainly to the culture of sheep that the duties on wool are of the greatest importance. A far greater number of farmers now make farming pay with the aid of wool-growing who could not do so if they were obliged to compete with the flock-masters and ranges of Australasia or South America.

The contention that wool-growing in this country has not been aided or encouraged by protective duties is sufficiently answered by the following statement of the annual production and production per capita from 1840 to 1885:

Amount of wool produced in the United States.

Year.	Production.	Per capita.	Year.	Production.	Per capita.
	Pounds.	*Pounds.*		*Pounds.*	*Pounds.*
1840	35,802,114	2.5	1879	232,500,000	4.6
1850	52,516,969	2.7	1880	240,000,000	4.7
1860	60,264,913	1.7	1882	290,000,000	5.3
1869	162,000,000	4.2	1884	308,000,000	5.4
1874	181,000,000	4.2	1886	285,000,000	4.7

It will be noticed that in 1860, after fourteen years of revenue tariff, the total production of domestic wool was 60,264,913 pounds, or 1.7 pounds per capita, while in 1884, after twenty-four years of protection, the total production had increased to 308,000,000 pounds, or 5.4 pounds per capita. This increase justifies the policy of affording this important agricultural product adequate protection.

MANUFACTURES OF WOOL.

The following table shows the advance which has been made in woolen manufactures. It contains a statement of the value of manufactures of wool in each of the census years from 1820 to 1880, and the per capita value for each of those years:

Value of manufactures of wool in each of the census years from 1820 *to* 1880, *and the per capita value.*

Year.	Value.	Value per capita.	Year.	Value.	Value per capita.
1820	$4,413,068	$0.46	1860	$65,596,364	$2.09
1830	14,528,165	.88	1870	177,498,689	4.60
1840	20,696,999	.82	1880	267,252,913	5.34
1850	43,207,545	1.86			

The average annual quantity of wool consumed by our manufacturers from 1840 to 1887 was as follows:

Amount of wool consumed by American manufacturers by decades—average per annum.

Periods.	Products.	Imports.	Total consumption.	Per capita.
	Pounds.	*Pounds.*	*Pounds.*	*Pds.*
1841–'50	46,000,000	13,976,459	59,976,459	3.0
1851–'60	66,000,000	23,010,629	89,010,629	3.3
1861–'70	150,000,000	50,161,113	200,161,113	5.4
1871–'80	192,225,000	64,091,664	256,316,664	5.8
1881–'87	289,428,571	79,205,585	368,634,156	6.6

These tables, taken together, show that harmonious development of interests which it is the aim of the American policy of protection to secure.

It is often stated that the heavy duty on wool has prevented the normal growth of woolen manufactures. For the purpose of making a comparison between this and an industry which has free raw material, we insert the following statement, showing the total value and the value per capita of the cotton and woolen manufactures of the United States for each of the census years from 1820 to 1880:

Comparative statement of the values of manufactures of cotton and wool in each of the census years from 1820 *to* 1880, *and the per capita value of each manufacture.*

Year.	Manufactures of cotton.		Manufactures of wool.	
	Value.	Value per capita.	Value.	Value per capita.
1820			$4,413,068	
1830	$32,000,000	$2.49	14,528,166	$0.88
1840	46,350,458	2.71	20,696,999	.82
1850	65,501,687	2.82	43,207,545	1.86
1860	115,681,774	3.68	65,596,364	2.09
1870	177,489,739	4.60	174,495,689	4.60
1880	192,000,110	3.83	267,252,913	5.34

It will be noticed that the relative increase in the value of woolen manufactures has been much greater than in cotton. In 1870 the production of cotton and wool per capita was the same ($4.60 in each case), while in 1880, with a heavy duty upon wool, woolen manufactures had increased to $5.34, and cotton manufactures, with free cotton, had fallen to $3.83 per capita.

It may be valuable in this connection to make a comparison of the changes which have taken place in the consumption of wool in the countries which are the principal competitors of the United States in woolen manufactures.

Germany has increased its consumption of wool in manufactures about 40 per cent. in twenty years. France consumed in 1866 about 310,000,000 pounds of wool—190,000,000 foreign and 120,000,000 home grown; and in 1886 about 446,000,000 pounds—366,000,000 foreign and 80,000,000 domestic; an increase of barely 44 per cent. in twenty years. Great Britain consumed 238,000,000 pounds in 1859, when the United States consumed 86,000,000 pounds. In 1885 Great Britain consumed 366,000,000 pounds, when the United States consumed 400,000,000 pounds. This startling change in the industrial relations of the two countries may afford some explanation of the anxiety in Great Britain for the destruction of the protective policy of this country.

The development of woolen manufactures in the United States has been arrested by the inadequate duties that were imposed upon manufactures of wool by the act of March 3, 1883, which, taken together with the erroneous classification of manufactures of worsted, have led to greatly increased importations from England, Germany, France, and Belgium. The rapidity with which these importations have increased the past year threatens, unless some remedy shall be promptly adopted, to destroy the woolen manufacturing industry of the United States. The following table shows the importation of worsted coatings, etc., from the consular district of Bradford, a single manufacturing district of Great Britain, for the past six months and for a corresponding period in 1887:

Exports from the consular district of Bradford, England, to the United States of certain woolen and worsted fabrics during the first six months of the years 1887 *and* 1888.

Articles.	1887.	1888.	Increase.
Stuffs	$3,199,760	$3,363,605	$183,845
Worsted coatings	1,534,235	2,689,387	1,155,152
Woolen goods	197,560	274,255	76,695
Silk seals, plushes, etc	719,595	1,407,705	688,110
Worsted yarns	302,702	346,330	43,628
Total	5,933,852	8,081,282	2,147,430

Similar statistics in regard to importations from other districts and countries are not available, but they would undoubtedly show a like increase of importations.

The average annual importation of all manufactures of wool except carpets for the years 1868 to 1883, under the tariff of 1867, was $34,129,676.21. The average annual value of the same importations under act of March 3, 1883, in the years 1884–'87 was $39,232,500.25. The value of these importations in 1887 was $42,752,588.12, and in 1888 was $46,352,063.

The value of the importations of all manufactures of wool for the month of July, 1888, was $1,265,992 greater than the importations for the corresponding month in 1887. If this rate of increase continues the total imports for the present fiscal year will be about $63,000,000.

To form an approximate estimate of the rapidity with which the quantity of imported woolen manufactures is increasing we should consider the great decline which has taken place in the price of woolen and worsted goods. The average value of the importations of manufactures of worsteds, etc., for the four years prior to 1883 was $1.33 per pound, while in 1887 the average had fallen to 79 cents per pound.

The people of the United States consume nearly one-third of all the wool produced on the globe, the consumption per capita being very much greater than that of any other country. In 1860 the American producers supplied 68 per cent. of the amount of woolens required for domestic consumption; in 1880 they supplied 87 per cent.; while in 1884 the amount of woolen goods imported was probably less than 10 per cent. of the value of the total consumption. Since the reduction in rates made in 1883, however, with the increase in the value of our imports of woolens, domestic production has relatively declined.

The following table shows the comparative value of domestic and imported manufactures of wool, value per capita, and proportion of the American market held by American and foreign manufacturers in each of the census years from 1820 to 1880:

Year.	Domestic manufactures.			Importations.		
	Value	Value per capita.	Percentage of total consumption.	Value.	Value per capita.	Percentage of total consumption.
1820	$4,413,068	$0.46	38	$7,238,954	$0.75	62
1830	14,528,166	.88	64	8,290,062	.75	36
1840	20,696,999	.82	60	13,950,772	.94	40
1850	43,207,545	1.86	77	13,005,852	.65	23
1860	65,596,364	2.09	68	31,333,273	1.16	32
1870	177,495,689	4.60	85	33,046,521	.94	15
1880	267,252,913	5.34	87	39,537,694	.90	13

One of the principal arguments used by the advocates of free wool is that if the duty should be removed the woolen manufacturers of the United States would be able to compete successfully for the markets of the world, and that by retaining the duty upon wool we are deliberately excluding them from profitable employment. There is, we believe, much popular misapprehension as to the extent of the markets of the world in woolen goods. The total amount of the net importations of woolen goods by all the countries of the world, excluding the United States, probably does not exceed $90,000,000 per annum. We ourselves imported last year, 1888, nearly $49,000,000 in foreign value of woolen goods, or more than $80,000,000 in duty-paid value.

It is thus demonstrated that we have within our own reach a market which is almost equal in importance to all the other available markets of the world, and it would seem to be the paramount duty of Congress to secure to American producers by wise legislation this important portion of the world's market. It can be easily shown that if we had free wool we could not compete on equal terms for the neutral markets of the world. We could not compete because the cost of production of all manufactures of wool aside from the cost of wool is much greater in the United States than in competing countries. We have equal advantages in machinery, capital, the enterprise of our people, but the much greater wages paid to operatives and the greater earnings in this country of all the people who contribute to the production of our woolen manufactures prevent successful competition in neutral markets, unless wages should be reduced to the foreign scale.

It is only by the maintenance of the American system that the operatives in American woolen mills can hope to retain the immense advantages in respect to wages which they have over the workingmen of England, Germany, and France. The protection of the allied industries of wool and woolens has not, however, been beneficial alone to the persons employed in woolen mills. It has at the same time helped to increase the wages and rewards of farm labor; it has enabled us to raise and sell 300,000,000 pounds of wool where 60,000,000 pounds were raised, and to employ operatives in working up 400,000,000 pounds where but 86,000,000 pounds were manufactured. Coincident with this constant advance in wages and enlarged employment there has been a great reduction in the cost of woolen goods to American consumers. Free trade in wool and a bare revenue duty for woolens would compel the farmers to raise other crops, of which the supply is already greater than the demand, and it would close factories in which many millions of capital are invested, rob an army of operatives of employment, and force down the wages of all other labor.

All the sacrifice and suffering, this arrest of harmonious progress, and this disorganization of labor, we are asked to face in the hope that with one-sixth of the world's supply of wool cut off, we may thereby get cheaper wool and woolens. If this hope were rational, the loss would far outweigh the gain. It is better to maintain the wages of our workers and to develop our own resources than to abandon our fields, stop our mills, and look to Europe for the supply of our manufactured products.

A SECTIONAL BILL.

The removal of the duties from cotton-ties, burlaps to be used as cotton bagging, machinery for making cotton bagging, jute bags, etc., the retention of high duties on certain plantation products, such as sugar at 68 per cent. and rice at 100 per cent., the imposition of duties which would be protective on the coarser kinds of cotton and woolen fabrics manufactured in this section, all point to an attempt, by the terms of the House bill, to discriminate in favor of the planters of the cotton-growing States, an attempt made with the vain hope that it may be found possible to achieve the permanent prosperity of one section at the expense of another.

The industries of this section are not disturbed. It is well known that a considerable number of interests in other sections are suffering from insufficient protection, and yet it is significant that the only article upon which the rate of duty is increased in the entire bill is uncleaned rice, which by a change in classification is advanced from 70 to 100 per cent. ad valorem. We submit herewith (Appendix E) a suggestive table taken from the census reports, which shows the relative proportion of the various manufactured products upon which rates are removed or largely reduced by the House bill that were produced in 1880 in the eleven cotton States and in the other States. This table discloses the fact that the section which furnishes the bill and two-thirds of its effective supporters supplies but 2½ per cent. of the industries to be crippled or destroyed.

A BILL TO FAVOR CANADA.

The discrimination is not less marked in favor of the people of Canada and against the farmers and lumbermen living along our northern border from Maine to Oregon. The following table contains a comparison of the rates which are imposed by the Canadian tariff upon certain articles placed upon the free-list by the House bill under consideration:

Comparative statement of Canadian and United States tariffs on certain articles affected by the House bill H. R. 9051.

Articles.	Present law.	H. R. 9051.	Canadian.
Oils, animal and fish	25 per cent.	Free	20 per cent.
Oil, coal	10 per cent.	Free	7½ cts. per gallon.
Meats	1 cent per pound.	Free	1 cent per pound.
Shoulders and other meats	2 cents per pound.	Free	2 cents per pound.
Vegetables	10 per cent.	Free	10 per cent.
Pease	10 or 20 per cent.	Free	10 cts. per bushel.
Beans	10 or 20 per cent.	Free	15 cts. per bushel.
Brick	20 per cent.	Free	20 per cent.
Shingles	35 cents per M.	Free	20 per cent.
Hubs, spokes, etc	20 per cent.	Free	15 per cent.
Lumber and timber, n. o. p. f.	20 per cent.	Free	20 per cent.

Under our existing tariff the Canadians send to our markets annually many millions of dollars in value of their products, which, after paying duties not greater than those levied by the Canadian tariff, are sold in competition with our domestic producers. The advantages which would accrue to the people of Canada by this removal of duties are manifest.

The effect which the placing of lumber on the free-list would have upon the Canadian interests is shown by the following extract from the report of Consul Hotchkiss to the Department of State, under date of February 2, 1888:

I have been thus explicit in describing the systems of the two countries, for, to my mind, they are the key by which the situation and effect may be safely prejudged in case free lumber becomes a reality.

There is no dispute that the American manufacturer controls the making of prices. In doing this, he is not influenced by the Canadian supply in any degree. If the duty of $2 is removed it will not affect the American price, because it has never been a factor and will still be unfelt. No lower price will prevail in the United States than heretofore, and no different net results will be experienced by the manufacturer.

The Canadian, on the contrary, will lay his lumber down in the American market at $2 less per thousand, and will obtain for it the same as the American does, so that the net result to the Canadian manufacturer will be a clear gain of the $2 which the American Government has remitted. This additional net result to the Canadian manufacturer will, however, be of very brief duration.

Having shown how the governments in Canada continue their control of the timber land and their disposition to tax them to the utmost, I am confident that not a May pay day will pass before a public notice will issue in effect that a further increase in annual and timber dues has been made an order in council, in sums sufficient to absorb the $2 per thousand into the provincial treasuries.

That Canada will do this we have reason to believe, not only from the foregoing statement but from the fact that when in 1870 we placed logs on the free-list, which prior to that time bore a duty of $1 per

thousand, Canada in 1872 responded by placing an export duty on logs of $2, which duty is retained to this day.

HOME MARKET FOR FARM PRODUCTS.

The comparative treatment which is indicated by a contrast between the duties on rice and sugar and the placing of beans, pease, meats, vegetables, and other Northern agricultural products on the free-list does not deter the supporters of this bill from making earnest appeals to farmers as a class for support. This appeal is based upon the theory that a protective tariff can not aid the farmer in securing better prices or a wider market for his products, but that it does impose a higher cost upon every protected manufactured article which he buys. It might be an advantage to an individual farmer if he were able to buy the protected manufactured products which he consumes at the prices they could be purchased for in England or Germany; but if all the farmers should purchase their supplies of these articles at the lower foreign price relative conditions would change at once.

If these goods were all purchased abroad, the destruction of a large portion of the domestic demand for farm products created by the artisans and mechanics employed in manufacturing industries would follow, and a very large number of persons now engaged in other pursuits would be obliged to seek employment in agriculture. If, on the other hand, these manufactures should be purchased of domestic producers at the lower foreign price, this would involve, as we have shown, a reduction of the earnings of operatives and mechanics to the foreign level, and the consequent reduction of their ability to purchase farm products from the domestic supply.

An addition of 5 cents per day to the wages of the workingmen of the country would furnish a market within our own territory equal in extent to the value of the surplus agricultural products now annually exported. If the earnings of all persons engaged in useful occupations in the United States should be reduced to the level of the earnings of the same classes in Great Britain, the purchasing power of our people would be reduced more than $3,000,000,000 per annum, or by a sum equal to the value of all our agricultural products in 1880.

No class of people in the United States have an equal interest with the farmer in the diversification of our industries and in the development of manufactures, for proximity to profitable markets gives increased value to labor and to land and its products.

We append to this report Exhibit D, a statement showing the production, consumption, and exportation of cereals from 1840 to 1887, for the purpose of indicating the relative value to farmers of the foreign and home markets. From this table it will be seen that our total annual exports of all cereals would barely supply domestic consumption for three weeks. If the per capita consumption by our people had not been greater in 1887 than it was in 1860, our surplus for exportation would have been at least five hundred million bushels greater than it was. This increase of consumption per capita is owing to the increased earnings of the masses of our people. If the acreage and production of cereals should remain stationary for a year and a half we should then have no surplus for exportation.

The competition in wheat-growing which has been developed in India, South America, Australia, and in the British possessions in North America, is likely to make unprofitable the production of this cereal for exportation by our people, and to cause the wheat-grower of the Northwest to look to an enlargement of the certain and remunerative home market. This enlarged and profitable market can only be secured by increasing the number of people engaged in other than agricultural pursuits, and by furnishing to all increased employment without diminution of wages. To cripple our manufacturing interests and reduce the purchasing power of our working men will result in augmenting the number of competitors in the field of agricultural production, and the increased supply could, in that event only, find a market in Europe by enforced competition with India at ruinous prices. Wheat can now be laid down in Liverpool from the central provinces of India at as low a cost for transportation as from Chicago, and Indian wheat can be delivered in New York at less cost for transportation than from the wheat-fields of Dakota.

It is for the highest interests of the American farmer that the number of our food consumers rather than of food producers should be increased, and that the general prosperity of all should be secured. It is true that the decline in prices of agricultural products has been very great, but the value of these when measured by the value of clothing, farming utensils, or other necessities of a farmer's life, is much greater now than in any of the years preceding 1860.

REDUCTIONS MADE BY THE HOUSE BILL, AS SHOWN BY THE AVERAGE AD VALOREM RATE.

After months spent in violent attacks upon the protective system, and when, fortunately, the people of the country have become thoroughly aroused to impending danger, the friends of the House bill suddenly discover that it is not a free-trade measure, and that it would not injuriously affect the vital interests of any of the large number of persons employed in American industries. In proof of this it is said that the bill proposes an average reduction of only $4.32 on every $100 of dutiable merchandise imported. The average ad valorem rate assessed on all dutiable goods in 1887 was 47.10 per cent., and it is assumed that the average rate under the terms of the House bill would be 42.78 per cent., and that therefore the percentage of reduction of rates *is not more than* 9.2 per cent.

It is claimed that this small percentage of reduction of rates proves conclusively that the bill is conservative in its character, that it would not injure any established industry, and that it is not open to the severe criticism to which it has been subjected. It is assumed that the retention of an average ad valorem rate of 42.78 per cent. on dutiable merchandise is conclusive evidence that the bill has no free-trade tendencies.

These statements in regard to the average ad valorem rate imposed by the bill, and the percentage of reductions made by it, are misleading and deceptive. The average percentage of reduction made by the House bill in tariff rates can be estimated by a comparison of the amount which was collected with existing rates upon the importations of the articles named in its various sections, in any given year, with the amount which would have been collected on the same importations if the rates proposed had been operative. The rates imposed by three schedules of the existing tariff, namely, F, H, and L (tobacco, wines and liquors, and silks), are not reduced or changed in any manner by the terms of the bill. In the other schedules the duties on a large number of articles are left unchanged, and these, together with the schedules referred to, should not, of course be taken into consideration in estimating the percentage of reduction of duties or rates.

The value of all the articles upon which the rates of duty are changed by the bill, and which are alone affected by its provisions, imported in 1887, according to the statement furnished by the Committee of Ways and Means and printed in connection with the bill, was $249,806,796.20. Upon these articles there was imposed a duty in 1887 of $136,087,147,77, equivalent to 54.48 per cent. ad valorem. The same articles, if imported under the provisions of the proposed bill, would have paid, according to the same statement, duties to the amount of $86,600,907.62, or an ad valorem rate of 34.67 per cent. The resulting reduction in the amount of duties collected under the House bill on the importations of 1887 would be $49,406,240.15, or a percentage of reduction of 36.36 per cent., instead of 9.2 per cent., as claimed by the friends of the bill.

To ascertain, however, the effect which the bill would have upon protected industries, we should eliminate from this computation the amount collected from the revenue duty imposed upon sugar. If we deduct the value of the importations and amount of duty collected from sugar in 1887, we should then have the value of all imported articles referred to in the bill $175,571,927.80, upon which the duties collected in 1887 amounted to $78,074,855.50. The duties which would have been collected upon these articles under the proposed bill would have amounted to $39,525,789.49, showing a percentage of reduction of duties and rates upon all articles named in the bill, exclusive of sugar, of 49.37 per cent. These articles paid an average ad valorem rate in 1887 under the present law of 44.46 per cent., and would have paid, under the provisions of the House bill, 22.51 per cent. Instead, then, of retaining an average ad valorem rate upon all articles enumerated in the bill of 42.78 per cent., it would actually retain but 22.51 per cent.

The statement of reductions furnished by the House committee does not embrace the reduction which would be produced by putting German looking-glass plates, bags of jute, jute machinery, and several other articles of less importance upon the free-list, nor does it include the reduction which would be made by an important change of classification in Schedule B, reducing the duties on several kinds of china, porcelain ware, etc., from 60 to 35 per cent. If these reductions are taken into consideration it is apparent that the measure reduces the rates of duty more than one-half upon all articles affected by it except sugar.

The average reduction in rates can be estimated by another method, namely, by a direct comparison of every item of existing and proposed rates and finding the percentage of reduction in each case (as shown in Appendix G), and averaging the resulting percentages without regard to the relative importance of the articles or the amount of importations. This method would show an average reduction of 53 per cent.

The alleged conservative character of the bill disappears under this examination, and we find that the average reductions it would produce are more than twice as great as any which have heretofore been proposed by the most courageous revenue reformer.

Many illustrations might be given to show the absurdity of attempting to establish the protective character of a revenue measure by the average ad valorem rate which it imposes upon dutiable articles. It is the distribution and relation of rates, and not the average rate imposed on all articles, which determine the character of a tariff. For instance, the average ad valorem rate imposed upon all dutiable articles by the British tariff in 1887 was 70.07 per cent., and yet it will hardly be claimed that the British tariff is protective in its character.

If all of the articles in our tariff schedules upon which protective duties are levied should be placed upon the free-list and all our protected industries destroyed, and duties should be maintained at present rates upon tobacco, silks, wines and liquors, and sugar, the average ad valorem rate imposed upon dutiable importations would be 71.92 per cent. instead of 47.10, and by this wonderful mathematical process

of ascertaining the extent of protection by the average ad valorem rate, we should find that the nearer we approached to free trade the greater would be the degree of protection afforded our industries. The assurance that after all a high average ad valorem rate was preserved would afford no compensation to the manufacturers or workingmen whose industries were destroyed by the removal of duties. The average rate upon all the schedules, excluding silks, wines, liquors, tobacco, and sugar in 1887, was 37.65 per cent.

The effect of placing articles on the free-list which bear lower rates of duty than the average is obviously to increase the average rates on the remaining dutiable articles. The high average ad valorem rate resulting from our present tariff is owing to the unexampled low prices current for a number of years, and to the high rates of duties levied on tobacco, silks, wines, liquors, and sugar.

The tariff of 1846 is constantly referred to by tariff reformers as a model enactment, and yet if the articles in the four schedules named had been dutiable at the same rates in 1887 which were imposed upon them in 1846 (wines, 40 per cent.; sugar, 30 per cent.; tobacco, 40 per cent.; silks, 30 per cent.), the average ad valorem rates upon all imported merchandise in 1887 would have been 23.69 per cent., or a less rate than was imposed upon all imported merchandise under the act of 1846.

FREE TRADE.

In consequence of the extreme sensitiveness manifested by the authors and supporters of the bill under consideration to the suggestion that they are free-traders, or that the measure which they have proposed looks in the direction of free trade, it may be well to consider what is understood by free trade when the term is used to describe the economic policy of the nation.

It is true there is but one country to which we can look for an illustration, as, with the conspicuous exception of Great Britain, all other commercial nations have rejected the teachings of that school of political economists who dream of universal serenity and prosperity to be accomplished through the adoption of free-trade theories. Free trade, then, judged by the example of Great Britain, does not mean the abolition of custom-houses nor the collection of all revenues by direct taxation. There is annually paid by the people of Great Britain under the provisions of the British tariff an equal sum per capita for duties on imports to that which would be paid by the people of the United States under the provisions of the House bill or of the substitute proposed by your committee.

A free-trade country may be properly described as one which does not impose protective duties upon importations. Lord Salisbury lately defined a free-trader as one who is opposed to protection. Mr. David A. Wells recently said, "Free trade, as an economic principle or politico-commercial system, is the direct opposite to the so-called principle or system of protection." If these definitions are correct the promoters of this bill are self-confessed free-traders, and the denial that they are engaged in a "crusade of free trade" comes too late, for the American people are not likely to forget the lessons of 1844 and the political rallying cry of "Polk, Dallas, and the tariff of '42."

American free-traders, or revenue reformers, as they now choose to call themselves, are hopelessly divided in opinion as to the proper manner of raising the revenue necessary for the support of the Government; many of the more conspicuous are in favor of a single tax upon land; others prefer the direct tax contemplated by our Constitution; some favor the collection of revenue by customs duties upon articles not produced in this country, after the manner of the British tariff; much the larger number, however, are in favor of a general tariff for revenue only, but all oppose with equal ardor the imposition of protective duties, which they declare to be "vicious" and "iniquitous," resulting in "spoliation" and "robbery."

These gentlemen have also differed at times as to the best method of securing the abolition of protective duties and the destruction of the system. They are, however, in substantial agreement that the long line of our industrial defenses can only be carried by concentrating their forces upon that which seems from time to time to be the weakest point. After each repulse or defeat some new point has been selected for the assault. The warfare has usually been directed against the manufacturers of the country, who were declared to be odious monopolists, whose exactions wrung from an unwilling people by the machinery of a protective tariff could be no longer tolerated. The present movement is disguised under the pretense of a purpose to assist and emancipate our overburdened manufacturers.

Great ingenuity has been shown in the construction of the varied and various reform measures which have been introduced in Congress from year to year, but in all the common purpose of destroying the protective system has never been lost sight of. The free-trade programme embodied in the bill now under consideration was adopted in 1885, after the defeat of the so-called Morrison horizontal reduction bill of 1884.

In November, 1885, the free-traders and revenue reformers of the country met in national conference at Chicago, under the auspices of the American Free Trade League, to decide upon a plan for renewing the attack upon the common enemy. This important conference, after prolonged discussion, determined to urge upon their friends in Congress the adoption of the policy outlined in the following resolutions:

We therefore urge upon Congress for action at the ensuing session—

1. That, under no pretense, shall any countenance be given to attempts to increase protective duties.

2. That articles which are at the foundation of great industries should, in the interest of labor and commerce, be freed from duty, whether they be crude materials (as lumber, salt, coal, ore, wool, etc.) or partly manufactured (as chemicals, dye-stuffs, tin-plate, wood-pulp, etc.).

3. That on products from such articles duties should be at least correspondingly reduced, so that protection, real or nominal, to manufacturers shall not be increased and that the consumer shall have the immediate benefit of the reduction.

We urge that any steps in tariff reform should simplify the present complicated classification, and should do away with mixed duties, replacing them by ad valorem rates, instead of specific duties, which are most burdensome on low-priced goods consumed by the great body of the people.

These resolutions were prefaced by a long preamble, declaring, among other things, that "every protective feature must at the earliest day be eradicated from our revenue system."

A careful comparison of the provisions of the House bill now under consideration with the detailed suggestions contained in the resolutions will show with what fidelity the programme of the free-trade conference has been followed in every essential particular.

At the conference a suggestion was made that it might be advisable to memorialize the President on this subject, but the presiding officer, Mr. David A. Wells, responded:

We can trust the President of the United States.

This confident and significant assertion was publicly made a year before the President sent the annual message to Congress in which he enunciated the policy of the Administration and of his party upon the lines laid down by the free-trade conference, and in which he sought to enforce the soundness of the position they had taken by the use of arguments which had become familiar through constant reiteration for half a century by free-traders on both sides of the Atlantic.

The controversy, however, between the opponents and the friends of the bill under consideration is not one over names or phrases; it is a contest between those who support and those who oppose the American system of defensive duties; and this conflict is as irrepressible as that which was waged between the respective friends of freedom and slavery. There is, moreover, the same irreconcilable antagonism between a protective tariff and a tariff for revenue as that which exists between protection and absolute free trade. The definition of revenue duties given by Secretary Walker, their most distinguished advocate, and one which has been generally accepted by his followers, carefully and effectually excludes all idea of protection.

A duty, whether high or low, which does not equal the difference in cost of production in this and in any competing country of the article upon which it is levied is not protective.

If a duty is protective it matters not to the labor employed in an industry whether it is so accidentally, incidentally, or whether it is levied with full knowledge and intent of the result which is to follow. If the rate is below the protective line it has no defensive virtue and confers no benefits upon domestic manufactures. The debate is between those who believe that protective duties may be levied in pursuance of a wise public policy and those who believe that all protective duties are indefensible; and in this discussion the advocates of the House bill necessarily take their places among the opponents of the protective system.

LABOR COST OF PRODUCTION.

It is asserted that the rates of duty retained by the House bill must be sufficiently protective to the labor employed in our various manufacturing industries, as these rates on all manufactured articles are greater than the entire sum paid in each case for labor in producing the article. For illustration, it is claimed that, as the average rate proposed by the bill on manufactures of cotton is 39.07 per cent., and as the assumed average labor cost in these manufactures is but 21.06 per cent., it may be said (even though competing nations should reduce the wages of labor in this industry to the lowest possible minimum) that the duties retained would much more than equalize the larger sum paid by the American producer for labor. The census of 1880 and the first annual report of the Commissioner of Labor are quoted in corroboration of these and similar statements in regard to other industries. The labor cost of producing a ton of pig-iron in various parts of the United States is assumed to be from 8.55 to 16.71 per cent. of the total cost of production, and as the rate of duty proposed by the bill on pig-iron is $6 a ton, or nearly 55 cent. of the foreign prices, it is therefore said to be evident that this duty could be still further reduced more than one-half and yet be amply protective of the labor employed in this industry.

The extravagance of these statements and the falsity of the deduction made from them are apparent when we consider that the percentage of labor cost in each case is based upon the amount paid for labor at a single stage of the long process of manufacture.

In the ultimate analysis, the cost of production of manufactured articles is the cost of the labor or services of man. The cost of the original elements in their natural state, before they are advanced in value by labor, is insignificant. If, in computing the cost of production, we

should exclude the sums paid for taxes, insurance, interest, and retained for accruing profits, a large portion of which represents payments for labor and services, and which together would rarely amount to 10 per cent. of the entire cost, we should then find the labor cost in all cases to be at least 90 per cent. of the total expenditure.

Mr. Edward Atkinson, in a carefully prepared statement published in April, 1887, demonstrates that of the total cost of producing medium shirtings, worth 6¼ cents a yard, the proportion paid for labor at various stages (on the plantation, in transportation, in factories, etc.) was 92.12 per cent., the remaining portion, 7.88 per cent., being absorbed in interest, insurance, profits, etc. This estimate is confirmed in a striking manner by the following statement of Hon. A. S. Hewitt, made at a hearing before the Committee on Ways and Means of the House of Representatives, February 21, 1884, the subject under discussion being the percentage of labor cost in the manufacture of iron.

Mr. Hewitt said:

The percentage of labor involved in the production of any give article depends upon where you begin to estimate the percentage. If you begin with a steel-rail mill, which uses pig-iron, the labor will be from 25 to 30 per cent. The actual wages paid by a wire mill will amount to about 29 per cent. of the cost. If you include labor in the blast-furnace that would make it 60 per cent. But if you go on back to the ore bed, and put in everything which was paid out from the ore bed, the percentage of labor would have been about 90 per cent. I say this because the gentleman (Mr. Thomas G. Shearman, of Brooklyn, N. Y.) proposes to overthrow facts within my knowledge, and for which I pay. I say the amount which I pay out for labor, when I include every particle of raw material beginning at the ground—and I am a miner both of ore and coal—I have never, with all my anxiety to get it down, got it below 90 per cent. on the value of the finished product.

Mr. MILLS. What is the finished product?

Mr. HEWITT. Any finished product. I make bar-iron.

Mr. MILLS. Is pig-iron a finished product?

Mr. HEWITT. The labor in pig-iron will be 90 per cent. of the cost. It actually takes 90 per cent. of the cost of the article for labor when you include everything, from the beginning to the end.

That which is shown to be true by the intelligent testimony of these two eminent tariff reformers in regard to the manufactures of cotton and iron is equally true in regard to every other manufactured product. The adequacy of a rate of duty for defensive purposes can not properly be determined by ascertaining the sum paid for labor in any one of the many operations necessary to transform natural elements into fully manufactured products. The larger earnings and greater cost of labor at every stage and in all contributory occupations should be taken into consideration, and the rates should always be equal to the resulting increased cost of production. As all of our people engaged in every occupation contribute to and share in the benefits of profitable production, so all are alike vitally interested in the maintenance of a policy which secures and enlarges the area of national industrial success.

The futility of attempting to adjust rates of duty, levied to equalize foreign and American prices, on the basis of the mathematical relation which these rates bear to that small portion of the labor cost of production which is included in the census tables, is demonstrated by the following illustration:

The labor cost of manufacturing worsted goods, according to the census reports, is 16.23 per cent. The actual relative cost of producing No. 36 worsted yarns in the United States and in England, as shown in detail by some tables submitted to the House of Representatives May 12, 1888, by Hon. WILLIAM L. SCOTT, of Pennsylvania, assuming wool to be free from duty in the United States and the cost of wool to be the same in both cases, is 59 cents per pound in England and 90 cents in the United States. It will be seen that to equalize the cost of production between the two countries in this case a duty of 52.54 per cent. must be imposed by our tariff. If a duty of 16.23 per cent. should be levied, the cost of English yarn laid down in New York, duty paid, would be, say, 69 cents per pound, as against 90 cents cost to the American manufacturer; and American production would cease unless wages of labor in this and all collateral industries were reduced to the English standard.

The same tables show the relative cost of manufacturing the same number of yarn from a different grade of wool to be 52 cents in England and 80 cents in the United States. In this case a defensive duty of 53.84 per cent. would be necessary. Mr. SCOTT's tables also, it will be observed, prove conclusively the inadequacy of the rate of duty (40 per cent.) proposed by the House bill upon worsted manufactures.

We are further assured by our tariff-reform friends that the cost of production of many leading manufactures is not greater in the United States, and in some cases is even less, than in competing countries. The most casual examination of the comparisons upon which these assertions are founded will disclose their unreliable character, as in most instances they are based upon dissimilar articles, produced under entirely different conditions.

The general inaccuracy of the statement that manufactures of cotton, iron, wool, or steel can be produced in this country at an equal or lower cost per unit of quantity than in England, Germany, or France is known to every intelligent observer, and is clearly established by the fact that we import annually $175,000,000 in value of these manufactures that are successfully sold in competition with our domestic productions after the payment of duties which we are told are exorbitant. In all cases the greater cost of producing the manufactures to the American producer is due to the greater wages or larger earnings of the workingmen of this country. The fact that all persons employed in American production—and this includes all who are engaged in useful occupations—receive very much larger sums for their labor, whether the compensation is measured by money or by the necessaries and comforts of life, than those who are engaged in similar employment in any other country is now generally admitted.

While revenue reformers are forced to admit the truth of this statement, they claim that the better-paid labor in the United States gives to the American manufacturers lower cost of production on account of the greater activity and efficiency of American workingmen, and that this condition is the legitimate result of the general economic law that high wages are an unerring indication of low cost of product. To say that greater wages per hour or per day can be paid in America than in Europe for attending the same machinery, running at the same speed an equal number of hours, and turning out the same quantity and kinds of goods, and yet that the cost of production will be lower in America, is to state an absurdity; and yet these are the actual relative conditions which govern the production of a large portion of our manufactures. It is true that the cost of production does not in all cases depend solely upon the sum paid for the wages or earnings of employés. There may be climatic advantages, the more extensive or effective use of machinery, greater skill in superintendence or manipulation, more favorable situation in reference to markets, greater experience, intelligence, vigor, or artistic taste of workmen. When all or most of these advantages exist in a country or community the highest rate of wages is not inconsistent with relatively low cost of production.

In the manufacture of textile fabrics and many other branches of industry it can not be truthfully claimed that we have any considerable advantage in most of the respects named over England, Germany, France, or Belgium. In these days of fierce competition between all industrial communities the adoption of a new invention or an improvement in methods in one country becomes immediately known in all the others. Practically, the intelligent and successful manufacturers in all these countries use the same machinery and employ substantially the same methods in production. If we should consult English authorities, we would find a general agreement of opinion that English operatives are more efficient than those of any other nation in the world. On this point Mr. J. S. Jeans, in a recent publication, makes the following statement:

On the contrary, there is abundant proof of the fact that in this respect England continues *facile princeps*. The efficiency of English factory labor continues to remain, as it has ever been, unsurpassed. This attribute is established by many conclusive evidences. * * * In the United States, which, after the United Kingdom, is now the greatest cotton-manufacturing country in the world, the increase in the number of spindles per operative has been practically the same in amount as in the United Kingdom; but the average productiveness of the cotton operatives of the United Kingdom, as expressed in the number of spindles used per employé, is 47 per cent. greater than the same class of workers in America. In factory operations, moreover, English operatives turn out more work per employé than those of any other country, whether measured by the number of spindles which they tend or by the quantity of yarn they spin.

This view of the relative efficiency of labor in the two countries is not shared by intelligent observers in the United States. It is undoubtedly true that American workingmen and mechanics have greater intelligence, activity, and enterprise, and that these qualities more than offset the advantages of association, surroundings, and the inherited skill of generations which the operatives of Great Britain possess. But it is also true, even with this superior activity and intelligence, and all the other industrial advantages which we may possess, that the cost to the American manufacturer of accomplishing certain equivalent results—say, of producing similar yards of cotton or woolen, or pounds of iron—is much greater than to his foreign competitor, owing to the much greater cost here of labor or services in production. The tables submitted by Mr. SCOTT, and elsewhere referred to, establish the truth of this statement with reference to one industry. We might multiply indefinitely examples in regard to others, showing the greater cost per unit of quantity of the similar articles to American manufacturers, thus enforcing the necessity of adequate protective duties to insure the continued industrial prosperity of the United States.

MANUFACTURERS' PROFITS.

It may perhaps be proper in this connection to make an allusion to another fiction extracted from the census reports, which has formed the basis of many tariff-reform arguments in and out of Congress. It has been assumed that the protective policy has enabled the manufacturers of the country to make enormous profits in the prosecution of their business, and that the extent of their net profits could be accurately ascertained from the census tables by deducting the sums reported as paid for materials and labor from the value of the gross product in each case. These net profits are said to vary from 25 to 67 per cent. per annum, and from this it is claimed that capital employed in manufactures is much better rewarded than that employed in agriculture or commerce.

When we consider that the sums returned to the census officials as having been paid for materials and labor do not include the cost of superintendence, administrative labor, insurance, taxes, depreciation of plant, interest, commissions, transportation, losses by bad debts, or

other inevitable elements of cost, the worthless character of these statements and any conclusions which may be based upon them is apparent. If the aggregate expenditures for these unenumerated elements of cost should also be deducted from the total value of products, the average net profits would be found but little, if any, above the average commercial rate of interest.

Experience in industrial communities has demonstrated the fact that whenever the profits in cotton, woolen, or other branches of manufacture much exceed the customary rate of interest, new establishments are erected, new competition is enlisted, and the normal rate of profit is soon restored.

The census tables contain no statistics which were intended to indicate, or which can possibly be made to show the net profits in any trade or business, and all conclusions based on figures obtained in the manner described are equally unreliable.

If any inference could be drawn from the census tables bearing upon the question whether the protective system has increased or diminished sums paid for labor or the earnings of capital, a comparison should be made between the census of 1880 and 1860. The census of 1860 would show a profit to the cotton manufacturers of 35.6 per cent. as against 23.5 per cent. in 1880; to the woolen manufacturers of 47.9 per cent. in 1860 instead of 38.5 in 1880; and in all the manufacture of iron 30.8 per cent. in 1860 instead of 21.1 per cent. in 1880. If any value whatever, therefore, could be accorded to this method of ascertaining profits, it would be shown that a revenue tariff such as existed in 1860 secured much greater profits to the manufacturer and much smaller remuneration to labor than a protective tariff. It may be safely assumed, however, that this class of statements is made for circulation in communities where there is little or no knowledge of industrial methods and results, and where their falsity and absurdity may not be understood.

WAR TARIFF.

The criticism of our tariff laws which is urged with most pertinacity is based upon the assumption that we are maintaining in time of profound peace a war tariff enacted to provide for the enormous expenditures incurred between 1861 and 1866. It is frequently claimed that the rates which are now imposed are greater even than those which were levied during the war. The chairman of the Committee on Ways and Means, in his opening speech upon the bill now under consideration, said:

> The duties on imports were raised from an average of 18.84 per cent. in 1861 to an average of 40.29 per cent. on dutiable goods during the five years from 1862 to 1866, inclusive. These war taxes still remain, and they are heavier to-day than they were on an average during the five years of the existence of hostilities.

This statement would lead to the inference that an increase of rates of duties upon imports had taken place since the close of the war. The assurance with which all opponents of the protective system join in a vigorous demand for the repeal of what they choose to call "war-tariff taxes" has created a popular misapprehension as to the nature of the changes which have taken place in our tariff since 1865. The best answer to this demand may be found in a simple recital of facts.

Three important revisions of the tariff have taken place since 1870, namely, by the acts of July 14, 1870, of June 6, 1872, and of March 3, 1883. Minor changes in rates have been made from time to time by other acts.

By the provisions of the act of July 14, 1870, 178 dutiable articles were placed on the free-list. These included many crude materials in use by our manufacturers, the produce of foreign countries, which did not come in competition with American products. The rates of duty were reduced upon 50 articles. By the act of June 6, 1872, 213 items were added to the free list, and duties were specifically reduced on 49 articles in addition to those upon which a uniform reduction of 10 per cent. was made.

By the act of March 3, 1883, 72 additional articles were placed upon the free-list, while the rates were reduced on 427 paragraphs, embracing every schedule and almost every article upon the dutiable list.

In view of the constant misrepresentations which have been made as to the character and extent of the reductions made by the act of March 3, 1883, we have had the following table prepared by a competent expert, showing the percentage of reduction made in rates by that act:

Statement of rates reduced by the act of March 3, 1883.

Number of items reduced.	Percentage of reduction.	Number of items reduced.	Percentage of reduction.
2	10	33	40 to 45
68	10 to 15	3	45 to 50
44	15 to 20	44	50 to 60
50	20 to 25	15	60 to 70
85	25 to 30	7	70 to 80
48	30 to 35	1	80 to 100
27	35 to 40	72	100

Estimated average reduction in rates, 38.5 per cent.

Those who were responsible for this act did not intend that rates should be reduced below the protective point in any case where protection was desirable. But experience has shown that in some cases they were mistaken in judgment. With changed conditions many of the low rates then adopted have proved inadequate.

The revision of March 3, 1883, left the rates upon nearly all articles mentioned in our tariff schedules greatly below those which had been levied prior to July 14, 1870. For instance, the rate on every item in the woolen schedule had been largely reduced. This is also true of every item in the cotton schedule except manufactures of cotton not otherwise provided for. All manufactures of iron and steel, with a few unimportant exceptions, had been changed. All but two of the rates in the earthenware schedule had been amended. The duties upon common window-glass had been largely reduced. The chemical schedule had been entirely recast, and great reductions in rates had taken place. The list of the articles which remain dutiable at rates which were imposed in 1870 includes the agricultural products, a few manufactured articles of minor importance with rates from 20 to 30 per cent., several fancy articles, like perfumery, cosmetics, and artificial flowers, upon which a revenue duty of 50 per cent. was laid, and the articles enumerated in the flax, hemp, and jute schedule, upon which the duties have never been protective. As to all the great protected industries, changes in phraseology and radical reductions in rates had been made.

The magnitude of these reductions is best shown by the statement that if the rates of duty imposed by our tariff laws prior to the act of July 14, 1870, had been applied to the importations in 1887 the amount of duties collected in the latter year would have been $359,629,117.15, or an excess of $139,596,693.25 above the amount which was actually collected under the provisions of existing law; in other words, if our revenue from customs in 1887 had been collected under the provisions of the war tariff, it would have been 65.65 per cent. greater than the amount which was collected. The average ad valorem rate upon all importations of merchandise in 1887, dutiable and free, was 31.13 per cent. If upon these importations war tariff rates had been levied the average ad valorem rate would have been 51.76 per cent.

These statements would seem to effectually dispose of the claim that our tariff rates are as high or higher now than they were during the war. It is true that the average ad valorem rate levied upon dutiable goods in 1887 was higher than the average ad valorem rate on dutiable goods in the years prior to 1870. This is owing to the unexampled decline in prices which has been going on with increasing rapidity for the past fifteen years. As an illustration of the effect which the lowering of prices has had upon average ad valorem rates when specific duties are levied, the following table is inserted:

Year.	Average ad valorem rate on dutiable imports.	Average rate on all dutiable imports, with sugar dutiable at 45 per cent. ad valorem.	Average ad valorem rate on sugar.
1884	41.61	39.87	53.95
1885	45.86	40.74	73.66
1886	45.55	41.3	70.40
1887	47.10	38.67	82.04

The third column shows the average ad valorem rates on sugar for the years 1884–'87. During these years no change in rates on sugar took place, and yet we have an apparent increase in rates of 52 per cent. in four years. This change was due to the decline in the price of sugar from an average of 3.6 cents per pound in 1884 to 2.7 in 1885, 2.8 in 1886, and 2.5 in 1887. When the present rate of duty on sugar was fixed in 1883 it was equivalent to 45 per cent. ad valorem on the unit of value of importations of 1882, which was 4.4 cents per pound. If, instead of imposing an average specific duty of 2 cents a pound, the act of 1883 had imposed upon sugar an ad valorem rate of 45 per cent. and all other rates had remained as they are in the act the result would have been the steadily diminishing average ad valorem rates shown in the second column instead of the constantly increasing rates in the first column, which are based on actual importations and existing rates. It is evident that if the prices of merchandise current during the war, or in 1864, for example, had been maintained without diminution the average ad valorem rate on the importation of 1887 would have been greatly below the lowest average of any year of the war. The enormous decline in the prices of both domestic and foreign products, without any reduction in their relative cost of production, has had the effect to greatly diminish the protection afforded by an equal ad valorem rate of duty.

During the years from 1862 to 1878 the premium on gold in the United States had the effect of increasing the protective barrier. For the purpose of illustrating the rapidly-diminishing amount of protec-

tion afforded by a uniform rate of duty of 35 per cent. ad valorem, maintained from 1864 to 1886, we have prepared the following table:

Year.	Foreign prices of merchandise.		Protection afforded per unit of quantity in each year by an ad valorem duty of 35 per cent.	Ad valorem equivalent in each year of the specific amount of duty imposed in 1886.
	As shown by the Economist's index number.	Equivalent in United States currency.		
				Per cent
1864	172	$3.49	$1.32	9
1865	162	2.59	.91	12
1866	161	2.27	.79	14
1867	137	1.89	.66	17
1868	122	1.71	.60	19
1869	121	1.61	.56	20
1870	122	1.40	.49	23
1871	118	1.32	.46	24
1872	129	1.44	.50	22
1873	134	1.53	.54	21
1874	131	1.45	.51	22
1875	126	1.45	.51	22
1876	123	1.37	.49	25
1877	124	1.30	.46	25
1878	115	1.16	.41	28
1879	100	1.00	.35	32
1880	115	1.15	.40	28
1881	108	1.08	.38	30
1882	111	1.11	.39	29
1883	107	1.07	.37	30
1884	101	1.01	.35	32
1885	95	.95	.33	35
1886	92	.92	.32	35

For a standard of foreign values and of the changes which have taken place from year to year in the foreign prices upon which ad valorem duties are levied we have taken the well-known index numbers of the London Economist. These tables, prepared for the purpose of showing the movement of English prices, are widely accepted as authority on this subject. They are based on the annual average of the wholesale prices in England of twenty-two articles of commercial importance. The average of prices for the years 1845–1850, represented by the number 100, is used as the standard in each case.

We have assumed for this comparison that the index number in the first column represents the value in dollars and cents of some unit of quantity of merchandise imported into the United States. The second column shows the equivalent value of the same unit in each year in United States currency. The third column shows the relative amount of protection on each unit of quantity which would have been afforded the American producer in each year by an uniform ad valorem rate of 35 per cent. The fourth column shows what the equivalent ad valorem would have been in each year if a specific duty had been levied during the whole period equal to the sum assessed in 1887. It will be noticed that an ad valorem rate of 35 per cent. in 1887 furnishes no greater measure of protection than 9 per cent. would have afforded in 1864.

There are a number of important changes in business conditions, aside from the decline in prices, which have had the effect to diminish the protection afforded by tariff rates. These are (1) the much greater extent to which undervaluation is now successfully carried on; (2) the much greater facilities afforded our merchants for making foreign purchases, and the much less time required for the delivery of the goods purchased; and (3) the greatly reduced cost of trans-Atlantic transportation. A striking example of the effects of cheapened transportation was furnished by the statement of a large manufacturer before your committee, that merchandise could now be transported and landed on the wharf in New York from Liverpool more cheaply than it could be carted to the same wharf from a factory in Brooklyn.

It is important to take into consideration in connection with the examination of the foregoing table that the relative cost of production in Great Britain and the United States in the years named has not materially changed. The increase of the earnings of labor and the resulting increase in the labor cost of production have been greater in the United States than in England since 1860, and the actual sum required in nearly all cases for the sufficient protection of American labor against foreign competition is greater now than in the past. The accuracy of the statement of the greater increase since 1860 in the earnings of labor in the United States than in Great Britain is shown by the following table, in which we have also included the relative cost of living in the two countries at the time the comparison of wages is made:

Comparison of earnings and cost of living of workingmen in Great Britain and United States in years named.

	Earnings per annum.		Increase, per cent.		Cost of living per annum.		Increase, per cent.
	1860.	1885-'86.			1860.	1885-'86.	
Great Britain:

*Professor L. Levi, "Wages and earnings of working classes." For years 1857 and 1884.

†Decrease.

‡Mr. Edward Atkinson, The Forum, September, 1888, pages 26 to 27.

CLASS I. Specially skilled men, foremen, overseers, boss blacksmiths, carpenters, etc., customarily earning $3 to $5 per day at the present time.

CLASS II. Average mechanics, engineers, blacksmiths, carpenters, machinists, and painters, connected with establishments reported in volume XX of the Census, 1865 to 1880, inclusive.

CLASS III. All the operatives, except foremen and overseers, in 100 establishments, reporting the wages of their working people under more than 1,200 separate titles: bricks, marble, furniture, agricultural implements, tinware, stoves, boots, hats, cars, wagons, flour and saw mills, iron, paper, and textiles, employing men, women, and children, from 20 to 2,000 in each.

CLASS IV. Laborers computed separately, connected with above establishments.

It will be noticed that while the increase in average wages has been much greater in the United States than in Great Britain within the period named, the cost of living has increased in Great Britain and decreased in the United States. In view of these facts, it is not strange that the laborers employed in the production of articles subject to low ad valorem rates are vigorously demanding further protection, and it is remarkable that in such cases any successful competition is now possible.

These considerations establish the necessity for a frequent revision of tariff rates if an equal and just protection is to be afforded at all times. If all the rates imposed by our war tariff had been maintained without change, the specific rates would now have been excessive and the ad valorem rates would have been inadequate. As a matter of fact, the specific rates have all, we think, without an exception, been largely reduced, and the ad valorem rates have also in many cases been improvidently cut down.

The practical question which we have to solve is not the date when duties were established or the circumstances or promises under which they were levied, but, the desirability of protection being conceded, it is, what rates are proper and adequate under existing conditions.

INTERNAL-REVENUE TAX ON DISTILLED SPIRITS.

Sections 29 to 34, inclusive, and sections 36, 38, and 40 of the House bill, are intended to modify existing laws relating to the tax on distilled spirits. Your committee do not recommend their adoption.

The sections, when taken together, can not be construed by your committee as having any other effect than to open wide the door to fraud in the collection of taxes on distilled spirits. The cost of distilling spirits from grain, without the tax, is not more on an average than 20 to 25 cents per gallon, while the tax on each gallon is 90 cents, or nearly 400 per cent. upon the cost of the spirits. This great temptation to fraud led Congress many years ago to pass rigid statutes relating to taxes upon distilled spirits, which are chiefly embodied in chapter 4, Title XXXV, of the Revised Statutes. When enacted they were found absolutely necessary to make it possible to collect the bulk of the tax, as under the laws prior to their passage the frauds were so great as to almost entirely destroy the revenue from this source.

Experience has shown that with all these safeguards it has been exceedingly difficult in some sections of our country to enforce the law against illicit distillation. Notably has this been the case in several States south of the Ohio and Potomac Rivers, where large numbers of small distilleries were and still are located, about fourteen hundred in all. It is quite clear to your committee that the general result of the House provisions would be to make it impossible in the future to effectively collect the tax upon distilled spirits, as by these provisions all safeguards against illicit distilling and all the efficient machinery for the detection and punishment of fraud are removed.

It is estimated that with all existing safeguards there are annually produced about 6,000,000 to 8,000,000 gallons that do not pay the tax, and it is notably true that in some of the Southern markets spirits are sold at a price little above the amount of the tax. It would seem that if this tax is to be maintained, greater restrictions should be provided, rather than provisions looking to the relaxation of existing laws.

Section 36 of the House bill is the chief section, and the other sec-

tions are merely tributary or auxiliary; it amends section 3255 of the Revised Statutes by adding a provision which authorizes the Secretary of the Treasury to exempt distilleries mashing less than 25 bushels of grain per day from the operations of the provision of the law relating to the manufacture of spirits, and establishes an entirely new principle for the collection of taxes upon spirits produced by them.

The tax is now levied upon the spirits actually produced, whereas this new provision requires that upon the class of distilleries named the tax shall be levied and collected on the capacity of the distilleries, without reference to the amount of spirits actually produced. This is an entirely novel provision in our internal-revenue laws relating to spirits, as from the beginning the aim has been to collect the tax upon the spirits produced. All experience in this and other countries has shown that it is impossible to collect the tax simply upon the capacity of a distillery, as is here proposed. This has been tried in Germany and Austria, and both Governments were soon forced to abandon the system and annul all contracts with distillers, although these contracts in some cases run for a long period of years, and there, as here, the tax is now collected on the actual product. The tax has been collected on the product for a great number of years in Great Britain, as there, also, it has been found that this is the only safe mode of collecting the tax.

This amendment also provides that such distilleries may be run and operated without store-keepers or store-keepers and gaugers.

The presence of store-keepers or store-keepers and gaugers under existing law is found necessary to make sure that the entire product of the distillery pays the tax; if they are removed, the only knowledge the internal-revenue officers can have of the amount produced is the knowledge imparted by the distiller himself, whose interests would be to report the smallest possible production.

The effect of section 3255 thus amended would therefore be to remove from every such distillery all the restraints and safeguards now provided by law against illicit distillation, and this applies to every distillery which has a practical capacity of producing 100 gallons of distilled spirits per day, upon which the daily tax would be $90. It leaves the distiller without supervision in his work of distillation, with the expectation that he will make honest returns at the end of each month of the amount distilled.

A capacity tax must be based upon an estimate of the amount of spirits which can be obtained from each bushel of grain within a certain fixed time. In practical distillation the best results are secured by mashing each bushel of grain in not less than forty to forty-five gallons of water with a fermenting period of not less than seventy-two hours. But with half the quantity of water and the use of an extra quantity of yeast the grain can be fermented and distilled in twelve hours. The yield per bushel of grain in this case would be much less, but the aggregate quantity of spirits produced daily would greatly exceed that permitted by any reasonable official survey, and this increased amount would of course escape payment of the tax. But if the period should be extended from twelve to twenty-four or thirty-six hours, the capacity, as compared with the measure of the still, would then be largely increased, and the Government would depend entirely for the collection of its revenue upon the honesty of the distiller.

Each bushel of corn, it is estimated, produces from 3½ to 4 gallons of proof spirits with a fermenting period of seventy-two hours. With a fermenting period of half that time, the yield would probably be three-fourths of this amount. As grain is the chief material used, the small relative cost of which compared with the tax to be paid would enable the distillery to use the grain (which, for the purpose of feeding to stock, loses little of its value) in a wasteful way, so that the temptation to force the fermenting period into twelve or twenty-four or thirty-six hours, and thus double the product of the distillery, would be so great that in most cases its adoption by these small distillers would follow.

This section would afford the opportunity to establish any number of small distilleries of a much less capacity than 25 bushels per day in out-of-the-way places, in mountain regions, and in houses and cellars, where opportunity of detection would be small, and where, if detected, they would only be required to pay tax on the declared capacity of the distillery.

These small distilleries could be set up at a slight cost, would be portable, and could be removed from place to place easily without detection, and the product of a single week of any one of these small stills would more than pay for the original cost of the apparatus.

From the experience of the Internal Revenue Office for many years it is believed that the tax is now collected upon all spirits distilled in the large distilleries, as in them the safeguards of existing law have proved effectual, and the chief trouble in the administration of the law results from the difficulty of controlling small distilleries and suppressing illicit distilleries in mountain regions and in out-of-the-way places. But for the frauds in the States where these small distilleries most abound the system for the collection of tax on distilled spirits would be regarded as perfect as practicable. These frauds, however, do not probably exceed in the aggregate more than 10 per cent. of the entire amount of spirits distilled in the country. It is because of the safeguards alluded to that the tax has yielded so large a revenue.

If the percentage of fraudulent distillation should be measurably increased it would not be long before the large distilleries which now pay a tax upon all the spirits produced would be obliged to abandon the field in competition with small distilleries which would not be required to pay upon anything but the estimate of the amount produced—on the capacity of their stills.

The small distillers have no reason to ask for this legislation if engaged in the honest production of spirits. The cost to them of such production, so far as the Government is concerned, is no greater than to the distilleries of larger capacity, as the cost of supervision through the medium of gaugers, storekeepers, etc., is not paid by them, but out of the Treasury, and there is no reason why any honest distiller, whether his distillery be of large or small capacity, should complain of Government supervision, *i. e.*, if he means to pay the tax upon the actual amount of spirits produced.

Whatever may be the strength of public opinion in the States where these small distilleries are numerous, the Government can not afford to relax the efficient and necessary safeguards thrown around the production of spirits simply for the purpose of relieving these people from proper supervision which compels the payment of the tax. But the effect of section 36 would be not only to open the door for fraud where these small distilleries are now located, but with the temptation of a profit of 400 per cent. in favor of successful illicit distillation the small distilleries would soon be found in every State of the Union where either corn or molasses could be easily procured, and the distiller honestly paying his tax, whether small or large, would soon disappear.

It may be said that the section only authorizes the Secretary of the Treasury to exempt such distilleries from the restrictive provisions of the Revised Statutes and that he may refuse these exemptions. But this officer has no discretion; he must levy the tax upon the capacity of the distillery, and this mode of levy would be the primal source of fraud.

But if this section should become a law no Secretary of the Treasury would feel that he had any discretion respecting its other requirements, as they would be no more imperative upon the Secretary if the law should read "the Secretary of the Treasury shall exempt all distilleries," etc. The word "may," here used, is equivalent to a legislative direction to the Secretary of the Treasury as to what he shall do in the case described.

It is an expression of the legislative will that in cases of distilleries mashing less than 25 bushels of grain per day the existing law should not apply with its rigid requirements, but that in such cases the integrity of the distiller should be substituted for the restraints of law applied to distilleries having a larger capacity.

It is true that the elaborate provisions of our internal-revenue laws respecting the punishment for illicit distillation of spirits are rigorous and the fines and penalties in many cases severe, but they are absolutely essential to the enforcement of the law and to the collection of the revenue derived from the distillation of spirits. These laws are respected and obeyed without question by nine-tenths of our people, and in a large portion of our territory. The penalties, though severe, are only for wrong-doing, and it would be extremely unwise to remove the restrictions, which operate as a protection to all manufacturers of spirits who now honestly pay their taxes, for the purpose of placating individuals or localities which, it is well understood, hold all our revenue laws in contempt. If this source of revenue is to be abandoned, it should be done openly by a repeal of the statutes, rather than by their relaxation to an extent which would ultimately end in this result.

The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized to make such rules and regulations as may be necessary to carry out the provisions of the section; thus substituting for provisions of the statute restrictive in their nature, which apply to all distillers, the rules and regulations which a Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may choose to make respecting this class. But these rules and regulations must be in accord with the spirit of the section, which is that every restraint of law shall be removed from a distiller who mashes less than 25 bushels of grain per day, and must not be in contravention of the novel provision, hitherto unknown in our laws, of making two rules for the collection of the tax, namely: the capacity rule for one set of distillers, and the rule of the amount of spirits produced for another. The injustice of such legislative discrimination need only be stated to be condemned.

Section 36 is supplemented by other provisions intended to shield not only these small distillers, but all distillers from the rigorous provisions of existing law.

Section 30 is a complicated section, having the effect to impede any process looking toward the arrest or prosecution of offenders under the internal-revenue laws by providing that no warrant shall issue upon information and belief, except upon the affidavit of collector, or deputy collector, or internal-revenue agent, thus excluding all other revenue officers, such as store-keepers, gaugers, etc., who, by reason of their official positions, may have information and belief which would

justify them in making complaint and no private person can make complaint except the facts are within his own personal knowledge.

It provides, further, that no fee shall be paid to either marshals, clerks, or commissioners unless there be a conviction, or unless the prosecution has been approved, either before or after such arrest, by the attorney of the United States for the district where the offense is alleged to have been committed, or unless the prosecution was commenced by information or indictment. Thus, in cases of violations of the internal-revenue laws, it would be necessary for a complicated investigation to be gone through with before any such prosecution could be instituted.

It is impossible for internal-revenue agents to hear complaints and thus be able to make affidavit on information and belief, as there are only twenty of them in all, and they are occupied chiefly in the examination of accounts, giving information to officers as to their method of conducting business, etc. Collectors and deputy collectors are engaged in the detail work of their offices and may be at a great distance from the place where the fraud is being committed. The section would require preliminary trial by a collector or deputy collector before a prosecution could be instituted. The marshals, who under the law are required to execute any process presented, are informed in advance that they shall have no pay unless there is a conviction, which necessarily implies that the marshal, before he serves process, must enter into an examination of the probability of a conviction or else discharge his duties without compensation.

Section 34 minimizes the penalty for intentional violation of the internal-revenue laws. This section is a substitute for section 3176 of the Revised Statutes, which provides that if any person refuses or neglects to make any return or list for taxation, as required by law, or who renders a false or fraudulent return or list, the Commissioner of Internal Revenue shall assess the tax, and in case of any return of a false or fraudulent list or valuation, the Commissioner shall add 100 per cent. to such tax. So that in case of actual fraud, under section 3176 of the Revised Statutes, the penalty is 100 per cent.; but in case of a refusal or neglect only, except in cases of sickness or absence, the added penalty is 50 per cent.; the penalty in both cases being assessed as a part of the tax.

Section 34 of the bill amends this section of the Revised Statutes by substituting a uniform penalty of 25 per cent., and interest at 10 per cent. from the time when such tax is due and payable; that is to say, if an illicit distiller is caught, or if a distiller makes a false and fraudulent return, instead of 100 per cent. penalty as now provided he is only required to pay a penalty of 25 per cent.

Section 3332 of the Revised Statutes provides that in case a registered distillery, having a producing capacity of less than 150 gallons a day, shall violate the law respecting such distillery, and having been declared forfeited by a judgment of the court for a violation of the internal-revenue laws, such still, etc., shall be destroyed so as to prevent its use for the purpose of distilling. This section of the Revised Statutes is amended by section 38 of the bill so that in case of judgment of forfeiture the seizing officer shall remove such still, etc., to a place of safe storage, where it shall be sold, and that it shall be so removed without mutilation. The reason for the present law was that a distillery of the capacity described in this section, having been detected at one place, could, unless destroyed, be easily removed to another and again begin its operations, as had frequently been done prior to the passage of the law; and it was thought that the destruction of the still was an effectual method of preventing illicit distillation by means of these small distilleries. If the effect of a judgment of forfeiture shall only be to require the seizing officer to carefully preserve and store the still without mutilation, it will soon renew its work in some other convenient locality where the vigilance of revenue officers could, for a time at least, be eluded, as stills of this capacity are portable and easily transferred from one neighborhood to another.

In order that the Commissioner of Internal Revenue might have knowledge of every still manufactured in the country and its location, enabling him thereby to pursue the still from the time of its manufacture until it engaged in the production of spirits to be taxed, section 3244 of the Revised Statutes provides that a manufacturer of stills shall pay an annual tax of $50, and $20 for each still or worm for distilling made by him; and section 3265 of the Revised Statutes requires such manufacturer before the same is removed from the place of manufacture to notify the collector of the district in which such still, boiler, or other vessel is to be used or set up, by whom it is to be used, its capacity, and the time when the same is to be removed from the place of manufacture; and also provides that it shall not be set up without the permit of the collector in writing for that purpose. These wholesome provisions, taken together, were intended to prevent persons from manufacturing stills or procuring them from manufacturers without the knowledge of the proper revenue officers of the Government. But section 40 of the proposed bill repeals all laws which impose these special taxes, and thus stills would be manufactured without the knowledge of the office of the Commissioner of Internal Revenue and without opportunity of the revenue officers to know when, where, or how such stills were to be set up and used.

These sections constitute such a modification of our present revenue system, as respects the collection of taxes from distilled spirits, as will make it easy for those disposed to engage in illicit distilling to do so with impunity, and your committee can not but regard these provisions as seriously endangering the efficacy of our entire system of laws which provide for the collection of revenue from distilled spirits.

THE SUBSTITUTE PROPOSED BY THE FINANCE COMMITTEE.

The House bill (H. R. 9051) under consideration was received by your committee July 25, and was immediately referred to the following subcommittee: Messrs. ALLISON, of Iowa, chairman; ALDRICH, of Rhode Island; JONES, of Nevada; HISCOCK, of New York; BECK, of Kentucky; HARRIS, of Tennessee, and VOORHEES, of Indiana, who reported the same back, September 25, to the full committee, with an amendment in the nature of a substitute, which was adopted by the full committee and reported to the Senate this day by Mr. ALLISON.

In the preparation of the substitute submitted for the consideration of the Senate, it has been the purpose of your committee to present a measure which would, as far as possible, fulfill the important requirements of revenue revision which we have enumerated. The numerous failures and defects of the House bill rendered the task of amending that bill impossible, and made the preparation of a comprehensive and consistent measure of relief and revision necessary. We submit this substitute to the judgment of the Senate, and invite for it full and careful scrutiny. The time which has elapsed since the House bill reached the Senate has been diligently employed by your committee in a careful investigation of the diverse and important questions involved in a general tariff revision, and in hearing such representatives of the vast number of interests affected by changes in the tariff schedules as could be heard in the limited time at their disposal.

Other interested parties are desirous of being heard, and it is the intention of the committee, with the approval of the Senate, to give such time to further hearings as shall be possible during the period the bill may be under discussion, with a view of eliciting the fullest information, in order that the provisions of the substitute, and of such amendments as shall be suggested, may be acted upon with the greatest degree of intelligence.

The committee estimate that the annual revenues would be reduced by the provisions of the substitute as follows: By the reduction of the duty on sugar, $27,759,783.95; by adding to the free-list the forty-two items named in Appendix C, $6,428,095.56; by the abolition of the internal-revenue taxes on the production or sale of tobacco and the reduction of the tax on cigars, $24,371,460.98; and by the provisions which allow the use of alcohol in the industrial arts free from tax, $7,000,000, or a total reduction of $65,559,340.49.

An estimate has also been carefully prepared (Appendix B) of the effect which the other changes in the tariff schedules would have upon importations and the revenue. If this estimate should prove to be correct, the total reduction in revenue effected by the substitute would be $73,668,994.30.

In order to obtain the necessary reduction of revenue, the committee have selected such duties or taxes for reduction or repeal as would, while effecting that object, secure the most beneficial results to the masses of our people, and would not disturb or injure any industry or pursuit entitled to protection.

The excessive duty of from 2 to 3½ cents per pound now imposed upon sugar adds a considerable sum to the daily cost of living of every family in the United States, where in most cases the cost of sugar is greater than the cost of bread. The high rates of duty which have been levied upon this important article of food have not successfully developed the sugar-producing industry of the United States. The great natural advantages which the producers of cane sugars in the tropical islands have over those of the United States preclude domestic competition upon equal terms. If it were not for the fact that parties interested in the production of sugar from sorghum or beets are confident of the rapid development of these industries in the United States the committee would recommend a still greater reduction in the rate of duty upon sugar, as the advantages of this reduction would be felt through a larger circle than any other which could be made in our tariff schedules.

The articles which are placed on the free-list include jute, jute butts, sisal grass, manila, and other crude materials not produced in this country, whose free admission would benefit both the producers and consumers of manufactures from these materials.

The provisions of the substitute which allow the use of alcohol in the industrial arts free from taxation would prove of great benefit to a large number of important manufactures. Alcohol is used in the production of more than five hundred chemical and pharmaceutical preparations and in many of the mechanical and industrial arts, and its use in all these directions would be largely extended if the onerous tax should be abolished. The heavy tax upon alcohol unnecessarily increases the price of many manufactured products, with no corresponding benefit except the resulting revenue, which is not unnecessary.

Your committee have considered numerous suggestions for the repeal of all internal-revenue taxes and the abolition of the entire internal-revenue system, but they deem the adoption of this course at present both impracticable and unwise, not only because the repeal of these taxes would create a large annual deficit, but for the further reason

that the taxes levied on distilled spirits used as a beverage and on beer should be retained, and the legislation to protect American dairy products from fraudulent imitations should be enforced.

The proposition for a repeal of all internal-revenue taxes on tobacco is presented in compliance with a universal demand.

The provisions of the carefully prepared bill to prevent undervaluations, heretofore reported from the Committee on Finance and adopted by the Senate, are incorporated in the substitute.

We have inserted a provision intended to prevent the importation of all articles of foreign manufacture when marked or labeled in such a manner as to represent that they were manufactured in the United States.

Section 39 provides that upon the exportation of articles manufactured from dutiable imported materials the entire sum paid for duties on such materials shall be repaid in the form of a drawback.

In the revision of the dutiable schedules and the free-list submitted constant effort has been made to correct the inequalities and to eliminate the ambiguities of the existing tariff, and careful attention has been given to the recommendations of the executive officers and to the statements of merchants, manufacturers, and workmen whose business has suffered from admitted defects.

In pursuance of our general plan to lessen the evils of undervaluation, to secure more certainty, uniformity, and equality in the collection of duties as well as economy in administration, specific or compound rates have been substituted for ad valorem rates wherever practicable, or when the necessary data could be obtained. Whenever changes of this character have been made they have been adjusted upon information obtained from customs experts or from other reliable sources.

It will be observed that all of the tariff schedules have been thoroughly revised, rearranged, and greatly simplified. They have been divided into paragraphs and numbered consecutively, in order that in the future amendments may be made to a single paragraph or schedule without a general re-enactment of all the schedules, as is now necessary to prevent confusion. The number of paragraphs has been reduced from 495 in the tariff of 1883 to 440 in the substitute submitted.

To secure the proper relation between the rates imposed upon the numerous articles produced in our related and interdependent industries is the most difficult problem of tariff adjustment. The committee have endeavored, in the revision of rates proposed, to accomplish this necessary equalization. Reductions have been made whenever they have seemed desirable, and we have increased rates whenever it seemed necessary to preserve the workingmen engaged in any American industry requiring protection from ruinous or unequal competition.

The present anomalous and inadequate duties on tin and terne plates have received the attention of your committee, who believe that such a readjustment of these rates should be made as would encourage the manufacture of these articles in this country. We have not, however, up to this time, been able to obtain the definite information upon which to base a recommendation for an increase of rates upon the gauges which could now or might in the near future be produced in this country if protection were afforded; but as soon as the requisite information can be obtained we shall offer an amendment for this purpose.

We also, if found necessary after further examination, reserve the privilege of suggesting amendments to other paragraphs.

In all the numerous changes suggested your committee have had constantly in view the preparation of a consistent measure whose beneficent influences would be felt in every section and by every class of our people, which would give greater diversity to our industries, and by strengthening and invigorating the American system of protection secure the harmonious development and prosperity of agriculture, manufactures, and commerce.

The differences between the House bill and the substitute reported by your committee are fundamental. The House bill has been formulated on the theory that a diminution of revenues can only be secured by a reduction or repeal of protective duties, and that tariff revision means simply that indiscriminate cutting down of rates which encourages importations, benefits foreign manufacturers, and produces free trade.

The substitute proposes to reduce revenues and at the same time to preserve the American system. It is based upon the idea that tariff revision implies an equitable readjustment of duties in the interest and for the benefit of the people of the United States, and in the distribution of rates its framers have not hesitated to erect or to maintain defensive barriers which would carry confidence and comfort into American homes.

The committee express regret that through severe illness they have been deprived of the mature judgment and counsel of the chairman of the Finance Committee, JUSTIN S. MORRILL, of Vermont, the author of the tariff bill of 1862, which formed the basis of our present protective system.

APPENDICES.

APPENDIX A.—*Specific Duties.*

In 1795 Secretary Hamilton reports to the House of Representatives that, by existing laws, about one-third of the duties was derived from articles rated ad valorem, and adds:

"In other nations, where this branch of revenue, as with us, is of principal or very considerable consequence, and where no peculiarity of situation has tended to keep the duty low, experience has led to contract more and more the number of articles rated ad valorem, and, of course, to extend the number of those rated specifically, that is, according to weight, measure, or other rules of quantity. The reason of this is obvious; it is to guard against evasions, which infallibly happens in a greater or less degree when duties are high. * * * It is needless to repeat that this will contribute as much to the interest of the fair trader as to that of the revenue.

"It is believed that in our system the method of rating ad valorem could, with convenience, be brought within a much narrower compass, and it is evident that to do so will contribute materially to the security of the revenue." (American State Papers, Finance, volume 1, page 348.)

Secretary Gallatin, reporting to the Senate in 1801, said:

"In order to guard as far as possible against the value of goods being underrated in the invoices, it would be eligible to lay specific duties on all such articles now paying duties ad valorem as may be susceptible of that alteration." (American State Papers, Finance, volume 1, page 702.)

Secretary Dallas, reporting to the House of Representatives in 1816, says:

"Articles imported to a great amount should rather be charged with specific duties upon their weight and measure, in order to guard against evasions and frauds, than with ad valorem duties on their value." (American State Papers, Finance, volume 3, page 91.)

Secretary Crawford, in 1817, in the report concerning revision of the revenue laws already referred to, calls attention to the subject of frauds, particularly in the importation of articles upon consignment paying ad valorem duties, and recommends a series of remedial provisions, which are mainly applicable to importations subjected to ad valorem duty, to which he adds:

"Whatever may be the reliance which ought to be placed in the efficacy of the foregoing provisions, it is certainly prudent to diminish as far as practicable the list of articles paying ad valorem duties," and submits a list of one hundred and twenty-four enumerations to be transferred to the class of specifics. In 1819 he submitted a further list. (American State Papers, Finance, volume 3, pages 236, 410.)

Secretary Meredith, in his report of December 3, 1849, says:

"I propose a return to the system of specific duties on articles on which they can be conveniently laid. The effects of the present ad valorem system are twofold, namely, on the revenue and on our own productions. Experience has, I think, demonstrated that, looking exclusively to the revenue, a specific duty is more easily assessed, more favorable to commerce, more equal, and less exposed to frauds than any other system. Of course such a duty is not laid without reference to the average cost of the commodity. This system obviates the difficulties and controversies which attend an appraisement of the foreign market value of each invoice, and it imposes an equal duty on equal quantities of the same commodity. Under the ad valorem system goods of the same kind and quality, and between which there can not be a difference in value in the same market at any given time, nevertheless may often pay different amounts of duty. Thus the hazards of trade are unnecessarily increased."

"To levy an ad valorem duty on foreign valuation equably at the different ports is believed to be impossible. That the standard of value at any two ports is precisely the same at any given time is wholly improbable. The facilities afforded to frauds upon the revenue are very great, and it is apprehended that such frauds have been and are habitually and extensively practiced. The statements annexed (marked O), to which I invite special attention, exhibit in a strong light the dangers to which this system is necessarily exposed.

"As the standard of value at every port must at last depend upon the average of the invoices that are passed there, every successful attempt at undervaluation renders more easy all that follow it. The consequences are, not only that the revenue suffers, that a certain sum is in effect annually given by the public among dishonest importers as a premium for their dishonesty, but that fair American importers may be gradually driven out of the business and their places supplied by unknown and unscrupulous foreign adventurers."

The adoption of specific duties has been uniformly favored by the executive officer of the Government, and has been specially recommended by a number of the Secretaries of the Treasury in recent years.

Secretary Bristow, in his annual report for 1876, in commenting upon the administration of the customs revenue, said:

"Another remedy, and the most effective which could be adopted for correcting the evils of the appraisement system, is the substitution, so far as practicable, of specific for ad valorem duties. This change would work a great reduction in the amount of labor requiring the knowledge of experts. The entire process of ascertaining duties would be more simple, certain, and safe. Opportunities for collusive undervaluation would be greatly lessened, and if errors were committed they could not, as to specific rates and amounts, be accounted for except upon the supposition of culpable negligence or actual fraud; whereas, in respect to ad valorem duties, an error of judgment may readily be assigned as a sufficient explanation.

"Such change, either with or without a decrease in the number of dutiable articles, would insure a very considerable reduction of the force at the chief ports, with a consequent diminution of expenses."

Secretary Sherman, in his report to Congress for 1878, made the following suggestions with respect to specific duties:

"While not recommending a general revision of the tariff at the present time, it is deemed important that upon some articles the ad valorem duties now assessed should be converted into specific duties. As a rule, specific duties are to be preferred to either ad valorem or compound rates, and in any future revision of the tariff it is hoped that Congress will give preference to this system of imposing duties as far as practicable. The argument in favor of specific duties applies with great force to kid gloves, concerning the value of which, under the present ad valorem duties, serious differences of opinion have occurred between the importers and the Government during the past year, which have led to protracted delays in the ascertainment of the dutiable value, and consequent injury to the mercantile community."

In his report on the collection of duties for 1885 the late Secretary Manning said:

"In a system of ad valorem rates there are two critical points: One is dutiable value and the other is rate of duty. The present rate of duty on certain silk goods is 50 per cent. of the market value at the time of exportation in the principal markets of the country, or what is equivalent to one-half of the importation. If the law were so administered by the Treasury Department that on the importation of one importer 50 per cent. was levied, and on the importation of another importer, 40 per cent., and on that of another importer, 30 per cent., there would be a general outcry. So there would be if an importer at New York was required to pay only 30 per cent. and if of another at Buffalo was demanded 40 per cent. and of another at Chicago was required 50 per cent. But none the less illegal and intolerable result would follow if the dutiable value on one importation were fixed at $100, on another, by the same vessel, at $80, and on another, by the same vessel, at $60, the merchandise in all of the three being similar. If importers can illegally control dutiable values, they can control the amount of duties paid on the merchandise, although the ad valorem rate may be fixed and uniform for everybody and every port in the country.

* * * * * * *

"I do not make a recommendation to Congress for the restoration of the 'old moiety system' and the statutory inducement to informers, or the law concerning intent and burden of proof, which existed from 1799 to 1874. And I do not

so recommend for the reason that the purpose of the House and Senate, in respect to the simplification of the rates of duty and a prudent enlargement of the application of specific rates, is necessarily unknown. Should some such last-named change be not made, I have little faith that the existing power of the Executive and of the courts will be adequate to secure honest invoices and full appraisement."

* * * * * * *

"The following extracts from the report of Mr. Forward, made nearly half a century ago, are instructive now by way of showing his appreciation of the relation between ad valorem and specific rates, and the light in which foreign manufacturers sending their goods to this country on consignment were then regarded:

"'With a view to guard the revenue against fraudulent undervaluations which can not be entirely prevented by the existing scheme of ad valorem duties, specific duties are proposed in nearly all cases when practicable. The operation of the system of specific duties may not be perfectly equal in all cases in respect to the value of the articles included under it. But this inconvenience is more than compensated by the security of the revenue against evasions, and by the tendency of specific duties to exclude worthless and inferior articles, by which purchasers and consumers are often imposed on.'

* * * * * * *

"One advantage, and perhaps the chief advantage, of a specific over an ad valorem system is in the fact that under the former duties are levied by a positive test, which can be applied by our officers while the merchandise is in the possession of the Government, and according to a standard which is altogether national and domestic. That would be partially true of an ad valorem system levied upon 'home value,' but there are constitutional impediments in the way of such a system which appear to be insuperable. But under an ad valorem system the facts to which the ad valorem rate is to be applied must be gathered in places many thousand miles away and under circumstances most unfavorable to the administration of justice."

The present Secretary of the Treasury, in that portion of his last annual report relating to the administration of the customs laws, used the following language:

"Whatever the rates of customs taxation may be, the laws for the collection of the same should be made as efficient as possible. In this the bona fide importer, who wishes to gain only the legitimate profits of his business, the home manufacturer, and laborer are equally interested. They all have a right to demand that the laws be so administered as to give them every possible protection in their business. The high ad valorem tariff of the last quarter of a century has been the fruitful cause of devices to gain improper advantage at the custom-house. It is therefore desirable that in revising and reducing rates of duty they should be made specific instead of ad valorem so far as the nature of the merchandise will admit. Theoretically considered, ad valorem are preferable to specific duties; but in practice, under such rates as we have had and must continue to have for years to come, the former are the too-easy source of deception and inequality at the custom-house. Congress has it in its power to change, from time to time, as may be advisable, specific rates so as to meet any permanent changes in values."

APPENDIX B.—*Estimates of imports and duties by provisions of Senate substitute to H. R. 9051.*

	Importations, fiscal year 1887.		Estimated imports under the proposed bill.		Estimated decrease of duty by the proposed bill.	Average ad valorem rate of duty.	
	Values.	Duties.	Values.	Duties.		Present law.	Proposed bill.
A. Chemical products	$15,123,113.72	$4,655,375.27	$14,751,699.54	$4,383,074.79	$272,300.48	30.78	29.70
B. Earthenware and glassware	13,055,763.49	7,583,953.97	13,042,454.73	7,308,270.25	275,683.72	58.09	56.03
C. Metals	57,784,719.42	23,090,797.67	51,402,136.87	21,376,664.68	1,714,132.99	39.96	41.58
D. Wood and wooden ware	8,274,012.16	1,518,723.09	8,061,909.70	1,513,440.16	5,282.93	18.35	18.77
E. Sugar	68,956,335.07	56,530,360.14	68,924,968.35	28,770,576.19	27,759,783.95	83.43	41.02
F. Tobacco	10,955,125.03	9,127,738.26	10,739,454.24	6,856,875.68	2,270,862.58	83.82	63.85
G. Provisions, etc	42,593,244.97	11,048,754.66	33,596,588.35	9,040,908.68	2,007,845.98	25.94	26.91
H. Wines, liquors, etc	10,387,592.40	7,681,631.53	9,761,316.47	7,586,442.73	94,588.80	73.94	77.72
I. Cotton manufactures	30,207,908.83	12,081,263.03	29,664,007.64	12,049,295.48	31,967.55	40.00	40.59

APPENDIX C.—*Additions to free-list by proposed Senate substitute.*

Acorns, raw, dried or undried, but unground.
Baryta, sulphate of, or barytes, unmanufactured.
Bee's-wax.
Books and pamphlets printed exclusively in languages other than English.
Braids, plaits, flats, laces, etc., for ornamenting hats, etc.
Bristles, raw or unmanufactured.
Bulbs and bulbous roots, not edible.
Chicory root, raw, dried or undried, but unground.
Coal, slack or culm.
Coal-tar, crude.
Curling-stone handles.
Currants, Zante or other dried.
Dandelion roots, raw, dried, or undried, but unground.
Eggs' yolks.
Feathers and downs of all kinds, crude and unmanufactured.
Jute.
Jute butts.
Manila.
Ramie.
Sisal grass.
Sunn.
All other textile grasses or fibrous substances unmanufactured or undressed.
Floor matting, known as Chinese matting.
Grease and oils, such as are commonly used in soap making or wire drawing, etc.
Human hair, raw, uncleaned and not drawn.
Mineral waters, not specially enumerated.
Molasses, testing not above 56°.
Olive oil, for manufacturing or mechanical purposes.
Nut oil, or oil of nuts.
Opium, crude or unmanufactured.
Potash, crude carbonate.
Potash, caustic or hydrate.
Potash, nitrate of, or saltpeter.
Potash, sulphate of.
Potash, chlorate of.
Rags, all not enumerated.
Hemp seed.
Rape seed.
Sponges.
Sand.
Tar and pitch, of wood.
Turpentine, spirits of.

APPENDIX D.—*United States production and consumption of cereals.*

Files	....do	2,486,533
Nails and spikes	....do	5,629,240
Needles and pins	....do	1,378,023
Steam fittings and heating apparatus	....do	5,127,840
Ivory and bone work	....do	1,454,901
Straw goods	....do	9,345,759
Toys and games	....do	1,502,513
Blacking	....do	1,491,474
Lead, bar, pipes, sheets, etc	....do	5,600,671
Slate mantels, marble mantels, etc	....do	1,630,660
Castor oil	....do	653,900
Scales and balances	....do	3,252,460
Sewing-machines and attachments	....do	13,863,188
Steel springs	....do	3,654,862
Stamped ware	....do	3,512,423
Bags	$91,300	9,635,300
Salt	213,538	4,616,028
Soap and candles	291,935	26,260,792
Stone and earthen ware	129,702	7,814,027
Confectionery	1,756,361	23,880,672
Brushes and brooms	288,328	10,272,527
Iron work, architectural	25,250	2,084,287
Foundry and machine-shop products	7,091,959	207,286,509
Manufactures of wool of all kinds	1,800,873	265,452,040
Planed lumber	2,094,385	34,706,971
Brick and tile	2,644,595	30,188,992
Marble and stone work	803,310	30,611,840
Paints	19,330	23,371,337
Type founding	10,000	2,220,298
Starch	6,000	7,471,712
Cordage and twine	24,000	12,468,171
Paper manufactures	645,547	48,454,367
Hats and caps not wool	6,300	21,296,807
Instruments, professional and scientific	37,900	1,601,194
Wire and wire work	10,200	19,954,423
Tallow and grease	194,105	13,535,908
Beans	230,370	2,844,680
Baking and yeast powders	38,500	4,722,098
Book-binding and blank-book making	159,769	11,817,395
Boxes, fancy and paper	262,038	7,403,515
Brass castings	28,200	10,780,542
Carriages, wagons, etc	4,278,292	100,463,044
Coffee and spices, roasted and ground	451,201	22,473,693
Drugs and chemicals	599,607	38,374,051
Furniture	1,960,680	75,885,045
Hardware	8,900	22,644,793
Iron bolts, washers, nuts, etc	240,000	9,833,330
Kaolin and ground earth	69,795	1,385,962
Linseed oil	700	15,393,112
Neat's-foot oil	500	258,586
Patent medicines and compounds	409,932	14,273,562
Tin ware, copper ware, and sheet-iron ware	2,862,505	45,233,533
Tools, not cutlery	600	4,235,968
Wooden ware	338,350	4,897,124
Total	30,126,457	1,196,104,265
Cotton manufactures	15,938,712	176,151,398
Wool	15,786,767	139,894,984
Sawed lumber	30,018,858	203,249,871
Total	61,744,337	519,296,253
Grand total	91,870,794	1,715,400,518

APPENDIX F.—*Paragraphs of doubtful interpretation in House bill (H. R. 9051)*

[Compared with text of present law.]

PRESENT LAW.	H. R. 9051.
CHEMICALS.	CHEMICALS.
All preparations of coal-tar, not colors or dyes, not specially enumerated or provided for in this act, 20 per cent. ad valorem.	All preparations of coal-tar not colors or dyes, and not acids of colors and dyes. Free-list.
All coal-tar colors or dyes, by whatever name known and not specially enumerated or provided for in this act, 35 per cent. ad valorem.	Aniline oil and its homologues. Free.
All barks, beans, berries, balsams, buds, bulbs, and bulbous roots, and excrescences, such as nutgalls, fruits, flowers, dried fibers, grains, gums, and gum resins, herbs, leaves, lichens, mosses, nuts, roots and stems, spices, vegetables, seeds (aromatic, not garden seeds), and seeds of morbid growth, weeds, woods used expressly for dyeing, and dried insects, any of the foregoing of which are not edible, but which have been advanced in value or condition by refining, or grinding or by other process of manufacture, and not specially enumerated or provided for in this act, 10 per cent. ad valorem.	All barks, beans, berries, balsams, buds, bulbs, bulbous roots, and excrescences, such as nutgalls, fruits, flowers, dried fibers, grains, gums, and gum resins, herbs, leaves, lichens, mosses, nuts, roots and stems, vegetables, seeds, and seeds of morbid growth, weeds, woods used expressly for dyeing, and dried insects, any of the foregoing which are not edible and not specially enumerated or provided for. Free-list.
Opium, crude, containing 9 per cent. and over of morphia, $1 per pound. The importation of opium containing less than 9 per cent. morphia is hereby prohibited.	Opium, crude, and not adulterated, containing 9 per cent. and over of morphia, for medicinal purposes. Free-list.
EARTHENWARE AND GLASSWARE.	EARTHENWARE AND GLASSWARE.
Brown earthenware, common stoneware, gas-retorts, and stoneware not ornamented, 25 per cent. ad valorem.	Brown earthenware, common stoneware, gas-retorts, and roofing tiles, not specially enumerated or provided for, and not decorated in any manner, 20 per cent. ad valorem.
China, porcelain, parian, and bisque, earthen, stone, and crockery ware, including plaques, ornaments, charms, vases, and statuettes, painted, printed, or gilded, or otherwise decorated or ornamented in any manner, 60 per cent. ad valorem.	China, porcelain, parian, and bisque, earthen, stone, or crockery ware composed of earthy or mineral substance, including plaques, ornaments, charms, vases, and statuettes, painted, printed, enameled, or gilded, or otherwise decorated in any manner, 50 per cent. ad valorem.
China, porcelain, parian, and bisque ware, plain white, and not ornamented or decorated in any manner, 55 per cent. ad valorem.	China, porcelain, parian, and bisque ware not decorated in any manner, 40 per cent. ad valorem.
All other earthen, stone, and crockery ware, white, glazed, or edged, composed of earthy or mineral substances, not specially enumerated or provided for in this act, 55 per cent. ad valorem.	White granite, common ware, plain white or cream-colored, lustered or printed under glaze in a single color; sponged, dipped, or edged ware, 35 per cent. ad valorem. All other earthen, stone, and crockery ware, white, colored, or bisque, composed of earthy or mineral substances, not specially enumerated or provided for in this act, and not decorated in any manner, 35 per cent. ad valorem.
Encaustic tiles, 35 per cent. ad valorem.	Encaustic tiles, not glazed or enameled, 30 per cent. ad valorem. All glazed or enameled tiles, 45 per cent. ad valorem.
Brick, fire-brick, and roofing and paving tile, not specially enumerated or provided for in this act, 20 per cent. ad valorem.	Brick other than fire-brick. Free-list. Paving tiles, not encaustic, 20 per cent. ad valorem.
Green and colored glass bottles, vials, demijohns, and carboys (covered or uncovered), pickle or preserve jars, and other plain, molded, or pressed green and colored bottle glass, not cut, engraved, or painted, and not specially enumerated or provided for in this act, 1 cent per pound; if filled, and not otherwise in this act provided for, said articles shall pay 30 per cent. ad valorem in addition to the duty on the contents.	Green and colored glass bottles, vials, demijohns, and carboys (covered or uncovered), pickle or preserve jars, and other plain, molded, or pressed green and colored bottle glass, not cut, engraved, or painted, and not specially enumerated or provided for, 1 cent per pound; if filled, and not otherwise provided for, and the contents are subject to an ad valorem duty, or to a rate of duty based on their value, the value of such bottles, vials, or other vessels shall be added to the value of the contents for the ascertainment of the dutiable value of the latter; but if filled, and not otherwise provided for, and the contents are not subject to an ad valorem

PRESENT LAW.	H. R. 9051.
	duty or to a rate of duty based on their value, they shall pay a duty of 1 cent per pound in addition to the duty, if any, on their contents.
METALS.	METALS.
Provided further, That all iron bars, blooms, billets, or sizes or shapes of any kind, in the manufacture of which charcoal is used as fuel, shall be subject to a duty of $22 per ton.	*Provided further*, That all iron bars, blooms, billets, or sizes or shapes of any kind, in the manufacture of which charcoal is used as fuel, shall be subject to a duty of not less than $20 per ton.
Sheet-iron, common or black, thinner than 1¼ inch and not thinner than No. 20 wire gauge, 1.1 cents per pound.	Sheet-iron, common or black, thinner than 1 inch and not thinner than No. 20 wire gauge, 1 cent per pound.
Provided, That on all such iron and steel sheets or plates aforesaid, excepting on what are known commercially as tin-plates, terne-plates, and taggers' tin, and hereafter provided for, when galvanized or coated with zinc or spelter, or other metals, or any alloy of those metals, three-fourths of one cent per pound additional.	*Provided*, That on all such iron and steel sheets or plates aforesaid, excepting on what are known commercially as tin-plates, terne-plates, and taggers' tin, when galvanized or coated with zinc or spelter or other metals, or any alloy of those metals, one-fourth of 1 cent per pound additional when not thinner than No. 20 wire gauge; thinner than No. 20 wire gauge and not thinner than No. 25 wire gauge, one-half cent per pound additional, and when thinner than 25 wire gauge three-fourths of 1 cent per pound additional.
Iron or steel sheets, or plates, or taggers' iron coated with tin or lead, or with a mixture of which these metals is a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers' tin, 1 cent per pound; corrugated or crimped sheet-iron or steel, 1.4 of 1 cent per pound.	Iron or steel sheets, or plates, or taggers' iron, coated with tin or lead, or with a mixture of which these metals is a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers' tin. Free-list.
Iron and steel cotton-ties, or hoops for baling purposes, not thinner than No. 20, wire gauge, 35 per cent. ad valorem.	Iron and steel cotton-ties or hoops for bailing or other purposes, not thinner than No. 20, wire gauge. Free-list.
Boiler-tubes, or flues, or stays, of wrought-iron or steel, 3 cents per pound.	Boiler-tubes, or other tubes, or flues, or stays, of wrought-iron or steel, 1½ cents per pound.
Other wrought-iron or steel tubes or pipes, 2½ cents per pound.	
Provided, That iron or steel wire covered with cotton, silk, or other material, and wire commonly known as crinoline, corset, and hat wire, shall pay 4 cents per pound in addition to the foregoing rates: *And provided further*, That no article made from iron or steel wire, or of which iron or steel wire is a component part of chief value, shall pay a less rate of duty than the iron or steel wire from which it is made either wholly or in part: *And provided further*, That iron or steel wire cloths, and iron or steel wire nettings, made in meshes of any form, shall pay a duty equal in amount to that imposed on iron or steel wire of the same gauge, and 2 cents per pound in addition thereto. There shall be paid on galvanized iron or steel wire (except fence wire), one-half of 1 cent per pound in addition to the rate imposed on the wire of which it is made. On iron-wire rope and wire strand, 1 cent per pound in addition to the rates imposed on the wire of which it is made. On steel-wire rope and wire strand, 2 cents per pound in addition to the rates imposed on the wire of which it is made.	Iron and steel wire and iron and steel wire galvanized, and all manufactures of iron and steel wire and of iron and steel wire galvanized shall pay the duties now provided by law: *Provided*, That no such duty shall be in excess of 60 per cent. ad valorem.
All non-dutiable crude minerals, but which have been advanced in value or condition by refining or grinding, or by other process of manufacture, not specially enumerated or provided for.	
Clippings from new copper and all composition metal of which copper is a component material of chief value not specially enumerated or provided for in this act, 3 cents per pound; copper in plates, bars, ingots, Chili or other pigs, and in other forms, not manufactured, or enumerated in this act, 4 cents per pound; in rolled plates, called braziers' copper, sheets, rods, pipes, and copper bottoms, and all manufactures of copper or of which copper shall be a component of chief value, not specially enumerated or provided for in this act, 35 per cent. ad valorem.	Clippings from new copper fit only for remanufacture, 1 cent per pound. Copper, in plates, bars, ingots, Chili or other pigs, and in other forms, not manufactured, 2 cents per pound; in rolled plates, called braziers' copper, sheets, rods, pipes, and copper bottoms, 30 per cent. ad valorem.
Nickel, in ore, matte, or other crude form not ready for consumption in the arts, 15 cents per pound on the nickel contained therein.	Nickel, in ore or matte, 10 cents per pound on the nickel contained therein.
Nickel, nickel oxide, alloy of any kind in which nickel is the element of chief value, 15 cents per pound.	
Sheathing, or yellow metal, not wholly of copper, nor wholly nor in part of iron, ungalvanized, in sheets, 48 inches long and 14 inches wide, and weighing from 14 to 34 ounces per square foot, 35 per cent. ad valorem.	Sheathing, or yellow metal, 30 per cent. ad valorem.
Manufactures, articles, or wares, not specially enumerated or provided for in this act, composed wholly or in part of iron, steel, copper, lead, nickel, pewter, tin, zinc, gold, silver, platinum, or any other metal, and whether partly or wholly manufactured, 45 per cent. ad valorem.	Manufactures, articles, or wares, not specially enumerated or provided for, composed wholly or in part of copper, 35 per cent. ad valorem; manufactures, articles, or wares not specially enumerated or provided for, composed of iron, steel, lead, nickel, pewter, tin, zinc, gold, silver, platinum, or any other metal, or of which any of the foregoing metals may be the component material of chief value, and whether partly or wholly manufactured, 40 per cent. ad valorem. Machinery designed for the conversion of jute or jute butts into cotton bagging, to wit, cards, roving frames, winding frames, and softeners. Free-list.
WOOD.	WOOD.
Timber, squared or sided, not specially enumerated or provided for in this act, 1 cent per cubic foot.	Timber, squared or sided. Free-list.
Sawed boards, plank, deals, and other lumber of hemlock, white-wood, sycamore, and bass-wood, $1 per 1,000 feet, board measure; all other articles of sawed lumber, $2 per 1,000 feet, board measure. But when lumber of any sort is planed or finished, in addition to the rates herein provided, there shall be levied and paid for each side so planed or finished 50 cents per 1,000 feet, board measure. And if planed on one side and tongued and grooved, $1 per 1,000 feet board measure. And if planed on two sides and tongued and grooved, $1.50 per 1,000 feet, board measure.	Sawed boards, planks, deals, and all other articles of sawed lumber. Free-list.
SUGAR.	SUGAR.
All other confectionery, not specially enumerated or provided for in this act, made wholly or in part of sugar, and on sugars after being refined, when tinctured, colored, or in any way adulterated, valued at 30 cents per pound or less, 10 cents per pound.	All other confectionery, 40 per cent. ad valorem.

Clean or drawn, but not manufactured	30 per cent	20 per cent	33
Manufactured	35 per cent	25 per cent	29
Bracelets, braids, chains, rings, curls, ringlets composed of hair, or of which hair is the component material of chief value.	do	do	29
Hatters' plush, composed of silk, or of silk and cotton	25 per cent	15 per cent	40
Hat bodies of cotton	35 per cent	30 per cent	41
India rubber and gutta-percha, manufactures of:			
Gutta-percha, manufactured, and all articles of, not specially enumerated or provided for	35 per cent	30 per cent	14
Inks of all kinds, and ink powders	30 per cent	20 per cent	33
Iron and steel, and manufactures of:			
Iron ores—			
Chromate of iron, or chromic ore	15 per cent	Free	100
Iron, in pigs and kentledge	$6.72 per ton	$6 per ton	11
Bar-iron—			
Bars, blooms, billets, or sizes or shapes of any kind in the manufacture of which charcoal is used as fuel.	$22 per ton	$20 per ton	10
Bars or shapes of rolled iron, not specially enumerated or provided for, and round iron in coils or rods, less than $\frac{7}{16}$ of 1 inch in diameter.	1$\frac{5}{16}$ cts. per pound	1 ct. per pound	
Rolled or hammered, comprising—			
Flats not less than 1 inch wide nor less than ¾ of 1 inch thick	$\frac{5}{16}$ ct. per pound	$\frac{7}{16}$ ct. per pound	13
Flats less than 1 inch wide or less than ¾ of 1 inch thick; round iron less than ¾ of 1 inch and not less than $\frac{7}{16}$ of 1 inch in diameter; and square iron less than ¾ of 1 inch square.	1$\frac{7}{16}$ cts. per pound	1 ct. per pound	9
Bars or rails for railways—			
Flat rails, punched, iron	$17.92 per ton	$15 per ton	16
Tee rails, weighing not over 25 pounds to the yard, steel	$20.16 per ton	$14 per ton	31
Other railway bars, weighing more than 25 pounds to the yard—			
Iron	$15.68 per ton	$11 per ton	30
Steel, or in part of steel	$17 per ton	do	35
Beams, girders, joists, angles, channels, car-truck channels, TT columns and posts, or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all structural shapes of iron or steel.	¼ cts. per pound	$\frac{8}{16}$ ct. per pound	51
Bars, billets, blooms, blanks, ingots, etc., of steel—			
Ingots, clogged ingots, blooms, or blanks, for railway wheels and tires, without regard to the degree of manufacture.	2 cts. per pound	1½ cts. per pound	25
Cotton-ties, or hoops for baling purposes, of iron and steel, not thinner than No. 20, wire gauge	35 per cent	Free	100
Hoop, band, scroll, or other iron, 8 inches or less in width—			
Thinner than No. 10 and not thinner than No. 20, wire gauge	1$\frac{3}{16}$ cts. per pound	1$\frac{1}{16}$ cts. per pound	9
Thinner than No. 20, wire gauge	1$\frac{4}{16}$ cts. per pound	1$\frac{3}{16}$ cts. per pound	7
Sheets, plates, and taggers' iron—			
Sheet-iron, common or black—			
Thinner than *1½ inches and not thinner than No. 20, wire gauge	1$\frac{1}{16}$ cts. per pound	1 ct. per pound	9
Thinner than No. 20 and not thinner than No. 25, wire gauge	1$\frac{2}{16}$ cts. per pound	1$\frac{1}{16}$ cts. per pound	9
Thinner than No. 25 and not thinner than No. 29, wire gauge	1$\frac{3}{16}$ cts. per pound	1¼ cts. per pound	17
Sheets and plates pickled or cleaned by acid or by any other material or process, and cold-rolled—			
Sheets—			
Thinner than *1½ inches and not thinner than No. 20, wire gauge	1$\frac{35}{100}$ cts. per pound	1$\frac{32}{100}$ cts. per pound	8
Thinner than No. 20 and not thinner than No. 25, wire gauge	1$\frac{40}{100}$ cts. per pound	1$\frac{30}{100}$ cts. p. pound	7
Thinner than No. 25 and not thinner than No. 29, wire gauge	1$\frac{50}{100}$ cts. per pound	1$\frac{30}{100}$ cts. p. pound	14
Sheets or plates of iron or steel (except what are commercially known as tin-plates, terne-plates, and taggers' tin), galvanized or coated with zinc or spelter, or other metals, or any alloy of these metals—			
Thinner than No. 20 and not thinner than No. 25, wire gauge	1$\frac{85}{100}$ cts. per pound	1$\frac{50}{100}$ cts. p. pound	18
Thinner than No. 25 and not thinner than No. 29, wire gauge	2$\frac{20}{100}$ cts. per pound	2 cts. per pound	11
Sheets of iron or steel, cold-rolled, cold-hammered, or polished in any way, in addition to the ordinary process of hot-rolling or hammering—			
Sheet-iron, common or black—			
Thinner than *1½ inch and not thinner than No. 20, wire gauge	1$\frac{1}{16}$ cts. per pound plus ½ ct.	1$\frac{32}{100}$ cts. per pound	7
Thinner than No. 20 and not thinner than No. 25, wire gauge	1$\frac{2}{16}$ cts. per pound plus ½ ct.	1$\frac{30}{100}$ cts. per pound	7
Thinner than No. 25 and not thinner than No. 29, wire gauge	1$\frac{3}{16}$ cts. per pound plus ½ ct.	1¼ cts. per pound	14
Sheets or plates, or taggers' iron, coated with tin or lead, or with a mixture of which these metals are a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers' tin, of iron or steel.	1 ct. per pound	Free	100
Wire rods of steel, not elsewhere specified	45 per cent	40 per cent	11
Iron or steel, flat, with ribs	$\frac{8}{16}$ ct. per pound	$\frac{6}{16}$ ct. per pound	33

*By H. R. 9051 "thinner than 1 inch."

APPENDIX G.—*Comparison of rates of duty proposed by H. R. 9051 with present rates of duty, etc.*—Continued.

Articles.	Present rates of duty.	By H. R. 9051.	
		Rates.	Reduction.
Iron and steel and manufactures of—continued.			
Wire of iron—			*Per ct.*
Smaller than No. 5 and not smaller than No. 10, wire gauge	1½ cts. per pound.	"Shall pay the duties now provided by law: *Provided*, That no duty shall be in excess of 60 per cent."	10
Wire of steel—			
Smaller than No. 10 and not smaller than No. 16, wire gauge	2 cts. per pound		46
Wire and wire strand, made of iron wire—			
Galvanized—			
Smaller than No. 16 and not smaller than No. 26, wire gauge	4 cts. per pound		4
Smaller than No. 16 and not smaller than No. 26, wire gauge	4½ cts. per pound		40
Smaller than No. 26, wire gauge	5 cts. per pound		14
Galvanized—			
Smaller than No. 16 and not smaller than No. 26, wire gauge	do		47
Manufactures of, not elsewhere specified—			
Axles, parts thereof, axle-bars, axle-blanks, or forgings for axles, without reference to the stage or state of manufacture, of iron or steel.	2½ cts. per pound	1½ cts. per pound	40
Anchors, or parts thereof, mill-irons and mill-cranks, of wrought iron and wrought iron for ships, and forgings of iron and steel for vessels, steam-engines, and locomotives, or parts thereof, each weighing 25 pounds or more.	2 cts. per pound	do	25
Anvils	do	do	25
Card clothing—			
Manufactured from tempered steel wire	45 cts. per sq. foot	40 per cent	11
Other	25 cts. per sq. foot	20 per cent	20
Castings—			
Cast-iron pipe of every description	1 ct. per pound	$\frac{6}{10}$ ct. per pound	40
Chain or chains of all kinds, made of iron and steel—			
Not less than ¾ of 1 inch in diameter	1¾ cts per pound	1½ cts. per pound.	29
Less than ¾ of 1 inch and not less than ½ of 1 inch in diameter	2 cts. per pound	1½ cts. per pound.	25
Less than ½ of 1 inch in diameter	2½ cts. per pound.	2 cts. per pound	20
Files, file-blanks, rasps, and floats of all cuts and kinds:			
4 inches in length and under	35 cts. per dozen	35 per cent	32
Over 4 inches in length and under 9 inches	75 cts. per dozen	do	46
9 inches in length and under 14 inches	$1.50 per dozen	do	34
14 inches in length and over	$2.50 per dozen	do	45
Hammers and sledges (blacksmith's), track-tools, wedges, and crow-bars, of iron or steel	2½ cts. per pound	1½ cts. per pound.	40
Hollow-ware, coated, glazed, or tinned	3 cts. per pound	2½ cts. per pound.	17
Horse, mule, or ox shoes	2 cts. per pound	1½ cts. per pound.	25
Machinery for the manufacture of jute	45 per cent	Free	100
Machinery, not elsewhere specified	do	40 per cent	11
Nails, spikes, tacks, brads, or sprigs:			
Cut nails and spikes of iron or steel	1½ cts. per pound	1 ct. per pound	20
Cut tacks, brads, or sprigs—			
Exceeding 16 ounces to the thousand	3 cts. per pound	do	56
Horseshoe nails, hob-nails, wire nails, and all other wrought-iron or steel nails, not specially enumerated or provided for.	4 cts. per pound	2½ cts. per pound.	38
Spikes of wrought iron or steel	2 cts. per pound	1½ cts. per pound.	25
Needles:			
For knitting or sewing machines	35 per cent.	20 per cent.	43
Sewing, darning, knitting, and all other, not specially enumerated or provided for	25 per cent.	Free	100
Nuts and washers of wrought-iron or steel	2 cts. per pound	1½ cts. per pound.	25
Railway fish-plates or splice-bars, of iron or steel	1½ cts. per pound	$\frac{6}{10}$ ct. per pound	37
Rivets, bolts, with or without threads or nuts, bolt blanks, and finished hinges, or hinge-blanks, of iron and steel.	2½ cts. per pound	1½ cts. per pound.	40
Saws and saw-plates—			
Hand, back, and all other saws, not specially enumerated or provided for	40 per cent	30 per cent	25
Tubes or flues, or stays, of wrought-iron or steel—			
Boiler tubes, or flues, or stays	3 cts. per pound	1½ cts. per pound.	50
Other tubes or pipes	2½ cts. per pound.	do	33
Wheels of steel and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, and other railway tires, or parts thereof, wholly or partly manufactured.	2½ cts. per pound	2 cts. per pound	20
All other manufactures of iron	45 per cent	40 per cent.	11
All other manufactures of steel	do	do	11
Lead, and manufactures of—			
Molten and old refuse lead, run into blocks and bars, and old scrap lead, fit only to be manufactured.	2 cts. per pound	1½ cts. per pound.	38
Ore and dross	1½ cts. per pound.	¾ ct. per pound	50
Pigs and bars	2 cts. per pound	1½ cts. per pound.	38
Sheets, pipes, and shot	3 cts. per pound	2½ cts. per pound.	25
Manufactures not especially enumerated or provided for	45 per cent	40 per cent	11
Leather, and manufactures of—			
Gloves, kid or leather, wholly or partially manufactured	50 per cent	40 per cent	20
Lime:			
Borate of	3 cts. per pound	Free	100
Liquors, spirituous and malt, and wines:			
Spirits, distilled—			
Alcohol, containing 94 per cent. anhydrous alcohol	$2 per proof gallon	Repealed	100
Compounds or preparations of which distilled spirits are a component part of chief value, not specially enumerated or provided for, containing 50 per cent. anhydrous alcohol.	$1 per gallon	Repealed	100
Marble and stone, and manufactures of:			
Marble—			
In blocks, rough or squared, of all kinds	65 cts. per cubic ft.	40 cts. per cubic ft.	38
Veined marble, sawed, dressed, or otherwise, including marble slabs and paving tiles	$1.10 per cubic ft.	85 cts. per cubic ft.	23
All manufactures of, not specially enumerated or provided for	50 per cent	30 per cent	40
Stone—			
Slate—			
Slates, slate-pencils, slate chimney-pieces, mantels, slabs for tables, and all other manufactures of slate.	30 per cent	20 per cent	33
Stones, freestone, granite, sandstone, and all building or ornamental stone, except marble, not specially enumerated or provided for—			
Unmanufactured or undressed	$1 per ton	Free	100
Grindstones, finished or unfinished	$1.75 per ton	do	100
Matches, friction or lucifer, of all descriptions	35 per cent	25 per cent	29
Metals, metal compositions, and manufactures of, not elsewhere specified:			
Bronze metal, manufactures of, not elsewhere specified	45 per cent	40 per cent	11
Japanned ware of all kinds, not specially enumerated or provided for	40 per cent	30 per cent	25
Metals, unwrought, not specially enumerated or provided for	20 per cent	Free	100
Nickel, nickel oxide, alloy of any kind in which nickel is the element of chief value*	15 cts. per pound	10 cts. per pound	33
Nickel, manufactures of, not specially enumerated or provided for	45 per cent	40 per cent	11
Pens, metallic	12 cts. per gross	35 per cent	19
Pewter, manufactures of, not specially enumerated or provided for	45 per cent	40 per cent	11
Platinum, manufactures of, not specially enumerated or provided for	do	do	11

* "Nickel in ore or matte" by H. R. 9051.

APPENDIX G.—*Comparison of rates of duty proposed by H. R. 9051 with present rates of duty, etc.*—Continued.

VIEWS OF THE MINORITY.

The views of the minority presented by Mr. HARRIS are as follows:

House bill No. 9051, "To reduce taxation and simplify the laws in relation to the collection of the revenue," passed the House of Representatives on the 21st day of July, 1888, and was referred to the Senate Committee on Finance on the 23d day of the same month.

The majority of the committee, not being willing to accept the House bill as a basis of revision of existing revenue laws and to correct existing evils, decided to strike out all after the enacting clause and report an entirely new bill.

In the preparation of this substitute no member of the minority of the committee was consulted, or informed as to its provisions until it was reported to the full committee, on the 25th day of September, 1888.

The chairman of the committee in May last appointed a subcommittee to hear such persons as wished to be heard upon the revenue question, and much time has been consumed and thousands of pages have been printed of the statements, arguments, and appeals of manufacturers and others, who demand that the present high rate of tariff taxation shall be maintained, and in most instances increased, prompted not by any revenue necessities, but alone for the purpose of increasing their own profits at the expense of sixty millions of tax-payers.

It is safe to say that all the interests benefited by a high protective tariff have been fully heard and have had much influence in shaping this substitute, while the great body of the people, the tax-payers and victims of this policy, have not appeared and have not been heard.

The short time that the substitute has been in the hands of the minority of the committee, and the many changes made in existing classifications, as well as changes from ad valorem to specific duties,

and the many compound duties imposed, render it difficult for the minority to approximate, with satisfactory certainty, the extent to which tariff taxation is increased or diminished upon the articles included in the various schedules, or what effect these changes will probably have upon the amount of revenues to result from such changes.

The essential difference between the House bill and the Senate substitute is apparent and radical at the outset in the matter of revenue. The one is framed in the interest of the public Treasury; the other in the interest of private pockets. The one is framed in the interest of the whole people; the other in the interest of a few thousand manufacturers. The one is designed to reduce both Government revenue and taxation, the taxation especially which bears heaviest on the necessaries of life; the other is intended to raise public revenue indeed, but to maintain private revenues by increasing and retaining taxation on all the necessaries of life.

The advocates of the substitute freely propose to reduce duties or abolish them on those things which yield only Government revenue, but refuse to reduce or abolish duties on those things which produce private revenue. This purpose is avowed, and is defended on the ground that it is all for labor. When it is remembered that the average tariff duty on all manufactured goods is 47 per cent. and the average share of labor therein is about 20 per cent., it will be seen that their love for the workingman is based on the other 27 per cent., which they pocket. Having robbed him of more than half of the bonus which the law gives the workingman they can well afford to love him; and that love will continue unabated until he insists on having all the law gives him.

But the minority think it safe to say that the chief reductions in tariff taxation, as provided by the substitute, are confined to the articles of sugar and rice, with jute, jute butts, molasses, Zante currants, and a few other unimportant articles put upon the free-list, while there is an increase of duties imposed upon the multiform manufactures of cotton, wool, iron, and steel—articles that the whole people, and especially the poor and the most needy classes, are compelled to use.

The substitute relieves the non-necessary tobacco in all its forms, except cigars, cheroots, and cigarettes, from internal taxation, and gives free alcohol to the arts. Taking the tax off of tobacco will reduce revenue about $24,000,000; and it is estimated that the tax taken from alcohol for the arts will make a further reduction of about $7,000,000. But in view of the impossibility of preventing frauds upon the revenue that should be derived from distilled spirits used for purposes other than the arts, the loss of revenue may be safely estimated at many times $7,000,000.

Practically, the substitute offers to the people free whisky and free tobacco, leaving all the expensive machinery for the collection of the revenue and enforcement of the law in full force, while it increases taxation upon the actual and indispensable necessaries of life, and this, too, when there is a large surplus in the Treasury, and under existing laws that surplus is being increased at the rate of over $10,000,000 per month; thus withdrawing and withholding from the channels of trade, commerce, and business of the country money absolutely necessary to their successful operations.

But to better illustrate let us refer to the following schedules: Take Schedule C, metals.

In no single instance is the policy upon which the substitute was framed more clearly demonstrated than in that of railway iron.

The cost to produce rails at a leading mill in the United States in 1887 was less than $27 per ton, of which less than $4.25 per ton was paid in wages.

The present rate of duty on steel rails is $17, and by the substitute it is reduced to $15.68 per ton. The question arises whether this will reduce the wages of the operatives $1.32, or whether $11.43 bounty above the whole cost paid for labor will satisfy the manufacturers.

The labor cost in a ton of steel rails being $4.25, on the pretense that this is so much higher than the former wages, the burden of $15.68 is thus laid upon every ton of steel rails imported into the United States, and thus governing the prices here, in order to equalize the difference in domestic and foreign wages.

This burden is laid upon the transportation of the country, on its foreign trade measured by the amount of duty collected; but where it is transferred to our internal commerce the burden is measured by every pound of rails over which that commerce has to pass, and ultimately falls with crushing weight upon the agriculturist, whose bulky products must seek a foreign market over these tax-laden roads and in foreign ships; and when these foreign markets are reached these products must compete with the pauper products of the cheapest labor to be found anywhere under the sun.

The House bill made a great stride for the farmers' relief when it reduced this tax to $11 per ton.

The rods out of which the farmer's wire fence is made are not apparently changed in rate, but by various changes in classification actual and important additional burdens are imposed. A reduction in dutiable value from 3½ to 3 cents per pound weight accomplishes this. An additional size, No. 6, added without an apparent change of rate does adroitly increase the rate paid on wire rods of this size from 45 per cent. to about 54 per cent., and is an increased tax on this one size of wire rods of nearly $300,000, upon the basis of the importations of 1887, and there is added a proviso by which rods smaller than No. 6 are classified as wire, and thus effect a third distinct increase of tax in this one section—and this is called part of a "system," and rightly so called.

Steel ingots, cogged ingots, billets, bars, etc., now pay 45 per cent. duty if valued at less than 4 cents per pound. By the substitute, if valued at 1 cent or less, they are dutiable at one-half cent per pound; and as some of these items were valued at seven-tenths of a cent per pound in the imports of 1887, the rate of one-half cent is an increase from 45 to over 70 per cent., and nearly a million dollars tax added by this one section.

Cotton-ties also receive careful consideration by the majority. It is not enough that the most formidable and insolent trust which ever laid its hand upon the throat of honest labor, threatening every class, from the poor colored cotton-picker, whose few pounds of crop he could not get to market for lack of means to wrap it, to the merchant and capitalist who had advanced the necessaries of life to sustain that labor through the season. To these come the proposed revision, not with helping hand, but other burdens, and the cotton-ties which their own friends had reduced to 35 per cent. in the tariff of 1883 (one of the bright oases in a desert of iniquity) they omit by name, but include in a new classification, so that instead of 35 per cent. it must pay, according to the valuation of 1887, over 100 per cent., adding nearly a quarter million dollars tax on the imported ties alone, all of which is a loss to the cotton producer. Even with this they are not content, but still further tax the struggling agriculturist in this schedule by raising the duties on trace chains, and all other kinds less than three-eighths of an inch thick, from 2½ cents, which is equivalent to 44.37 per cent., to 3 cents per pound, equivalent to a rate of 53.57 per cent. Can ingenuity go further?

That taggers' iron should be raised from 30 per cent. to 65 per cent.; that table cutlery for the poor should be raised by specific rates added to ad valorem; that knives for the poor should be more heavily taxed and made cheaper for the rich; that breech-loading shotguns should be made cheaper for the $200 grade and dearer for the $15 grade by making each pay the same tax, $10 and 25 per cent. ad valorem; all these and more are no longer startling, and prepare the mind for a thousand other inconsistencies and discriminations hidden by new and obscure classifications that only time and patient investigation will reveal.

COTTON SCHEDULE.

In this schedule again the great progress of "leveling up" is called into requisition, to what end or for what purpose who can say? For instance, medium yarns are raised 3 cents per pound—they are already paying about 45 per cent. tariff tax. Is this to pay the difference in wages here and abroad? Hardly, since by the census of 1880 it is shown that cotton-goods workers are only paid 21.06 per cent. of the product. They do not get half of the present tariff, yet it is proposed to still further increase the rate. By changes in classification and by new subdivisions, still further complicating the administration, and by changes in rates, in effect principally increasing taxes, most glaring inconsistencies and discriminations are perpetrated in this so-called revision.

Cotton yarns pay about 50 per cent. Cotton cloths made from this yarn pay 45 per cent., while the clothing ready made by the tailor or seamstress from this cloth must pay 40 per cent. Hosiery is made dearer for the poor, but undisturbed for the rich. A sock worth 75 cents per dozen must pay 60 cents per dozen and 20 per cent. ad valorem, or 100 per cent., but after they reach $3 per dozen in value the tax is left at the old rate.

Collars are raised from 30 per cent. to 80 per cent. and upwards on the cheaper kinds of linen or cotton.

WOOLEN SCHEDULE.

The substitute not only retains a duty on raw wool, but increases the duty from 10 to 11 cents a pound on clothing and combing wool, and the existing duty is retained on carpet wools, which all parties agree are not produced in this country, and the changes made in the manufactures of wool increases the taxation, and to that extent increases the cost of the manufactured article, and especially the cheaper grades—the clothing of the poor.

To illustrate, take this example: The cheapest woolen dress goods, costing only 15 cents a square yard, is taxed by the substitute 6 cents a square yard and 40 per cent. ad valorem, making the whole tax thus imposed 80 per cent.

On dress goods wholly of wool the duty is increased from 9 cents a square yard and 40 per cent. ad valorem to 11 cents per square yard and 40 per cent. ad valorem, making an increase of taxation on this single article upon the basis of the importations of the fiscal year 1887, when 31,136,149 yards were imported, of $622,722.

And as these goods only cost an average of 21 cents a yard in the foreign market and under existing law are taxed 82.96 per cent. ad valorem, they are by the substitute increased to 92 per cent. ad valorem.

Of this class of goods we imported in the fiscal year 1887, $6,522,568 worth, upon which we collected $5,411,280, with many times that

amount extorted from consumers in the form of bounty to the manufacturers.

But the people will better understand the effect of this change when they see that they are paying in the form of taxation about 19½ cents upon a square yard of goods that cost in the foreign market only 21 cents a yard, making the cost to the consumer 40½ cents a yard.

While it is impossible for the minority to state the exact amount of the increase of revenue resulting from these changes, it is confidently expected that there will be an increase of revenue upon these three schedules of at least $10,000,000 per annum.

LUMBER.

The duty on lumber is practically left undisturbed, and an aggravated tax thus continued on the whole people, and more particularly upon the distant farmers and settlers whose shelter must be brought from great distances, and the tax thus retained inures to the benefit of but a few individuals to the distress of millions.

SALT.

Bulk salt, which is now dutiable at nearly 80 per cent., is continued in the substitute at the same rate. Salt is a product of the sea and earth, which nature's God bestowed upon man for his use. So free is it in nature's plan that a little sea water exposed to the sun heat and the air, nature's own factory, and the residuum is salt. Wherever found we employ the great forces of steam and electricity instead of manual labor in preparing it for use. Why a tax should be imposed on an article so easy of production and of such prime necessity and universal use is not shown. The existing law gives free salt to the fishery interests of New England and taxes salt to the farmer and dairyman. The House bill makes salt free of tax to all.

PROVISIONS.

Macaroni and vermicelli, put upon the free-list long ago for the benefit of the poor, are now taken from the free-list and burdened with a tax of 2 cents per pound, over 35 per cent. ad valorem.

Animals, live, are made dutiable at specific rates, at $20 per head for horses and mules.

Animals for breeding purposes are now free, and over two and a quarter million dollars' worth of breeding horses were imported in the year 1887 for the purpose of improving the stock of this country, and on this importation alone the farmers of the country would pay under the proposed substitute over $300,000 more tax than now.

And other animals now paying 20 per cent. are taxed at the same rate as the more valuable breeding animals. None are benefited but the wealthy. A $10,000 coaching team of six, which cost $2,000 to import under the present law, may come in under the substitute at only $120, while six bronchos from across our southern border, worth $10 a head, which would now come in for $24, must, under the proposed substitute, pay 200 per cent.

TRUSTS.

The present tariff is the nursing mother of trusts. It is the wall behind which these combinations are formed, by which the people are plundered. Tariffs keep out the foreign competition and the combination suppresses the domestic, and the whole people are at their mercy and must pay whatever is demanded. Language is inadequate to describe the iniquity of these corporations against the rights of the people, or to depict their disastrous effects upon the general welfare. As the tariffs, which render trusts possible, are established and maintained at the special instance of those who form them, it would seem but simple justice as well as good policy to tear down as much as possible of their covert and refuse to longer aid them in wrong-doing.

They are not "private affairs," as has been asserted, but public evils of the gravest character, affecting the price of every article which contributes to the comfort and support of the people. The provisions of the substitute favor them greatly, and will serve to encourage their formation in still other branches of manufacture. Many of those belonging to trusts appeared before the Finance Committee, clamorous for such legislation as would promote their interests. They are all opposed to the House bill, which should commend it to all who condemn their methods. It is bad enough to permit those who are most interested—manufacturers—to appear before our committees and suggest the legislation they wish, but surely we should not listen to the trusts and aid them to rob with both hands.

The minority can not pass by in silence the absurd accusation that the House bill means "free trade," "the ruin of industry," and the "degradation of American labor." These charges are as false as they are misleading. How the flow of surplus money into the Treasury can be stopped without reducing the taxes which produce it no man can devise; how these taxes can be reduced without taking off from the top toward the bottom no imagination can conceive. Therefore it would seem no man can propose to cut off excessive taxation without subjecting himself to the charge of "free trade," because any reduction whatever "looks toward free trade." True, Government revenues might be reduced by making duties so high as to prohibit importations altogether; but that is the other end of the road, which increases the taxes paid to private persons. If the first method of reduction leads to free trade, the other leads to free plunder, which is worse.

Republican Presidents and Secretaries of the Treasury for years past have warned Congress of the accumulating surplus and advised the reduction of taxes. Were they all free-traders, advising the destruction of industry and the degradation of labor? The Tariff Commission of 1882, composed of nine men, eight of whom, at least, were protectionists, after perambulating all the country east of the Rocky Mountains, admitted the urgent necessity of reduction, and reported a bill which they said would lower taxes 25 per cent. They said:

> Any amelioration of the unnecessarily burdensome restrictions bearing upon the importations, provided the duties required for the equalization of the different conditions of capital and labor here and abroad are preserved, is a boon not only to commerce considered as a separate national interest, but to production.

That which, with them, was "a boon to production," when offered by the House bill becomes free trade and the ruin of production. They were not accused of free trade or hostility to labor; on the contrary their report was welcomed and applauded by the entire body of protectionists in this Chamber. The Finance Committee based its bill, which is the present law, upon it, and announced that it would reduce duties at least 20 per cent.; yet all advocates of the House bill, which reduces only 5 per cent., are free-traders, so denounced by those who in 1883 proposed a cut in duties four times as great. It is safe to say that there is not a Senator in this body, or a man in any way prominent in the councils of the Republican party in the United States, who, at one time or another, has not admitted the necessity of reducing taxes in order to stop the surplus. They are, therefore, free-traders, and desire the ruin of industry and the degradation of labor.

The minority respectfully submit that those are the enemies of industry who so enhance the cost of the raw material as to restrict its production and limit its markets; and those are its true friends who cheapen its material and enlarge its production and its markets. They further submit that those are the enemies of American labor, who supplant it with the labor of unnaturalized foreigners, whenever that can be obtained cheapest, and who receive by the law 47 per cent. from the consumer in trust for the American labor which makes their products, and fraudulently withhold more than half that trust fund from its owners, and who also lessen and restrict the amount of labor by limiting production and markets by tariffs and trusts; and that those are its true friends who seek to shut off unnatural and heathen competition, enlarge its products and markets, and to lessen for it the cost of the necessities of life.

THE WAGE SCARE.

In a country like our own, where the direction of legislation is determined by the general suffrage, it is only possible for the favored few to secure their bounties by an appeal to the multitude of wage-workers, and the enlistment of their sympathies through their interests, real or imaginary.

So far has this been done in support of the present system that the bread-winners have loaded themselves down with unnecessary and extravagant taxes in hope of fancied returns in better wages and more work, until at last it has become apparent to many at least that taxation does not enrich the man who pays the taxes, and it only needs intelligent comparison of the effects of past legislation to convince any fair-minded man of the beneficial results to be expected from a reduction of the burdens of the people.

Cotton was long ago placed upon the free-list. Did that make free-traders of those who voted for that measure? Did it reduce the wages of operatives in cotton or close the cotton-mills, or did it destroy the cotton plantations? On the contrary, we have grown more cotton than ever since that legislation; we have exported more cotton than ever. Our cotton-mills are more profitable to-day than any other, and our cotton operatives have steadier work and better wages than those who work in other mills, and we export their finished products by the hundred million yards, while protected wool has stopped one-fourth of the woolen machinery and thrown 25 per cent. of the woolen operatives out of employment.

More than a decade and a half ago hides were placed upon the free-list. Did that destroy the leather industry in this country? On the contrary we lead the world in its manufacture, save in a few minor branches, and, with largely increased population, our importations of leather have decreased and our exportations of finished products have increased.

We do import more hides than formerly because our own supply is insufficient, but this raw material furnishes labor to many hands and adds to our national wealth. We imported last year upwards of twenty-four million dollars' worth of hides free. Does that make free-traders of those who made hides free; and if $24,000,000 of free hides does not make one free-trader, does two-thirds as much free wool make free-traders of half our people?

What has happened with cotton and with hides it is confidently believed and promised will happen with free wool. Our production of wool will increase, our manufactories will revive, our woolen operatives will have steadier work and therefore better wages. Our products of woolen goods will increase and as well our exportations of woolen goods to foreign countries. Not ten years ago quinine was placed upon the free-list against protests louder and more vehement than are heard now about the wanton destruction of an honorable industry—with what re-

sult? With immensely increased production in this country, without one cent loss of wages to operatives; but, on the contrary, to their great gain, for as we now make two and a quarter million ounces it can not but mean steadier work to more employés, and the shivering consumer reaps a benefit measured not by cents but by dollars per ounce, and the only destruction which followed in the wake of this reduction was of what was then the most formidable trust in existence. The monopoly went down and legitimate manufacture prospered.

Here is a case where with benefit both to the employé and the consumer, the placing upon the free-list of a finished article was immediately followed by a wonderful cheapening of that product, and it is quite as just to claim the decline in price was entirely due to the removal of the duty as that other claim so often made, that the imposition of duty reduces prices by competition, and in proof of which is cited the general decline of prices in this country, due, as is claimed, to the tariff, ignoring the discovery of new supplies and improvements in methods of manufacture and the supplanting of manual labor in every department of life with inanimate machinery operated by natural forces intelligently controlled.

Take the agriculturist, for example, and note the fearful decline in his returns in a half dozen years. In 1886 nearly 18,500,000 acres more land was cultivated and planted in cereal crops than in 1881 and more than three-fourths of a billion more bushels of grain were raised and sold; yet, instead of receiving nearly $400,000,000 more for the extra outlay of labor and capital on lands poorer on the average than those already occupied, the farmers of the country suffered a loss in values on those grain crops alone of over $600,000,000 on that year's harvest as compared with the values of 1881.

Everything declines save the taxes, and these same farmers, who must send their surplus abroad to find a market, found, on bringing the reduced returns of their crops home, that notwithstanding they were enabled to buy foreign products slightly cheaper than before, that their taxes had been increased in that period, and that they were compelled in 1886 to pay more than $2.30 customs dues on each $100 worth imported, more than they did for like importations in 1881; and to-day those taxes are nearly $4 more per $100 worth than in 1881.

And when, in view of the above cited facts of a decline of about 33⅓ per cent. in the value of his crops in 1886 below the values of 1881, he asks that for to-morrow his taxes be made $3 less per $100 than in that same year 1881, he is met with the cry of free-trader, and that is considered argument enough.

FREE WOOL.

The minority are firmly convinced that besides the incalculable advantage to the whole country which would result from the placing of wool upon the free-list, it is easily demonstrable that no class will suffer, but that each will reap his share of the benefit.

With a consumption of 600,000,000 pounds of raw wool in 1887 and a population of 60,000,000, the average per capita consumption is easily reckoned at 10 pounds, or 50 pounds to the average family of five persons, and the Northern farmer, constantly exposed to the rigors of our winters, consumes something more than the average.

It requires from 3 to 4 pounds of raw wool to make a pound of cloth, so that from 12 to 16 pounds of woolen clothing for the family will be seen to be a low average. This is now taxed from 55 to nearly 90 per cent. The manufacturer is not benefited, because his finished product comes into competition with the foreign product made not only from untaxed wool but cheaper wool.

It is reckoned that 3½ pounds make a pound of cloth, and when the manufacturer pays 10 cents per pound duty he is supposed to be compensated therefor by the specific duty of 35 cents per pound on his woolen goods. Now, this is on the assumption that 3 pounds of raw wool make one of scoured wool; that is, that the wool shrinks in the cleaning not above 66⅔ per cent.

But many South American and other wools contain more than that proportion of foreign matter, running as high as 75 and 80 per cent. This wool our manufacturer can not buy, because his tax on the cloth would then run from 45 to 60 cents per pound, and his compensatory duty is only 35 cents. Therefore for these wools the foreign dealer finds no American competitor in the market and buys them at his own price, and these cheaper wools, untaxed and manufactured abroad, compete here with unfair advantage with our own heavily handicapped woolens, and successfully, too.

Now, if the tax be taken off wools our manufacturers at once become bidders for this wool against the foreign manufacturer, and as a certain consequence the price will rise, and this operates doubly against the foreign manufacturer. He buys his wools dearer and meets untaxed in our markets corresponding grades.

We will import more wools, of course, and in no other way can our great factories prosper, because their capacity is beyond our own wool production. When the factories are turning out more product the employés have steadier work and better wages, and, indirectly of course, the whole country is benefited.

Under the House bill the manufacturers, with free wool, secure even a higher competitive advantage over the foreign than under the present law or the substitute. The manufacturers will export woolen goods as we now export cotton and leather, and the demand for the wool will better the wool market and encourage increased production, while the average wool-grower himself will reap from cheapened clothing more benefits than he ever did from a tax on his product, which he must himself pay.

The minority, therefore, dissenting from the report of the majority, commend to the Senate and the country the bill of the House of Representatives, No. 9051, as a measure for the reduction of taxes based alike upon justice and good policy.

As the best exposition of the effect of bill H. R. 9051 upon taxation and revenue, the report of the majority of the Committee on Ways and Means submitted with the bill to the House of Representatives is hereto appended, with our concurrence

ISHAM G. HARRIS.
Z. B. VANCE.
D. W. VOORHEES.

I concur in the above report, indorsing the House bill in respect to articles placed upon the free-list, but desire some modifications in the dutiable-list.

J. R. McPHERSON.

[House Report No. 1496, Fiftieth Congress, first session.]

TO REDUCE TAXATION AND SIMPLIFY THE LAWS IN RELATION TO THE COLLECTION OF THE REVENUE.

April 2, 1888.—Committed to the Committee of the Whole House on the state of the Union and ordered to be printed.

Mr. MILLS, from the Committee on Ways and Means, submitted the following report (to accompany bill H. R. 9051):

The Committee on Ways and Means, to whom was referred the annual message of the President, calling the attention of Congress to the large surplus now in the Treasury, daily growing larger on account of the excess of receipts over expenditures, have given to the subject that careful consideration which its importance demands, and in response to his recommendations beg leave to report to the House a bill to prevent the accumulation of surplus revenue by reducing the present excessive and unjust rates of taxation imposed upon the people.

Our revenues for the fiscal year ending June 30, 1887, amounted to $371,403,277.66, while our expenditures for the same time, including interest and sinking fund for the public debt, amounted to $315,835,428.12; leaving a surplus of $55,567,849,54 over and above all requirements for current expenditure. The receipts for the current year up to March 1 amounted to $253,905,890, and the estimates for the remaining four months are $136,094,110; making total receipts for the year $390,000,000. The expenditures for the current year to March 1 amount to $180,594,915, and the estimates of expenditure for the remaining four months amount to $128,405,085; making a total of expenditures of $309,000,000; leaving a surplus of $81,000,000.

As our customs and internal taxes are levied on articles which go into consumption, we may expect our revenues to increase with the increase of consumption, which must keep pace with the growth of population and wealth. On the other hand, with an honest and economical administration of public affairs, our annual expenditures may be expected to decrease. The large surplus now in the Treasury, which it is estimated will exceed $150,000,000 by the 1st day of July next, together with such as may thereafter be in the Treasury, may be applied to the reduction of the debt and the payment of annual interest charge on the same.

It is, then, safe to say that the above surplus, together with the yearly purchase of bonds required by law for the sinking fund, which is an expenditure included in the annual estimates of expenditures, and not in the estimate of the surplus, will extinguish by the date of their maturity in 1891 all the outstanding 4½ per cent. bonds, amounting at this time to $234,427,250, and still leave over $60,000,000.

With receipts growing larger and expenditures growing smaller, we must soon gather into the Treasury the larger part of the circulation of the country to the great injury of its business and the bankruptcy of many of its people. Some method must be adopted by Congress to prevent the congestion which must occur under existing laws.

There are two ways in which this excessive accumulation may be prevented. We may reduce taxation to the level of expenditures and leave in the pockets of the people all moneys not needed for public purposes, or we may raise expenditures to the height of taxation, seeking out new and useless objects of appropriation on which to lavish the great and growing revenues, not needed for any legitimate wants of the public service.

If we adopt the latter course these very objects of useless expenditure will gather upon Congress in such increasing numbers and with such growing demands as to fasten upon the Government a permanent and unchangeable policy of extravagant and reckless appropriations.

This policy once adopted will not only breed corruption in public life and demoralization in private life, but will compel, in periods of depression, an increased rate of taxation for the people or an increase of bonded debt for the Government.

There is but one safe course, and that is to reduce taxation to the necessary requirements of an honest, economical, and efficient administration of Government. Having determined upon this course as the

one which a wise and just policy demands, we are confronted with the question, Upon what articles shall the reduction be made? Shall we leave our import duties as they are and repeal the internal-revenue taxes on alcoholic liquors and tobacco? Or shall we leave the internal-revenue tax as it is and make the reduction on imports alone? Or shall we reduce the taxes on both?

The committee have determined to recommend a reduction of the revenues from both customs and internal taxes. They have given the whole subject a careful and painstaking examination, and in the revision of the schedules have endeavored to act with a spirit of fairness to all interests. They have carefully kept in view at all times the interests of the manufacturer, the laborer, the producer, and the consumer.

The bill herewith reported to the House is not offered as a perfect bill. Many articles are left subject to duty which might well be transferred to the free-list. Many articles are left subject to rates of duty which might well be lessened. In both respects the bill could be improved; but in its preparation the committee have not undertaken or felt authorized to construct a new and consistent system of tariff taxation. They have dealt with the existing system, seeking to free it of much of its injustice, to simplify its provisions, to diminish its complexity, and, as far as practicable, to lighten its pressure on the taxpayer, and make it more contributory to our industrial prosperity and progress.

Furthermore, we have felt constrained to consult the opinions and give weight as far as possible to the views of our associates from different parts of the United States, always subordinate, however, to the paramount consideration of the welfare of the entire country. From the beginning of our Government tariff legislation has been based on the principles of mutual concession. The present bill does not depart from this precedent.

In the progressive growth of our manufactures, we have reached the point where our capacity to produce is far in excess of the requirements of our home consumption. As a consequence, many of our mills are closed, and many of those still in operation are running on short time. This condition is hurtful to the manufacturer, to the laborer, and producer of the materials consumed in manufacture.

The manufacturer loses the profit on his capital, the laborer loses his wages, and the producer of the materials consumed in manufacture loses the market for his products. Manufacturers in many instances, to guard against losses by low prices caused by an oversupply in the home market, are organizing trusts, combinations, and pools to limit production and keep up prices. This vicious condition of business could not exist with low duties, but is the legitimate outgrowth of prohibitory duties on imports. Prohibitory tariffs surround the country with lines of investment and prevent all relief from without, while trusts, combinations, and pools plunder the people within.

In a country like ours, prolific in its resources, where the rewards of labor ought to be large, the capitalist may by such methods keep his investments secure and still make profits; but what is to become of the laborers who are thrown out of employment by stopping the wheels of machinery and limiting the amount of product? And what is to become of the producer of the materials to be consumed by the manufacturer? When the fires are shut off, the laborer and the materials are shut off at the same time, and the market for both is gone; whether they labor in the factory or the field; whether they produce cotton, wool, hemp, flax, coal, or ore; whether the product of their daily labor is cloth, iron, steel, boots, or shoes, they must have constant employment to obtain for themselves and families the necessaries and comforts of life.

When out of employment, with earnings cut short, with low prices for their products caused by the closing of the market, they still must pay for whatever their daily wants require the prices which the trusts have fixed. What is the remedy for this wrong? It is more extended markets for the sale of our products and a constant and active competition in business. With active competition combinations and pools are impossible. With the markets of the world open to us our manufacturers may run their mills on full time, give constant employment to their laborers, with a steadily-increasing rate of wages. With the markets of the world open to the sale of their products they will create an active and constant demand for all the raw materials required in manufactures, which will stimulate, promote, and reward the wool-grower and the producer of cotton, hemp, flax, hides, ores, and other materials of manufacture. We are the largest producers of cotton in the world, we are second in the production of wool, we put on the market annually quantities of hemp and flax, and our country is full of ores and coal. What we need is manufactures enough to consume all the annual product of these materials and create an active demand for them, so that all our workmen may be constantly employed and receive high prices for their labor.

To accomplish this our manufacturers must have markets for the sale of their wares, and these markets are to be found in foreign countries as well as at home. To take the foreign market from the foreign manufacturer we must produce our goods at a lower cost than he can. The principal elements of cost are labor and material. In many of our manufactures the labor cost is lower than in any country in the world, and if the cost of materials was as low here as in foreign countries we could produce our goods more cheaply than they and largely increase our exports to foreign markets.

The annual product of our manufactories is now estimated at $7,000,000,000, of which amount we export only about $136,000,000, or less than 2 per cent. If we could obtain free of duty such raw materials as we do not produce and can only be procured in foreign countries, and mix with our home product in the various branches of manufacture, we could soon increase our exports several hundred millions. With untaxed raw materials we could keep our mills running on full time, our operatives in constant employment, and have an active demand for our raw materials in our own factories. If there should be no duty on any materials entering into manufactures many articles now made abroad would be made at home, which, while it would give more employment to our own labor, would give a better market to many articles which we produce and which enter into manufactures, such as cotton, wool, hemp, flax, and others.

With this end in view we have gone as far as we could and done what we could in the present condition of things to place our manufactures upon a firm and unshaken foundation, where they would have advantages over all the manufacturers of the world. Our manufacturers, having the advantage of all others in the intelligence, skill, and productive capacity of their labor, need only to be placed on the same footing with their rivals in having their materials at the same cost in the open markets of the world. In starting on this policy we have transferred many articles from the dutiable to the free-list. The revenues now received on these articles amount to $22,189,595.48. Three-fourths of this amount is collected on articles that enter into manufactures, of which wool and tin-plates are the most important. The revenues derived from wool during the last fiscal year amounted to $5,899,816.63, and the revenues from tin-plates to $5,706,433.89.

The repeal of all duties on wool enables us to reduce the duties on the manufactures of wool $12,332,211.65. The largest reduction we have made is in the woolen schedule, and this reduction was only made possible by placing wool on the free-list. There is no greater reason for a duty on wool than there is for a duty on any other raw material. A duty on wool makes it necessary to impose a higher duty on the goods made from wool, and the consumer has to pay a double tax. If we leave wool untaxed the consumer has to pay a tax only on the manufactured goods.

It is contended by some that if we put wool on the free-list we should also put woolen goods on the free-list. If this is sound policy we should also put cotton goods on the free-list, for raw cotton is free, and we should put silk goods on the free-list, for raw silk is free. Then where would the Government get its revenues? Duties are imposed to raise revenue, and they should be so imposed as to obtain the revenue with as little burden as possible to the tax-payer and as little disturbance as possible to the business of the country. This is accomplished by imposing the duty on the finished goods alone, and in no tariff, from the first to the last, have woolens, cottons, silks, or linens been placed on the free-list.

We say to the manufacturer we have put wool on the free-list to enable him to obtain foreign wools cheaper, make his goods cheaper, and send them into foreign markets and successfully compete with the foreign manufacturer. We say to the laborer in the factory we have put wool on the free-list so that it may be imported and he may be employed to make the goods that are now made by foreign labor and imported into the United States. We say to the consumer we have put wool on the free-list that he may have woolen goods cheaper. We say to the domestic wool-grower we have put wool on the free-list to enable the manufacturer to import foreign wool to mix with his, and thus enlarge his market and quicken the demand for the consumption of home wool, while it lightens the burden of the tax-payer.

The duty on wool now prevents nearly all the better classes of wool from coming into the country; the domestic product can supply only about one-half of the amount required for home consumption. The statistician of the Agricultural Department puts the domestic product for the year 1887 at 265,000,000 pounds. Others place it higher, but none at more than half the annual consumption of our people. It requires about 600,000,000 pounds of wool and other fibers manufactured with it, which are now paying duty, to supply the annual demands of home consumption.

Why, then, should we keep out by high duties the foreign wools so necessary to the clothing of the people? The Wool-Growers' Association asks us to put on a duty high enough to prevent the importation of all wools. The Wool-Manufacturers' Association asks us to put on a duty high enough to keep out all manufactures of wool. If Congress grants this joint request, what are the people to do for woolen clothing? Are the people to be compelled by Congress to wear cotton goods in the winter or go without, to give bounties to wool-growers and wool manufacturers?

During the last fiscal year there were 114,404,173 pounds of wool imported, and of that amount 81,504,447 were cheap carpet wool, the greater part of which paid 2½ cents per pound duty. The high duty of 10 cents per pound on the finer wools that go into clothing was so great a barrier against the importation of the better wools that only 33,099,696 pounds were imported. But our people required clothing, and if Congress puts a duty so high on wool as to keep it out, still, high as was the duty on woolen goods, $44,235,243 worth were im-

ported and consumed in this country, upon which duties were paid amounting to $29,729,717.

If the charges constantly being made are true, that great quantities of these goods are coming in undervalued, underweighed, and undermeasured, then the aggregate amount is much larger. Frauds of this character, smuggling, and bribery follow prohibitory duties just as the shadow follows the substance. These goods for the most part could be manufactured in the United States, and if the wools in them could be admitted free of duty it would give employment to many thousands of our own operatives, start into life and keep in active operation many of our factories now idle, and largely reduce the cost of these goods to the consumers.

We must find a way to foreign markets for our woolen goods. In the foreign market we must compete with the foreign producer, and in order to do so successfully we must produce our goods at a lower cost and be able to undersell the foreign product and take the market. We are now exporting only $500,000 worth of woolen goods, while England, with free wool, exports more than $100,000,000. With free wool we may not only supply the home market with the greater part of the woolen goods now imported, but we can begin to export woolen goods and soon build up a prosperous foreign trade.

We submit herewith a table showing equivalent ad valorem duties now paid on manufactures of wool—those proposed by the committee and those proposed by the joint agreement of Wool-Growers' and Wool Manufacturers' Associations, adopted in Washington, D. C., January 14, 1888:

Articles.	Present equivalent ad valorem.	Proposed equivalent ad valorem.	Proposed by convention of wool dealers, growers, and manufacturers.
Wools, hair of the alpaca, goat, and other like animals—			
Manufactures—			
Balmorals—			
Valued at above 30 and not exceeding 40 cents per pound	67.72	40	111.73
Valued at above 40 and not exceeding 60 cents per pound	65.59	40	
Valued at above 60 and not exceeding 80 cents per pound	68.15	40	96.50
Valued at above 80 cents per pound	66.35	40	
Belts or felts, endless, for paper or printing machines	52.87	30	78.59
Blankets—Valued at not exceeding 30 cents per pound	79.66	40	
Valued at above 30 and not exceeding 40 cents per pound	63.85	40	128.76
Valued at above 40 and not exceeding 60 cents per pound	69.56	40	
Valued above 60 and not exceeding 80 cents per pound	69.36	40	99.36
Valued at above 80 cents per pound	70.30	40	
Bunting	80.75	40	95.75
Carpets and carpeting of all kinds—			
Aubusson, Axminster, and Chenille carpets, and carpets woven whole for rooms	47.14	30	72.85
Brussels carpets	59.03	30	88.67
Druggets and bockings, printed, colored, or otherwise	73.92	30	123.20
Mats, screens, hassocks, and rugs, not exclusively of vegetable material	40.00	30	50.00
Of wool, flax, or cotton, or parts of either, or other material not specially enumerated or provided for	40.00	30	55.03
Patent velvet and tapestry velvet carpets, printed on the warp or otherwise	55.10	30	85.13
Saxony, Wilton, and Tournay velvet carpets	54.27	30	82.36
Tapestry Brussels, printed on the warp or otherwise	61.13	30	88.76
Treble ingrain, three-ply, and worsted chain Venetian carpets	45.79	30	69.73
Yarn, Venetian, and two-ply ingrain carpets	44.70	30	68.37
Hemp and jute carpets	24.76	30	79.03
Clothing, ready-made, and wearing apparel (except knit goods), not specially enumerated or provided for, composed wholly or in part of wool, worsted, the hair of the alpaca, goat, or other (like) animals, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer—			
Cloaks, dolmans, jackets, talmas, ulsters, or other outside garments for ladies' and children's apparel, and goods of similar description, or used for like purposes	67.74	45	83.11
Clothing, ready-made, and wearing-apparel of every description not specially enumerated or provided for, and balmoral skirts and skirting, and goods of similar description, or used for like purposes	54.18	45	
Cloths, woolen—			
Valued at not exceeding 80 cents per pound	89.84	40	128.33
Valued at above 80 cents per pound	68.91	40	91.30
Dress goods, women's and children's coat linings, Italian cloths, and goods of like description—			
Composed in part of wool, worsted, the hair of the alpaca, goat, or other animals—			
Valued at not exceeding 20 cents per square yard	67.89	40	102.61
Valued at above 20 cents per square yard	59.06	40	71.78
Composed wholly of wool, worsted, the hair of the alpaca, goat, or other animals, or of a mixture of them, and all such goods of like description, with selvages made wholly or in part of other materials, or with threads of other materials introduced for the purpose of changing the classification—			
Weighing 4 ounces or less per square yard	82.96	40	107.28
All weighing over 4 ounces per square yard	69.68	40	92.40
Flannels—Valued at not exceeding 30 cents per pound	73.42	40	
Valued at above 30 and not exceeding 40 cents per pound	66.20	40	121.39
Valued at above 40 and not exceeding 60 cents per pound	67.69	40	
Valued at above 60 and not exceeding 80 cents per pound	67.65	40	108.66
Valued at above 80 cents per pound	73.02	40	
Hats of wool—Valued at above 30 and not exceeding 40 cents per pound		40	134.54
Valued at above 40 and not exceeding 60 cents per pound	73.04	40	
Valued at above 60 and not exceeding 80 cents per pound	66.22	40	69.77
Valued at above 80 cents per pound	52.07	40	
Knit goods, and all goods made on knitting frames—			
Valued at not exceeding 30 cents per pound	88.33	40	
Valued at above 30 and not exceeding 40 cents per pound	65.20	40	125.71
Valued at above 40 and not exceeding 60 cents per pound	69.14	40	
Valued at above 60 and not exceeding 80 cents per pound	69.62	40	83.29
Valued at above 80 cents per pound	62.58	40	
Shawls, woolen—

From the above table it will be seen that the wool-growers and wool-manufacturing association are clamoring for higher taxes. The contest in the woolen schedule is not between the present rate and the rate proposed by the committee, but between the rate proposed by the committee and the schedule agreed upon by the Wool-Growers' Association and Wool-Manufacturers' Association. The committee propose free wool and a reduction from present rates to 40 per cent. ad valorem on all manufactures except carpets, which were made dutiable at 30 per cent.; ready-made clothing at 45 per cent., and webbings, gorings, etc., at 50 per cent. The joint agreement of the two associations proposes to increase the present rates to 128 per cent. on some of the cheaper cloths; to 102 per cent. on the cheaper grades of women's and children's dress goods when composed in part of wool, and to 107 per cent. when composed wholly of wool; on cheaper grades of flannels to 121 per cent.; on cheaper grades of wool hats to 134 per cent.; on cheaper grades of knit goods to 125 per cent.; on cheaper grades of woolen shawls to 126 per cent.; on woolen blankets to 128 per cent.

These rates, high as they are, are not the highest that are imposed on all woolen goods by the joint agreement. They are only the highest rate on the lowest valued goods, as shown in the agreement. All goods at a lower value are taxed at a still higher rate.

This most extraordinary schedule has been made and agreed upon by the two parties named, and it has been introduced into the House and referred to this committee.

In the woolen schedule we have substituted ad valorem for specific duties. The specific duty is the favorite of those who are to be benefited by high rates, who are protected against competition, and protected in combinations against the consumer of their products. There is a persistent pressure by manufacturers for the specific duty because it conceals from the people the amount of taxes they are compelled to pay to the manufacturer.

The specific duty always discriminates in favor of the costly article and against the cheaper one, and therefore it imposes a heavier burden as it goes down from the highest priced articles to the lowest. This discrimination is peculiarly oppressive in woolen and cotton goods, which are necessaries of life to all classes of people. In order that this fact may be clearly seen and comprehended we append a table taken from the first annual report of the Commissioner of Labor (page 251):

This table states the description of the goods, their width in inches, and the weight per yard of each kind; the price of the goods at the factory; the rate and the amount of duty per pound and ad valorem, and the total amount of duty levied under the compound rate; and also the per cent. which the total duty is of the price per yard at the factory in England.

Price per yard of Leeds (England) woolen and mixed goods, duties, etc.

Name.	Description.		Price at factory.	Duty.						Cost in New York, not including packing, carriage to port, ocean freight, and insurance.
				Rate.		Amount.				
	Width (inches).	Weight (ounces).		Per pound.	Ad valorem (per cent.).	Per pound.	Ad valorem.	Total.	Per cent. of price at factory.

Cotton-warp reversible	50	30	.45	.35	35	.656	.157	.813	180.7	1.263

This table is well worthy of careful study. In examining the figures given in the column headed "Price at factory" and the column headed "Per cent. of price at factory," which the total duty amounts to, the startling inequalities in the rate of duty to be paid in this country becomes apparent. The highest priced goods named in the table is West of England broadcloth, worth $3.60 per yard in Leeds, the specific duty being 35 cents per pound and the ad valorem duty 40 per cent., making a total of 50.3 per cent. on the value at the factory. This is on a high grade of goods. In looking at the bottom of the table the last entry is for cotton-warp reversible cloth made in imitation of a better kind. It is worth but 45 cents per yard at the factory. The specific duty is the same as on the West of England broadcloth, 35 cents per pound, the ad valorem duty is 35 per cent., but the specific duty and the ad valorem duty together make the rate on the price at the factory 180.7 per cent. That is to say, the cheaper the goods at the factory the greater is the proportional increment of duty. The column headed "Per cent. of price at factory," which shows the percentage that the duty is of the factory price, brings this cut clearly.

The above table shows the true nature of specific duties, and the consumer can see why it is that manufacturers clamor for them. They know the different values of these goods, and what apt words will embrace the high and low priced together, and make the poorer people pay the same tax for a yard of cloth worth 45 cents that the wealthy do for a yard that costs $3.66; but that fact the specific tariff conceals. The ad valorem rate taxes everything according to its value. A duty of 40 per cent. ad valorem would have imposed a tax of $1.44 on the yard of broadcloth and 18 cents on the cotton-warp cloth that cost 45 cents, and the duty would have been fair to both. As it is, the tax is 180 per cent. on the cheap cloth and 50 per cent. on the high-priced broadcloth.

In the cotton-goods schedule we see the same "vicious, inequitable, and illogical" results of the specific duty. As an illustration, we refer to the report of the Secretary of the Treasury on the revision of the tariff, February 16, 1886, pages 84, 85, 86, and 87. It will be seen in his report, by the tables sent to him by persons dealing in cotton goods imported into the United States from foreign countries, that cheap goods costing 3.55 cents per yard pay 176 per cent. duty, while those costing 8.12 cents per yard pay 77 per cent. duty; and goods that cost 4 cents per yard pay a duty of 94 per cent., while those that cost 2 cents per yard pay a duty of 208 per cent. These inequalities run throughout the whole specific system. It is that feature that specially commends it to

the manufacturer of the competing article. As these excessive rates are thought to be more hurtful in cotton and woolen goods than in the articles embraced in the other schedules, the committee have substituted the ad valorem for the specific duties as to all articles in the woolen schedule, and in all, except yarns, in the cotton schedules.

In 1789 a duty was imposed on imported hemp, and in 1828 on imported flax, and while at intervals these fibers were imported free without harm to the American producer, yet since 1842 American flax and hemp have been "protected," and this necessitated the imposition of duties upon all manufactures from these and like fibers.

In spite of these duties American hemp has decreased in the amount of production from 74,493 tons in 1860 to 5,025 tons in 1880, as shown by the census reports of those two years, and flax from 7,709,676 pounds in 1850 to 1,565,546 pounds in 1880. But the demand and necessity for the products manufactured from these and similar fibers has greatly increased, and the importations of the raw material and of the finished product have necessarily equally increased.

Formerly every pound of American cotton was covered with bagging and tied with rope made from American hemp; now over 50,000,000 yards of cotton bagging manufactured from imported jute butts are used to cover the 7,000,000 bales of American cotton which are tied with iron cotton-ties, while the present mode of harvesting the immense grain crop of the country requires about 33,000 tons of twine, nearly all of which is made from imported material. So that, in the effort to "protect" probably 8,000 tons of American hemp and 1,500,000 pounds of American flax, a tax larger than the entire value of both these products is imposed on cotton and wheat, whose price to the producer is fixed in the foreign market, where they come in competition with cotton raised in India and wheat raised in foreign countries.

Your committee have put all these fibers upon the free-list, thereby relieving the goods manufactured in America of the tax, amounting last year to $1,930,340 on raw material. It has also put on the free-list burlaps not exceeding 60 inches in width, none of which is made in America, and of which last year there was imported $3,260,117.40 worth, upon which were levied and paid $978,035.22. It has reduced the duties on all the manufactures from these fibers, so that, except on a very few articles, no duty is higher than 25 per cent., and some as low as 15 per cent. The aggregate estimated reduction on this schedule is $4,766,846.88.

Your committee feel assured that no industry will be injured by this reduction of taxation, while it will enable the American manufacturer to compete on equal terms with his rivals, will reduce the cost of production of cotton and wheat, and will cheapen to the consumer the goods which he must purchase.

The duty on sugar is nearly a revenue tax, about 85 per cent. of it being purely a tax paid into the public Treasury; and all the sugars used in America are refined in this country. Your committee desired, in reducing the revenue received from this source, not to endanger the profitable production and refining of sugar here, and yet to prevent oppression by trusts and combinations. After much consideration, we now recommend that the revenue received from sugar be reduced by reducing the rates 20 per cent.

This reduction of rates on all sugars above No. 13 will render possible the importation of foreign refined sugars, so as to prevent exorbitant prices and protect consumers against combinations.

In the earthen and glass ware schedules we have made fair reductions, the larger part of these articles, such as common earthenware and window-glass, being necessary articles of consumption by the great body of the people, and especially the laboring classes. Ornamented china and decorated earthenware we have reduced from 60 to 45 per cent., common earthenware from 60 to 35 per cent., and window-glass from 82 and 106 to 62 and 68 per cent.

In the metal schedule the most important reduction is in steel railway bars, which are now dutiable at $17 per ton, and by the proposed bill at $11 a ton. This is a reduction of about 35 per cent. ad valorem. This reduction will be of great value in promoting and cheapening the construction of railroads and lowering the rates of transportation of freight. Two years ago steel rails sold in this country at $27 a ton. The manufacturers during last year ran the price up to $40. The present price is $31.50. Last year 12,724 miles of railroad were constructed in the United States, which required 1,300,000 tons of rails. It is therefore patent that, by reason of the present exorbitant duty of $17 a ton, the manufacturers were able to raise the price more than $8.50 a ton. They were therefore able to realize, over and above a legitimate profit, more than $11,000,000.

This sum was an increase in the cost of construction, upon which the farmers must pay interest and dividends by way of increased freights upon their wheat, cotton, corn, and other products. The price of rails on board of ship in Liverpool last year was $21; adding freight, the cost of same without duty in this country was $23.50. The duty fixed by the committee, $11, would increase the price to $34.50, or $3 above the price for which American rails are now selling. It is therefore apparent that the rate of duty allowed by the committee is more than enough to compensate our manufacturers for the difference in cost between the American and foreign product.

While we have been constrained to leave high duties on almost all the articles we have touched—duties higher than any necessity either of revenue or of difference of cost of American over foreign products required—we have felt that we ought to give some relief to other branches of industry not benefited by high duties imposed for private purposes. A large number of our people are interested in manufacturing tin, and others in putting up meats, fish, fruit, vegetables, oils, and other articles in manufactures of tin. Many of these products are exported and many consumed at home. During the last fiscal year there were imported into the United States 570,643,389 pounds of tin-plate, valued at $16,883,813.95, on which duties were paid amounting to $5,706,433.89.

We are informed that the value of the salmon caught in the Columbia River, Oregon, and canned and exported during the last fiscal year, amounted to nearly $2,000,000, while the lard that was canned and exported exceeded $14,000,000, and the fruits and meats exceeded $4,000,000. We believe that the removal of the duty on tin-plate would reduce the cost of these and other canned goods now being exported, and give to our people engaged in that trade such an advantage in the foreign market as would effectually overcome all competition, and enable them to hold the market and build up a large foreign trade.

The exporter, under existing law, has a drawback of 90 per cent. of the duty paid on tin-plate, but the repeal of the duty would give him the remaining 10 per cent., and enable him to sell so much lower and give him additional advantage over his foreign competitor. Besides this, the consumers of canned goods at home would obtain them at a reduced price.

The manufacture of tin cans is growing into an extensive industry in the United States. More than 150,000,000 cans are made per year in the city of Baltimore alone, while New York, Philadelphia, Chicago, and other Northern cities produce large quantities of articles manufactured from tin-plate.

We have placed cotton ties also on the free-list. The duties received from them during the last fiscal year were $121,098.99. Cotton is our largest exporting product. The price is so low, and has been for a number of years, that it hardly pays the cost of producing it, and the committee felt that it was a proper subject for consideration while they were repealing taxes and reducing the surplus revenue of the Government. To our farmers in the Middle and Northern States, engaged in raising hogs and selling their products, we have made salt free of duty and released revenues amounting to $676,865.50. To the people who are settling up the vast prairies of the West, inclosing their lands and building farm-houses, we have made lumber free, and removed duties amounting to $1,039,207.35.

The bill which the committee reports provides for the repeal of all restrictions on the sale of tobacco by the producer, and for the repeal of all taxes on tobacco except on cigars, cigarettes, and cheroots, and of all privilege and license taxes except those for manufacturing and selling cigars, cigarettes, and cheroots. The repeal of special and privilege taxes is also recommended. These taxes have been a fruitful source of the petty prosecutions which have crowded the Federal court dockets in some portions of the country. It is not believed that their retention is essential to the efficient collection of the revenue, and they should no longer be retained.

The changes in the administrative features of the present law are fully shown by the letter of the Secretary of the Treasury, dated March 14, 1888, and the reductions in the internal revenue will be shown by the letter of the Commissioner of Internal Revenue, dated March 12, 1888, both of which are hereto appended.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., March 14, 1888.

SIR: Mr. Talbott, clerk of your committee, has presented me copies, respectively, of the proposed bill "to reduce taxation and simplify the laws in relation to the collection of the revenue," and of the tables relating to the same, with the request that I communicate to you my views as to probable effect the adoption of the administrative sections of the bill would have upon the revenue, and also that I cause the computations in the tables to be verified, and footings of the column of "values" therein to be made by experts in this Department.

With regard to the effect sections 5 to 23 of the bill would have upon the revenue, I have to advise you as follows:

1. The proposed substitute for section 2499 Revised Statutes would not, it is thought, affect the revenue one way or the other further than to prevent loss of duties by securing uniformity of action in the classification of merchandise.

2. The tendency of the amendment to "Schedule A," respecting "anhydrous alcohol," etc., would be to restrict importations of the article. This would not, however, affect the revenue appreciably, as the importations are trifling in amount.

3. The amendment to the free-list as to "articles of growth, produce, and manufacture of the United States," etc., would not apparently affect the revenue.

4. The amendment relating to "wearing apparel, personal effects," etc., would naturally result in an increase of revenue. But there is no definite basis for determining such increase. It would probably not fall short, however, of $500,000 per annum.

5. While the effect of section 6 would be to increase the dutiable value of merchandise subject to ad valorem duties, its tendency, at the same time, would be to restrict speculative importations, which have been stimulated by the opportunities for evasion afforded by the present law, as interpreted by the Supreme Court and construed by the Attorney-General. The section would not, therefore, in my opinion, operate to increase materially, if at all, the aggregate amount of revenue collected.

No better illustration of the unreliability of mere individual opinions concerning the probable effect upon the revenue of tariff legislation can be cited than the estimates given by the customs officers of the amount required to pay refunds due importers under the Oberteuffer decision, respecting coverings, and

the annual reduction of duties on this account. These estimates, as to the amount necessary to pay refunds, were from $3,000,000 to $5,000,000, while the annual reduction of duties was variously estimated at from $6,000,000 to $10,000,000.

It is now practically ascertained that the amount actually paid and to be paid as refunds covering a period of near three years will not exceed $2,000,000, while the importations and revenue have largely increased, due doubtless in some measure to the opportunity for evasions as above stated.

6. Sections 7 and 8 are calculated to promote orderly administration and the convenience of importers, but will not, it is thought, have any positive effect upon the revenue.

7. The effect of section 9 would be (1) to abolish the 10 per cent. additional duty now collected (under sec. 2970, R. S.) on merchandise remaining in bond more than one year, amounting approximately to $35,000 per annum; and (2) to reduce the revenue by reason of the assessment of duties on the quantity of merchandise withdrawn from warehouse instead of on the quantity actually imported and entered originally, as required by existing law (sec. 2983, R. S.). The amount of such reduction can not be estimated. It would certainly be considerable, and might be very large. The tendency of the proposed amendments would be to increase the volume of goods warehoused and the consequent liability of loss of duties thereon.

8. There is nothing in sections 10 or 11 apparently calculated to affect the revenue.

9. Section 12 abolishes fees collected on entry of merchandise only. As these fees are not separately reported to the Department, there is no ready means of ascertaining the exact amount thereof. It may be safely assumed, however, that the reduction on this account would not exceed $375,000 per annum.

10. The tendency and effect of sections 13 to 18, inclusive, would be to prevent fraudulent attempts upon the revenue, and to insure a more strict and honest enforcement of the tariff laws. Whatever increased duties might result from such improved administrations would probably be offset by a decrease of speculative importations made with a view of defrauding the revenue.

11. SEC. 19. There being no available data for determining the precise amount of duties remitted on account of damage, the exact effect of this section upon the revenue can not be stated. A certain proportion of the merchandise on which damage is now allowed would be abandoned under this section and no duties collected thereon. Another result of this section would be to prevent the importation of any but sound goods, and especially to discourage the shipment, now common, of damaged fruits, nuts, and other such articles, upon which large damage allowances are now made. In any event it is not thought the section would affect the revenue to exceed $500,000 annually. Its great advantage would be to protect honest importers and stop frauds.

I inclose herewith copy of the tables on which footings have been made as requested. With the exception of a few unimportant errors these tables, as printed, appear to be arithmetically correct.

Respectfully, yours,

C. S. FAIRCHILD, *Secretary.*

Hon. R. Q. MILLS.
Chairman Committee on Ways and Means,
House of Representatives.

Estimate of effect of proposed bill on revenues, based on importations of 1887.

Free-list.	Importations of 1887.		Average ad valorem under—

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, March 12, 1888.

Estimated reduction of internal taxation under the provisions of "A bill to repeal certain tobacco and other taxes, and to modify internal-revenue laws."

Total receipts from tobacco, fiscal year 1887		$30,108,067
Deduct cigars and cigarettes	$12,157,196	
Deduct special taxes manufacturers of cigars 18,570×$3=	55,710	
Deduct special taxes dealers in tobacco 514,000×$1=	514,000	
		12,726,906
Receipts from proposed repealed sources, fiscal year 1887		17,381,161
The increase in the receipts of that part of the tobacco tax which this bill proposes to repeal during the first seven months of the current fiscal year over the receipts for the corresponding period of the last fiscal year was $1,234,101, or 13 per cent. Assuming that this rate of increase will continue to the close of the fiscal year, the receipts from these objects of taxation would be increased		2,259,551
Special taxes retail liquor dealers, fiscal year 1887		4,587,268
Special taxes retail dealers in malt liquors, fiscal year 1887		177,148
Special taxes manufacturers of stills and stills manufactured, fiscal year 1887		3,721
Add for assessed penalties		41,758
Add for interest clause in section 10, say		5,000
Total estimated reduction		24,455,607

JOSEPH S. MILLER, *Commissioner.*

THE VIEWS OF HON. JAMES B. BECK, OF THE MINORITY OF THE COMMITTEE.

Not having seen the bill proposed by the Republican majority of the Finance Committee of the Senate until within the last few days, and having no idea what sort of report will accompany it, except that it is announced in the public press that it will contain an elaborate and bitter attack on the propositions and principles contained in the bill that came from the House of Representatives, and being further advised that the views of the minority are expected to be ready promptly, as the subject will be brought before the Senate very soon, I can only enter my protest against the principles presented by the Republican majority of the Senate committee, and give in a general way the reasons I have for supporting the principles presented by the House bill. That bill is an earnest effort to reduce taxation by diminishing the cost of the raw materials used by American manufacturers, so as to enable them to compete in the markets of the world with their foreign competitors who produce similar goods. It proceeds upon the recognized fact that raw materials are not consumed in that form, but are necessary for the production of commodities to which the industry of the country may be properly applied; and it is an honest effort to reduce the cost to the American consumer of the goods which they must necessarily have, retaining, as far as possible, such taxes as are imposed upon articles which the people may use or not just as they please, and the proceeds of which taxation, less the cost of collection, reaches the Treasury of the United States. It seeks to promote trade with all the world, to restore and build up our lost commercial marine, and thus exchange commodities with other people upon somewhat fair and equal terms.

The struggle of the majority of the Senate Committee on Finance seems to be—its effect certainly is—to close our ports as far as possible against commerce from abroad, to make our people dependent for their supplies upon the products of the machinery of the home manufacturer, by limiting and restricting their right to use manufactured articles to such as American producers furnish and at such prices as they see fit to exact, the obvious effect being to surrender to other nations the trade and commerce of the outside world and subject our exports to such extortions in freight charges as combinations of foreign ship-owners see fit to exact. The Senate substi-

tute, when carefully examined, will show that in every feature of it it aims to increase the cost of the goods he needs to the home consumer, and to close the markets of the world against imports and exports as well, except such as are purely agricultural and have to be sold abroad for any price they will bring in free open market with foreign competition. Under it we can have no successful commerce, no return cargoes, indeed, no ships in the foreign trade, and no sailors except such as hover around our coasts protected by the combinations and monopolies in our coastwise trade where all competition is excluded.

This attempt by the majority of the committee to restore specific instead of ad valorem rates simply means, no matter what pretenses may be set up, that the goods used by the poor shall be taxed out of all proportion to those used by the rich, and that the people shall derive no benefits and no reduction of taxation from the invention of new machinery or economic processes made or devised, either at home or abroad, which cheapen the cost of the production of goods. Specific rates exclude the consumer from all benefit of all the progress of science, skill, and invention in cheapening production, while the blanket that costs $1, which only the poor buy, pays the same tax as the blanket that costs $3; and, as the committee were shown in New York on our visit there to prepare a bill to guard against undervaluation, the bridal veil costing $2,000 in Paris would pay no more tax than the imitation article which cost $50. All that, however, is in the interest of the combinations of wealth and power, which alone seem to be worthy of consideration by the majority of the committee. They need no ships, they need no commerce, they seek to exclude imports which may compete with them, and they refuse to sell their goods at such prices as the people abroad will buy them at; therefore the seas might as well, for their purpose, be oceans of fire instead of God-given highways for the world's commerce. The right to plunder all our people is all they ask; that seems to be the object which the majority of the Finance Committee, by their bill, endeavor to attain.

The question now presented is not one of temporary taxation. The pretenses upon which high-tariff taxes are now demanded will be as strong fifty years hence as they are at present. It is no longer infant industries that are clamoring. The manufacturers are stalwart giants now, with machinery equal to the best in the world, and much of it imported from foreign countries and owned by foreigners, who bring it and their workmen here to secure the subsidy Congress gives them, as was confessed by the men engaged in the bagging conspiracy and by many others who appeared before the committee, as their statements show. They control this market against foreign-made goods, and with their machinery at home control all foreign markets against our products.

The Republicans now confess in their platform and the measures they advocate that they never intend that American goods shall be sent for sale into foreign markets, because they know that the ground upon which they demand protection, to wit, the difference in wages here and in other countries, will continue for generations to come, so long indeed as the free lands of this continent are open to homestead settlers. Their affected interest in American labor is simply a false pretense; their whole course has been opposed to the interests of labor, as shown from the time the high war tariffs were enacted and laws were passed by them for the importation of foreign contract labor from all parts of the earth at the lowest foreign wages, duty free, which allowed the employer of the foreign pauper laborer to follow his serfs out like a sleuth-hound if he dared to run away, and to sell his humble homestead over his head unless he worked for the pauper wages he had, in ignorance of our wage-rates, agreed while in Asia or Europe to take. The country is well advised of the desperate struggles they made to obtain and retain Chinese labor to the exclusion of American workmen. Their efforts in that direction became so flagrant that even Republican Senators had to rise in the Senate and denounce their action.

In 1882, during the discussion of the Chinese question, Senator John F. Miller, Republican, from California, said:

> The average American manufacturer is interested generally in two things, namely, the highest protective tariff, and the cheapest labor. * * * It is not difficult to perceive the origin of that political economy which suggests high protective tariff and at the same time advocates the admission of servile laborers into this country without limit. It means high prices for the products of manufacture and low prices for the labor which produces them; the aggrandizement of capital and the debasement of labor; greater wealth to the wealthy and greater poverty to the poor.

Before the discussion on this bill closes, and I hope it will be full and exhaustive, the country will see how false their pretenses now are. No man has denounced high protective taxes or praised the low Democratic revenue tariff of 1846 and shown its advantages to all the interests of the country better or more elaborately than the distinguished Senator from Iowa [Mr. ALLISON], as the records show. Even the Senator from Maine [Mr. HALE], in the Forty-second Congress (Globe, first session, No. 1, page 34), moved to put salt on the free-list, and expressed a desire (page 80) to have coal added to his proposition. The measure was passed by a vote of 147 to 47, and the amendment of Mr. Farnsworth to Mr. HALE'S free-salt proposition (page 90), made at Mr. HALE'S suggestion, making coal free, also passed by a vote of 130 to 57, many Republicans now in the Senate voting for both propositions. And notwithstanding the demand now so earnestly made for free tobacco in every form, when the Democrats of the Senate in 1883 were insisting upon a reduction of the tobacco tax to 8 cents per pound the Republican party were almost a unit in opposition to it, their candidate for the Presidency, Mr. Harrison,* saying among other things:

> I believe that we can not enter into the general subject of tariff reduction, and we ought not perhaps to reduce much now the taxes on those three articles which I believe the common concurrent consent and common sense of all the people agree should be the last subjects of internal revenue—I mean whisky, beer, and tobacco. I do not announce a doctrine from which I expect any general dissent, certainly not on the Democratic side of the Chamber. * * * I come then to say that, in supporting this measure from our Finance Committee, we are reducing our internal-revenue taxes to those three articles which by common consent should remain, at least till the indefinite future, upon our list of products upon which excise taxes are to be levied.—*Congressional Record*, page 6250, part 6, volume 13, Forty-seventh Congress, first session.

And the distinguished Senator from Ohio, Mr. SHERMAN, opposed the same proposition in language as strong as he knew how to employ, saying, among other things:

> Senators on the other side may think from the vote—I can almost refer to it as a party vote, though it is not entirely a party vote—that they can make political capital by reducing the tax on tobacco. I do not believe it. I believe the plain people of this country, as Mr. Lincoln called them, see through it. They are willing to pay the tax on tobacco, on whisky, and on beer. They are the only internal taxes that they are willing to pay, and I am willing to let these three taxes stand as they are until we can gradually reduce them as the condition of our revenue may allow. Strip your internal revenue of all other classes, even if to do so does benefit some of the banks, even if it does repeal taxes that might be kept on a little while longer with no very great injury; yet it confines the system to these three articles, which in every country are the subjects of taxation. Then spread the balance of your reduction on the external taxes, and do what little good you can until the tariff commission enables us to reduce the whole system of external taxes. * * *

Again he said:

> But do not give away of our surplus revenue more than half of it on an article which is the proper source of revenue, the legitimate subject of taxation, on which the tax is more cheerfully paid and more easily collected than on any other in the whole range or gamut of taxes.

And when on my motion the right was demanded to allow the producer of tobacco to sell $100 of his own product, it raised a storm of indignation among all the Republican Senators, who are now so clamorous for the protection of the producers of tobacco, that a person who either listened to the debate or reads it now would suppose that the country would have been ruined by even allowing them the slight privilege which was given them by the votes mainly of the Democratic party.

The pretense that they are going to aid chemists, machinists, and others by giving them free alcohol is also a sudden conversion, because every report that has been made by the Treasury Department from the time of Secretary Sherman to the present shows that any effort to do that would simply be the breaking down of all barriers against fraud in the collection of revenue on distilled spirits. It would, however, have the effect which perhaps is desired by the Republican gentlemen who deny the existence of trusts, of giving the whisky trust of Peoria, Ill., the right to sell their alcohol at any price they please free from all competition at home or abroad.

But I do not propose now to argue the details of the bill. That, as I have said, will be done to the satisfaction of the country before it leaves the Senate. I shall therefore confine myself to a general statement of the reasons why I support the measure as it came from the House, and oppose that as now presented by the majority of the Finance Committee.

The President of the United States, in his letter of acceptance, has stated the position of his party in regard to taxation and the principles that ought to govern it so clearly that I do not know how better to begin a statement of those principles than to quote a few extracts from that letter.

The President says:

> Our Government is the creation of the people, established to carry out their designs and accomplish their good. It was founded on justice, and was made for free, intelligent, and virtuous people. It is only useful when within their control, and only serves them well when regulated and guided by their constant touch. It is a free government because it guaranties to every American citizen the unrestricted personal use and enjoyment of all the reward of his toil and of all his income except what may be his fair contribution to necessary public expense.
>
> Therefore it is not only the right but the duty of a free people in the enforcement of this guaranty, to insist that such expense should be strictly limited to the actual public needs. It seems perfectly clear that when the Government, this instrumentality created and maintained by the people to do their bidding, turns upon them and through an utter perversion of its powers extorts from their labor and capital tribute largely in excess of public necessities, the creature has rebelled against the creator and the masters are robbed by their servants. The cost of the Government must continue to be met by tariff duties collected at our custom-houses upon imported goods, and by internal-revenue taxes assessed upon spirituous and malt liquors, tobacco, and oleomargarine.
>
> I suppose, too, it is well understood that the effect of this tariff taxation is not limited to the consumers of imported articles, but that the duties imposed upon such articles permit a corresponding increase in price to be laid upon domestic productions of the same kind, which increase, paid by all our people as consumers of home productions and entering every American home, constitutes a form of taxation as certain and as inevitable as though the amount was annually paid into the hands of a tax-gatherer. These results are inseparable from the plan we have adopted for the collection of our revenue by tariff duties.
>
> And yet this is our condition. We are annually collecting at our custom-houses and by means of our internal-revenue taxation many millions in excess of all legitimate needs. As a consequence there now remains in the national Treasury a surplus of more than $130,000,000. No better evidence could be furnished than

*Seeking to confine the reduction to taxes on banks, matches, and patent medicines.

that the people are exorbitantly taxed. The extent of the superfluous burden indicated by this surplus will be better appreciated when it is suggested that such surplus alone represents taxation aggregating more than $108,000 in a county containing 50,000 inhabitants.

Taxation has always been the feature of organized government the hardest to reconcile with the people's ideas of freedom and happiness. When presented in a direct form nothing will arouse popular discontent more quickly and profoundly than unjust and unnecessary taxation. Our farmers, mechanics, laborers, and all our citizens closely scan the slightest increase in the taxes assessed upon their lands and other property, and demand good reasons for such an increase. And yet they seem to be expected, in some quarters, to regard the unnecessary volume of insidious and indirect taxation visited upon them by our present rate of tariff duties with indifference, if not with favor.

General Harrison, in his letter, controverts all the positions taken by the Democratic party, but states the truth very pointedly when he says: "It is not a contest between schedules, but between wide-apart principles." In that I agree with him, and am willing to go before the country on that issue.

There is no dispute about the fact that the present surplus in the Treasury, which is not only needless but dangerous and corrupting in all its tendencies, must continue to increase unless taxation is reduced, and it is equally true that that surplus was produced by the maintenance of unnecessary and, therefore, unjust and oppressive taxation, against the protest of the Democratic party, by the Republican leaders, who are now opposing tariff reduction.

Until now it has been conceded by all men that tariff taxation ought to be reduced from the existing war standard to a peace footing. It is needless to go into detail to show that the present tariff taxes were intended to be only temporary, and were imposed to compensate the manufacturers for the oppressive internal-revenue taxes which were placed upon them and all others by the necessity of war. Senator MORRILL and all the advocates of protection publicly proclaimed that over and over again, and inserted it in the preamble of the acts "temporarily" increasing tariff taxation.

The Senator from Vermont [Mr. MORRILL] had charge of the bill of 1864 in the House of Representatives. His speech, made when he presented it, will be found in the Globe of June 2, 1864. He said, among many other things:

The Treasury requires a larger supply of means, and such sources of revenue as have not already yielded their maximum contributions must now be sought, so that we may fill the measure of our wants. This has made an increase of internal duties necessary, and that increase to a considerable extent imposes upon us the duty as well as affords us the power of obtaining an increased revenue from duties on imports from abroad. The withdrawal of the large number of men now in the field from industrial pursuits leaves a paucity of numbers at home, thereby advancing wages and the cost of living, so that a bushel of corn, a pound of wool, a yard of cloth, or a ton of iron can not now, even reducing the currency to a specie standard, be produced at the same cost that they were three years ago. With the tariff considerably increased, and even if we had no internal taxes to pay, our people will hardly find it less difficult to compete with foreign productions and manufactures than they did in times of peace without any increase of tariff. And when we impose a tax of 5 per cent. upon our manufactures and increase the tariff to the same extent upon foreign manufactures, we leave them upon the same relative footing they were at the start, and neither has cause of complaint. The rates proposed are high nominally, and may be so regarded by foreign nations, but considering the weights carried by our own people, other nations will still be able to continue the race with us upon nearly the same terms as heretofore.

* * * * * * *

In making an estimate of the effect of such a war tariff as is now proposed, it is important that we should bear in mind that as we increase the cost of any article we diminish the number of those who are able to consume it.

Again, he said:

Protection was never defended on any other ground than that in the end the consumer obtained his supplies more cheaply. I know sound policy dictates that for proper encouragement of manufacturers all raw materials should be free, and where nations manufacture for exportation no other policy can be maintained. This accounts for the course of France and England upon this subject. They export largely; we do not.

Mr. Shellabarger, then a member from Ohio, asked Mr. MORRILL if there was any increase of duty over and above the tariff of 1861, save and except the compensating duty made necessary by internal-revenue taxes. Mr. MORRILL said in reply that there was no increase except for that purpose, or for the purpose of revenue upon articles not produced in this country.

At the close of his speech Mr. MORRILL made this pledge:

"This is intended as a war measure, a temporary measure, and we must give it our support as such."

Again, he speaks of it as "a war measure, imposed by the necessities of the Government, the scarcity of laborers, and the enormous direct taxation."

On the following day Mr. ALLISON, again resuming, said:

This large internal-revenue tax was made the excuse and the cause of the advance of the tariff of July 14, 1862, and June 30, 1864. I quoted the language yesterday of the then chairman of the Committee on Ways and Means in 1862, Mr. Thaddeus Stevens, himself a protectionist, and certainly in favor of the protection of the great interest of Pennsylvania, iron. He made a pledge upon this floor in 1862 that those additions of duties upon manufactured articles imported in this country were made necessary because of the internal-revenue taxes. Both he and Mr. MORRILL, subsequently chairman of the Ways and Means Committee, declared that the act of June 30, 1864, was a temporary measure, a war measure, and was not intended as a measure which should remain upon the statute-book as a protective tariff in the time of peace.

Mr. ALLISON yielding the floor for a moment to Mr. COX, that gentleman said:

I desire to say in addition to what has been said by the gentleman from Iowa [Mr. ALLISON] that I was on the committee of conference upon the tariff of 1864. The reason why that conference report was made as it was made, the reason given by Mr. MORRILL and Mr. Fessenden, was that the internal tax had been raised, but that the moment that tax was reduced they would be in favor of reducing the customs duties. That was understood when the report was made upon the tariff of 1864; it was one of the conditions leading the conference committee to report that measure.

Mr. ALLISON said further:

It is admitted by all that the increase of the tariff was commenced and carried on upon the basis of the protective duties of the Morrill tariff of 1861; the increase of direct taxation, added to the price of domestic manufactures, rendered an increased tariff necessary in order to prevent our country being flooded with cheaper foreign productions. Certainly, then, upon the decrease of internal taxation the tariff may be, and ought to be, decreased in proportion, the danger being no longer in existence which was sought to be averted by these increased duties.

But I may be asked how this reduction shall be made. I think it should be made upon all leading articles, or nearly all; and for that purpose, when I get the opportunity in the House, if no gentleman does it before me, I shall move that the pending bill be recommitted to the Ways and Means Committee with instructions to report a reduction upon existing rates of duty equivalent to 20 per cent. upon the existing rates, or one-fifth reduction. Even this will not be a full equivalent for the removal of all internal taxes upon manufactures. It will not be difficult to make a reduction upon this basis.

The position taken by these gentlemen at that time sufficiently illustrates the grounds on which the temporary increase of tariff taxation was agreed to by Congress and accepted by the country.

In 1866 the internal-revenue taxes, as shown by the report of the Commissioner of Internal Revenue for 1880 (see page 159), amounted to $310,906,984, of which $236,336,037.37 were imposed upon manufactures, railroad receipts, incomes, special taxes, legacies, etc., manufactured products alone paying $127,230,608.66 that year, as shown by the following statement:

1.	Manufacturing products	$127, 230, 608, 66
2.	Gross receipts, railroads, etc	11, 262, 429. 82
3.	Sales, stocks, gold, etc	4, 002, 282. 91
4.	Special taxes, etc	14, 844, 418. 05
5.	Incomes	72, 982, 153. 03
6.	Legacies	924, 823. 97
7.	Successions	246, 154. 88
8.	Miscellaneous	1, 693, 122. 73
9.	Miscellaneous	3, 750, 037. 32
	Total	236, 236, 037. 37

All these taxes were repealed nearly twenty years ago, yet the corresponding tariff taxation which was imposed to compensate for the burdens temporarily imposed by them is to-day almost as high as it was at any period during the war.

The injustice of that condition induced a Republican Congress to strike off on all leading articles 10 per cent. from the tariff taxation in 1872, but in 1875, under the false pretense that the sinking fund was in danger, that 10 per cent. was again restored, and additional taxes were imposed on whisky, tobacco, and sugar. As early as 1881 the surplus arising from the increased taxation became so oppressive that the then President of the United States and the country demanded tariff reduction, although the average duty was at that time 4 or 5 per cent. ad valorem lower on imported goods than it is to-day—as low indeed as the House bill proposes to make it now. After a long struggle on the part of the protectionists to retain their extortions a while longer they obtained a tariff commission, organized in their own interests, which they knew would make as slight reductions as possible. That commission, after reviewing the whole situation, was compelled, among other things, to make the following statement in their report:

Early in its deliberations the commission became convinced that a substantial reduction of tariff duties is demanded not by a mere indiscriminate popular clamor, but by the best conservative opinion of the country, including that which has in former times been most strenuous for the preservation of our national industrial defenses. Such a reduction of the existing tariff the commission regards not only as a due recognition of public sentiment and a measure of justice to consumers, but one conducive to the general industrial prosperity, and which, though it may be temporarily inconvenient, will be ultimately beneficial to the special interests affected by such reduction. No rates of defensive duties, except for the establishment of new industries, which more than equalize the conditions of labor and capital with those of foreign competitors, can be justified. Excessive duties, or those above such standard of equalization, are positively injurious to the interest which they are supposed to benefit. They encourage the investment of capital in manufacturing enterprise by rash and unskilled speculators, to be followed by disaster to the adventurers and their employés, and a plethora of commodities, which deranges the operations of skilled and prudent enterprise.

Numerous examples of such disasters and derangements occurred during and shortly after the excessively protective period of the late war, when tariff duties were enhanced by the rates of foreign exchange and premiums upon gold. Excessive duties generally, or exceptionally high duties in particular cases, discredit our whole national economic system and furnish plausible arguments for its complete subversion. They serve to increase uncertainty on the part of industrial enterprise, whether it shall enlarge or contract its operations, and take from commerce, as well as production, the sense of stability required for extended undertakings. It would seem that the rates of duties under the existing tariff—fixed, for the most part, during the war under the evident necessity at that time of stimulating to its utmost extent all domestic production—might be adapted, through reduction, to the present condition of peace requiring no such extraordinary stimulus. And in the mechanical and manufacturing industries, especially those which have been long established, it would seem that the improvements in machinery and processes made within the last twenty years, and the high scale of productiveness which has become a characteristic of their establishments, would permit our manufacturers to compete with their foreign rivals under a substantial reduction of existing duties.

Entertaining these views, the commission has sought to present a scheme of tariff duties in which substantial reduction should be the distinguishing feature. The average reduction in rates, including that from the enlargement of the free-list and the abolition of the duties on charges and commissions, at which the commission has aimed, is not less on the average than 20 per cent., and it is the opinion of the commission that the reduction will reach 25 per cent.

The legislation which followed the report of the tariff commission in the last session of the Forty-seventh Congress was perhaps the most discreditable that ever occurred in the history of American politics. The House of Representatives, at the first session of that Congress, had sent to the Senate a bill relating exclusively to internal revenue. It took up the Tariff Commission bill in January,

1883, and after struggling along until about the middle of February without reaching the schedules in regard to sugar, cotton, or woolen goods, or indeed anything beyond the iron schedule, which it only partially considered, it abandoned all attempts to pass any measure, and by devices which were confessed at the time to be revolutionary it resolved to get into conference with the Senate upon a bill which that body had passed in order to endeavor to secure advantages to the protected interests through the action of the conference committee, which the House, so far as it had gone, refused to give them, and which the Senate had in every form repudiated. The debates and the bill of the House, which can be found in the document-rooms of both Houses, will verify this statement. The leading members of the House on the Democratic side denounced the proceeding in every form, but without avail. A few extracts will illustrate this. Mr. BLACKBURN, of Kentucky, a member of the Committee on Rules (see RECORD, page 3370), charged on the floor what the "Keifer-Boynton" investigation has since verified, if any proof was needed when no man denied what he alleged.

Unwilling—

He said—

to trust to a count, which, if common rumor is to be credited, has been carefully made; a count made upon a written agreement signed by members on the other side, binding and obligating themselves to stand for this report and to stand for the motion of non-concurrence; though with care and particularity, as rumor has it (and I doubt not correctly), you have taken time since the Kasson resolution was sent to the Committee on Rules, two weeks ago, to marshal your forces, to obligate them in every manner that is binding, unless it be in open bond, with good and approved securities for the performance of the contract; in the face of all this the majority side of the House dare not allow a motion, which is admitted under every parliamentary law, or parliamentary rule, or parliamentary practice ever known among civilized men. You dare not allow a vote to be taken to concur in the Senate amendments to the text of the bill.

Mr. COX, of New York, said:

It is a fraud upon parliamentary law; a fraud upon all that is just and fair in our politics; it is revolutionary.

Mr. HOUSE, of Tennessee, said:

It is an open, unblushing attempt to concoct, in a secret chamber of a packed conference committee, a tariff bill which the promoters of this movement know can not be passed upon the floor of this House under the rules which govern it. It is an attempt by an indefensible, arbitrary, revolutionary act to wrest from the representatives of the people the right of legislation; to tie their hands, and to deny them the poor privilege of lifting their voices against it.

The House was not even allowed the privilege of agreeing with the Senate on the tariff bill passed by that body. The leading Republican members of the Senate, professing to be conferees on the part of the Senate, were only too anxious to get into the secret recesses of the conference committee chamber, not for the purpose of sustaining the action of the body they professed to represent, but for the purpose of annulling what had been deliberately decided upon, often by a yea-and-nay vote, in the Senate of the United States on many questions against their wishes. Time and space will not permit anything like a full history to be given of the outrages committed in that conference committee.

Late one night, just before the adjournment of Congress, when the conference report was brought into the Senate, and no explanation made as to its provisions, I endeavored to point out, and did point out, many of the outrages committed in that conference report, by which the wishes of both Houses, deliberately expressed, had been violated. That speech will, perhaps, call the attention of Senators, when the debate on this bill comes up, to matters that even now require explanation; but there were many things, not then known to any Senator, concealed by the conferees, which subsequently came to light and developed the flagrant character of that so-called conference. Important clauses were added to the cotton and woolen schedules, increasing the tax upon whole classes of goods, which propositions had never been submitted to either House, or when submitted to the Senate had been defeated by that body, because they never were before the House in any form.

If Senators will take the trouble to look up the bill as it went to the conference committee, and examine it as it left that body, they will find in regard to cotton goods increases far beyond anything that had been even suggested, embracing the most important classes of products in which New England was specially interested.

In Schedule I, cotton goods, a new proviso was added, increasing the tax as follows:

On all cotton cloth not exceeding two hundred threads to the square inch, counting the warp and filling, not bleached, dyed, colored, stained, painted, or printed, valued at over 8 cents per square yard; bleached, valued at over 10 cents per square yard; dyed, colored, stained, painted, or printed, valued at over 13 cents per square yard, there shall be levied, collected, and paid a duty of 40 per cent. ad valorem.

And in Schedule K, wool and woolens, the conference committee, in the ready-made clothing schedule, after "clothing, ready-made, and wearing apparel of every description," inserted the words "not specially enumerated or provided for in this act," and then inserted a provision increasing taxation on the following goods:

Cloaks, dolmans, jackets, talmas, ulsters, or other outside garments for ladies' and children's apparel, and goods of similar description, or used for like purposes, composed wholly or in part of wool, worsted, the hair of the alpaca, goat, or other animals, or of which wool, worsted, the hair of the alpaca, goat, or other animals, is a component material, 30 cents per pound, and, in addition thereto, 50 per cent. ad valorem.

The debates in both Houses will show that no suggestion was ever made looking to such increases as these. The result was that instead of a reduction on cotton and woolen goods, Hon. Joseph Nimmo, jr., Chief of the Bureau of Statistics, on March 10, 1884, furnished Congress with an official statement of the duties upon the leading articles under the old law prior to March 3, 1883, and under the act of March 3, 1883, which, instead of a reduction of from 20 to 25 per cent., shows large increases in the manufactures of wool, cotton, earthenware, and china beyond what existed before the law was passed.

The table is as follows:

Values of imports of dutiable merchandise entered for consumption in the United States, with the amount of duty and the ad valorem rate of duty collected during the following periods, during the six months ended December 31.

Articles.	Under the old law—1882.		
	Value.	Duty collected.	Ad valorem rate of duty collected.
			Per cent.
All dutiable merchandise	$260,856,237	$111,266,507	42.65
Sugar and melada	44,432,311	23,180,59[illegible]	52.17
Iron and steel and manufactures thereof	32,499,426	12,713,996	39.12
Wool:			
Clothing	1,210,689	671,415	55.46
Combing	135,123	67,839	50.19
Carpet	3,505,980	974,202	27.79
Manufactures of wool	22,400,387	14,943,626	66.71
Manufactures of cotton	14,967,850	5,629,658	37.61
Manufactures of silk	19,999,119	11,738,469	58.69
Earthen and china ware	4,423,146	1,896,705	42.88
Glass and glassware	4,271,305	2,327,660	54.49
Spirits and wines	5,203,625	3,706,142	71.22
Malt liquors	511,772	227,370	44.43

Articles.	Under act of March 3, 1883.			Increase + Decrease —	
	Value.	Duty collected.	Ad valorem rate of duty collected.	Value.	Ad valorem.
			Per cent.		*Pr. cent.*
All dutiable merchandise	$235,898,109	$96,514,136	40.91	—$24,958,128	— 1.74
Sugar and melada	46,800,671	23,121,601	49.40	+ 2,368,360	— 2.77
Iron and steel and manufactures thereof	23,698,937	7,924,225	33.44	— 8,800,489	— 5.68
Wool:					
Clothing	2,399,515	1,073,311	44.73	+ 1,188,826	—10.73
Combing	615,677	267,704	43.48	+ 480,554	— 6.71
Carpet	4,345,385	1,087,094	25.02	+ 839,405	— 2.77
Manufactures of wool	22,064,512	15,202,183	68.90	— 335,875	+ 2.19
Manufactures of cotton	12,067,631	4,835,714	40.07	— 2,900,219	+ 2.46

Malt liquors	490,315	235,823	48.10	— 21,457	+ 3.67

JOSEPH NIMMO, JR.,
Chief of Bureau.

TREASURY DEPARTMENT,
Bureau of Statistics, March 10, 1884.

Even before the bill went into conference the cotton schedule, under the manipulations of the New England manufacturers, had been so changed that Senator SHERMAN had to confess:

The classification is so changed that none but an expert can understand it.

And in regard to the same matter, Senator ALLISON said in the Senate Chamber, on the 3d day of February, 1883 (see RECORD of that date, page 2030):

Now I want to say one word in regard to the Tariff Commission report upon the cotton schedule. The truth is that the Tariff Commission did not examine this cotton matter at all; it may as well be said on the floor of the Senate; nor did they make this schedule that is called the Tariff Commission report schedule. It was made by a cotton manufacturer from Boston with an expert appraiser in New York, and the Tariff Commission accepted it. When the knowledge of that fact came to me I had no particular faith in the Tariff Commission report on this cotton schedule, and therefore I examined it as best I could for myself, hearing the witnesses, reading the testimony, and hearing people who I supposed knew something about it, and in whom I had faith.

When the Senator from Texas [Mr. Maxey] asked him what faith there was to be placed in their report on anything else, after such conduct as that was developed, Mr. ALLISON answered—

I do not choose to express my opinion of their report or anything else.

Much light was thrown upon this subject by a controversy that sprung up between Senator SHERMAN and Senator MORRILL. Mr. SHERMAN had published an elaborate interview in the Commercial

Gazette, of Cincinnati, dated March 14, 1883, in which, among other things, he said:

The truth is, there was a grave fault in constituting the committee on the part of the Senate. The two members of the Finance Committee from New England were put on the conference committee, when, by custom and precedents, Mr. JONES, of Nevada, should have been a member, or, if he declined, Mr. ALLISON. The result was that these two New England Senators controlled the conference, and they were known to be opposed to the duty on wool and in favor of an increase on woolen and cotton goods.

During the debate in the Senate Mr. SHERMAN insisted that the rates upon woolen goods especially were too high, even as they passed the Senate, and of course he regarded the increase made in the conference, which, as I said before, the Senate knew nothing about until after Congress had adjourned, as an outrage; his language in the debate being:

That about one-half of the cost of these woolen goods is in the cost of the raw material, the wool, and the other half is the cost of manufacture. Take, therefore, a lot of these goods; suppose that the value of the goods imported is $1,000, and one-half of that is the cost of the wool, and the other half is the cost of manufacture. The duty on $500, the cost of the wool, has already been fully compensated for and more than compensated for by the specific duty. Then, as to the duty as levied, not as 40 per cent. of the $500, the cost of manufacture, which is all the manufacturer puts upon it, but the duty is levied at 40 per cent. on the thousand, thus giving him a protection of $400, or 80 per cent. on the cost of manufacture. It seems to me that is too large, that the relative duties upon wool and woolen goods are unequal and unfair. The duty ought to be in proportion to the manufactures.

And in the interview above referred to he repeated his charges of improper conduct against his co-conferees from New England, saying:

By the new tariff the whole reduction falls on the wool-grower. It is true there is a reduction of the specific duty on woolens equal to the reduction on wool, but that only leaves the manufacturer *in statu quo*, while the former loses one-fifth of his protection. The protective duty of 35 per cent ad valorem in favor of the manufacturer remains unchanged, and in important branches is changed to 40 per cent.; and the classification is so changed that none but an expert can understand it. Even in the conference committee additional duties were put on both cotton and woolen goods of certain grades, far in advance of existing law. The wool-growers, who did not understand in the beginning what was going on, felt, and still feel, no doubt, that their interests were sacrificed by a reduction of duties on wool without a corresponding reduction on woolens, and with an absolute increase on some grades.

And in that same interview he expressed not only his disgust at the advantage which the New England conferees had obtained over him, but his regret that, having no Democratic conferees to trouble them, they had not fixed up a bill to suit themselves, regardless of their responsibility to the Senate or the wishes of either house. His answer to the newspaper correspondent clearly proves this:

CORRESPONDENT. What effect upon the conference had the withdrawal of Senators Bayard and BECK?

Senator SHERMAN. I can not say that it had any, except to enable the conferees to patch up a little the iron schedule, as I have already stated. But their withdrawal gave the Republican conferees the opportunity of reporting and proposing a thoroughly protective tariff bill, just and harmonious in all its rates.

Again he said:

The conferees would not take this responsibility, and accordingly left the rates named and some others palpably unjust, and have opened the door to contests in the future. If these errors had been corrected the bill would have received every Republican vote in the Senate. The struggle over the bill proved that the Democratic party was hostile to the policy of protection, though occasionally a Democratic Senator voted with us to protect his local industry. The system must stand or fall with the Republican party. We might, in the way stated, have made a square political issue, which I always prefer to do rather than to lean on my political adversaries for occasional votes.

Mr. MORRILL answered Mr. SHERMAN, in a labored article, dated April 28, and published in the New York Tribune. He confesses and avoids the truth of the charges. His main defense is that Mr. SHERMAN was as deep in the mud as he was in the mire. Both did their best to show their want of due respect for the expressed will of the Senate, although neither of them had any right to undertake the task of sustaining the action of the body that appointed them, unless they were determined to maintain and uphold its action by every honorable means, whether they approved it or not. It is painfully apparent from their own statements that neither of them either did so or attempted to do so. Mr. MORRILL says:

The distinguished Senator is a remarkably cool and sagacious man, but he was evidently in a pet, and by this time he will regret some of his rather exaggerated and hasty statements. He criticises the fact that two members of the conference committee were from New England, and would seem to indicate that this brought to bear a malign sectional influence, forgetting that two of the members of the conference committee were from the State of Ohio alone, and perhaps, too, sensitively remembering that the large increase of duties on plain white crockery-ware had never been insisted upon in the Senate by New England.

Again, he says:

But the Senator complains that the duties on woolens were raised in the conference committee; so they were on pig and bar iron.

Again, he says:

Only a proviso was inserted in the conference committee by which a special class of cotton cloth should be subject to a duty of 40 per cent., which is the same or a little less than the existing law.

And adds:

This is not much above the rate fixed on pig-iron, and can hardly be called a local favor.

These interviews show that the conferees, so called, paid no sort of respect to the wishes of the two Houses. They made the tariff which we are now cursed with to suit themselves. One accuses the other of increasing the burdens on cotton and woolen goods, and the other retaliates by charging his accuser with having increased the taxes on earthenware, pig and bar iron, and other things in the iron schedule which the Senate had over and over again defeated him in when he attempted to impose them upon the country on this floor.

Mr. MORRILL adds:

The Senator sought to raise in the Senate the rates fixed in committee on pig-iron, and, not succeeding, he joined Senator BROWN, of Georgia, in cutting down generally the rates upon bar-iron and upon steel railway bars; for as he correctly observes, "a single Republican Senator voting with the Democrats could reduce the duty." A restoration of these rates, even in a committee of conference, was an unpromising risk. If any one was more responsible than Senator SHERMAN for making the "harmony and symmetry of the plan" of the commission's iron schedule "as rough as a saw" I do not remember it.

He was right in saying that—

A restoration of these duties even in such a conference committee, was an unpromising risk.

The Senate bill had passed on the 22d day of February by a vote of 42 to 19, yet the conference report was passed by a vote of only 32 to 31.

I hope these articles in the Commercial Gazette and Tribune, both of which are on file in the Library of Congress, will be carefully studied, as they throw much light upon the spirit that animated the Senate conferees. When they are examined the country will not appreciate the remark made by the Senator from Ohio on the floor of the Senate, within the last few weeks, that the action of the Democratic Senators in refusing to take part in that conference was the most cowardly act he had ever known. The refusal was simply a protest by Democrats against being used to give countenance to or a semblance of acquiescence in what was known to be an effort to overrule the action of the Senate, and not to sustain it.

Mr. MORRILL might very well observe in this interview that the restoration of these duties even in such a conference committee was an unpromising risk, because if Senators had known half of what had been done against their known wishes by their own conferees, instead of the bill being passed, as it was, by a vote of 32 to 31, it would have been defeated by an overwhelming majority, and the condemnation of the conference would have been too pronounced even for them to have ventured into the newspapers to quarrel over their action. Perhaps the worst part of their conduct was not referred to by either of them, and that was in regard to the duties on sugar.

The House had never acted upon that schedule, as their bill shows, but the Senate had in the most emphatic manner determined that the tax on sugar between No. 13 and No. 16 Dutch standard should not exceed $2.40 per 100 pounds. It had fixed the tax on sugar under No. 13 Dutch standard at a satisfactory rate; but that class of sugar was simply raw material for the refiner, not being used in any form except by them, and $2.40 was, by a yea-and-nay vote of the Senate, as is shown by the RECORD, after full discussion, fixed as the proper tax upon sugar between 13 and 16 Dutch standard. Mr. MORRILL and others protested that it was too low, and that foreign competitors would interfere with domestic refiners.

Some of us who had strongly urged $2.40 as a proper rate, believing that it might possibly cripple our domestic refiners in their operations, agreed to $2.50, after being assured by Senators on the other side, especially by Senator MORRILL, that $2.50 per hundred would be entirely satisfactory. I hope the record of that debate will be turned to. It will be found on pages 2548 to 2555 of the RECORD of that session. Yet the conference committee deliberately increased the rate of taxation upon imported sugar between 13 and 16 to $2.75 per hundred, thereby giving to the sugar refiner an absolute monopoly of the sugar-refining business. They thus laid the foundation for the trusts which have been so much and so justly complained of by the country against the domestic refiners of sugar. That act on the part of the Senate conference, which was not only wholly unjustifiable and unwarranted but in violation of pledges they had given, has cost the consumers of sugar in this country not less than $80,000,000, while the fact that they had made such a change in the conference committee was carefully concealed from the Senate, as the record will show.

In the face of facts like these, and these are only the outlines, it is absurd for the Republican leaders to contend that they are now paying or ever have paid any regard to the interests of the tax-payers or the consumers of the country.

Of course, after the passage of that act, the surplus revenue continued to accumulate in the Treasury until all the bonds that could be paid at par were paid off. Not less than $700,000,000 in excess of all the requirements of the sinking fund was paid in the redemption of the principal of the public debt, yet there is at this time almost enough idle money in the Treasury to pay off every dollar that can be paid off until 1907, when the last of our indebtedness, amounting to a fraction over $700,000,000, matures, and we are compelled by law to-day either to lock up the surplus money in the Treasury or to pay to the holders of our bonds any premium they see fit to ask in order to keep the money of the people in circulation for their use.

We are now absolutely at the mercy of any combination the bondholders may make. There is no longer even a decent pretext for the maintenance of any law providing for a sinking fund, which now exceeds $50,000,000 a year, as no man will pretend that we made any agreement to pay the bondholder one dollar of premium upon the bonds he holds; yet the premium upon the 4 percents has in-

creased in the last six months from 124 to 130, and as time goes on will continue to increase, and the Republican candidate for the Presidency, in his letter of acceptance, is urging and demanding that that premium shall be paid to them, although they have no claim, legal or equitable, whatever to it, and are only receiving it now because of the opposition the Republicans are making to the demand of the President for the reduction of taxation so as to make the payment of such premium unnecessary.

Never before has the Republican party boldly avowed its purpose to license the manufacturers of the country to force the people—all the people—of the United States, whether the Government needs revenue or not, to pay them $147 for every $100 worth of their products which the people at large are compelled to have. Never before was the avowal boldly made in a party platform that the American market should be controlled by American manufacturers, by trusts, and combinations, to suit themselves, and that Congress should by law prevent our citizens from buying with their own money what they needed, except from them and at their prices.

Individual members of Congress, I admit, have advocated protection for protection's sake, and have said that, independently of revenue and regardless of public needs, they would maintain tariff taxation for the protection of American manufacturers. Local partisan leagues and neighborhood conventions, and such newspapers as are owned or subsidized by protected organizations, have demanded taxation for protection's sake; but until now the platforms of all former Republican conventions have demanded that taxation should be confined to the amount needed for revenue, only asking that within that limit it should be adjusted so as incidentally to protect American manufacturing industries and the labor employed therein. I need not quote from them. The facts I state can not be successfully denied, as the former platforms have been made part of the record time and again in the debate in the House of Representatives and elsewhere.

The bills now presented by the respective political organizations are infinitely more important in the principles they represent than in the amount of taxation they propose to remove measured merely in money. The Democrats seek cautiously and prudently to reduce all taxation to the revenue standard, so as to take from the people nothing except for public uses and purposes, and only such an amount as is needed to support an economically administered Government, at the same time taking care that no injury is done to any domestic industry, even though unduly stimulated by protection, on whose success the employment of any considerable portion of our own people depends. They seek to aid our manufacturers, by cheapening, wherever it is possible, the raw materials from which finished products are made, so that the markets for them may be enlarged and extended to other countries, and steadier employment, which extended sales necessarily give, be furnished to those who produce them. We seek thus to enable all of our people to obtain what they need or those products with a less expenditure of the money they have earned in their various occupations than they can now.

The Democratic party will cease to exist whenever it fosters monopoly, or legislates to enrich the few out of the hard earnings of the many, or in any way promotes class legislation. Its object and purpose is, always has been, and always must be, to oppose all schemes, however specious, and all legislation, however plausible, that takes the money earned by one class of citizens and gives it to another. Of course it can never command the support of the combinations of wealth that seek to enrich themselves by law out of the earnings of other people; therefore it has no promises of special advantages to make to its supporters. It can only appeal to the manhood of men to stand by and support a political organization pledged to secure to them equal rights and privileges with all other men, and to resist all the combinations organized to obtain by legislation undue advantage over their fellow-citizens.

If the Republic is to last and realize the hopes of its founders, it must be on the basis of securing equal rights to all, granting exclusive privileges to none. Every department of the Government must be limited to the just exercise of the powers specially granted to it, and each Representative, whether of States or people, must be made to recognize the fact that this Government is only a trustee, with limited powers, and that he is only the servant of the people who place him where he is and pay him for his work out of their earnings.

It can not be too often repeated that this Government is simply a trustee, and has not, and can not, get a dollar except what it takes by taxation in some form or other, directly or indirectly, from the people who earn it; that one legitimate industry is as honorable and as much entitled to protection as another; and that all taxes shall be uniform, and must be imposed to pay the debts and provide for the common defense and general welfare of the United States. All our courts, State and Federal, have decided that all taxation must be confined to public uses and purposes, in terms so emphatic, and with such clearness of statement and aptness of illustration that no strength can be added by amplification to what they have so repeatedly decided.

I have given extracts and references to these decisions elsewhere in this report which prove the truth of my assertions, that taxation, to be legal or even honest, must be for public purposes only, and that all class legislation, whether in the form of protection or subsidy, which takes by taxation from the people the money they have earned, or deprives them of the right to use it to the best advantage to themselves in procuring what they need, in order to enrich a favored class, is legalized robbery. The voters of the country will have to settle the question between the contending parties this fall, whether they want to do so or not. The issue is made, and has come to stay. It can be neither avoided nor evaded; it looks to a permanent policy on one basis or the other. The Republican party has moved forward with rapid strides in its assertion of the power of Congress and its right to impose taxes for other than public uses. They no longer hesitate to avow their purpose to force all the consumers of home-made manufactured goods to pay any price home producers or, more properly, home-machine owners demand, by taxing all similar goods made elsewhere so high as to prohibit our people from buying them, under the pretense that they are protecting the "home market." Of course, they simply protect the home seller and thus rob the home buyer; and as the buyers are at least one hundred times more numerous than the sellers, they propose, under the forms of law, to rob one hundred of our citizens to enrich one. They illustrate the principle so aptly stated by Hallam in his History of the Middle Ages:

> We find in the history of all usurping governments, time changes anomaly into system and injury into right. Examples beget custom and custom ripens into law; and the doubtful precedents of one generation become the fundamental maxims of another.

At last, and for the first time, the American people are distinctly called upon, each man for himself, to decide whether the sovereignty, about which so much is said and so little is understood, exists in the individual citizen or in the Congress of the United States. They will, this fall, settle the question, for this generation at least, as conclusively as the late civil war settled the question of secession, whether this is a government of the people, by the people, and for the general welfare of all, or whether it is a paternal government, to be conducted and controlled by Congress to promote such objects and purposes as the majority in Congress from time to time may determine to fasten on the country.

The contest will be none the less earnest because it is waged with ballots instead of bullets, and the result will be none the less conclusive because of its peaceful character. Both parties have put forth candidates worthy of the support of those who advocate the principles they represent, and both sides are organizing, I am happy to say, through national, State, and local clubs, so as to bring out the full strength of their respective organizations.

The questions at issue are as old in principle as the establishment of civil government among men. On the one side will be arrayed, as they always have been, all the organizations and combinations of capital and power that seek wealth by legislation, and especially those who demand from Congress protection by tariff taxation against competition with goods produced abroad, in order that the American consumers of the goods they produce here may be compelled to pay them the prices they demand for the goods they make. On the other side will be arrayed those who deny the power of Congress to grant special privileges to favored classes at the public expense, and who claim that all taxation of the people by their representatives, in whatever form imposed, must be for public purposes, and that it can be imposed only to the extent necessary to support an economically administered government.

Of course there is a large class of voters—far more than enough to determine which party shall win—who, up to this time, have not studied carefully the propositions involved. My hope is that the discussion all over the country this fall will convince the people that their true interests will be best promoted by the success of the Democracy.

Perhaps it is fortunate that the public mind rarely grasps with vigor more than one great public question at a time. When its energies are concentrated on a single vital issue, it ordinarily succeeds in sifting it thoroughly and in separating the grain from the chaff. "Everybody is wiser than anybody," because everybody's interest is that equal justice shall be meted out to all, and that unequal or exclusive privileges shall not be granted to favored classes. Happily for the country there is nothing to distract the public mind from the calm and deliberate consideration of the great issue which the President of the United States deemed so far-reaching and overshadowing as to make it the sole subject to which he directed the attention of Congress in his last annual message, a few extracts from which I propose to quote. The opening sentences are as follows:

To the Congress of the United States:

> You are confronted at the threshold of your legislative duties with a condition of the national finances which imperatively demands immediate and careful consideration.
>
> The amount of money annually exacted, through the operation of present laws, from the industries and necessities of the people largely exceeds the sum necessary to meet the expenses of the Government.
>
> When we consider that the theory of our institutions guaranties to every citizen the full enjoyment of all the fruits of his industry and enterprise, with only such deduction as may be his share towards the careful and economical maintenance of the Government which protects him, it is plain that the exaction of more than this is indefensible extortion and a culpable betrayal of American fairness and justice. This wrong inflicted upon those who bear the burden of national

taxation, like other wrongs, multiplies a brood of evil consequences. The public treasury, which should only exist as a conduit conveying the people's tribute to its legitimate objects of expenditure, becomes a hoarding-place for money needlessly withdrawn from trade and the people's use, thus crippling our national energies, suspending our country's development, preventing investment in productive enterprise, threatening financial disturbance, and inviting schemes of public plunder.

This condition of our Treasury is not altogether new; and it has more than once of late been submitted to the people's representatives in the Congress, who alone can apply a remedy. And yet the situation still continues, with aggravated incidents, more than ever presaging financial convulsion and widespread disaster.

After stating what expedients he had been compelled to resort to in order to avoid national bankruptcy, which must follow the locking of the circulating medium in the public Treasury, he says:

While the expedients thus employed, to release to the people the money lying idle in the Treasury, served to avert immediate danger, our surplus revenues have continued to accumulate, the excess for the present year amounting on the 1st day of December to $55,258,701.19, and estimated to reach the sum of $113,000,000 on the 30th of June next, at which date it is expected that this sum, added to prior accumulations, will swell the surplus in the Treasury to $140,000,000.

There seems to be no assurance that, with such a withdrawal from use of the people's circulating medium, our business community may not in the near future be subjected to the same distress which was quite lately produced from the same cause. And while the functions of our national Treasury should be few and simple, and while its best condition would be reached, I believe, by its entire disconnection with private business interests, yet when, by a perversion of its purposes, it idly holds money uselessly subtracted from the channels of trade, there seems to be reason for the claim that some legitimate means should be devised by the Government to restore in an emergency, without waste or extravagance, such money to its place among the people.

The President, of course, advises Congress that there is but one honest and just way to obviate the evils and right the wrongs which confessedly exist, and that is to reduce the taxation needlessly and therefore wrongfully imposed upon the people by existing laws, to the annual requirements of an economically administered Government. I again quote, as no man in all the debate in either House of Congress or elsewhere has presented the whole question as well as the President has. He says:

Our scheme of taxation, by means of which this needless surplus is taken from the people and put into the public Treasury, consists of a tariff or duty levied upon importations from abroad and internal-revenue taxes levied upon the consumption of tobacco and spirituous and malt liquors. It must be conceded that none of the things subjected to internal-revenue taxation are, strictly speaking, necessaries; there appears to be no just complaint of this taxation by the consumers of these articles, and there seems to be nothing so well able to bear the burden without hardship to any portion of the people.

But our present tariff laws, the vicious, inequitable, and illogical source of unnecessary taxation, ought to be at once revised and amended. These laws, as their primary and plain effect, raise the price to the consumers of all articles imported and subject to duty, by precisely the sum paid for such duties. Thus the amount of the duty measures the tax paid by those who purchase for use these imported articles. Many of these things, however, are raised or manufactured in our own country, and the duties now levied upon foreign goods and products are called protection to these home manufactures, because they render it possible for those of our people who are manufacturers to make these taxed articles and sell them for a price equal to that demanded for the imported goods that have paid customs duty. So it happens that while comparatively a few use the imported articles, millions of our people, who never used and never saw any of the foreign products, purchase and use things of the same kind made in this country, and pay therefor nearly or quite the same enhanced price which the duty adds to the imported articles. Those who buy imports pay the duty charged thereon into the public Treasury, but the great majority of our citizens who buy domestic articles of the same class pay a sum at least approximately equal to this duty to the home manufacturer. This reference to the operation of our tariff laws is not made by way of instruction, but in order that we may be constantly reminded of the manner in which they impose a burden upon those who consume domestic products as well as those who consume imported articles, and thus create a tax upon all our people.

It is not proposed to entirely relieve the country of this taxation. It must be extensively continued as the source of the Government's income; and in a readjustment of our tariff the interests of American labor engaged in manufacture should be carefully considered, as well as the preservation of our manufacturers. It may be called protection or by any other name, but relief from the hardships and dangers of our present tariff laws should be devised with especial precaution against imperiling the existence of our manufacturing interests. But this existence should not mean a condition which, without regard to the public welfare or a national exigency, must always insure the realization of immense profits instead of moderately profitable returns. As the volume and diversity of our national activities increase new recruits are added to those who desire a continuation of the advantages which they conceive the present system of tariff taxation directly affords them. So stubbornly have all efforts to reform the present condition been resisted by those of our fellow-citizens thus engaged that they can hardly complain of the suspicion, entertained to a certain extent, that there exists an organized combination all along the line to maintain their advantage.

Again, he says:

By the last census it is made to appear that of the 17,392,099 of our population engaged in all kinds of industries, 7,670,493 are employed in agriculture, 4,074,238 in professional and personal service (2,934,876 of whom are domestic servants and laborers), while 1,810,258 are employed in trade and transportation, and 3,837,112 are classed as employed in manufacturing and mining.

For present purposes, however, the last number given should be considerably reduced. Without attempting to enumerate all, it will be conceded that there should be deducted from those which it includes 375,143 carpenters and joiners, 285,401 milliners, dressmakers, and seamstresses, 172,726 blacksmiths, 133,756 tailors and tailoresses, 102,473 masons, 76,241 butchers, 41,309 bakers, 22,083 plasterers, and 4,891 engaged in manufacturing agricultural implements, amounting in the aggregate to 1,214,023, leaving 2,623,089 persons employed in such manufacturing industries as are claimed to be benefited by high tariff.

* * * * * * *

To these the appeal is made to save their employment and maintain their wages by resisting a change. There should be no disposition to answer such suggestions by the allegation that they are in a minority among those who labor, and therefore should forego an advantage, in the interest of low prices for the majority; their compensation, as it may be affected by the operation of tariff laws, should at all times be scrupulously kept in view; and yet with slight reflection they will not overlook the fact that they are consumers with the rest; that they, too, have their own wants and those of their families to supply from their earnings, and that the price of the necessaries of life, as well as the amount of their wages, will regulate the measure of their welfare and comfort.

But the reduction of taxation demanded should be so measured as not to necessitate or justify either the loss of employment by the working man nor the lessening of his wages; and the profits still remaining to the manufacturer, after a necessary readjustment, should furnish no excuse for the sacrifice of the interests of his employés either in their opportunity to work or in the diminution of their compensation. Nor can the worker in manufactures fail to understand that while a high tariff is claimed to be necessary to allow the payment of remunerative wages, it certainly results in a very large increase in the price of nearly all sorts of manufactures, which, in almost countless forms, he needs for the use of himself and his family. He receives at the desk of his employer his wages, and perhaps before he reaches his home is obliged, in a purchase for family use of an article which embraces his own labor, to return in the payment of the increase in price which the tariff permits the hard-earned compensation of many days of toil.

I will give only one more extract, and I may say that the whole argument is so able, cogent, and condensed that it is almost impossible to select any portion of it without impairing the strength and marring the harmony of the whole. He, at least, will not be accused of evasion or cowardice in the presentation of his views and recommendations. If any President ever satisfied the American people that he subordinated private ends to public interests, and had the courage to express his convictions, regardless of personal consequences, President Cleveland in this message, in his veto of the dependent pension bill, and in his enforcement of absolute integrity in the conduct of public officials, high and low, has satisfied them that he is acting with an eye single to the public good. He can say, as the Marquis of Montrose said to those who urged temporizing measures on him as the safest:

He either fears his fate too much,
Or his deserts are small,
Who dares not put it to the touch,
And win or lose it all.

I have an abiding faith that the American people will indorse the closing paragraph of the message. It answers all the claptrap about protection and free trade, and nobody can deny the truth of it.

It is not apparent how such a change can have any injurious effect upon our manufacturers. On the contrary, it would appear to give them a better chance in foreign markets with the manufacturers of other countries, who cheapen their wares by free material. Thus our people might have the opportunity of extending their sales beyond the limits of home consumption—saving them from the depression, interruption in business, and loss caused by a glutted domestic market, and affording their employés more certain and steady labor, with its resulting quiet and contentment.

The question thus imperatively presented for solution should be approached in a spirit higher than partisanship and considered in the light of that regard for patriotic duty which should characterize the action of those intrusted with the weal of a confiding people. But the obligation to declared party policy and principle is not wanting to urge prompt and effective action. Both of the great political parties now represented in the Government have, by repeated and authoritative declarations, condemned the condition of our laws which permit the collection from the people of unnecessary revenue, and have, in the most solemn manner, promised its correction; and neither as citizens or partisans are our countrymen in a mood to condone the deliberate violation of these pledges.

Our progress toward a wise conclusion will not be improved by dwelling upon the theories of protection and free trade. This savors too much of bandying epithets. It is a *condition* which confronts us—not a theory. Relief from this condition may involve a slight reduction of the advantages which we award our home productions, but the entire withdrawal of such advantages should not be contemplated. The question of free trade is absolutely irrelevant; and the persistent claim made in certain quarters, that all efforts to relieve the people from unjust and unnecessary taxation are schemes of so-called free-traders, is mischievous and far removed from any consideration for the public good.

The simple and plain duty which we owe the people is to reduce taxation to the necessary expenses of an economical operation of the Government, and to restore to the business of the country the money which we hold in the Treasury through the perversion of governmental powers. These things can and should be done with safety to all our industries, without danger to the opportunity for remunerative labor which our workingmen need, and with benefit to them and all our people, by cheapening their means of subsistence and increasing the measure of their comforts.

I know that epithets are not arguments, and that denunciation on one side or the other does not establish either a principle or a fact. But the Supreme Court of the United States and the courts of the several States have denounced taxation in all its forms, when imposed to protect or build up manufacturing interests and industries, or for any purpose other than for public use in running the necessary machinery of the Government, as spoliation and legalized robbery. I can therefore afford to use the same language. I said, in a speech made in the Senate on the 20th of March, 1882:

In the case of the Loan Association *vs.* Topeka, in 20 Wallace, 657, Judge Miller, delivering the opinion of the court, stated the doctrine in language that has been repeated over and over again, but it will bear repetition. An attempt was made to tax the people of the city of Topeka under the authority given by an act of the Legislature so as to issue one hundred bonds of $1,000 each to establish the King Wrought Iron Bridge Manufacturing and Iron Works Company of Topeka, and to aid in encouraging that company in establishing and operating bridge shops in said city in pursuance of an act of the Legislature, which had plenary power, certainly as much power as the Congress of the United States has under the limited power given in the Constitution, which is to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States. Certainly, the power of the Legislature that imposed the tax is as broad as the power we have, as all power not granted is reserved in the Constitution to the States and the people. The people of Topeka refused to pay the interest upon the bonds. Suit was brought. The case came to the Supreme Court of the United States, and Judge Miller in delivering the opinion of the court uses this language:

"The power to tax is, therefore, the strongest, the most pervading of all the powers of the Government, reaching directly or indirectly to all classes of the people. It was said by Chief-Justice Marshall, in the case of McCulloch *vs.* The State of Maryland, that the power to tax is the power to destroy. A striking instance of the truth of the proposition is seen in the fact that the existing tax of 10 per cent. imposed by the United States on the circulation of all other banks than the national banks drove out of existence every State bank of circulation

within a year or two after its passage. This power can as readily be employed against one class of individuals and in favor of another, so as to ruin the one class and give unlimited wealth and prosperity to the other, if there is no implied limitation of the uses for which the power may be exercised. To lay with one hand the power of the Government on the property of the citizen, and with the other to bestow it upon favored individuals to aid private enterprises and build up private fortunes, is none the less robbery because it is done under the forms of law and is called taxation. This is not legislation. It is a decree under legislative forms. Nor is it taxation.

"'A tax,' says Webster's Dictionary, 'is a rate or sum of money assessed on the person or property of a citizen by government for use of the nation or State.' 'Taxes are burdens or charges imposed by the legislature upon persons or property to raise money for public purposes.' Coulter, J., in Northern Liberties *vs.* St. John's Church, says very forcibly: 'I think the common mind has everywhere taken in the understanding that taxes are a public imposition, levied by authority of the Government for the purpose of carrying on the Government in all its machinery and operations—that they are imposed for a public purpose.'"

In that case he calls attention to a very large number of authorities. Judge Miller says further:

"If it be said that a benefit results to the local public of a town by establishing manufactures, the same may be said of any other business or pursuit which employs capital or labor. The merchant, the mechanic, the innkeeper, the banker, the builder, the steam-boat owner, are equally promoters of the public good, and equally deserving the aid of the citizens by forced contributions. No line can be drawn in favor of the manufacturer which would not open the coffers of the public treasury to the importunities of two-thirds of the business men of the city or town."

The supreme court refer with approbation to cases decided from the State of Maine, embracing exactly the same principle, that whether taxation is in the form of a direct tax or in any other form, it makes no difference; whenever property may be seized or levied on to enforce the payment of the burden imposed on property it is as much a tax in one form as in another, and all men whose opinions are entitled to any respect admit that the tariff is nothing but a tax. But when it is imposed for revenue purposes I agree that it is constitutional; when it is laid for subsidy or the protection of special interests, I insist it is unconstitutional, null, and void. In that I am fully sustained by the very able opinions by all the judges of the State of Maine, delivering opinions *seriatim* when questions were propounded to them by the State Legislature. (See 58 Maine Reports, page 590, etc.) The leading question was:

"Has the Legislature authority under the constitution to pass laws enabling towns, by gift of money or loan of bonds, to assist individuals or corporations to establish or carry on manufacturing of various kinds within or without the limits of said towns?"

The judges took up the question submitted to them. Among other things, the three judges who signed the first opinion, Chief-Justice Appleton, Judge Walton, and Judge Danforth, used language some of which I will read. They said:

"Taxes are the enforced proportional contribution of each citizen out of his estate, levied by authority of the state for the support of the government and for all public needs. They are the property of the citizen taken from the citizen by the government, and they are to be disposed of by it.

"There is nothing of a public nature any more entitling the manufacturer to public gifts than the sailor, the mechanic, the lumberman, or the farmer. Our Government is based upon equality of rights. All honest employments are honorable. The State can not rightfully discriminate among occupations, for a discrimination in favor of one branch of industry is a discrimination adverse to all other branches. The State is equally to protect all, giving no undue advantage or special and exclusive preference to any."

That opinion of the judges of Maine is a complete answer to the arguments made by leading Republican Senators, that if there was no revenue required, no pension list, no Army, no Navy, they would still protect manufactures, and would exact taxes by legislation from the mass of the people for the benefit of private parties, in order to enable them to sell goods at high prices so that they may carry on their business profitably. The judges of Maine proceed to say:

"No public exigency can require private spoliation for the private benefits of favored individuals. If the citizen is protected in his property by the Constitution against the public, much more is he against private rapacity."

Congress has only to make one more turn of the protection wheel and make the tax for the benefit of the now highly protective monopolies absolutely prohibitory. Will any Senator say that if the Congress of the United States shall pass an act providing that "in order to encourage Andrew Carnegie and his associates," who are already protected by patents against all the people of the United States, "we will prohibit the introduction of foreign Bessemer steel rails into the United States," that the courts would not declare that act unconstitutional? Yet we have very nearly done it. The chances are that it will soon become a prohibitory tax at $14 a ton. Again the court say, and I hope what they say may be carefully considered by the people:

"If it were proposed to pass an act enabling the inhabitants of the several towns by vote to transfer the farms or the horses or oxen, or a part thereof, from the rightful owners to some manufacturer whom the majority might select, the monstrousness of such proposed legislation would be transparent. But the mode by which property would be taken from one or many and given to another or others can make no difference in the underlying principle. It is the taking that constitutes the wrong, no matter how taken. Whether the cow or the ox be taken from the unwilling owner and given to a manufacturer, or the gift be of money obtained by a sale made by the collector, or by the payment of the tax to avoid such sale, does not and can not change the principle. In either case the cow or the ox or the value thereof is taken from the owner and is given away by others without the owner's consent. If a part of one's estate may be given away, another and another portion may, upon the same principle, be given away until all is gone. What is this but manifest and undisguised spoliation?"

Each of the other judges gave substantially the same opinion, in different language, of course; but each of them pronounced it legislative robbery, their language being quite as denunciatory as any used on this floor by any of us. Judge Dickerson uses this language:

"What claim has manufacturing to such preference over other branches of industry, commerce, trade, agriculture, and the mechanic arts? These are honorable and beneficial pursuits, and the constitution of this State will be searched in vain to find any powers given to the Legislature to authorize towns and cities to discriminate against these employments and in favor of manufacturing in the matter of taxation. If municipal corporations may assess a tax upon their citizens by authority of law to encourage one, it may each and all the branches of necessary industry, and the question is reduced to this: Has the Legislature the constitutional authority to authorize the towns and cities in this State to tax their inhabitants for the purpose of aiding, establishing, or carrying on, not only manufacturing properly so called, but also farming, ship-building, trading, innkeeping, printing, banking, insurance, and any other branch of beneficial industry?"

When another case came up afterwards, which is reported in 60 Maine, "Allen *vs.* Inhabitants of Jay," the chief-justice decided a similar question. The authorities, under an act of the Legislature, had attempted to grant aid to a manufacturing company, or to a saw-mill that was about to be established. The judge said in that case:

"Taxation, by the very meaning of the term, implies the raising of money for public uses, and excludes the raising if for private objects and purposes. 'I concede,' says Black, C. J., in Sharpless *vs.* Mayor, 21 Pennsylvania, 167, 'that a law authorizing taxation for any other than public purposes is void.' 'A tax,' remarks Green, C. J., in Camden *vs.* Allen, 2 Dutch., 839, 'is an impost levied by authority of government upon its citizens or subjects for the support of the state.'

"'No authority or even dictum can be found,' observes Dillon, C. J., in Hanson *vs.* Vernon, 27 Iowa, 28, 'which asserts that there can be any legitimate taxation when the money to be raised does not go into the public treasury, or is not destined for the use of the government or some of the governmental divisions of the state.'

"If there is any proposition about which there is an entire and uniform weight of judicial authority, it is that taxes are to be imposed for the use of the people of the state in the varied and manifold purposes of government, and not for private objects or the special benefit of individuals. Taxation originates from and is imposed by and for the state.

"The idea seems to be that thereby capital would be created. But such is not the case. Capital is the saving of past earnings ready for productive employment. The bonds of a town may enable the holder to obtain money by their transfer, as he might do by that of any good note. But no capital is thereby created. It is only a transfer of capital from one kind of business to another.

"The industry of each man and woman engaged in productive employment is of 'benefit' to the town in which such industry is employed. This can be predicated of all useful labor, of all productive industry. But because all useful labor, all productive industry, conduces to the public benefit, does it follow that the people are to be taxed for the benefit of one man or of one special kind of manufacturings?

"The sailor, the farmer, the mechanic, the lumberman, are equally entitled to the aid of coerced loans to enable them to carry on their business with Messrs. Hutchins & Lane. Our Government is based on equality of right. The state can not discriminate among occupations, for a discrimination in favor of one is a discrimination adverse to all others. While the state is bound to protect all, it ceases to give that just protection when it affords undue advantages, or gives special and exclusive preferences to particular individuals and particular and special industries at the cost and charge of the rest of the community.

"Where is the difference between the coerced contribution of the tax-gatherer to be loaned to individuals for their benefit and those of the conqueror from the inhabitants of the conquered country?"

I can add nothing to strengthen the emphatic condemnation pronounced by the highest judicial authorities of the land against all schemes of taxation and all devices and pretexts whereby either manufacturing or other favored interests are sought to be subsidized, protected from competition, or built up by taxation imposed upon the people for their benefit.

Every utterance applies with full force on the position now assumed by the Republican party in its platform on the measure before the Senate.

The leading statesmen of the country have always reprobated the taxation of all the people in the interests of favored classes. Mr. Webster, in the great debate in the House in 1824, said:

Gentlemen tell us that they are in favor of domestic industry; so am I. They would give it protection; so would I. But then all domestic industry is not confined to manufactures. The employments of agriculture, commerce, and navigation are all branches of the same industry; they all furnish employment for American capital and American labor. And when the question is, whether new duties shall be laid for the purpose of giving further encouragement to particular manufactures, every reasonable man must ask himself both whether the proposed new encouragement be necessary and whether it can be given without injustice to other branches of industry.

These are questions which the American people are at last beginning to consider very carefully.

Mr. Webster further said:

I will now proceed, sir, to state some objections in a more general nature to the course of Mr. Speaker's observations. He seems to me to argue the question as if all domestic industry were confined to the production of manufactured articles; as if the employment of our own capital and our own labor, in the occupations of commerce and navigation, were not as emphatically domestic industry as any other occupation. Some other gentlemen in the course of the debate have spoken of the price paid for every manufactured article as so much given for the encouragement of foreign labor to the prejudice of our own. But is not every article the product of our own labor as truly as if we had manufactured it ourselves? Our labor has earned it and paid the price for it. It is so much added to the stock of national wealth. If the commodity were dollars nobody would doubt the truth of this remark; and it is precisely as correct in its application to any other commodity as to silver.

One man makes a yard of cloth at home; another raises agricultural products and buys a yard of imported cloth. Both these are equally the earnings of domestic industry, and the only questions that arise in the case are two: The first is, which is the best mode, under all the circumstances, of obtaining the article? The second is, how far this question is proper to be decided by Government and how far it is proper to be left to individual discretion? There is no foundation for the distinction which attributes to certain employments the peculiar appellation of American industry; and it is, in my judgment, extremely unwise to attempt such discriminations.

We are asked, what nations have ever attained eminent prosperity without encouraging manufactures? I may ask, what nation ever reached the like prosperity without promoting foreign trade? I regard these interests as closely connected, and am of opinion that it should be our aim to cause them to flourish together. I know it would be very easy to promote manufactures at least for a time, but probably for a short time only, if we might act in disregard of other interests. We could cause a sudden transfer of capital and a violent change in the pursuits of men. We could exceedingly benefit some classes by these means. But what then becomes of the interests of others?

For my part I see very little relief to those who are likely to be deprived of their employments, or who find the prices of the commodities which they need, raised, in any of the alternatives which Mr. Speaker has presented. It is nothing to say that they may, if they choose, continue to buy the foreign article; the answer is, the price is augmented; nor that they may use the domestic article; the price of that is also increased. Nor can they supply themselves by the substitution of their own fabric. How can the agriculturist make his own iron? How can the ship-owner grow his own hemp?

These views are as applicable to the measures and propositions now pending as they were then, and the men of America will indorse and support them.

General Garfield, in a speech in the House of Representatives in 1870, describing the American industries that were entitled to protection, said:

We are limited in our tariff legislation by two things: first, the demands of the Treasury; and second, the wants and demands of American industry. I reject that narrow view which considers industry any one particular form of labor. I

object to any theory that treats the industries of the country as they were treated in the last census, when we had one schedule for agriculture and another for industry, as though agriculture was not an industry, as though commerce and trade and transportation were not industries. American industry is labor in any form which gives value to the raw materials or elements of nature, either by extracting them from the earth, the air, or the sea, or by modifying their forms, or transporting them through the channels of trade to the markets of the world, or in any way rendering them better fitted for the use of man. All these are parts of American industry, and deserve the careful and earnest attention of the Legislature of the nation. Wherever a ship plows the sea, or a plow furrows the field; wherever a mine yields its treasure; wherever a ship or a railroad train carries freight to market; wherever the smoke of a furnace rises, or the clang of the loom resounds; even in the lonely garret where the seamstress plies her busy needle—there is industry. (Volume 13, part 6, RECORD, July 14, 1882, page 6034.)

Volumes might be filled with extracts from the speeches and writings of every leading statesman of the country of all shades of political opinion condemning the policy now advocated by the Republican leaders, but I am content to stand on the decision of the courts and the opinions of the eminent men from whom I have quoted.

Turning to the discussion of the general proposition, it may be truthfully said that when the arguments of the ablest and fairest advocates of the protective-tariff system are analyzed, they are all based on the false assumption that the tax is paid by foreigners, or is imposed on goods imported to prevent foreigners from taking advantage of the cheap pauper labor employed by them in the production of their goods, and to protect American laborers, who receive higher wages here in the production of like articles, against such degrading competition.

The truth is, as the President very clearly shows, that the American consumer not only pays every dollar of the tariff tax imposed on goods imported, but he pays a price equal to the foreign price, with the tariff tax added, on all similar goods manufactured in this country; and, as four-fifths, on an average, of all such goods consumed here are made at home, and only one-fifth imported, the Government, which collects only the tax on goods imported, gets but one-fifth of the tax, while Congress requires all American consumers to pay the other four-fifths to their protected pets, many members of both Houses of Congress being the beneficiaries; and they patriotically call that protecting American industry.

I know that the leading advocates of protection, among them Senators in carefully prepared speeches, have denied that the price of the home-made product is enhanced to the extent of the tax on the imported goods, but their denial does not alter the fact. Indeed, the protectionists all insist that it is true, and prove it conclusively in their arguments before the committees of Congress when demanding protection on their manufactured goods. For example, wool is the raw material of the woolen manufacturer; pig-iron, of the various iron products; lead, of the paints; tin-plate, of many utensils; and so through the list.

In every instance the home manufacturer of more advanced fabrics of wool, iron, lead, and all else claims and obtains protection on the finished products, based on the assumption that his raw material is enhanced in price to him to an amount equal to its foreign price with the tariff tax added; and he proves it, as I said, conclusively, by showing that he buys a portion, often a large portion, of his raw materials abroad, and pays the tariff tax on it, in preference to buying it from the producer here, solely on the ground that the home producer asks him more than the foreign price of the same article with 50 per cent. tariff tax added.

Of course he asserts his right to buy where it costs him the least money; and if that is true of such purchases made by men who buy abroad what in their business is raw material, out of which to manufacture more finished products (and they all prove that it is)—and I may add that our tariff laws are all based on the assumption that it is—why, I ask, is it not equally true in regard to all purchases of imported goods, whether purchasers intend to consume them in the shape in which they are imported, or to change their character by additional labor after they obtain them? The purpose for which imported goods are bought cuts no figure in the argument; the fact is incontrovertible that each purchaser buys them for the sole reason that he can buy them and pay the tariff tax on them, and yet get them cheaper than he can buy goods of the same character produced here. If he could not, there would not be a dollar's worth of imported goods sold in this country.

If the advocates of the protective system would tell the truth and avow their purpose to be that no American citizen should be allowed to buy any manufactured article, at home or abroad, unless he pays to people who have no right to any of his money 47 per cent. more for it than it was worth, or more than any citizen of any other country who is allowed to buy like articles in the open markets of the world pays for it, they know that they would shock the people, and their demand to be restored to power to carry out such purposes would be indignantly frowned down. Therefore they adopt the specious and patriotic "rallying cry" of protection against foreign pauper labor, which has deceived thousands of their victims.

There are a few plain tests by which, when applied, the wayfaring man, though a fool, need not err in determining from whom the tariff tax is exacted. That tax is imposed only when goods brought from abroad enter the custom-houses in this country. They are all consumed here. No foreigner consumes a dollar's worth of them. He can get them at the price which the American citizen pays for them, less the 47 per cent. average tariff tax, with freight, insurance, and other costs added, and the importer would make just as much money by selling to the foreigner, before he starts from the foreign port, for 47 per cent. less than he sells to the American, because when he gets 47 per cent. and cost of the voyage more out of our people for the goods sold here he gets back only what he paid at the custom-house.

Every man who has sense enough to know anything knows that the home consumer of imported goods pays the tax, and that foreigners consume none of them; therefore, as the American citizens consume all of them, all the tax is paid by the American consumer. Why does he pay it? Nobody is obliged to buy imported goods when similar goods are manufactured in this country. There can be but one answer, and that I have before stated: the American consumer finds it cheaper to buy imported goods whose price has been increased 47 per cent. by a tax called a tariff than it would be to buy like articles manufactured in the United States at the price the home producer asks for them. He, of course, buys where he can buy cheapest.

Each purchase is an individual one. Neither the Federal Government nor the States, as such, engage in trade. Each man pays the money he has earned by labor of some sort for the things he buys. All limitations imposed on his right to buy what he needs in the cheapest markets are simply means devised, more or less honestly or dishonestly, by Congress, according to the purpose for which they are imposed, to take money out of the consumer's pocket.

The fact that he finds it cheaper and better for him to buy the highly taxed, imported goods than to buy like goods made at home is not only conclusive evidence, but "demonstration strong as proof of Holy Writ," that all goods manufactured here similar to those imported are advanced to the foreign price of the goods, with the American tarift tax and cost of importation added, because, I repeat, if it were not so, no goods could or would be imported.

As the home consumer always buys where he can buy cheapest, whether he uses them as raw materials for more advanced products or for consumption in the shape in which they are imported, his action determines that question, so that no sophistry, however plausible, can controvert the facts established by the purchases made of foreign goods, that the price of like home-made goods is advanced to the point of sharp competition with the foreign-made goods with the tariff tax and cost added, and as it is conceded that at least four-fifths of the goods consumed in this country, which are partly imported and partly made here, are of domestic manufacture, it follows, as the Government gets only the tax on the one-fifth imported. that the domestic manufacturer gets $4 of the enhanced price out of the consumer for every dollar that the Government receives.

The Treasury receives annually about $220,000,000 from tariff taxation. The protected pets of Congress, many of whom are in both Houses voting the people's money into their own pockets, are receiving at least $880,000,000. This is exclusive of all bounties on articles on which there is a high-tariff tax which prohibits importation or which home producers sell here for less than the foreign price with the tax added. In all that large class of products the tax is in fact prohibitory. The Government gets no revenue. The home producers, by trusts and combinations limiting production, forcing idleness or half-time work on their operatives, and maintaining prices a fraction below the foreign price, with the tariff tax and the cost added, pocket all that Congress authorizes them to compel the people to pay. This is the system which the Republican party pledges itself to perpetuate, regardless of revenue, regardless of governmental needs, under the plausible but false pretense that it is protecting American industry and the wages of American laborers.

As it must be obvious that no American consumer would purchase imported goods if they were not offered to him at a lower price than like goods of domestic manufacture are, it is equally obvious that no importer, whether he be a foreign manufacturer, an American merchant, or exporter who takes goods for what he sells abroad, will import goods and pay all charges and 47 per cent. tariff tax on them here unless he can sell them in this market for at least 50 per cent. more than he would be willing to take for them at the place of shipment. He would sell them abroad rather than take less, and he can only sell here by selling his tax-paid goods cheaper than the home producer of like articles sells his product. The markets of the world are open for the sale of foreign products.

There are twenty-five times as many people outside of the United States as there are inside of them. The goods on all markets are the private property of individuals. Foreign governments are not engaged in trade any more than ours. Individual self-interest determines the question where and to what market foreign as well as domestic products will be carried, and while mistakes in regard to prices will sometimes be made, they are reduced to a minimum by the telegraph and the other facilities for obtaining prompt and reliable information in regard to the markets of all countries.

The rule in all trade and mercantile transactions is that goods seek the market in which the seller can get the most money net for his property, after paying all tariff taxes, costs, and charges, just as the buyer buys what he needs, regardless of its place of production, where and from whom he gets it best and cheapest. I therefore insist that no

amount of sophistry can shake or weaken the plain, truthful statement of facts made by the President nor detract from the force of his earnest recommendation that our present vicious, inequitable, illogical, and unnecessary tariff laws ought at once to be revised and amended, because they needlessly, and therefore wrongfully, tax all the people, not only 47 per cent. on the average on all the imported goods they buy above their value in open market, but impose without furnishing any revenue an equal tax on all the goods produced in this country that compete with them in our markets for the exclusive benefit of a few protected manufacturers.

His argument was made overwhelmingly strong when he showed by the official reports of the last census—and the same proportion exists to-day—that out of 17,392,099 of our population engaged in all kinds of industries only 2,623,089 are employed in such manufacturing industries as are, or can be claimed to be, benefited by a high tariff, leaving 14,769,010 to be taxed 47 per cent. on the necessaries of life without any compensation or equivalent, except one dollar out of five paid into the Treasury for the use of the Government, under the pretense that they are thus helping to keep up the wages of about two and a half millions of other laborers, who have themselves to contribute more out of the enhanced price of the things they are compelled to buy, even when they help to make them, than all the enhanced wages they are assumed to receive under so-called protection amounts to.

In the last extract which I read from the President's message he points out with great vigor and clearness the importance of reducing tariff taxation, especially on raw materials, so that our manufactures may be exported to foreign markets and our workmen secure steady employment. I again quote his language:

Thus our people might have the opportunity of extending their sales beyond the limit of home consumption, saving them from depression, interruption in business, and loss caused by a glutted domestic market, and affording their employés more certain and steady labor, with its resultant quiet and contentment.

That is the object which the President avows in his message he seeks above all things to promote. The additions to the free-list and reductions in rates of taxation in the Mills bill are efforts to bring about that result, and I believe the intelligent men of the country outside of the few interested protected combinations will sustain us, and denounce those who seek to delude them, instead of submitting longer to their extortions. The superior intelligence of our operatives will overcome great obstacles. They produce more for the pay they receive than the poorly paid and less intelligent operatives of Europe; and that is the true test of the cost of production to the man who has the products to sell. Three dollars a day to a man who cuts and binds with a machine 10 acres of wheat a day is to his employer cheap, low wages compared to $1 a day to a man who cuts and binds an acre, or 50 cents a day to a man who only cuts and binds half an acre.

The opening of the markets of the world has always been held up, even by those who urged temporary protection to infant industries, as an indispensable prerequisite to commercial prosperity, and by no one more earnestly or ably than the Senator from New York [Mr. EVARTS]. He made a most valuable report as Secretary of State on the "State of Labor in Europe" (see Executive Document No. 5, first session, Forty-sixth Congress), from which I read the following:

There is something in the Republic which gives an individuality to the people of the United States possessed by no other people to such a degree. Our inventive genius in mechanical appliances is original, and at least twenty-five years ahead of Europe. Our people accept innovation; are prepared for it by anticipation. Europeans do not. One workman in the United States, as will be seen from the foregoing extracts, does as much as two workmen in most of the countries of Europe; even the immigrant from Europe attains this progressive spirit by a few years' association with American workmen. We have no oppressed and stupid peasantry, little more intelligent than the tools they handle. All are self-thinking, self-acting, and self-supporting.

Within the last fifteen years we have demonstrated our ability by the brilliant development of our own resources to exclude by honest competition foreign manufactures, to a large extent, from our shores. The question which now peremptorily challenges all thinking minds is how to create a foreign demand for those manufactures which are left after supplying our home demands. We can not stand still, for the momentum of increase will soon become so great that it will push us outward anyway; to push us safely and profitably is of so much importance as to almost overtop all other questions of the hour. The question appeals equally to the selfishness and patriotism of all our citizens, but to the laborer it appeals with tenfold force; for without work he can not live, and unless we can extend the markets for our manufactures he can not expect steady work, and unless our manufacturers can undersell foreign manufacturers we can not enlarge our foreign market.

The first great truth to be learned by the manufacturers and workingmen is that the days of sudden fortunes and double wages are gone. We must realize the fact that ocean steam communication has annihilated distance and brought the nations face to face. This drawing together of the nations means equalization in trade, profits, wages, etc., the advantage being with those who soonest accept the situation and show the most sensible continuity in the new paths of success.

What a contrast is presented between the broad, liberal, and just recommendations of the President, so well sustained and enforced by the report of Secretary Evarts, and the narrow Chinese policy urged by all the present Republican leaders, Senator EVARTS, I fear, included, as adopted by their party in its platform at Chicago. It hardly requires ordinary intelligence to understand that protection means taxation imposed on home consumers sufficient to secure the home market to home manufacturers at their own price, and is a confession that the American manufacturer does not propose to seek for foreign trade or compete with foreign goods in the world's markets.

It surrenders the trade in manufactured articles with all the people of Asia, Africa, Europe, and America, outside of the United States, to foreigners, on condition that the American Congress will prohibit all the people of the United States from buying with the money they worked for (much of which they obtained by selling their products of cotton, wheat, provisions, etc., in foreign unprotected markets in sharp competition with pauper labor), unless they pay to the Congressional bantlings 47 per cent. more than they were offered the same things for in the markets in which they were compelled to sell what they produced. Stripped of its gloss and varnish, this is the issue which the American people must settle next November at the polls. Mr. Evarts in that report sounded the key-note, and the President in his message has cleared away the brush under which the vampires who seek to suck the life-blood of the laboring poor tried to conceal themselves while their victims slept.

I think it will be difficult for the distinguished Senator from New York, or any of his political associates, to convince the Senate or the country that they propose to extend the markets for our manufactures to other countries, which Secretary Evarts justly regarded as so important as to overtop all other questions, and one in which the laborers have tenfold more interest than any other class for the reasons he gave. I quote from the Republican platform. It pledges the party to make—

Such revisions of the tariff laws as will tend to check imports of such articles as are produced by our people, the production of which gives employment to our labor, and release from import duties those articles of foreign production (except luxuries) the like of which can not be produced at home. If there still shall remain a larger revenue than is requisite for the wants of the Government, we favor the entire repeal of the internal taxes rather than surrender of any part of our protective system.

With an average tariff tax now of over 47 per cent., which is up to the highest point of war taxation, when incomes, manufactures, professions, everything, were loaded down with internal-revenue taxes, all of which have been removed, tobacco and spirits alone being now taxed and they at greatly reduced rates, if that platform does not mean that they deliberately propose to surrender the markets of the world to foreign nations for all time to come in order to still further enhance the cost to the American consumers of the goods they produce, I am incapable of construing the English language. If it does not mean increased idleness, half-time employment to labor, encouragement to strikes, and closed factories, to prevent production of a surplus beyond the needs of home consumption, in the limited, high-priced markets which Congress creates and protects, I confess my inability to comprehend its meaning. Yet they profess it is all done in the interest of American labor.

Every man of sense must know that their professions are false. Their demand for protection is necessarily a confession that our manufacturers do not intend to sell their products in competition with other people outside of the United States. Their outside advocates and Congressional partners insist that they will be ruined, if our own people are not prohibited by Congress from buying at home, unless they pay an average tax of 47 per cent. more than they are offered for anywhere outside of the United States, on foreign goods which they would have to compete with in the world's markets without any protection. They have the audacity to assert that the President is a free-trader when he recommends a reduction of the tax upon our people to the amount required for public purposes, and that the Democratic party is banded together against American interests and in the interest of European nations when it demands a reduction of taxation, as it does in the Mills bill, from 47 to 42 per cent. beyond what the people of other countries have to pay.

Either their clamor for protection is false or the pretense that they ever expect to manufacture for other markets than our own is untrue, as wages always have been and always will be higher here than in Europe. Of course, they can sell at home cheaper than they can send abroad and sell. If they can not compete on equal terms with foreign goods at home, how can they do so abroad? When we propose to reduce the taxes on their raw materials, on iron, lead, copper, wool, dyestuffs, and machinery, etc., to enable them to reduce the cost of their products, so that our own people can buy what they need at lower rates, and, by such a reduction of cost, give them a chance to manufacture goods here in such quantities and at such prices that they can be sent abroad and sold in the world's markets, and thus give the labor they employ steady work by increased production for more extended markets, they meet in convention and denounce us as enemies of the country, conspirators with foreign nations against American interests, and demand still further restriction of imports, which means more exorbitant home prices for their goods, the absolute surrender of the American market to them, which, of course, is nothing less than an absolute surrender by them of all the other markets on earth to foreign nations who make similar goods, and to compensate the American people for the robbery they seek to legalize and perpetuate for all time, they generously offer them free whisky and free tobacco.

HOME MARKET.

General Harrison has probably given the Republican platform as careful consideration as any member of his party, and his utterances as to its meaning and as to his purposes in carrying it out, if elected, must be taken as the highest authority. He made a carefully-consid-

ered speech some time ago, which was reported in a friendly newspaper with all the applause which greeted it, a portion of which I read:

> Our party stands unequivocally, without evasion or qualification, for the doctrine that the American market shall be preserved for our American producers. [Great applause.] We are not attracted by the suggestion that we should surrender to foreign producers the best market in the world. Our 60,000,000 of people are the best buyers in the world [applause]; and they are such because our working classes receive the best wages. [Applause.] But we do not mean to be content with our own market. We should seek to promote closer and more friendly commercial relations with the Central and South American states. [Applause.] And what is essential to that end? Regular mails are the first condition of commerce.
>
> The merchant must know when his order will be received and when his consignment will be returned, or there can be no trade between distant communities. What we need, therefore, is the establishment of American steam-ship lines between our ports and the ports of Central and South America. [Applause.] Then it will be no longer necessary that an American minister, commissioned to an American state, shall take an English ship to Liverpool to find another English ship to carry him to his destination. [Applause.] We are not to be frightened by the use of that ugly word "subsidy." [Laughter.] We should pay to American steam-ship lines a liberal compensation for carrying our mails instead of turning them over to British tramp steam-ships.

Nothing illustrates more forcibly the desperate straits to which the Republican candidate for the Presidency is reduced in order to sustain the silly twaddle in his platform than the mass of absurd incongruities contained in the sentences I have read. He does not propose to restore tea or coffee to the tax-list. He would oppose a tax on incomes. He does not suggest any new objects of taxation, and stands with his party in favor of the entire repeal of internal-revenue taxes rather than surrender any part of the protective system. Yet he stands unequivocally, without evasion or qualification, for the doctrine that the American market shall be preserved for our American producers.

He must have sense enough to know that no revenue can be obtained from imports if the American market is reserved to American producers. The official reports show him that, independent of pensions and interest on bonds, which the internal taxes provide for, there remains over $200,000,000 to be provided for mainly by tariff taxation to meet the necessary annual expenses of the Government; therefore he is simply talking nonsense when he so emphatically resolved to exclude all competition from abroad with American manufacturers, and pledges himself hereafter to give them a monopoly of the American market.

General Harrison ought to know, and he does know, if he has read President Cleveland's message to Congress, that the men to whom he proposes to grant absolute control of the American markets constitute less than one-eighth of the American workmen who are engaged in honest industries, even when all their operatives are counted in the protected class, while the real beneficiaries are less than one-eighth of an eighth on the most liberal estimate. I will not do him the injustice to assume that he is ignorant of the fact, which intelligent men everywhere concede, that protection can not protect any product of this country which is raised or prepared for market here cheaper than it can be elsewhere, or is produced in such quantities that our own people can not consume it. Cotton, wheat, beef, pork, provisions, tobacco, oils, and dozens of other things illustrate this. Prohibitory tariff taxation might be imposed on all like products of foreign countries, and it would only injure home producers by preventing an exchange of seeds and crosses of breeds for improvement, except at a few points along our extended frontier.

Take cotton, which employs in its production a very large number of the colored race in nearly all the Southern States. In spite of protection 70 per cent. of that product is annually exported, and must be sold in Liverpool and other foreign markets in sharp competition with like products raised in all parts of the world by the cheapest and most degraded pauper labor. Of course the price of the surplus in the foreign market regulates the price of the whole crop at home as well as abroad. No intelligent man will venture to assert that protection protects the producers of cotton or wheat, yet they are both great legitimate and important American industries, employing more laborers in their production than all the factories in the land, and are, therefore, as much entitled to protection as the product of the furnace, the factory, or the loom. It is absurd to talk about protecting either cotton or wheat, and equally absurd to talk about increasing the consumption of either while the high prices of home manufacturers are maintained so as to limit their products substantially to home consumption.

It is impossible to conceive how any man who lives by farm labor, or the sales of products of the farm can support the Republican party in its crusade against all the industries of the country, except the comparatively few whose machines are engaged in manufacturing goods for home consumption; or how tradesmen, such as bricklayers, carpenters, blacksmiths, and other unprotected occupations, mainly dependent on the prosperity of farm industry, can do so. All intelligent men know that the whole farming industry of this country is, and under our system of taxation must continue to be, paralyzed. Farms covered by mortgages is the rule rather than the exception. Prices of products are regulated by foreign market rates.

Everything that must be sold, has to be sold without protection, while $147 has to be paid on the average to the protected favorites of Congress for every $100 worth of the kind of goods they produce, which the farmer has to buy and pay for with the money he gets in his competition with foreign producers. It is absurd to contend that manufacturers will or can extend the home markets for farm produce if protection is continued at the present or increased rates. Twenty-five years of experience has proved how false all such pretenses are, and every day makes the proof more conclusive.

GENERAL HARRISON ON SUBSIDY.

General Harrison's protected home market, which, he says, is the best in the world (of course it is to the few protected monopolists, but the worst for those who have to buy), means legalized robbery of the masses to enrich a favored class. I have shown that the Supreme Court of the United States and all the courts of the States have so characterized it in terms even stronger than I have used. But General Harrison says: "We do not mean to be content with our own markets," and he urges subsidies for steam-ship lines to Central and South America, so that orders for goods and consignments may be made, and so that American ministers shall not be humiliated by sailing under foreign flags, and British tramps may not handle our mails. All this is simply silly, and yet it was received with great applause.

I hope the question will be frequently asked, during the canvass, how American manufacturers, who declare that they will be ruined and driven out of the home market if the present protective tax of 47 per cent. against competition with like goods manufactured abroad is reduced to 42 per cent., as the House bill proposes, can send their goods to Central and South America, or anywhere else outside of the United States, and sell them in open market in competition with the foreign pauper-made goods against which they demand that a protective tax of 47 per cent. shall be retained in order to enable them to continue their business at home. Either the present tax is an outrageous one or the pretense that they propose to send their products to foreign countries and compete in open, unprotected markets is false. Subsidy, says the Republican platform, and their candidate, General Harrison, says that he is not to be frightened by the use of that ugly word, is the true principle by which our lost carrying trade and foreign commerce in manufactured goods is to be restored and made to flourish.

Let us look at the proposed panacea for a moment. Where is the subsidy to come from? Who is to pay it? Who is to receive it? And what equivalent are those who get it to give in return? Everybody knows that Congress has nothing to give except what it directs the tax-collector to take from the people, and everybody knows that it does not require the wealth of the country as such to contribute a dollar to the support of the Government or to any subsidy it grants. Incomes, bonds, palatial residences, all that the rich enjoy, and the poor only look at and wonder where they came from, are exempt from taxation. Only such things as all men, rich and poor, need and use are taxed. The coachman of the hundred times a millionaire, if he has a wife and family, pays more to support the Government than his employer, if he has no family. Tariff and internal-revenue taxation fills the Treasury. Out of the money so coerced out of the people the subsidies must be paid. Internal taxes are only paid by those who see fit to use whisky, beer, and tobacco, and they are paid by the consumers, rich or poor, in proportion to the quantity used. Every dollar so paid, less a small fraction over 3 per cent., the cost of collection, goes into the Treasury, to be used for subsidies or legitimate expenditures of the Government, as Congress may direct.

The internal-revenue taxes have become very odious lately to the Republican leaders, mainly because none of them go into their pockets; whereas under the system of tariff taxation they pocket at least $5 for every dollar that reaches the Treasury, as over five times as many of the goods consumed are produced here as are imported, and the Government only gets the tax on the one-fifth brought from abroad. Of course it only gets that much, as I have shown, because the individual purchaser finds on examination, and each man examines and decides on each purchase for himself, that it is cheaper for him to pay the foreign price and the tax than it is to pay the price the home manufacturer asks.

That system of taxation is held in high esteem by its beneficiaries and advocates, and General Harrison is so anxious to maintain it, that he proposes to abandon the collection of all internal revenue, because of the "anti-American" principle it contains of paying all the taxes collected into the Treasury. He advocates not only higher protective tariff taxation, but the establishment of a system of steam-ship subsidies, so as to require taxation to be maintained in that form high enough to provide not only for the ordinary expenses of the Government, but for all the subsidies to favored steam-ship lines that he can induce Congress to donate. All this is done in the interest of American labor! Their false pretenses are fully exposed when we see who the beneficiaries are, and ascertain what they propose to do with it.

When the proposition was before Congress in July last the Postmaster-General exposed the scheme so completely that I can not strengthen his presentation of the hollowness of the pretenses set up by General Harrison and his platform on the subsidy question, and will therefore quote what he said. I only desire to remark in advance that more than half, say 56 per cent., of the whole subsidy was to be given to two corporations, the Pacific Mail, of which Jay Gould is president, and the Brazilian Steam-ship Company, of which H. K. Thurber is president

and C. P. Huntington the principal owner, he having bought out the Roach interest.

I do not think the country will appreciate the wail of sympathy General Harrison raises for these poor, innocent, helpless infants or their industries. Plain people will rather assume that this munificent gift was intended to give Mr. Foster and his associates an excuse for frying "some of the fat out of them" for campaign purposes. I submit liberal extracts and the tables in regard to trades from the statement of the Postmaster-General. Nobody has answered it; nobody can successfully controvert it, and in my opinion the American people will approve it.

After showing conclusively that the postal service would be seriously damaged by the proposed subsidy of $800,000 a year, and that he is now paying American companies liberal compensation, he adds:

In the present conditions the proposed law might as well have named the few persons to whom this money is to be paid. Even the laws (Revised Statutes, sections 3976 and 4203) under which American ships might be compelled to carry the mails have been repealed (23 United States Statutes at Large, 58), and it goes without saying that the proposed legislation intends the Department to pay the maximum rate provided, *i. e.*, $1 per nautical mile for five years, to these few persons, without troubling them with any negotiations as to terms, and, indeed, as you will observe, without even the lodgment of discretion in the Department to designate from what ports of the United States the mails shall sail.

It may be said in passing that presumably the "terminal points" from which sailings will be made, if self-interest, as is usually the case, governs, will be those from which the greatest number of nautical miles may be computed, rather than from those at which the convenience and needs of the service would be suited. It may be noted also that the schedules of sailings are to be furnished by the contractors, and not by the Postmaster-General; altogether, from an analysis of the proposed legislation it would seem to exclude the exercise of any power of any representative of this Government to provide for this mail service in the interest of the people, except after contract, which must be on the carriers' own terms and after the carriers have fixed the schedules according to their ideas of what the mail service should be, to compel them to conform to their own expressed views and decision as to the public convenience and the public interests.

Herewith I furnish you two tables, marked "A" and "B." From them you will see that the mails of this country were carried to Central and South America and the West Indies for the fiscal year ended June 30, 1887, by foreign steamers at a cost of $7,936.27 at the single rate, and by steamers of American register at a cost of $39.381.57. The number of miles sailed by the foreign ships employed was 666,448; the miles sailed by ships of American register employed were 546,758. It will be seen on the plan of payment proposed, which is fixed without regard to the amount of mail carried, that the service, which costs us in the fiscal year 1887, $47,317.84, would have cost us, if paid for as proposed, $1,213,206. It is estimated that the weight of mails will be for the next fiscal year increased 20 per cent. over these figures, and from what I have before shown it will be seen that the number of sailings will be increased in about the same ratio over the figures given in Tables A and B. The total cost of the sailings under this bill predicated upon the business of 1887 can be but an approximate standard by which to estimate the cost under a provision of $1 for every nautical mile for each outward trip.

Again, it will not commend itself to our people if, with this enormous compensation, avowedly for the carriage of the mails, frequency of transmission shall be largely curtailed, even to ports touched by American ships, as must be the case where we pay one carrier about two hundred and fifty times as much as we offer for the same service to another. In my opinion the bill would not be advantageous to the service, but the disadvantages would be positive in so far as this Department is concerned, while if it shall become a law the Department will of course faithfully administer the fund in accordance with the spirit of the act. I feel confident that such administration will result only in a very great pecuniary benefit to a dozen individuals, at the expense and embarrassment of good service, and of inconvenience, injustice, and material injury to the great body of the people, whose money will be used in the purchase of those results.

"The question (mail subsidy service) can not be dealt with on commercial principles. * * * For the sake of keeping up such communication with the East as the nation requires they must set commercial principles at defiance, and cost what it may the nation must either pay them what they lose thereby or forego the communication."

Of course England may subsidize lines of ships to open up new markets for her surplus, because she freely exchanges commodities with such markets; and her policy is after establishing the commerce to steadily decrease the subsidy. If the policy of giving bounties to promote commercial relations with other countries be ever adopted again after the failures in our history, it would seem that its adoption should be deferred until closer commercial relations with those countries can be maintained, and are not antagonized by an opposing system of laws.

I hope that language will be considered carefully by gentlemen on the other side when they are quoting what other nations do in order to build up commerce. They met in Chicago lately, and in their platform declared that they are going to keep the American markets for themselves. They propose to build a Chinese wall around the United States to prevent our people from buying anything produced abroad which can be produced at home at any price, in order to protect home industries.

They propose to take no step in the direction that other nations are moving, in order to build up closer commercial relations with other countries, but they propose to antagonize trade with other people by an opposing system of exclusion and restriction which destroys the very idea of commerce with other countries.

The Postmaster-General continues:

Commerce, in the very essence of its meaning, is exchange. It is not to sell and never to buy.

Never to buy seems to be Republican policy in dealing with foreign nations, according to the Chicago platform, if somebody here has the same things to sell, even if he asks double price for them. He adds:

The individual or nation does not exist that will buy all one has to sell for cash with no reciprocal return in profitable exchange. Cargoes out and cargoes back are needed for the creation of a merchant marine. The cargo out will not be bought unless we buy in exchange, and it will be bought if we are willing to trade. Until these conditions come subsidies may maintain a line so long as the subsidy lasts, and then the line will go down for want of legitimate trade. If, however, the subsidy policy is to be pursued, I venture to suggest the Mexican method. When a ship arrives with a cargo the tariff tax is divided with the ship owner, the latter taking 50 per cent. of the duty on the goods he brings in payment on account of his subsidy.

The trading ship is thus enabled to remit to the consignor, if he will employ his ship, a portion of the Government duties, and thus the ship-owner is indeed enabled to promote trade with foreign countries directly. An improvement upon the Mexican method, in the interest of the promotion of trade and of the building of ships to conduct it, would be to enable the owners and the builders to receive at the port of consignment in that country a still greater proportion of the duties imposed by the Government upon the cargo.

In this way the Mexican ship would be enabled to get her cargo, charge a fair profit for carriage, and sell to the Mexican consumer at a price at which he could conveniently buy, take out a cargo for exchange, and repeat the process, to the cultivation of much closer commercial relations with foreign countries, and to the maintenance of Mexican shipping. Of course the Mexican method is somewhat cumbersome, and the same end might be reached without indirection and without the payment of a subsidy by the removal or reduction of the Mexican tariff on imports.

While on the subject of closer commercial relations with South and Central America, for the promotion of which the bill under consideration is doubtless intended, I call your attention to some interesting figures. Our total trade with Brazil for the year ended June 30, 1887, was as follows:

Total imports	$52,955,591
Our total exports to Brazil were	8,137,794
Of the imports we imposed no tariff upon	47,076,473
We did impose a tariff upon	5,876,703

Our total trade with Central America for the same period was as follows:

Total imports	$7,706,978
Total exports	3,006,714
Of the imports we imposed no tariff upon	7,195,705
We did impose a tariff upon	441,916

Our total trade with Venezuela was as follows:

Total imports	8,444,967
Total exports	5,504,215
Of the imports we imposed no tariff upon	8,248,450
We did impose a tariff upon	12,786

Our total trade with the United States of Colombia was as follows:

Total imports	4,771,303
Total exports	7,158,235
Of the imports we imposed no tariff upon	3,934,559
We did impose a tariff upon	16,594

Our total trade with the Argentine Republic was as follows:

Total imports	4,104,102
Total exports	6,364,545
Of the imports we imposed no tariff upon	3,347,936
We imposed a tariff upon	752,256

Our total trade with Chili was as follows:

Total imports	2,863,233
Total exports	2,069,138
Of the imports we imposed no tariff upon	2,634,396
We did impose a tariff upon	228,897

These illustrate the universal rule by which the limitations upon commercial relations and the carrying trade with all the countries of Central and South America may be measured. A comparison of the amount brought into the country free of tariff with what we send in exchange is instructive. It should be noted that of the Brazilian imports free of duty the large proportion value is the item of coffee, after deducting which the lesson on exchange of trade as bearing on closer relations with all these countries is the same and the universal one.

I have the honor to be, sir, your obedient servant,

DON M. DICKINSON,
Postmaster-General.

Hon. JAMES H. BLOUNT,
Chairman of the Committee on the Post-Office and Post-Roads, House of Representatives.

I agree with the Postmaster-General that we must take what the people we seek to trade with have got to sell if we expect them to buy from us. That is what all the leading commercial countries of the world are doing to secure trade and cargoes for their ships both ways. Does any man suppose that the world will buy from us unless we buy something from them? Is it good policy to close our markets against the world? If so, is it not good policy for them to close their markets against us? Can we sell to everybody and buy from nobody? I think not. That, however, involves, as I said, other questions which we can discuss by and by.

All I have to add now is that the Postmaster-General demonstrates that from the time we began with the Garrison subsidy, followed by the Roach subsidy, and the subsidy to the Pacific Mail, that brought so much scandal, we have built up no trade of any consequence, except in goods admitted free of duty. We can build up none by subsidies. This subsidy will not build up trade, but it will seriously embarrass existing postal regulations by giving a subsidy to a few men at the public expense, to the detriment of the public service, and to the injury of every tax-payer in the country.

All I ask is that the American people will read the facts stated and the figures furnished by the Postmaster-General. When they do the clamor of General Harrison and his platform for subsidies will not only be repudiated, but the fact will be recognized that it is simply a desperate effort to secure partisan support and money subsidy from men of wealth and power in the political campaign now being waged against the tax-paying masses for the benefit of wealthy corporations and combinations. If it was not solemnly asserted in the Republican platform and announced by General Harrison that they propose to build up the American merchant marine and foster and promote our foreign commerce, the assertion would be treated as a broad farce or a ridiculous burlesque.

Protection necessarily exhausts itself when it passes beyond our borders. The monopoly of the coastwise trade is given by Congress to American-built ships. That is perhaps the most valuable franchise

that Congress has at its disposal. All the people who have no other means of getting their products to market, or what they need from other parts of the country, are prohibited from using or employing as carriers on our coasts, lakes, and rivers, anything but an American-built ship, no matter how extortionate a price the owner of the home-built vessel may ask. Foreign-built ships may offer to do the work for one-half or one-fourth of the price the home-ship owners ask.

Congress orders that the ship and cargo shall be confiscated if the cheaper offer is accepted. That tribute binds a powerful class of beneficiaries to the protective system, because they get a good share of the plunder. But the high seas are free. Congress can not interfere with the navigation of these God-given highways of the nations, but it prohibits any American citizen from raising the flag of the United States or from claiming the protection of our laws even against pirates or robbers if he dares to send his cotton, wheat, or anything else on a ship he has purchased in a foreign country.

Congress has taxed everything that is needed in building ships so high that ships for the foreign trade can not be built here and compete with foreign-built ships. All other nations buy their ships where they can get them cheapest, yet Congress will not allow our people to buy them elsewhere and hold them as American property. While treaties are now in existence with all other nations which authorize them to trade in all our ports upon the same terms that American-built ships can, we have bound ourselves not to impose on their ships or the cargoes they carry any other or higher taxes, duties, or burdens than we impose on our own ships and cargoes.

The result is, American ships are driven from the high seas. Our flag is not seen on a single steamer that carries our goods and passengers over the Atlantic Ocean. Our ministers to all the courts of Europe are compelled to sail under foreign flags. I wonder General Harrison did not think of that when he deplored the necessity of using foreign ships to carry them to South America. We pay an annual tribute of $160,000,000 to foreigners to haul our goods and transport our passengers. We feed, clothe, and keep employed at least 100,000 sailors for England, while we are prostrated at the feet of every third-class power. Our contests hereafter will not be on the land, but on the sea. In short, the old clap-trap that protection insured preparation for war in time of peace is another of the now thoroughly exploded humbugs, though it was once as potent as the present false pretense that protection is demanded solely in the interest of American labor.

These questions have all been so elaborately argued that it is needless to repeat the exposures that have been made. The country knows that protection and restriction of home markets means destruction to our shipping interests and to foreign trade and commerce, and it has in fact destroyed them. All efforts to restore either by subsidies will only add burdens to the people to enrich the least deserving class of lobbyists, without accomplishing or tending to accomplish any of the objects so ostentatiously paraded by the Republican platform and their Presidential candidate.

The present Secretary of the Treasury, in his last annual report to the present Congress, shows the folly of our adherence to antiquated navigation laws, under the pretense of protecting home industry, after all the world has abandoned them, in the following statement:

A citizen of the United States may buy a foreign-built vessel in a foreign port; he may put the United States flag upon it, and trade with all the countries of the world except his own. Our Government will protect him with all its power in such trade; but if he brings his ship with our flag upon it to one of our ports, our Government will confiscate it or impose prohibitory duties. He may, however, put the flag of any other country on that same ship and bring it to his home without molestation by our Government. It is then protected by the power of a foreign country. It is difficult to understand why it would not be well to so change our navigation laws as to allow foreign-built ships owned by our citizens to come and go between this and other countries while bearing the flag of the country of their owners.

In *ante bellum* days, when the principles and policy of the Democratic party prevailed, more than three-fourths of the American commerce and a large portion of the commerce of the outside world was carried in American ships, officered and manned by American citizens. At that time, under the low revenue tariff inaugurated by Mr. Polk and maintained until 1861, from 70 to 85 per cent. of our carrying trade was carried in American bottoms. We had more shipping in 1860 than all the world combined, except England, and we were rapidly passing her. Less than 10 per cent. of our merchant marine was destroyed during the civil war, although that was made an excuse for years for the falling off of our carrying trade, until it was exposed so often by Democrats and Republicans that the men who made the charge were ashamed to make it any longer. But I do not need to rely upon my own assertions or those of any other Democrat to prove to what a deplorable condition our commerce and merchant marine have been brought by the Republican protective system.

On the 8th day of February, 1884, page 975 of the CONGRESSIONAL RECORD, when Senator FRYE reported a bill from the Committee on Commerce to remove certain burdens on the Armerican merchant marine and to encourage the foreign carrying trade, he opened his speech by saying:

The first section of the bill touches the provision relating to officers of American ships. The law as it stands to-day requires that all officers of vessels of the United States shall be citizens of the United States, and provides a very heavy penalty of 50 cents a ton on a vessel for a violation of this law. It was a good law when it was enacted, when nearly all the sailors on board the ships were American sailors and many of them fit to be made officers; but to-day, when 95 per cent. of the sailors are foreigners, it is not a good law and works a great injustice very frequently. The bill reported by me provides that under certain circumstances the officers, other than the captain, may be foreign rather than American citizens.

On the 8th day of January, 1884, page 311 of the CONGRESSIONAL RECORD, Senator FRYE, in a discussion with Senator VEST, of Missouri, in regard to the time when the American tonnage engaged in the foreign trade was largest, said:

I trust the Senator and I will both go into the subject. I stand by my statement that in 1861 the American tonnage in foreign commerce was larger than it was at any other period.

Mr. VEST. The Senator is mistaken; it had begun to decline before that.

Mr. FRYE. I stand by my statement. I said to-day Great Britain carried 85 per cent. of our exports and imports, and we carry but 15 per cent. ourselves.

Mr. VEST. Does the Senator say that is Great Britain's proportion?

Mr. FRYE. Eighty-five per cent. is carried in foreign ships. The gentleman must not be so hypercritical. I mean that in foreign ships 85 per cent. of our commerce is carried and our own ships 15 per cent. and a fraction. Now, from 1861—and I still adhere to that—down to the very moment I am talking, the course of the merchant marine of the United States has been the lobster's—backward—until it is down to 15 per cent. of our own exports and imports in the carrying trade.

Why, Mr. President, if this is permitted to go on, in two or three years more, with the same decrease, there will be no American ships carrying our exports or bringing our imports. It will all be done in foreign bottoms.

During the debate on the fisheries treaty a few weeks ago the Senator from Massachusetts, Mr. HOAR, read a letter from Admiral Porter, of the United States Navy, which, while it was an exaggeration in some regards and a wanton insult to all men of Scandinavian nationality, still exhibited the condition to which our Navy and merchant marine are now reduced by the policy which the Republican party seeks to perpetuate. While Judge HOAR afterwards denied being responsible for the letter, he commended Admiral Porter and his statements as being worthy of the highest consideration.

OFFICE OF THE ADMIRAL, *Washington, D. C., May 4*, 1888.

MY DEAR SIR: I have the honor to acknowledge the receipt of your communication of May 4, asking my opinion of the value of our fisheries as a nursery for seamen for the present Navy, which is to be built of iron and propelled by steam.

I beg leave to say that all our fisheries at the present moment are more valuable as nurseries for naval seamen than they ever were before, for our commercial marine has been almost obliterated from the ocean.

In our last war with Great Britain our Navy was largely recruited from Massachusetts fishermen, who made the finest men-o'-war's men in the world, which was illustrated by their skill in seamanship and gunnery, which gave us such great success over our opponents.

They not only furnished seamen to the Navy, but manned that immense fleet of privateers that swarmed the ocean, paralyzed the British commerce, and caused a large section of the British people, led by that great political writer, William Cobbett, to demand of the Government that peace should be secured on any terms.

Notwithstanding the overwhelming naval power of Great Britain during the war, with heavy squadrons in every sea, we were indebted to the New England seamen and the brave officers who led them for a success unparalleled in history.

If we had a war to-morrow we must depend almost altogether upon the fishermen of New England to man our naval vessels.

To show the importance of having trained seamen in time of war, I will mention the fact that the regiment of Marblehead fishermen under John Glover were employed to carry Washington's forces across the Delaware when he surprised and captured the Hessians. Without the aid of the fishermen it is doubtful if Washington would have undertaken the perilous enterprise, for the fishermen were the only ones who considered the project feasible.

The ships that will hereafter be built for the Navy will require as good and hardy sailors as have ever been required before, and it is to be regretted that we can not obtain the services of the fishermen in time of peace. Their present calling is more lucrative than any employment they can obtain in the Navy, and there are no sufficient inducements held out to them to enlist in the Government service.

In time of war with a maritime power the occupation of these fishermen would be gone, and they would flock to enlist in the Navy, as they did in the civil war, when the Confederate privateers made their appearance off our coast. The vessels of our Navy may be said at the present time to be manned almost entirely by foreigners, who have entered the service not from devotion to the flag. In case war should be suddenly declared against us, our ships abroad would be obliged to return home, discharge their crews, and ship American seamen. In a late inspection of the United States ship Trenton the board of inspectors reported to me as follows: "The crew is a fair one, considering their want of knowledge of the English language"—a pretty severe commentary on the class of seamen we enlist in the Navy.

It is very desirable that we should adopt some system by which we could obtain enough bona fide American seamen to leaven the crowd of foreigners now on board a United States vessel of war. The crews of our ships of war are generally made up of men from all parts of the world, largely from the Scandinavian race, who do not care what flag they serve under. There are the descendants of the Huns, Goths, and other barbarians who once overran Europe. They enlist in our Navy softened in character, but still free lances as of old. They serve for money, with no sentiment for flag or nationality, and, possibly, if it came to an action with a ship of their own or a neighboring nation, they would haul down the American flag and hoist that of their own country.

The same qualities required for the seamen of fifty years ago are required for the seamen of vessels of war to-day. The better the seaman the more easily he will learn the improvements in gunnery and seamanship, and the best seamen in the world are those who come from the New England fisheries. They are the strongest, hardiest class of men I know of. They are exposed to all weathers and bear the severest tempests. They are seamen all over, and I will merely add that in 1812 the old Constitution, whose career is familiar to every American, was manned almost altogether by Massachusetts fishermen.

As to any extra science being required to man our present and projected ships of war, I would remark that the management of a ship is easier than it used to

be, but we require the same good seamanship we had in days gone by. With a steam-capstan and steam-winch twenty men can get a large vessel under way. An officer on deck, a man at the wheel, and one at the lead, with the above number on deck for general purposes, and the ship can go to sea with the rest of the crew in their hammocks. But when the machinery is disabled and the ship must rely on her ponderous yards and sails, we want every man to understand English and be a seaman from the crown of his head to the sole of his foot.

The modern guns, it is true, are larger than of old; the machinery to work them is a little more intricate; but a week's good drilling would teach native-born seamen all that is essential, and a ship of war at the end of that period would be ready for inspection by the board of inspection. When the board of inspection finish their examination of a ship she must go to sea ready to meet any enemy of equal force, so that what happened previous to 1812, when the Chesapeake was disgraced by the British ship Leopard, can never again occur as long as the board of inspection exists.

If we can in a week drill a mongrel crew so that every man knows his various stations on shipboard, how much easier would it be for us to do the same thing with a crew of New England fishermen, hardy and active in their persons and intelligent beyond any set of foreign seamen.

The question of protection to the New England fisheries and their seamen does not admit of argument, and in my zeal on the subject I may have gone out of my way to prove to you that which you know already.

I inclose you some statistics which, if you have not already got them, will give you the status of our fisheries throughout the United States.

If there is anything bearing on this subject you would like me to hunt up, please let me know, and I will endeavor to obtain it.

The statistics I inclose show at a glance the immense money value of our fisheries and their importance to the country. If it had not been for the fisheries, New England would never have been settled, for on the first landing on those stormy shores it is likely the emigrants would have been forced to go elsewhere but for the quantities of fish, a most fortunate circumstance for the Union, to which New England has added so many true and loyal States.

I have the honor to be, very respectfully, your obedient servant,

DAVID D. PORTER, *Admiral.*

Hon. GEORGE F. HOAR,
United States Senate.

Men profess to wonder how England retains half the trade of the world in open, unprotected markets, while she pays her operatives more than double the wages paid by many of her competitors on the continent of Europe. The reason is obvious. She has better machinery and more skillful and intelligent labor. They produce more in proportion to the wages paid, and they produce on such an enormous scale to supply a world-wide market that they are employed all the year round. The cheapest raw material that can be found anywhere on the face of the earth is supplied untaxed to the manufacturers of England, and not a dollar of tax is levied to support the Government on anything needed for the comfort of a laboring man and his family except a small tax on tea and coffee. England once pursued relentlessly the restrictive policy we now adhere to till widespread ruin and starvation forced her reluctantly to reverse it.

The history of England while she clung to protection is too well known to need repetition. Squalid poverty was rampant over the land; labor was not only unrequited but unemployed; corn laws and other onerous burdens imposed for the protection of the landed aristocracy were enforced to secure home markets at high home prices as remorsely as the Republican party now propose to restrict and protect our home market in the interest of the combined manufacturers and their machinery. This policy brought starvation to the doors of all the workingmen of that country.

Bread riots and combinations of desperate, starving men, who threatened the overthrow of the government itself, forced Sir Robert Peel and his ministry to repeal the most odious and oppressive of the protective and restrictive laws which had so long enriched the English protected nobility and made paupers and serfs of the laboring masses. Hon. Edward Atkinson, of Boston, stated the situation forcibly in a very able article in the Fortnightly Review a few years ago. He said, after showing how prosperous England is now under her system of unrestricted trade compared to her condition under her protective-tariff system:

A very erroneous idea prevails to some extent in the United States as to the motive of these reforms; and it is often asserted that they were begun when great prosperity had been achieved by the system of tariff taxation that preceded them. How utterly at variance with the facts this view is has been overlooked even by many in England. The true state of the case has been recorded in these words: "It is impossible to convey by mere statistics of our exports any adequate picture of the condition of the nation when Sir Robert Peel took office in 1841. Every interest in the country was alike depressed. In the manufacturing districts mills and workshops were closed, and property daily depreciated in value; in the seaports shipping was laid up useless in harbor; agricultural laborers were eking out a miserable existence upon starvation wages and parochial relief; the revenue was insufficient to meet the national expenditure; the country was brought to the verge of national and universal bankruptcy. The protective system, which was supported with the view of rendering the country independent of foreign sources of supply, and thus, it was hoped, fostering the growth of a home trade, had most effectually destroyed that trade by reducing the entire population to beggary, destitution, and want. The masses of the population were unable to procure food, and had consequently nothing to spend on British manufactures."—*Noble's Fiscal Legislation of Great Britain.*

There is perhaps no man in England who takes a deeper interest in the welfare of the working classes than Hon. John Bright, and no man is better qualified to present the facts in regard to the effect produced by the change of policy from restricted to unrestricted trade, or, if you please, from protection to free trade in that country than Mr. Bright. A banquet was given to him at Rockdale, November 18, 1881, his seventieth birthday, at which he made a speech to the workingmen who had lived as he had under both conditions, in which, among other things, he said:

Now, touching upon this question, one is obliged to refer to a very curious fact that after so many years of experience there are some men who are disposed to call in question the policy of 1846; that is, that there are men of whom you never heard before, and if you would look down the record of all their political life, you would not find a single thing that they have done, and yet they call in question the policy of such men as Sir Robert Peel of 1846 [cheers], and Mr. Gladstone in the succeeding years [loud cheers], and of my lamented friend, Mr. Cobden [cheers], whose services every one acquainted with the recent history of this country must acknowledge. And yet these men—what I should call rather a feeble-minded class of men [laughter]—call in question all this policy, and they have the courage to believe, or the simple-mindedness to believe, that the great body of the people of this country, and especially of the working classes, are not in any degree cognizant of the enormous advantages which the new policy of 1846 has given to the country. [Cheers.]

Mr. Bright, after referring to the original opposition of Mr. Disraeli, and stating the facts in regard to the increase of wages since 1840, under the auspices of free trade, said:

There, according to his statement, was an actual doubling of the wages of the laborers in Lord Beaconsfield's own county of Buckingham. Perhaps some of you may recollect a letter which was published almost immediately after Lord Beaconsfield's death, which he wrote to a gentleman who had sent him a book about the condition of the population in the southwestern counties of England, and Lord Beaconsfield said he thought he underrated the improvement in the condition of farm laborers; that, according to his opinion, the rise in the wages of the farm laborers had been at least 40 per cent.; that is 10*s.* of wages per week had risen to 14*s.* per week.

I believe, indeed, that in many parts of the country the wages of farm laborers, taking into account the hours which they work and all particulars, are doubled since the free-trade policy was established. [Hear! Hear!] Now, take the other class of men. I walked down from the Reform Club through the park to the House of Commons one day in the past summer, three or four months ago, and a man—an intelligent, respectable-looking workingman—joined me and addressed me by name. I asked him how he knew me. He knew me because, he said, "I have been a good deal in Birmingham, and have attended your meetings there, and so I know you very well." [Laughter and cheers.] I talked to him a little about his business. He said he was then getting 7*s.* 6*d.* a day as a bricksetter, and he added, "Formerly I used to work for 4*s.* a day." There is a jump. From 4*s.* to 7*s.* 6*d.* is a considerable leap.

ADVANCE OF WAGES IN THE COTTON TRADE.

Now I should like to tell you of something that has happened nearer home, for I suspect there are many persons in this meeting who have not the least idea of the actual increase of wages that has taken place among the factory operatives in this neighborhood during the last forty years. I was looking the other day at one of our wages books for 1840 and 1841. I will tell you what I found in it and what I find in our wages book now. The figures are taken over an average of two months at that time and over an average of two months now, and therefore are a fair statement of what happened then and what happens to-day. Many persons here know, of course, all about the interior of a cotton factory, and therefore I shall speak as if we were in a mill and looking over the different people at work. I find that in 1839 the throstle-piecers—I need not explain who they are—were receiving 8*s.* a week and they were working twelve hours a day.

I find that now the same class of hands are receiving 13*s.* a week at ten hours a day. If they worked for twelve hours, and were paid at the same rate, it would be 16*s.* a week, or exactly double what they received in 1839, 1840, and 1841. [Cheers.] The young women who worked at the drawing frames at that time had 7*s.* 6*d.* a week; they have now 15*s.*, and that is without reckoning the fact that they are working two hours a day less. The rovers and slubbers got 8*s.* a week then, and they are getting 14*s.* a week now. The doffers [laughter] are considered a class whose wits are a little too sharp [laughter], and are sometimes not very manageable. They used to have 5*s.* 6*d.* a week, and they now have 9*s.* 6*d.*

The warpers in those days, as far as my recollection serves me—I am speaking of my own business—were all women. They earned on the average of the two months 17*s.* 6*d.* a week. The warpers now are all men, and they have earned in the two months an average of 35*s.* 6*d.* a week. [Cheers.] Well, at that time we had a very clever man as blacksmith, whom I used to like to see strike the sparks off; his wages were 22*s.* a week. Well, our blacksmith now has wages of 34*s.* a week, and that only for factory time, which is ten hours, whereas the man of 22*s.* a week worked the then factory time, which was twelve hours. Now you see the enormous change to the people in these factories. They have two hours' leisure which they had not before, and their wages are nearly double.

* * * * * * *

I think it is impossible to account for this extraordinary improvement in the wages of agricultural laborers, of brick-setters and carpenters, and all your factory operatives, and all your mechanics, upon any other theory than this, that the new policy with regard to trade, which has made your trade fourfold, has been the cause which has made this stupendous and unimagined improvement in the condition of the people. [Cheers.]

Mr. Bright could hardly have falsified the facts in the presence of these men. Again, Mr. Bright said, referring to the croakers who predicted ruin to England by free trade, and the prediction that their only hope was to leave their country:

Well, you did not go abroad, but you staid at home. The law was altered so that the bread could come here, and a great many things besides bread. Trade has extended and you have added, in Great Britain alone, more than 10,000,000 to your population in forty years.

* * * * * * *

And yet, with all that increase of population, you have had the demand for labor more steady, employment better paid, the time of labor shorter. The man must be absolutely blind or worse than blind who can not see and will not acknowledge that the great mass of the people, in physical condition, are enormously better off than they were forty years ago.

Again, Mr. Bright said, and that is all I care to quote:

What are the exports now? Instead of being £51,000,000, they amount to close upon, if not quite £200,000,000, so that the foreign trade of the county has increased fourfold within that time, and as a matter of course the home trade must have immensely increased at the same time, because so great an increase of foreign trade has brought so great wealth to the country that the home trade has increased probably in quite as great proportion as the foreign trade.

FREE TRADE A BOON GREATEST TO WORKINGMEN.

But there is another point, which is one of extraordinary interest, and it shows, I think, that no class in this country suffered so much by the ancient policy of protection as the working class, and that no other class in this country has gained so much as they have gained during the last forty years by the adoption of the new policy. [Cheers.]

The facts stated by Mr. Bright are conclusive on this question at least, and that is the main one, that the difference between wages in England and the United States is nothing like as great now as it was

forty years ago. Therefore American manufacturers do not need as much protection now to compensate them for the higher wages they pay as they did then, while they are demanding more than twice as much.

When Hon. James G. Blaine was Secretary of State, a few years ago, he made a very able report to Congress in regard to wages in this country and in Europe. He caused the consuls of the United States, all of them Republicans, to examine into the wages of operatives in the leading manufacturing cities of Great Britain and the continent. Consul Shaw made an elaborate report as to the wages of operatives in the cotton mills of Manchester, from all of which information the Secretary made a very valuable report to Congress, giving the American and European wages paid for similar work, in which he completely refutes all the hired slanderers of the present campaign of the Protective Tariff League in regard to the starvation wages paid to English workmen, and fully corroborates all that Mr. Bright said. His report ought to be read in answer to his own partisan political speeches now. On pages 98 and 99 of his official report he says:

Owing to the different arrangements of the English and American tables of wages, it is difficult to give comparative analysis thereof which would show at a glance the difference in the wages of the operatives of both countries.

The wages of spinners and weavers in Lancashire and in Massachusetts, according to the foregoing statements, were as follows, per week:

Spinners: English, $7.20 to $8.40 (master spinners running as high as $12); American, $7.07 to $10.30.

Weavers: English, $3.84 to $8.64, subject at the date on which these rates were given to a reduction of 10 per cent.; American, $4.82 to $8.73.

The average wages of employés in the Massachusetts mills is as follows, according to the official returns: Men, $8.30; women, $5.62; male children, $3.11; female children, $3.08. According to Consul Shaw's report, the average wages of the men employed in the Lancashire mills on the 1st of January, 1880, was about $8 per week, subject to a reduction of 10 per cent.; women, from $3.40 to $4.30, subject to a reduction of 10 per cent.

The hours of labor in the Lancashire mills are 56; in the Massachusetts mills, 60 per week. The hours of labor in the mills in the other New England States, where the wages are generally less than in Massachusetts, are usually 66 to 69 per week.

Undoubtedly the inequalities in the wages of English and American operatives are more than equalized by the greater efficiency of the latter and their longer hours of labor. If this should prove to be a fact in practice, as it seems to be proven from official statistics, it would be a very important element in the establishment of our ability to compete with England for our share of the cotton-goods trade of the world.

In the two prime factors which may be said to form the basis of the cotton manufacturing industry, namely, raw material and labor, we hold the advantage over England in the first, and stand upon an equality with her in the second.

Having the raw material at our doors, it follows that we should be able to convert it into manufactures, all things else being equal, with more economy and facility than can be done by England, which imports our cotton and then manufactures it in her mills. The expense of handling, transportation, and commission must be an important item in this regard as compared with our turning in the fiber from the cotton-fields to our mills and shipping it in the advanced form of manufactured goods. Add to this the secondary fact that it costs us no more to handle and manufacture the same than it costs in England, and we stand on an undoubted equality thus far in the race of competition.

In the face of official facts like these from as distinguished a partisan leader as Hon. James G. Blaine, and of the conceded fact that England pays 50 per cent. more to her workmen than most of the European continental nations, and yet controls more of the world's trade than all other nations combined, it is evident that the clamor that protection controls or increases the rate of wages paid is false. It is the proportion of goods produced to the human labor employed that settles the question of what wages the employer can afford to pay, and Secretary Evarts proved as well as asserted that the average American workman produced double what was produced by the average European workman, as has been already shown by his report.

It is absurd to talk about a people as being paupers who control in free competition more than half the trade and commerce of the world; and it is equally absurd to insist that protection and restriction which produced nothing but pauperism while maintained in England in the interests of their aristocracy will either develop trade or commerce between us and other countries, or add to the wages or comforts of our laborers in any broad sense, so long as we maintain it alone in the interest of the machinery owned by the manufacturers of this country, to the destruction of all other interests and industries.

If anything else is needed to show the value of trade and commerce to a people, the official statistics of England's progress prove it. They show that while her population has increased from 26,500,000 in 1841 to 35,000,000 in 1881, the able-bodied paupers who had to be supported by taxation in England and Wales decreased from 201,000 in 1849 to 111,000 in 1880, and the number of criminal convictions from 34,000 in 1840 to 15,600 in 1881. The taxable incomes of her people, excluding Ireland, increased from £251,000,000 in 1842 to £582,000,000 in 1880, an increase of 130 per cent., while her population increased only 33. The value of her annual exports was swollen from £51,000,000 in 1840 to £223,000,000 in 1880, an increase of 450 per cent.; while the annual savings of the working classes, leaving out of account the increased comfort and advantages afforded by cheap food and materials, are estimated to have increased from £24,500,000 in 1840 to £76,500,000 in 1880.

Mr. Gladstone, who is recognized by all men everywhere as an intelligent, far-seeing statesman, made a speech at Leeds, a few years ago, in which he contrasted our trade under protection in the neutral markets of the world with that of England, now and at the periods when our tariff was at the lowest and their protection was the highest and the most prohibitory. He said:

As for America and her system of protection, he pointed out that in those countries or markets where they met on comparatively equal footing the exports from America amounted to only £4,751,000, while those from the United Kingdom to the same quarter amounted to £78,140,000. "America," said Mr. Gladstone, "is a young country, with enormous vigor and enormous internal resources. She has committed—I say it, I hope, not with disrespect—I say it with strong and cordial sympathy, but with much regret—she is committing errors of which we set her an example. But from the enormous resources of her home market, the development of which internally is not touched by protection, she is able to commit those errors with less fatal consequences upon her people than we experienced when we committed them; and the enormous development of American resources within casts almost entirely into the shade the puny character of the exports of her manufactures to the neutral markets of the world."

He similarly contrasted the trade of Germany, France, Russia, and Holland, and proved that they as well were entirely thrown into the shade by the maligned free trade of Britain. Not only so, he pointed out that in 1842 America controlled four-fifths of her shipping trade with Britain, while now, in 1881, the scales were exactly reversed, and Britain did four-fifths of the business, and that the best, and America only picked up their leavings.

The statesmen of England who broke down the long-cherished protective policy of that country met with an opposition as determined as the monopolists of this country now present to any attempt to curtail or diminish their privileges, and on the same grounds. Joint debates were had before the people. There Mr. Cobden, Mr. Bright, and their adherents laid down the following proposition:

That in the opinion of this meeting the corn laws and every other law which protects one class at the expense of other classes must prove injurious to the national prosperity, and therefore all monopolies, whether passed under the pretext of benefiting the agricultural, colonial, or manufacturing interests, ought to be immediately abolished.

They were met by the advocates of the landed aristocracy and other protected interests with the following counter-proposition, which every protectionist in America repeats to-day as an answer to all propositions for relief:

That protection to native industry, particularly to the agriculture of the country, is essential to the well-being of the state, and any attempt, however plausible, to abolish that protection and further depreciate the productions of our own soil will only end in the spread of inevitable ruin throughout the rural districts, and ultimately deprive the manufacturers of their best and surest customers.

In this country, to-day, the protected combinations are struggling for the maintenance of their right to rob, through Congressional subsidies, all the consumers of this country as earnestly as the landed aristocracy of England struggled to maintain the right to force the mass of the people to pay double price for their products, and they base their demands on the same patriotic pretenses.

No higher evidence of the prosperity brought to a country by unrestricted trade and the reflected benefits derived by other countries from its enlarged commerce can be furnished than is exhibited by our own official reports of our exports and imports to and from foreign countries. So long as England maintained her high protective-tariff system her purchases from us outside of cotton amounted to comparatively nothing. Last year our total exports were, in round numbers, $703,000,000, of which England and her possessions bought $424,000,000, and all the balance of the world took only $279,000,000. Our imports from the British possessions were $244,000,000, so that they bought from us $180,000,000 more than we bought from them. Our imports from Great Britain proper were less than 13 per cent. of their exports, while they took over 50 per cent. of ours.

If protection to home markets is to be the international policy hereafter, and that is the demand now made by the Republican party, its ruinous effect upon all American industries outside of those protected or licensed by Congress to rob our own people must be apparent to all thinking men. Surely England with more than half of the world's trade and commerce in her hands, and with all the other nations of the world to trade with, can get clear of the 13 per cent. of her exports that we now take much easier than we can get rid of the 60 per cent. of our exports, nearly all of them the product of unprotected agricultural industry, which her people take, even if we give her no credit for buying our beef and pork and giving it character and standing in foreign markets as being sound and wholesome, when the leading continental nations of Europe are prohibiting its sale to their people on the ground that it is diseased and unfit for use.

Turning from these general questions, even if I have to be guilty of repetition, to a more careful examination of the effect of restricted markets on labor, it is hard to speak in respectful terms of the false pretenses by which the protected monopolists seek to delude the people.

I have read about Pharisees, hypocrites, and wolves in sheep's clothing, but history shows no such instance of unblushing and shameless effrontery as the Republican platform proposes. The proposition which the protected organizations make to the laboringmen of America, indeed to all the people, stripped of its varnish is, If you will enable us to exclude competition from abroad, give us control of the American market for home-made goods, and enable us to sell what we manufacture at our own prices, which we through trusts and combinations know how to maintain at satisfactory rates, by limiting production through

closed doors and strikes to the wants of the home market, we will agree that you shall have all the whisky, beer, and tobacco you want at the cheapest rates, free from all taxation.

The insincerity of the assumption that the Republican leaders propose to restrict the sales of manufactured goods to those they produce in the interest of American workmen, is intensified tenfold by the fact shown by the record, that they struggled for years to flood the country with the most degraded character of Chinese labor, and as soon as the war tariff gave them a monopoly of production on their own terms they passed laws which they maintained and enforced for over twenty years, authorizing the importation, free of duty, under contracts to be enforced by penalties and liens upon property acquired, the cheapest and most depraved class of pauper labor from all parts of the earth, in order to force American workmen under pressure from such competition to accept the lowest wages they could force them down to by this competition, or be driven out of their protected establishments. Yet they pose to-day before the country as the special champions of American labor.

Do they propose to secure or guaranty to the American laborers they employ, out of the bounty, subsidy, or protection they demand, that Congress shall force the tax-payers to give them either steady work or higher wages than they can get any foreign pauper imported, duty free, to do it for? Will this legislation they demand secure to American workmen any rights which they are bound to respect. Of course not.

They protest against his right to buy anything required for the comfort or want of himself and his family as cheaply as other people obtain them, because it would diminish their profits. They will cheerfully consent to let him have free cheap whisky and tobacco, because all the tax collected from them goes into the Treasury, which they regard as an outrage on them; and they thank God that they are too virtuous and patriotic to deal in such products, except in their "pluck-me stores," where most of their laborer's wages are swallowed up. They parade their contempt for cheap goods for workmen on all occasions.

The political biographers of General Harrison quote with pride and satisfaction the profound statesmanship and intense interest exhibited by him for the working classes, when he announced in what they call his great speech in March last:

> I am one of those uninstructed political economists that have an impression that some things may be too cheap, that I can not find myself in full sympathy with this demand for cheaper coats, which seems to me necessarily to involve a cheaper man and woman under the coat.

If that means anything it means that the man who gets a coat for 10 bushels of wheat, or the woman who gets a dress for 50 pounds of butter, is a cheap man or woman; while they would be highly respectable, in General Harrison's estimation, if they had paid 20 bushels of wheat and 100 pounds of butter for the same coat and dress to some protected pet of Congress, to whom they are compelled by law to pay double what the people to whom they are obliged to sell their wheat and butter offered them the same things for.

Machinery is, day by day, supplanting human factory labor. It neither eats, drinks, nor wears any product of human industry except coal, and needs no protection against any other like machine anywhere. As the proportion of machine work increases and human work decreases, the proportion of increase of price which protection gives goes in a like or greater ratio into the pockets of the machine-owners. The machine is the laborer in whose behalf the organized bands that fill our lobbies are so clamorous in their demand for protection. Of course, as the owners of the machinery control the work of both hands and machines, when demand for products is slack or the supply exceeds it, the owner drops the human labor first, as far as possible, and limits products, if he produces at all, to what the machines, aided by the least amount of human labor, can do, so that all, or the lion's share, of the high price which protection secures may be retained by him.

It will be a striking evidence of the power of employers over their workingmen, or of the credulity, not to say ignorance, of that class of men, if the organized lobbyists succeed in making them believe that their welfare, or the desire to keep up their wages, enters into the contest now being waged. The contract-labor laws under which they imported pauper labor during all the years they controlled the Government; the struggles made by their leaders, General Harrison included, to flood the country with Chinese, sending the money to China and importing ten thousand of them at a time, as the managers of the Central Pacific Railroad did, give the lie to all their professions of sympathy with high-priced American labor.

The records of the country show that while they require all the people to pay them 47 per cent. more for their goods than they could be bought for in the markets where cotton, wheat, and all other farm products have to be sold, they require Congress to maintain and enforce laws enabling them to import the cheapest and most degraded foreign labor, duty free, to run the machinery, and thus drive out the American workmen, or reduce their wages to starvation rates, and they do it all under the guise of philanthropy and patriotism, and in the name of the Lord.

The time has come when even the colored men who labor from January till December in the cotton fields owe it to themselves to ask General Harrison and his supporters what justice is there in forcing them to pay to a few American manufacturers 47 per cent. more for the clothes they wear and the things they must have than they were offered the same things for in the foreign markets in which they are compelled to sell the cotton they labored so hard to raise and prepare for market. The farmers of the North and West may well ask the same questions.

They know that they only receive for their products so much of the foreign open market prices as remains after deducting therefrom all costs of transportation, insurance, commission, interest, and the buyer's profit; and after all that they are to be forced for all time to come to pay $147 to home manufacturers for the same things they were offered at $100 where their products were sold, their only consolation being that the American home market is protected and a few hundred pets of Congress are made millionaires at their expense, and are thus enabled to contribute liberally to Republican campaign funds and literature, to buy the votes of all who are purchasable, and corrupt all who are corruptible, and through a venal hired press deceive the ignorant and denounce as enemies of their country all who oppose their schemes of plunder.

The machinery of the capitalist is the only laborer that is really protected. It has secured to its owners, by the aid of Congress, the colossal fortunes so many of them have built up. The free pauper labor of the world, which regulates the wages paid to the human labor employed here, on the universal principle of supply and demand, does not and can not compete with or diminish the profits Congress gives as a subsidy to protected machinery. The Republican party have for a long time secured the lion's share of the home market to the machine-owners.

They propose now, under the false pretense of protecting American human labor, to give them the absolute power to plunder the American consumers of the products of their machines to any extent they please by imposing stronger prohibition than ever against their right to buy elsewhere; yet they have the audacity to appeal to the laboring men of the country to help them to do it, while they openly threaten to cut down the wages of all their employés, and thus retain the protection to their own machine-work as high as it is now if the representatives of the people dare to curtail their present extortions. They have hundreds of millions at stake, and they will spend their money freely to win it.

The American Protective Tariff League boasted some months ago of having $100,000 on hand for "educational organizations," and Mr. Foster's "fat-frying" process will doubtless produce ample corruption funds, while some campaign secretary may again enlighten the country by publishing the correspondence of distinguished aspirants for Cabinet positions or foreign missions as to the amounts they agree to pay for public offices. Fortunately the great mass of the American people are not for sale, and neither Mr. Carnegie nor any of the subsidized band can either buy, delude, or frighten them. With the markets for protected products restricted to home consumption the employé whose daily bread is earned by his daily labor is at the mercy of his employer.

Trusts and combinations regulate production as well as prices. Shops, foundries, and factories may be, and often are, closed for months or worked on half time, and the owners make money while they are closed by the enhanced price of the product as the supply diminishes. The laborer gets no part of it. He is the victim of enforced idleness. The wages he earned while at work are consumed while he is idle. The protection of 47 per cent. only protects the goods. Every laboring man would rather contract for steady work all the year at $2 a day which he was assured of than take the chance of getting $3 a day while at work, with the risk of idleness or half work half the time.

If, added to steady work, he could buy all he needed for himself and family each day for a dollar and the same things now cost him a dollar and a half, he surely would be better off. While all these questions have been argued with great ability both in and out of Congress, and will doubtless be presented with much elaboration all over the country, no one has presented the false pretenses of the protected classes with more power, or shown more clearly by official statements the small proportion that labor bears to the value of protected manufactured products, than the distinguished Senator from Texas [Mr. COKE] in a speech made during the present session, from which I take the liberty to quote as follows:

> Of the 17,392,099 of our people engaged in all kinds of industry, only 2,623,089 are employed "in such manufacturing industries as are claimed to be benefited by a high tariff." The farmers, persons employed in professional and personal service, domestic servants and laborers, merchants and tradesmen, carpenters and joiners, masons and bricklayers, blacksmiths, tailors, butchers, bakers, plasterers, milliners, and people engaged in railroading, and other forms of transportation, and in other miscellaneous occupations, numbering altogether 14,769,010, the people who perform six-sevenths of the labor done in this country, are thoroughly skinned and fleeced under the operation of the tariff. They are taxed in everything they eat, drink, and wear; in everything that enters into the construction of their houses; in their furniture; in their tools and implements; in everything they handle or touch while living, and in their coffins and grave clothes after their death. they, American laboring people, not engaged in any protected industry and not benefited by the tariff, are thus taxed in all they consume in the name of protection to American labor.
>
> Six-sevenths of our American laborers, groaning and staggering under the burdens of a war tariff which enriches others but impoverishes them, after the war has been over for nearly twenty-five years, are solemnly informed that they must continue to bear the burden for the sake and good of American labor. The axioms of good government, which among other things demand such measures of policy as shall produce the greatest good for the greatest number,

have been reversed in the tariff legislation, which taxes oppressively the great mass of the people in order that a few may become inordinately rich, and all is done in the name and is alleged to be for the benefit of the American workingman, who in fact suffers more than all others from it, while his employers, the lords of the loom and of the foundries and furnaces, have become the richest people in America.

These self-constituted guardians of the laboring man, who have become so sleek and fat, while their wards, the laboring men, are thin and lean, the advocates of a high tariff from pure charity to the American workingman, as they would have us believe, inform the country that the sole purpose for which they desire a highly protective tariff is that they may be reimbursed the difference between the high wages paid American workingmen and the low wages paid European operatives. This, they say, is all they ask or desire. With the difference between American and European wages placed in the shape of a tariff tax on foreign goods brought into our markets, high protectionists tell us they have no fear of the competition of the foreign goods with their domestic products.

Always and every time their argument centers in and is based wholly on the interests of the workingman. Capital desires nothing and receives nothing through the tariff, and the workingman gets all, says the protection'st. In order to show the utter falsity and groundlessness of this claim, I read a tabulated statement furnished me from the Bureau of Statistics, which throws a flood of light on this subject, as follows:

Table of specified manufactures, showing amount of capital, value of materials, amount of wages, and value of product, with the per cent. of material and wages, also the average ad valorem rate of duty on similar importations for the fiscal year 1887.

[Compiled from the United States census of 1880.]

Manufactures.	Capital.	Value of materials.	Total amount paid in wages during the year.	Value of products.	Per cent. of—		Ad valorem rate of duty on imports, 1887.
					Materials.	Wages.	
							Per ct.

TREASURY DEPARTMENT, BUREAU OF STATISTICS, *January* 25, 1888.

WM. F. SWITZLER, *Chief of Bureau.*

Hon. RICHARD COKE,
United States Senate, Washington City, D. C.

It required either unparalleled impudence or profound contempt for the intelligence of the people, or a combination of both, for the Republicans to declare in their platform that the Mills bill is a free-trade scheme; that its promoters seek to serve the interests of Europe, while they propose to support the interests of America by maintaining uncompromisingly a high protective tariff still further restricting the importations of such necessaries of life as can be produced here at any price, and to get rid of the surplus revenue by an entire repeal of the taxes on whisky and tobacco rather than surrender any part of the protective system.

They know, and fortunately the people know, that every dollar of the tax collected on whisky, beer, and tobacco, less 3.20 per cent., the cost of collection, is paid into the Treasury of the United States; that every dollar of the $120,000,000 so collected is needed and used to pay pensions and interest on the war debt, and will be so needed for many years to come. Therefore, as all the ordinary expenses of the Government must be provided for by tariff taxation, and the Democratic party proposes so to provide for them in the Mills bill, it follows that the epithets so wantonly and foolishly applied, of free-traders and enemies of American interests, only prove the reckless disregard for truth and decency of the men who apply them.

Free trade would produce no revenue from imported goods any more than protection which prohibits imports in order to secure the home market to home producers would; but free trade is not legislative robbery. It would let home consumers buy out of their earnings or from the proceeds of their exports the things they need at the cheapest rates, while prohibitory protection is the worst form of legalized plunder, as it forces the people to buy the things they must have at the highest prices that home producers by trusts and combinations can coerce out of them. The readiness of the protectionists to give up the whisky and tobacco tax grows out of the fact that none of it goes into their pockets, and in their opinion it is not only an outrage but essentially "un-American" to collect taxes in any form unless they pocket the lion's share of them.

Every dollar of the tax on whisky and tobacco might be repealed, and it would not start a factory or a furnace in the land, and would not add a penny to the wages of any workingman. The demand for protection is a confession that those seeking it do not propose to compete in open market with those against whom they seek it, and the protestation so earnestly made that a reduction of tariff taxes from 47 to 42 per cent., as the Mills bill proposes, would be ruinous to the protected pets of Congress is not only an admission which they can not evade, that they are now charging American consumers 47 per cent. more than the foreign price of the goods they make and sell, but an assumption that if hereafter Congress does not authorize them to extort from home consumers more than 42 per cent. above the foreign price they will be ruined.

Whenever a party assumes that it embodies all the wisdom, patriotism, and integrity in the land, and denounces its opponents as enemies of their country, serving the interests of foreign nations, it is safe to assume that it is pharisaical and hypocritical. When the Republicans adopted the following false and scandalous declaration as part of their platform they merited the contempt of all decent people of all classes, because they knew it was a falsehood when they adopted it:

> We are uncompromisingly in favor of the American system of protection; we protest against its destruction as proposed by the President and his party. They serve the interests of Europe; we will support the interests of America. We accept the issue, and confidently appeal to the people for their judgment.

Men sometimes say things in the heat of debate which do them no credit; but the deliberate charge in a carefully-prepared platform, reported by a committee of one from each State, and adopted by the representatives from all the States, that the President of the United States and the Democratic party are serving the interests of Europe, while they alone are moved by patriotic motives, is simply an atrocious calumny. Mr. Clay, in 1824, made use of an expression of that sort, to which Mr. Webster replied. I adopt his reply as the best answer to this infamous charge thus deliberately made. I must add, however, in justice to Mr. Clay, that he said:

> Both classes are equally sincere in their respective opinions, equally honest, equally patriotic, and desirous of advancing the prosperity of the country.

The following is the extract from the speech of Mr. Webster, delivered on 1st and 2d of April, 1824, in the House of Representatives, to which I refer:

> And allow me, sir, in the first place, to state my regret, if indeed I ought not to express a warmer sentiment, at the names or designations which, Mr. Speaker, Mr. Clay has seen fit to adopt for the purpose of describing the advocates and the opposers of the present bill. It is a question, he says, between the friends of an "American policy" and those of a "foreign policy." This, sir, is an assumption which I take the liberty most directly to deny. Mr. Speaker certainly intended nothing invidious or derogatory to any part of the House by his mode of denominating friends and enemies.
>
> But there is power in names, and this manner of distinguishing those who favor and those who oppose particular measures may lead to inferences to which no member of the House can submit. It may imply that there is a more exclusive and peculiar regard to American interests in one class of opinions than in another. Such an implication is to be resisted and repelled. Every member has a right to the presumption that he pursues what he believes to be the interest of his country with as sincere a zeal as any other member. I claim this in my own case; and while I shall not, for any purpose of description or convenient arrangement, use terms which may imply any disrespect to other men's opinions, much less any imputation upon other men's motives, it is my duty to take care that the use of such terms by others be not, against the will of those who adopt them, made to produce a false impression.
>
> Indeed, sir, it is a little astonishing, if it seems convenient to Mr. Speaker, for the purpose of distinction, to make use of the terms "American policy" and "foreign policy," that he should not have applied them in a manner precisely the reverse of that in which he has in fact used them. If names are thought necessary, it would be well enough, one would think, that the name should be in some measure descriptive of the thing; and since Mr. Speaker denominates the policy which he recommends "a new policy in this country;" since he speaks of the present measure as a new era in our legislation; since he proposes

to invite us to depart from our accustomed course, to instruct ourselves by the wisdom of others, and to adopt the policy of the most distinguished foreign states, one is a little curious to know with what propriety of speech this imitation of other nations is denominated an "American policy," while, on the contrary, a preference for our own established system, as it now actually exists, and always has existed, is called a "foreign policy."

This favorite American policy is what America has never tried; and this odious foreign policy is what, as we are told, foreign states have never pursued. Sir, that is the truest American policy which shall most usefully employ American capital and American labor, and best sustain the whole population. With me it is a fundamental axiom, it is interwoven with all my opinions, that the great interests of the country are united and inseparable; that agriculture, commerce, and manufactures will prosper together or languish together; and that all legislation is dangerous which proposes to benefit one of these without looking to consequences which may fall on the others.

The closing sentence embodies in eloquent words the leading ideas of President Cleveland's message, and expresses better than I can the true principles of the Democratic party; while the whole of this extract voices the sentiments and feelings of every honest man against the charges so wantonly and falsely made by our opponents. In behalf of the great party to which I have the honor to belong, I adopt and repeat his indignant utterances as the best answer to the miserable slander contained in the Republican platform.

One of the leading grievances against George III by the American colonies in the Declaration of Independence was "for cutting off our trade with all parts of the world." The Senator from Maine [Mr. FRYE], in a speech in the Senate in 1882, stated the grievances of the colonies against Great Britain in these words:

For centuries England was the most earnest, vigorous, and determined champion of protection the world ever saw, enforced the extremest doctrines by all the powers of war and all the arts of diplomacy. She destroyed the growing commerce of Ireland by one blow of her navigation laws, repressed her cattle-raising, her wool-growing, her manufactures, and made her the waste of to-day. She attempted the same rôle in America; forbade the exportation of her products to any country other than her own; forced all the carrying trade into English bottoms; repressed all manufactures of fabrics, and provided by law "that none of the American colonies should manufacture iron of any kind; that no smith should make a bolt, spike, or nail, bar, or rod iron; that no mill or other engine for rolling iron or furnace for making steel should be permitted;" finally drove us to revolution, and lost the brightest jewel from her diadem.

The American commissioners in 1783 made an earnest effort to secure free trade between the United States and the dominions of Great Britain. I quote from a letter written by Thomas Jefferson to Edmund Randolph, December 16, 1783, in which he says:

The definitive treaty had been received by the President some time and a joint letter from our ministers. This gave us an account of the various propositions and steps taken on both sides in the negotiation which preceded the definitive treaty. Mr. Hartley was the British negotiator with America. He was well disposed, but his zeal for systems friendly to us constantly exceeded his powers to agree to them.

Our ministers proposed a free intercourse between every part of the British dominions and the United States, having the rights of their chartered companies. Mr. Hartley approved of it, but his court declined assenting. He then proposed that the unmanufactured produce of the United States should be admitted into Great Britain and the manufactures of Great Britain into the United States, and that we should be allowed to carry our own produce to the West Indies. On being questioned, however, he had no authority to conclude upon these articles even if agreeable to us.

Hon. David A. Wells speaks thus of the principal causes which led to the American Revolution, and of the men who were leaders in it:

By the statute of 1650 the export and import trade of the English colonies was restricted to English or colony-built ships; but by the statute of 1663 nothing was allowed to be imported into a British plantation except in an English-built ship "whereof the master and three-fourths of the crew are English."

* * * * * * *

The enactment of arbitrary laws on the part of Great Britain to prevent her American colonists from freely participating in the carrying trade and commerce of the ocean was, however, a sore grievance, and ultimately, as is well known, constituted one of the prime causes of the American Revolution. They were, furthermore, from the very first either openly or secretly resisted and evaded, and under their influence the colonists became a nation of lawbreakers.

Nine-tenths of their merchants were smugglers. One-quarter of all the signers of the Declaration of Independence were bred to commerce, to the command of ships, and to contraband trade. Hancock, Trumbull (Brother Jonathan), and Hamilton were all known to be cognizant of contraband transactions and approved of them. Hancock was the prince of contraband traders, and with John Adams as his counsel was appointed for trial before the admiralty court in Boston, at the exact hour of the shedding of blood at Lexington, in a suit for $500,000 penalties, alleged to have been incurred by him as a smuggler.

* * * * * * *

Every evasion of such statutes was therefore, in their view, a blow in favor of liberty. Hence, also, the origin of that count in the indictment against the King of Great Britain, embodied in the Declaration of Independence, "of cutting off our trade with all parts of the world."

Such were the views of the men who a hundred years ago were accounted the wisest of American patriots and statesmen. But nowadays to adopt the principles of Hancock, Trumbull, and Hamilton, to advocate the free ownership and employment of ships, and to oppose the enactment of statutes the avowed purpose of which is to restrict or prevent the freedom of international trade and commerce is to invite the accusation of being enemies to the industry of the country and in league with foreign nations to impoverish our own people.

Mr. Wells adds:

In the treaty of commerce entered into between France and the United States in 1778 the commissioners of the two nations, Franklin, Deane, Lee, and Gerard, evidently determined to attempt to inaugurate a more generous policy and establish a precedent for freer and better commercial relations between different countries than had hitherto prevailed. It was accordingly agreed in the treaty in question to avoid "all those burdensome prejudices which are usually sources of debate, embarrassment, and discontent," and to take as the "basis of their agreement the most perfect equality and reciprocity." And they further stated the principle which they had adopted as a guide in their negotiations to be that of "founding the advantages of commerce solely upon reciprocal utility and the just rules of free intercourse."

In the face of facts like these it is absurd to pretend that there ever was an "American policy" that restricted trade and commerce or that looked to the closing of our markets against foreign products. All that was ever claimed was such an adjustment of duties, imposed for revenue, as would afford incidental protection to home manufacturers.

In 1815 Mr. Clay, who is constantly paraded before the country by the protectionists as their great champion, in the debate on the tariff then proposed to be increased in order to raise the money to pay off the war debt, only urged a tax on imports of 25 per cent. instead of 20 per cent.

"In three years," he said, "we could judge of the ability of our establishments to furnish these articles as cheaply as they were obtained from abroad, and could then legislate with the lights of experience." He believed that "three years would be sufficient to place our manufactures on this desirable footing."

Nearly seventy years have elapsed since then, yet 47 per cent. average tariff tax is maintained in time of profound peace, almost at the highest war rates, with over $100,000,000 of surplus annually flowing into the Treasury beyond even the present extravagant, not to say wasteful, expenditures, and all efforts to reduce these taxes to something like a revenue standard are denounced by protectionists as ruinous to American industries.

Mr. Clay had no such ideas as are now maintained by Senators on the other side of this Chamber. In the great debate in the Senate in 1842, while defending the compromise tariff in 1832, under which all duties were brought to a uniform rate of 20 per cent., Mr. Clay said:

If the compromise act had not been adopted the whole system of protection would have been swept by the board by the preponderating influence of the illustrious man then at the head of the Government (General Jackson) at the very next session after its enactment.

Yet General Jackson is sometimes quoted as a protectionist.

Again Mr. Clay said:

As to the compromise, he had already said that it was his purpose, as long as he should remain in the Senate, to maintain that the original principles of the act should be carried out faithfully and honestly; and if in providing for an adequate revenue for an economical administration of the Government they could at the same time afford incidental protection, he would be happy if both of these objects could be accomplished.

Again he said:

As far as he could go, he would; and that was not to lay duties for protection alone, but in laying duties for revenue to supply the Government with means, to so lay them as to afford incidental protection. He would, therefore, say to the friends of protection, lay aside all attempts beyond this standard and look to what is attainable and practicable.

The position taken by Mr. Clay is precisely the ground occupied by Mr. Cleveland, as all who read his message understand; yet Mr. Clay is lauded as the great apostle of protection, and Mr. Cleveland is denounced as an enemy of his country, working in the interests of foreign nations.

No argument is needed to show that the message of the President and the bill passed by the House are both eminently conservative. Following the recommendations of the message, the bill, while seeking to reduce the dangerous surplus so rapidly accumulating in the Treasury, seeks, mainly by cheapening raw material, to give our manufacturers a chance to cheapen their products, and thus reach a portion of the foreign markets, and at the same time reduce the cost to home consumers. "It deals with a condition, not a theory." It continues protection at rates much higher than the just claims of the manufacturers or the interest of the consumers calls for, but it recognizes the artificial and unnatural conditions on which our manufacturing establishments have been built up, and it carefully avoids such reductions as would give them even a semblance of just cause for complaint.

I will not go into the details of the measure now. It is sufficient to say that if it becomes a law the manufacturers will have protection against the right of our people to buy similar foreign-made goods of over 40 per cent., because that is what protection means and all it accomplishes, while all the wages they pay to their operatives does not exceed 25 per cent. on an average of the value of the home-made product, as shown by the census reports furnished by the manufacturers themselves, and as proved by the official tables heretofore referred to as part of the speech of Senator COKE.

The temptation is very great to comment upon the provisions of the Senate bill in detail, in the light of past legislation and of the concessions made by men of all parties as to the necessity of tariff reduction, especially to show how, in the woolen and cotton and other schedules, there is an unwarranted attempt made not only to increase the rate of taxation over existing law, but to do it in the form of compound and specific duties, so as to conceal the increases so artfully devised; but that would extend this statement to an unwarrantable length. I admit that it is too long already. The flagrant injustice of the proposition will, I hope, be fully exposed when the discussion of the items is taken up in the Senate.

The proposals in the Senate bill in regard to the cotton schedule, I only propose to say now, are simply outrageous, and can not be defended upon any principle of common decency.

No Senator will profess that manufactures, especially cotton manufactures, need any more protection now than they did ten, fifteen, or

twenty years ago. Improvements in machinery have cheapened production and diminished the number of operatives needed in these factories until Mr. Atkinson and all the authorities even in New England agree that one operative will produce as much now as five could with the machinery of twenty years since, which means a proportionate increase of protection to machinery. Yet as early as 1868 Hon. N. P. Banks, then a member of the House of Representatives, laid before Congress a proposition from the New England manufacturers consenting to a reduction on woolen and cotton goods of over 25 per cent. The RECORD of May 7, 1868, will show that Mr. Banks, after giving in detail the reductions to which the manufacturers agreed, said:

These papers which I hold in my hand bear the official signatures of the authorized representatives of one hundred and twelve manufacturing corporations and firms of New England, in which they themselves suggest and consent to reduction of duties upon an extended and complete list of articles of foreign manufacture which come actively and directly in competition with the industries in which they are engaged, rising from 10 to 20, 30, 40, and 50 per cent. upon the present schedule of duties upon such importations. More than a hundred and twelve corporations and firms of cotton and woolen manufacturers alone, of their own choice, and after repeated conferences, in which all the interests of the textile fabrics of this country were considered, high and low, made this proposition. * * * As it was with the cotton manufacturers, so it was with the woolen manufacturers. They consented to and in a certain sense recommended, as of their own accord, a reduction of duties of from 23 to 25 per cent.

* * * * * * *

Mr. HOOKER. Will the gentleman allow me to ask him why these interests asked a diminution of the tariff?

Mr. BANKS. Because their attention had been called to the subject. It was their duty to make known to the Government what they desired. They found when they brought their representative men together from all parts of the country that the duties could be reduced and they could still pursue their vocations with more or less success, and like honest and honorable citizens they made that declaration to the Government. And so did the wool-growers from California to New England. They assembled in the State of New York for the same purpose, and after long and anxious conference one with another and with the woolen manufacturers they agreed, as did the silk manufacturers, to what extent they would recommend a reduction of the duty.

Yet in the face of these propositions and the changes that have occurred to cheapen the production by improved machinery, after the insertion of provisions—inserted I had almost said clandestinely, in the conference report of 1883—increasing the rate on the leading cotton products in which New England was specially interested, it is now proposed to still further largely increase taxation in the interest of a few New England manufacturers; and what is true in regard to them may be said with equal propriety in regard to all the increases proposed in the Senate bill; for, so far as the leading schedules are concerned—in short, it is a bill to increase taxation in the interest of combinations of wealth rather than to reduce it in the interest of the people. The bill, it is true, deals without mercy with the sugar schedule, mainly because nine-tenths of the money collected from the sugar tax is paid into the Treasury, and none of it reaches the pockets of the New England monopolists.

When we reduced the sugar tax in 1883 the clamor of all of these combinations then was that we were destroying an industry that employed a large number of American laborers, principally colored men, for whose welfare they expressed great solicitude. Then, as now, the Democrats agreed only to reductions which would not cripple or destroy home products. It is true that when a sugar plantation is once destroyed it is almost impossible ever to restore it. The plant costs nearly $100 an acre, and takes years to bring it back to a profitable condition after it is once abandoned. It differs from the land upon which hemp, tobacco, and other crops of that sort are produced. They can be changed to something else without loss; whereas the sugar and rice plantations, when once abandoned, can not be used for any other purpose without a sacrifice of all that had been expended upon them to fit them for sugar and rice production.

Therefore the Democratic party, while they cut these two products heavier than any other, wisely did it in such a way as not to seriously cripple or destroy the labor or the capital engaged in those products. Now, perhaps to punish the people of the South, or to raise the clamor that they are patriotically giving the people cheap sugar, the Republican majority have taken care to add the taxes on sugar which they have reduced because they could not pocket them or turn them over to the protectionists, as nine-tenths went into the Treasury, to the products of which the monopolists pocket four-fifths and the Government gets one-fifth, and they call that protecting American labor!

I am, however, glad that the Senate committee has gone to the extreme of protection, restriction, and destruction that it has. It makes the issue squarely before the people of the country, whether all the people are for all time to come to be treated as serfs of a few manufacturers, or whether they are to secure through a revenue tariff something like equal rights in the legislation of the country hereafter. The temptation is very great also to show the indignant protests heretofore made, particularly in 1883, by leading Republican Senators, notably Senators PLUMB, INGALLS, and ALLISON, against the tax on lumber, salt, and other things which the committee propose to perpetuate. That, however, can be done hereafter.

But I ought not to fail to state that the low revenue tariff of 1846 produced more general prosperity and progress in the development of all our industry than any protective system since devised has ever done. So satisfactory was its operation that when the parties met and adopted their platforms in 1856 neither party ventured to find any objection to it, and when the further reduction below 20 per cent. was made in 1857 it received the almost unanimous approval of the representatives from New England, nearly all of whom were opposed to the then administration; yet the taxation then imposed was less than half that now conceded by the so-called free-trade Mills bill, and very little over one-third of what is demanded by the bill of the Senate committee. On the 24th and 25th of March, 1870, Senator ALLISON, then a prominent member of the Ways and Means Committee of the House, spoke of that tariff as follows:

The tariff of 1846, although confessedly and professedly a tariff for revenue, was, so far as regards all the great interests of the country, as perfect a tariff as any that we have ever had. If any interest was depressed under the tariff of 1846, it was the iron interest. I do not believe that this interest, as compared with other interests, had sufficient advantage under that tariff; yet when we compare the growth of the country from 1840 to 1850 with the growth of the country from 1850 to 1860—the latter decade being entirely under the tariff of 1846 or the amended and greatly reduced tariff of 1857—we find that the increase in our wealth between 1850 and 1860 was equivalent to 126 per cent., while it was only 64 per cent. between 1840 and 1850, four years of which decade were under the tariff of 1842, known as a high protective tariff, but the average rate of which was about 70 per cent. below the existing rate, or 27 per cent. under the tariff of 1842 as against 44 per cent. upon all importations under the present tariff.

Our industries were generally prosperous in 1860, with the exception, possibly, of the iron interest. This was the statement of Mr. MORRILL, of Vermont, on this floor during the discussion of the tariff of 1864. With regard to the condition of the steel industry in 1860, the steel manufacturers in 1866, memorializing Congress for increase of duties on steel, stated that—

"It was reserved for Pittsburgh to bring about the first substantial and enduring success in the year of 1860; and encouraged by our example numerous establishments have sprung into existence, as already indicated in this paper. This shows that under the revenue tariff of 1857, which imposed only an ad valorem duty of 12 per cent. on steel, a substantial success was achieved in the steel manufacture in 1860." I have read the language of the memorial.

I regard that indorsement of the act of 1846 and of the principles of a revenue tariff as entitled to greater consideration than anything I could say. Hon. Robert J. Walker, Mr. Polk's Secretary of the Treasury, who framed the tariff of 1846, addressed a letter to the people of the United States on the 30th of November, 1867, in which he took occasion to refer to the tariff of 1846, and contrast its principles and provisions with those of the present system. After showing what amount he thought would be sufficient for the wants of the Government economically administered, he said:

This revenue of $244,000,000 a year, as a maximum, I would derive from three sources alone:

1. By a tariff for revenue.
2. By an excise on wines, malt and spirituous liquors, and tobacco; abolishing all other internal taxation.
3. By a tax on our national banks, based upon just and fair equivalents.

* * * * * * *

A tariff for revenue, as experience has shown, instead of depressing improves all industrial pursuits, including manufactures, and vastly augments the wealth of the country. Under the tariff of 1846, as shown by the census, our wealth increased from 1850 to 1860, 126.45 per cent.; whereas from 1840 to 1850 the increase was only 64 per cent.; from 1830 to 1840, 42 per cent., and from 1820 to 1830, 41 per cent. So, also, from 1850 to 1860 our agricultural products increased 95 per cent. and our manufactures 87 per cent., being in both cases nearly double any preceding ratio of increase. So, also, our exports, imports, and revenues nearly tripled in the same period of time, and our domestic trade rose nearly in the same ratio.

This augmented ratio is not the result of increase of population, which from 1850 to 1860 was less than 36 per cent. The Irish famine was supposed by my opponents to account for the increase the first year, although the decreased price paid abroad that year for our cotton nearly equaled the additional sum paid by England for our breadstuffs and provisions. But the next year and the next, before any gold had reached here from California, our exports and revenue went on augmenting in a corresponding ratio, rising in eight years from $22,000,000 under the tariff of 1842 to $64,000,000 under the tariff of 1846.

I think Mr. Walker answers fully the boast of the great feat accomplished by the Morrill tariff, by "transforming ad valorem duties into specific," in the following sentence:

There is another insuperable objection to the specific system, namely, that it unnecessarily and invariably taxes labor vastly more than capital, and the poor in a much greater proportion than the rich, upon the goods consumed. Under the system of specific duties of so much per pound, or yard, or gallon, etc., the specific duty is the same. The rich, who purchase the costly article bearing only the same specific duty, pay, in proportion to value, less than one-half of what is paid by the poor, who purchase a cheaper and less costly article. If we take all the costly articles purchased by the rich bearing under the present tariff the same specific duty as the inferior article bought by the poor, we will find the difference against them exceeds $20,000,000 a year. Such is the immense additional tax exacted from labor under the system of specific duties.

Think of the injustice of a system under which the laboring man pays 90 per cent. tariff tax on the only kind of blankets he can afford to buy, while the wealthy pay less than 60 per cent. tax on such as they use, and in like proportion for all else. How long would a law stand in the State of New York that taxes the residence of Mr. Vanderbilt or Mr. Stewart, worth $2,000,000, no more than the residence of their coachman, worth $2,000? That is specific taxation. Ad valorem or a fair per cent. tax on each according to its value is the system adopted by the American people in all their State governmental affairs, and is the only just system. Mr. Walker but expresses the views of all disinterested intelligent men when he says:

Our present system of taxation is the most onerous ever imposed upon any people, and is utterly destructive of the prosperity of our country.

Our present tariff is most unequal, oppressive, and unjust. It is grievously onerous upon agriculture, commerce, navigation, ship-building, etc. * * * The present tariff, besides the tax of $150,000,000 a year upon imports, the duties

on which are paid by the people into the Treasury in gold, exacts another tax of at least $350,000,000 a year in the enhanced prices of rival protected domestic articles. This can be readily proved by comparing the prices current in gold of such domestic articles with the prices of similar articles produced in other countries. Thus, the tariff taxes the people of the United States to the extent of $500,000,000 a year, of which only $150,000,000 goes into the Treasury, and the remaining $350,000,000 goes into the pockets of the protected classes.

Mr. Walker understood too well the real purpose of the clamor about protection to American labor and the wages of operatives to be deceived by it. He knew that the $350,000,000 of taxes taken from the people which did not reach the Treasury went into the pockets of the protected classes and not into the pockets of their operatives. He made a great report to Congress on the 11th day of December, 1848, which I wish every laboring man in the United States could read, whether he works in a factory or on a farm. Even Senators would be benefited by its perusal.

On the subject of specific and ad valorem duties Mr. Walker says:

If the importation of protected articles would rapidly decrease when the foreign were high in price and specific duties operated as a protection, under the tariff of 1842 from 41 to 243 per cent. (per Table H, compiled from Treasury returns in 1844), what must not have been the decline of importation and revenue when the foreign article fell, as it has in many cases, 50 per cent., bringing up the specific duty from 41 to 82 and from 243 to 486 per cent.? This fact illustrates another objection to the specific duty, namely, that although it professes to be stationary, it is in fact constantly augmenting from reduced prices of foreign articles.

Experience proves that from improved machinery, new inventions, and reduced cost of production the foreign articles are constantly diminishing in price, while the specific duty remaining unchanged it is continually increasing in ratio as an equivalent ad valorem, and the protection augmenting every year. Thus, if the price of sugar was 6 cents a pound and the duty 3 cents, it would be equal to 50 per cent. ad valorem; but if the price of sugar fell to 3 cents, the duty would have risen to 100 per cent. ad valorem, thus doubling the protection and continually augmenting with decreasing foreign prices until the duty becomes prohibitory and the revenue on such articles disappears; whereas the ad valorem bears under all changes of price the same exact ratio to the cost of the foreign fabric, and therefore is the most just and equal, as also necessarily insuring a larger revenue.

In this aspect of the case, the objections to the specific duties as a permament system, with a view to revenue, are insuperable, while their unjust operation upon labor, in imposing so much higher duties as an equivalent ad valorem on the cheaper than the more costly qualities of goods, can not be successfully defended.

That is all I care to say at present on that subject.

One thousand one hundred and thirty-six pages of statements made upon all sorts of subjects before the Senate Finance Committee have been furnished to me. Even that mass of matter contains nothing taken since September 10, 1888. There may be 1,100 more pages that I have not yet seen, and perhaps the committee has not yet had it all printed, but I do not propose to analyze it, or to attempt to go over it in detail. In great part it consists of the demands of men for specific duties and increased or prohibitory taxation.

Perhaps Mr. Oliver's statement, on page 125, in regard to steel-wire rods, when he was demanding specific rates instead of ad valorem, and increases of duty which should amount to prohibition, illustrates the tone of all of them as well as any other. The following few lines, which I insert here, show what I mean:

Senator BECK. Therefore the specific duty at that time was somewhere about 60 to 65.

Mr. OLIVER. About that, I think.

Senator BECK. That is what I wanted you to guess at if you can not tell otherwise. Now you complain of a reduction from 60 per cent. down to 45 per cent.

Mr. OLIVER. We do most emphatically complain.

Senator BECK. You want to prohibit foreign competition, so as to control the home market yourselves?

Mr. OLIVER. That is our position, and we are not ashamed to say it. We want the home market to be supplied by the home manufacturers.

Senator BECK. I thought so.

While I do not propose now to go into the question of trusts or the effect of tariff taxation in their formation and maintenance, because that is before the Senate Finance Committee as a separate proposition and will doubtless be reported upon separately, at which time I may have an opportunity to express my views in regard to them and the encouragement that tariff taxation affords to them, still I can not forbear referring to the well-known and somewhat notorious cotton-bagging trust, which illustrates how the tariff sustains and protects all the others.

Congress having imposed prohibitory duties upon jute and the manufactures of jute used for cotton-bagging, all of the men who had by law secured a monopoly of the business and effectually excluded all competition conspired, or, if you please, combined and formed a trust, buying out the smaller concerns and leasing others, and thus through the trust controlled the whole product, because their machinery could produce in two years more than the country could consume in three, and the prohibitory duty had made foreign competition impossible, as the American market needed more than three-fourths of all the cotton-bagging produced in the world.

This combination, thus protected in its extortions by the operation of our tariff laws, almost doubled the price of the cotton-bagging product to the consumers, and the men who thus conspired, after concealing the facts as to their combination, came before the committee when brought back after their action had been exposed and admitted that they had done it because Congress, or at least the House of Representatives, seemed determined to interfere with their monopoly, and they proposed to make the most out of it while the power to do so remained in their own hands.

I do not know of any better commentary on the folly—I might perhaps use a stronger term—of such protective duties as destroy competition and enable men to combine and conspire so as to ruin the mass of the people who must buy from them, as the cotton-bagging monopolists admit they have done. A feeble pretense was made in committee, and it may be repeated, that it did not hurt the producer of cotton because the bale was weighed bagging and all, and the price was so much per pound for the whole weight, but when that suggestion or assertion came to be investigated it was so absurd that Mr. Murdoch, who was one of the men asking for an increase of duty on cotton bagging, agreed that all the tare was in effect a loss to the producer, as shown by the short extract from his statement which I make part hereof, correcting the work in a question from purchaser to producer:

Mr. MURDOCH. There is another point to be considered about the price of bagging. When this cotton is exported to Liverpool the purchaser of the cotton on the other side deducts 6 per cent. for tare; that is, he deducts from a 500-pound bale 30 pounds for tare, and for the little soiled cotton that may be next to the surface of the bale. So that the man who exports the cotton does not pay for the ties and bagging at all.

Senator BECK. Who pays for them? Somebody pays for them. There is 6 per cent. deducted for tare; who pays it?

Mr. MURDOCH. As you say, somebody pays it.

Senator BECK. Is it not deducted from the producer always? It must be. Everybody can tell that as well as you.

Mr. MURDOCH. It is the same way when they ship rice; they do not charge for the tierce.

Senator ALDRICH. In this country who pays the 40 cents if it is reduced?

Mr. MURDOCH. I suppose it would go to the planter.

Senator ALDRICH. How would it go to the planter? He sells his cotton for the same price.

Mr. MURDOCH. Yes; he gets the same price for his cotton. You can make a very nice argument about it, but it is so.

Senator HISCOCK. There is no doubt but it must affect the price of cotton?

Mr. MURDOCH. Every article of commerce is put up in packages, and nobody thinks of charging for the packing. Corn is put up in bags; meat is put up in boxes or hogsheads, as the case may be, and nobody charges for them; rice is put up in tierces, and nobody charges for the tierces; the same with cotton. When an article is sold it always carries the cost of the package. But when a planter puts 450 pounds of cotton into a bale, puts the bagging and ties on, and then has 475 pounds of stuff which he hauls 5 miles to market, and sells 475 pounds at 10 cents a pound, you can not persuade him that he is not being paid for his bagging and ties. You might argue with him for a year and it would not have the slightest effect on him.

Senator HISCOCK. He does not appreciate the fact that that is taken into consideration in establishing the price of the article?

Mr. MURDOCH. No; but of course that is so.

I desire to say further in regard to this question of trusts that while so much was being said about the whisky trust, especially in Kentucky, I sent a note to John M. Atherton, esq., of Louisville, Ky., who was the president of the Distillers' Association, asking him to advise me fully as to whatever trusts existed in regard to Kentucky whiskies, telling him that I desired to use his statement before the Senate Finance Committee, or to have him examined before that committee if necessary. He was at Saratoga, N. Y., at the time, and wrote out a full statement of the facts, which I tendered to the Subcommittee on Finance and requested its publication among the other statements which they were having printed. There were some expressions in it to which my attention was called, and as the Republican members of the committee thought that it contained matters they did not care to publish, it was handed back to me.

Mr. Atherton came to Washington on a summons to appear before the House committee. A few days afterwards I submitted it to him, and he modified some of the expressions which were objected to or were thought improper by the majority of the Finance Committee. I said to Senators ALDRICH and ALLISON that I would attend to having that communication printed myself, as there seemed to be some reluctance on their part to make it part of the general evidence. I now submit it as an appendix to this report, and ask that it may be printed along with it, as it is a full, fair, and complete statement of the truth by a very intelligent man, and one who is better informed in regard to all the doings and operations in distilled spirits in Kentucky than, perhaps, any other man in the State. The political suggestions that he saw fit to make are in entire accord with my views, and therefore I ask that the letter may be printed, just as it is written, as part of this statement.

JAS. B. BECK.

SARATOGA, N. Y., No. 98 CIRCULAR STREET, *July* 23, 1888.

DEAR SENATOR: The reports from Washington point to the passage of the Mills bill by the House. This sends the bill to the Senate, and in view of this probability, I take the liberty of submitting to you the facts and reflections contained in this communication. To avoid all confusion I will try to keep separate the facts and those observations and conclusions which in my judgment grow out of the facts, but which I know to be the views of an individual and nothing more.

As known to you, I am a distiller of and dealer in Kentucky whisky. In common with all self-respecting men engaged in the liquor traffic, I feel a deep interest in all legislation affecting my business. But apart from this purely selfish consideration, as a citizen of this country I again, in common with the members of my business, feel that interest in all that concerns this people which honest, law-abiding men should feel. Every decent man in the liquor trade, wholesale and retail, must experience a sense of regret that statements utterly at variance with the facts should be made on the floor of Congress. I will try to mention some of these statements, and in each case give you an honest and truthful recital of facts, evading nothing and concealing nothing.

The reports of debates in Congress, in both House and Senate, contain charges that there exists in Kentucky a "whisky ring"—a combination organized and

maintained for making money in any and every way, whether fair or foul, by defrauding the Government and by proposing and aiding legislation out of which money is to be made by this alleged ring. It is unpleasant enough to bear that part of such an accusation, made in Congress, circulated all over the country, and preserved in the Journals of both House and Senate, to be read by generations yet unborn, as fixes or tends to fix upon each individual distiller and dealer in Kentucky his share of the criminality contained in such a charge. But this mortification is deepened by the fact that our public men, our Representatives and Senators, our State officials, our citizens of eminence and influence, are made parties to this "ring," and presented to the public in the light of its agents or attorneys.

The answer to all this is that it is untrue. There is no whisky ring in Kentucky; there never has been. By the word "ring" I mean combination of any and all kinds, making or seeking to make money in any way except by the manufacture and sale of whisky in accordance with the laws of the United States and of Kentucky and in compliance with the methods of honest and honorable business pursuits. If this is true, if there is no whisky ring in Kentucky, it can have no agents and no part in originating or shaping legislation.

I embarked in this business in 1867, and have been continuously engaged in it to this time. I am intimately acquainted with nearly all the distillers and dealers of Kentucky. It is not possible that any ring could exist in Kentucky without my knowledge. But to go to the bottom of this matter, it was the wish of every distiller of Kentucky that the committee of the House investigating trusts would take up the whisky business, and, under the oath of witnesses, get the facts. Many years ago there was in Kentucky an association of Kentucky distillers of which the largest membership did not exceed fifty. Its object was to consider trade matters and to discuss such provisions of law and proposed legislation as affected the distilling business of Kentucky. But at no time was any scheme suggested or desired for evading any law, State or national, or for controlling the business by rings or combinations. The internal-revenue law, enacted mainly in 1869, was in many respects crude, and in not a few extremely technical.

It was designed to prevent the gross frauds on the revenue that existed prior to 1869, and to that end had the approval of every distiller in Kentucky. This association regulated storage and other purely commercial questions, and the only part undertaken by it, of any moment, in national legislation was in the effort to secure an extension of the bonded period, and, in State legislation, in framing a law by which whisky was taxed as other property in Kentucky. There was no pool, no trust, no interference by one distiller with the business, prices, or profits of another. It employed Colonel Wharton as an attorney in Washington in the interest of the bond-extension bill, but violated in that movement no law. That no ring existed, that nothing secret was attempted, that no effort was made to evade or violate law, is absolutely certain. In 1883 or 1884 this association was abandoned by the distillers, as the matters about which it had been mainly concerned were settled as far as any efforts such as described could avail.

This was followed by a movement to incorporate a company under the laws of Kentucky with a view solely to regulate production by fixing a maximum quantity to be made each year by the different distillers, each fixing his own price, selling his own product, and conducting his own business. But the movement failed and was virtually abandoned.

In the late spring of 1887 a majority of the distillers in Kentucky entered into an agreement to produce no whisky from July 1, 1887, to July 1, 1888. This agreement is in writing, in existence, and speaks its own scope and intent. A similar agreement is now under consideration in Kentucky, providing for a restriction of the production in Kentucky from July 1, 1888, to July 1, 1889. But the agreement, if made, is by the voluntary action of each distiller, contains no provision for pooling or consolidating, but leaves each to manage his own business in his own way.

All these movements have been open and honest, with no false, secret, or sinister purpose, and are fully set out in writing to speak for themselves. The records of the Internal Revenue Department show the arrests or seizures in Kentucky for violations of law. These records must disprove the charge of fraud attempted or accomplished by Kentucky distillers, and I most earnestly ask you to obtain a statement on this point from the honorable Commissioner of Internal Revenue. You will find numerous arrests, prosecutions, and convictions for "moonshining" in Kentucky and for selling liquor without license, and you will find a large sum expended by the Government in Kentucky for protecting the revenue from such violations. But you will find an exceedingly small list of offenses of any kind by the registered distillers of Kentucky.

No effort has ever been made in Kentucky to combine the liquor trade for political purposes. Many engaged in the trade as distillers and dealers are strong Republicans and vote the Republican ticket.

The trade of Kentucky differs in the matter of reducing or repealing the internal-revenue tax as other people differ. Many desire a reduction to 50 cents, and on this point there is not much difference of opinion, as less money would be required in the business and less apprehension felt about paying taxes.

If the trade of Kentucky differ in politics it can not be true that the whisky interest dominates or controls the politics of Kentucky, as has been charged in Congress.

May I not ask you, if these statements are true, why Senators and Representatives in Congress, why newspapers and public speakers repeat the charge that a whisky ring exists in Kentucky, and by its devilish schemes and dishonorable methods defrauds the revenue and shapes the politics of Kentucky? If the charge is made in good faith, it should be corrected, for the people of the United States are led to form very unfavorable opinions of the Kentucky distillers and dealers. While this faith may not disturb the public, it is unjust to the individuals assailed, and must degrade them in the eyes of the public. If done to impair the standing of our public men or to weaken an influence they may exert in the discussion of public questions, it is still unjust. Such tactics may be good politics, but the charges are false, nevertheless. But whatever may be the purpose—ignorance or politics—you will confer a favor on the whisky trade of Kentucky if you will at least flatly and positively deny the existence of any whisky ring in our State, past or present.

To give you such information as will explain all points and cover the entire question, I will state that there is a trust, composed of distillers mainly north of the Ohio River, and of a few distillers in Kentucky, who produce spirits and nonaging whisky. The office of this trust is in Peoria, Ill. It is needless for me to explain the difference between spirits and Kentucky bourbon, or what is meant by whisky for aging by storage and spirits made for immediate use. You doubtless know all these distinctions, and while it is interesting enough as either a scientific or commercial question, it is foreign to my purpose. Nor is it my wish to lead you into any reflections on the moral questions involved in the liquor traffic. If the business is immoral, and on this point each must form his own conclusions from what he has himself done or seen his neighbors do, it is quite enough to bear that burden. But in addition to this charge, be it true or false, there need not be preferred in high places the further accusation of theft and conspiracy and all that is implied in the usual term of whisky ring. All the statements on this subject in the foregoing you can accept as true.

Now, it may be said in support of the whisky-ring charge, in the face of the foregoing facts, that nothing of a criminal or semi-criminal meaning is intended, and the intent may be to charge that Kentucky whisky (and, for that matter, all domestic whisky) is protected by the internal revenue, and enabled by that protection to exist and grow rich, and the charge has been made that a whisky trust had sprung up under the internal-revenue law and the tariff duties on imported liquors.

As before stated in this communication, there is north of the Ohio River a whisky trust, which embraces all the distillers of spirits and cheap domestic whisky, except two houses, one at Cincinnati and one at Chicago; but I am unable to find how or in what way the internal tax or tariff duties has contributed to the formation of this trust.

1. Spirits and their kindred products made by the trusts are used as soon as made, and certainly do not remain in bond for any considerable period of time. These spirits are never tax-paid and stored as tax-paid whisky. So the tax is paid by the trust houses as the spirits are made and withdrawn for consumption. The buyer and consumer speedily pay this tax, and it is in nowise a burden to the trust houses; nor can it be a benefit. If the spirits were stored for age, and unfit for use until aged, a strong combination, able to pay the heavy tax of 90 cents and carry the tax-paid stock, would likely, or at least theoretically, have an advantage over their weaker competitors. But such is not the case, and men or firms of small means, of means enough to build a distillery and buy grain enough to operate it on, can make and sell spirits so far as the tax money is involved, as it is always covered by a draft on shipments made generally as soon as the spirits are barreled.

There is no advantage from the internal-revenue law to spirit distillers in a trust or out of it, and any house, no matter how small, can as readily obey the requirements of the law as the largest one. There is the same commercial advantage in favor of a large spirit distillery that exists in favor of a large manufactory of any kind over a small one, less expense per unit of products in the large one than the small one. I mean business expense with which the law can have nothing to do. This statement applies to Kentucky whisky, but in a modified way; the tax of 90 cents is paid at the end of the three years' bonded period on all whisky not previously withdrawn. This tax thus becomes a heavy burden on the Kentucky products (and also on all whisky carried for age beyond the three years).

And this burden certainly outweighs any advantages that can ever result from combinations in the fine whisky business. So instead of a benefit even to fine whisky, the tax of 90 cents is such a burden to fine whisky that the great majority of distillers and dealers would be glad to have the tax reduced to 50 cents. The records of the internal revenue will show the number of distillers in existence in the United States, and this record will further show the large number of very small distilleries that certainly exist under the present law. The distillers of fine whisky, or at least very many of them, would regret to see the internal-revenue law repealed in full so far as it applies to distilled spirits, for the reason that the marks affixed under the law serve to identify the goods, and is a guaranty to the buyer and ultimately to the consumer of the quality.

Many distillers, also, of all grades of distilled spirits can not understand how a tax inuring to the benefit of the whole people can be collected by the States. Kentucky could impose a gallon tax of 25 cents if the United States tax of 90 cents was repealed, and thus support the State government, provided other grain-growing States imposed the same tax. But Texas, for instance, would object to enriching Kentucky in this way. To this it may be said that the local license would be increased, and thus each State gets its full share of this tax. But to this the reply must be made that there is nothing to indicate any more uniformity in license than in the gallon tax. I state, then, objections that many whisky people have to the entire repeal of the whisky tax as the real and honest objections from a trade standpoint. And it is better that real and honest objections should be stated than that the trade be charged with secret if not dishonest motives for their position on this subject.

On the broader question of taxation, and apart from the selfish interest each has in his own business, the whisky trade differ, as do other people—some for tariff reform and some for protection—some indorse the St. Louis platform, while others indorse the Chicago doctrine.

2. Do tariff duties as now laid benefit the whisky business in any way and aid in the formation of trusts? Most certainly not, for the very simple reason that the United States is the greatest grain-growing country in the world, and furnishes the cheapest grain of all kinds for all purposes. If there were no tariff duties and no internal tax on liquors (distilled) there could be no interference with American products by imported goods. In Europe potatoes are used to a large extent for whisky or spirit making, but the product is not good, and could not at a less price compete with grain product. This is too plain and too well known to permit of argument.

On the other hand, if the tariff duties were reduced or repealed and the internal revenue repealed there would be a large export trade in alcohol and spirits. This trade is now greatly restricted through the legislation of foreign countries, as you know. So whatever may be said about the influence of the tariff in fostering trusts in a general way, there is and can be no connection between the internal revenue or the tariff and the formation of trusts in whisky. Nor does either the tariff or internal revenue give any advantages to the whisky trade or to the large over the small distilleries. It is true that the internal tax induces people residing in mountain regions to engage in moonshining, but it does not and can not benefit the registered distiller who pays his tax.

The price of grain, which is fully two-thirds of the cost of spirits or whisky when made, the character of the water, the price of coal or fuel, the price of staves or barrels, the cost of transportation to market—these facts locate the places where distilling will exist to any extent.

This is no defense of trusts, whisky or otherwise. It is simply a statement of fact intended to show the relation, if any, that exists between the internal-revenue law and the tariff and the manufacture of distilled spirits. (By distilled spirits I mean grain product, for the entire repeal of the tariff on liquors would affect grape brandy, I expect, but never bring it in competition with grain products.)

In the discussion of tariff as a political or financial question the whisky tax is an important factor. It is so because of the large sum collected annually from that tax, and which renders less taxation on other things practicable. If the assertion is made that the tariff now in force encourages trusts or combinations, it is no sufficient answer to say: "Look at the Kentucky whisky trusts," waiving, in view of the foregoing facts, that Kentucky has no trust nor any combination akin to trusts, and never had. And admitting, as there is a Western whisky trust, the answer is yet totally insufficient. If the country was full of whisky trusts, their existence does not and can not depend on the tariff nor on the internal tax. There is and can be no competition with American grain spirits in United States by imported spirits. Two or more wrongs do not make a right; if trusts are wrong and injurious, and if they exist in the manufacture of articles strictly domestic, the fewer of them the better. If the tariff encourages trusts in articles made abroad, and competitive, if admitted at a lower range of prices, the remedy can not be found in pointing to trusts not affected by the tariff.

All trusts resting upon the tariff must be reached through the tariff, while the trusts in domestic goods not affected by the tariff must be reached by entirely different legislation. This legislation must, by the rate of tariff or internal tax, widen the field of competition if trusts are to be controlled or rendered, by commercial values, impossible or harmless. This must be done unless there can be enacted and enforced a statute prohibiting trusts of all kinds. The latter remedy is one full of complications, and possibly of restrictions, in directions where no evil can result. It is safer and more in accord with our Governmental doctrines to let commercial laws regulate trade than make the attempt by statute. You once stated in the Senate that the tariff fostered trusts, and the force of the charge

was met by referring to whisky trusts, etc. Does the tariff foster trusts was the question you raised. It does just so far as it restricts competition. A trust is an agreement among competitors by which competition is suspended, and so far as law works this result it aids and abets the purposes of a trust.

Then, is it not possible for all the manufacturers of the world of a certain article to form a trust? It is possible, but not probable, for the number adds to the difficulty, and a difference of conditions renders the agreement well-nigh impossible. The farmers of the United States can not form a trust because of their numbers and the difference in their conditions. Then, again, it will be said the only remedy for the total extinction of trusts effected by the tariff is in free-trade, and a suggestion to fight the tariff trusts by reducing the duty will be charged, if carried to its logical results, as leading to free trade in all competitive articles and in collecting all tariff dues from articles not produced in this country. But, however sound this charge may appear in theory, it is not sound in practice, for if the markets of this country in competitive force are turned over to another country, the same danger of trusts would at once arise in that country.

This is true if one country needs protection against another country; that is, if the principle of protection is a true one and based on facts, to destroy the industries kept alive by it is to again abridge competition. The only result that would follow would be a transfer of the trusts from one field to another. Or instead of a manufacturer's trust in this country we would have an agent's trust, representing foreign manufacturers. The point to be reached is to induce competition, and to do this the largest number of factories should be encouraged—the tariff so reduced as to accomplish this result. If the tariff is so laid as to equalize costs of production, protect labor and the capital invested—for one is useless without the other—then the best result has been obtained that is possible through the force of competitive laws.

A policy of restriction, as proposed in the Chicago platform, leads unerringly to the encouragement of trusts, and if that doctrine is applied it will have the Government actively engaged in three directions: Collecting revenue until the prohibitory point is reached, to be given back to the people or spent in extravagant ways; levying a tariff on articles not produced in this country when the prohibitory point is reached, such as tea and coffee; and thirdly, in enacting and enforcing a law to squelch the trusts and monopolies built up under the restrictive system.

As I understand the St. Louis platform, it contemplates the maintenance of our factories and the protection of our labor upon such basis as will hinder trusts, if not destroy them, and give to the people the money unjustly made by combinations, in addition to that now collected by the Government in excess of its requirements. This will induce competition and give new life to business, while it at least curtails the bounties of the trusts and combinations.

Does not the United States census give the increase in workingmen as well as the increase in population? My belief is, if this country is restricted to the home market, as proposed by the Republicans, the labor element will increase in greater ratio than consumption and the existing evils will be augmented year by year. We must consider the increasing difficulties in the way of establishing new industries or of making money rapidly in our country. This will add to the working element, which, with the aid of machinery, must vastly outgrow the consuming ability of the people other than workingmen, for the latter is a large consumer of the product of his own labor, and can not be benefited by taxing himself directly or indirectly. Then our public lands will soon be occupied and this outlet largely curtailed. So all the agencies at work conspire to increase the manufacturing working force at a greater ratio than the consuming force outside this working force.

If this is true, a policy of such restriction as the Republicans propose will bring this country like unto a great steam-boiler without a safety-valve and in which the steam is made faster than used, and a destructive explosion must follow. This constantly-increasing supply of muscle must compete with itself and lower its own value if pent up in this country. The true policy is, keep all of our markets not for trusts and monopolies to rob, but for the great body of the people, and at the same time get all the outlet we can. To this end let in raw material, for on this there has been little labor expended, and of all manner of wealth none can lie still until future generations need it, with so little expense and so little detriment to the people as raw material. God made it, or makes it every day, and even in the case of wool, the grass furnished by rain and sunshine does the work, and in it is but little of human sweat, toil, or risk.

And, as I once before wrote you, it is no answer to the demand for tariff reform to point to the increased wealth of the country. The country has wonderful resources, and has increased despite our civil war and its enormous taxation. As long as the country was thinly populated, lands at our doors to be fenced and cultivated at will, and our immense trunk lines of railroad to build, we were bound to grow. But we are rapidly, born as our nation was in the full glory of the nineteenth century with all Europe to fill up with, becoming an advanced people. We had no boyhood, and our years of middle life will be comparatively few. We must look quickly to all the ailments that beset the maturer age of a nation. We must continue to grow rich and honestly distribute that increase as far as law and justice can go.

Yours, truly,

J. M. ATHERTON.

Hon. JAMES B. BECK,
United States Senate.

Mr. ALDRICH. I offer a resolution to be referred to the Committee on Printing:

Resolved, That the report of the Committee on Finance, with the views of the minority, on the bill H. R. 9051 be printed, and that 6,000 extra copies be printed to be deposited in the document-room of the Senate.

The PRESIDENT *pro tempore*. Is that to include the views submitted by the Senator from Kentucky [Mr. BECK]?

Mr. ALDRICH. Certainly.

Mr. EDMUNDS. With the views of the minority.

Mr. HARRIS. The Senator from Kentucky is part of the minority and his paper is part of the report.

The PRESIDENT *pro tempore*. The resolution will be referred to the Committee on Printing.

Mr. MANDERSON. I am directed by the Committee on Printing to report back favorably the Senate resolution which I send to the desk, and I will state that the investigation as to the cost of the 6,000 copies has been made by the committee, and that it will cost less than $500 to print the 6,000 copies.

The PRESIDENT *pro tempore*. The resolution reported by the Senator from Nebraska will be read.

The Secretary read as follows:

Resolved, That the report of the Committee on Finance, with the views of the minority, on the bill H. R. 9051 be printed, and that 6,000 extra copies be printed to be deposited in the document-room of the Senate.

The resolution was considered by unanimous consent, and agreed to.

G. W. M'ADAMS.

Mr. WILSON, of Iowa. I ask the Senator from New Hampshire [Mr. CHANDLER] to yield to me that I may request the Senate to take up for present consideration Order of Business 2068, being the bill (H. R. 4765) for the relief of G. W. McAdams.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes the Postmaster-General to release and relieve George W. McAdams, postmaster at Mount Pleasant, Iowa, and his sureties, of all responsibility and liability to the Government for funds and property of the Government stolen from the post-office on the night of July —, 1885, by burglars, if he shall, upon examination, find that the loss was without negligence, fault, or blame on the part of the postmaster.

Mr. EDMUNDS. Is there a report in that case?

Mr. WILSON, of Iowa. There is a favorable report.

Mr. EDMUNDS. I ask the Senator from Iowa to tell us why this case does not fall under the general law provided for such cases.

Mr. WILSON, of Iowa. For the reason that the key-deposit fund, which is a small amount, $72, and also the postal notes which were stolen, are not embraced in the general law.

Mr. EDMUNDS. Let us hear the report.

The PRESIDENT *pro tempore*. The report will be read.

The Secretary read the following report, submitted by Mr. SAWYER August 9, 1888:

The Committee on Post-Offices and Post-Roads, to whom was referred the bill (H. R. 4765) for the relief of G. W. McAdams, have examined the same, and report:

The report upon which this bill passed the House is approved, and is as follows:

"Your committee, being satisfied that no danger can arise to the Government under the provisions of the bill submitting the question of negligence, fault, and blame to the Postmaster-General for his determination, recommend the passage of the bill."

The bill is reported favorably, with a recommendation that it do pass.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE LOUISIANA ELECTION CASE.

Mr. EDMUNDS. Regular order, Mr. President.

The PRESIDENT *pro tempore*. The Senator from New Hampshire [Mr. CHANDLER] is entitled to the floor on the resolution submitted by him in relation to the Louisiana election.

Mr. DAVIS. Mr. President——

The PRESIDENT *pro tempore*. The Senator from Vermont calls for the regular order.

Mr. COCKRELL. Pending that, I think we had better have a short executive session.

Mr. CHANDLER. Mr. President, I was not prepared for the——

Mr. HARRIS. Will the Senator from New Hampshire allow me?

The PRESIDENT *pro tempore*. Does the Senator from New Hampshire yield to the Senator from Tennessee?

Mr. CHANDLER. I do.

Mr. HARRIS. I was simply going to suggest to the Senator from New Hampshire, as the Senator from Louisiana [Mr. GIBSON], who has heretofore conducted the debate in respect to this resolution and evinced a good deal of interest in it, is detained from the Senate, as I understand, by indisposition, whether he will not consent to let this resolution go over until Monday when we may hope that the senior Senator from Louisiana may be present.

Mr. CHANDLER. I was about to state that I had not expected that opposition would be made to the passage of the resolution from anything that had been said by the senior Senator from Louisiana [Mr. GIBSON]. The junior Senator from that State [Mr. EUSTIS] has, however, called for the yeas and nays on the passage of the resolution, and under those circumstances I yield to the suggestion of the Senator from Tennessee and allow the resolution to go over until Monday in the hope that by that time the senior Senator from Louisiana will be here and indicate his opposition to the passage of the resolution, if he intends to make such opposition, as I have not understood that he did.

The PRESIDENT *pro tempore*. The resolution will resume its place on the Calendar.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes; asked a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURNES, Mr. SAYERS, and Mr. RYAN managers at the further conference on the part of the House.

DEFICIENCY IN APPROPRIATIONS.

Mr. COCKRELL. I move that the Senate proceed to the consideration of executive business.

Mr. HALE. Will the Senator withdraw the motion for a moment that the action of the House of Representatives on the deficiency bill may be laid before the Senate?

Mr. COCKRELL. I withdraw the motion for that purpose.

Mr. HALE. I desire to call up the deficiency bill that has just come from the House of Representatives.

The PRESIDENT *pro tempore* laid before the Senate the action of the House of Representatives non-concurring in the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes, and asking a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate further insist on its amendments, and agree to the request of the House for a further conference.

The motion was agreed to.

By unanimous consent the President *pro tempore* was authorized to appoint the conferees on the part of the Senate, and Mr. HALE, Mr. ALLISON, and Mr. COCKRELL were appointed.

REDUCTION OF LETTER POSTAGE.

The PRESIDENT *pro tempore*. The Senator from Missouri [Mr. COCKRELL] moves that the Senate proceed to the consideration of executive business.

Mr. COCKRELL. I yield to the Senator from Oregon [Mr. MITCHELL] for a moment.

Mr. MITCHELL. Yesterday I gave notice that in the event that the Senate should be in session to-morrow I would ask the courtesy of the Senate to allow me to submit some remarks on the bill introduced by myself looking to the reduction of letter postage to 1 cent per ounce. As the Senate has agreed to adjourn over, I now give notice that on Monday next, at some convenient time which will not interfere with the discussson of the tariff measure I shall ask the courtesy of the Senate to permit me to submit a few remarks on that bill. At the suggestion of the chairman of the Committee on Appropriations [Mr. ALLISON], who has charge of the tariff bill, I will give notice that immediately after the morning business on Monday I shall ask leave to proceed with my remarks.

Mr. ALLISON. I desire to give notice in that connection that at the earliest possible moment on Monday morning I shall ask for the consideration of the tariff bill.

EXECUTIVE SESSION.

Mr. COCKRELL. I now renew my motion.

The PRESIDENT *pro tempore*. The Senator from Missouri moves that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 36 minutes p. m.) the Senate adjourned until Monday, October 8, 1888, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate October 4, 1888.

COLLECTOR OF CUSTOMS.

E. D. Lynn, of Texas, to be collector of customs for the district of Saluria, Tex., *vice* Otto L. Threlkeld, deceased.

PROMOTION IN THE ARMY.

Fourth Regiment of Cavalry.

First Lieut. James Parker, regimental quartermaster, to be captain, October 2, 1888, *vice* Lawton, who resigns his line commission only.

CONFIRMATIONS.

Executive nominations confirmed by the Senate October 1, 1888.

INDIAN AGENT.

Beal Gaither, to be agent for the Indians of the Siletz agency, in Oregon.

Executive nominations confirmed by the Senate October 2, 1888.

ASSAYER.

Van Court Yantis, of Missouri, to be assayer-in-charge of the United States assay office at St. Louis, Mo.

POSTMASTERS.

Charles H. Tracey, to be postmaster at Anaconda, in the county of Deer Lodge, Territory of Montana.

John P. Gasper, to be postmaster at Kingsley, in the county of Plymouth and State of Iowa.

INDIAN AGENT.

Samuel S. Sears, of Elko County, Nevada, to be agent for the Indians of the Nevada agency in Nevada.

HOUSE OF REPRESENTATIVES.

THURSDAY, *October* 4, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of yesterday's proceedings was read and approved.

REFERENCE OF SENATE RESOLUTIONS.

The SPEAKER laid before the House the joint resolution (S. R. 104) to print additional copies of the United States map, of the edition of 1887, prepared by the Commissioner of Public Lands; which was read a first and second time, and referred to the Committee on Printing.

The SPEAKER also laid before the House the concurrent resolution of the Senate providing for the printing of 10,000 additional copies of the work known as The Growth of Industrial Art; which was referred to the Committee on Printing.

ABANDONED HOMESTEAD ENTRIES.

The SPEAKER also laid before the House the bill (S. 3559) to amend section 5304 of the Revised Statutes of the United States, to allow persons who have abandoned or relinquished their homestead entries to make another entry; with House amendments disagreed to by the Senate.

The SPEAKER. This bill has reached the stage where it is privileged, and if there be no objection, the House will insist upon its amendments, and agree to the conference.

There was no objection, and it was so ordered.

DR. JOHN B. READ.

The SPEAKER also laid before the House the request of the Senat. for the return of the bill (H. R. 10633) for the relief of Dr. John B. Read.

The SPEAKER. The Chair will state that on yesterday morning the House concurred in the Senate amendments to this bill; and if there be no objection the action of the House in that respect will be reconsidered, and the request of the Senate complied with.

There was no objection, and it was so ordered.

Some time subsequently,

The SPEAKER said: With reference to the bill, the return of which has been requested by the Senate, the Chair has ascertained that this bill was enrolled and signed by the Speaker on yesterday. If there be no objection, the Chair will direct an order to be made instructing the Clerk of the House to inform the Senate of the fact that before the request of the Senate was received the bill had been enrolled and signed by the Speaker.

Mr. HOOKER. What is the bill?

The SPEAKER. It is a House bill for the relief of Dr. John B. Read.

Mr. ROGERS. What is the present status of the bill?

The SPEAKER. It is in that position now, where, in order to secure its recall, it will be necessary that a concurrent resolution be passed by the two Houses.

If there be no objection, the order suggested by the Chair will be made.

There was no objection, and it was so ordered.

ADDITIONAL CLERK, COMMITTEE ON ENROLLED BILLS.

The SPEAKER. The gentleman from Texas [Mr. KILGORE], a member of the Committee on Enrolled Bills, asks the consideration of the resolution which was objected to by the gentleman from Ohio [Mr. EZRA B. TAYLOR] on yesterday, who subsequently informed the Chair that he withdrew his objection. The Chair will state that this resolution has been changed a little since it was offered on yesterday, and calls the attention of the gentleman from Ohio to that fact.

The Clerk will report the resolution.

The Clerk read as follows:

Resolved, That the Committee on Enrolled Bills be authorized to employ one additional clerk at the rate of $5 per day for the remainder of this session of Congress, to be paid out of the contingent fund of the House, the compensation to commence on the 27th day of September last.

Mr. KILGORE. I suppose I should make a statement in regard to the resolution. It is perhaps not generally known to the House that there is no other member of the Committee on Enrolled Bills present except myself, and within the last three or four days there have been as many as two hundred bills reported by the committee. To each of these there must be appended four separate reports. They are short, it is true; but they must all be written, and it takes considerable time. The regular clerk has been on duty continuously almost night and day except when he was sick, and then he employed a man himself to take his place. In addition to that he has employed an assistant for the last two weeks to aid him in the work. There is a great accumulation of business, and it is impossible for the clerk and myself to do it without additional help.

Mr. EZRA B. TAYLOR. Mr. Speaker, under a misapprehension of the facts on yesterday morning I objected to this resolution; but on inquiry I found I was mistaken and sought to withdraw the objection then. I think undoubtedly it ought to pass, and I hope there will be no objection.

The resolution was considered and agreed to.

Mr. KILGORE moved to reconsider the vote by which the resolution was agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had agreed to the amendment of the House to the bill (S. 3573) granting the right of way to the Pensacola and Memphis Railroad Company over and through the public lands of the United States in the States of Florida, Alabama, Mississippi, and Tennessee, and granting the right of way to said railroad company over and through the United States naval and military reservations near Pensacola, in the State of Florida.

The message also communicated to the House the following order adopted by the Senate:

Ordered, That the Secretary return to the House of Representatives House enrolled bill No. 10633, entitled "An act for the relief of Dr. John Read," with the message that before the delivery of said enrolled bill to the Senate a motion had been made in the Senate pursuant to its rules to reconsider the vote of the Senate passing said original bill, and the Senate had ordered that the House of Representatives be requested to return said bill to the Senate.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. CARUTH, indefinitely, on account of important business.

Mr. BAKER, of New York. I desire to request leave of absence for my colleague, Mr. WEBER.

There was no objection, and leave was granted.

ORDER OF BUSINESS.

Mr. ROGERS. Mr. Speaker, on last evening, while temporarily occupying the chair, the gentleman from Alabama [Mr. WHEELER] laid a request upon the desk asking leave to have some matter printed, I do not now remember what, which I inadvertently overlooked.

The SPEAKER. The gentleman will be in during the day, and the Chair will call the attention of the House to it.

Mr. ROGERS. Very well.

MARITIME CANAL COMPANY, NICARAGUA.

Mr. DUNN. Mr. Speaker, I ask consideration of Senate bill 1305. I ask unanimous consent to discharge the Calendar and take up the bill at this time for consideration.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (S. 1305) to incorporate the Maritime Canal Company of Nicaragua.

Mr. DUNN. This bill was read on Monday last and printed in the RECORD, and I suppose the formal reading of the bill may now be dispensed with.

The SPEAKER. The Chair will submit the request of the gentleman from Arkansas to dispense with the reading of the bill.

Mr. DUNN. I desire to make this additional statement. I hope the bill will be taken up, and if so I shall allow all fair and reasonable time for its full discussion. I do not desire to hurry it through. It is a bill of great importance, one which has engaged national interest for years, and I trust no gentleman will object to its full and fair consideration.

The SPEAKER. Is there objection to the present consideration of the bill.

Mr. WASHINGTON. I dislike, of course, to object to any man's pet measure, but this is a bill of too great importance to be considered in a House like this though I would not object to its consideration in a full House. I know there are a great many members who desire to offer amendments and debate the bill, who are not present.

Mr. DUNN. I desire to say to the gentleman from Tennessee that the fullest opportunity will be given to offer amendments. We could at least go on and debate the bill.

Mr. WASHINGTON. The members who desire to offer the amendments are not present.

Mr. BAYNE. I would suggest to the gentleman from Tennessee, if the bill be taken up and considered, he could at any time intercept its progress by making the point of no quorum.

Mr. DUNN. I hope the gentleman from Tennessee will allow the bill to be considered, and then after hearing and participating in the consideration, if he sees proper to do so, he can make the point of no quorum on the final passage of the bill, and so let it go over until a quorum appears.

Mr. BURNES. I would like to suggest to my friend from Arkansas [Mr. DUNN] that I could not consent to the bill being considered at length until after the House shall have acted on the conference report.

Mr. DUNN. I thought that was disposed of.

Mr. BURNES. It has not been, but will take but a short time this morning.

Mr. DUNN. I was not present at the close of the House yesterday, but I thought final action had been taken on the conference report.

The SPEAKER. Does the Chair understand that the gentleman from Tennessee objects?

Mr. WASHINGTON. I do.

Mr. DUNN. I hope the gentleman from Tennessee will withdraw his objection and make the point of no quorum on the final passage.

Mr. BAYNE. By that means the gentleman from Tennessee will have control of the bill.

Mr. WASHINGTON. I would state in reply to the gentleman from Arkansas [Mr. DUNN] that were we to go on with the consideration of the bill it would merely entangle the House in a call of the House from the mere fact that there is no quorum present.

Mr. DUNN. That could be obviated by having consideration of the bill, and then on the final passage the point of no quorum could be made and the consideration of the bill could be abandoned and go over until a quorum appears hereafter.

Mr. BAYNE. We could arrive at a satisfactory conclusion with reference to that.

Mr. WASHINGTON. I do not withdraw my objection for the present.

ORDER OF BUSINESS.

Mr. HOOKER. Mr. Speaker, I ask unanimous consent——

The SPEAKER. The Chair has recognized the gentleman from Arkansas [Mr. DUNN], and under the practice will now recognize a gentleman on the other side of the House.

PETROLEUM AS FUEL ON STEAMERS.

Mr. VANDEVER. I ask unanimous consent to discharge the Committee on the Revision of the Laws from the further consideration of the bill (S. 3427) to amend section 4474 of the Revised Statutes of the United States.

The SPEAKER. The Clerk will read the bill, after which the Chair will ask for objections.

The bill was read, as follows:

Be it enacted, etc., That section 4474 of the Revised Statutes of the United States be, and the same is hereby, amended by adding thereto the following: *Provided, however*, That the Secretary of the Treasury may permit the use of petroleum as fuel on steamers not carrying passengers without the certificate of the supervising inspector of the district where the vessel is to be used, subject to such conditions and safeguards as the Secretary of the Treasury in his judgment shall provide. For a violation of any of the conditions imposed by the Secretary of the Treasury a penalty of $500 shall be imposed, which penalty shall be a lien upon the vessel, but a bond may, as provided in other cases, be given to secure the satisfaction of the judgment.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none.

Mr. OATES. Mr. Speaker, I desire to say that the bill having been referred to a committee of which I am a member I have examined the subject. I can see no objection to the passage of the bill and I hope no objection will be interposed. It is simply to enable vessels not carrying passengers to use petroleum as fuel, and has the approval of the Secretary of the Treasury.

The SPEAKER. If there be no objection the committee will be discharged from the further consideration of the bill and it will be considered at this time.

There was no objection.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. VANDEVER moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

Mr. PEEL. I ask unanimous consent to take up for consideration the bill which I send to the Clerk's desk.

Mr. KILGORE. I demand the regular order.

APPOINTMENT OF CONFEREES.

The SPEAKER. The Chair will appoint as managers of the conference on the part of the House on the disagreeing votes of the two Houses on the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States, to allow honorably discharged soldiers and sailors of the late war who have abandoned or relinquished their homestead entries before the expiration of the six months allowed by section 2304 of the Revised Statutes to make another entry, the gentleman from Arkansas [Mr. MCRAE], the gentleman from Alabama [Mr. WHEELER], and the gentleman from Oregon [Mr. HERMANN].

The regular order is the call of committees for reports.

GENERAL DEFICIENCY BILL.

Mr. BURNES. As a matter of privilege, I ask for the further consideration of the report of the committee of conference on the general deficiency bill.

Mr. WHITTHORNE. Will the gentleman yield to me for one moment?

The SPEAKER. The gentleman from Texas [Mr. KILGORE] has demanded the regular order.

Mr. WHITTHORNE. But the gentleman from Missouri has the floor.

The SPEAKER. The gentleman from Texas has demanded the regular order.

Mr. WHITTHORNE. I wanted to ask unanimous consent for the present consideration of a bill to relieve certain citizens of Nevada.

The SPEAKER. The gentleman from Texas has demanded the regular order, and the Chair has no discretion but to proceed under that order.

Mr. BURNES. I ask the Clerk to read amendments 112 and 113.

The Clerk read as follows:

Industrial Christian Home Association of Utah Territory: To further aid the Industrial Christian Home Association of Utah Territory, under its articles of incorporation, in the establishment and maintenance of an industrial and educational institution in Salt Lake City for the benefit of the dependent women and children of Utah and Idaho Territories who desire to sever their allegiance to the Mormon Church, $75,000; and for contingent expenses of the association, $5,000; in all, $80,000.

The money hereby appropriated shall be disbursed by the treasurer of said association, who shall give such bonds for the faithful performance of his duties as may be deemed requisite by the Secretary of the Interior. All accounts of expenditures under this appropriation shall be audited by the Utah Commission, which shall hereafter act as the board of control for said institution, and shall make an annual report to Congress covering the work of said institution and its expenditures.

Mr. ROGERS. Will the gentleman from Missouri yield to me a moment for a suggestion? Reverting to the aqueduct investigation here, in view of the fact that this conference report will go back to the committee of conference, it has occurred to me since that matter was up here yesterday that if there was any doubt at all about the resolution as it now stands being broad enough in its scope to authorize the committee to have engineers from civil life employed to make further investigation into the character of the work, it ought to be made sufficiently broad to accomplish that purpose; because in a matter of so much importance, involving a couple of million of dollars—it will probably involve that amount before we get through with it—and where the derelictions seem to lie at the door of the Engineer Department of the Government, it may not be safe for the committee to rely exclusively upon investigations made by that department. If, on the other hand, the committee should find that it will not be necessary to employ civil engineers to look into the matter further, then of course the expense need not be incurred. But we can not tell in what direction or in what line an investigation of this kind may extend, and I think the resolution should be made broad enough to enable the committee to call in engineers from civil life, if they shall find it necessary or important to do so.

Mr. BURNES. I think the resolution is broad enough to cover the suggestion of the gentleman from Arkansas. That part of the resolution which provides that the committee shall have power to employ experts would, I think, cover the point.

Mr. ROGERS. If so, of course my suggestion is not necessary.

Mr. BURNES. But the committee will consider the matter carefully and thoroughly. The object of the committee—and if we do not accomplish it we shall fail only in ability—is to have a full and thorough investigation, so that all the information upon the subject that can possibly be of any value may be obtained and communicated to the House. But if the resolution shall be found insufficient it will be enlarged in conference.

Mr. Speaker, the Senate amendments which have just been read are to my mind exceedingly——

Mr. ROGERS. Novel.

Mr. BURNES. I was about to say ridiculous. It is difficult to select a proper word to describe them. They are, thanks to my friend from Arkansas, most novel, unique, unparalleled, and unprecedented. They do not express a high order of business judgment or discretion, nor that practical common sense which we usually expect from a Congressman, even if he serves elsewhere than in this House.

I wish to call particular attention to the language of these amendments. The first proposition is that $80,000, including $5,000 for contingent expenses, shall now be appropriated and placed in the hands of the treasurer of the Industrial Christian Home Association of Utah Territory to further aid that institution, under its articles of incorporation, in the establishment and maintenance of an industrial and educational institution in Salt Lake City, for the benefit of the dependent women and children of Utah and Idaho Territories who desire to "sever their allegiance to the Mormon Church."

The second amendment provides, substantially, that this money shall be used by this private corporation, without limitation or restriction, upon a mere sentimentality which underlies the whole proposition.

In order to have before the House all the law bearing upon the subject I will commence with the commencement.

The first provision with regard to the matter will be found in the sundry civil appropriation bill for the year ending June 30, 1887. It was an amendment put upon that bill by the Senate (and in the conference the House was compelled to yield, or did yield, to it at the time), and was intended merely to aid in the support of indigent women and children whom the rigors of Federal laws against polygamy had made homeless and husbandless and fatherless. It is as follows:

INDUSTRIAL HOME IN UTAH TERRITORY.

That is not the name of the private corporation now figuring in our deliberations.

To aid in the establishment of an industrial home in the Territory of Utah to provide employment and means of self-support for the dependent women who renounce polygamy, and the children of such women, of tender age, in said Territory, with a view to aid in the suppression of polygamy therein, $40,000; said sum to be expended upon requisition of and under the management of a board of control, to consist of the governor, the justices of the supreme court, and the district attorney of said Territory; and the said board shall duly and properly expend said sum, or so much thereof as may be necessary for the purpose herein indicated, and shall, from time to time, report to the President their acts and doings and expenditures hereunder for transmission to Congress.

I ought perhaps to say in this connection that the Senate amendment was for $50,000; but in conference the Senate submitted to a reduction of $10,000, making the amount $40,000.

Under the provision of law just read the board of management proceeded to rent a private residence in the city of Salt Lake, for which they agreed to pay $45 per month; and at an expense of some $2,000 they furnished this house, and placed it in charge of some ladies representing this private corporation. For ten months the institution thus established was carried on by them, when for some reason or other the representatives of the corporation alluded to came to Congress, and, as we learned from a speech made the other day in another body, and through a distinguished gentleman from the State of Vermont, prepared an amendment to the general deficiency bill, and had it incorporated therein. That Senate amendment on the general deficiency bill, at the last session of the Forty-ninth Congress, was acquiesced in by the conferees on the part of the House. It is a very peculiar amendment. Another peculiar feature of the proceedings which have been had in reference to this matter——

Mr. STRUBLE. Will the gentleman permit an interruption?

Mr. BURNES. Yes, sir.

Mr. STRUBLE. In order that I may clearly understand this matter, I wish to ask whether the gentleman is now referring to the first appropriation made by the Forty-ninth Congress.

Mr. BURNES. I have just referred to the first appropriation, and am now referring to the second.

Mr. STRUBLE. Was not the first appropriation made by the Forty-ninth Congress?

Mr. BURNES. The first was made at the first session of the Forty-ninth Congress; and the second was attempted to be made at the second session of the Forty-ninth Congress.

Mr. STRUBLE. And that is the one you are now referring to?

Mr. BURNES. It is. It will be remembered that at the second session of the Forty-ninth Congress the general deficiency bill failed for want of time, as alleged, on the part of the Senate. In consequence of that failure the provision of course did not take effect; but in the agreement between the representatives of the two Houses upon these questions, the general deficiency bill, which failed at the closing session of the Forty-ninth Congress, was made a special deficiency bill at this session of Congress; that is to say, all that had been agreed upon in conference was made the subject of a special deficiency bill except where circumstances had demonstrated that an appropriation was unnecessary.

This was done in order to remedy promptly the evils which the failure of the bill had caused. The bill, thus framed, contained this second amendment of the Senate, which I will now proceed to consider; and I want to call the attention of gentlemen particularly to the growing desire therein manifest, to take the expenditure of this money out of proper hands and place it in unofficial hands, and hands perhaps but poorly qualified for the business-like disposition of large sums of money:

Industrial Christian Home: To aid the Industrial Christian Home Association of Utah—

There, for the first time, we strike the corporate name of this private corporation organized under the laws of the Territory of Utah—

in carrying on under its articles of incorporation the work of providing employment and means of self-support for the dependent women who shall have renounced polygamy, and their children of tender age, $40,000.

That is $40,000 in addition to the first appropriation.

But the unexpended balance of the appropriation for aiding in the establishment of an industrial home in the Territory of Utah contained in the act of Congress approved August 4, 1886, entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes," shall be deemed a part of this appropriation; and the board of control mentioned in said former appropriation shall audit the expenditures under this appropriation and report yearly to the Secretary of the Interior."

I want gentlemen to observe particularly that in this attempt to change the responsibility, and I may say official management in the expenditure of this money, insufficient language was used, for it says, "the board of control mentioned in said former appropriation shall audit the expenditures." It was an added duty on the board. It did not repeal the law making them a board of control in the expenditure of the money. It was an attempt to reduce the board of control to the position of mere auditing officers with reference to the expenditures to be made, as was hoped by this private corporation. But fortunately the Secretary of the Treasury, and perhaps others, took the view that this language did not effect the object desired, that the board of management was not displaced by reason of this provision; and consequently that the board of management remained the same under the second law as under the first, and lawfully controlled the expenditure of all the money appropriated. It has been claimed, however, by the corporation authorities, and by gentlemen who control this project in the other end of the Capitol, that the second law vested the right of expending these appropriations in the private corporation called the

"Industrial Christian Home Association of Utah;" but notwithstanding the law, that corporation, it is said, has consented that Governor West shall hold the money, but allow the corporation to expend it as it pleases.

Contrast the pending propositions with the preceding legislation and you will find that what was not even intimated in the first proposition, but which was attempted in the second provision of legislation, is now boldly attempted by this third effort on the part of gentlemen, and to take this appropriation from the control of legitimate officials and place it in the hands of private persons or a private corporation. I do not know how far I can make allusion to speeches made in the other end of the Capitol or language used in conference, but I feel authorized to go as far as gentlemen have gone in discussing this proposition in the Senate. Therefore I say in the conference, we were told distinctly that the language used severing "allegiance from the Mormon Church" was absolutely and indispensably necessary and would not be yielded under any circumstances.

It was regarded by your conferees as a proposition in the nature of offering a home and provisions—in short a bribe under pretense of charity—to poor deluded women, as we think, to induce them to "sever their allegiance to a church." In such an affair as that we can not consent to be a party. We seek to avoid all interference in matters ecclesiastic, and have nothing to do, in making appropriations, with severing church allegiance.

No member of this House will be accused of any relationship to this church I trust, because he is of opinion that it is not the province of our Government to enter the field of churchmen as a proselyte, although it has been said in another place than this that the Mormon Church is actively opposed to the legislation under consideration. I presume gentlemen who make such a statement have some information in support of it and have not recklessly made the hazard of an assertion that they ought to be prepared to maintain as a fact.

The House Committee on Appropriations have seen nothing tending to justify the remarks to which I have alluded. No member of that committee has been advised by the Mormon Church or any of its representatives, if any such are here. If they have given their confidences to members of another body it was their right, and we do not complain.

We take notice of the laws of the country and learn from them that polygamy is forbidden; that it is under the ban of Congressional legislation, and ought to be eradicated, even if a constitutional amendment were required to accomplish the work. But our work ends with polygamy and does not reach over into the realm of church allegiance, or into the moral consciences of men or women. The fact of polygamy is to be assailed. We attack its practices as a crime, and punish those who commit it. But we punish the body and not the soul of a criminal. We punish for acts not thoughts—for words, sometimes, but never for sentiments entertained.

A distinguished gentleman said elsewhere on Tuesday:

> Whatever lapses there have been on the part of Congress and the Executive in dealing with the monstrous evil of polygamy in Utah and the adjacent Territories of the United States; however delinquent the Government may have been in dealing with that evil, and however much the Mormon hierarchy may have profited by these lapses and delinquencies, no part of the fault for all this can be laid at the door of the women of America.

What "lapses" on the part of the Executive have occurred? Have gentlemen so soon forgotten the noble words of the President in behalf of the sanctity of the home and of the institution of marriage? Have they no remembrance of the grand results of his administration, which have almost destroyed polygamy from the face of our land? It seems that one gentleman at least has the courage of insinuation, if he lacks the courage to make a direct statement. He intimates that there have been lapses in dealing with polygamy on the part of the President.

I do not wish to say one word which would be unpleasant to my friends on my right, not a word. But it is due to the President of the United States. I should say that thirty years ago the Republican party denominated the institution of polygamy as the twin relic of barbarism and promised the country to destroy it; but like many other promises made in the past concerning great national questions it has not been redeemed. Nor was any practical progress made by administrative or executive action until the present administration of Grover Cleveland came into power.

True, there was some legislation prior, some feeble efforts from time to time; but for twenty-four years of Republican administration we had no results in the destruction of this great evil by administrative effort and practically none by legislation. But in four years of this Administration polygamy has been practically destroyed.

Criticism should have been avoided by the gentleman, as it has made necessary a contrast between the results of twenty-four years of Republican administration with four years of Democratic administration, and by such contrast there are gentlemen who will be put to an open shame, much to my regret.

Mr. Speaker, what this House through its conferees offered to do in order to harmonize with the Senate on these amendments——

Mr. DINGLEY. Will the gentleman pardon me for interrupting him just there in order that I may understand exactly the position of this matter? Do I understand the gentleman to state that the Senate conferees refused to take from amendment No. 112 the words to which he has referred—"who desire to sever their allegiance to the Mormon Church?"

Mr. BURNES. Yes, sir. When the conferees of the House reached these amendments they were told that the words quoted by the distinguished gentleman from Maine would not be surrendered under any circumstances, and it was not until the second day of the conference we were told that if we could agree upon the other conditions they, the Senate conferees, would waive the language "sever their allegiance to the Mormon Church."

Mr. DINGLEY. Because I understood that the Senate conferees took the position that they were entirely willing to surrender these words; that they were not essential.

Mr. BURNES. That was done at the last moment, and not until near the expiration of the conference, but we now make no issue upon that. It may be considered as yielded by the Senate conferees. But it is still in the Senate amendment and is before the House.

Now, what is the pending proposition? It is a proposition, as it stands, to take $135,000, with six or eight or ten thousand dollars (we know not how much) of it expended, $40,000 of which are now in the hands of the governor of Utah Territory, and place it all in the hands of a private corporation controlled by individual people living, some in Salt Lake City, some in one place, and some in another, mainly, I may say, married women whose business qualifications have never been successfully demonstrated, so far as I know, upon any field of business activity or in any branch of business enterprise. Their respectability is not called in question; their business capacities and experience are, perhaps, practically untried.

Mr. STRUBLE. Will the gentleman pardon me for a moment to ask whether or not it is true that there are gentlemen of respectability residing in the city of Salt Lake who are connected with the institution as members of the board of directors, or in some such capacity?

Mr. BURNES. There are names appearing in the articles of incorporation that indicate that there are men connected with it; but I can say that the life and the soul and the body of the whole institution is the creation of a lady of rare mental and moral endowments—Mrs. Newman—who has represented its interests here from the beginning. Whatever names may be used, and whatever gentlemen may be in the background, this institution is one of women.

Mr. DINGLEY. Just as in the case of many other beneficial and reformatory institutions, I suppose.

Mr. BURNES. Certainly. I have no objection to make to that; but that, as you will see when I come to state the ground upon which we offer to harmonize, has a direct bearing on the suggestion made by the House conferees, and I think you will see and admit that the proposition of the House conferees was just, fair, and even liberal. We say to the Senate conferees, you want a home, a permanent home, if you please, into which can be received the destitute women and children who have abandoned or proposed to abandon polygamy. You want a new house on a new lot, and you want that house furnished, and you want annual supplies from the Government, almost exclusively. A little is expected, perhaps from private contributions or private charity, but it is practically admitted in the papers here that the institution must rest upon the Government of the United States for yearly maintenance. We say we will let this institution be established, we will build you a house that will cost $50,000—that is, the house they want—we will build this house and furnish it and provide all the money necessary to accomplish these ends.

When we shall have built you this house and furnished it we will place it under the control and in the hands of the corporation represented by Mrs. Newman and her associates for management as a public institution of the United States. They shall manage it. We will define simply by law or regulation the classes of people who shall be admitted into the institution; and in that respect I will say that we offered and again offer to make these classes embrace all the people who it is claimed have been rejected under the management of Governor West; that is to say, in the report of the commission and of the corporation it appears that certain classes of women were not allowed to be admitted into the home, such, for instance, as first wives and girls who had been introduced into the Territory, not knowing that polygamy was one of the institutions of the church.

Now, so far as the classes are concerned, we propose, after we shall have built this house on business principles, and after we shall have furnished it to their heart's content, to place it under the control of this private corporation and make an appropriation for its support which that corporation will expend. Five thousand dollars are asked for contingent expenses.

This private corporation has some contingent expenses. For what? It is alleged that it is to pay traveling expenses of parties who will have to go East or elsewhere in search of teachers, in search of people who are to take charge of the interests of the institution, etc.; and also to pay the expenses of indigent females who want to enter the home, but who can not get from their places of residence to the city of Salt Lake where the home is to be located. We are disposed to recognize the great work of Mrs. Newman as justifying a proper payment to her for

expenses incurred and to be incurred in behalf of the enterprise, whatever of success or non-success may result; and for that purpose, and that alone, we would probably agree to one-half the sum proposed for contingent expenses.

Mr. STRUBLE. Will the gentleman permit me to interrupt him before he passes from that to the discussion of other points? I would like to inquire what the conferees propose in regard to who shall decide upon the admissions to this home? I understand that up to this time the authority to decide that question rested with the governor of Utah; and I would like to hear if the matter has been discussed, and, if it is proper to disclose it, what the conferees of the House proposed to the conferees of the Senate on that point.

Mr. BURNES. I have stated, and will state again, that these ladies claim that there were certain classes of applicants for admission into the home which were rejected by Governor West, in consequence of which some forty or fifty destitute women and children were deprived of the benefits of this home. That is the claim that has been made.

Mr. STRUBLE. That much I remember.

Mr. BURNES. I have seen the statement of this corporation as to the classes that it alleges have been denied admission by Governor West, and also the claim of the corporation as to the classes it desires to have admitted, and if I am not mistaken as to its suggestions, we are willing to recognize those classes as proper objects for admission into the institution.

Mr. STRUBLE. And the authority of deciding upon that rests still with the Government?

Mr. BURNES. Not at all.

Mr. STRUBLE. Then I would like to know in whom the conferees propose to repose this authority.

Mr. BURNES. It was reposed wholly by law. We prefer to define the classes by law, but it can be done by regulations from time to time by the Interior Department. In view of the fact that other and new classes may be presented in the future for admission, we think in some respects the giving of the power to the Secretary of the Interior to make from time to time regulations as to these classes of people to be admitted will prove convenient and advantageous.

But, if it is objected that the Secretary of the Interior ought not to be allowed from time to time to make regulations defining the classes of people who are to be admitted to a Government institution, which the Government has to pay for and support, and the subject should not be settled by law, but left to the will of this corporation, then, indeed, we can not too quickly abandon the whole business and employ some one by contract to take care of and maintain all the poor of Utah Territory.

Mr. STRUBLE. The reason I asked the question was that I had an intimation that it was the fault of the conferees to suggest, or to provide, or to endeavor to provide, that the Secretary of the Interior should be authorized to decide upon certain classes or upon all classes not distinctly provided for in the law that should be admitted to the home.

Mr. BURNES. We suggested to the conferees on the part of the Senate that in our judgment vesting this power in the Secretary of the Interior would give an elasticity to the powers of the corporation that would not exist if we put the regulations in the law. But upon that provision the Senatorial conferees can take their choice. They can either embrace all these classes in the law or they can allow the Secretary of the Interior from time to time to define the classes that shall be admitted.

When this new building is finished and furnished it goes into the hands of this corporation without limitation or restraint as to the domestic management. They should be required to make report as to how they expend the money, and be required to expend it in the support of the classes of people nominated in the law or nominated in the regulations of the Secretary of the Interior. That certainly is not an unreasonable requirement.

As for Governor West and the judges of the supreme court, they have established this home and have managed its affairs for nearly two years. They have not failed to act in accord with the representatives of the corporation so far as the law allowed; and the success of the management can be understood in view of the fact that the highest number of inmates in the home at any one time was twenty-seven, and the average of such inmates has not been more than seven.

Mr. DINGLEY. I would like to ask the gentleman whether the reason for that does not lie in the fact that the governor rejected a large proportion of those whom the institution was intended to benefit—somewhat over one hundred, for example, in ten months.

Mr. BURNES. A claim of that sort is made by the representatives of the corporation, but after two years of effort, two years of advertisement, and an extraordinary appropriation almost without restraint or restriction in its expenditure, the inmates of the home to-day are one woman and five children.

It has been reported to us officially that $6,900 were expended for the first ten months in and about the institution. The expenditures since have not been reported officially, but in one of the papers I find it stated by the corporation that the amount expended up to August last is $13,500. At this point I want to call the attention of the House to a business fact. The gentlemen who discussed this question with us in conference, and one of them who has addressed another legislative body upon it, have labored under the delusion that only $40,000 had been appropriated for this institution. By telegraphing to the Treasury Department I have learned that during the first ten months of the existence of the institution there was drawn from the Treasury $10,000 in four equal installments, and in July last $40,000 was drawn; making $50,000 in all that passed from the Treasury into the hands of this board of management and control.

I find in the reports made here no mention by any of the parties out in Salt Lake City of more than $40,000. It is not stated in any paper or report that the amount is more than $40,000; yet the fact is that they have received $50,000. I ought to say, however, that they have paid back about $1,100, leaving $48,800, or thereabouts, in the hands of these people, or some of them, I presume in the hands of the governor. What use he could have had for the last $40,000 is not explained.

In his hands for what? To support one women and five children! Now, my friend from Maine [Mr. DINGLEY] asks me whether there would not have been inmates of this home if Governor West had been more liberal in admissions.

Mr. DINGLEY. Before the gentleman leaves that point, I would like to ask whether there is not a building in course of construction, upon which there has been a considerable amount expended apart from the mere expenses of carrying on the institution, which is rented?

Mr. BURNES. I heard a speech the other day in another place, and in that speech I heard the statement that our proposition was to build this home through the agency of the Treasury Department, and that on that plan it would require three years to finish it; but that already the foundations were laid and the work was rapidly progressing on the central part of the building. That was the first time I had ever heard the statement that work had been commenced on the new building.

I believe that if any contract were made, it was without authority of law, even conditioned to take effect upon a further appropriation by Congress. I do not believe the work is in progress, but I do not know; I do not assert it as a fact that it is not, but I have no information that would justify me in believing that it is.

Mr. DINGLEY. Having suggested the statement by my question, I now wish to name my informant. I learned from Mrs. Newman, who has been more prominent, perhaps, than any other lady in this matter, that a building is in process of construction, and that the walls are up, or nearly up; at any rate, that some $18,000 has been expended upon the building.

Mr. BURNES. All I need say in reply to that is that I have very great respect for Mrs. Newman and for any statement she makes. Mrs. Newman, however, has not been there for some time, and I am quite certain that if she makes that statement she is mistaken. At least I have had no such information from Mrs. Newman, and I have conferred with her upon the subject. I need not repeat what I have already said, that I have great respect for her statements and great respect for her, but I can not believe that this work is in progress, as has been stated by the gentleman from Maine.

I find in these papers before me, coming from this corporation, that a lot was bought and a contract let for the erection of a building by the corporation, to cost $18,000; that the corporation has done this under the provisions of the second law which I read. I call attention to the fact that there is no power given to this corporation to make any such contract, there is no power given to it to spend one dollar in the erection of a new building or in the purchase of ground. Indeed I may say there is no power given to the corporation to handle one dollar of this money except at the discretion of the board of control, of which the governor is chairman.

This sum of $40,000 is now in the hands of the governor out there. It is said that $10,500 have been paid for a lot. But I will not stand upon the fact that neither the corporation nor the board of control had any more power to buy that lot than I had. They say they have bought a lot for $10,500. I am willing the Government shall take the lot, shall recognize the transaction, irregular as it is, recognize the expenditure, and have the title of the lot made to the Government. Then they say that there is a contract to build on that lot an $18,000 house, and that the plan contemplates ultimately its extension. Now, I will go further and say that if there be such a contract, I am willing, in the spirit of healing the business judgment of the corporation managers, to have a provision made which shall take care of any such contract, if one has been made. If in good faith there has been a contract made and the work is progressing, I am willing that we shall recognize it, and carry it on to completion under the contract.

Mr. RYAN. Let me ask my colleague on the committee a question at this point. Suppose it be true that there is a contract for the construction of this building—the entire building—a portion of it contingent upon further appropriations, how is it practicable under such circumstances to turn the work over to the Treasury Department?

Mr. BURNES. I answer my friend and associate in just this way: So far as that alleged contract is concerned, we will ascertain its condi-

tion; and if there be a valid contract, a contract entitled to the respectful consideration of any gentleman on this floor, we will take care of that in its order and according to the necessities of the case.

Mr. RYAN. Ah, but that does not answer my question. I assume that there is a contract for the construction of a building, that it provides for constructing a building according to certain plans and specifications. Now the question I ask is this: If you are to carry out that contract in good faith, how are you to turn the work over to the Secretary of the Treasury?

Mr. BURNES. I was going to say further, in answer to my colleague, that if the work is in that condition we will set apart the $18,000 contracted to be paid for it and let the work be finished. But the additional work, the work on the wings or extensions, is not under contract; that is not pretended by anybody.

Mr. RYAN. It is pretended that it is under contract, subject only to the contingency of Congress making appropriation to pay for the work?

Mr. BURNES. Then, if that contingency exists, we are not bound to recognize the contract as extending to the wings, because in making the appropriation we can provide that we will not ratify the contract to that extent.

The Secretary of the Treasury can, through his agents and instrumentalities, extend this building, erect the additional buildings; and I call the attention of my colleague on the committee to the fact that in the estimates sent in here by this corporation it is expressly stated that they want $50,000 for the purpose of putting another story upon this building now under contract. That is business for you with a vengeance—they contract for the erection of a building with ample means under their control, and then ask more money to put another story upon it! I give this as a sample of the business wisdom with which this money will be expended if placed under the control of this corporation.

It is said the treasurer of this private corporation is to give a bond for the faithful distribution of this money; and it is also said that we have used the word "he" in the law, and that this necessarily implies that the treasurer must be a male, although at present I understand the treasurer is a female, under disability with regard to making bonds in consequence of being a married woman. What sort of a bond would a married woman make as treasurer for the disbursement of United States funds?

Away with all that! I am perfectly willing for this money to be expended as all other moneys of the United States are expended—by a proper disbursing officer to be appointed under existing law. If those who ask this appropriation object to accepting the money in that way, then it is not so much the institution that they want, it is not so much the suppression of polygamy that they are after, as it is the cash in the hands of irresponsible parties who are not officially authorized to receive it.

Mr. STRUBLE. Has the gentleman examined the statutes of Utah sufficiently to be able to state that under those statutes a woman can not give bond in a case like this?

Mr. BURNES. I have not; it may be that she can.

Mr. STRUBLE. I understand the laws are very liberal out there. I did not know but that in this respect the law might be as it is in the State of Iowa. In our State a woman can give bonds.

Mr. BURNES. I will ask to have printed in the RECORD as a part of my remarks some of the documents to which I have alluded, so that this whole matter may be made of record for subsequent legislators who may be called to consider it.

I close by saying that we are perfectly willing to give to this institution the control of the building and its management. We are perfectly willing to define by law the classes of inmates, or to give the Secretary of the Interior authority to regulate from time to time what classes shall be admitted, with a view of extirpating polygamy. We are willing that the purchase of the lot shall be recognized and the lot turned over to the Government. If there has been a contract made in good faith and work done under it, if the foundations have been laid as alleged, we are willing to recognize that work. It was never claimed until yesterday that any more work had been done than the laying of the foundations; now we are told that the work is already finished, or nearly so.

We are willing to recognize this thing in good faith. We are willing to create a great charitable institution. We are willing to do anything to suppress polygamy, We are willing this private corporation shall have control of it. We are willing to take this contingent fund and make provision for the payment of the services of Mrs. Newman, who has represented it from its inception and who ought to be paid something for her services if we recognize this institution at all. We are willing to do this, and the only thing between the inclination of our minds and gentlemen on the part of the Senate is that we will not allow this money to be transferred from the hands of Governor West to the less responsible hands of the treasurer of a private corporation, but insist that the money shall be placed in the hands of a disbursing officer under the United States. And that is all there is between us to-day.

It is simply a question who shall expend this money for the building of this new house. The old house is there. They are occupying it. Let them continue to occupy it. They have properly the control of it. They have properly the right to operate it until we build this new building. Let us build it as rapidly as possible. Let us make it as complete as possible; but when we do it we say we will do it in our own way, and that the expenditure shall be under the control of the disbursing officer of the United States. We want to do it in the right way.

Mr. STRUBLE. What way is the right way? The Senate amendment contemplates the expenditure under the appropriation made shall be audited by the Utah Commission, which shall hereafter, in the language of the amendment, act as a board of control for such institution and shall make an annual report, etc. If I understand the gentleman from Missouri correctly, he has argued against any authority being reposed in this private corporation or industrial home organized under the laws of Utah.

Mr. BURNES. No, sir.

Mr. STRUBLE. You have argued against giving them any such power.

Mr. BURNES. Only as relates to the building of this house.

Mr. STRUBLE. What objection has the gentleman to giving the power which the language of the amendment confers upon the Utah Commission?

Mr. BURNES. What objection can the gentleman urge against placing the expenditure of this money in the hands of the proper disbursing officer of the United States?

Mr. STRUBLE. I have no objection to that, but it seems to me as made the proposition is liable to change the power of control from the governor, judges, and district attorney and establish another board with power and responsibility connected with it, and that is objectionable.

Mr. BURNES. I have two objections. In the first place, it is legislating still further on an appropriation bill; and in the second place, the Utah Commission can be no better prepared to attend to this than the present board of control. But your amendment proposes to take it away so far as the expenditure of the money is concerned from the board you allude to.

Mr. STRUBLE. Permit me a single question. The governor of Utah in his report recommends the governor, judges, and district attorney shall be relieved from these duties.

Mr. BURNES. I know the gentleman wants to be fair.

Mr. STRUBLE. I do, certainly.

Mr. BURNES. The governor of course realizes, as we all do, there is a manifest impropriety or inconvenience in his having the control of the expenditure of the money for the ordinary current expenses of the institution; but the governor has never yet intimated, if his duty were to build or furnish a building under the direction of the Secretary of the Treasury, he would not have time to attend to that. The Senate gives the management away from the Government and gives the general management to the corporation. We are trying to put this money in a safe, business-like channel, and that is all.

Mr. RYAN. Mr. Speaker, I can scarcely comprehend the motive of my estimable colleague [Mr. BURNES] in trying to give a partisan character to this discussion. It will strike those who are familiar with the legislation of Congress for the suppression of polygamy, and those Christian people, men and women, throughout the United States who have been engaged for years in efforts to suppress polygamy in the Territory, as somewhat remarkable that a member should stand on the floor of this House and declare that until Grover Cleveland raised his strong arm against polygamy nothing was done in this country to eradicate it.

Mr. SAYERS. Allow me a question right here.

Mr. RYAN. To all those familiar with that legislation, to all those who have been engaged in efforts to suppress polygamy in the Territory——

Mr. SAYERS. Will the gentleman permit a question?

Mr. RYAN. If the gentleman will wait a moment until I conclude the sentence. I say to all those familiar with that legislation, and engaged in efforts to suppress polygamy, that statement of the gentleman will appear somewhat remarkable, and they will be disposed, at least, to give my colleague the full measure of credit for originality.

Mr. EZRA B. TAYLOR. And the Mormons themselves seem to misunderstand the position.

Mr. RYAN. The suggestion just made by my friend from Ohio will strike the country with great force. There must be a low degree of intelligence among the Mormons, they must grossly misapprehend the situation, if it be really true that the Democratic party and this Administration are such terrible enemies of their pet institution. So far as I remember, no Representative has ever been sent to this House by Mormon votes who has occupied a seat on the Republican side of it. They have always been politically associated upon the floor of the House with the Democratic side, and with my colleague who has just lauded Grover Cleveland and the Democratic party for completely eradicating this evil from the Territory of Utah. Why, sir, when a gentleman stands on this floor and declares that polygamy has been to any considerable degree suppressed in the Territory of Utah he talks that about which he knows evidently but little. It exists there to-day in well-nigh all its

former proportions; and the most that can be said is that honest efforts are being made to suppress it.

Mr. SAYERS. Will the gentleman now yield for a question?

Mr. RYAN. I will, with pleasure.

Mr. SAYERS. In 1862 and 1882 Congress passed two acts, highly penal in their character, against polygamy. Will the gentleman inform us how many prosecutions under Republican administrations were instituted and conducted under those two acts? Will the gentleman please answer that question?

Mr. RYAN. I have not investigated the subject.

Mr. SAYERS. I will tell you——

Mr. RYAN. The gentleman can take his own time; I decline to be interrupted for the purpose of having injected a speech in my remarks.

Mr. SAYERS. I will take my own time.

Mr. RYAN. This I will say, that so far as I know all measures that have originated in Congress for the suppression of polygamy have originated on the Republican side of the House or in a Republican Senate; and if there has ever been a voice raised or a vote cast against legislation of this character, it has not come from the Republican side of either House.

Mr. FARQUHAR. The House has followed the initiative of the Senate always.

Mr. RYAN. Always, I believe.

Now, sir, I do do not care much about this feature of the question. I did not come here this morning with any idea that anything of a partisan nature would arise in this discussion. I thought we would discuss the subject before the House and nothing else, and to that I propose for a moment to address myself.

The organized Christian women of this country, represented very largely by the National Women's Christian Temperance Union and the National Women's Home Missionary Society, representing over 300,000 women of America, have had for years their attention turned towards this great evil. Mrs. Newman, one of the noblest women in this country, has devoted her energies, her ability, and great heart to the suppression of this evil for years—for a long time she represented one or the other, if not both, of these associations in missionary work in Utah Territory. She and her associates found that as a means of eradicating this wrong some provision must be made for the dependent women who desired to discontinue their polygamous relations, and for their dependent children, or otherwise they must remain in their polygamous condition. Consequently these Christian women, under the laws of Utah, incorporated themselves into an association called the Industrial Christian Home Association of Utah.

The object of this association was to make temporary provision for the care of women who desired to abandon their polygamous relations, and also for the care and maintenance of their dependent children. They appealed to Congress for help. They wanted to establish an institution where they could give temporary work to such women, and take temporary care of such children and provide for their education. They appealed, I say, therefore to Congress for assistance. The result of the appeal was the enactment of the first law to which my colleague has called attention. That law provided an appropriation of $40,000 for that purpose. But it provided also that the expenditure should be made under a board of control, as it was called, consisting of the governor of Utah, the chief-justice, and the United States district attorney for that Territory.

But what was done? Practically nothing. Those to whom it was intended to extend the benefits of the law were denied admission. I do not say they were improperly denied; but I do say that the governor gave such an interpretation to the law as excluded, in the short space of ten months, over one hundred of such people who sought admission. Did he attempt to establish a home or to construct one? Did he even purchase ground for the building? Not at all. What did he do? He simply leased a building, wholly inadequate for the purpose, wholly unsuited to carry out the objects of the law, which was to provide industrial training and education for the class of people referred to. Nothing of that kind was attempted. He made no provision for industrial training whatever.

The provisions made were wholly inadequate; and what was the result? These philanthropic ladies at once saw that the very object they had in view in securing the appropriation was being thwarted, and they applied to Congress, not surreptitiously, but openly, by a petition, which appears here in the RECORD, explaining why it was that they wanted further action from Congress.

I will read part of it. I will read a small portion of the petition which is pertinent. This is a petition by Angie F. Newman, addressed to the Senate Committee on Appropriations, and must have been on their files when my friend [Mr. BURNES] considered the proposition which became the second law and to which allusion has been made. Now let me read that:

> At a joint meeting of the board of control and the association I was met by the ruling of the chairman of the board of control, Governor West, that the appropriation was made to the board of control; that the work of the association ended when the appropriation was secured.
>
> Under this ruling the chairman of the board of control rented and furnished a temporary home.
>
> Determined to do what was possible under existing conditions, the association met monthly and attempted—

Mark the language—

> to win the board of control to the recognition of the provisions of the law for industrial education and to the purchase of property and the erection of buildings. We attempted the impossible. To this date both the spirit and letter of the law and intent of the association have been violated by the board of control in that neither industrial nor mechanical arts have been taught in the home.

This is a petition from the lady who has been so justly lauded by my colleague [Mr. BURNES]. This is a petition that was addressed to the Appropriations Committee of the Senate, asking for the enactment of the second law, to which attention has been called—the last law upon the subject. This was a petition which my estimable colleague could have been furnished, and I doubt not was furnished at the time of the consideration of the Senate amendment which resulted in the second law. That amendment was upon a bill of which he had charge. He himself tells us that it was after considerable negotiation and discussion that it was agreed to.

It is customary on the part of the conferees of this body, when the House disagrees to amendments made by the Senate, to ascertain in conference all the facts, as far as possible, moving the Senate to make the amendments in dispute; and I doubt not, with that diligence that I know characterizes my friend, he sought out that information and must have been aware at the time of the reason which impelled the Senate to insert the provision which took away from the board of control the expenditure of this money and left it with the benevolent corporation to which he has referred and the one to which I have referred, namely, the Industrial Christian Home Association of Utah.

Now, my friend says that notwithstanding that law the board of control has always drawn the money and disbursed it.

Well, I am inclined to think that is true; but it is also true that that was for reasons which justified or appeared to justify the Department in allowing the board of control to have it.

The board of control took the money only because there seemed to be, as I understand it, no bonded officer of this corporation to receive it; and under such circumstances it was suggested, I believe by the Secretary of the Treasury, that the board of control, being Federal officials, should still retain charge of the money by consent and authority of the association, and the association accordingly gave their consent and authority.

Mr. BURNES. I wish to call the attention of my colleague to the fact that the second law does not make the change of control. It was probably intended to do so, but failed.

Mr. RYAN. I do not think it has failed. That is a matter of construction. I understand the Department held the second law authorized such change of control. That is implied by its requiring authority of the association to turn over the appropriation to the board of control.

Anyhow it is apparent that the object of Congress, by the second law, was to give to this benevolent corporation the control and management of this charitable and benevolent work. Now, what has been done? As I understand, a contract has been made for the construction of this home. This corporation has caused plans and specifications to be made of a building which they deem entirely suitable to their purposes. I understand that they have let the contract to construct the central portion of the building.

The contract goes still further and provides for the construction of the entire building. But the remainder is contingent on appropriations to be made by Congress. Now it is in this condition, and I want to say to my friend when he says nothing has been done, and when he expresses a doubt as to the existence of such a contract, if my information is correct he does himself an injustice. There is such a contract if I am reliably informed, and I believe I am. The work has been commenced, the foundations laid, and the construction is in progress.

Now, having thus devised plans and specifications for a building, having made a contract for the purpose of constructing the central portion of it, and also for the wings, but these latter contingent upon further appropriations, what wisdom is there in taking the work out of the hands of this benevolent association and putting it into the hands of the Treasury Department? Are you to change the plan? Are you to provide some new building? Is an architect of the Treasury better qualified to devise plans for such a home than those who are in charge of the work and to whom it is purely a labor of love?

Is it wise, then, to go on and construct the central portion of this building, adapted to certain other plans which are provided for in a given contingency? My friend [Mr. BURNES] says he would not annul the contract; he would go on and build this central structure under the existing contract, and then he would let the Secretary of the Treasury do the rest under the supervision of the Architect. Do what; carry out these same plans or provide new plans; build this same structure or build a new one? It seems to me that the proposed change is quite unnecessary.

Another reason which operates against it is this, and it is a reason that strikes my mind with force. So far as I am informed, and so far as the conferees are informed, there has been no maladministration on the part of this corporation. The contract is not alleged to be an improvident one. It is not pretended that the building is not suitable

for the purposes for which it is designed, and yet it is proposed to transfer this work to the Treasury Department under the direction of the Supervising Architect.

Now, what would be the effect of that? The effect would be simply to go on and carry out the contract for the central portion of this building and then allow the Supervising Architect to make plans for additions thereto. How would that result? Do we not all know the delays that occur in the completion of public buildings constructed in that way? This proposition means that nothing shall be done for this great charity, that the building shall not be put in condition to carry out the laudable purposes of the association for three or four years to come.

My friend, Mr. BURNES, very well knows that even in constructing a two hundred thousand dollar building four or five years are often occupied by the Treasury Department. There has never been a system of building construction devised so expensive, so extravagant, and so wasteful as that employed by the Government. Therefore, sir, I do not believe it is wise in any aspect of the case to adopt the change suggested by my colleague. I believe it would result in disastrous delay, greatly to the prejudice of this great work.

While I agree with my friend that there has been, so far as I know, no influence from the polygamous portion of the Mormon Territory operating in this Hall against this measure, still, the object of it being the suppression of polygamy, it is to be presumed that all the power they can bring to bear will be brought to bear against its execution.

Now, Mr. Speaker, the only difference, as I understand it—and this I regard as the vital point of this whole discussion—the only difference between the conferees on the part of the Senate and those on the part of the House is as to whether this work shall be continued under this benevolent corporation or shall be transferred to the Treasury Department. As to other details, there is nothing but what can, I think, be easily adjusted. May I ask my colleague on the committee [Mr. BURNES] whether I am correct in this?

Mr. BURNES. Substantially.

Mr. RYAN. My colleague says I am substantially correct.

My information is that the other objections urged by my colleague, some of them with a great deal of force, were met by concessions made by the conferees on the part of the Senate. My colleague [Mr. BURNES] said, with regard to the point to which his attention was called by my friend from Maine [Mr. DINGLEY], that it was finally assented to, out of conference as I understood him; that is to say, that after the conference was ended there was an intimation from some of the Senate conferees that they would yield that point. I wish to correct my friend by saying that my recollection is that after the first few moments of discussion there was no difficulty in arriving at a conclusion upon that point, because in the conference committee itself the conferees on the part of the Senate yielded the point readily.

Now, I agree with my friend as to some things. In the first place, I think the Senate amendment should be modified in some particulars. I believe that this work should be permitted to go on under the management of these Christian women, and I believe in that way it would be more wisely and efficiently done than it has been under the management of the board of control, which largely wasted the money that was placed in their hands by the first law.

But I think the amendment is too vague. It should be more specific. I think that in providing appropriations of any character it is the duty of Congress to make them as nearly specific as practicable. I think, therefore, that we ought to provide a specific sum for contingent expenses, a specific sum for furnishing this establishment, and a specific sum for the construction of the building. Then I think we ought to provide carefully that whoever draws this money shall give ample bonds for its proper expenditure. Then I believe, further, that there ought to be competent Federal authority for the auditing of the accounts so that the Government may know that the money spent is expended for the objects and purposes authorized by law.

Now, Mr. Speaker, I have explained the situation of this amendment in conference, as I understand it, and I repeat that the only material difference, the only difference that seems to be vital between the conferees of the House and the conferees of the Senate, is that the conferees on the part of the House insist that this whole matter of the construction of this building shall be transferred to the Treasury Department and taken entirely out of the hands of this benevolent association, while the Senate conferees insist that the work shall go on in accordance with the theory of the last law upon the subject.

Mr. SAYERS. Mr. Speaker, I think the gentleman from Kansas [Mr. RYAN] puts his proposition a little too broadly. If my recollection of the relative positions occupied by the conferees on the part of the Senate and those of the House be correct, the proposition enunciated by my colleague on the committee, the gentleman from Missouri [Mr. BURNES], was presented merely as a compromise; but neither he nor I thought it a legitimate or constitutional duty for the Government of the United States to embark in a scheme like the one involved in this amendment.

Mr. RYAN. Do I understand my friend to say that he and our colleague on the committee [Mr. BURNES] regarded this appropriation as being in violation of the Constitution?

Mr. SAYERS. I will speak for myself only, and will say I do not believe that under the Constitution the Congress of the United States has the right to appropriate public money and intrust it to the hands of private individuals for disbursement in the promotion of any scheme like this, and in the manner contemplated by the amendment. At any rate it would be a very bad policy.

Mr. RYAN. I want to say to my friend——

Mr. SAYERS. Now, the gentleman would not permit me to interrupt him.

Mr. RYAN. I only want to call my friend's attention to one fact——

The SPEAKER *pro tempore* (Mr. DUNN). The gentleman from Texas declines to be interrupted.

Mr. SAYERS. I will let the gentleman interrupt me in a moment. Since both the gentleman from Missouri and the gentleman from Kansas have referred to what occurred in the committee of conference, I may be permitted to go a little further in that direction. The leading member of the conferees on the part of the Senate stated before the conference committee adjourned that it appeared the real differences between the House conferees and the Senate conferees were of a vital and radical character—not merely in reference to detail. But I do not wish to discuss the amendment, as my colleagues upon the committee have explained it sufficiently well.

The gentleman from Missouri, Mr. Speaker, was correct in stating that until Grover Cleveland became President of the United States nothing practical was done toward the extirpation of polygamy in the Territory of Utah. It is true that in 1862 and 1882 acts were passed highly penal in their character. From 1862 to 1885, twenty-three long years, during which the Republican party had control of every Department of this Government, there were, as the records show, only six prosecutions under those two acts. One prosecution was had in 1875, another in 1881, and four in 1884. This is the sum total of what was done during those years by the executive and judicial departments of the Government in regard to the enforcement of these laws.

Now, what did the present Administration do as soon as it came into power? The records show that since March 4, 1885, five hundred and eighty-nine persons have been separately tried and convicted under those two acts. Is not this quite a difference in favor of Mr. Cleveland's administration? In addition, $73,000 of fines and forfeitures have been collected, and more than one hundred and fifty criminal prosecutions are still pending.

But this is not all. In 1887 another act on this subject was passed, an act for the purpose of forfeiting the franchise of the Church of Jesus Christ of Latter-Day Saints and the Perpetual Immigration Fund Company. In less than three months after the passage of that act a suit was instituted and a receiver appointed; $800,000 is now in the hands of the receiver; and final decree will be made before the 1st day of January next. Such is the contrast between the administration of the two parties in reference to the enforcement of these laws against polygamy; and I call upon my Republican friends to deny the record if they can.

Mr. SPINOLA. Mr. Speaker, I have listened with much attention to the discussion of this subject. The debate thus far seems to turn upon the question whether the Government of the United States through its officials shall make certain donations to one religious denomination to persecute another—whether one class of Christians shall be armed with the great power of the American Government to crush out another class, who also claim to be Christians, whether they are or not. A precedent of this character is, in my judgment, a dangerous one for the American Republic to establish; for when this society, organized in Utah, to which reference has been made, shall triumph in the undertaking which they now have upon their hands, and shall drive Mormonism from the limits of the Republic, then in all probability their attention may be turned to some other and weaker denomination; they may come here again and ask the Government to stretch out its strong arm to aid them in carrying on the same class of work in another direction.

Mr. FARQUHAR. Let me suggest to the gentleman that this is simply an appropriation to carry out the Edmunds-Tucker law, and to remedy the harm done by the destruction of homes which the execution of that law brought upon the people. It is the Government of the United States that is driving out Mormonism.

Mr. SPINOLA. And under a Democratic administration we will crush that enormity.

Mr. FARQUHAR. I care not under what party it may be done.

Mr. SPINOLA. I do not yield further; wait till your turn comes. The medicine, I know, is bitter, and you do not like to take it; but you must swallow it whether it be agreeable or not.

There seems to be a dispute as to who shall spend the public money in Utah—whether it shall be spent by one wing of this organization or the other, by the board of control or by a committee of the society. Sir, what right had they to make a contract for the construction of a building at the expense of the United States?

Mr. RYAN. They were authorized by law to do it.

Mr. SPINOLA. There seems to be no law upon the statute-book of the sort indicated by gentlemen, or if there is any such law it has not yet been pointed out by either gentleman. Therefore we have the

right to conclude that it does not exist. Without law a contract has been made for the construction of this building. And now, after that contract has been made without law, they come here to this House and ask us to donate out of the public Treasury money to carry out that contract and erect that building.

Now, Mr. Speaker, that side of the House commenced its career in this country bearing a banner blazoned with the expression of a determination when they came into power in the General Government to destroy the twin relics of barbarism, slavery and polygamy. That relic of slavery died at its own hands.

Mr. FARQUHAR. No, it died by proclamation.

Mr. SPINOLA. I beg your pardon; it perished by its own act.

Mr. FARQUHAR. It was extinguished by the proclamation of Abraham Lincoln.

Mr. SPINOLA. It died because it was odious to the civilization of the world. It died, sir, because certain gentlemen tried to force it into sections of the country where the people said it should not go.

Mr. FARQUHAR. It died because you and I, general, faced it.

Mr. SPINOLA. That is true to a certain extent, but it fell of its own weight.

Now what has become of the other relic of barbarism? Where is it to-day? Its roots have extended and strengthened for a quarter of a century and under the Republican party it has flourished like a green bay tree.

Mr. BAKER, of New York. You mean a green bay horse. [Laughter.]

Mr. SPINOLA. No; I do not mean a green bay horse or a woolly horse. [Renewed laughter]. I mean just what I say. For a quarter of a century it flourished like a green bay tree under a Republican administration. My friend from Texas [Mr. SAYERS] has exposed the record of your party and you can not get away from it.

That record shows the fact that for twenty-four long years of Republican rule there were six cases carried into the courts, and of those six cases there was not one successfully prosecuted, while under the present Administration in a little over three years' duration nearly six hundred of the Mormon saints are now living in the prisons and penitentiaries of Utah, and their chief leaders have fled from the justice that threatened them. The whole band of these immoral wretches are now packing their kits to move across the border into Mexico. This Democratic Administration has made it too warm for them, and we intend to keep up the fire until we fry the fat out of the very last one of them. [Laughter.] You may fry the fat out of the manufacturers of the country, but we will fry the fat out of these immoralists of the country.

Mr. Speaker, I take this ground, that the United States has no right or authority to construct a home for the purpose indicated by the bill pending in the House. It is one of the most dangerous innovations ever attempted by this or any other Congress. I care not how respectable this lady may be, or how strong the appeal she may make to the feelings of the community, we have as members of this House a duty to discharge under the Constitution of the United States to the people of the country. I think if we attempt in this or any other Congress to step across the rules which control our action no man can predict how far the precedent may go or to what disasters it may lead.

If it is made a party question, let it be so. We will be ready to meet you here or before the people. We have done our duty, and the Democratic administrator of the country to-day has done his duty as an upright and moral man in connection with this question. When Grover Cleveland has been re-elected to the Presidency next November, as he certainly will be, with a good Democratic majority in this House behind him, we will drive polygamy from the borders of the Republic for all time. [Applause.]

[Mr. STRUBLE withholds his remarks for revision. See APPENDIX.]

The SPEAKER *pro tempore*. The time of the gentleman has expired.

Mr. BURNES. Mr. Speaker, I will detain the House but a moment. I wish to say to the gentleman from Iowa [Mr. STRUBLE] in reply to his statement that I have no enthusiasm in regard to this legislation, judging from the number of objections I make to it, that he does me injustice. I am not making objections to the merits of this institution, and I am not debating the merits or demerits of the proposition.

We are committed to some work for these dependent women and children in Utah, and I am perfectly willing to go on. The only objection I have made is to the loose and imperfect restrictions defining how the money shall be expended and the work conducted. The money appropriated and unexpended and that we may now appropriate should be put in the hands of some responsible disbursing agent of the United States to be applied to the purposes for which Congress shall direct.

A word in reply to my friend from Kansas [Mr. RYAN]. Sir, whenever a suggestion is made on the other side of the House or in another body, who are of kindred political faith, reflecting upon the President of the United States or upon the party of which I am an humble member, and any Demoorat here takes notice of it, he is charged with bringing into the consideration of an appropriation bill political debate.

I beg to state to the gentlemen who have made such statements on that side of the House that it has never been my intention to bring into the discussion of appropriation bills political questions. But in this case I submit to the candid consideration of every member of this House that I was justified in taking notice of the covert insinuation which I have read from remarks of a prominent Republican—an insinuation that on the part of the present Executive, the present President of the United States, there has been some lapse in his administration in neglecting to repress polygamy. In consequence of that assertion I felt it to be my duty to call the attention of the House to it and to refute it; and I call the attention of the House to the further fact that during his administration and only through his administration has this evil been brought to bay and practically extinguished, and now, sir——

Mr. DINGLEY. At that point I desire to ask the gentleman if the fact is not simply that Congress had not got up to the point of passing legislation to repress this evil until that time?

Mr. BURNES. But Congress failed to pass any effective law, and it was the failure of the Republicans, because the Democratic House with 40 majority passed the bill which has made the effective law under which the President is now extirpating this evil.

Mr. DINGLEY. If my friend had been in the Forty-seventh Congress and had witnessed the long contest in securing the passage of the first law for the suppression of polygamy and had noticed where the opposition to it was he would not have made the remarks he has.

Mr. BURNES. If the Democrats had had the majority in the House of the Forty-seventh Congress they might then have passed the bill which was subsequently passed and which is known as the bill of Mr. Tucker, of Virginia. But unfortuuately for my friend the Republicans are responsible for that Congress.

Mr. DINGLEY. I regret exceedingly that any allusion should have been made to party in this matter, because I think it is the sentiment and feeling of both parties and of all the people of this country that this great evil of polygamy shall be extirpated. I think we are all agreed upon that.

Mr. BURNES. The gentleman is right, and if another gentleman in another place had shared in that feeling and that sentiment of fairness there would have been no occasion for the remarks which I have been compelled to make.

Mr. STRUBLE. Will the gentleman from Missouri yield to me for a request?

Mr. BURNES. Pardon me. I want to ask that the Clerk shall read the letter of the Attorney-General in regard to the prompt and efficient enforcement in Utah of the law against polygamy by a Democratic administration.

The Clerk read as follows:

DEPARTMENT OF JUSTICE, *Washington, September* 13, 1888.

SIR: In reply to the resolution of the 25th ultimo of the House of Representatives, in relation to convictions for polygamy in the Territories of Utah and Idaho, I have the honor to transmit the accompanying information. The records of the Department show that under the provisions of the anti-polygamy law of 1882 and the act of 1882 amendatory thereof, and the act of March 3, 1887, there have been in the Territory of Utah 470 convictions for polygamy, adultery, and unlawful cohabitation with fines imposed, and 30 convictions where the sentence was imprisonment without fine, making a total for that Territory of 500. There have been in the Territory of Idaho 48 convictions for polygamy, adultery, and unlawful cohabitation with fines imposed, and 41 convictions where the sentence was imprisonment without fine, making a total for that Territory of 89.

The accompanying lists, marked, respectively, Exhibits A and B, show the cases in the Territories of Utah and Idaho in which fines were imposed, with the date of the judgment in each case and the amount, if any, collected. There have been fourteen pardons granted by the President of the United States to persons convicted under the above acts in the Territories of Utah and Idaho, and the accompanying list, marked Exhibit C, shows the name, date of sentence, sentence, date of pardon, and the reasons for granting the same in each case.

There was 1 conviction in Utah in March, 1875, and 1 in April, 1881; in October and November, 1884, 1 in Idaho and 3 in Utah; in 1885, beginning with the March term, 39 in Utah and 16 in Idaho; in 1886, 112 in Utah and 20 in Idaho; in 1887, 214 in Utah and 6 in Idaho, and in 1888, 100 in Utah and 5 in Idaho—in all 589 convictions. There have been collected in Utah fines and costs in the above cases to the amount of $45,956.90, and in Idaho to the amount of $2,251.10—in all $48,208 of fines and costs, and in Utah in April, 1886, a forfeiture of $25,000.

Very respectfully,

G. A. JENKS,
Acting Attorney-General.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

Mr. BURNES (before the completion of the reading). I will not insist upon the Clerk reading further, but I will embody the statement in my remarks.

Mr. Speaker, I wish now to call the attention of the House to a fact which will show that I am not entirely partisan in this matter. In a recital made elsewhere I find the indorsement of a report by Mrs. Newman to this effect:

I found in one cell (meaning a cell of the penitentiary in Utah) 10 by 13½ feet, without a floor, six women, three of whom had babies under six months of age, who were incarcerated for contempt of court in refusing to acknowledge the paternity of their children. When I plead with them to answer the court and be released, they said: "If we do, there are many wives and children to suffer the loss of a father."

This most excellent woman failed to go to the judicial authorities and ask relief for them, but was content to advise them to gain freedom otherwise. I think, sir, that these women ought not to be confined in the penitentiary for contempt of court under such circumstances.

But the gentleman from Iowa [Mr. STRUBLE] has demanded of me

the presentation of facts which I had not intended to present. I find here, sir, a financial statement made by the Industrial Christain Home Association of Utah Territory as follows:

August 6, 1888, Congressional appropriation, $40,000.

Expended in temporary home	$13,500
June, 1888, paid for building lots	10,500
Total	24,000

Twenty-four thousand dollars subtracted from $40,000 leaves a balance of $16,000.

August 16, last contract let for main building, three stories high, $18,000.

That is $2,000 more than the balance on hand. Now, Mr. Speaker, seeing this discrepancy, seeing the amount of money received placed at $40,000, and then the deduction of expenditures, as made, I sent an inquiry to the Treasury Department and received this answer:

There were four advances of $2,500 each made in December, 1886, and March, August, and December, 1887, to Caleb W. West, of which $1,168.95 have since been repaid to the Treasury, making a net expenditure of $8,831.05 in addition to the $40,000 paid in July last.

Therefore, instead of there being a total of $40,000, there is a total of $48,000 to be accounted for; and while I express and reiterate my confidence in the honor and honesty of those in charge of this institution I may be permitted, I think, to present these facts as an evidence that in a business matter, in a business proposition for building this home, we ought to observe ordinary business principles and not intrust it entirely to the discrimination and skill of the ladies of this association.

Mr. Speaker, I yield five minutes to the gentleman from Florida [Mr. DOUGHERTY].

Mr. DOUGHERTY. Mr. Speaker, all legislation which touches at all upon the religion of men in this country should be carefully considered. Religion is a subject which never should be legislated upon in this country at all, unless where the exercise of the religion is violative of the law of the land. Polygamy, under all the laws of all the States of this Union and the laws of the land as passed by the Congress of the United States, was a crime before the Book of Mormon was alleged to have been found, and certainly before the Mormon Church was ever established in this country. In the past appropriations have been made for this work which is now proposed to be taken in hand, and those appropriations were said to have become necessary because of the destitution of women and children in Utah.

That destitution grew out of the violation of the laws of this country. The gentleman from Iowa [Mr. STRUBLE] speaks of the condition of the place in which it is proposed to house these people. Sir, in this matter I have no sympathy except for the children. The women, when they went into this polygamous relation, knew that they were violating the laws of the land of which they could not but be cognizant. The gentleman calls special attention to the condition of the place in which it is proposed to put them. Does he propose to house them in palaces, as are housed the nobility and the royalty of the older countries? Does he propose to put them upon the body-politic of this country as an incubus like that system of aristocracy and royalty in the monarchical governments?

If they are to be objects of charity at all that charity should be exercised somewhat with a view to economy in the expenditure of the money which has to be taken from the law-abiding element in this country. I believe that means can be devised, and if they can be devised they certainly should be adopted and put into operation, to place the burden of the support of these unfortunate people upon the shoulders of the men who have degraded them in Utah and in other portions of this country.

If the precedent had not been set, I should be opposed to this appropriation *in toto*. How comes it that these persons are objects of charity before the American people, relying on support from the labor of the law-abiding citizens of this country? It is because they have, no matter under whose leadership, pursued a policy of resistance to all the laws of this country and the laws of all the States from the establishment of the Mormon Church to the present time.

They have carried that policy of resistance and open disobedience and defiance of the law-making power of this country and its executive officers to the extent of intimidation and assassination of public officials in the attempted discharge of their duty. Such action upon the part of those people, under the ministry of the priests of the Mormon Church, is just what has put them in the condition in which they are to-day. They have steadily undertaken to resist and violate the laws until they were confronted by the gentleman at the other end of the avenue, the present President of the United States, who was determined to see that the laws should be promptly and thoroughly enforced. It is proposed now to make objects of charity of a number of people whose only claim to the exercise of charity in their behalf is that the deplorable condition which they occupy is the result of their violation of the laws of the land.

It is not my purpose to address myself further to that portion of the bill. There is an amendment proposed by the Senate to pay a small sum of money to the widow of a revenue officer who died of yellow fever in the city of Jacksonville while engaged in the discharge of his duty in the office of the collector of internal revenue. He was the only person in the office at the time. He was stricken down and died before he could be removed from the rooms of that office.

[Here the hammer fell.]

Mr. DOUGHERTY. I hope the gentleman from Missouri [Mr. BURNES] will yield to me a few moments more.

Mr. BURNES. Go on.

Mr. DOUGHERTY. Now, let me refer to the difference between such a case as this and that presented in behalf of those Mormon women. The gentleman from Missouri in speaking of the amendment for the relief of the widow and children of this unfortunate deputy collector of internal revenue, said that the appropriation was simply for an object of charity, for which he could find no precedent. Sir, is it claimed that the appropriation in this bill, enormous as it is, for expenditure in the Territory of Utah, and the other appropriations which have been made in the past for the benefit of sufferers from the evils of Mormonism, are anything else than charity?

Every gentleman who has spoken on this subject admits that the proposition under discussion here to-day is nothing more nor less than a charity, yet the charitable expenditure for those unfortunate people in Utah is dignified as a most worthy appropriation, while the appeal for charity in behalf of this widow and her children in the State of Florida is not considered a matter of any importance. Does this House propose to take the stand that people who become objects of charity through the violation of law are proper subjects for the solicitude and support of the Government, but that a man who dies in the discharge of his duty as a Government officer is not a suitable object of charity? Most assuredly that position can not be maintained by any gentleman on this floor. This man died in the discharge of his duty, while acting under the orders of his superior. If he had left that office to escape the danger of the fever, I have no information which leads me to know that the funds of the Government in the custody of that office would have been safe from robbery.

It has been said that there is no precedent for this action. Did not the House of Representatives—I will mention only instances which I think I remember correctly—did not the House of Representatives appropriate for the father of a deceased door-keeper a year's pay, or certainly the balance of a year's pay, which should have gone to the door-keeper? Not long since did not this House, upon the motion of the gentleman from Pennsylvania, appropriate public money to pay the salary of a man who had died in the employ of this House as a messenger, or in some other capacity? I think precedents of this kind could be enumerated *ad libitum*. Certainly if we do not grant to this widow the amount of her husband's salary for a year, she should have the balance which would have accrued to him if he had lived till the expiration of the year.

Let me make now a remark in reply to a suggestion of the gentleman from Mississippi [Mr. HOOKER]. It has been said that the appropriation proposed in this case is an indefinite amount. Sir, the amendment provides for the payment of one year's salary; and on page 9786 of the RECORD will be found a letter from the Commissioner of Internal Revenue, making to the Senate the statement that this man's salary was $1,400 a year. Therefore there can be nothing indefinite as to the amount.

I ask this House, even if there is no precedent, to give to the widow of this unfortunate employé of the Government, under the peculiar circumstances here presented, the amount of her husband's salary for one year, or to give her at least the balance which would have accrued to him, had he lived till the expiration of the year. I ask the Clerk to read the letter of the Commissioner of Internal Revenue on this subject, to which I have referred.

The Clerk read as follows:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, September 21, 1888.

SIR: I inclose herewith a copy of letter from Collector Whitfield Walker, district of Florida, dated August 28, 1888, in regard to Deputy Collector L. E. Dancy. Before this letter reached here (August 31) the death of Mr. Dancy was announced by telegram. Mr. Dancy was chief deputy to Collector Walker, at a salary of $1,400 per annum, and an allowance of $125 for his traveling expenses. He was a faithful, zealous officer, and of high standing in the service, and the circumstances under which he performed his duties at the last during the epidemic of yellow fever rendered them singularly meritorious.

Respectfully yours,

JOS. S. MILLER, *Commissioner.*

HON. WILKINSON CALL,
United States Senator.

Mr. DOUGHERTY. Mr. Speaker, I will not detain the House further than merely to repeat the request that it will either allow the year's salary in this case as asked, or will at least allow the balance which would have accrued to this officer had he lived until the expiration of the year.

Mr. BURNES. It was my purpose, Mr. Speaker, to submit at this time something in the nature of a résumé of the appropriations of this Congress in connection with some remarks of a political nature; but under the circumstances I content myself with asking unanimous consent to extend in the RECORD some remarks which I made the other day in reply to my friend from Illinois [Mr. CANNON], and to include also in those remarks such tables of expenditure and other matter as may be pertinent.

The SPEAKER *pro tempore*. If there be no objection, the request of the gentleman will be granted. The Chair hears no objection.

Mr. STRUBLE. I ask unanimous consent to extend my remarks in the RECORD and to attach some exhibits.

There was no objection, and it was so ordered.

Mr. CAINE. I ask unanimous consent to print some remarks in the RECORD on this subject.

There was no objection, and it was ordered accordingly.

Mr. ROGERS. I desire to ask the gentleman from Missouri one or two questions for the purpose of obtaining information. I noticed in some observations recently delivered it was stated that $10,000 heretofore appropriated by this Government was used by this corporation in the purchase of real estate. I wish to know if the gentleman is advised in whose name that real estate was taken?

Mr. BURNES. This private corporation purchased $10,500 worth of lots, upon which it is proposed to erect this new building.

Mr. ROGERS. I understand the limit of cost of the building to be erected is $50,000.

Mr. BURNES. Just $50,000.

Mr. ROGERS. And five or ten thousand to furnish it?

Mr. BURNES. Five thousand dollars.

Mr. ROGERS. It is to go into the hands of this private corporation and is not to be under the control of Congress.

Mr. BURNES. No, sir.

Mr. ROGERS. What provision of law is there to prevent the diversion of this property, when they get ready, to other uses?

Mr. BURNES. Nothing except the bond of the treasurer.

Mr. ROGERS. That is for the expenditure of the money. But I understand there is no provision to prevent this private corporation diverting this property to any other purpose.

Mr. BURNES. The only security for the Government would be suit on the bond of the treasurer of the corporation to recover.

Mr. ROGERS. I understand that is only for the expenditure of the money.

Mr. BURNES. That is all.

Mr. ROGERS. Now, as this may result in another public scandal, we are at the point where, if we are to go on with this business, we ought to provide that the money appropriated for this purpose shall not be diverted to improper channels. We ought to see to it before any money is appropriated to it that it shall be accompanied by legislation of that character.

Mr. BURNES. After the report is disposed of, and I hope it will not be agreed to, I shall insist on the disagreement of the House to the Senate amendments, and request another conference with the Senate.

Mr. RYAN. If the report goes back it will have to go back altogether.

Mr. BURNES. Yes, a separate vote can not be had on each amendment.

Mr. DINGLEY. It must be voted on as an entirety.

Mr. ROGERS. I had some idea there would be doubt as to the proper motion, and consulted the Speaker, who said the question was to be put in the affirmative upon adopting the report; a negative vote would disagree to the Senate amendments.

Mr. BURNES. The question is on the adoption of the report, and when that is voted down I shall then move to insist on our disagreement to the amendments of the Senate and ask for a further conference.

Mr. ROGERS. In order to get a negative vote upon it the motion should be on agreeing to the report, and then for the House to vote the motion down. That is the information I have from the Speaker.

Mr. BURNES. If that be the opinion of the Speaker I shall certainly respect it.

Mr. MCKENNA. Will the gentleman allow me to ask him a question?

Mr. BURNES. Certainly.

Mr. MCKENNA. If the procedure be adopted as suggested by the gentleman from Arkansas, is it tantamount to a negative vote to all the amendments made by the Senate?

Mr. BURNES. It is.

Mr. MCKENNA. Because my object is to get a distinctively negative vote upon the Chinese appropriations.

Mr. BURNES. That is included in the negative vote upon the report.

Mr. STRUBLE. I would like to ask a parliamentary question; whether it is in order to make any motion in regard to these amendments we have been discussing with reference to having certain words stricken out.

The SPEAKER *pro tempore* (Mr. RICHARDSON in the chair). The report is not open to amendment.

The question is on the motion of the gentleman from Missouri——

Mr. RYAN. According to the suggestion of the gentleman from Arkansas, the question should be upon agreeing to the report; and I think perhaps that is the custom under the parliamentary law.

The SPEAKER *pro tempore*. If the House declines to agree, it is equivalent to agreeing to a motion to disagree; and so the result can be obtained by a negative vote on the pending motion.

The question was taken; and the report of the conference committee was rejected.

Mr. BURNES. I now move that the House insist upon its disagreement to the amendments of the Senate and ask a further conference.

The motion was agreed to.

The SPEAKER *pro tempore* announced as conferees on the part of the House Mr. BURNES, Mr. SAYERS, and Mr. RYAN.

CAROLINE M. M'DOUGAL.

Mr. BUTLER, by unanimous consent, reported back favorably from the Committee on Pensions the bill (S. 3392) granting an increase of pension to Caroline M. McDougal; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

ORDER OF BUSINESS.

Mr. BRECKINRIDGE, of Arkansas. Mr. Speaker, I move that when the House adjourns to-day it be to meet on Monday next; and pending that I ask unanimous consent that next Monday night be fixed, in lieu of Friday night of this week, to consider pension cases as determined by the standing order.

Mr. MCKENNA. Will the gentleman yield to me for a moment?

Mr. BRECKINRIDGE, of Arkansas. For what purpose?

Mr. MCKENNA. I wish to offer a resolution.

Mr. HOOKER. Will the gentleman from Arkansas allow me to make a suggestion by way of an amendment to his motion?

Mr. BRECKINRIDGE, of Arkansas (to Mr. MCKENNA). I do not yield until I hear what the proposition is.

Mr. MCKENNA. It is a resolution about declaring that the House will transact no business after the general appropriation bills are passed. I ask that it be read.

The SPEAKER *pro tempore*. It will be read, after which the Chair will ask for objection.

The Clerk read as follows:

Resolved, That it is the sense of the House that after the general appropriation bills shall be disposed of the House will transact no further business this session except pension business on Friday nights and except to adjourn from time to time and for the session.

The SPEAKER *pro tempore*. Does the gentleman from Arkansas yield for this resolution?

Mr. BRECKINRIDGE, of Arkansas. The gentleman can have it referred to the Committee on Rules if he desires it. I yield to the gentleman from Mississippi to make a suggestion.

Mr. HOOKER. I concur in the motion which the gentleman has made; but I think we ought to preserve the order of business for to-morrow which provides, under a rule heretofore adopted, that the roll of members should be called with the right when a member's name is reached on the roll to be permitted to call up one bill. I ask my friend from Arkansas, therefore, to so modify his motion as to designate next Monday as the day on which we may consider measures which have been considered heretofore on Friday, under the order I have named.

Mr. BRECKINRIDGE, of Arkansas. I have no objection myself to that, Mr. Speaker, and will yield to the gentleman from Mississippi to ask unanimous consent if he wishes.

Mr. HOOKER. I will then move as an amendment to the motion of the gentleman from Arkansas that Monday next be agreed upon as the day for the presentation of such motions by members the same as on Fridays.

The SPEAKER *pro tempore*. The Chair understands the gentleman to ask unanimous consent that the business for Monday next shall be the same as on Fridays?

Mr. MORGAN. I desire to know what objection there is to going on to-morrow with private business? We have pursued that order for two days. Why not continue it?

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Mississippi [Mr. HOOKER]?

Mr. ROLAND and Mr. MCCLAMMY objected.

The SPEAKER *pro tempore*. The question is on the motion of the gentleman from Arkansas, that when the House adjourns to-day it be to meet on Monday next.

Mr. MORRILL. What about the night session for pensions?

Mr. BRECKINRIDGE, of Arkansas. Pending that motion, I have asked unanimous consent that the consideration of pension bills heretofore fixed for Friday evenings, be fixed for next Monday evening.

The SPEAKER *pro tempore*. Is there objection to the substitution of next Monday night for Friday night of this week for the consideration of private pension bills?

There was no objection, and it was so ordered.

The SPEAKER *pro tempore*. The question now recurs on the motion of the gentleman from Arkansas that when the House adjourns to-day it be to meet on Monday next.

Mr. MORGAN. I rise to a parliamentary inquiry. Why may we not be permitted to go on with private bills to-morrow just as we have been proceeding for the last two Fridays?

The SPEAKER *pro tempore*. The Chair will suggest that that is not a parliamentary question.

Mr. MORGAN. Then I object if it is not.

Mr. BRECKINRIDGE, of Arkansas. It does not require unanimous consent, I believe.

Mr. MORGAN. It will require a quorum, though.

The SPEAKER *pro tempore*. The gentleman moves that when the House adjourns to-day it be to meet on Friday next.

Mr. MORGAN. Will it not take a quorum to adjourn over until Monday?

The SPEAKER *pro tempore*. If the point is insisted upon it will.

Mr. MORGAN. Then I give notice that I shall call for a quorum.

Mr. LANHAM. I hope there will be no objection to the motion of the gentleman from Arkansas, provided that Monday can be substituted for Friday to consider private bills.

Mr. MILLIKEN. Unless that is done there will be objection.

Mr. LANHAM. I hope the Chair will submit that proposition again to substitute Monday for to-morrow.

Mr. ROWLAND. I move that the House do now adjourn.

Mr. BRECKINRIDGE, of Arkansas. As the gentleman from Mississippi [Mr. MORGAN] indicates his intention of requiring a quorum, I withdraw the motion and simply move that the House do now adjourn.

The SPEAKER *pro tempore*. The motion has been agreed to to substitute Monday night for the consideration of pension bills.

Mr. MORRILL. I ask to reconsider the vote by which that motion was agreed to.

Mr. ALLEN, of Mississippi. I object.

The SPEAKER *pro tempore*. The question is on the reconsideration of the vote by which the motion to substitute Monday night for Friday night for the consideration of pension bills was passed.

The question was put, and the Speaker *pro tempore* announced that the "ayes" had it.

Mr. DINGLEY. Do I understand that the vote on the motion to substitute Monday night for Friday night for the consideration of pension bills was reconsidered?

The SPEAKER *pro tempore*. It was.

Mr. ALLEN, of Mississippi. I had objected.

The SPEAKER *pro tempore*. The Chair did not hear any objection.

Mr. ROGERS. I rise to a parliamentary inquiry.

The SPEAKER *pro tempore*. The gentleman will state it. The Chair will restate the motion——

Mr. ROGERS. I rise to a question of order. I do not think the Chair and the gentleman from Mississippi [Mr. MORGAN] understood each other. The gentleman from Mississippi objected to the substitution of next Monday night for to-morrow night for the consideration of pension bills, and therefore——

Mr. OATES. To get out of this difficulty I ask for the regular order.

Mr. MORGAN. I objected to the substitution of next Monday night for to-morrow night. We desire to-morrow for the consideration of private bills, for the reason that more than half of the member's names have been called, and we want to go on and complete the call.

Mr. ALLEN, of Mississippi. I would like to notify my colleague [Mr. MORGAN] that it will take a quorum to pass anything to-morrow.

Mr. MORGAN. I accept the notice, and propose to try it on. [Laughter].

The SPEAKER *pro tempore*. The gentleman from Arkansas [Mr. BRECKINRIDGE] has asked that Monday night be substituted for Friday night, anticipating that the House would adjourn until Monday. Inasmuch as the House declines to adjourn until then the gentleman desires to reconsider that motion.

Mr. ALLEN, of Mississippi. And I object.

Mr. BRECKINRIDGE, of Arkansas. I move that the House reconsider the vote by which the motion was agreed to substituting Monday night for Friday night for the consideration of pension bills.

The motion was agreed to.

Mr. BRECKINRIDGE, of Arkansas. I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock p. m.) the House adjourned.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. COMPTON: A bill (H. R. 11560) for the relief of Rich. P. Blackistone—to the Committee on War Claims.

By Mr. GEST: A bill (H. R. 11561) granting cannon to the Soldiers and Sailors' Monument Association of Mercer County, Illinois—to the Committee on Military Affairs.

By Mr. GROSVENOR: A bill (H. R. 11562) granting a pension to Mrs. Isaac Brooks—to the Committee on Invalid Pensions.

Also a bill (H. R. 11563) granting a pension to Isaac N. Kline—to the Committee on Invalid Pensions.

By Mr. NEAL: A bill (H. R. 11564) correcting the military record of Calvin L. Smith—to the Committee on Military Affairs.

Also, a bill (H. R. 11565) granting a pension to Leah Henry—to the Committee on Invalid Pensions.

By Mr. MCRAE: A bill (H. R. 11566) granting a pension to E. C. Paschal—to the Committee on Invalid Pensions.

By Mr. MILLIKEN: A bill (H. R. 11567) for the relief of employés in the New York custom-house—to the Committee on Claims.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. DELANO: Petition of citizens of Conklin Forks, and of Norwich, N. Y., in favor of the per diem pension bill—to the Committee on Invalid Pensions.

By Mr. HOUK: Petition of the administrator of J. S. Moffett, of Knox County, Tennessee, for reference of his claim to the Court of Claims—to the Committee on War Claims.

By Mr. NEAL: Petition asking that a pension be granted to Leah Henry, dependent mother of William Henry, late private Company D, Tenth Regiment Tennessee Cavalry—to the Committee on Invalid Pensions.

Also, petition of Joel J. Pyatt, for correction of the military record of Calvin L. Smith—to the Committee on Military Affairs.

By Mr. STONE, of Kentucky: Papers in the case of James Crutchett—to the Committee on the District of Columbia.

By Mr. T. L. THOMPSON: Resolutions of the Chamber of Commerce of San Diego, Cal., in favor of the Maritime Canal of Nicaragua—to the Committee on Commerce.

HOUSE OF REPRESENTATIVES.

FRIDAY, *October* 5, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of yesterday's proceedings was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. THOMPSON, of California, indefinitely, on account of important business.

LEAVE TO PRINT.

By unanimous consent, leave was granted to Mr. WHEELER to extend in the RECORD his remarks on the resolution proposing to give an extra month's pay to employés of the House.

ENROLLED BILLS SIGNED.

Mr. KILGORE, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled a bill and joint resolution of the following titles; when the Speaker signed the same:

A bill (H. R. 3300) to enable the State of Colorado to select indemnity lands, and for other purposes; and

Joint resolution (H. Res. 101) providing for the printing of decisions of the Department of the Interior regarding public lands and pensions for sale.

AMERICAN GROCER ASSOCIATION.

The SPEAKER. On the 1st of October the Senate passed and sent to the House a resolution requesting the House to return to that body the bill (S. 577) for the relief of the American Grocer Association of the city of New York. The Chair is advised by the Clerk of the House that the Journal shows that this bill, when originally laid before the House, was referred to the Committee on Claims, but it can not be found. The books of the distributing clerk of the House show that it went to that committee; but there is no receipt for it, and that clerk is now dead, so that no further inquiry can be made. The Chair would suggest the propriety of the Clerk of the House informing the Senate that the bill has been mislaid, and request that a duplicate be sent to the House. If there be no objection, that order will be made.

There was no objection.

J. W. PARISH & CO.

Mr. PEEL. I ask unanimous consent to take up for present consideration the bill (H. R. 9718) for the relief of J. W. Parish & Co. I desire to say that that bill was called up last Friday and the report read at length. Mr. OATES objected to its consideration, but since then, learning more about it, he has authorized me to withdraw his objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized and directed to pay to Joseph W. Parish, George C. Hadley, and William L. Huse, composing the firm of J. W. Parish & Co., out of any money in the Treasury not otherwise appropriated, the sum of $18,500, the same to be compensation in full to said firm for losses sustained by it by reason of the refusal of the officers of the United States to receive and pay for 5,000 tons of ice which said Parish & Co. had been directed to furnish under a contract dated December 30, 1863, and signed by the medical purveyor of the United States Army stationed at Louisville, Ky., and by said Parish & Co., and approved by the Acting Surgeon-General of the United States.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. DINGLEY. Reserving the right to object, I ask if this is the bill that was debated last Friday?

Mr. PEEL. It is the same bill, and to which Mr. OATES objected, but he has authorized me to withdraw his objection.

There was no objection.

The bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. PEEL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

MARY E. WALKER, M. D.

Mr. NUTTING. I ask unanimous consent that the Committee of the Whole House on the state of the Union be discharged from the further consideration of the bill (H. R. 4265) for the relief of Mary E. Walker, M. D.

The SPEAKER. The bill will be read, after which the Chair will ask for objections.

The bill was read.

The SPEAKER. This bill provides that the claim shall be taken up at an early day. Does the gentleman from New York [Mr. NUTTING] desire to pass the bill?

Mr. NUTTING. I desire to pass the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. ROGERS. I would like to understand the provisions of this bill. Does it make an appropriation, or does it simply set a day for the consideration of the claim?

Mr. NUTTING. It provides for a payment of $2,000.

The SPEAKER. The bill makes an appropriation of $2,000. That is to say, the original bill appropriates $10,000, but the committee propose to strike out "ten" and insert "two." Is there objection?

Mr. TURNER, of Kansas. I object.

ORDER OF BUSINESS.

Mr. LANHAM. I call for the regular order.

The SPEAKER. The regular order is demanded. This being Friday, the regular order is the call of committees for reports upon bills of a private nature.

Mr. LANHAM. I move that that order be dispensed with.

Mr. RICHARDSON. I ask the gentleman from Texas [Mr. LANHAM] to yield to me for a moment to introduce a resolution for reference.

Mr. LANHAM. I yield to the gentleman for that purpose.

AGRICULTURAL REPORT, 1888.

Mr. RICHARDSON, by unanimous consent, introduced a joint resolution (H. Res. 229) to print the Agricultural Report for 1888; which was read a first and second time, referred to the Committee on Printing, and ordered to be printed.

ASTRONOMICAL OBSERVATIONS OF NAVAL OBSERVATORY.

Mr. RICHARDSON also, by unanimous consent, offered a resolution to print the annual volumes of the astronomical observations of the Naval Observatory for 1886, 1887, and 1888; which was referred to the Committee on Printing.

ORDER OF BUSINESS.

The motion of Mr. LANHAM to dispense with the call of committees for reports was agreed to.

Mr. LANHAM. I now ask unanimous consent that gentlemen having reports to present may be permitted to file them with the Clerk.

There was no objection, and it was so ordered.

REPORTS FILED.

The following reports were filed by being handed in at the Clerk's desk:

MRS. SUE B. JOHNSON.

Mr. HUNTER, from the Committee on Invalid Pensions, reported back favorably the bill (H. R. 10649) to increase the pension of Mrs. Sue B. Johnson; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

MOBILE AND GIRARD RAILROAD COMPANY.

Mr. STONE, of Kentucky, from the Committee on War Claims, reported back favorably the bill (H. R. 10914) for the relief of the Mobile and Girard Railroad Company; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

ORDER OF BUSINESS.

Mr. NUTTING. Mr. Speaker, the gentleman from Kansas [Mr. TURNER] withdraws his objection to the consideration of the bill which I called up a few minutes ago for the relief of Mary E. Walker, M. D., and I ask that it be now considered.

The SPEAKER. The regular order has been demanded by the gentleman from Texas [Mr. LANHAM].

Mr. NUTTING. I hope the gentleman will withdraw that demand.

Mr. LANHAM. I can not do that now. Objection was made to the consideration of the bill. I now move that the House resolve itself into Committee of the Whole for the purpose of considering business upon the Private Calendar; and pending that, I ask unanimous consent that we proceed in the same manner as on last Friday and the Friday preceding.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. KILGORE. Mr. Speaker, I think I shall be inclined to resist going into Committee of the Whole on the Private Calendar unless there is a quorum present.

The SPEAKER. The motion to go into Committee of the Whole House on the Private Calendar is pending, but the first question is on the request of the gentleman from Texas [Mr. LANHAM] for unanimous consent that if the House go into Committee of the Whole the same order of precedure shall be observed to-day as on last Friday and the Friday before.

Mr. KILGORE. I think I must object.

Mr. LANHAM. I wish to say in the hearing of my colleague [Mr. KILGORE] that under the arrangement heretofore made a number of gentlemen have been reached in regular order on the roll, and have had an opportunity to have claims considered in which their constituents were interested. I think, therefore, it is only fair that the call of the roll should be completed, so that other gentlemen, who agreed to that arrangement and that method of procedure, shall have the same opportunity as those whose names preceded theirs upon the roll, and I hope my colleague's sense of fairness to other gentlemen who have not yet been reached in the call will induce him to allow us to go on and complete the roll-call, so that members who desire consideration of measures which have been reported from committees of the House duly organized shall have an equal opportunity with others whose bills have been reached earlier.

Mr. KILGORE. I appreciate the observations of my colleague, but we all remember the state of things here last Friday when bills were passed appropriating over $100,000, of which perhaps $5,000 was for meritorious claims, and I am very much inclined to abide by the terms of a resolution which my colleague [Mr. LANHAM] introduced here recently, providing that no legislation shall be had at this session except upon the tariff, upon "trusts," and general appropriation bills. It is true that that resolution has not been adopted, but any gentleman upon this floor can, if he chooses, practically enforce its terms, and I am very much inclined to do it.

Mr. LANHAM. I should be glad to have the purposes of the resolution on "trusts" carried out.

Mr. HOOKER. I hope the gentleman from Texas [Mr. KILGORE] will withdraw his objection. We have all sat here and heard the roll called half through, and the bills of gentlemen whose names have been reached have been considered, and many of them passed, including, I believe, a bill for the gentleman from Texas [Mr. KILGORE] himself, and it certainly would be gross injustice to stop the call at this point.

Mr. ROGERS. Let me suggest also to my friend from Texas [Mr. KILGORE] that there are right-of-way bills, and bridge bills and other bills which do not take a dollar out of the Treasury, and which ought to be considered.

Mr. KILGORE. Are they on the Private Calendar?

Mr. ROGERS. Some of them are.

Mr. KILGORE. Well, Mr. Speaker, I give up. [Laughter.]

The SPEAKER. The gentleman from Texas withdraws his objection. If there be no further objection, pending the motion of the gentleman from Texas [Mr. LANHAM], the Chair will submit a request from the Committee on Public Buildings and Grounds, which is embodied in a resolution which the Clerk will now read.

ELECTRIC LIGHTS IN THE CAPITOL.

The Clerk read as follows:

Resolved, That the subcommittee on electric lights for the House wing of the Capitol of the Committee on Public Buildings and Grounds be, and is hereby, authorized to sit during the recess between the present and the second session of this Congress.

The SPEAKER. The Chair is advised that this resolution involves no additional expenditure, the committee having been already authorized to make the investigation. Is there objection to the adoption of the resolution?

Mr. JOHNSTON, of North Carolina. Mr. Speaker, as a member of that subcommittee, I would like to know whether the resolution requires us to stay here during the recess?

The SPEAKER. It does not.

The resolution was agreed to.

ORDER OF BUSINESS.

The SPEAKER. The question now is on the motion of the gentleman from Texas [Mr. LANHAM] that the House resolve itself into Committee of the Whole for the consideration of business on the Private Calendar.

The question was taken; and the Speaker declared that the ayes seemed to have it.

Mr. ALLEN, of Mississippi. I call for a division.

Mr. LANHAM. If the gentleman from Mississippi [Mr. ALLEN] is determined to insist upon the point of no quorum being present, it is unnecessary to take up further time in this way.

The SPEAKER. The question is on the motion of the gentleman from Texas [Mr. LANHAM] that the House resolve itself into Committee of the Whole for the consideration of business on the Private Calendar.

The motion was agreed to—ayes 38, noes 7.

Mr. MCMILLIN. Would it be in order for me to submit at this time a privileged motion that when the House adjourns this evening it adjourn to meet on Monday next?

The SPEAKER. That motion can be made when the Committee of the Whole rises. It is not strictly in order now, the House having just voted to go into Committee of the Whole.

Mr. MCMILLIN. I ask unanimous consent to submit the motion.

Mr. MORGAN. I object for the present. If gentlemen propose to filibuster this day away, we will keep them here to-morrow.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. MCCOOK, its Secretary, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2742) to incorporate the Brightwood Railway Company of the District of Columbia.

The message also announced that the Senate had passed without amendment the bill (H. R. 4765) for the relief of G. W. McAdams.

The message also announced that the Senate had passed bills of the following titles; in which the concurrence of the House was requested:

A bill (S. 3340) for the disposition of Fort Brooke military reservation at Tampa, Fla., and for other purposes; and

A bill (S. 3501) relating to the classification of post-offices and amendatory of the act approved March 3, 1883, entitled "An act to adjust salaries of postmasters."

The message also announced that the Senate further insisted on its amendments, disagreed to by the House, to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and for prior years, and for other purposes, agreed to the further conference asked by the House on the disagreeing votes of the two Houses upon said bill, and had appointed as conferees on the part of the Senate Mr. HALE, Mr. ALLISON, and Mr. COCKRELL.

ORDER OF BUSINESS.

The House resolved itself into Committee of the Whole House on the Private Calendar, Mr. RICHARDSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole for the consideration of the Private Calendar under the order of business adopted heretofore when the Committee of the Whole was in session.

ESTATE OF RICHARD W. MEADE.

The CHAIRMAN. When the Committee of the Whole rose last Friday the gentleman from Iowa [Mr. HOLMES] was upon the floor making an explanation in regard to a joint resolution which he desired to call up for consideration—joint resolution (H. Res. 189) to amend and enlarge the provisions of a joint resolution approved July 25, 1886, "Joint resolution to refer the claim of the administrator of Richard W. Meade, deceased, to the Court of Claims." The Chair recognizes the gentleman from Iowa as now entitled to the floor.

Mr. HOLMES. Mr. Chairman, when this bill was last before the Committee of the Whole, I was making some observations in explanation of it. I stated that the Spanish Government had allowed the claim in this case in the sum of about $300,000, and that the American commission appointed to investigate the matter had refused to make allowance or further to investigate the claim, because the original papers placed before the Spanish Government were not submitted by this claimant, nor would the Spanish Government permit of any use being made of them for the purpose of enforcing this claim before the American commission.

Mr. LANHAM. I rise to a parliamentary question. I would like to know what is the status of the joint resolution with regard to which the gentleman from Iowa [Mr. HOLMES] is now speaking. Has the question been submitted whether the Committee of the Whole will consent to its consideration?

Mr. HOLMES. Consent was given me to make an explanation of this matter; that is what I was doing when, on last Friday, I yielded for a motion that the Committee of the Whole rise.

Mr. SOWDEN. At that time I reserved the right to object when the matter should come up again to-day.

The CHAIRMAN. The Chair is informed that on last Friday the right to object after the statement of the gentleman from Iowa should be completed, was reserved. When the gentleman from Iowa has completed his statement the Chair will put the question whether there is objection.

Mr. NELSON. I ask that the bill be again read; some of us do not know what it is.

The Clerk read as follows:

Joint resolution (H. Res. 189) to amend and enlarge the provisions of a joint resolution approved July 25, 1866, entitled "A joint resolution to refer the claim of the administrator of Richard W. Meade, deceased, to the Court of Claims."

Whereas by joint resolution approved July 25, 1866, Congress referred the claim of Richard W. Meade, administrator of Richard W. Meade, deceased, to the Court of Claims "for adjudication thereof, pursuant to authority conferred upon said court by any existing law to examine and decide claims against the United States referred to it by Congress;" and

Whereas the said court and the Supreme Court of the United States dismissed the said claim upon the ground that the said resolution did not confer upon them jurisdiction to hear and determine the said claim upon its merits: Therefore,

Resolved by the Senate and House of Representatives, etc., That the claim of Richard W. Meade, administrator of the estate of Richard W. Meade, deceased, be, and the same is hereby, referred to the Court of Claims with full jurisdiction and authority to determine and adjudge whether or not the said Richard W. Meade, deceased, had a valid claim against the Government of Spain which was released to the said Government by that of the United States; and if said court determine that such claim was so released, then it is hereby given jurisdiction and authority to pronounce judgment for such amount as it may find to have been justly and equitably due thereon: *Provided*, That no allowance shall be made for interest on said claim accruing after the date of such release: *And provided further*, That from any final judgment of said court or from any judgment on demurrer with leave to amend or plead either the claimant or the United States shall have the right of appeal to the Supreme Court of the United States, whose judgment in the matter shall be final.

Mr. SOWDEN. Mr. Chairman, so far as I may have intimated any objection to the consideration of this joint resolution, I withdraw it now, because I see that by the terms of the resolution there is reserved a right of appeal to the Supreme Court. The case is to undergo a thorough judicial examination, instead of being examined merely by a committee of this House.

The CHAIRMAN. The gentleman from Iowa will now complete his statement.

Mr. HOLMES. After the claim had been disallowed by the American commission Mr. Meade was without remedy. He had his judgment in the Spanish court, but the Spanish authorities maintained that by the treaty the claimant had been relegated to the American Government for the settlement of his claim; that it should be paid out of the $5,000,000 provided in the treaty for the payment of certain claims. On the other hand, the United States Government contended that the claim was still due and owing by the Government of Spain.

What is sought in this case is that this matter may be sent to the Court of Claims for determination of the question whether or not the United States Government is liable; and if not, the further enforcement of the claim will be a matter of diplomatic correspondence between this country and Spain. That is all there is in this proposition. Not a dollar of appropriation out of the United States Treasury is asked, but simply an adjudication of this claimant's rights as between the United States and Spain—nothing more. This is certainly due to any claimant under such circumstances, particularly where a *prima facie* case is made out so absolutely as in this instance. General George G. Meade has deserved well of the people of this nation, and certainly this House is not prepared to do him or his family injustice in connection with a matter so plain on its face as this claim, the justice of which has been conceded so many times in various tribunals, by this Government, and by the Spanish Government as well.

I ask consent that the gentleman from Mississippi [Mr. HOOKER], who made the report in this case and who has given it more thorough investigation than I have, be allowed to make a statement in regard to it.

The CHAIRMAN. Is there objection to the present consideration of this joint resolution?

Mr. OATES. I do not understand just exactly what it is proposed to be done by this joint resolution, and would like to have the gentleman explain the present status of this matter.

The CHAIRMAN. The joint resolution is not before the committee for consideration. The question is whether the committee will consent to its being brought up.

Mr. OATES. I know that, but I wish to ask a question in reference to this Meade claim so that I may understand what it is proposed to do.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OATES. Has not a bill been already passed referring this question to the Court of Claims, and is not this joint resolution which it is now asked shall be called up for consideration in the nature of legislation amendatory of that which has been already passed?

Mr. HOOKER. If the gentleman from Iowa [Mr. HOLMES] will allow me, I will answer the interrogatory of the gentleman from Alabama, as I made the report from the Committee on Foreign Affairs, which was unanimous in favor of the passage of this joint resolution.

Mr. HOLMES. Certainly, I will yield to the gentleman for that purpose.

Mr. HOOKER. There was a resolution passed in 1886 referring this matter to the Court of Claims for adjudication. It was referred to the Court of Claims, and the Court of Claims passed upon it. From that judgment of the Court of Claims there was an appeal to the Supreme Court of the United States. The Supreme Court in rendering its opinion expressed its regret that the resolution adopted by Congress was not broad enough to give jurisdiction to the Court of Claims to adjudicate the whole question.

Mr. OATES. In what particular regard?

Mr. HOOKER. The Supreme Court of the United States expressed its regret in that opinion that the legislation of Congress did not give the Court of Claims jurisdiction to go into the matter of the judgment rendered by the Spanish court, as well as other matters necessarily involved in coming to a right decision upon the nature and validity of

this claim. Now, Mr. Chairman, Mr. Meade had for a number of years entered into contracts with the Spanish Government, fourteen in number, and when he made his claim before the Spanish Junta, where this was being considered, together with other claims against the Spanish Government, they rendered a judgment in his favor. In the treaty which was entered into between the United States and Spain under which we acquired Florida, the United States agreed to assume all liability on the part of Spain to citizens of this country to the extent of $5,000,000. To the commission which was appointed under the treaty Mr. Meade presented his claim, but being unable to withdraw his papers from the Spanish Government and present them to the commission there was nothing before them upon which judgment could be rendered, and the term of three years having expired under the treaty the claim was rejected.

As I have already stated, Mr. Chairman, the Supreme Court of the United States in rendering its opinion upon the appeal taken from the decision of the Court of Claims expressed its regret that the legislation of Congress was not broad enough to take all these matters into consideration.

The resolution now pending merely proposes to give the Court of Claims full jurisdiction to pass upon the validity of this Meade claim, to go into the judgment of the Spanish Government in favor of Mr. Meade, and other matters necessary to arrive at a just conclusion. In other words, the legislation merely proposes to give the court full authority to go into the whole matter, with the right reserved to each party to appeal to the Supreme Court of the United States, as it is evident in a matter of this kind there can be no final disposition of the case until the Supreme Court of the United States has rendered its decision upon the whole matter.

Mr. OATES. From the investigation which I have been able to give this question, without having gone into the whole case, I am satisfied there is some justice in it. My desire was, in asking the question I did, to discover just exactly what was proposed to be done by this legislation.

Mr. HOOKER. If the Supreme Court decides that the Spanish Government by the judgment of its own junta was liable to Mr. Meade, and that the United States assumed under the treaty with Spain the liability of Spain to American citizens, then that is the end of the matter.

Mr. OATES. The gentleman's statement is satisfactory to me, and so far as I am concerned I do not interpose any objection.

The CHAIRMAN. If there is no objection, the joint resolution will be laid aside to be reported to the House with the recommendation that it do pass.

Mr. ALLEN, of Mississippi. I object.

The CHAIRMAN. The question will then be submitted on laying the resolution aside to be reported to the House with the recommendation that it do pass. [After a pause.] The ayes seem to have it.

Mr. ALLEN, of Mississippi. Division.

The committee divided; and there were—ayes 45, noes 9.

Mr. ALLEN, of Mississippi. No quorum has voted.

Mr. LANHAM. I hope the gentleman in charge of this joint resolution will withdraw it, as it is evident a quorum is not present.

Mr. HOOKER. I hope the gentleman from Mississippi will not insist upon his point of no quorum. This is simply a resolution referring this matter to the Court of Claims for adjudication. There is nothing else in it.

Mr. LANHAM. I hope the gentleman from Iowa [Mr. HOLMES] will withdraw the resolution.

Mr. HOLMES. It does not seem to me, Mr. Chairman, there is anything in this case which requires I should withdraw it, and especially when it seems on the part of those present there is no very serious opposition to it.

Mr. CULBERSON. I demand the regular order.

The CHAIRMAN. The regular order is demanded, and the Chair will appoint as tellers Mr. HOLMES, and Mr. ALLEN of Mississippi.

The committee proceeded to divide.

Mr. LANHAM. I am informed by the gentleman from Mississippi that it is not his purpose to allow any bills to pass unless a quorum is present. That being the case, I move that the committee now rise.

The CHAIRMAN. That motion would not be in order while the committee is dividing.

Mr. HOOKER. I believe my name comes next on the roll. I have a little bill here, involving but a small amount——

The CHAIRMAN. The only business in order is the announcement of the vote by tellers.

The tellers reported—ayes 35, noes 5.

Mr. ALLEN, of Mississippi. No quorum.

Mr. LANHAM. I move that the committee now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. RICHARDSON reported that the Committee of the Whole House having had under consideration House joint resolution 189, had come to no resolution thereon.

Mr. LANHAM. I move that the House do now adjourn.

Mr. MCMILLIN. Pending that I move that when the House adjourns to-day it be to meet on Monday next.

Mr. MORRILL. I hope the motion to adjourn will not prevail, because it cuts off the Friday evening session for pensions.

The SPEAKER. The motion of the gentleman from Tennessee does not interfere with the Friday evening session.

Mr. DINGLEY. Let the motion of the gentleman from Tennessee be adopted, but not the motion of the gentleman from Texas, which would cut off the night session.

Mr. WHEELER. I move as a substitute for the motion of the gentleman from Tennessee that to-morrow be substituted for the consideration of private bills.

The SPEAKER. That motion is not in order.

The question being taken on the motion of Mr. MCMILLIN, the House divided; and there were—ayes 65, noes 14.

Mr. MORGAN. No quorum.

Mr. LANHAM. I move that the House do now adjourn.

The SPEAKER. That is the pending motion.

Mr. HOOKER. I hope the gentleman will withdraw that motion and allow me to ask leave to present one bill. [Cries of "Regular order!"]

The SPEAKER. The motion of the gentleman from Tennessee is still pending.

Mr. HOOKER. I wish to ask unanimous consent to consider a bill. [Cries of "Regular order!"]

The SPEAKER. If the motion of the gentleman from Texas was withdrawn the Chair would have to proceed with the regular order, which is the appointment of tellers on the motion of the gentleman from Tennessee, on which a quorum is demanded.

Mr. HOOKER. The question of no quorum being made on the motion of the gentleman from Tennessee, is it in order to do anything else except to adjourn?

The SPEAKER. It is not, except to appoint tellers on that motion and complete the vote. If the motion of the gentleman from Tennessee is withdrawn, the Chair will submit the motion of the gentleman from Texas; otherwise the gentleman from Tennessee has priority under the rules.

The point of no quorum being made, the Chair will order tellers.

Mr. MORGAN and Mr. MCMILLIN were appointed tellers.

The House again divided; and there were—ayes 42, noes 7.

The SPEAKER. Is the point of no quorum insisted upon?

Mr. ROWLAND. I make the point of no quorum.

Mr. LANHAM. I ask unanimous consent, then, that next Monday be substituted for to-day, and that Monday night be substituted for the night session fixed for to-day for pension bills, so that the House may adjourn over until Monday when it adjourns to-day. In other words, I ask unanimous consent that the order of business for to-day may be executed on Monday and Monday evening.

Mr. HOLMES. I understand under that arrangement that the bill just up would have its same status then that it has to-day.

The SPEAKER. Of course it would occupy the same position precisely if that order were made.

Is there objection to the request of the gentleman from Texas?

Mr. MCKENNA. I object.

Mr. LANHAM. Then I demand the regular order.

The SPEAKER. The tellers will resume their places.

Mr. MCKENNA. Mr. Speaker, I withdraw the objection.

The SPEAKER. Is there further objection?

Mr. FULLER. I object.

Mr. ALLEN, of Mississippi. I ask unanimous consent to make a statement for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. ALLEN, of Mississippi. I gave notice on yesterday evening, when it was objected that there was not a quorum here, and that therefore the House could not adjourn over until Monday—thinking that it took just about as many to pass a bill as to adjourn over, and that if less than a quorum was not sufficient to adjourn over less than a quorum ought not to be sufficient to pass any bills, I gave notice that no bills should pass to-day without a quorum; but I find a large number of gentlemen here who have unimportant bills—important to them, but unimportant as public measures of legislation—that they are anxious to pass; and I, as everybody knows, being a sort of an amiably-disposed person, and not wanting to obstruct things of that sort, I will, on the condition that the bill that I called a quorum on be laid aside without a favorable or any other recommendation, withdraw my objection to the House proceeding, and let us take up such bills as are unobjectionable and pass them.

Mr. MORGAN. With the understanding that we may proceed to-day as on the last two Fridays, I withdraw my objection to the motion of the gentleman from Tennessee.

The SPEAKER. But the gentleman from North Carolina made the point of no quorum on that motion.

Mr. ROWLAND. I withdraw the point.

Mr. MCMILLIN. Still my motion is pending, and I ask the Chair to announce the result of the vote.

The SPEAKER. The ayes are 52, noes 8. The point of no quorum has been withdrawn; the ayes have it, and the motion of the gentle-

man from Tennessee [Mr. MCMILLIN], that when the House adjourn to-day it be to meet on Monday next, is agreed to.

Mr. LANHAM. Mr. Speaker, I withdraw the motion to adjourn, and move that the House resolve itself into Committee of the Whole on the Private Calendar.

The motion was agreed to; and accordingly the House resolved itself into Committee of the Whole on the Private Calendar, Mr. RICHARDSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole on the Private Calendar, under the same rule as obtained on Friday last.

Mr. HOLMES. I desire, in conformity with the request of several gentlemen, to withdraw the bill, consideration of which I had asked, without prejudice, and that it retain its place on the Calendar.

The CHAIRMAN. If there be no objection, that order will be made.

There was no objection.

A. N. KIMBALL.

Mr. HOOKER. I ask consideration of the bill (H. R. 7151) for relief of A. N. Kimball and sureties on his official bond as receiver of public moneys.

The CHAIRMAN. The bill will be reported, after which the Chair will ask for objection.

The bill was read, as follows:

Be it enacted, etc., That the Commissioner of the Land Office and the proper accounting officers of the Treasury be, and they hereby are, authorized and directed, in the settlement and adjustment of the accounts of Aaron N. Kimball, late receiver of public moneys and disbursing agent at Jackson, Miss., to allow credit for the sum of $1,176.71 (being the sum of $924 of the public funds disbursed by him for clerical services, and for stationery and blanks procured for and used in the land office and receiver's office at Jackson, Miss., in a case of emergency upon a sudden and unexpected increase of the business of said offices, and the sum of $252.71, interest at the rate of 6 per cent. per annum on the amount of said disbursements from May 2, 1883, to the 23d day of November, 1887, on which last-named date a judgment was rendered in the circuit court of the United States for the southern district of Mississippi against the said Kimball and his sureties on his bond as such receiver, for the said and other moneys). And it is further directed that a remitter be entered on said judgment for the amount of said credit.

It is proposed to strike out all following the enacting clause and insert:

That Aaron N. Kimball, late receiver of public moneys and disbursing agent at Jackson, Miss., be, and he is hereby, allowed credit for the sum of $549 for clerical services rendered and blanks furnished his said office without the authority of the Secretary of the Interior, and for which said Kimball has not heretofore received credit. And the marshal for the United States in the district of Mississippi, and the United States court held at the city of Jackson, in said State, be, and he is hereby, directed and required to credit the said sum of $549 on a certain judgment recovered in said court by the United States as plaintiff against said Kimball and the sureties on his official bond as defendants.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. FULLER. I ask that the report be read.

The report was read, as follows:

The Committee on the Judiciary, to whom was referred House bill 7151, having had the same under consideration, respectfully report:

Mr. Kimball was receiver of public moneys at Jackson, Miss., and in the final adjustment of his accounts with the General Land Office he claimed various items of credit, as follows:

ITEMS OF DISALLOWED ACCOUNT.

To amount paid Joseph S. Ware for clerical services from January 1, 1882, to April 30, 1883, as per Voucher A	$115
To amount paid E. B. Comfort for clerical services from July 10, 1882, to April 3, 1883, as per Voucher B	35
To amount paid N. J. Smith for clerical services from March 4, 1883, to March 7, 1883, as per Voucher C	6
Amount paid Power & Barksdale for printing blanks, as per bill marked Voucher D, and samples from Nos. 1 to 10, inclusive	93
Amount paid Mrs. Mary C. Kimball for clerical services from January 1, 1882, to June 1, 1882, inclusive, as per Voucher E	375
Total	924

The following history of the case, from the Commissioner of the General Land Office, through the Secretary of the Interior, explains why this account was rejected:

DEPARTMENT OF THE INTERIOR, *Washington, March* 13, 1888.

SIR: There are transmitted herewith the report of the Acting Commissioner of the General Land Office on bill H. R. 7151, "For relief of A. N. Kimball and sureties, on his official bond as receiver of public moneys at Jackson, Miss.," and the papers accompanying said bill, as submitted by you on the 7th instant.

Very respectfully,

WM. F. VILAS, *Secretary.*

Hon. WILLIAM C. OATES,
Chairman of Subcommittee, Committee on the Judiciary, House of Representatives.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., March 10, 1888.

SIR: I am in receipt of a communication under date of March 7, 1888, from Hon. W. C. OATES, chairman subcommittee on the Judiciary, House of Representatives, inclosing House bill No. 7151, "For the relief of A. N. Kimball and sureties, on his official bond as receiver of public moneys," with accompanying papers, with a request that he be furnished with a "history" of the case, and in reply thereto have to state as follows:

That under date of May 5, 1883, Mr. A. N. Kimball transmitted to this office an account for fractional quarter ending April 30, 1883, debiting the United States with the sum of $549 claimed to have been expended by him for clerical services rendered from January 1, 1882, to April 30, 1883, and for certain blanks furnished the land office at Jackson, Miss., from October 28, 1880, to January 25, 1883.

This account was rejected and returned to him under date of September 17, 1884, because no authority had been given him to make these expenditures.

Nothing further was heard from the account until November 5, 1887, when Mr. A. N. Kimball presented an account for fractional quarter ending April 30, 1883, to this office, supported by vouchers for expenses incurred by said Kimball, as receiver, at Jackson, Miss., from January 1, 1882, to June 1, 1883, amounting to $924, which included the $549, previously rejected, and the further sum of $375 for clerical services rendered to June 1, 1883.

The honorable Secretary of the Interior was advised, under date of November 14, 1887, that the claim of Mr. Kimball could not be allowed without the approval of the Secretary, as is required by section 2255, United States Revised Statutes.

It stands unexplained why Mr. Kimball should submit to this office, under date of November 5, 1887, an account purporting to be for fractional quarter ending April 30, 1887, and containing an item of $375 for clerical services, $75 of which said amount is for services claimed to have been rendered during a period of one month subsequent to the date for which said account is rendered and of the expiration of his term of office, and also why the balance of said $375, amounting to $300, claimed to have been expended for clerical services from January 1 to April 30, 1883, was not included in his account May 5, 1883, for fractional quarter ending April 30, 1883, and rejected as above set forth.

If Mr. Kimball expended the sum claimed for clerical services and blanks, and the United States received the benefit of the same, it is for Congress to determine whether he is entitled in equity to relief or not, and whether he shall be allowed it, notwithstanding the expenditure claimed to have been made was without authority of the Secretary of the Interior, as required by law, and the fact that he was advised by this office that the clerical services could not be authorized. See letters submitted and returned herewith.

Very respectfully,

S. M. STOCKSLAGER,
Acting Commissioner.

Hon. W. F. VILAS,
Secretary of the Interior.

Your committee, while disapproving the course of Mr. Kimball in incurring expenses of his office without authority of the Secretary of the Interior, yet, under the peculiar circumstances, herewith report a substitute and recommend its adoption, allowing him a credit on a judgment recovered by the United States against him and the sureties on his official bond in the United States circuit court at Jackson, Miss., for $549, rejecting $375, the last item in his said account, because the same is not sufficiently explained and proven to entitle him to a credit therefor.

Mr. OATES (during the reading). If the Clerk will suspend the reading I will explain the claim in a few words.

The claimant was receiver at the land office at Jackson, Miss. At a time when there was a great run on the office, the clerical force which he had was unable to do the work, and he ran out of blanks. He took the responsibility of employing additional clerks and having blanks printed for use in his office. After he passed out of office there was a suit brought against him on his bond for a considerable amount—$1,500 or $2,000—and he was found to be insolvent; but his sureties were solvent, and they were unable to use this claim, which amounted to about $900, included in these items. They were unable to use it as a set-off. It was not allowed by the Department, because he had not obtained the authority of the Commissioner of the General Land Office to make this expenditure. After the committee had the benefit of an explanation of the Commissioner of the General Land Office we decided that at least $531 of the claim should be allowed as a credit, giving his sureties the benefit of it on the judgment against them. Some $400 of his claim was rejected by the committee, because we did not think the proof was quite sufficient.

Mr. HOOKER. You recommended that $549 be allowed?

Mr. OATES. Yes. The amount proposed to be allowed is $549, and is certainly just.

Mr. FULLER. I would like to ask the gentleman a question. Did this officer ever make any claim to the Department for this expenditure before he was sued on the bond?

Mr. HOOKER. Oh, yes; repeatedly.

Mr. OATES. He claimed it, but it was not allowed.

Mr. FULLER. Were the claims refused by the Department?

Mr. OATES. They were refused, and the Commissioner of the General Land Office makes the statement that they were not allowed because they did not want to establish the precedent of any inferior official expending any amount without the consent of the Department. But they do not dispute the fact that the expenditure was made and that it was necessary.

Mr. FULLER. Then the amount was claimed before he was sued upon his official bond?

Mr. OATES. Oh, yes.

Mr. TURNER, of Georgia. Did he ask the Department for authority to employ the extra help?

Mr. OATES. He first employed them and then applied for consent; and the only ground on which it was refused at the time was that the appropriation was short. When he went out of office it had not been paid.

Mr. TURNER, of Georgia. I would ask the gentleman if he thinks, with his large experience of legislation here, that it would be prudent to allow officers to employ extra help without first obtaining the consent of the proper Department?

Mr. OATES. I think as a rule it would not be right and I would not sanction it. I think the Department made a correct decision in not permitting a precedent to be made; but there are such equities in this case, the Government getting the benefit of that expenditure, that it looks hard to require the sureties to pay the amount after the Government has got the benefit of the expenditures. I think the equities would be to give them the benefit of that much. Now the whole claim was about $900. We rejected the items about which there was some doubt, but there is no doubt about the amount we now recommend.

Mr. RYAN. Do I understand that this claimant had made application to employ these clerks before he did employ them?

Mr. OATES. It was about the same time. He employed the clerks because there was a rush upon the office, and he did not like to refuse the entries on account of a deficiency of clerical force. He sent his application on and went ahead. The clerks commenced doing the work, and he received an answer in a week, or perhaps a month, that the request could not be complied with, because the appropriation was short.

Mr. RYAN. Is that a maximum office?

Mr. OATES. I can not say as to that. It was laid before the Judiciary Committee, and after canvassing it fully they decided unanimously that that credit ought to be allowed under the exceptional circumstances of this case.

Mr. FULLER. Mr. Chairman, I think this is a very bad precedent to establish, and I shall have to object.

The CHAIRMAN. Is there further objection to the consideration of this bill?

Only three members objected—not a sufficient number.

Mr. HOOKER. I will move that the bill be laid aside to be reported to the House with the recommendation that it do pass. Before submitting that motion, however, I wish to read the concluding sentence of Mr. Stockslager, the Acting Commissioner. He says:

If Kimball expended the sum claimed for clerical service and blanks, and the United States received the benefit of the same, it is for Congress to determine whether he is entitled, in equity, to relief or not, and whether he shall be allowed it notwithstanding the expenditure claimed to have been made was without authority of the Secretary of the Interior, as required by law, and the fact that he was advised by this office that the clerical service which he desired would not be authorized.

Mr. TURNER, of Georgia. Will the gentleman from Alabama [Mr. OATES] state precisely what the items are for which payment is recommended?

Mr. OATES. They are stated in detail in the report. The last item, $375 for services rendered by Mrs. Kimball, was rejected by the committee and is not embraced.

Mr. TURNER, of Georgia. Why was that rejected?

Mr. HOOKER. I understand that that was rejected by the committee because they did not have sufficient proof of the rendition of the services by Mrs. Kimball, but in point of fact she is more entitled to pay than anybody else, in my judgment.

Mr. OATES. There was some testimony taken by the subcommittee of which I am a member; but as to this item for clerical services said to have been rendered by the wife of the claimant, there was no evidence of the rendition of the service except his affidavit and hers. As to the other services, however, which we reported favorably upon, there is no question; several affidavits were submitted proving that the services were rendered, and well rendered; and also as to the blanks, it was shown that they were furnished and that only a reasonable price was charged for them.

Mr. TURNER, of Georgia. Do not the account and the proof show that these clerical services were obtained by this officer after he had been notified by the Department that it would not authorize the employment or furnish the compensation?

Mr. OATES. That was the case in respect to the service which he claimed to have been rendered by his wife.

Mr. TURNER, of Georgia. Was it not the case as to the whole of the services?

Mr. OATES. No, not as to the whole; only as to part. He renewed his application. There were two or three different applications.

Mr. TURNER, of Georgia. Now, I want to ask my friend from Alabama whether in his judgment it would be wise in Congress to sanction any such extraordinary course as that of this official. A postmaster or any other officer of the Government having asked for authority to expend the public money in a certain manner, and having been refused, does my friend think it would be proper to permit him to go on and incur expenses on his own responsibility and then come to Congress and ask reimbursement either for himself or his securities? Does not the gentleman know that that would tend to encourage similar expenditures on the part of public officials, who would rely upon Congress to make the amount good later?

Mr. OATES. I stated a few moments ago that I thought the Department was right in not allowing a precedent of this kind to be set up there. But herein lies the equity in favor of those who would benefit by it in this case. The blanks were actually furnished and the printer was paid for them. The services upon which we have reported favorably were actually rendered, and lands were being entered and money paid there, and the Government of the United States actually received the benefit of those services. The money went into the Treasury, and while the act of the officer was not warranted, while it was irregular, and while, if no one but the officer himself was to suffer, it might be well not to relieve him—in fact, I do not think I would vote to do it—yet when the man's sureties are concerned, and when the Government received the full benefit of these services and these expenditures, it seems to me rather a hard case not to allow this credit on the judgment. I think there is an equity in the matter, and it is a case that must rest on its own bottom. It is not likely to be a precedent, nor, so far as Congress is concerned, is it likely to influence our future action. I think it ought not to have been established as a precedent in the Department, but I think the parties are entitled to relief here to the extent recommended. There was some doubt in my mind as to whether the service claimed to have been rendered by this man's wife ought to be paid for, because, in addition to other reasons, those services were clearly rendered after he knew of the refusal of the Department to sanction the expenditure. As to the $549, I think the allowance is clearly right.

Mr. CATCHINGS. For how long a period of time was this extra clerical force employed?

Mr. OATES. Only a short time. There was a run made upon the office when there were a great many people taking up land.

Mr. CATCHINGS. Was it not nearly a year?

Mr. OATES. Oh, not so long—only two or three months.

Mr. HOOKER. Unless some gentleman desires to say something more on this subject, I will move that the bill be laid aside to be reported to the House with the recommendation that it do pass.

Mr. TURNER, of Georgia. Mr. Chairman, I have great respect for the judgment of the gentleman from Mississippi [Mr. HOOKER], as well as the gentleman from Alabama [Mr. OATES], on this question, formed, as no doubt it is, upon fair and considerate attention; and this being a small matter, I would be glad to waive any scruples I may have in regard to it. Small matters as well as large ones make precedents, and I doubt very much whether it would be wise on the part of Congress to set the example of compensating an officer who upon his own responsibility has incurred an expenditure of this sort. We may regret the hardship to his sureties, but I think it much better that a man who has voluntarily incurred a sacrifice of this sort, with full notice that he does so without authority, should suffer the burden of the expenditure rather than that public policy should be violated by Congress in compensating him for an expense incurred in this way.

Mr. HOOKER. I have only a word to say in reply to what has fallen from the gentleman from Georgia [Mr. TURNER]. In the several Departments of the Government, particularly in the Land Department, there arises occasionally necessity for the employment of extra clerical force. Of course the Department has, and ought to have, a supervision of this matter, and usually directs whether the extra force shall be employed. But instances have come to my knowledge in which a register or receiver at a land office has been constrained to employ clerks for the performance of the duties of the office, assuming himself the risk of having the Commissioner grant an extra allowance for such services; and in several instances the Commissioner has granted such an allowance. In this instance the Commissioner says himself that, while he did not grant the allowance, there is no sort of question, as the committee has shown in the report, that the services were rendered, that the Government received the benefit of them; that this money was expended for the purpose of purchasing blanks which were absolutely necessary for carrying on the business of the Land Office. There is no sort of question about any one item of the account.

Mr. TURNER, of Georgia. Will the gentleman allow me to conclude this whole matter, so far as I am concerned, by putting a case to him? Take the case of the postmaster at the city of Jackson, Miss. No doubt there is sometimes at that office a great pressure of business in the distribution of mails, etc., and allowances are frequently made for extra expenses at offices of that magnitude. Now, suppose the postmaster at that city, after asking the Postmaster-General to make a special allowance for such service, and after the refusal of such application (the postmaster having been informed that the allowance could not be made on account of the state of the finances), should go on and employ an extra clerk to help him. Would the gentleman favor an appropriation to reimburse the postmaster in such a case?

Mr. HOOKER. I would not; and I will tell the gentleman why. That is altogether a different case. The administration of the postal business in any city or town—Jackson, Miss., or anywhere else—is usually provided for by an appropriation made by Congress which is deemed adequate for the purpose, and the employment of an additional clerk by the mere action of the postmaster is certainly a condition of affairs which could hardly arise, because there is no such increase in the business of the Post-Office Department from day to day, from week to week, from month to month, as may arise in the Land Office, and as did arise in this case.

Mr. ROGERS. Mr. Chairman, the case put by my friend from Georgia [Mr. TURNER] is, as he states it, a very strong one; and in any ordinary case I should accept his judgment on a point of this kind as correct. But I submit to him that he overlooks the controlling element in this case. While I do not distinctly recall the circumstances of this case, my recollection of it, as it came before the Judiciary Committee, has been somewhat refreshed by the observations of my friend from Alabama [Mr. OATES]. As he states, the Land Office declined to make an allowance to this officer because of the fact that there was an absence of appropriation, that the appropriation for work of this sort had been exhausted. There is an act of Congress prohibiting any of the Departments from making any contracts or allowances in excess of the appropriations made by law.

Now here was an emergency—one of a class of emergencies arising from time to time—where the necessities of the office, the convenience

of the people in the proper and speedy dispatch of the public business required an official force for which Congress in its original appropriations had not made provision. To illustrate: At Eureka Springs in our State, some years ago, waters of a medicinal character, or supposed to be medicinal, were discovered; and where there had been a barren waste there was within a few months a population of 5,000 people. The post-office there was completely overrun, persons waiting at the office in large numbers to obtain their mail. The postmaster, with the allowances made to him, could not properly dispatch the duties of his office, and no additional allowance was made by the Department to enable him to do so. Now, the question is whether a public officer, when an emergency like that, unanticipated and unprovided for, arises, should be allowed to neglect or disregard the necessities of the public. In that case, or in some other case of that character (I am not sure about the particular case), the Forty-ninth Congress, when the subject was brought to its attention, made proper provision for the reimbursement of the officer who had been compelled to decide between abandoning the discharge of the public business or staying there and for the time being bearing the additional expense himself. My friend who represents that district states that provision was made by Congress for the reimbursement of the officer in that instance.

Will any gentleman maintain that under such circumstances Congress ought not to have granted relief? And that case is analogous to the one now presented. The Department would have granted the necessary allowance, but Congress had failed to make adequate appropriation, and by statute the Department was prohibited from sanctioning any additional expenditure.

Mr. OATES. I desire to state that the fund appropriated in the general appropriation bill for clerical work in the local land offices is apportioned at the beginning of the year; and the amount apportioned to this particular office was exhausted before this "run" was made upon it. The land officers could not foresee that this rush of business would occur; and as the amount apportioned was exhausted, there were no funds from which an additional allowance could be made.

Mr. ROGERS. Mr. Chairman, one other observation and then I will yield the floor to my friend.

There is a provision of the statute regulating the Department of Justice in this way. Very recently during the present session of Congress——

Mr. TURNER, of Georgia. The gentleman from Arkansas will admit it was a wise public policy which was embodied in that statute.

Mr. ROGERS. Yes; I do. I should regard it in a case of public emergency where the public interests are involved to be an unjust and unwise policy not to be allowed in its discretion to make ample provision for such emergency. To illustrate. Recently, in the case of an important investigation, it was found necessary on the part of the Department of Justice to take certain depositions. They were in the progress of taking them in the city of Philadelphia when the Department discovered they would be unable to meet the expenses of the counsel engaged in taking those depositions under notice already served, and when the taking of those depositions was in progress. Now, was the Government to withdraw this special counsel and permit these depositions in which the Government was interested to be taken *ex parte* and without compensation because the statute provided they should not proceed without the funds to carry on the business? Would the Congress of the United States in a case of that kind, when properly presented and when the Department of Justice had taken the responsibility to have these depositions taken, refuse to award compensation to the counsel who were engaged in that work? Certainly not; and they did not refuse to make provision at this very session of Congress, in the general deficiency bill, to provide for the expense incurred in taking those depositions.

Mr. HOOKER. I will now yield to the gentleman from Arkansas [Mr. PEEL].

Mr. PEEL. Mr. Chairman, I have listened to the discussion which has taken place, and the case which has been referred to by my colleague is one in point. I wish to say I am familiar with that case. In my district when the Eureka Springs were first discovered the country where they are located was a wilderness. In a little while after the discovery of the springs, in 1881, people had flocked in there from all directions, and it became necessary to accommodate the public that a post-office should be established for the collection and distribution of the mail. A fourth-class post-office was established at that place, where there had accumulated some ten or fifteen thousand population.

As a matter of course, the Post-Office Department could not allow under the law an assistant in that post-office to help in the distribution of the mail, although such assistance was needed. The postmaster paid the money out of his own pocket to provide a sufficient force to accommodate the public needs. I introduced a bill for relief in that case, and it was reported favorably in the Forty-eighth Congress, to reimburse the postmaster for the money which he had paid out of his own pocket to accommodate the public while he was in the management of that post-office. It was a case of emergency which had arisen unexpectedly, and it was necessary to accommodate the people in receiving and collecting the mail; and it was just such a case where the Congress of the United States should intervene to make good whatever losses were suffered on the part of the postmaster.

Mr. HOOKER. I now yield to the gentleman from Iowa [Mr. FULLER].

Mr. FULLER. I wish to say a word in reply to some of the statements made by the gentleman from Arkansas [Mr. ROGERS]. It seems to me if his line of policy is pursued as indicated by his argument we will then have a case of this kind every session of Congress, upon the ground that the amount placed in the hands of these land officers was not sufficient.

Mr. ROGERS. The amount in the case of the Commissioner was not sufficient.

Mr. FULLER. I understand there is a certain amount in the hands of each one of these land officers to meet the expenditures under their management. I remember the case of the Lamar office in Colorado. Owing to the great amount of business in that office this money was exhausted. So in many other offices where the expenses in behalf of the public interests have exceeded the amount which they had on hand, owing to the amount of business which had been suddenly thrown upon them. Now, if we should establish a precedent like that indicated by the gentleman from Arkansas, that because there was a necessity in the case they should go on and hire extra help and come in afterwards to Congress for relief, we may expect an accumulation of cases of that character at every session of Congress. I think it is a dangerous practice, and one which ought not to be encouraged.

Mr. HOOKER. I think the House is ready to vote on this amendment. This is not asked in behalf of the man who did the work and who paid for the help which became necessary, but it is to make the allowance to the sureties involved in this suit.

The CHAIRMAN. The first question is on the pending amendment.

Mr. FULLER. I ask for a division.

The committee divided; and there were—ayes 29, noes 3.

Mr. FULLER. No quorum has voted.

The CHAIRMAN appointed as tellers Mr. HOOKER and Mr. FULLER.

The committee again divided; and the tellers reported—ayes 32, noes 1.

Mr. FULLER. While I still think this is a bad precedent, I do not feel like stopping the public business and will therefore withdraw the point of no quorum.

Mr. HOOKER. Thank you, sir.

The amendment was agreed to; and the bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

CALL OF THE LIST OF MEMBERS.

The Clerk proceeded to call the list of members.

Mr. RICE. I rise, Mr. Chairman, for the purpose of stating that the gentleman from Indiana [Mr. HOWARD] is detained from the Hall by sickness in his family, and to ask that by unanimous consent his name be passed over without prejudice to his right under the call.

There was no objection, and it was ordered accordingly.

STOCKBRIDGE AND MUNSEE INDIANS.

Mr. HUDD. I call up for present consideration the bill (H. R. 5043) for the relief of the Stockbridge and Munsee tribe of Indians, in the State of Wisconsin.

Mr. DUNN. Is that a private bill?

The CHAIRMAN. It is on the Private Calendar, and is a private bill.

The bill was read, as follows:

Whereas a treaty was entered into on the 5th day of February, 1856, by and between the Government of the United States and the Stockbridge and Munsee Indians, in which the said Indians ceded certain lands to the United States, and accepted, in consideration thereof, certain lands as a reservation, to which said Indians removed, and upon which they have ever since resided; and

Whereas by the interpretation placed by Government officials on the act of February 6, 1871, an act for the relief of said Indians, a large part of said Indians (and their descendants) who signed said treaty of 1856, and have continued with said tribe from the making of said treaty to the present time, are excluded from participating in tribal funds and the right to occupy said reservation: Therefore

Be it enacted, etc., That all persons who were actual members of said tribe of Indians at the time of the execution of the treaty of February 5, 1856, and their descendants, and all persons who became members of the tribe under the provisions of Article VI of said treaty, and their descendants, who did not in and by said treaty, and have not since its execution, separated from said tribe, are hereby declared members of said Stockbridge and Munsee tribe of Indians, and entitled to share in former tribal funds and the occupancy of tribal lands.

SEC. 2. That it shall be the duty of the Secretary of the Interior, without unnecessary delay after the passage of this act, to cause to be taken an enrollment of said tribe on the basis of the provisions of this act, which enrollment shall be filed, a copy in the Department of the Interior and a copy in the records of said tribe.

The CHAIRMAN. Is there objection to the present consideration of the bill?

There was no objection.

Mr. HUDD. This is a bill which involves no appropriation of money. It provides merely a mode of settling the differences or disputes between a tribe of Indians residing in Wisconsin. It has been reported favorably by prior Congresses, and the gentleman from Minnesota, my colleague on the Committee on Indian Affairs [Mr. NELSON], has made two reports similar to the one now pending before the House. The bill

only failed on final passage because of not having been reached. It has received unanimous reports from the Indian Committee of three Congresses. It makes no appropriation, is recommended by the Interior Department, and strongly by the Commissioner of Indian Affairs. So I presume there will be no objection to its passage.

I move that it be laid aside.

The motion was agreed to; and the bill was laid aside to be reported to the House with the recommendation that it do pass.

J. GEORGE RUCKSTUHL.

Mr. HUTTON. I ask present consideration of the bill (H. R. 338) to remove the charge of desertion from the military record of J. George Ruckstuhl.

The bill was read as follows:

Be it enacted, etc., That the Secretary of War be, and is hereby, authorized and directed to remove from the military record of J. George Ruckstuhl, late a first lieutenant in the Ninety-seventh Illinois Volunteers, the charge of desertion, and to cancel all penalties and forfeitures arising therefrom.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. HUTTON. There is an amendment I desire to offer to the bill, and also an amendment to the title.

The CHAIRMAN. The question of amending the title will come up hereafter in the House. The first question is, Will the committee now consider the bill.

Mr. KILGORE. Let us have the report read.

The report (by Mr. GEAR) was read, as follows:

They find that he was mustered into the United States service as first lieutenant of Company C, Ninety-seventh Regiment of Illinois Volunteer Infantry, September 16, 1862. That he was left at Camp Smith, Kentucky, on November 11 to superintend the burial of a dead soldier, and that he did not rejoin his regiment until February 1, 1863, during which time he was "absent without leave." Charges were preferred against him, but he tendered his resignation, to take effect December 31, 1862, which resignation was accepted by General U. S. Grant in general orders March 2, 1867.

In the tender of his resignation he states that it is on the ground of "ill-health," which statement is verified by the certificate of two surgeons who testify to the fact.

In regard to his "absence without leave" Ruckstuhl makes the following statement: That he was left under a verbal order of General A. J. Smith at Nicholasville, Ky., to bury one D. C. Fulton, a member of his regiment; that he did so remain, and after having performed this duty he started to rejoin his regiment; that on arriving at Frankfort he was taken severely ill; that he left his detail at that point, telling them that he would rejoin his regiment at Louisville; that on his arrival at Louisville, Ky., he was unable to rejoin his regiment, as he was suffering from a severe hemorrhage, in consequence of which he was unable to travel; that while in Louisville he was under the care of one Dr. Coke, who is now dead.

This statement of the facts in the case Mr. Ruckstuhl makes under oath, and is supported by the affidavits of one Gottlieb Beih and Mary Daesschofer, who both testify to the fact of his illness in Louisville, Ky.; that he was confined to his bed for about six weeks under the care of Dr. Coke, who has since died. The time that these two witnesses testify as to the duration of his illness covers the period for which he is reported "absent without leave from his regiment."

Your committee recommend that the words in the sixth line of the bill, "the charge of desertion," be stricken out and the words "absence without leave" be inserted in lieu thereof, and that when so amended the bill do pass.

There being no objection, the bill was considered, the amendment recommended by the Committee on Military Affairs adopted, and the bill as amended laid aside to be reported to the House with the recommendation that it do pass.

HYLAND C. KIRK AND OTHERS.

Mr. JACKSON. I ask the present consideration of the bill (S. 395) for the relief of Hyland C. Kirk and others, assignees of Addison C. Fletcher.

The bill was read at length.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. KILGORE. I think the report ought to be read in that case.

The CHAIRMAN. The report will be read, subject to objection.

The report was read at length.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. KILGORE. What is the amount of the claim that is proposed to be presented here to the Court of Claims?

Mr. JACKSON. I will say that this is a Senate bill, and I am not so familiar with the facts as other gentlemen on the floor to enable me to answer questions with regard to the bill. The principal information that I have in respect to it was gathered from an examination of the report of the Senate and the accompanying exhibits. I think the gentleman from New York [Mr. BAKER] has given it more attention and can probably answer fully any questions that may arise in regard to it.

The CHAIRMAN. Without objection, the gentleman from New York will make a statement in reference to the bill.

Mr. KILGORE. What amount does it involve?

Mr. BAKER, of New York. Mr. Chairman, this bill was in charge of my colleague from New York [Mr. DAVENPORT] who is absent, but at his request I have informed myself of the facts on record in the case. This matter was examined when pending in the Court of Claims, which court decided that in case the finding was substantially in favor of claimant—but I will read the exact language of the court. They say:

The court find that one-twentieth of 1 per cent. of the amount so collected, to wit, the sum of $35,151.33, would be a reasonable royalty for the use of the device, if the claimant is entitled to recover therefor.

Mr. KILGORE. That is the whole amount involved?

Mr. BAKER of New York. As I understand it, that is the whole amount involved in this claim.

Mr. KILGORE. My understanding is that it may run up into the hundreds of thousands of dollars.

Mr. BAKER, of New York. This is the finding of the Court of Claims, and so stated by Mr. DAVENPORT, and given to me also by other parties familiar with the facts of the case. They inform me that something over $35,000 is the limit of the amount stated by the court as a reasonable royalty for the use of the device, if anything at all is to be recovered.

The CHAIRMAN. The question first is, Will the bill be considered?

Mr. KILGORE. I think I will have to object to the consideration of this bill.

The CHAIRMAN. The question then is, Will the committee consider the bill?

Two members only rising to object, the bill was ordered to be considered.

The CHAIRMAN. The question is on laying the bill aside.

Mr. KILGORE. I give notice, Mr. Chairman, that my objection does not end here. I shall insist upon the point of no quorum with reference to this bill. It is too important to be passed in this manner.

Mr. BAKER, of New York. In view of that statement and rather than obstruct the other business to-day, I suggest to the gentleman from Pennsylvania to withdraw the bill.

Mr. JACKSON. Under the circumstances, and at the instance of the gentleman from New York, I will withdraw the bill for the present.

JOHN R. TREUTLEN.

Mr. JOHNSTON, of North Carolina. I ask consideration of the bill (H. R. 2896) for the relief of the heirs of John R. Treutlen.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay to the heirs of John R. Treutlen, late an employé in the House of Representatives, $333.33, being the difference in the salaries paid to laborers and that paid to messengers, which latter office he filled from the 7th day of April, 1881, to the 17th day of December, 1881, performing all the duties of messenger and receiving only the pay of laborer.

SEC. 2. That the amount necessary to pay the same is hereby appropriated and made immediately available.

The CHAIRMAN. Is there objection to the consideration of this bill? The Chair hears none.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

JOHN GRAY.

Mr. KEAN. I ask consideration of the bill (H. R. 11165) for the relief of John Gray.

The bill was read, as follows:

Be it enacted, etc., That the proper accounting officers of the Treasury be, and they are hereby, authorized and directed to pay to John Gray, late major of the One hundred and seventy-fifth New York Volunteers, out of any money in the Treasury not otherwise appropriated, the pay and allowances of a major of infantry from the 19th of November, 1862, the date he received his commission as major from the governor of the State of New York, to the 17th day of January, 1863, the date he is borne upon the record as having been mustered into the service as major of said regiment.

Mr. ROGERS. Let the report be read.

The report (by Mr. STONE, of Kentucky) was read, as follows:

The Committee on War Claims, to whom was referred the bill (H. R. 11165) for the relief of John Gray, report as follows:

This is a claim for pay for services rendered prior to muster, by John Gray, formerly major of the One hundred and seventy-fifth Regiment New York Volunteers.

The claimant applied to the War Department for relief, and was denied in 1886, for the reason that "his muster into service as major January 17, 1863, recognized him from the earliest date by completion of his command."

The proof shows that John Gray was commissioned major of the One hundred and seventy-fifth Regiment New York Volunteers on the 19th of November, 1862, by the governor of New York, and served in that capacity without pay until January 17, 1863.

Having obtained the benefit of Gray's services, the Government ought not to set up a technical plea in bar of its obligation to make compensation therefor, and your committee are of opinion that payment should be made to Maj. John Gray.

Your committee report back the bill, and recommend its passage.

The CHAIRMAN. Is there objection to the present consideration of this bill? The Chair hears none.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MARITIME CANAL COMPANY OF NICARAGUA.

Mr. KILGORE. Mr. Chairman, I have a bill here that I want to call up for a friend of mine. I will take charge of it.

Mr. BAKER, of New York. I am informed that there is some question about this bill. How much is there involved in it?

Mr. KILGORE. Not a cent.

The Clerk read the title of the bill, as follows:

A bill (S. 1305) to incorporate the Maritime Canal Company of Nicaragua.

The CHAIRMAN. The Chair is informed that this bill is on the House Calendar.

Mr. DUNN. It is a private bill, to create a private corporation.

The CHAIRMAN. The Chair will state that he understands the rule to apply to only those bills which are on the Private Calendar.

Mr. DUNN. I would like to know why it is not on the Private Calendar. It is a private bill, and the rule was intended to comprehend and take in all private bills; and all private bills ought to be on the Private Calendar.

The CHAIRMAN. The time to have made that question woulp have been when it was referred to the House Calendar.

Mr. DUNN. I submit that an erroneous reference of a bill ought not to deprive it of its privilege under this call. The fact that it is on the Private Calendar is a very technical question that ought not under the rule to exclude its consideration.

The CHAIRMAN. The Chair would not by its ruling undertake to exclude a private bill. If there be no objection, the bill will be read, after which the Chair will ask for objection to its consideration.

Mr. CULBERSON. I object.

Mr. DUNN. It has not arrived at the stage for objection. The question is on the point of order.

The CHAIRMAN. The Chair has not called for objection. This discussion is simply upon the point of order, and the Chair has not ruled on the point of order——

Mr. MORGAN. I understand the Chair to state that this bill did not come under the present call, but that it might be called up by unanimous consent.

Mr. DUNN. The Chair called attention to the fact that the bill is on the House Calendar. I state that the bill is a private bill and ought to be on the Private Calendar.

Mr. LANHAM. I raise the point of order on the bill.

Mr. CULBERSON. I demand that the bill be read.

Mr. KILGORE. I understand that the House bill is on the Private Calendar.

Mr. BAYNE (to Mr. KILGORE). Call up the House bill and substitute it for the Senate bill.

Mr. KILGORE. I will just call up the House bill instead of the Senate bill.

Mr. LAWLER. Mr. Chairman, I would like to ask how this bill comes up at this time.

Mr. DUNN. The bill is trying to get up now.

Mr. LAWLER. I object to its consideration.

The CHAIRMAN. The time has not come for objections. The Chair is informed that the House bill is on the Private Calendar. The objection would be waived for that reason, and the point of order would not lie against its consideration. I now ask if there is objection to the consideration of the House bill?

Mr. CULBERSON. Let the House bill be read.

The CHAIRMAN. The House bill will be taken up, and after it is read the Chair will ask if there is objection to its consideration.

The bill (H. R. 5616) was read for information.

The CHAIRMAN. Shall the bill be considered?

Mr. CULBERSON. I make the point of order that that bill is not upon the Private Calendar.

The CHAIRMAN. The bill which has just been read is on the Private Calendar.

Mr. CULBERSON. The one that I have is not on the Private Calendar.

Mr. DUNN. But when objection was made the gentleman called up the House bill instead.

The CHAIRMAN. The bill which has just been read is on the Private Calendar, page 41. Those who are opposed to the consideration of the bill will rise and stand until counted.

Seven members objected—more than a sufficient number; so the bill was not considered.

STATE NATIONAL BANK OF NEW ORLEANS.

Mr. LAFFOON. I call up the bill (H. R. 3715) for the relief of the State National Bank of New Orleans, formerly Louisiana State Bank.

The bill was read, as follows:

Be it enacted, etc., That the claim of the State National Bank of New Orleans, formerly Louisiana State Bank, for the payment of the proceeds of cotton belonging to said bank taken by the agents of the Treasury Department of the United States, in the States of Louisiana and Arkansas, after the 30th day of June, 1865, be, and the same is hereby, referred to the Court of Claims for adjudication, and that said bank may institute suit in said court and the same shall be tried and adjudicated the same as if said action had been filed within the time authorized by law; that the testimony and original papers filed by said bank before the Treasury Department of the United States in connection with said claim be, and the same shall be, received by said court as evidence as if taken or filed under the rules of said court; that the said bank and United States may take further evidence as may be deemed proper, subject to the rules for taking testimony in said court.

The report (by Mr. SHAW) is as follows:

The Committee on Claims, to whom was referred the bill (H. R. 3715) for the relief of the State National Bank of New Orleans, formerly Louisiana State Bank, having considered the same, report as follows:

The committee agree with the conclusions reached by the Committee on Claims in the Senate, as embodied in a report from said committee in the Forty-seventh Congress, and adopt said report, and recommend that said bill be amended by inserting, in line 15, after the word "evidence," the words "so far as the same may be legally competent and proper under the rules and practice of said court," and as so amended that said bill do pass.

The Committee on Claims, to whom was referred "A bill for the relief of the State National Bank of Louisiana," having examined the same, make the following report:

That the State Bank of Louisiana, a banking corporation chartered by the laws of Louisiana, and located at the city of New Orleans, in 1863, while said city was in the permanent occupation and control of military forces of the United States, through its agents, contracted with various parties residing in Upper Louisiana and Arkansas, who had raised and were the private owners thereof, for the purchase of several hundred bales of cotton. At the dates of these contracts of purchase the venders resided within the lines of the Confederate forces, and commercial relations between the bank and themselves were prohibited, both by the general and statute laws of the Government and by the proclamation of the President of the United States, made under and in pursuance of said laws. The cotton thus purchased or contracted for remained in the possession of the several venders until after the 30th of June, 1865, when hostilities having ceased, it was delivered over to the agent of the bank, and by said agent collected together at different points preparatory to shipment to New Orleans.

After the cotton had thus reached the possession of the bank, and while awaiting shipment to New Orleans, special Treasury agents of the United States, on the 27th and 29th July, 1865, and the 18th November, 1865, seized the same and caused it to be shipped to Simeon Draper, the agent of the Treasury Department at New York, by whom it was sold, and the proceeds paid into the United States Treasury. The State Bank of Louisiana, after the close of the war, having been merged into the State National Bank of Louisiana, the latter, as the successor to all the rights and interests of the former bank, made claim to the proceeds of this cotton, but its claim was rejected by the Treasury Department. The bank thereafter, on the 21st September, 1877, instituted an action in the Court of Claims for the recovery of said proceeds, and was defeated in said court by the plea of the statute of limitation. The object of the present bill is to allow the bank to have its claim referred to the Court of Claims for trial and adjudication, just as though the action had been filed in said court within the time authorized by law. Its claim before the Department was not finally determined until after the bar of the statute had attached.

The rejection of the claim by the Department was based upon the ground that its purchases having been made in 1863 from parties occupying an enemy relation, the bank failed to acquire title to the cotton, and had therefore no valid claim to its proceeds. If the case stood alone upon the contract for the purchase of the cotton in 1863 the correctness of this ruling could not be well questioned. The decisions of the Supreme Court of the United States in Montgomery *vs.* United States, 15 Wallace, 395, and Mitchell *vs.* United States, 21 Wallace, declare that such contracts of purchase would fail to confer a valid title to the property, and your committee at the present session of Congress have reported against a bill granting relief as to the proceeds of property in a case where the party, by his purchase from inhabitants of insurrectionary districts in violation of the non-intercourse laws of the United States, failed to acquire a valid title. So that if nothing appeared in the present case except the bank's purchase of the cotton in 1863 from venders residing within the Confederate lines, it could not be distinguished from the Mitchell claim, and would be controlled by the principles applied in that case.

But there are important particulars in which the present differs from the Mitchell case. The bank's contract for the purchase of the cotton was not completed in 1863, or during the period of actual war. It had paid and the venders had received the purchase-money, but the cotton remained in the possession of the venders under an agreement for its future delivery. If the venders had subsequently refused to make delivery and complete the contract, and the bank had tried then, either during or after the war, to recover the cotton, it would have been nonsuited in any court of the United States if the illegality of the contract had been pleaded, or if the same had appeared to the court in the course of the trial. The planters did not, however, avail themselves of the illegality of the contract, but, on the contrary, recognizing the moral obligation which rested upon them, after receiving the purchase-money, they voluntarily completed the contract and delivered the cotton over to the possession of the bank after the war had actually closed.

Was this delivery, which appears to have been made subsequent to June 30, 1865, in contravention of law or of the non-intercourse acts and regulations of the Government? If the parties could at that time have lawfully made an original contract with each other for the sale and purchase of the cotton in question, it is difficult to see any valid reason why they could not then, without violation of law or public policy, recognize as binding and complete a contract previously entered into, no intervening rights having attached. Sunday contracts are generally prohibited or forbidden by law; but, when completed on Monday, by delivery, their validity can not be impeached. The controlling question, therefore, in the present case is, could these parties lawfully hold commercial intercourse with each other when the cotton was delivered; or rather, was such delivery, either as an original transaction or as the consummation of a previous agreement, in violation of law?

On the 24th June, 1865, the President of the United States, by proclamation issued under authority of law, expressly ordered that "all restrictions upon internal, domestic, and coastwise intercourse and trade, and upon the purchase and removal of products" lying west of the Mississippi River (excepting those relating to property heretofore purchased by the agents or captured by or surrendered to the forces of the United States) are annulled. Under this express authority given by law, the bank could legally have purchased this cotton. The venders could lawfully have sold or given it to the bank. When the venders, after this proclamation, delivered the cotton to the bank, it was in effect either a new sale based upon the valuable consideration previously received, or a voluntary relinquishment and donation of all their rights and title to the property. But suppose it is treated as the affirmation or confirmation of the contract of purchase made in 1863, what rule of law or principle of public policy forbids the ratification of that contract after June 24, 1865, before the Government had seized or captured the cotton? As a general proposition, void, as distinguished from voidable, contracts can not be confirmed, for the reason that the same legal objections arising from positive law or public policy continue to operate when the confirmation is attempted which existed at the formation of the original contract. But when that is not the case, when the law or public policy that originally vitiates the contract has been changed, when the legal objections to such contracts have ceased to operate, there is no reason why the parties thereto may not lawfully ratify or reaffirm their agreement.

If this position is correct, the act of the venders in ratifying and completing their contracts by delivery of the cotton after the restrictions upon commercial intercourse had been removed, conferred upon the bank a title to the property just as valid as though the contract had been first entered into at the date and place of delivery; so that the case is narrowed down to this, that after all hostilities had terminated and the President had, by his proclamation, removed all restrictions upon trade in the districts formerly declared to be in insurrection, the bank applied to the planters who agreed to sell it their cotton in 1863, and requested them to recognize and complete their agreement and confer upon the bank the possession and ownership of the cotton. This they might have refused to do, but feeling the moral obligation arising out of the receipt of the money the bank had paid them, they freely delivered the cotton to the agent of the bank when it was lawful for them to hold intercourse and before any intervening rights of the Government had attached.

Under those circumstances the transaction may well be termed either a valid confirmation of a former contract, or a new sale as of the date of such delivery, or a gift. When the cotton was so received in 1865 it must be admitted that the

possession which the bank thereby acquired was a legal one. The cotton had never been captured "*flagrante bello;*" it had never been abandoned or seized as such; consequently the United States never acquired the right of seizure coupled with possession before the bank perfected both its title and possession. Whether the agents of the Treasury Department had any authority in law for seizing this cotton in the possession of the bank at the several dates already given is, in the opinion of your committee, a matter of such grave doubt, to say the least of it, as to make this a proper case for the decision of some competent judicial tribunal. What the bank now asks is that it may be permitted to sue in the Court of Claims, and that said court shall hear and adjudicate the case as though it had been instituted within six years after the seizure of the cotton by the officers of the Government.

The proceeds of the cotton are in the United States Treasury, placed there by the alleged wrongful acts of special agents of that Department. The bank prosecuted its claim to these proceeds before the Department, hoping for a favorable decision, until its remedy in the Court of Claims was barred by the statute of limitations. Again, claimants in this class of cases were not supposed by the legal profession to have any remedy in the Court of Claims until the Klein case was decided in December, 1871. Under those circumstances the bank, having been guilty of no "laches," should not be deprived of the opportunity to have its claim passed upon by the Court of Claims. It would certainly be against conscience for the Government in a case like the present to keep this money and deny to the bank the privilege of establishing its superior right thereto. Your committee accordingly recommend the passage by the Senate of the accompanying bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

BRIDGE ACROSS THE MISSISSIPPI NEAR ALMA, WIS.

Mr. LA FOLLETTE. I call up the bill (S. 2816) to authorize the construction of a bridge for railway purposes across the Mississippi River between the States of Wisconsin and Minnesota, to be located north of and in vicinity of the city of Alma, Wis.

The bill was read for information.

Mr. NELSON. Mr. Chairman, is that bill on the Private Calendar?

The CHAIRMAN. The Chair is informed that it is.

Mr. NELSON. I desire to offer an amendment, to come in at the end of the bill.

The CHAIRMAN. The bill is not open to amendment at this stage. Is there objection to the present consideration of this bill?

Mr. MORGAN. Mr. Chairman, I desire to inquire of the Chair whether this is the same bill about which we had a controversy on last Friday.

Mr. NELSON. It is.

Mr. MORGAN. Does the gentleman from Minnesota now say that he will insist upon a quorum for the passage of this bill?

Mr. NELSON. I shall offer as an amendment the same bill that I offered last Friday.

Mr. MORGAN. But do you intend to call a quorum?

Mr. NELSON. I do intend to call a quorum on this bill unless mine is accepted as an amendment.

Mr. LA FOLLETTE. Mr. Chairman, I shall make the point of order against the gentleman's amendment. I know the bill that he proposes to offer.

Mr. MORGAN. I hope my friend from Wisconsin will withdraw the bill if it is to be antagonized.

The CHAIRMAN. This is all out of order. Is there objection to the consideration of this bill?

There was no objection.

Mr. NELSON. I offer the amendment which I send to the Clerk's desk, to come in at the end of the bill. I do not care to occupy time in reading the amendment beyond the first section.

The Clerk read the first section of the proposed amendment, as follows:

Be it enacted, etc., That the city of Duluth, a municipal corporation in the State of Minnesota, or its assigns, or any legally incorporated railroad company or companies which may be associated with it therein, be, and is hereby, authorized to construct and maintain a bridge and approaches thereto over the ship-canal and upon the Government piers of the same through Minnesota Point, being the entrance to the Duluth Harbor from Lake Superior, if upon consideration of a board of engineer officers, to be specially selected for the purpose, a bridge can be built without serious injury to the canal as an entrance to the harbor, and then only upon the plans and at the location recommended by the board and approved by the Secretary of War; said bridge shall be constructed to provide for the passage of railway trains, and further provide for the passage of wagons, street-railway cars, and vehicles of all kinds, for the transit of animals and foot-passengers, for such reasonable rates of tolls as may be approved from time to time by the Secretary of War.

Mr. NELSON. Now, Mr. Chairman, I do not care to have the amendment read further, but I wish to make a statement, if the gentleman from Wisconsin [Mr. LA FOLLETTE] is willing.

Mr. LA FOLLETTE. I make a point of order against the amendment.

Mr. NELSON. I am entitled to have the whole amendment read, but I will waive that right if I can be allowed to make a brief statement.

The CHAIRMAN. The Chair understands that the gentleman from Wisconsin [Mr. LA FOLLETTE] makes the point of order.

Mr. LA FOLLETTE. Yes; on the ground that the amendment is not germane to the bill under consideration.

The CHAIRMAN. The Chair sustains the point of order. The gentleman from Minnesota [Mr. NELSON] asks unanimous consent that he may be permitted to make a statement.

There was no objection.

Mr. NELSON. The only statement I desire to make is that the remainder of the bill which I have sent up as an amendment is like other bridge bills. The first section, the section that has been read, is to authorize the city of Duluth to construct a bridge across the canal entrance to its harbor, provided that a board of engineers, to be appointed by the Secretary of War, shall decide that such a bridge can be built without obstructing navigation. This amendment does not propose to allow the bridge to be constructed until the board of engineers report that it can be done without injury to navigation. If the engineers say it can not be done, the bridge is not to be built. I am compelled to take this course because I have tried several times during this session to pass this bill, but objection has always been made by the gentleman from Wisconsin, not the gentleman who has now called up the bill, but the gentleman [Mr. HAUGEN] within whose district this proposed bridge across the Mississippi is to be built. The bill which I have called up as an amendment has been called up by the Committee on Commerce and has been objected to, and the point of "no quorum" has been made against it, and again I have called it up myself and objection has been made. The bill called up by the gentleman from Wisconsin [Mr. LA FOLLETTE] is to authorize the construction of a bridge from his State across the Mississippi into my State, while my amendment is a bill for the construction of a bridge wholly within my State. The attitude which the gentleman [Mr. HAUGEN] assumed in reference to my bill compels me to take this course, which I have never taken with regard to any other bill, and which I adopt now simply as a matter of self-protection.

I am unwilling to take up further time in this matter, and am very sorry that this controversy has arisen. Whatever may be the merits of the controversy, there is nothing between the gentleman from Wisconsin [Mr. LA FOLLETTE] who now calls up this bill and myself.

Mr. LAGAN. I wish to ask the gentleman from Minnesota [Mr. NELSON] by whom this board of engineers is to be appointed?

Mr. NELSON. By the Secretary of War.

Mr. LAGAN. Are they to be United States engineers?

Mr. NELSON. They are to be United States engineers, appointed by the Secretary of War; and that board is to determine whether a bridge can be built. If the board should decide unfavorably it will not be built.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LA FOLLETTE] will state his point of order.

Mr. LA FOLLETTE. My point is that the amendment offered by the gentleman from Minnesota [Mr. NELSON] is not germane to the bill under consideration.

The CHAIRMAN. The point of order is well taken. The amendment is not in order. The question is on laying this bill aside to be reported favorably to the House. Before putting that question the Chair will state that some amendments were heretofore adopted to this bill, and it has been read as amended. The question is now on laying the bill aside to be reported favorably to the House. [The question was put.] The ayes seem to have it.

Mr. NELSON. I call for a division.

The question being again taken, there were—ayes 22, noes 1.

Mr. NELSON. No quorum.

Mr. LANHAM. I hope the gentleman from Wisconsin will withdraw the bill.

Mr. LA FOLLETTE. Mr. Chairman, if I may be permitted to call up another bill, I will withdraw this, as I do not wish to obstruct the business of the Committee of the Whole.

Mr. NELSON. I trust the gentleman may be allowed that privilege.

The CHAIRMAN. Without objection, the gentleman will be allowed to call up another bill, this being withdrawn. The Chair hears no objection.

WILLIAM TABB.

Mr. LA FOLLETTE. I ask for the consideration of the bill (S. 741) for the relief of William Tabb.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury of the United States be, and is hereby, directed to pay to William Tabb, of Spottsylvania County, near Fredericksburgh, Va., out of any money in the Treasury not otherwise appropriated, the sum of $2,149.75, being in full for supplies taken from him during the years 1863 and 1864, by and for the use of the United States troops.

There being no objection, the Committee of the Whole proceeded to the consideration of the bill.

Mr. LA FOLLETTE. I do not desire to make any remarks on this subject.

The CHAIRMAN. The question is on laying the bill aside to be favorably reported to the House.

Mr. CLEMENTS. I think the report had better be read.

Mr. LA FOLLETTE. It is very short.

The report of the Committee on War Claims (by Mr. THOMAS, of Wisconsin) was read, as follows:

The facts out of which this bill for relief arises will be found stated in Senate report from the Committee on Claims of the present Congress, a copy of which is hereto annexed for information.

Your committee adopt the said report as their own, and report back the bill and recommend its passage.

[Senate Report No. 59, Fiftieth Congress, first session.]

The Committee on Claims, to whom was referred the bill (S. 741) for the relief of William Tabb, have considered the same and respectfully report:

We adopt the report made by Mr. HOAR from this committee in the first session of the Forty-eighth Congress and recommend the passage of the bill.

"This is a claim for property alleged to have been taken from the claimant in part in May, 1863, by forces under the command of General Joseph Hooker, and in part in May, 1864, by forces under command of Maj. Gen. U. S. Grant. It appears from the evidence on file that the claimant was born in England; that he came to this country in 1848 and has since resided in Spottsylvania County, Virginia; that in 1856 he declared in one of the courts in said State his intention to become a citizen of the United States and to renounce all allegiance to foreign powers, in the manner prescribed by law; that in 1870 he took his final oath and received his naturalization papers.

"On the 16th day of September, 1872, he presented his claim to the Southern Claims Commission. The reports of that commission show that the claim was never prosecuted before them. The claimant alleges that he did not prosecute his claim before the commission because informed by his counsel, after having presented his claim, that the commission had said that they would not take jurisdiction of the cause, owing to the fact that the claimant was not, at the time of the taking of the property, a citizen of the United States. The claimant further alleges that his counsel informed him that the commission advised a petition to Congress.

"Upon this state of facts the claimant made a petition to Congress in 1874, that being two years after he had filed his petition before the Southern Claims Commission.

"There seems to be no doubt as to the claimant's loyalty, it being established by the testimony of several witnesses, including his neighbors and Union soldiers. Your committee are of the opinion that, so far as the character of the claimant is concerned, there is nothing which should deprive him of relief from Congress. The Southern Claims Commission held that they had no jurisdiction because the claimant was not a full citizen in every sense of the word; but he surely was so far a citizen as to entitle him to protection of his rights and property from this Government. The oath declaring his intention to become a citizen of the United States was an act of expatriation, after which he could not claim redress through the British Government.

"The claim is for quartermaster and commissary supplies taken to the value of $2,148.75. No vouchers were given by the officers taking the property, which is explained by the fact that Mr. Tabb and his family were sick at the time with diphtheria. There is evidence showing that on one of the occasions two of Mr. Tabb's children were lying dead in the house from that disease. But there is other satisfactory proof that property belonging to the claimant of the amount and value alleged was taken for the use of the Army.

"A favorable report in the case was made in the second session of the Forty-fourth Congress, recommending that the Southern Claims Commission be given jurisdiction of the claim. Since that commission ceased to exist, it has been the usual way in such cases to recommend the passage of a bill authorizing the Quartermaster-General to examine the claim and report to Congress the facts. This claim, however, is for a small sum, and the proof as to the amount and value of the property taken is very satisfactory.

"Your committee therefore recommend that the bill pass."

The bill was laid aside to be reported to the House with the recommendation that it do pass.

HEIRS OF MARTIN KENOFSKY.

Mr. LAGAN. I ask for the consideration of the bill (S. 1671) for the relief of the heirs of Martin Kenofsky.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay, out of any money in the Treasury not otherwise appropriated, to the heirs or legal representatives of Martin Kenofsky, the sum of $4,992.50, in full of all demands for and on account of the claim of the said Kenofsky for the proceeds derived from the sale of $4,992.50 of gold coin belonging to him and used in the service of the United States.

There being no objection, the Committee of the Whole proceeded to the consideration of the bill.

Mr. LAGAN. I move that the bill be laid aside to be favorably reported to the House.

Mr. OATES. I would like to hear the report read.

The report of the Committee on War Claims (by Mr. STONE, of Kentucky) was read, as follows:

The committee find the facts to be as stated in Senate Report No. 483, first session Fiftieth Congress, which report is hereto annexed and made a part of this report, and is as follows:

[Senate Report No. 483, Fiftieth Congress, first session.]

Your committee, to whom was referred Senate bill 1219, for the relief of the heirs of Martin Kenofsky, find that Martin Kenofsky, a Prussian subject, was a resident of Grenada, in the State of Mississippi, in 1864; that he was a man of Union sentiments; that he converted his possessions into gold, amounting to $4,992.50; then started for Memphis, at that time occupied by the Union forces, was seized within the lines, his gold taken from him, and he cast into prison, from which he was discharged without trial, and without any restoration of his property. The gold was converted into currency, realizing $8,861. By authority of military officers in command, this money was used for military purposes, contrary to law and the regulations of the Treasury Department. It should have been covered into the Treasury.

The claimant was industrious in pursuing his remedy, commencing at once, in 1865, by application to the Secretary of War, and continuing without cessation until his death in 1880. Then his widow petitioned Congress for relief, but died, pending its hearing, in 1881, leaving seven children in destitute circumstances. The authorities of the Widows and Orphans' Home of New Orleans and friends of the family then petitioned Congress for relief. No laches can be charged against the claimants.

The United States have had the benefit of this money; it was not justly exposed to confiscation; it should have been in the Treasury to-day, subject to the disposal of Congress, and in the opinion of your committee justice requires that, notwithstanding it was never covered into the Treasury, having been committed to the use of the Army contrary to law, this money should be paid to the legal heirs of Martin Kenofsky, and they accordingly report back the bill referred, with an amendment striking out the words "eight thousand eight hundred and sixty-one dollars," in the sixth and seventh lines, and inserting instead thereof the words "four thousand nine hundred and ninety-two dollars and fifty cents," with the recommendation that as amended it ought to pass.

Mr. DINGLEY. Is the amount covered by this bill simply the par value of the gold coin referred to?

Mr. STONE, of Kentucky. It is simply the par value.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

JESSE DURNELL.

Mr. LANHAM. On behalf of my friend from Illinois [Mr. LANE], who is now absent from the city, I desire to call up for consideration the bill (H. R. 9211) for the relief of Jesse Durnell.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay Jesse Durnell, of Effingham, Ill., out of any money in the Treasury not otherwise appropriated, the sum of $1,312.50, being the amount due him for seventeen and one-half months' difference in pay between that of first-class and second-class pilot in the Mississippi Squadron.

There being no objection, the Committee of the Whole proceeded to the consideration of the bill.

Mr. LANHAM. This bill provides simply for paying this claimant the difference between the salary of a first-class and a second-class pilot. The case has been examined by the Committee on Claims, and the allowance of the claim is unanimously recommended.

The amendment reported by the committee was read, as follows:

In line 6 strike out "three" and insert "two," and in line 7 strike out "twelve" and insert "thirty-seven;" so as to make the amount appropriated in the bill $1,237.50.

The amendment was agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

C. C. ROBERTS.

Mr. LAWLER. I desire to call up the bill (H. R. 3557) for the relief of C. C. Roberts.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, directed to cause to be paid to C. C. Roberts the pay and emoluments of a first lieutenant of volunteers from the 4th day of April, 1863, to the 1st day of November, 1863, for services rendered as first lieutenant in what was then de-ignated as the Fourth Regiment of Ullman's brigade Colored United States Volunteers, with interest at 4 per cent. on the amount due from November 1, 1863, to the day when this act shall be in force and become approved.

SEC. 2. That the amount of money necessary to pay for the services of the above-named claimant be, and is hereby, appropriated out of any money in the Treasury not otherwise appropriated.

There being no objection, the Committee of the Whole proceeded to the consideration of the bill.

Mr. MORRILL. I would like to hear the report read.

The report of the Committee on War Claims (by Mr. LAWLER) was read, as follows:

The bill authorizes the Secretary of War to pay C. C. Roberts the pay and emoluments of a first lieutenant of infantry from April 4, 1863, to November 1, 1863.

Proof filed in support of the bill shows that C. C. Roberts was one of a number of officers and privates of Maine regiments who were designated by Go ernor Coburn, by authority of the Secretary of War, to be detached from their various regiments for promotion in the colored brigade. The order of the War Department detaching these officers and men was dated March 25, 1863. The claimant served as first lieutenant from April 4, 1863, to November 1, 1863, and was not paid for said service by reason of a failure to be mustered into service. The other officers of the colored brigade were subsequently mustered into the service and paid, the claimant failing to be mustered by reason of sickness.

Your committee are of opinion that the claimant having performed the duties of a first lieutenant he should be paid, and report back the bill and recommend its passage, with the following amendments:

In line 5, after the word "volunteers," insert the word "infantry."

In lines 10, 11, and 12 strike out "with interest at 4 per cent. on the amount due from November 1, 1863, to the day when this act shall be in force and become approved."

The CHAIRMAN. The question is on the amendments reported by the committee, and just read as the concluding paragraphs of their report.

Mr. SOWDEN. I wish to ask the gentleman from Illinois [Mr. LAWLER] whether the amendments strike out the provision in the bill for the payment of interest.

Mr. LAWLER. That provision is struck out by one of the amendments.

The amendments were agreed to.

The CHAIRMAN. The question is on laying the bill aside to be favorably reported to the House.

Mr. DUNN. On that question I call for a division.

The committee divided; and there were—ayes 32, noes 1.

Mr. DUNN. No quorum has voted.

The CHAIRMAN appointed as tellers Mr. LAWLER and Mr. DUNN.

Mr. LANHAM. I ask, by unanimous consent, this bill be temporarily laid aside not to lose its place, and with the privilege on the part of the gentleman from Illinois [Mr. LAWLER] to call it up hereafter.

Mr. DUNN. Or with a privilege of calling it up to-day, if he deems proper to do so.

There was no objection, and it was ordered accordingly.

PIPESTONE INDIAN RESERVATION, MINNESOTA.

Mr. NELSON. Unanimous consent was granted to my colleague [Mr. LIND] before he left the city, when his name was called to have me call up a bill for him, and in pursuance of that privilege I now call up for consideration the bill (H. R. 11128) for the disposition of the agricultural lands embraced within the limits of the Pipestone Indian reservation, in Minnesota.

The CHAIRMAN. The bill will be read, after which objection will be asked.

The Clerk proceeded to read the bill.

Mr. MCMILLIN. I rise to a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MCMILLIN. This is a public bill, and does not come within the rule under which we are acting. I make the point of order in justice to gentlemen who have small private bills which they desire to call up. This is a long bill, and is accompanied with a long report. It is not fair to take up the time in reading the bill and report, which ought to be devoted to the consideration of private bills. It is unjust to gentlemen having those measures to call up. While I do not like to do any discourtesy to an absent member, I am compelled to insist upon my point of order.

Mr. NELSON. I admit the point of order made by the gentleman is well taken, and will therefore withdraw the bill. My colleague [Mr. LIND], in case the point of order should be made and the bill ruled out, gave me a private bill to call up, and I now ask for its consideration. The reservation to which reference is made in the other bill is only 1 mile square. But I withdraw that bill.

JAMES DEVINE.

The CHAIRMAN. The bill will be read, after which the Chair will ask for objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to James Devine, of the county of Brown, in the State of Minnesota, out of any money in the Treasury not otherwise appropriated, the sum of $700, for damages done to his land by the United States troops in cutting timber on the same for the building of Fort Hanska, and for fuel and other purposes, while in possession of said troops during the outbreak of the Sioux Indians in Minnesota.

Mr. NELSON. With the permission of the committee I will make a brief statement in reference to this matter. It is a bill which was introduced by my colleague [Mr. LIND] and referred to the Committee on Claims, which has reported it back favorably.

In 1862–'63 an Indian war broke out in the State of Minnesota. During that outbreak the State sent out troops to follow up the Indians. Those troops were mustered into the service of the United States. While in that service they took possession of this man's farm, cut down his timber, and used it in the construction of huts and for fuel. This bill merely provides for the payment of $700 to this man for the loss which he incurred.

Mr. KILGORE. These troops were there for this man's protection.

Mr. NELSON. No more for his protection than for the protection of other citizens in that neighborhood against Indian attacks. In this farm of 157 acres there were 40 acres covered with valuable timber. That timber was cut down and used by these United States troops in the construction of huts and as fuel. For this loss this man has never been compensated, and the object of the bill is to recompense him in that regard.

Mr. KILGORE. How much does he claim?

Mr. NELSON. He claims $700. It has been favorably reported.

Mr. KILGORE. Read the report.

The report (by Mr. LAWLER) was read, as follows:

The Committee on War Claims, to whom was referred the bill (H. R. 3765) for the relief of James Devine, have considered the same and respectfully report:

A bill (H. R. 1150) for the relief of this claimant was introduced in the Forty-second Congress, second session, and referred to the Committee on Claims. That committee reported the bill favorably, and upon a full examination of the evidence on file in support of the claim this committee finds that the report of that committee (No. 1587) is in accordance with the facts, and the same is hereby adopted and attached hereto.

Your committee accordingly report back the bill and recommend its passage.

[House Report No. 1587, Forty-sixth Congress, second session.]

The Committee on Claims, to whom was referred the bill (H. R. 1150) for the relief of James Devine, have considered the same, and respectfully report:

That James Devine was the owner of certain lands in the State of Minnesota, namely, the SE. ¼ of SE. ¼ and lot No. 6 of section No. 28, and lot No. 8 of section No. 33, and the NW. ¼ of NW. ¼ of section No. 34, in township 108, range 31, containing 157 acres, 60 acres of which was timbered. During the Indian outbreak, known as the Sioux massacre of 1862, Company I, Minnesota Mounted Rangers, was stationed on said land for the protection of the settlers and built a stockade or fort thereon, 100 feet long, 75 feet wide, and about 10 feet high. They also built on said land four buildings of various sizes. All the logs, roofing, and shingles for said buildings were taken from the land of Devine. The troops occupied the fort, and used timber for fuel for a period of two and one-half years, and when the troops were removed they took some of said houses with them to other locations.

James Devine testifies that he was at the time the troops occupied the land, and is now, the owner thereof, having a patent for the same from the United States; that there is 157.72 acres of land, 60 of which was timbered; that less than one-fourth of said timber was left standing, the balance, 40 acres, being cut by the troops. The value of timber land at that time was from $20 to $50 per acre, and his loss by said damage was not less than $700, and at the time said timber was taken he was a resident of Milwaukee, Wis., and did not return to his land in Minnesota until 1866; that he has never received any pay or compensation for said loss.

Guttora Thorsdson and Tergrim Tergrimson testify that they own and live on lands adjoining the lands of James Devine; that there was no timber cut on said land before the troops entered thereon to build the fort. The timber land at that time in the vicinity of Devine's land was worth from $20 to $50 per acre; that the troops were there for two and one-half years, and the damage to Devine by loss of timber was not less than $700.

Iver Iverson testifies that he knows the property of James Devine, and to his positive knowledge there was no timber cut off said land previous to the occupancy by the troops, and that the loss to Devine was not less than $700.

John Hauenstein, a second lieutenant of Company I, Minnesota Mounted Rangers, testifies that he commanded said company at Fort Hauska, in township 108, range 31; that the fort and buildings were being erected during the time he had command; that the logs, roofing, shingles, etc., were taken from the land of James Devine; that Fort Hauska was built on Devine's land, and to the best of his knowledge there was about 60 acres of timbered land, and the actual loss at the time to James Devine's property by the destruction of the timber was not less than $700.

Mr. Devine being a resident of the State of Wisconsin from 1857 until 1866, when he returned to Minnesota, he learned for the first time that the State had adjudicated such claims, for which the United States reimbursed the State.

A bill for the payment of damages was presented to the State Legislature, which received a favorable report, was passed to a third reading and defeated because the time expired that had been set for the State to pass on such losses.

Mr. Devine's absence from the State kept him in ignorance of the method of prosecuting his claim until some years after the property had been taken. When he was aware of the manner in which such property was paid for, he presented his claim to the Legislature of the State of Minnesota. Payment was refused, it being a claim against the United States.

Your committee believe the property was taken by the troops for their use, and that the amount asked for the same is just and reasonable, and recommend the passage of the bill.

Mr. SOWDEN. What evidence is there that these troops were mustered into the United States service? The report says they were State troops.

Mr. NELSON. My colleague [Mr. RICE] was a citizen of the State at that time, and knows the fact, which he will state, that they were mustered into the United States service.

Mr. RICE. It is the fact that these troops at the time were mustered into the service of the United States.

Mr. SOWDEN. The gentleman from Minnesota has answered my question that these State troops had been mustered into the service of the United States, and that is satisfactory.

There was no objection; and the bill was laid aside to be reported to the House with the recommendation that it do pass.

E. J. ALDRICH.

Mr. LYMAN. I call up for present consideration the bill (H. R. 3155) for the relief of E. J. Aldrich.

The bill was read, as follows:

Be it enacted, etc., That jurisdiction be, and the same hereby is, conferred upon the Court of Claims to try and determine, upon its merits, the claim of E. J. Aldrich, of Pottawattamie County, State of Iowa, against the United States for cotton seized and appropriated in the States of Arkansas and Louisiana, any statutes of limitation to the contrary notwithstanding: *Provided*, Suit be commenced in said court within six months next after the passage of this act.

Mr. ROGERS. My attention was temporarily distracted while this bill was being read; will the gentleman state the purport of it?

Mr. LYMAN. It refers a claim for cotton to the Court of Claims. The claimant commenced a suit in the Court of Claims, but he was too late, not having commenced it before the statute of limitations applied. He is an old gentleman, apparently not familiar with the law; and for this or some other reason the claim was not presented in time. This simply removes the bar of the statute.

Mr. ROGERS. What committee does it come from?

Mr. LYMAN. From the Committee on War Claims.

Mr. ROGERS. Is this for a portion of the proceeds of the captured and abandoned property fund now in the Treasury?

Mr. LYMAN. I can not answer the question.

Mr. ROGERS. I would like to hear the report.

Mr. CULBERSON. Let the report be read.

The report (by Mr. THOMAS, of Wisconsin) was read, as follows:

The beneficiary, E. J. Aldrich, claims to be the owner of a claim once owned by one H. A. Millen, for cotton seized and appropriated by the United States Government. In 1871, prosecution therefor was commenced in the Court of Claims. In December, 1876, a motion was filed to dismiss the case on the ground that the cause of action was barred by the statute of limitation; which motion was afterwards sustained. The claimant is an old man and greatly in need financially of the relief demanded if he is entitled thereto. His loyalty is unquestioned and unquestionable, and his claim appears to have merit in it. The bar of the statute of limitation prevents him from establishing the same. All he asks in the bill is that this bar may be removed, and he permitted to establish his claim, if he can, in the Court of Claims.

The committee recommend the passage of the bill.

Mr. CULBERSON. I ask the attention of the gentleman from Iowa for a moment, to inquire on what this claim is based, on what statement of facts it is presented? The report does not show.

Mr. LYMAN. I can not answer as to the facts, because I do not know.

Mr. CULBERSON. As I understand the report, it states that the beneficiary is the assignee of a claim in favor of one Millen against the Government, but it does not state what the claim is for.

Mr. SENEY. What is the claim based upon?

Mr. CATCHINGS. It says in the report for cotton.

Mr. CULBERSON. I would like to have the first clause of the bill again reported.

The bill was again read.

The CHAIRMAN. The first question is, Will the committee consider the bill.

Mr. CULBERSON. Permit me first to ask if this bill provides that there shall be an absolute judgment against the Government, or simply that the court shall report the findings?

Mr. LYMAN. That there shall be a judgment for whatever the court finds due. I assume that the court will take care of all incidental questions that may arise in connection with the investigation

of the claim; and the point is that this removes the bar of the statute of limitations to allow the consideration of the claim.

Mr. CULBERSON. I do not think this bill ought to pass.

Mr. SENEY. What is the amount of the claim?

Mr. LYMAN. I do not know.

Mr. ROGERS. I would like to know something further about this case. The gentleman from Iowa does not seem to be familiar with the facts. What State does it come from, where does the claimant reside, and who has charge of it?

Mr. LYMAN. The claimant lives in the county in which I reside, and I introduced the bill for his relief at his request. I know the claimant, but do not know the facts in the case.

Mr. ROGERS. I would like to make an observation or two.

The CHAIRMAN. The Chair will first submit the question whether the committee will consider the bill.

Mr. ROGERS. I am asking unanimous consent to be heard for a moment.

The CHAIRMAN. Without objection the gentleman will proceed.

Mr. ROGERS. Mr. Chairman, as strong a case, perhaps, as could possibly be submitted to the House was presented by the report from the Judiciary Committee accompanying the claim of Mr. Noble, who has since died. That claim after a full and exhaustive discussion in a full committee of the House was defeated on the call for a quorum. The general sentiment of the House at that time was, and I think the justice of all this question is, that all of the claimants for any portion of this property should be allowed to go into the Court of Claims and let their claims for this money or any portion of it, which the Supreme Court of the United States have held belongs to these people and not to the Government, be adjudicated and settled forever. Now, I am willing, so far as I am concerned, and so far as this case is involved, to concede that this man has a claim. I do not know anything of the case and will not deny that he has a claim; but I do not think we ought to consent to suffer one individual to go in and have consideration and the other side to be kept out if there is merit. It is not fair play. It is not the proper way to deal with such a question. If any of them are entitled to any portion of this property, then all persons under like circumstances are entitled to some proportion of it, and should be entitled to have their share of it. I think in all such cases we ought to pursue that policy, and not be diverted from it in the consideration of an individual case.

Mr. OATES. That is the principle on which Noble's claim was defeated.

Mr. ROGERS. That is what I have just stated. Out of personal friendship and committee associations I reluctantly yielded to my friend from Alabama, who was interested in that case, and made no minority report; but my judgment is that the proper way to deal with the question is to pass a bill for the purpose of letting these people all go into the Court of Claims, and there let the matter be adjudicated between them and a distribution made of the funds.

And there is a matter about this bill which does not obtain in reference to others, and that is that there is a statute of the United States, founded in a wise public policy, which is directly in the teeth of this bill. That statute prohibits anybody from bringing a claim against the Government where he obtains it as assignee. In other words, only original claimants shall be permitted to make claims against the Government.

I trust my friend from Iowa, who is a good lawyer, will understand the motives which prompt my action in this matter. I never object in such cases unless there is a principle involved which I think sufficiently important to invite attention to the case itself, and I regard this as a question of that character.

Mr. CULBERSON. In addition to what my friend from Arkansas has said, there is a general bill now on the Calendar providing for the very object the gentleman has in view; that is, the removal of the bar of the statute of limitation—two reports, one from the Committee on War Claims and one from the Judiciary Committee.

Mr. LYMAN. I will support the general bill when it is presented.

Mr. CULBERSON. We have never had an opportunity to bring it up.

The CHAIRMAN. The question is, Shall the bill be considered?

The question was put; and the Chairman announced that more than a sufficient number had objected, and consideration was refused.

MELCHISEDEC ROBINSON.

Mr. MARTIN. I ask consideration of the bill (H. R. 10099) for the relief of Melchisedec Robinson.

The bill was read, as follows:

Be it enacted, etc., That the claim of Melchisedec Robinson, of Benton County, Mississippi, for quartermaster stores and commissary supplies taken by or furnished the United States Army during the war for the suppression of the rebellion, be, and the same is hereby, referred to the Court of Claims, with all the vouchers, papers, proofs, and documents pertaining thereto, and the same shall there be proceeded in, under the rules and practice of said court, upon the said proofs, vouchers, and documents and such other testimony as may be introduced by either party, and when the facts shall have been found both as to the loyalty of the said Melchisedec Robinson when this claim originated and thereafter to the close of the war, and the merits of his said claim, the court shall thereupon report to Congress the facts as established by the evidence, with its opinion as to the compensation or relief, if any, which should be allowed the said claimant.

The CHAIRMAN. Is there objection to the consideration of the bill? The Chair hears none.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

JAMES IREDELL MEARES.

Mr. McCLAMMY. I ask consideration of the bill (H. R. 5480) for the relief of James Iredell Meares.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay to James Iredell Meares, deputy collector of customs at Wilmington, N. C., the sum of $612, this being the amount of money stolen from the safe of the collector at Wilmington, N. C., and paid by the said James Iredell Meares.

SEC. 2. That this act shall take effect from and after its passage.

Mr. OATES. I did not hear the amount of money involved.

The Clerk read as follows:

Six hundred and twelve dollars.

Mr. OATES. I would like to hear the report read.

The report (by Mr. SIMMONS) was read, as follows:

The Committee on Claims, to whom was referred House bill 5480, having considered the same, submit the following report:

The claimant in this bill, James Iredell Meares, was in 1885, and is now, special deputy of customs at Wilmington, N. C. On Saturday night, the 21st of November, 1885, or Sunday night, the 22d of November, same year, the building in which the collector of customs for that collection district had his office was entered by burglars and the combination safe, in which the moneys and records of said office was kept, was broken open (the said Meares being the cashier of said office, and having the custody of said moneys and records), and the sum of $612 of the money belonging to said office was taken therefrom.

Mr. Meares is shown to be an honest man, a most excellent and faithful officer, and the affidavits make it clear that the burglary was not the result of any negligence or fault of his.

He not only immediately made the money thus taken good to the Government, but without waiting the action of the Department, employed R. J. Southall, chief of the detective system of the Atlantic coast line system of railroads, to ferret out and bring to punishment the criminals, who for three months worked at great expense to Mr. Meares trying to find a clue to the mystery, but without results.

Every fact necessary to bring this claim within the line of precedents is clearly made out by the affidavits of a number of creditable witnesses, and your committee, without any hesitation, recommend that the claimant be indemnified, as provided in the bill.

The CHAIRMAN. Is there objection? The Chair hears none.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MONUMENT AT FREDERICK, MD.

Mr. McCOMAS. I ask consideration of the joint resolution (H. Res. 73) providing for the erection of a monument at Frederick, Md., over the grave of Francis Scott Key, the author of "The Star-Spangled Banner."

The resolution was read, as follows:

Resolved, etc., That the sum of $10,000 be, and is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the purpose of erecting a monument over the grave of Francis Scott Key, the author of "The Star-Spangled Banner," at Frederick, Md., which said sum shall be expended under the direction of the Secretary of War, who shall have the management and control of the selection of and the erection of said monument.

The CHAIRMAN. The Chair is informed that the resolution is on the Union Calendar and not on the Private Calendar. It would therefore not be in order.

Mr. McCOMAS. Then I ask unanimous consent for its consideration, as it is for a small amount of money and for a monument over a grave which is not in a public place.

Mr. ROGERS. This is a special order under which we are proceeding, and I do not think, where unanimous consent is given to consider a special order, that the committee at a subsequent hour of the day should change that order.

The CHAIRMAN. The point is well taken; and, objection being made, the joint resolution is not in order.

Mr. McCOMAS. Then I withdraw it, and I ask consideration of the bill which I send to the Clerk's desk instead.

There was no objection.

I. L. CAIN.

The Clerk read the title of the bill, as follows:

A bill (S. 97) for the relief of I. L. Cain, and others.

The bill was read for information.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. OATES. The price fixed on the cotton mentioned in the bill is entirely too high.

Mr. McCOMAS. I offered this bill at the request of the gentleman from Tennessee [Mr. BUTLER].

The CHAIRMAN. The question is, Shall the bill be considered? The Clerk read amendments that are not before the committee. The wrong bill was sent up by the gentleman from Maryland [Mr. McCOMAS], and the bill which he desires to call up is a Senate bill which has not been read to the committee. The bill as it comes from the Senate has no amendments. The question is, Shall the bill be considered? Is there objection? [After a count.] More than a sufficient number of gentlemen have arisen to object to the consideration of the bill.

Mr. BUTLER. If the report be read I believe there will be no objection to the bill.

Mr. KILGORE. Regular order.

The CHAIRMAN. The Clerk will read the report if the gentleman from Tennessee so desires.

Mr. KILGORE. Mr. Chairman, the question has been submitted as to whether or not the bill shall be taken up, and the requisite number having signified their objection, I do not think we ought to consume any more time with this bill.

The CHAIRMAN. The Chair is probably at fault in the matter. The gentleman from Tennessee asked to have the report read, and I think in justice to him that it should be done.

Mr. LANHAM. I hope the gentleman from Tennessee will not insist on the reading of the report. A sufficient number have signified their objection to prevent the bill being considered, and it will but retard the consideration of other bills to have the report read.

Mr. BUTLER. If the gentleman from Texas will remember, I called up that Senate bill, and on his suggestion I withdrew it with the understanding that I might at any other time bring it up in the House. I refrained from doing so, and the gentleman from Maryland not having anything to call up he called it up for me. We have passed a similar bill for $98,000 in favor of Mr. Dickinson. These are small claims. It has been reported on favorably by the Senate and by the House Committee on War Claims.

Mr. LANHAM. What I said was in the interest of economy of time, because a sufficient number of gentlemen have indicated their intention to object to the consideration of this bill.

Mr. BUTLER. If the report was read I do not think any gentleman would object.

The CHAIRMAN. The Chair does not feel that a vote has been taken upon the question, as the Chair was in error.

Mr. BUTLER. I do not want to do anything that looks like being mean or contrary, as that does not belong to my disposition.

Mr. SENEY. Regular order.

Mr. BUTLER. All right. They are all good Democrats who are the beneficiaries in that bill.

The question was put as to whether the bill should be considered, and the Chairman announced that eight gentlemen had objected, more than a sufficient number, and under the rule the bill could not be considered.

WILLIAM R. WHEATON AND CHARLES H. CHAMBERLAIN.

Mr. MCKENNA. I call up the bill (H. R. 661) for the relief of William R. Wheaton and Charles H. Chamberlain, of California.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay to William R. Wheaton, ex-register, and to Charles H. Chamberlain, ex-receiver of the land office at San Francisco, Cal., jointly, out of any money in the Treasury not otherwise appropriated, the sum of $3,800, being a portion of the amount deposited in the Treasury of the United States by them as fees for testimony which was taken by clerks whose compensation was paid from the private funds of said ex-register and said ex-receiver.

The CHAIRMAN. Is there objection to the present consideration of this bill?

Mr. KILGORE. I ask to have the report read.

Mr. MCKENNA. If the gentleman from Texas will give me his attention for a minute, I will state that the report is quite long, because it sets forth not merely the facts but the evidence, and I think I can explain the case very briefly.

Mr. KILGORE. I want to say to the gentleman from California that the fact that the report is very long is a suspicious circumstance. [Laughter.]

Mr. MCKENNA. Oh, no. It only shows the industry of the member who wrote it, the gentleman from Maryland [Mr. SHAW]. But the facts of the case are these: Mr. Chamberlain and Mr. Wheaton were respectively register and receiver of the land office in San Francisco. Under a practice that obtained in the office the fees collected for taking testimony were allowed to be retained by the register and the receiver. The Department, however, ruled that the officers could not be allowed, as a matter of law, to retain the fees, and required them to deposit the amount of those fees in the subtreasury in the city of San Francisco, which they did. The amount deposited was about $5,000, somewhat more than the sum mentioned in the bill. Afterwards a salary of $100 a month was allowed to the register and the receiver for doing the very work for which they had charged fees, and this bill is to give them the money which they paid out for clerk-hire. That is all.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Only two members objected.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MILES F. WEST.

Mr. MCMILLIN. I desire to call up House bill 1156, for the relief of Miles F. West.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay $474 to Miles F. West, of Macon County, Tennessee, out of any money in the Treasury not otherwise appropriated, in full payment for quartermaster and commissary stores taken from him for the use of the Union Army during the late war.

The CHAIRMAN. Is there objection to the consideration of this bill?

Mr. KILGORE. Let the report be read.

The report (by Mr. STONE, of Kentucky) was read, as follows:

The Committee on War Claims, to whom was referred the bill (H. R. 1156) for the relief of Miles F. West, report as follows:

This is a claim for stores and supplies taken from the claimant's farm in Macon County, Tennessee, during the late war by the Army of the United States. Claim stated at $474.

The claim was filed in the office of the Quartermaster-General October 21, 1879. It was finally considered September 4, 1884, and not allowed for the reason that the Quartermaster-General was not convinced of the loyalty of the claimant.

Your committee are satisfied that the claimant never gave aid or comfort to the rebellion, but was throughout that war loyal to the Government of the United States; that the accounts are correct and just, and that the stores and supplies were taken as charged.

Your committee therefore report back the bill and recommend its passage.

The CHAIRMAN. Is there objection to the consideration of this bill?

Mr. MCMILLIN. I move to amend the bill in one particular. Either in draughting or in printing it the figures 7 and 4 have been transposed. The bill reads $474, but it should read $447. The change reduces the amount of the claim, but that is the just amount.

Mr. KILGORE. All I desire was to be satisfied of the loyalty of this man. [Laughter.] If the gentleman from Tennessee can give me any information upon that point I shall be obliged to him.

Mr. MCMILLIN. The proof shows that he was loyal during the war.

Mr. KILGORE. To which side? [Laughter.]

The amendment was agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

NICARAGUA MARITIME CANAL COMPANY.

Mr. DUNN. Mr. Chairman, since the bill known as the Nicaragua Canal bill was objected to by six or seven gentlemen awhile ago, the gentleman from Texas [Mr. CULBERSON] has prepared an amendment which satisfies the objections of those gentlemen, so ask I unanimous consent that the bill be now taken up, with the understanding that this amendment shall be added to it.

Mr. CULBERSON. I wish the gentleman to understand that I speak only for myself in regard to that amendment.

Mr. DUNN. I understand; but the other gentlemen have told me that they take the same view. I ask the Clerk to report the bill.

Mr. FULLER. I shall object to that bill being taken up on this day.

Mr. MORGAN. I wish to ask the gentleman from Arkansas [Mr. DUNN] whether it will provoke any discussion.

Mr. DUNN. I am willing to make this agreement, that if gentlemen will let the bill be taken up, considered by the committee, and reported to the House to-day, it shall then go over for full discussion and amendment in the House to any day next week which may be designated.

Mr. MCMILLIN. I hope that will be assented to.

The CHAIRMAN. Does the gentleman from Iowa [Mr. FULLER] withdraw his objection?

Mr. DUNN. Will the gentleman allow us to recur to the bill now?

Mr. FULLER. I do not think that bill should be considered on Friday, private bill day.

Mr. DUNN. I will agree that the bill, after it is reported to the House, shall be considered there on any day next week that may be designated.

Mr. FULLER. That is a bill which should be carefully considered section by section, and I must object to its being taken up to-day.

Mr. DUNN. I rise to a parliamentary inquiry. Can we not go back to the bill now unless there are five objectors?

The CHAIRMAN. The Chair thinks not, the bill having been called and objected to.

Mr. KILGORE. Mr. Chairman, the situation of the bill is this, as I understand it: I had a right to call up a bill when my name was reached, and I called up this bill, but gentlemen objected, and the bill had to be withdrawn. Now, have I not a right to call up another bill in place of that?

The CHAIRMAN. The gentleman would have had that right before his name was passed, but the Chair does not think he has that right now.

MARITIME CANAL COMPANY OF NICARAGUA.

Mr. MCRAE. I call up the bill (S. 1305) to incorporate the Maritime Canal Company of Nicaragua.

Mr. LANHAM. I ask that the reading of the bill be dispensed with at this time, as it has heretofore been read.

The CHAIRMAN. If there be no objection, the reading of the bill will be dispensed with.

There was no objection.

The CHAIRMAN. The question is, Shall this bill be considered?

Mr. MORGAN. What is the proposition of the gentleman from Arkansas with reference to discussion?

The CHAIRMAN. There is no proposition at all.

The question being put upon considering the bill, only one member objected.

So the Committee of the Whole proceeded to the consideration of the bill.

Mr. DUNN. I yield to the gentleman from Texas [Mr. CULBERSON] to offer an amendment.

Mr. CULBERSON. I offer the amendment which I send to the desk.

The Clerk read as follows:

At the end of section 5 add the following:

"And nothing in this act shall be held or construed to in any manner involve the United States in any pecuniary obligations whatever, other than in respect to the payment of tolls, as provided for in this act."

Mr. DUNN. I hope this amendment, which is a cautionary matter, will be agreed to.

The amendment was adopted.

Mr. PHELAN. I offer the amendments which I send to the desk.

The Clerk read as follows:

Add to the preamble the following:

"And whereas the interests of the United States of America and of the North and South American Governments render it necessary that said ship-canal should be under the control and guaranty of the United States Government;

"And whereas the said canal when constructed will form a part of the coast-line which the United States would be compelled to defend in case of war."

Also insert, after section 4 of the bill, the following:

"SEC. 5. That the canal to be constructed under this act shall be under the control and protection of the United States, in order that the representatives of all the North and South American peoples may be guarded against any infringement or aggression on the part of foreign nations.

"SEC. 6. That tolls shall be equal upon the same class of tonnage for the vessels of all nations, except as provided in Article LIV of the concession and decrees of the Republic of Nicaragua to the Nicaragua Canal Association of New York.

"SEC. 7. The United States Government binds itself to protect all the rights of the citizens acquired under said concession and decrees, and guaranties the neutrality of the said canal and its operation under the terms of said concession and decrees, subject to the consent and approval by treaty or otherwise of the countries through which the said canal may be constructed."

Mr. DUNN. I hope these amendments will be agreed to. They are acceptable to the friends of this measure and to the country.

Mr. NELSON. I wish to inquire of the gentleman from Texas [Mr. CULBERSON], who introduced the first amendment, whether this last proposition does not to some extent neutralize the other.

Mr. CULBERSON. I think so.

Mr. PHELAN. If the gentleman will allow me to answer that question, I will tell him that in no respect whatsoever——

Mr. CULBERSON. Before the gentleman from Tennessee [Mr. PHELAN] commences his statement, I desire to inquire where this amendment is expected to come in.

Mr. PHELAN. One amendment is an addition to the preamble; the other proposes to insert three new sections as sections 5, 6, and 7, the numbering of the other sections of the bill being changed in accordance with this amendment.

Mr. FARQUHAR. I would like to inquire of the gentleman from Tennessee [Mr. PHELAN] whether his amendment conforms to the concessions and guaranties of the Nicaraguan Government in connection with the company seeking this charter?

Mr. PHELAN. I do not wish to bring up any question which might precipitate a discussion of our whole foreign relations in connection with the Nicaragua Canal; but I will say to the gentleman that the amendment I have drawn and submitted was prepared in careful conformity to the utterances of the State Department upon this subject from the time of the Presidency of General Grant to the present Administration. My object is to protect the United States in connection with this enterprise. Under this amendment the Government of the United States could not possibly be involved by the assumption of any financial obligation. The amendment is drawn for the purpose of enunciating clearly and distinctly in the terms of this bill the course which we propose to pursue if any discussion should arise in reference to that canal in the future. In other words, the amendment is drawn for the purpose of carrying out our construction of the Clayton-Bulwer treaty and for the purpose of emphasizing the fact that we repudiate the English construction.

Mr. FARQUHAR. I am perfectly satisfied with the gentleman's explanation.

Mr. CULBERSON. I think the House ought to hear that amendment read again.

The Clerk again read Mr. PHELAN'S amendment.

Mr. CULBERSON. Mr. Chairman, I think this amendment changes the whole character of the bill. I have not had an opportunity to investigate this matter thoroughly; but my understanding has been all the while that the gentlemen who have petitioned Congress for the passage of this bill desired simply an act of incorporation. Further than that they have not asked and did not expect the Government to go. The bill as passed by the Senate and as now presented to the House, with the amendment I have offered, cuts the Government off from any connection whatever with this canal. But if the amendment proposed by the gentleman from Tennessee [Mr. PHELAN] should be adopted, our Government will be obliged to keep a standing army in that portion of the continent to protect the rights of this corporation. By the terms of the amendment the Government is bound to protect the interests of all persons concerned in the corporation. If this property should be destroyed by a foreign enemy or by any other means, our Government by this proposition binds itself to make good to these incorporators the amount of their loss.

Another thing. As I understand the reading of the amendment, and I have only heard it read at the Clerk's desk, the Government binds itself to secure to these incorporators their rights in any cession the Government of Costa Rica may grant. Now, I think if the amendment is adopted it becomes a Government project, and the Government will have to send a part of its army there to take care of it and to protect the rights of the people who desire to pass through it, and to protect the rights of property of these people.

It is an extraordinary demand to make on the Government of the United States, in the first place, to create a corporation outside of the limits of the United States, and, in the second place, it is a more extraordinary demand to bind the Government to protect the rights of those people in their property in that country, as must be done if that amendment be adopted.

Mr. PHELAN. If the gentleman from Texas will allow me a moment——

Mr. CULBERSON. I will yield to the gentleman from Tennessee.

Mr. PHELAN. I would like to answer the statement made by the gentleman from Texas.

Mr. CULBERSON. How long?

Mr. PHELAN. Five minutes.

Mr. CULBERSON. I will yield to the gentleman for that time.

Mr. JACKSON. Is it still open to a point of order?

The CHAIRMAN. It is not.

Mr. PHELAN. Mr. Chairman, the gentleman from Texas labors under a radical misapprehension of the terms of the amendment I have offered. If it purported what he seems to think it does, I would be of the members of this House the last to offer it and the very last to allow it to pass through this House without serious and earnest protest.

My amendment was drawn expressly for the purpose of preventing the very result which the gentleman from Texas is apprehensive may ensue.

The amendment has been drawn, as I have already said, in careful conformity with the utterances of the State Department from General Grant's administration down to the present time. The rights we have in the premises and the duties imposed in connection with this canal are not dependent on the grant of any particular charter; that is, we have those rights and we are compelled necessarily to protect them, it matters not whether this or some other company undertakes to construct this canal.

I offered the amendment for the purpose of serving notice on the investors of the world what our relations to that project were independent of the fact we granted that charter.

I will not enter into a discussion of the Clayton-Bulwer treaty, but content myself with saying that there are two radically different and opposite constructions of it, one held by the diplomats of England and the other held by Mr. Blaine and every Secretary of State of the United States since.

My amendment was drawn in conformity with the utterances of our foreign policy on that subject, and not for the purpose of granting these incorporators any greater rights than they would have without it. On the contrary, the privileges they will have will be the same without as with the amendment.

The gentleman from Texas, therefore, is laboring under a misapprehension, and a serious misapprehension, in regard to the effect of the amendment. It was not drawn hastily, but after careful consideration of the subject, and with strict reference to the views of those who favor the United States side of the question. There is nothing binding us in any contingency to assume any financial responsibility in the matter. The grant to these corporators is no greater in the way of protection than the United States grants to any one of its citizens, no matter where he may be. It is to serve notice to the outside world of what our position is.

I have not time, and will not trespass upon the patience of the House, to enter upon any extended discussion with the gentleman from Texas, who is, as I have shown, laboring under misapprehension as to the effect of the amendment I have offered.

[Here the hammer fell.]

Mr. CULBERSON. Mr. Chairman, I think that sections 5 and 7 of the amendment proposed by the gentleman from Tennessee are obnoxious to the objections I have suggested. The fifth section is simply the announcement of the Monroe doctrine in substance, that is to say that the Government of the United States grants and extends to this corporation a distinct announcement that it is bound to protect and defend the rights of the corporation against encroachments or infringements or aggressions on the part of any foreign country. In other words, the Government of the United States undertakes to protect North and South American people against any aggressions or infringements from foreign nations. That is the Monroe doctrine, as I understand it. That is to say, I understand the Monroe doctrine to be this in substance: that the Government of the United States would hesitate before permitting a foreign country or any foreign country to take possession of this canal and dominate these Central American Republics.

But now we are asked to agree to bind ourselves by this amendment in advance of any effort on the part of any foreign country to take possession of the canal. We agree, if we adopt this amendment, to protect the North and South American people, all of them, against invasions or aggressions from foreign nations. That is the substance of it.

The seventh section of the proposed amendment provides that the United States Government binds itself to protect all the rights of the citizens acquired under said concessions and decrees. I have not had an opportunity to investigate this subject fully, but I understand that this Government has made certain concessions to this company. They are, as I understand it, concessions of rights of way or lands, or some franchises in connection with the projected canal. But the Government of the United States binds itself by this amendment to protect all of the rights of citizens acquired under these concessions and decrees; and further guaranties the neutrality of said canal and its operations under the terms of the said concessions and decrees, subject to the consent and approval by treaty or otherwise of the countries through which the canal may be constructed. It also provides that this is to form a link of the chain of our national coast defenses. It provides:

And whereas the said canal when constructed will form a part of the coast line which the United States would be compelled to defend in case of war, etc.

The proposition is, therefore, if this amendment is adopted and if the bill is passed with that amendment embodied in it, to give notice to the whole world that the Government of the United States undertakes in advance to defend the interest of the incorporation in case of war against all aggressions. We make it an American institution. We plant an American institution in this foreign country and give notice that we will protect the interest of every man who acquires any title to the project under the decrees and concessions of this foreign government, and will defend such interests against aggression in time of war.

I repeat, therefore, sir, that I think these amendments change entirely the whole scope, object, and intent of the original bill.

I now yield to the gentleman from Iowa [Mr. FULLER] such time as he may desire.

Mr. PHELAN. Will the gentleman, before he proceeds, allow me a minute?

Mr. FULLER. Certainly.

Mr. PHELAN. I wish to say to the gentleman from Texas that I am entirely willing to accept any amendment which he may propose to the amendment I have suggested which will ingraft upon this bill a full enunciation of the Monroe doctrine. If the amendment I have drawn does not cover it, if the amendment is inartistically drawn, or is indefinite in any of its terms, I am perfectly willing and anxious to accept any suggestion in the way of an amendment that he may offer to make it clear and emphatic in that respect. The gentleman has unfortunately for myself and my position confused the relations we propose to occupy to the citizens who undertake this enterprise as American citizens and those which we propose to occupy towards the general enterprise itself. It would apply to the construction as well by German, French, or English capital. My object was to ingraft upon the bill the announcement of the Monroe doctrine. If I have not done so in the amendment, or if I have gone beyond that, I am willing to accept any amendment the gentleman may designate which will restrict it clearly to the limits designed to be covered by the amendment or will enlarge it to meet that point. That was the sole object I had in view in preparing the amendment.

Mr. CULBERSON. I do not think it is at all necessary for us to reaffirm the Monroe doctrine. All nations of the world understand our relations to that doctrine, and we can add no strength to our position by a reaffirmation here in this bill.

I yield to the gentleman from Iowa.

Mr. PHELAN. But that doctrine is denied by England.

Mr. CULBERSON. That is very true; but we are not bound by that denial.

Mr. FULLER. Mr. Chairman, this debate so far as it has proceeded satisfies me that I was correct in the position I took when I objected to the consideration of the bill at this time. I want to say that I am in favor of the building of a canal connecting the waters of the Atlantic with the Pacific; but this is the most gigantic legislation that has been before Congress for many years.

For the first time in the history of this country the United States Government proposes to charter a company to do business on foreign soil.

Mr. BAYNE. Oh, no; not the first time by any means.

Mr. FULLER. I think that this bill is of such importance that it should not be considered on Friday, when it is expected that only the ordinary private bills will be considered, and especially is it objectionable at a time when there are but about sixty members present on the floor.

I have not had an opportunity to examine the bill in all of its details, but I am satisfied from the cursory examination I have given to it that it is not surrounded by the proper guards; that it has not even the safeguards surrounding it that would surround an irrigating-ditch company in the State of Kansas or any mining corporation in the State of Colorado.

I say that this bill should be considered when there is a quorum present, and carefully considered. It is a new question, a great question, and I for one am not in favor of, and do not propose to permit this bill to go through unless there is a quorum present. I give notice of that now.

Mr. DUNN. Will the gentleman allow me to ask him a question just there? How much time does the gentleman desire for the purpose of examining the bill?

Mr. FULLER. I will say that I think this bill should be referred to the Committee on the Judiciary, as there are legal questions involved. We have already heard from the chairman of that committee [Mr. CULBERSON], who gives one view as to the responsibility of the Government. Mr. PHELAN, who is a member of the Committee on Commerce, gives another. It is already evident that there is a division of opinion as to the legal questions; and I believe the bill should go to the Committee on the Judiciary upon the legal questions for consideration and report.

Mr. DUNN. But the gentleman from Texas [Mr. CULBERSON] has no trouble in reaching conclusions on which he will be satisfied. How much time does the gentleman from Iowa desire to satisfy himself? Will he agree to a day in the future?

Mr. FULLER. I certainly will.

Mr. DUNN. Will you name it now?

Mr. FULLER. I will name it.

Mr. DUNN. Name the day when you will allow the bill to be considered.

Mr. FULLER. I will be in favor of taking this bill up for discussion the second week of the next session.

Mr. DUNN. Oh, well, if the gentleman desires to be captious he can.

Mr. O'NEILL, of Pennsylvania. I desire to say to the gentleman from Iowa [Mr. FULLER] that this bill has been investigated thoroughly by the Committee on Commerce of this House; it has been before that committee a long while and carefully considered; and I will say to him that there are gentlemen on that committee who are very able lawyers—the chairman, the present acting chairman of the committee, and several others—who certainly have looked into this bill and its provisions in every point of view, and would not undertake to present to the House a bill unless it was correctly guarded. The giving of corporate powers by Congress is no new thing.

Mr. CULBERSON. Mr. Chairman, I am entitled to the floor; and I desire to ask the gentleman from Pennsylvania [Mr. O'NEILL] a question. Did not the Committee on Commerce report adversely on this proposition offered by the gentleman from Tennessee [Mr. PHELAN]?

Mr. O'NEILL, of Pennsylvania. Yes.

Mr. CULBERSON. Then I understand that this amendment offered by the gentleman from Tennessee has been acted upon by the Committee on Commerce, and that the committee refused to report it favorably to the House.

Mr. O'NEILL, of Pennsylvania. This bill has been reported favorably from the Committee on Commerce.

Mr. CULBERSON. Without this amendment?

Mr. O'NEILL, of Pennsylvania. The amendments of the gentleman from Tennessee [Mr. PHELAN] are those of his own suggestion. Mr. Chairman, I think this bill should be allowed to pass.

Mr. PHELAN. I beg the indulgence of the House for just three minutes. At the end of my remarks I will withdraw the amendment which has raised the objection of the gentleman from Texas.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee [Mr. PHELAN] to be allowed three minutes in which to make a statement? The Chair hears none.

Mr. PHELAN. So far as the question of constitutionality is concerned, the Committee on the Judiciary, which is composed of lawyers, have already passed upon that subject. When the question came up in the Committee on Commerce it was considered in full committee at three or four different meetings. It was considered carefully and at length. The amendments I offered were not amendments which were antagonized by any member of the Committee on Commerce except upon the proposition that this was a private charter, and it was inexpedient to ingraft upon a private charter any expression of our foreign policy.

Not for the purpose of defeating this bill, but in earnest protest against the proposed action, I offered this amendment. Now, in accordance with the manifest desire of the House, and with no view of applying that rule by which its passage may be obstructed, and having no desire to thrust my single individuality before the House and utilize the brute strength the rules of this House give for the purpose of enforcing my peculiar ideas or requiring a quorum to be present, I feel compelled to agree that a vote of the House shall be taken upon the bill without my amendment, and I withdraw my amendment. [Cries of "Vote!"]

The question was put as to ordering the bill to be reported to the House with a favorable recommendation.

The CHAIRMAN announced that the ayes seemed to have it.

Mr. FULLER. Division.

The committee divided; and there were—ayes 33, noes 6.

Mr. FULLER. No quorum.

Mr. LANHAM. Mr. Chairman, I move that the committee do now rise.

Mr. BAYNE. Mr. Chairman, I desire to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BAYNE. Is not this question still pending?

The CHAIRMAN. The question is pending as unfinished business.

The motion of Mr. LANHAM was agreed to.

The committee accordingly rose; and Mr. MCMILLIN having taken the chair as Speaker *pro tempore*, Mr. RICHARDSON reported that the Committee of the Whole had had under consideration the Private Calendar, and had directed him to report to the House sundry bills with various recommendations.

WASHINGTON AQUEDUCT TUNNEL INVESTIGATION.

Mr. BURNES. Mr. Speaker, I offer the concurrent resolution which I send to the desk.

The resolution was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That all work heretofore performed upon the Washington aqueduct tunnel, together with the provisions of any contract made for the same or any portion thereof, and all the facts and circumstances connected with the bidding for and letting and making of said contracts, and all expenditures of moneys heretofore appropriated for said work, together with the extent of any force employed in said work by the Government, the nature of the same and the compensation therefor, shall forthwith be fully investigated by a joint select committee of six members, of whom three shall be members of the Senate, to be appointed by the President of the Senate, and three shall be members of the House of Representatives, to be appointed by the Speaker. Said committee shall have authority to employ a clerk, a stenographer, and such experts as it may deem necessary for the investigation. It may sit during the sessions of Congress or in recess, and shall have full power, either in full committee or in subcommittee, to administer oaths and send for persons and papers, and to conduct its investigation either in Washington or in such places as may be deemed necessary, and shall make full report of its proceedings and the conclusions arrived at, with such recommendations as it may deem proper to Congress on or before January 1, 1889.

Mr. DINGLEY. I desire to reserve the right to object until I learn why that matter is brought here in this form when it is now pending in conference.

Mr. BURNES. The lawyers of the Senate and the great lawyers of the Senate have suggested, with a good deal of force, that perhaps we have not the right or the power under our system of legislation to raise this joint committee in an appropriation bill. Therefore, in order to prepare the appropriation bill properly, it is necessary to get this first out of the way. We introduce this resolution, therefore, and appropriate the money necessary to conduct the investigation.

Mr. DINGLEY. That explanation is entirely satisfactory.

Mr. BURNES. The gentleman being satisfied, I now move the previous question.

The previous question was ordered.

The concurrent resolution was adopted.

Mr. BURNES moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

PRIVATE BILLS PASSED.

House bills of the following titles, reported from the Committee of the Whole House on the Private Calendar, were severally ordered to be engrossed and read a third time; and being engrossed, they were accordingly read the third time, and passed:

A bill (H. R. 5043) for the relief of the Stockbridge and Munsee tribe of Indians, in the State of Wisconsin;

A bill (H. R. 2896) for the relief of the heirs of John R. Treutlen;

A bill (H. R. 11165) for the relief of John Gray;

A bill (H. R. 3715) for the relief of the National Bank of New Orleans, formerly Louisiana State Bank;

A bill (H. R. 3765) for the relief of James Devine;

A bill (H. R. 5480) for the relief of James Iredell Meares; and

A bill (H. R. 10099) for the relief of Melchisedec Robinson.

Amendments reported from the Committee of the Whole to House bills of the following titles were severally agreed to, and the bills as amended were severally ordered to be engrossed and read a third time; and being engrossed, they were accordingly read the third time, and passed:

A bill (H. R. 7151) for the relief of A. N. Kimball and sureties;

A bill (H. R. 338) to remove the charge of desertion from the military record of J. George Ruckstuhl;

A bill (H. R. 9211) for the relief of Jesse Durnell; and

A bill (H. R. 1156) for the relief of Miles F. West.

Senate bills of the following titles, reported from the Committee of the Whole, were severally ordered to a third reading, and were accordingly read the third time, and passed:

A bill (S. 741) for the relief of William Tabb; and

A bill (S. 1671) for the relief of the heirs of Martin Kenofsky.

WILLIAM R. WHEATON AND C. H. CHAMBERLAIN.

The House proceeded to the consideration of the bill (H. R. 661) reported from the Committee of the Whole House on the Private Calendar for the relief of William R. Wheaton and Charles H. Chamberlain, of California.

Mr. MCKENNA. I ask unanimous consent that the Committee on Claims be discharged from the further consideration of Senate bill No. 664, and that it be substituted for this House bill, with which it is identical.

The SPEAKER *pro tempore*. If there be no objection, the House will proceed to the consideration of Senate bill No. 664, in lieu of House bill No. 661, the two bills being, as stated by the gentleman from California [Mr. MCKENNA], identical in their provisions.

There being no objection, the bill (S. 664) for the relief of William R. Wheaton and Charles H. Chamberlain, of California, was taken up, ordered to a third reading, read the third time, and passed.

House bill No. 661 was, by unanimous consent, laid on the table.

Mr. LANHAM. I move to reconsider the several votes by which these bills reported from the Committee of the Whole House on the Private Calendar have been passed; and also move that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ESTATE OF JOSEPH FENNO.

Mr. ROGERS. I ask unanimous consent for the present consideration of the bill (S. 1190) for the relief of the estate of Joseph Fenno, deceased.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the legal representatives of Joseph Fenno, deceased, late of Little Rock, Ark., out of any money in the Treasury not otherwise appropriated, the sum of $580, for rent of buildings owned by him in Little Rock, Ark., which were occupied by the military authorities of the United States, under contract, from July 1, 1864, to January 30, 1865, and for which vouchers were given said Busby by said authorities.

There being no objection, the House proceeded to the consideration of the bill.

Mr. ROGERS. By a clerical or typographical error the word "Busby" appears in the last line of the bill instead of "Fenno." I move to amend by striking out "Busby" and inserting "Fenno."

The amendment was agreed to.

The bill as amended was ordered to a third reading, was accordingly read the third time, and passed.

Mr. ROGERS moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

J. M. HOGAN.

Mr. MORROW. I ask unanimous consent for the present consideration of the bill (H. R. 4489) for the relief of J. M. Hogan.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to pay the claim of J. M. Hogan, of Stockton, in the State of California, for loss of property in consequence of depredations committed by Snake or Shoshone Indians in the year 1861, while *en route* through the Territory of Utah to the State of California; and that the sum of $6,600 be, and the same is hereby, appropriated to pay the said claim of the said J. M. Hogan, said claim having been fully examined into by the Indian Bureau of the Interior Department, under rules and regulations promulgated by the Commissioner of Indian Affairs to the Secretary of the Interior, with the recommendation for an allowance in the amount hereby appropriated, said claim having been duly reported to Congress, in pursuance to law, by the Secretary of the Interior.

Mr. KILGORE. I think, perhaps, the report in this case ought to be read. I am inclined to object to the bill.

The SPEAKER *pro tempore*. The gentleman from Texas asks that the report be read, reserving the right to object.

Mr. MORROW. This claim was investigated carefully by the Indian Bureau, and was reported by the Interior Department to Congress for allowance. It has already been once passed by this House unanimously; but unfortunately it did not pass in the Senate.

Mr. KILGORE. The bill calls for a considerable amount of money.

Mr. MORROW. The money does not come out of the Treasury—not a dollar of it.

Mr. KILGORE. How is the claim to be paid?

Mr. MORROW. It is to be paid out of the funds of the Indians.

Mr. KILGORE. Well, I do not care much about it.

There being no objection, the House proceeded to the consideration of the bill, which was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time.

The question being on the passage of the bill,

Mr. SOWDEN said: I move that the House now take a recess.

The motion was not agreed to.

The question recurring on the passage of the bill, it was passed.

Mr. MORROW moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

JAMES SIMS.

Mr. MORGAN. I ask unanimous consent for the present consideration of the bill (H. R. 9297) for the relief of James Sims.

The bill was read, as follows:

Be it enacted, etc., That there be, and hereby is, appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $6,338, to be paid to James Sims, of Marshall County, in the State of Mississippi, for quartermaster and commissary stores furnished by him to the Army of the United States in the years A. D. 1862 and 1863.

Mr. MORGAN. I ask that the report be read.

The report of the Committee on War Claims (by Mr. BLISS) was read, as follows:

The committee finds from the sworn statement of James Sims, Alfred Featherstone, and Manuel Sims that the claimant furnished quartermaster and commissary stores to the Army of the United States from December, 1862, to August, 1863, valued at $5,582. Receipts are also filed with the committee for a portion of the supplies enumerated in the sworn statement of claimant, which were given at the time by officers of the Army who took them. Also the following order from General Grant in his own handwriting:

"HEADQUARTERS DEPARTMENT OF THE TENNESSEE,
"*Holly Springs, Miss., January* 4, 1863.

"Mr. James Sims, living 8 miles southwest of Holly Springs, is authorized to retain four mules and the remainder of stock, grain, and provisions on hand.

"All United States troops are prohibited from further molesting or taking from Mr. Sims, he having already contributed largely to the support of the Federal Army.

"U. S. GRANT, *Major-General.*"

This order shows that a large amount of supplies not covered by the receipts of officers were furnished by James Sims. Conclusive evidence is also filed showing claimant's loyalty.

The committee is of the opinion that this claim should be paid, and recommend the passage of the bill.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this bill?

Mr. KILGORE. I believe this claim ought not to be paid. I am inclined to doubt the proof of the claimant's loyalty. He lived in Mississippi during the war, and the pretense of a man down in Mississippi being loyal to the Government of the United States during the war is tolerably "thin." [Laughter.]

Mr. MORGAN. I presume I was just about as disloyal as the gentleman from Texas, for I was in the Confederate army from the beginning of the war until its close. I would be as unwilling as any one to pay the claim of a man not entitled to payment. But of course persons can prove their loyalty; and the Committee on War Claims, having investigated that subject, is satisfied that this man was loyal. I think the claim ought to be paid.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this bill?

Mr. KILGORE. Will not somebody over there object to it if I do not? [Laughter.]

There being no objection, the House proceeded to the consideration of the bill; which was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

Mr. MORGAN moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

WILLIAM ENGLISH.

Mr. ROCKWELL. I ask unanimous consent for the consideration of the bill (H. R. 3721) authorizing the President to appoint William English an officer in the regular Army of the United States Army.

The bill was read, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to appoint William English a second lieutenant in the regular Army of the United States and to assign him to any vacancy in said rank existing therein.

Mr. SOWDEN. Let us have the report read.

Mr. ROCKWELL. I will make a statement of the facts, if the gentleman from Pennsylvania will allow me.

Mr. SOWDEN. I am willing to accept the gentleman's statement in lieu of the reading of the report.

Mr. ROCKWELL. The report of the Committee on Military Affairs in this case, which was made by the gentleman from Mississippi [Mr. HOOKER], not now present, is unanimous.

Mr. SOWDEN. What are the facts of the case?

Mr. ROCKWELL. I will state them in a moment. Two different courts-martial sat upon the cases of two officers of the Army, although the cases rested upon practically the same evidence. One of the officers was sentenced to six months' suspension and the payment of a fine of $50; the other officer was condemned to dismissal from the Army, though in the latter case there was substantially the same state of facts, or if anything there was reason for a lighter sentence than in the other case. The committee has unanimously reported this bill; and I am authorized by the gentleman from Mississippi [Mr. HOOKER], who presented the report, to say that the measure has his entire and hearty approval.

Mr. DINGLEY. What was the offense?

Mr. ROCKWELL. The offense——

Mr. SOWDEN. This is simply to restore the officer?

Mr. ROCKWELL. That is all.

Mr. DINGLEY. What was the offense alleged?

Mr. ROCKWELL. There were two charges, one that he committed some act unbecoming an officer and gentleman, and the other was for absence without leave. On this latter charge, absence without leave, he was found guilty, but on the other he was dismissed on the statement as embodied in the specifications; but they filed certain new specifications at the time of the trial, which the committee thought ought not to have been done.

Mr. DINGLEY. It was not for habitual drunkenness?

Mr. ROCKWELL. No, sir.

Mr. OATES. He was charged with some immoral conduct?

Mr. ROCKWELL. For some conduct unbecoming an officer and a gentleman. The case has been reported unanimously by the committee.

The SPEAKER *pro tempore*. Is there objection to the request of the gentleman from Massachusetts?

Mr. OATES. I did not hear the reading of this bill. Does it require the appointment absolutely, or leave it discretionary with the President?

Mr. ROCKWELL. It authorizes the appointment.

The SPEAKER *pro tempore*. The bill will be again reported.

The bill was again read.

Mr. OATES. I take it that it does not require the President to make the appointment, but only authorizes him.

Mr. ROCKWELL. Not by any means. It has been brought to the attention of the President, and meets his approval in that form.

Mr. OATES. If it only leaves it to his discretion I have no objection.

There being no objection, the bill was considered, ordered to be engrossed and read a third time, and being engrossed, it was accordingly read the third time, and passed.

Mr. ROCKWELL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ST. CLAIR FLATS SHIP-CANAL.

Mr. CATCHINGS, from the Committee on Rivers and Harbors, by unanimous consent, reported back favorably the bill (H. R. 11445) for completing the dredging of the St. Clair Flats Ship Canal, Michigan; which was referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

HENRIETTA M. SANDS.

Mr. TRACEY. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (H. R. 1089) for the relief of Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy, and put it upon its passage.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, to Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy, the sum of $370.50, being the sum due to the decedent under the decisions of the Supreme Court of the United States in the Graham and Temple cases as the difference between actual traveling expenses allowed and the mileage due for travel performed by decedent upon duty under orders in June, 1861.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this bill?

Mr. KILGORE. Let the report be read, so that we can wind up the evening on that case.

The report (by Mr. TIMOTHY J. CAMPBELL) was read, as follows:

The Committee on Claims, to whom was referred Senate bill No. 1089, for the relief of Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy, have considered the same, and respectfully report that a report on this bill was made to the Senate at this session of Congress (Senate Report No. 415), and your committee adopt said report as their own, which is appended hereto, and report the bill back and recommend its passage.

[Senate, Report No. 415, Fiftieth Congress, first session.]

The Committee on Claims, to whom was referred the bill (S. 1089) for the relief of Henrietta M. Sands, widow of Rear-Admiral Sands of the United States Navy, have considered the same, and respectfully report:

This claim is for the balance of mileage due under the law to the estate of the late Rear-Admiral Benjamin F. Sands, United States Navy, for travel performed by him under orders in June, 1861. Under the construction put by the accounting officers of the Treasury upon the act of 1835, officers of the Navy had been notified that mileage would only be allowed where the travel was performed within the United States, and simply actual expenses when they traveled outside of the United States. It was only by the decisions of the Supreme Court of the United States in the Graham and Temple cases (105-110, U. S. Reports) that officers were informed of the erroneous ruling of the accounting officers, and all who had only received actual expenses claimed, and the accounting officers allowed, and Congress appropriated the money to pay them the difference between what had been allowed and what was due as mileage, a great many of the cases being for travel under orders dating prior to 1850.

The amount due to the late Admiral Sands has been stated by the Second Comptroller, in an opinion laid before the committee, to be $370.50, which he says he could not certify to Congress, as the amount allowed for actual expense of travel was in the accounts of a coast survey officer, and so came under another bureau of the Treasury Department, which declined to consider it.

It is clear that this sum was due to Admiral Sands, and that it has never been paid. It is about the only such claim that remains unsettled. The estate of Admiral Sands, which was solvent, has been closed by the administrator, wherefore it is that the money so due is made by the bill payable directly to the officer's widow, who is the residuary legatee; and your committee recommends the passage of the bill as just and proper.

There being no objection, the bill was considered, ordered to a third reading; and being read the third time, was passed.

Mr. TRACEY moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

WILLIAM J. SOWELL.

Mr. PEEL. I ask unanimous consent to take up and pass the bill

(H. R. 2025) to place William J. Sowell on the rolls of the Arkansas Volunteers. I ask to discharge the Committee of the Whole from its further consideration, and pass the bill. It does not appropriate a dollar.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he hereby is, directed to place the name of William J. Sowell on the rolls of Capt. Thomas J. Williams's company (B), First Arkansas (six months') Infantry Volunteers, as having enlisted June, 1862, and to enter him as having died in service on the 7th day of October, 1862; and all pay, bounty, and pension due under any laws of the United States on account of his services and death shall be paid to the parties thereto entitled.

There being no objection, the bill was considered, ordered to be engrossed, and read the third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. PEEL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

And then (the hour of 5 o'clock having arrived) the Speaker *pro tempore* declared the House in recess under its previous order until 8 o'clock p. m.

EVENING SESSION.

The recess having expired, the House at 8 o'clock p. m. was called to order by Mr. MCMILLIN, who directed the reading of the following communication:

SPEAKER'S ROOM, HOUSE OF REPRESENTATIVES,
Washington, October 5, 1888.

DEAR SIR: I hereby designate Hon. BENTON MCMILLIN, of Tennessee, to preside as Speaker *pro tempore* at the session of the House this evening.

JOHN G. CARLISLE.

Hon. JOHN B. CLARK,
Clerk House of Representatives.

ORDER OF BUSINESS.

Mr. LYMAN. Mr. Speaker, I wish to submit a parliamentary inquiry. Some few weeks ago the Senate bill 3018, granting a pension to John N. Bovee, passed the committee and was reported to the House, the question being upon its third reading. I wish to ask if it is proper to call that bill up now, or if it can be called up the first bill after the committee shall rise to-night?

The SPEAKER *pro tempore*. The Chair will state to the gentleman from Iowa that in the regular order this bill will be reached first when the committee rises to-night.

Mr. LYMAN. That is satisfactory to me.

Mr. YODER. I move that the House resolve itself into Committee of the Whole to consider bills on the Private Calendar, under the special order.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole, Mr. BACON in the chair.

Mr. MORRILL. Mr. Chairman, I ask consent that the same order of business be pursued to-night as on last Friday; that is, that the roll be called and each member be allowed to call up a bill as his name is reached.

There was no objection, and it was so ordered.

ELLEN WHITE DOWLING.

Mr. FULLER. I call up the bill (S. 1481) granting a pension to Ellen White Dowling.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Ellen White Dowling, a volunteer nurse in the Army during the war of the rebellion, and pay her a pension of $25 a month, during life, from and after the passage of this act.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1481) granting a pension to Ellen White Dowling, submit the following report:

The papers submitted to your committee in this case fully substantiate the statements made in the report of the Committee on Pensions in the Senate, and their report is adopted and the passage of the bill recommended, with an amendment striking out the words "twenty-five" and inserting "twelve."

[Senate Report No. 1066, Fiftieth Congress, first session.]

The applicant is one of the army of noble and patriotic women who rendered such valuable service in caring for the sick and dying soldiers of the late war. She entered the Massachusetts General Hospital to prepare for field service, and while there cared for many wounded soldiers sent home from the first battle of Bull Run. She left this hospital intending to go to the field, when she was instated in the Armory Square Hospital as first volunteer nurse. Here she served faithfully until May, 1863, acting not only in the capacity of nurse, but as surgeon's assistant during painful operations, when her delicate woman's nature was subjected to the severest nervous strains. Her system has never recovered from the fatigues and shocks of this service, and the committee, after a careful review of the evidence, are convinced that she is entitled to national recognition, and therefore recommend the passage of the bill.

The amendment was adopted.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

MARY J. FOSTER.

Mr. GIFFORD. I call up the bill (S. 3030) granting a pension to Mary J. Foster.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place upon the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mary J. Foster, widow of Milton S. Foster, late a private in Company A, Fifth Regiment Kansas Cavalry.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 3030) granting a pension to Mary J. Foster, submit the following report:

The claimant in this case is the widow of Milton S. Foster, of Company A, Fifth Kansas Cavalry, who enlisted August 4, 1861, and was discharged April 20, 1865. In her declaration for pension she declares that her husband contracted catarrh in the service and died therefrom December 16, 1872. The case was rejected on the ground that the soldier's fatal disease was consumption, and it was not proven to have been due to his military service. The prisoner of war records show that he was captured at Marks Mills, April 26, 1864, and released at Red River Landing, February 26, 1865. The assistant surgeon-general United States Army reports that no hospital records of the Fifth Kansas Cavalry were ever on file in this office, so the claimant is unable to show by the hospital records the incurrence of the disease in the service.

A. Thomas testifies that Foster was a strong, healthy man at the time of his enlistment, and that the exposure and hardships of his prison life were the main cause of his injury, which afterwards resulted in his death; that he knew him after the war, and that his constitution was completely broken down.

Other witnesses testify to his robust health at the time of his enlistment, and that he was broken down in health at the time of his discharge.

The evidence submitted to your committee seems to establish the fact at the time of his discharge from the service that he was suffering from catarrh in the head, which gradually increased until the bones of his face began to decay, and until, as one witness testifies, it seemed as if the whole inside of his head was rotten.

His death was caused by consumption, which your committee are satisfied was the natural sequence of the diseased condition of his head, and they therefore recommend the passage of the bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Mr. LAWLER. I would suggest to the House that the call of the roll be dispensed with, and that when an initial is announced gentlemen may rise and ask for the consideration of a bill.

The CHAIRMAN. The committee can not dispense with the order of the House, which requires the call of the roll.

MARY ANN SHOOK.

Mr. JOHNSTON, of North Carolina. I call up for consideration the bill (H. R. 2702) granting a pension to Mary Ann Shook.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mary Ann Shook, widow of Joseph G. W. Shook, late a private in the company of Daniel Hake in the war of 1812, and to pay her a pension from and after the passage of this act.

The CHAIRMAN. The bill which the gentleman from North Carolina [Mr. JOHNSTON] has sent up has an amendment written in it.

Mr. JOHNSTON, of North Carolina. It is merely a misprint. The name in the bill should be "Daniel Hoke," instead of which it is printed "Hake." I offer that amendment.

The report (by Mr. HENDERSON, of North Carolina) was read, as follows:

The Committee on Pensions, to whom was referred the bill (H. R. 2702) granting a pension to Mary Ann Shook, have considered the same and report as follows:

The claimant is the widow of Joseph George Shook, who she declares was a soldier for the period of ten weeks during the war of 1812, under Captain Hoke, of the North Carolina Infantry, and was discharged about March 25, 1815.

Her claim has been rejected by the Pension Bureau on the ground that there is no evidence in the Third Auditor's office, Treasury Department, that her husband was ever in the military service.

The following certificate from the records on file with the State officers of North Carolina shows that a service was rendered in the company alleged:

"NORTH CAROLINA, ADJUTANT-GENERAL'S DEPARTMENT,
"*Raleigh, January 5*, 1885.

"This is to certify that upon the original manuscript muster-rolls of the war of 1812, of the North Carolina troops mustered into the service of the United States, appears the name of George Shook, as a private in the company commanded by Capt. Daniel Hoke, of Lincoln County. That company was of the Seventh Regiment, of which Andrew Irwin was lieutenant-colonel commandant.

"FRED. A. OLDS, *Clerk in Charge of Records.*"

A further statement from Mr. Olds is to the effect—

"That Lieutenant-Colonel Irwin's regiment was ordered to rendezvous at Wadesborough, Anson County, March 1, 1815, a requisition having been made by Maj. Gen. Thomas Pinckney for one regiment to march to the defense of the southern frontier of the sixth military district of the United States. Our records were in part destroyed in 1868, and so I can not give the dates of muster in and muster out."

The claimant is ninety-two years of age.

Your committee are of the opinion that the records on file in the archives of the State should be accepted as sufficient to establish the fact of the service of the claimant's husband. They recommend the passage of the bill.

The amendment was agreed to, and the bill as amended was ordered to be laid aside to be reported to the House with the recommendation that it do pass.

ABBIE L. HAM.

Mr. DINGLEY. I was detained this evening and my name was called when I was absent. I ask unanimous consent that I may call up a bill at this time.

There was no objection.

Mr. DINGLEY. I call up for consideration the bill (S. 3197) granting a pension to Abbie L. Ham.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby authorized and directed to place on the pension-roll, subject to the provisions and

limitations of the pension laws, the name of Abbie L. Ham, widow of John S. P. Ham, late captain of Company C, Thirteenth Maine Volunteers.

The report (by Mr. GALLINGER) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 3197) granting a pension to Abbie L. Ham, have had the same under consideration, and beg leave to submit the following report:

Abbie L. Ham is the widow of John S. P. Ham, late captain of Company C, Thirteenth Regiment Maine Volunteers. The widow's application was rejected on the ground that her husband's death was not due to his service.

The records of the War Department show that the soldier served as second lieutenant, first lieutenant, and captain, respectively, from December 4, 1861, to January 6, 1865.

Dr. Bates, late surgeon of Ham's regiment, testifies to his suffering from attacks of chills and fever, the result of climatic influences and exposure; that he was a sound, able-bodied man when he entered the service; that at the battle of Sabine Cross-Roads, Louisiana, on the 8th of April, 1864, he was severely wounded in the abdomen and hip by a rifle ball, which entered in front at the lower portion of the abdomen, by the side of the bladder, and passed through the body and lodged in the hip; that he dressed said Ham's wound as he was brought off the battle-field; that he had the reputation of being a brave soldier in his company during his service in the Army.

Dr. Donovan, who knew the soldier twelve years as a neighbor, commenced to treat him professionally in October, 1876; was called to treat him January 5, 1882; found him in a high degree of mental excitement; feverish, pulse accelerated, left arm and leg paralyzed. Upon examination of the heart aortic and mitral murmurs were discovered. Paralysis and delirium continued until January 15, when he died. The diagnosis was cerebral hemorrhage, due to degenerate changes in cerebral arteries. His early death, occurring at the age of fifty years, dependent on organic disease of the heart and brain, in one whose family history has been so exceptionally good, inclines deponent to believe that the soldier's gunshot wound, the general severity of army life, and the damaging effects of malarial infection led to the development of cardiac disease and then to the cerebral affection which resulted as described. This theory seems more probable, since, as it is alleged, he was in a sound physical condition at the time of his enlistment.

Dr. Horr knew the soldier since 1870. He belonged to a large family, who were vigorous and healthy, and was considered to have inherited a vigorous constitution. During the last few years of his life he appeared to be failing in health and growing old prematurely. Deponent first visited him professionally January 8, 1882, in consultation with Dr. Donovan. He was partially conscious, one-half of his body paralyzed, valvular murmurs were heard, and some irregularity of the heart was noted. The case was diagnosed as one of cerebral hemorrhage, from degenerative disease of the blood-vessels, or possibly embolism with hemorrhage infraction. The disease of blood-vessels and heart were believed to have existed for a long time. Five days later they consulted again. The symptoms were more intensified; was in a comatose condition. The scar was nearly over the left hip-joint, the ball having entered the lower part of the abdomen and made its exit near the left trochanter major. Death occurred two days later, and deponent is of the opinion from information obtained by examination and from the history of the case that the disease which caused his death had its origin from malarialpo isoning and other enfeebling agencies to which he was exposed while in ser vice.

This deponent was late an assistant surgeon in the Army and a practitioner of medicine over twenty-two years. A special examiner says he stands at the head of his profession in Maine, and his reputation is excellent.

Amos Nevens testifies to the soldier's soundness before enlistment; lived near him since his boyhood, worked with him and had a good opportunity of judging. From the time of his return home from the Army to the date of his death he was never a well man. He suffered every year from frequent chills and fever and nervous prostration, which was attributed to his wound. They occurred about once a month. Deponent worked with him much of the time, and was a partner with him in the mill and grain business.

The reputation of this witness, as well as that of all who testify, is admitted to be of the best.

The Adjutant-General reports that he was discharged January 6, 1865, and that he was then "present, sick." Amos Nevins, who knew him from his boyhood, says he was sound prior to enlistment, and that he was never well after he returned from the Army.

The long and faithful service of Captain Ham, his serious disability from the wound and disease due to his military service, as well as the opinions of the attending physicians, afford your committee ample justification in returning the bill with the recommendation that it do pass.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MARGARET M. HATCH.

Mr. LAWLER. I ask consideration of the bill (H. R. 5751) for the relief of Margaret M. Hatch.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension law, the name of Margaret M. Hatch, mother of William E. Hatch, deceased, formerly of Company B, Seventh New York Heavy Artillery.

The report (by Mr. LANE) was read, as follows:

The Committee on Invalid Pensions, to whom was referred House bill 5751, submit the following report:

The claim of Margaret M. Hatch, mother of William E. Hatch, deceased, formerly of Companies A and B, Seventh New York Heavy Artillery, for mother's pension, No. 264917, was rejected January 7, 1884, for the reason that there was no record or other evidence showing that the soldier's fatal disease, hemorrhage of the lungs, was owing to his army service, and claimant is unable to furnish such proof.

The testimony on file in the War Office and Pension Office shows that soldier received a gunshot wound of shoulder and chest in the battle of Cold Harbor, in June, 1864, for which he was sent to the hospital, and that afterward he had partially recovered and returned to his regiment, and that he was discharged with his regiment in 18 5.

The mother claims that the wound of shoulder and chest affected soldier's lungs, and that he had lung trouble at the date of his discharge and continuously to the date of his death. Soldier died in Buffalo, N. Y., of hemorrhage of the lungs, October 27, 1867.

Dr. Thorn, the family physician, who treated soldier immediately after his return home and thereafter, is dead.

The mother says the doctor told her, when her son first returned home after discharge, that the ball had taken a downward course in the chest, and would be apt to cause hemorrhage of the lungs, which proved in the end to be true.

Claimant's husband, the father of the soldier, was a dissipated man, and died in 1878. She is now old, about seventy-eight years of age, and feeble and unable to support herself; has no real estate, and but little personal property, and no one legally bound to support her.

The record further shows that the soldier was a sound man when he enlisted; that he was in the hospital for treatment from June to August, 1864, after receiving the said wound, and that the ball remained in the body, and Dr. Thorn said, when the soldier first returned home, that the ball had taken a downward course in the chest, and the soldier died October 27, 1867, of hemorrhage of the lungs, as the coroner's inquest shows; and an equitable construction of the testimony shows that the soldier died from the injury received in battle.

The committee therefore recommend that the bill do pass.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

WILLIAM A. MATHES.

Mr. KILGORE. I call up for consideration the bill (H. R. 8521) for the relief of William A. Mathes. I call it up for Colonel MATSON, the next governor of Indiana. [Laughter and applause.]

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, instructed to place the name of William A. Mathes, late of Company B, Eighteenth Regiment Volunteer Infantry, on the pension-roll, subject to the conditions and limitations of the pension laws.

The report (by Mr. MATSON) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 8521) for the relief of William A. Mathes, having considered the same, beg leave to submit the following report:

This soldier is pensioned at $30 per month for loss of right arm, as provided by the general law. The next highest rate fixed by law is $50, which is for a condition of total helplessness, requiring the regular aid and attendance of another person. He has been examined, and a board of surgeons recently determined that he was not in that condition, but it was shown by that examination that he had another wound on the remaining hand that greatly disables it, so that he nearly approaches the condition of helplessness.

This wound of left hand was received in battle at the same time the wound of right arm was received, and for the two disabilities it is the judgment of the committee that he should receive a pension of $45 per month; and they therefore ask that said bill do pass, with the following amendments:

In line 4, strike out the words "place the name" and insert instead the words "increase the pension," and strike out all after the word "regiment," in line 5, and add these words: "Indiana Volunteers, to $45 per month, in lieu of the pension now paid him."

The amendments offered by the committee were agreed to, and the bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

SARAH C. TAYLOR.

Mr. LAFFOON. I ask consideration of the bill (S. 1482) granting a pension to Sarah C. Taylor.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Sarah C. Taylor, a volunteer nurse in the Army during the war of the rebellion, and pay her a pension of $25 a month, during life, from and after the passage of this act.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1482) granting a pension to Sarah C. Taylor, submit the following report:

The Committee on Pensions in the Senate submitted a report which, upon a careful examination of the papers in the case, your committee find to contain a clear statement of the case, and they thereupon recommend the passage of the bill with an amendment striking out "twenty-five," in line 6, and inserting "twelve."

"[Senate Report No. 962, Fiftieth Congress, first session.]

"The Committee on Pensions, to whom was referred the bill (S. 1482) granting a pension to Sarah C. Taylor, have examined the same and report:

"That the claimant was a volunteer Army nurse in the military hospitals of the Government during the war of the rebellion. She entered the service October 15, 1862, and as appears from the sworn statement of Dr. Thurston, assistant surgeon, United States Army, she remained in the service three years, until the close of the war.

"It appears from the evidence that she was a faithful, valuable, and efficient nurse during all this period, and that her services were much needed and highly appreciated. Considering the nature of these services, the laborious details of attention and attendance upon the sick and wounded soldiers of the Government, the care and anxiety incident to an employment so kind, so beneficent in its objects, we do not hesitate to say that such a woman has earned the right to recognition and compensation very nearly, if not equivalent, to that accrued by service in the field for the same period."

We therefore recommend the passage of the bill, more especially as she is now over sixty years of age and without means of support.

The amendment proposed by the committee was agreed to, and the bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

WILLIAM SMITH.

Mr. LYMAN. I ask consideration of the bill (S. 1926) granting a pension to William Smith.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, at the rate of $45 per month, subject to the provisions and limitations of the pension laws, the name of William Smith, late a private in Company H, Ninety-third Pennsylvania Volunteers, this act to take effect from its passage, and the pension hereby granted to be in lieu of that which he is now receiving.

The report (by Mr. LYNCH) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1926) granting a pension to William Smith, have had the same under consideration and respectfully report:

William Smith enlisted as a private in Company H, Ninety-third Pennsylvania Volunteers, January 1, 1864; discharged June 14, 1865, on surgeon's certificate of disability because of "amputation of left leg, upper third, for gunshot wound received at Fisher's Hill, Va., October 22, 1864." He was pensioned August 18, 1865, at $8 per month, on account of amputation of left leg. Said pension has been increased from time to time. Claimant now receives $30 per month.

From the papers on file in the Bureau of Pensions it is apparent that the claimant suffers intense neuralgic pain from the stump of his leg; that he is frequently compelled to discard his artificial limb, owing to severe suffering from its use; that his general health is very poor from general debility, and that he is unable to perform manual labor to any extent.

In addition to the loss of his left leg below the knee, he suffered, not long ago, a comminuted fracture of the thigh of the same leg by an accident.

Your committee recommend that the bill be amended by striking out the word "fifty" and inserting the word "fifty-five" in fifth line of the bill, and that it be passed as amended.

Mr. MORRILL. I think the recommendation to strike out "fifty" and insert "fifty-five," which would be contrary to the rules of the committee, is an error.

Mr. LYMAN. The bill proposes to grant a pension at $45 and the recommendation seems to be an error. The Senate bill fixes the pension at $45. I think there should be no amendment offered at all. The Senate bill is just as the committee recommended that it should be passed.

The CHAIRMAN. The bill as printed fixes the pension at $45.

Mr. LYMAN. The amendment proposed in the report is certainly a mistake.

The amendment was disagreed to, and the bill was laid aside to be reported to the House with the recommendation that it do pass.

W. J. TAPP & CO.

Mr. MARTIN. I ask consideration of the bill (H. R. 332) for the relief of W. J. Tapp & Co.

The bill was read for information.

Mr. MORRILL. I raise the point of order that that does not come under the order for Friday evening sessions.

The CHAIRMAN. The Chair understands the order for Friday evening sessions restricts the House to the consideration of bills reported by the Committee on Pensions and Committee on Invalid Pensions. This seems to be a bill reported by the Committee on Claims, and the Chair sustains the point of order.

Mr. MARTIN. I will withdraw that bill.

There was no objection.

DAVID HEINBACH.

Mr. MARTIN. I ask consideration of the bill (S. 1219) granting a pension to David Heinbach.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of David Heinbach, Company G, One hundred and seventy-third Pennsylvania Volunteers.

The report (by Mr. THOMPSON, of Ohio) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1219) granting a pension to David Heinbach, having considered the same report as follows:

The committee adopt and make part hereof the report of the Senate Committee on Pensions, and recommend the passage of the bill. The Senate report is as follows:

[Senate Report No. 462, Fiftieth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 1219) granting a pension to David Heinbach, have examined the same and report:

This claimant enlisted in Company G, One hundred and seventy-third Pennsylvania Militia, November 2, 1862, and was mustered out August 18, 1863. He claimed pension for a rupture caused by falling from a bridge which he was assisting to build over Goose Creek, Virginia, August 1, 1863. He received no hospital treatment, as he swears his captain, who was also a physician, treated him. His claim was rejected by the Pension Office because he could not obtain evidence that he received the injury in the service. There is ample evidence that the rupture did not exist at the time of enlistment, and that it does exist now, but the claimant swears that he is unable to furnish the evidence required by the Pension Office by reason of the death of his captain and the only two of his comrades who knew and could testify to the facts.

Your committee are of opinion that this is a meritorious case, and recommend that the bill do pass.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MARY M. ORD.

Mr. McKENNA. I ask consideration of the bill (S. 2663) granting an increase of pension to Mary M. Ord.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mrs. Mary M. Ord, widow of the late General E. O. C. Ord, and to pay her a pension at the rate of $100 per month, in lieu of the pension she is now receiving.

The report (by Mr. SAWYER) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 2663) granting an increase of pension to Mrs. Mary M. Ord, have had the same under consideration and beg leave to submit the following report:

The beneficiary named in the bill is the widow of the late Maj. Gen. E. O. C. Ord.

Upon the death of General Ord the following order was issued by the War Department:

"HEADQUARTERS OF THE ARMY,
"ADJUTANT-GENERAL'S OFFICE,
"*Washington, July 24, 1883.*

"With profound sorrow the General of the Army announces the death, at Havana, Cuba, at 7 o'clock on the evening of the 22d instant, of Maj. Gen. Edward O. C. Ord, retired, and lately brigadier-general and brevet major-general on the active-list.

"General Ord was graduated at the Military Academy and appointed second lieutenant in the Third Artillery July 1, 1839. Having passed through the several grades, including that of lieutenant-colonel in the artillery arm, he received his appointment as brigadier-general of the permanent establishment on the 26th of July, 1866. He had, on the 14th of September, 1861, for service in war, been appointed brigadier-general of volunteers, and on the 2d of May, 1862, major-general of volunteers. He was mustered out of the volunteer service September 1, 1866.

"For gallant services in action at Dranesville, Va., Iuka, Miss., the Hatchie, Miss., and at the assault of Fort Harrison, Va., he received, successively, the brevets of lieutenant-colonel, colonel, brigadier-general, and major-general, United States Army. He served in the Florida war against the Seminole Indians, on the Pacific coast in the war against Mexico, and in Indian campaigns on the same coast.

"In the Army of the Potomac he was brigade and division commander; in the Army of the Tennessee he commanded the left wing from August to September, 1862, and subsequently he commanded, successively, the Thirteenth, Eighth, Eighteenth, and Twenty-fourth Corps, and the Army of the James. He was severely wounded in the battle of the Hatchie, Miss., and was wounded in the assault and capture of Fort Harrison, Va.

"Since the late war he has at different times commanded the Departments of Virginia, the Ohio, Arkansas, California, the Platte, Texas, and the Fourth Military District.

"He was retired on the 6th day of December, 1880, and by act of Congress approved January 28, 1881, he became a major-general on the retired-list. Retirement did not close his active life, for immediately thereafter he engaged in civil pursuits and continued therein until death suddenly came upon him.

"Distinguished among his country's defenders, General Ord was a soldier of national repute. Through his long military service, reaching towards half a century, his career has been marked by faithful, devoted, and intelligent discharge of duty, by personal gallantry, by honest administration, and by a firmness which was not weakened by his great kindness of heart. As his intimate associate since boyhood, the general here bears testimony of him that a more unselfish, manly, and patriotic person never lived.

"By command of General Sherman.

"GEO. D. RUGGLES,
"*Acting Adjutant-General.*"

Mrs. Ord is now in receipt of a pension of $50 per month, under act of Congress, approved July 5, 1884. She was married to General Ord October 15, 1854, at San Francisco, Cal., and is now a resident of that State. Having exhausted her limited means in support of an invalid daughter, she is now poor and not able to maintain herself and daughter, who is dependent upon her, on present pension, which is her only resource.

In view of her dependence and the long and eminent services of her gallant husband, your committee report favorably on the accompanying bill, and ask that it do pass, amending the same by striking out the words "one hundred" and inserting in lieu thereof the words "seventy-five."

The amendment recommended by the committee was agreed to, and the bill as amended was ordered to be laid aside to be reported to the House with the recommendation that it do pass.

NANCY POLOCK.

Mr. MOFFITT. I ask consideration of the bill (S. 2567) granting a pension to Nancy Polock.

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Nancy Polock, widow of W. A. Polock, late of Company C, First Nebraska Volunteers.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 2567) granting a pension to Nancy Polock, submit the following report:

The report of the Committee on Pensions in the Senate sets forth fully the facts in this case and is herewith adopted, and the passage of the bill recommended.

SENATE REPORT.

William A. Polock, the late soldier, was a second lieutenant in Company C, First Nebraska Volunteer Infantry, from April 30, 1863, to October 3, 1865. He was pensioned at the rate of $6 per month from October 4, 1865, to March 30, 1882, the date of his death, on account of rheumatism contracted in the service. Application of Nancy Polock, widow of said soldier, was filed August 23, 1882, and rejected August 30, 1885, on the ground th t the soldier's fatal disease of kidneys was not a result of the rheumatism for which he was pensioned.

The records of the War Department show that the above-mentioned soldier contracted rheumatism in the service, and the evidence in the case shows that the said disability continued to the time of his death. He also had varicose veins of right leg, said to have resulted from rheumatism.

In her affidavit, filed May 5, 1885, claimant states that it is impossible for her to furnish medical evidence showing the pathological connection between the rheumatism for which her late husband was pensioned and the chronic diarrhea from which he died, because he never allowed physicians to attend him, and he was attended by no doctor during his last sickness. In affidavit filed June 18, 1885, claimant states that two years prior to soldier's death he suffered from dropsy in his back and right leg, and affection of the kidneys, causing swelling of his hands, arms, and lower extremities; that his heart was also affected as a result of rheumatism.

In affidavit filed April 23, 1883, Moses M. Conner, of Brownville, Nebr., testifies that he waited on the late soldier for eight days next preceding his death, and is satisfied that he died from dropsy, a result of rheumatism.

In affidavit filed April 23, 1883, Dr. Charles F. Stewart, of Brownville, Nebr., testifies that he has been a practicing physician for twenty years; that he was called to see the late soldier about fifteen hours before his death, which was caused from dropsy; that he found upon examination a large ulcer upon right leg, which he supposed to be a varicose vein; that he was informed by soldier's family that no physician had been employed in the case.

In a letter filed May 19, 1885, Dr. Stewart states that he found the soldier in a dying condition when he arrived at his bedside, and consequently made but a casual examination of him; that having never seen the soldier professionally before, it is impossible for him to say what pathological connection there might have existed between his rheumatism and dropsy.

In affidavit filed December 21, 1885, Dr. Alfred Crane, of Brownville, Nebr., testifies that claimant suffered two years prior to his death from a kidney complaint caused by a varicose ulcer, chronic diarrhea, and rheumatism.

In an affidavit filed September 27, 1887, Paul H. Douglas, of Brownville, Nebr., testifies that soldier's former wife died September 3, 1854, and his testimony is corroborated by Moses M. Conner, of Brownville, Nebr.

The marriage of claimant to soldier is certified to be a transcript from the record of Scott County, Illinois.

There are now minor children surviving the late soldier.

John M. Thayer, governor of Nebraska; Thomas J. Majors, state senator; Wilson E. Majors; J. H. Bradley, district judge; F. E. Johnson; S. M. Rich, mayor of Brownville; R. T. Rainey, postmaster; Theodore Hill, and others, in a petition dated February 3, 1888, state that the soldier died March 30, 1882, from the effects

of chronic diarrhea and muscular rheumatism, contracted in the service, and that his widow, Mrs. Nancy Polock, is now in very indigent circumstances.

The facts in the case warrant favorable action, and your committee therefore report a bill and recommend the passage of the same.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

EASTER A. JACKSON.

Mr. MORRILL. I ask consideration of the bill (S. 3241) granting a pension to Easter A. Jackson. The report is quite lengthy, and I ask unanimous consent that the reading of the report be dispensed with.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and directed to place upon the pension-roll, subject to the provisions and limitations of the general pension laws, the name of Easter A. Jackson, widow of Moses H. Jackson, Company D, First Tennessee Mounted Infantry.

There was no objection, and the reading of the report was dispensed with.

The report (by Mr. MORRILL) is as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 3241) granting a pension to Easter A. Jackson, having had the same under consideration, submit the following report:

The report of the Senate Committee on Pensions is herewith adopted, and the passage of the bill recommended.

[Senate Report No. 1832, Fiftieth Congress, first session.]

This bill proposes to place upon the pension-roll the name of Easter A. Jackson, widow of Moses H. Jackson, deceased.

Moses H. Jackson enlisted August 20, 1863, in Company D, First Regiment Tennessee Mounted Infantry, and was discharged April 25, 1865.

On June 29, 1880, he made application for a pension, alleging in his declaration "that whilst in line of duty near Celina, Tenn., about the middle of August, 1864, he was badly injured in right knee and leg, also in back and hips, by his horse falling with him while on a scout near Celina, Tenn."

Before this claim was adjudicated by the Commissioner of Pensions the soldier died, and his widow, the claimant, made application for pension, which application the Commissioner, under date of October 14, 1887, rejected "on the ground that the special examinations fail to show that the fatal disease was due to the soldier's military service in line of duty."

Prior to the death of the soldier he had submitted, in support of his claim, the affidavit of James Beatty, a comrade, who swears to origin and continuance of the disabilities as alleged by the soldier. This is fully corroborated by the affidavit of Comrade F. M. Smith.

The presence of these comrades is verified by the records of the War Department, and their credibility established by the reports of the postmasters at their respective places. Lieut. W. J. Nornd, in answer to an official letter from the Commissioner of Pensions, says:

"I can say to you that I recollect Sergt. Moses H. Jackson being crippled in the Army, and in the hospital at Granville, Tenn., at the time you say he charges; but I was not with him on the scout when he got hurt."

Lemuel C. Wright, late first lieutenant of Company D, First Tennessee Mounted Infantry, in response to an office letter, says:

"I was present at one time about the middle of August, 1864, when Moses H. Jackson's horse threw him near Celina, Tenn. Myself with Jackson and others were in close pursuit of and shooting at some rebel guerrillas, and in crossing a fence his horse fell and threw him off; I saw him get up, and with some help got on his horse; he complained very much at the time, and appeared to be badly hurt; Jackson was confined from duty for some time by said injury; remained in camp at Granville, Tenn.; he may have been treated by the surgeon; I do not remember, to be certain about that; but the circumstance of the horse falling with him I remember well, and know he was hurt. Jackson was a brave, daring soldier, honest and obedient. He went West soon after the war. I have not seen him since soon after his discharge."

Dr. C. R. Prewitt swears to an acquaintance of nineteen or twenty years, and that in November, 1865, he was called to see him, and found him suffering with his right knee, which was very much swollen and very tender and painful, with an ulcer on the inside, and seemed when probed to run up and under the patella. He was also suffering with partial paralysis of the hips and spinal column. His knee got some better, the ulcer healed before he left Kentucky in the year 1871, but the paralyzed condition of his hips and spinal column grew gradually worse, or at least there was no improvement up to the time he left. He was not really able to perform any manual labor, for whenever he went to the field to work his wife always had to go with him to take care of him, for he would frequently fall in the field and be unable to rise for hours at a time. Visited him twice a week from November, 1865, to March, 1871.

Abundance of evidence is presented showing condition and continuance from 1871 to date of death. It is also shown that the mind of the soldier gave way, and that he was committed to the hospital for the insane at Osawatomie, Kans., June 15, 1881, and that he died in that institution on the 21st day of November, 1881.

As before stated, the claim was rejected, and the widow appealed the case to the honorable Secretary of the Interior, who affirmed the action of the Commissioner of Pensions in rejecting the claim, saying "there is no due proof of the alleged casual connection." It is proper to add that the claim was also examined by special examiners in the field. Mr. George B. Fleming, special examiner, gives the opinion that the claim is of "doubtful merit," and recommends further examination. Wray Beattie recommends rejection.

The testimony taken by Mr. Beattie is rather of a negative character, none of them testifying with any degree of positiveness that the disability was not incurred as alleged. They all remember the soldier well; that he was a stout, able-bodied man at enlistment, and that they have no recollection of his incurring any injury or disability. This is more than offset by the plain, positive, and direct testimony presented by the claimant.

The prior soundness of the soldier is well established; his condition at discharge is shown; his gradual failure of health and constitution presented beyond doubt or question; and from the examination of the case given by your committee, we submit that there is a sequence between paralysis of the spinal column and the lower limbs and the insanity which caused the death of the soldier, and recommend the passage of the bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

PHILLIPE RAY.

Mr. O'NEILL, of Pennsylvania. I call up the bill (S. 1614) granting a pension to Phillipe Ray.

The bill was read, as follows:

Be it enacted, etc., That the Secretery of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Phillipe Ray, late of Company B, First New Jersey Cavalry, in the war of the rebellion.

The report (by Mr. LYNCH) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1614) granting a pension to Phillipe Ray, have considered the same and adopt and submit the Senate report, which is as follows:

Phillipe Ray, the claimant, was enrolled and mustered on the 20th day of August, 1861, as sergeant of Company E, First New Jersey Cavalry; was early in 1862 reduced to the ranks and transferred to Company B, where he was made a corporal; was captured by the enemy at Harrisonburgh, Va., June 6, 1862, and is borne as a prisoner upon the regimental rolls for May, June, July, and August of that year. At a date not of record he was returned as a paroled prisoner to Camp Parole, Annapolis, Md., and thence transferred to a Washington hospital September 22, 1862. He rejoined his regiment, re-enlisted at the expiration of his term of service, and was discharged as corporal Company B July 24, 1865. A pension is claimed for disabilities originating in exposure while a prisoner at Belle Isle and Lynchburgh, Va. His application was filed originally in 1869, and relinquished by his attorney in 1871, with the avowal that the evidence required by the Commissioner of Pensions could not be furnished. The case was afterward reopened upon the personal application of the claimant, and on June 17, 1887, was finally disposed of adversely by the Assistant Secretary of the Interior, who said in his letter dismissing it that the claimant was no doubt a good soldier, and may have contracted the disability in the service, but that he had failed signally to prove it by the scanty evidence adduced.

The evidence submitted to the committee consists of a certificate of ex-Surgeon Rulett, of the First New Jersey Cavalry, and an affidavit of M. Hutchinson, as to the sound health of the claimant at enrollment, and affidavits of Mrs. E. Beech and Mrs. C. Hornby, that he was suffering in 1873 from kidney disease, which he said was contracted while in the United States service. The medical examiners to whom his case was committed reported his disability from diabetes at one-fourth of total, and permanent, and that in their belief it originated in the service in line of his duty. Ray himself testifies that it had its origin in a severe cold contracted on account of want of shelter while a prisoner, and that his health improved after his return to his regiment, but that during "Burnside's mud march," in January, 1863, he suffered a relapse, since which this disease has been continuous. He accounts for the impossibility of securing favorable testimony from his comrades by stating that he was desirous of promotion which would have been difficult if his physical condition was known.

Your committee, in consideration of the long service of this soldier, his disabled condition, and the possibility and fair probability that his statement is true, report back his petition with the accompanying bill and recommend its passage.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

CHARLES E. SCOTT.

Mr. PETERS. I call up the bill (H. R. 4887) granting a pension to Charles E. Scott.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Charles E. Scott, late a private in Company G, Twenty-third Illinois Infantry Volunteers.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 4887) granting a pension to Charles E. Scott, submit the following report:

The soldier was a corporal in Company G, Twenty-third Illinois Volunteers. In his application for pension he alleges that he contracted camp itch near Richmond, Va., about July 1, 1865, which resulted in loss of eyesight. The origin of disability is clearly proven by the affidavits of Lieut. Horace J. Mack, and by a comrade, J. S. Collister, and its existence and continuance by abundant lay testimony. The claim was rejected on the ground of claimant's inability to furnish satisfactory evidence that his loss of sight was the result of the disability contracted in the service.

It appears from the evidence that the soldier was a great sufferer from the disease contracted in the service, and was continuously treated for the same until the year 1871, when he became totally blind and remained so for about three years, when his sight was partially restored. The medical referee of the Pension Office decides that the loss of sight could not be accepted as the result of the disease contracted, but says that if it was scorbutus and not camp itch with which the soldier was afflicted in the service that it might be admitted. Dr. E. Williams, who treated him in 1872 and 1873, and who is also a medical examiner of the Pension Bureau, describes his case fully and says: "I can not feel justified that it was the result of exposure or hardships of army service."

The examining board at Wellington, Kans., reported August 31 describing his condition, and added: "Do not find any indication of venereal disease; probable cause of impaired sight retinal hemorrhage." They rate him at total second grade.

Your committee are unable to decide positively that the disease contracted in the service was the cause of the impaired vision, and even the medical authorities are in doubt about it. They seem unwilling to say that it might not have been, while they declare their inability to accept it as a positive result. The claimant is helpless and destitute.

Your committee, after a careful examination of all the evidence, recommend the passage of the bill.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

JEMIMA STERLING.

Mr. POST. I call up the bill (H. R. 4648) granting a pension to Jemima Sterling.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Jemima Sterling, mother of James Goldsmith, deceased, late of Company I, One hundred and third Illinois Volunteers.

The report (by Mr. LANE) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 4648) granting a pension to Jemima Sterling, have had the same under consideration, and beg leave to submit the following report:

The proposed beneficiary is the mother of James Goldsmith, who was killed in battle near Kenesaw Mountain, June 15, 1864, while serving as private of Company I, One hundred and third Regiment Illinois Volunteers. Her claim for pension has been rejected on the ground that the soldier left surviving him a widow and minor child. The widow remarried August 11, 1864, and the minor drew pension during pensionable minority. There is, therefore, no one now

drawing pension or entitled to draw pension on account of the death of the aforesaid soldier.

Because of the debarment of the mother from the benefits of the general pension laws, for the reason above stated, the Pension Bureau deemed it unnecessary to call for the requisite evidence as to dependence past and present. But sufficient testimony has been filed showing that the mother was dependent upon the son prior to and at date of his death because of her husband's physical condition, he being totally blind, and that her condition has not since improved.

Being now seventy-four years of age, she is unable to gain a subsistence by her own efforts, and consequently dependent upon others for support.

Congress having always liberally responded to the calls for relief of this unfortunate class, and being fully impressed with the merits of the case under consideration, your committee return the accompanying bill, with the recommendation that it do pass.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

ELI J. YAMGHEIM.

Mr. RYAN. I call up the bill (H. R. 2236) granting a pension to Eli J. Yamgheim.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Eli J. Yamgheim, late of Company A, Sixth Regiment of Kansas Cavalry.

The report (by Mr. MORRILL) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 2236) granting a pension to Eli J. Yamgheim, submit the following report:

The claimant in this case enlisted August 1, 1861, in Company A, Sixth Kansas Cavalry, and was discharged November 15, 1864. He filed his declaration for pension April 5, 1875, alleging that he was struck by a spent ball on the left ankle, causing lameness. Jacob A. Heany, Jacob H. Bartles, and Alfred N. Jerrold all testify to the incurrence of the injury. There is abundant evidence to show that it continued to the present time. The examining surgeon at Emporia reported July 27, 1875, and January 9, 1878, that he found him totally disabled. Examining board at Emporia, March 7, 1883, make the same report. On the other hand it is shown that the soldier had suffered from a fever-sore on the same leg prior to enlistment. The fact still remains that the man was sufficiently strong and able-bodied to be accepted in the service; that he served his country faithfully for three years and two months; that he received an injury from which he has suffered ever since, and that now he is disabled.

It is highly probable that if he had never suffered prior to enlistment from the fever-sore of the leg, or that some comrade who was perfectly sound had received the same injury, that no serious result would have followed from it. It is equally probable that if the soldier had not received the injury in the service that he might have gone through life comparatively well. It seems to your committee hardly honorable for the United States Government, after accepting this man in the service and receiving the benefit of his service for over three years, during which time he was frequently exposed to the dangers of the battle-field and suffered all the hardships and privations of army life, to plead now that he was not sound before enlistment, and therefore not entitled to a pension.

Your committee therefore recommend the passage of this bill.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

SYLVESTER STEARNS.

Mr. SENEY. I desire to call up the bill (H. R. 7516) to increase the pension of Sylvester Stearns. This bill passed the House several sessions ago. The claimant is upon the roll at $36 a month, and the bill before the House was for the purpose of raising the pension from $36 to $50 a month. The report of the House committee was made under the impression that the claimant was then a pensioner at $24 a month, and the amount in the original bill was changed from $50 to $36 a month. Subsequently it was ascertained that the claimant was already on the pension-roll at $36 a month, and the Senate amended the House bill so as to change the sum from $36 to $50, and the matter is now before the House upon the amendment of the Senate.

The CHAIRMAN. Is the bill which the gentleman calls up a Senate bill?

Mr. SENEY. It is a Senate amendment to the House bill, and I suppose the proper motion is to concur in the Senate amendment.

The CHAIRMAN. The Chair is informed that the bill is not upon the Calendar, and perhaps it had better be passed over temporarily.

Mr. SENEY. Well, I desire that it shall be acted upon without further delay, because it was acted upon by the Senate two or three weeks ago.

Mr. MORRILL. I suggest to the gentleman from Ohio [Mr. SENEY] that the proper time to take up that bill will be after the committee rises and we go into the House. The Committee of the Whole can not act upon a matter of that kind.

Mr. SENEY. What is the difficulty in the way of the Committee of the Whole acting upon the Senate amendment to the House bill?

Mr. MORRILL. The House acts upon Senate amendments without any action of the Committee of the Whole. Such action is quite unnecessary.

The CHAIRMAN. Upon the suggestion made by the gentleman from Kansas [Mr. MORRILL], the opinion of the present occupant of the chair is that a question of that kind does not properly come into Committee of the Whole, but must be acted upon by the House. If the House concurs in the Senate amendment, then there is nothing for the committee to do.

Mr. SENEY. Well, I do not care how we get at it, but I do not wish to lose my opportunity to call up the bill.

The CHAIRMAN. The Clerk informs the Chair that the bill called up by the gentleman from Ohio came back from the Senate with an amendment, that the bill and amendment were referred to the Committee on Invalid Pensions, and that the bill has not yet been reported back from the committee, so that it is not upon the Private Calendar, nor is it, at the present time, within reach of the House. At any rate it can not be disposed of at this time.

Mr. SENEY. I did not suppose that an amendment of the Senate would have to be referred to the Pension Committee of the House.

The CHAIRMAN. That depends entirely upon the action which was taken in the House at the time. Whatever that action was, the Committee of the Whole can not interfere with it, and as a matter of fact the Clerk informs the Chair that the bill and amendment were so referred.

Mr. SENEY. I can hardly think that any action has been taken by the House in this case since the Senate amended the House bill. I do not know who would call up the bill except myself.

The CHAIRMAN. The Chair is informed by the Clerk that when the bill was returned from the Senate with amendments, it was formally laid before the House and was referred, with the amendments, to the Committee on Invalid Pensions, from which it has not yet been reported back to the House.

Mr. SENEY. Well, so that I do not lose my right to call it up for consideration when we get into the House, I shall be content.

The CHAIRMAN. The Chair is of opinion, in accordance with the suggestion of the gentleman from Kansas [Mr. MORRILL], that the bill can not be acted upon in Committee of the Whole this evening.

Mr. SENEY. But I do not understand that I am to lose my right to have the bill considered.

The CHAIRMAN. No; but the bill is not in Committee of the Whole.

MARTHA J. COLE.

Mr. SMITH, of Wisconsin. I call up the bill (S. 3230) granting a pension to Martha J. Cole.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Martha J. Cole, mother of Robert E. Horner, late a second lieutenant in the Twenty-seventh Regiment Wisconsin Volunteers.

The report (by Mr. SAWYER) was read, as follows:

From a careful consideration of the facts set forth in the Senate report in this case, which is made a part of this report, the committee believe that this is a meritorious case and comes within the line of precedents heretofore adopted by this committee and recognized by this House, and they therefore recommend that the bill do pass.

SENATE REPORT.

This is a bill to pension Martha J. Cole, mother of Robert Horner, late second lieutenant of Company G, Twenty-seventh Regiment Wisconsin Volunteers.

The claimant was pensioned as dependent mother of Robert Horner and drew her pension until her remarriage. She applied to the Pension Office to be restored after the death of her second husband, but her application could not be allowed by law, which provides that pension shall cease at the date of remarriage of the pensioner.

The only question before the committee is whether or not this is a proper case to be relieved by special enactment. The widow is now nearly seventy years old; she is poor, and disabled by age and other infirmities from making any exertion for her support. Two of her sons were in the service and both died from diseases contracted in the line of duty. Thus she is left without means of support and with the alternative of starvation or the almshouse. The committee does not think that the mother of two soldiers whose lives were sacrificed in Army service and who has seen much better days should become an object of charity so long as the Government has the right to extend to her the small relief she requires.

Therefore the bill is reported favorably, with a recommendation that it do pass.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

LEOPOLD MAYER.

Mr. STONE, of Kentucky. I ask the consideration of the bill (S. 619) granting an increase of pension to Leopold Mayer.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Leopold Mayer, late captain of Company C, Twelfth Regiment Pennsylvania Volunteers, and pay him a pension at the rate of $25 per month, in lieu of the pension he is now receiving.

The report (by Mr. LANE) was read, as follows:

The Committee on Invalid Pensions, to whom was referred Senate bill 619, beg leave to report, adopting the report of the Senate, and in consideration of the facts of the case recommend that said bill do pass.

[Senate Report No. 370, Fiftieth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 619) granting an increase of pension to Leopold Mayer, have examined the same, and report:

Claimant was mustered into the service of the United States as first lieutenant Company C, Twelfth Pennsylvania Volunteer Cavalry, to date February 3, 1862, and was mustered out and honorably discharged March 25, 1865; was a prisoner of war from June 15, 1863, till and after May 7, 1864.

The applicant was granted a pension of $4.25 per month, commencing March 26, 1865, on account of rheumatism. Application for increase of pension was rejected on medical grounds July 3, 1886. In his application for increase of pension, filed December 14, 1885, he claims that he is entitled to a higher rating on the ground that for months at a time he is rendered wholly unable to do any manual labor on account of said disability, and this has been his condition each year since the date of his discharge from the service.

Dr. Emil Fischer testifies that he treated claimant from 1864 to 1866 for mus-

cular rheumatism of the right arm and shoulder, so aggravated as to disable him for work. Dr. H. B. Livermore testifies to treatment for rheumatism from 1864 to 1887. Dr. Maunheimer testifies that claimant was under his treatment for rheumatism from 1873 to 1880, and during that time was unable to perform any physical work. Dr. A. S. Munsell testifies that claimant was under his treatment for chronic rheumatism in 1878, and was a great sufferer from said cause in 1880. Dr. Justin Hayes testifies that he treated claimant for rheumatism in 1880.

The board of surgeons at Chicago, Ill., state that the testimony of claimant's physicians is entitled to the fullest consideration.

From all the facts in the case your committee are satisfied that claimant is entitled to a higher rate of pension than he is now receiving, and therefore recommend the passage of the bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

JONATHAN C. HARRISON.

Mr. JOSEPH D. TAYLOR. I call up the bill (H. R. 7887) granting an increase of pension to Jonathan C. Harrison.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, at the rate of $36 per month, the name of Jonathan C. Harrison, late a private in Company B, Fifty-second Ohio Volunteers.

The report (by Mr. THOMPSON, of Ohio) was read, as follows:

Jonathan C. Harrison enlisted in Company B, Fifty-second Ohio Volunteers, August 4, 1862, and served in said regiment until his discharge, by reason of wound in right arm, on the 31st day of August, 1864. His discharge states that he was wounded at Resaca, Ga., in the right arm, requiring amputation. The United States surgeon attaches to the discharge a certificate in which are found these words: "Find him incapable of performing the duties of a soldier because of amputation of the right arm below the elbow on account of gunshot wound. Disability total." The United States examining surgeon certifies "that the amputation was performed through right arm just below the elbow."

Dr. C. W. Clancey and Dr. J. B. Conaway, of Smithfield, Ohio, certify that the arm is amputated so near the elbow as to render the stump entirely useless, and that it is so short as to prevent soldier from wearing an artificial limb. Claimant is now drawing a pension of $30 per month, and he asks for an increase of $6 per month, or the same pension that is allowed to soldiers who have an arm amputated at or above the elbow. When the law passed giving soldiers who had a limb amputated below the elbow or knee $24 per month, claimant had an increase allowed him of $6 per month by a special act of Congress on March 3, 1885. He now asks that his pension be increased to $36 per month, and your committee are of the opinion that the claim is a meritorious one and recommend that the bill do pass, as his disability is fully equal to an amputation at or above the elbow, as is clearly shown, not only by the evidence, but by a photograph found among the papers.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

WILLIAM E. PRINCE.

Mr. TURNER, of Kansas. I call up the bill (H. R. 3608) to grant an increase of pension to William E. Prince.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and hereby directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of William E. Prince, late a private of Company I, Twenty-third Regiment of Missouri Volunteer Infantry, at the rate of $50 per month, in lieu of the pension he is now receiving.

The report (by Mr. MORRILL) was read, as follows:

The claimant in this case is now receiving a pension of $30 per month for disease of the heart, totally incapacitating him from performing any manual labor. This is the highest rate that can be granted by the Pension Office until it is shown that he requires the constant aid and attendance of another person, there being no intermediate rating between $30 and $50 for cases of this character. The evidence is very clear that much of the time he requires the constant attention of another. Your committee feel that an increase ought to be granted, and therefore recommend the passage of the bill with an amendment, striking out "fifty" and inserting "forty-five."

The amendment reported by the committee to strike out "fifty" and insert "forty-five" was agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

MRS. CAROLINE TAYLOR.

Mr. VANDEVER. I ask the consideration of the bill (S. 3175) granting a pension to Mrs. Caroline Taylor.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mrs. Caroline Taylor, of Logansport, Ind., widow Dr. J. A. Taylor, a volunteer assistant surgeon to the Indiana troops engaged South in the year 1863 in the war of the rebellion.

The report (by Mr. MATSON) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 3175) granting a pension to Mrs. Caroline Taylor, have examined the papers on file, adopt the report of the Senate hereto attached as the report of this committee, and recommend the passage of the bill.

[Senate Report No. 1709, Fiftieth Congress, first session.]

The Committee on Pensions, to whom was referred the bill granting a pension to Mrs. Caroline Taylor, of Logansport, Ind., have examined the same, and report:

That the applicant is the widow of Dr. James A. Taylor, who died in Logansport, Ind., in October, 1867. The husband was never mustered into the service of the United States, and was never commissioned or appointed to any position in said service; yet as a surgeon he did active and efficient service to the sick and wounded soldiers who were in the Army in the war of 1861.

The facts in the case, from the sworn testimony before the committee, are as follows: In January, 1863, Governor Morton, of Indiana, by telegram, called upon eighteen or twenty physicians and surgeons from different parts of the State to go immediately upon temporary duty as such to the Indiana troops then South. Among the number thus summoned was Dr. James A. Taylor, the husband of the applicant, then in perfect health, engaged in a large professional practice at home, and known as one of the most skillful and careful men in his calling. Dr. Taylor accepted this sudden call by the governor, received a passport to go South, and left his home immediately upon this mission. A copy of the passport, signed by Governor Morton in person, dated January 6, 1863, is now among the proofs filed.

He went south to Vicksburg, to Memphis, and to other points, and upon the transports and vessels spent four weeks in attendance upon the sick and in treating and amputating the wounded. The labor was very severe, owing to the then scarcity of surgical and medical aid. It is shown that he slept during his absence only about four hours in twenty-four; that on one occasion he worked without sleep or rest forty-eight hours continuously. The particulars of his service, its character and efficiency, are proven by the testimony of Dr. John B. Shultz and John G. Meck, and Dr. Asa Coleman, who was one of the party of physicians and surgeons responding to the call of the governor, and who was personally acquainted with Dr. Taylor, testifies that he knew of his service and that he was in command of the volunteer medical corps which went on that occasion to render aid to the Indiana troops.

It appears further from the testimony of his friends and neighbors that Dr. Taylor returned from the expedition much broken in health. He complained of shortness of breath, difficulty of breathing, disturbed action of the heart, and though yet able to do somewhat, was wholly unable thereafter to resume the labors of his former practice. The condition of his health did not improve. About a year after his return from the South he sold out his practice and retired. In 1864, as appears from the testimony of witness Meck and others, he was subjected to very frequent attacks of smothering spells. These compelled him to quit any business he might be engaged in, to spend most of his time on the bed or lounge in a prostrate position. He lost flesh, became pale and emaciated. He had never before his service suffered from any such complaint.

This condition of ill-health continued until the time of his death. He died in one of these smothering spells of what the physicians in attendance during his last illness describe as paralysis of the heart, the first and continuous symptoms of which appear to have sprung from the excessive work, privation, and exposure in his service under the call of the governor aforesaid.

The applicant, his widow, formerly in fair circumstances, is now in reduced circumstances. She was married to the deceased March 19, 1846, and lived with him a faithful wife until his death. She is now advanced in years. She has now no means, money, nor property, nor the expectation thereof. She has no way of subsistence except her own labor, barely sufficient to that end.

The committee believe this to be a meritorious case, and accordingly recommend the passage of the bill herewith reported.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Mr. WHEELER. I would like to call up, if there be no objection, the bill for the relief of Mrs. General Ward B. Burnett. I desire to know whether the gentleman from Indiana [Mr. CHEADLE] will make objection.

Mr. CHEADLE. I have stated so often my position with reference to bills of this character that I should suppose every gentleman would understand me by this time. At any rate the bill to which the gentleman refers is in the House, not in Committee of the Whole, and could not be considered now.

SARAH E. M'NAMARA.

Mr. WHEELER. I will call up, then, the bill (S. 2593) granting a pension to Sarah E. McNamara.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and is hereby, authorized and directed to place upon the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mrs. Sarah E. McNamara, widow of the late John McNamara, D. D., late a chaplain of the Wisconsin Volunteers.

The report (by Mr. MORRILL) was read, as follows:

The report of the Senate Committee on Pensions is adopted and the passage of the bill recommended.

SENATE REPORT.

Claimant is the widow of John McNamara, who was mustered into the service of the United States as chaplain First Regiment Wisconsin Volunteer Infantry, October 8, 1861, and was mustered out of the service October 13, 1864.

The records of the War Department show that he contracted erysipelas of the face and scalp in the service, by reason of which he was granted a leave of absence for twenty days, as a change of climate was thought by the surgeon to be necessary to save his life.

The claim was rejected March 1, 1888, on the ground that the soldier's fatal disease, paralysis, was not a result of the erysipelas of army origin, nor of any other cause shown to be due to his military service.

In her application filed April 13, 1886, claimant states that her late husband died of disease contracted in the service of the United States; that at the battle of Stone River, March 30, 1863, he incurred paralysis, which affected him every year since the date of his discharge from the service, and which finally terminated in his death.

In her affidavit filed November 29, 1886, claimant states that she was married to the late officer on or about November 18, 1852, and that she lived with him as his wife up to the time of his death, October 25, 1885; that previous to his enlistment into the service the said officer was physically sound and in good health; that he contracted erysipelas in the service, from which he never recovered, and that he was mentally and physically disabled for work by reason of said disability; that the disease seemed to have settled in his left eye, causing said eye to become much smaller than the right eye, and that the said disease grew worse all the time until her late husband became almost totally blind, about six months before his death; that she has good reason to believe that the said disability so weakened her late husband's constitution that the paralysis from which he died was superinduced by the erysipelas of army origin.

In affidavit filed November 29, 1886, George R. Bingham, colonel First Wisconsin Volunteer Infantry, testifies that the late officer contracted erysipelas of the face at Murfreesborough, Tenn., in December, 1863, and that the said disease affected his eyes to such an extent that he was compelled to wear colored glasses for a long time after his return from the hospital.

In affidavit filed November 29, 1886, Dr. Luther J. Abbott, of Fremont, Nebr., testifies that he was acquainted with claimant's husband for ten years prior to the time of his death; that he was physically feeble, and his nervous system much deranged on account of an attack of erysipelas of face, scalp, and eyes, which he had in the year 1875; that for a short time preceding his death the late officer had a shock of paralysis, followed by almost total blindness; that he consulted affiant about a week before his death, and always attributed his diseases to exposure during army life.

In affidavit filed November 29, 1886, Dr. N. F. Donaldson, of North Platte, Nebr., testifies that the late officer died from a stroke of paralysis on the right side of his body, October 24, 1885.

It is shown by medical testimony in the claim that the system of claimant's husband was broken down by erysipelas contracted in the service, in consequence of which he was physically unable to rally from a stroke of paralysis, which terminated fatally October 24, 1885.

The grounds of rejection stated by the Bureau of Pensions seem untenable when considered in connection with medical evidence to the effect that the late officer's nervous system was debilitated and greatly deranged by reason of erysipelas shown to be contracted in the service. The facts warrant favorable action, and your committee therefore recommend the passage of the bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

BAKER SAINE.

Mr. YODER. I call up the bill (H. R. 2707) granting a pension to Baker Saine.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Baker Saine, of Fort Seneca, Seneca County, Ohio, late a private in Company K, Forty-ninth Ohio Volunteer Infantry.

The report (by Mr. YODER) was read, as follows:

Baker Seine enlisted September 23, 1861, in Company B, Fifty-fifth Ohio Volunteer Infantry Regiment, and served until March 21, 1862, when he was discharged for disability. Re-enlisted February 22, 1864, in Company K, Forty-ninth Ohio Volunteer Infantry Regiment, and was discharged March 3, 1865, for disability. Filed his declaration for pension October 3, 1879. Alleges in declaration that at Nashville, Tenn., about the 15th of March, 1864, by reason of exposure in an open car, he contracted chronic bronchitis, chronic rheumatism, and that he sustained a further injury in December, 1864, at —— street barracks, Cincinnati, Ohio, by a fall that he had received.

His claim was rejected by the Pension Office for the reason, as set forth in the record of the case, that the record shows that alleged bronchitis existed prior to his enlistment, and that he was unable to prove origin of the alleged injury that he had received in the service. The hospital record and the record in the Adjutant-General's Office, as well as his discharge, conclusively prove existence of the disease, rheumatism and bronchitis, as alleged, in the service, and there is no question as to its continuance since the service, as is shown conclusively by a number of affidavits on file by surgeons, and the only reason for its rejection is given in the certificate of disability for his discharge, where the surgeon alleges that the claimant had been subject to said disease during the winter for a few years prior to his service. But it does not state how or by what evidence he comes to this conclusion. In contradiction to this statement there is an affidavit on file by James A. Norton, a prominent and creditable citizen of his county, who testifies that claimant was sound and able-bodied, free from bronchitis and rheumatism, at and before he entered the service; that he saw claimant in hospital No. 8, Nashville, Tenn., suffering with erysipelas, in March and April, 1864, and inflammatory rheumatism.

Moses Abbot and Matthew T. Lents testify that they knew claimant from 1853 to 1861, prior to his service in the civil war, and that previous to said time his health was good and perfectly sound. C. P. Lee, M. D., testifies that claimant was sound prior to his enlistment in the service, 1861. A. B. Harvey testifies that during the latter part of June, 1864, claimant was home on a furlough, and that he treated him for inflammatory rheumatism at that time; that he was also suffering from chronic bronchitis. There is abundant evidence to prove the continuance of the disease alleged since the service. The examining surgeon, George L. Hodge, at Fostoria, Ohio, on July 15, 1861, states that he had examined claimant:

"That he had a hacking cough and expectoration of thick yellow sputa; throat is red and irritable; has rheumatism in left shoulder and right knee. I find evidence of the injury that he alleged to have received in a fall while in the service at Cincinnati, and that these disabilities disqualify him in the performance of manual labor and entitle him to two-thirds grade or $12 a month pension."

Your committee is informed by Hon. George E. Seine, who is personally acquainted with claimant, that he is helpless and in destitute circumstances, and that if it were not for an aged sister who provides for him he would have to go to the poor-house; that it will only be a question of a short time unless he is granted aid by this bill before he will have to depend upon public charity for his subsistence.

In view of the testimony of the creditable witnesses, who are men of high standing in the community where they live, who have testified to his prior soundness, your committee is clearly of the opinion that this aged and disabled soldier should not be deprived of a pension by reason of a statement made by an army surgeon, who had no possible means of knowing his condition prior to enlistment. And after a careful investigation of all the evidence on file, your committee has come to the conclusion that this is a meritorious case, and recommend the passage of the bill.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

WILLIAM E. SPRINGSTEIN.

Mr. MORRILL. I desire to call up for the gentleman from New York [Mr. BACON], and upon his personal request, the bill (H. R. 10199) for the relief of William E. Springstein.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is directed to put on the pension-roll the name of William E. Springstein, of Company G, Fourteenth Regiment of Michigan Volunteers, at the rate of $50 per month.

The report (by Mr. CHIPMAN) was read, as follows:

The claimant was a private in Company G, Fourteenth Regiment Michigan Volunteer Infantry. At the battle of Jonesborough, Ga., he received a wound from a shell fired by the enemy, which caused the loss of his left leg above the ankle (amputation lower third) and a wound in the lower third of his right leg. He is now pensioned at the rate of $30 a month. His stump has never healed and, as testified by Dr. N. W. Welker, of Detroit, who has attended him for a long time, he is during long periods (once eight month) confined to his room by reason of its condition, not being able to wear his artificial leg or even his crutches. The same doctor describes a cicatrix (the result of the wound in his right leg) adherent to the muscles of the calf, causing pain and impairment of motion.

It appears that he is without one leg, lame in the other, and in constant pain from both. He is now receiving $30 per month, as much as the Pension Office can grant unless he requires the constant aid of an attendant. He does not claim to be in so hard a condition as that, but that he is frequently incapacitated from any labor, when his wounds are particularly painful, and that at all times he is a sufferer. He ought to be allowed $45. The committee recommend that the word "fifty" be stricken from the sixth line and the words "forty-five" inserted in lieu thereof, and that the bill as thus amended pass.

The amendment reported by the committee to strike out in the sixth line the word "fifty" and insert "forty-five" was read and agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Mr. YODER. I promised the gentleman from Indiana [Mr. SHIVELY] to call up a bill for him; but when his name was called I was temporarily out of the House. I hope there will be no objection to permitting me now to call up his bill, as the call will no doubt reach all the gentlemen present this evening.

Mr. DINGLEY. The gentleman from Indiana [Mr. SHIVELY] has not been here this evening. Two of my colleagues, who are absent, desired me to call up bills for them, but I supposed it would not be permitted. If this request is to be granted in behalf of the gentleman from Indiana, who is absent, I would like to have the same privilege in behalf of my colleagues.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio [Mr. YODER]?

Mr. CHEADLE. I object, unless the same privilege be extended to this side of the House. I have an earnest request from my colleague, General HOVEY, to call up a bill for him.

Mr. YODER. This very privilege has been granted only a few moments ago to my friend from Kansas [Mr. MORRILL].

Mr. MORRILL. That was an entirely different case. I called up a bill for the gentleman from New York [Mr. BACON], who has occupied the chair all the evening, and could not call up the bill for himself.

Mr. YODER. As there seems to be objection to the proposition, I withdraw it.

FLORIAN LISCHEWSKY.

Mr. BINGHAM. I call up the bill (H. R. 5918) restoring to the pension-roll the name of Florian Lischewsky. This bill is identical with a bill (S. 3083) which has already passed the Senate, but is not, I believe, on our Calendar. If this House bill be favorably acted upon by the Committee of the Whole, I shall ask in the House to substitute for it the Senate bill, identical in its terms.

The bill (H. R. 5918) was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to restore the name of Florian Lischewsky, late a private in Company C, Twenty-ninth Regiment New York Volunteers, to the pension-roll, subject to the provisions and limitations of the pension laws.

The report (by Mr. LYNCH) was read, as follows:

That it appears the said Florian Lischewsky was a private in Company C, Twenty-ninth Regiment of New York Volunteers, having served therein from June 4, 1861, to June 20, 1863, having been discharged for expiration of his term of service; that while in said service and line of his duty in the summer of 1862, from excessive marching he contracted varicose veins of both legs, for which he was granted a pension by certificate No. 133444, May 8, 1875; that he drew his pension for about two years, when it was stopped and his name stricken from the rolls on the report of a special examiner of the Pension Bureau, on the ground, as alleged, that it was not shown that his varicose veins originated in the service; that your committee find that the evidence (which has not been impeached) filed by said soldier in his claim shows that his said disability did originate in said service and line of duty.

Following is a synopsis of the evidence filed by said soldier, both in his claim for the original pension and in his claim for restoration of his pension.

In the original claim for pension, Fritz Decker, second lieutenant of his company, testified that about the 1st of June, 1862, between Fairfax Court-House and Cross Keys, Virginia, the said Lischewsky, from continuous marching for several days in succession, carrying heavy accouterments, contracted varicose veins of his legs, which troubled him afterwards more or less while with the regiment, and existed at the time of his discharge, in June, 1863; that he well remembers him in the service, and that he got his varicose veins of legs as stated; that he knew him before he enlisted, and that he was then sound in his legs.

Dr. Theodore Roth testified that he prescribed for the said soldier off and on from the time of his discharge from the Army, in the summer of 1863, to the present time (March, 1874), for varicose veins of both legs below the knees, and he has been badly affected in his legs with varicose veins, which have disabled him for following his customary labor; that he enjoyed good health before and up to his enlistment; witness was then acquainted with him, and had he had the bad veins of legs then, believes he would have known it; that he was of good and temperate habits.

That in the claim for restoration Dr. George H. Kobler testified that he has been his physician for the past six years, and knows that he has suffered with varicose veins to such an extent as to disable him for doing any manual labor whatever.

Frank Niedel and Lewis Troutwein testified that they knew him from fifteen to seventeen years and ever since September 4, 1875 (the date to which his pension was last paid); have seen him about every day, and they know he has been afflicted with varicose or enlarged veins of his legs, which have disabled him for any kind of manual labor, etc.

William Grossman testified that he was a comrade in his company and regiment, and that from long and excessive marching in the summer of 1862 in said service he contracted varicose veins of his legs, and after the battle of Bull Run (the last of August, 1862) the major, having two horses, took him on one of them on account of his varicose veins. Witness saw his swelled veins in said service and knew him before he enlisted, and he had no swelled veins of legs then; and they were all stripped down and thoroughly examined before they were mustered into said service.

Birghardt Wallenhaupt testified that he and the said Lischewsky enlisted in said company and regiment at the same time, and they were all thoroughly examined and he was accepted in said service as a sound man and was then free from any swelled veins of his legs; that about the summer of 1862, before and after the battle of Bull Run, Virginia, from excessive marching day and night

he contracted varicose or swelled veins of his legs, and he complained afterwards of his weak and sore and swelled veins of his legs, and was not able to do duty all the time; witness and he slept together for some time in said service and he several times showed witness his legs of swelled veins below his knees, and he suffered with them at the time of his discharge in June, 1863.

The committee see no reason to discredit the testimony recited, and therefore believe that said invalid soldier should have his pension restored to him. We therefore report the bill favorably, and recommend its passage.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

Mr. KILGORE. The call of the roll has been entirely gone through with during this evening and I think that is enough. I move, therefore, the committee rise. We have gone through the complete circle and everybody has had a whack.

Mr. DINGLEY. Let me make a suggestion to the House. I have been absent during the call of the roll and have not yet had the benefit of calling up a single bill. There is one Senate bill upon the Calendar which I would like to call up for consideration at this time, and I hope there will be no objection.

Mr. KILGORE. We can give unanimous consent for that purpose.

The CHAIRMAN. Is there objection?

There was no objection.

MARY O. HALL.

Mr. DINGLEY called up for consideration the bill (S. 889) granting a pension to Mary O. Hall.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place the name of Mary O. Hall, widow of Augustus J. Hall, late of Company D, Twelfth Maine Volunteers, on the pension-roll, subject to the limitations of the pension laws.

The report (by Mr. GALLINGER) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 889) granting a pension to Mary O. Hall, having considered the same, beg leave to incorporate the report of the Senate committee as a part of their own report, as follows:

"The soldier, Augustus J. Hall, enlisted November 1, 1861, in Company D, Twelfth Maine Volunteers, and was discharged December 7, 1864. At the time of his death, October 13, 1880, he was pensioned at the rate of $3 a month, for gunshot wound of right arm, near the shoulder. The widow, Mary O. Hall, applied for pension, alleging that her husband died of blood poisoning and other complications arising from the said wound. The case was rejected by the Pension Office, on the ground that the soldier's death was 'in no way due to the gunshot wound.'

"After re-examining the case the medical referee vouchsafed the platitude: 'True pathology can not be divorced from common sense.' The case, on appeal to the Secretary of the Interior, was again rejected as a necessary consequence, since the Secretary did not go beyond the opinion of the medical referee, that the death causes, blood poisoning, heart disease, and dropsy, were not *sequelæ* of the wound.

"The only evidence in the case that tends in any possible way to support this rejection is that of the examining surgeon, who examined soldier July 9, 1870. He states that the soldier appeared well, but complained of pain and inability to use the arm. At the next examination, August 9, 1879 the soldier's disability was rated at one-third, and the same rating was fixed on the third and last examination, August 28, 1880. All the rest of the mass of testimony in the case shows irrefutably that the soldier's death was the result of his wound, and blood poisoning is shown, by abundant medical evidence, to have existed continuously from his discharge to death.

"Dr. Silas P. Bartlett, who knew soldier well, testifies that at enlistment he was a 'sound, rugged, and well man,' but that in the spring of 1865 he treated him for abscess of the elbow-joint, with blood poison, and he treated him from that time until 1877.

"Dr. David S. Stevens says he has every reason to believe, from the appearance of said soldier and his symptoms, that he came to his death by gunshot wound in the shoulder and exposure while in the service.

"Dr. S. F. Crooker, who treated soldier for abscess and blood poisoning from 1880 until soldier's death, gives it as his opinion that soldier's heart disease was caused by blood poisoning, the dropsy by heart disease, and the dyspepsia by the dropsy, which resulted in the death of the patient by interfering with a proper arterialization of the blood.

"As stated above, the only evidence in the case is in favor of the claimant, and your committee do not deem it necessary to cumulate the proof. The only possible conclusion that could be reached after an unprejudiced examination of all this proof is that the case is perfectly meritorious, and that it is sufficiently established from a technical stand-point is just as apparent."

In addition to the above your committee have made a careful examination of the papers on file in the Pension Office, which seem to fully justify the granting of a pension notwithstanding the technical professional opinion of the medical referee. It is doubtless a fact that "true pathology can not be divorced from common sense," but the history of medicine abundantly proves that it is not always easy to distinguish true from false pathology. The equity is so clearly with the widow in this case that your committee report the bill back favorably and recommend its passage.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

Mr. KILGORE moved that the committee rise.

The motion was agreed to.

The committee accordingly rose; and Mr. MORRILL having taken the chair as Speaker *pro tempore*, Mr. YODER reported that the Committee of the Whole House had had the Private Calendar under consideration, and had directed him to report back sundry bills with various recommendations.

JOHN N. BOVEE.

The SPEAKER *pro tempore*. The Clerk will read the titles of the bills which have been reported from the Committee of the Whole House on the Private Calendar with a favorable recommendation.

Mr. LYMAN. The Speaker *pro tempore* stated at the beginning of the proceedings that the bill (S. 3018) granting an increase of pension to John N. Bovee came up the first thing in order as unfinished business.

Mr. KILGORE. That is a bill which was under consideration on a former occasion. I wish to say, although I will not make any fight on it, that my impression is it would go out on a point of order.

The SPEAKER *pro tempore*. What is the point of order?

Mr. KILGORE. It was called up on a previous occasion on Friday, September 18, during the evening session, and a vote was taken on it. The majority of those who voted was against the passage of the bill. The vote was announced, so many votes for and so many against the bill. No motion to reconsider was made, and therefore it will stand upon the record as having been beaten.

But that is not all. I have the RECORD containing a report of what occurred on that occasion. It shows that the gentleman himself said he would like to have the matter stand over, and the Speaker announced it would go over as unfinished business.

Mr. MORRILL. By unanimous consent.

Mr. KILGORE. Not by unanimous consent, but that it would go over as unfinished business. I have the RECORD here. My theory is that the Speaker *pro tempore* having announced the vote, so many for and so many against, and the majority being against the bill, it was beaten up to that time. The only way to avoid that was to make the motion to reconsider, but that must be made within two days under the rules, and it has not been done.

The SPEAKER *pro tempore*. The Chair is of the opinion that when the Speaker *pro tempore* announced the bill would go over as unfinished business, which could only be done by unanimous consent, no one having objected, it was taken that unanimous consent was given to its going over as unfinished business.

Mr. KILGORE. The RECORD shows the vote was against it, and the announcement of the Speaker *pro tempore* could not control that result. I have the RECORD before me, and I will read just what did occur:

JOHN N. BOVEE.

The SPEAKER *pro tempore*. The next bill for consideration is the bill (S. 3018) granting an increase of pension to John N. Bovee, and the question is on the third reading of the bill.

The question was put, and the Speaker *pro tempore* announced that the "noes" seemed to have it.

Mr. TRACEY. I demand a division.

The House divided; and there were—ayes 8, noes 14.

Mr. LYMAN. I called up that bill at the request of a Senator. It is a Senate bill and one I know nothing about; but if it can be passed over without being rejected until I can see the gentleman who asked me to call the bill up, I would be glad.

The SPEAKER *pro tempore*. It will go over as unfinished business. The hour of half past 10 o'clock having arrived, the House, according to order, will stand adjourned.

I say it was not in the power of the Speaker *pro tempore* to announce under that state of facts the bill went over as unfinished business. I submit the point, however, to the Chair.

The SPEAKER *pro tempore*. The Chair is of the opinion that the then occupant of the chair having announced it went over as unfinished business, and having made that announcement before the vote was declared, and that having been accepted as by unanimous consent, it stands over as the unfinished business.

Mr. KILGORE. He announced the result of the vote before saying it went over as unfinished business. The vote was announced when it was suggested by my friend from Iowa that it should be passed over, and by unanimous consent that was done. I submit the point to the Chair.

The SPEAKER *pro tempore*. The gentleman who occupied the chair at the beginning of this evening session held that this bill came over as unfinished business.

Mr. LYMAN. Mr. Speaker, before the vote is taken on this question I desire to state that I conceive that very great injustice, unintentional so far as any member of this House is concerned, has been done to the claimant. There was read at the time this bill was up for consideration what purported to be a letter from one John Jones, I believe; not a written letter, but a printed circular, which was, I understand, placed upon the desks of some members. I do not wish to take up the time of the House to have a communication under oath, which is intended at least to clear up this implied injustice to the claimant, read, but I ask to have it printed in the RECORD as a part of my remarks, and as all I desire to say on the subject.

The SPEAKER *pro tempore*. That will be done, in the absence of objection.

The communication referred to by Mr. LYMAN is as follows:

WASHINGTON, D. C., *September* 10, 1888.

DEAR SIR: The letter written to the Hon. C. B. KILGORE by one "J. Jones, an old soldier, (?)" is full of falsehoods and misstatements, not to say maliciousness. It is as follows:

"DEAR SIR: I see that a favorable report has been made by the Committee on Pensions to increase the pension of John N. Bovee. (See Senate bill No. 3018, and House report No. 332 .)

"Mr. Bovee already receives a liberal pension ($30 per month). He now receives, and has been for years, a salary of $1,600 per annum in the War Records Office, War Department, runs a Turkish bath (in his wife's name) on G street near Fifteenth, and owns valuable real estate at Washington Grove, Takoma Park, etc. Do you think this man, who has been drawing a salary (in addition to his present liberal pension) from the Government since the close of the war, ought to have his pension increased, while hundreds of worthy indigent soldiers are suffering?

"Dr. O'Reilly, in his report, says: * * * 'From appearances, etc., it is evi-

dent * * * and affiant presumes that superficial ulceration occurs, etc., in hot weather.' The doctor is not positive in this case.

"Dr. D. W. Bliss, one of his most intimate friends, says: * * * 'which renders the use of an artificial limb of little value, as the stump will not bear the friction of its presence.'

"The facts are these: The only times that he has been known to cast aside his artificial limb were while working in the Government Printing Office. If a furlough or reduction of force was spoken of he found it expedient to resume the crutch until the scare passed over. Also during the twelve years he has been in his present position the same tactics have been resorted to with success.

"He now receives from the Government $1,960 yearly as salary and pension; also every five years the price of a new limb (including railroad fare to and from the manufacturer) that he can not wear unless he gets an increase of $10 a month.

"Respectfully,

J. JONES, *An Old Soldier.*

"Hon. C. B. KILGORE."

I am satisfied that it is a fictitious name, as I do not know any such man; besides, an old soldier would not be guilty of such a mean act. A letter of the same purport was written to the Secretary of War some months ago signed "Justice," but availed nothing. I therefore challenge him to make himself known and prove his statements. I will take up his letter *seriatim*.

First. In regard to the Turkish bath business, I would say that several years ago my wife and brother started in the business, but subsequently he became so dissipated that she was obliged to buy him out to save the business from being sold for debt, and also to save what little she had in it. Her mother's money was used to start the business, and her family has to be supported from it. My salary would not properly provide for those I am obliged to look after.

Second. As to valuable real estate, I do not own a dollar's worth of property in the world from which I realize any income, and what little I do own is mortgaged. I do not own even a home.

Third. The statement that I "have been drawing a salary from the Government since the close of the war" is also false, as the records will show. Most of the time I have been employed I received a per diem compensation. The position I now hold is solely through merit. I have been out of Government employ since I first entered it.

Fourth. The statement that "Dr. D. W. Bliss is one of my most intimate friends" is also false. His insinuation is that he being an intimate friend, would stoop to anything in order to get my pension increased. He fails to quote from Dr. James T. Young's certificate, when he states that he saw my leg when it was open and a running sore; and that was only last year. All these physicians are well known and honorable men and all examined my leg, and all gave their honest opinion in regard to my case.

Fifth. Again he says: "The only times that he has been known to cast aside his artificial limb were while working in the Government Printing Office" * * * and "also during the twelve years he has been in his present position the same tactics have been resorted to with success." My answer to the above charge is, that it is grossly unjust and false. If "J. Jones" knows anything about the case he must have known that I wore what is termed a "peg leg" for nearly two years, being unable to wear the Government leg, and which was paid for out of my own money; and that for eighteen months I was obliged to go on crutches, my leg being open and suppurating, and this while in the Government Printing Office.

I can not understand why the question of salary or property should enter into the case, as there are many instances of persons drawing high salaries and at the same time drawing large pensions, besides owning property.

In answer to the application for an increase of pension through the Pension Office, I was informed that there was no law covering my case, but the Commissioner of Pensions had asked Congress for authority to increase pensions in this and other cases.

It seems to me that there should be a distinction made between one who has no protection for the end of the stump (excepting a slight granulation) and one whose stump is fully protected. I know several men who can bear their whole weight on the end of the stump, and can walk for miles, while I am obliged to lace so tightly that all the pressure comes on the upper part of the leg, which of course stops the circulation of blood, and I can only walk a short distance at a time.

The facts in the case are these: I entered the United States service May 17, 1861, when between sixteen and seventeen years of age, and was wounded at the battle of Gaines Mill June 26, 1862, where I was taken prisoner, laying on the battle-field two nights and days without attention, when I was taken to a grove near by. Mortification having set in necessitated the amputation of my leg near the knee. In this grove I lay, in company with one hundred and fifty other wounded comrades, for twenty-eight days without shelter and but very little care, there being but four men that were able to assist us. I was obliged to dress my own wound, but finally became so weak that I could not properly attend to it, and the vermin in the wound caused the stitches to give way and the flap to drop down and slough off, leaving me no protection to the end of the stump, from the effects of which I have been a sufferer ever since, and it has broken open every summer since. The morning I entered battle I weighed 175 pounds, and when I was exchanged, twenty-eight days after, I weighed 98 pounds.

Very respectfully, your obedient servant,

JOHN N. BOVEE.

Hon. J. LYMAN.

Sworn to and subscribed before me at Washington, D. C., this 13th day of September, A. D. 1888.

[SEAL.] GOODWIN Y. ATLEE,
Notary Public.

Mr. KILGORE. I will say this in explanation of my position in this matter, that the letter to which reference was made came to my hands——

Mr. LYMAN. Then I wish to say that I have been misinformed; that I did not know what the circumstances were exactly; but at all events my intention was to cast no sort of reflection upon the action of the gentleman from Texas.

Mr. KILGORE. I understand. When this case was called I presented the letter, and stated that if the allegations therein contained were true the increase ought not to be granted. That was all my position. That letter was read and went into the RECORD, and upon that statement the House refused to make the extension. I will say further that this letter was signed by one "J. Jones, an old soldier," and from that time to this "J. Jones," the old soldier, has not materialized [laughter], and I am inclined to make no fight upon a fictitious letter.

Mr. LYMAN. Permit me to state that I made no reflection whatever upon the action of the gentleman from Texas.

The SPEAKER *pro tempore*. The question is on the third reading of the bill.

The bill S. 3018 was ordered to a third reading, and being read the third time, was passed.

SYLVESTER STEARNS.

Mr. SENEY. Mr. Speaker, I ask unanimous consent to call up the bill (H. R. 7516) which I tried to have considered in committee, to increase the pension of Sylvester Stearns, and also ask unanimous consent that the Senate amendments be concurred in.

Mr. KILGORE. I will not make any objection to that, if there is no further request for unanimous consent.

Mr. SENEY. This is all I will ask to-night.

The SPEAKER *pro tempore*. If there be no objection, the Senate amendments to the bill called up by the gentleman from Ohio will be agreed to.

There was no objection, and it was so ordered.

BILLS PASSED.

Bills of the House of the following titles reported from the Committee of the Whole without amendment were severally considered, and ordered to be engrossed and read a third time; and being engrossed, were accordingly read the third time, and passed, namely:

A bill (H. R. 5751) for the relief of Margaret M. Hatch;
A bill (H. R. 4887) granting a pension to Charles E. Scott;
A bill (H. R. 4648) granting a pension to Jemima Sterling;
A bill (H. R. 2236) granting a pension to Eli J. Yamgheim;
A bill (H. R. 7887) granting increase of pension to Jonathan C. Harrison;
A bill (H. R. 2707) granting pension to Baker Saine; and
A bill (H. R. 5918) restoring to the pension-roll the name of Florian Lischewsky.

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to substitute the bill (S. 3083) restoring to the pension-roll the name of Florian Lischewsky, in place of the House bill just passed.

The SPEAKER *pro tempore*. If there be no objection that order will be made.

There was no objection.

The SPEAKER *pro tempore*. Without objection the House bill No. 5918 will be laid upon the table.

There was no objection, and it was so ordered.

The following House bills, reported from the Committee of the Whole with amendments, were severally considered, the amendments concurred in, and the bills as amended ordered to be engrossed and read the third time; and being engrossed, they were accordingly read the third time, and passed, namely:

A bill (H. R. 2702) granting a pension to Mary Ann Shook;
A bill (H. R. 8521) for the relief of William A. Mathes;
A bill (H. R. 3608) granting an increase of pension to William E. Prince; and
A bill (H. R. 10199) for the relief of William E. Springstein.

Senate bills of the following titles, reported from the Committee of the Whole without amendment, were severally considered, ordered to a third reading, and being read the third time, were passed, namely:

A bill (S. 3030) granting a pension to Mary J. Foster;
A bill (S. 3197) granting a pension to Abbie L. Ham;
A bill (S. 1926) granting a pension to William Smith;
A bill (S. 1219) granting a pension to David Heinbach;
A bill (S. 2567) granting a pension to Nancy Polock;
A bill (S. 3241) granting a pension to Easter A. Jackson;
A bill (S. 1614) granting a pension to Phillipe Ray;
A bill (S. 3230) granting a pension to Martha J. Cole;
A bill (S. 619) granting an increase of pension to Leopold Mayer;
A bill (S. 3175) granting a pension to Mrs. Caroline Taylor;
A bill (S. 2593) granting a pension to Sarah E. McNamara; and
A bill (S. 889) granting a pension to Mary O. Hall.

Bills of the Senate of the following titles, reported from the Committee of the Whole with amendments, were severally considered, the amendments concurred in, and the bills as amended ordered to a third reading, and being read the third time were passed, namely:

A bill (S. 1481) granting a pension to Ellen White Dowling; and
A bill (S. 1782) granting a pension to Sarah C. Taylor.

MRS. MARY M. ORD.

The bill (S. 2663) granting a pension to Mrs. Mary M. Ord, reported from the Committee of the Whole with an amendment, was considered and the amendment agreed to.

The question being on the third reading of the bill,

Mr. KILGORE said: Mr. Speaker, there has been some considerable objection made to that bill, and I think it would be a very good idea for this House to vote on the question of reporting it to a full House to be voted upon at some time hereafter. It is out of the usual line to pass a bill of that size with ten or fifteen men present, and I think it would be a fair and proper disposition of it considering the circumstances. At these evening sessions we have uniformly, so far as my information goes, refused to grant large pensions of that kind, except in one case. I do not know personally—not having been present then—of this fact, but only gather that from what I see in the RECORD.

Mr. MCKENNA. This is only an increase of $25 a month. It is not a showy pension, but an absolutely needed increase.

Mr. KILGORE. An increase from $50 to $100.

Mr. MCKENNA. No; an increase from $50 to $75. This lady is in absolutely destitute circumstances. Her present pension does not support her. She has been compelled to spend what little she receives, with such accumulations as she had saved in times past, to care for an invalid, almost blind daughter—I do not know but that she is totally blind. It is a very meritorious claim indeed. General Ord was not only one of the gallantest of men, but one of the most unselfish and honorable. I knew him when I was a boy, and knew him at one time to jump overboard, endangering his own life, to save a man from drowning.

Mr. KILGORE. I know General Ord was a distinguished soldier and a gallant gentleman. That I know as a matter of fact. He was for a time in Texas. But that is not the question here. The question is whether such legislation as this ought to be engaged in to-night. I do not know whether I ought to object, or whether if I did my objection now comes too late. Of course I could defeat the bill.

Mr. MCKENNA. I hope the gentleman will not insist upon the objection.

Mr. KILGORE. I am inclined to do that at present.

Mr. MCKENNA. It is only an increase of $25, and I hope the gentleman will give this lady the benefit of the doubt existing in his mind.

The question being taken, the bill was ordered to a third reading, and being read the third time, was passed.

Mr. YODER moved to reconsider the several votes taken; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

WILLIAM GALLAGHER.

Mr. YODER. I now ask unanimous consent to call up a bill for Mr. SHIVELY, my colleague, if there be no objection; and I hope there will be none.

Mr. KILGORE. You will not ask another?

Mr. YODER. No. I ask that the Committee of the Whole be discharged from the consideration of the bill (H. R. 10515) to increase the pension of William Gallagher, and that the same be considered in the House.

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and directed to increase the pension of William Gallagher, late a private in Company D, Twenty-eighth Regiment Kentucky Infantry Volunteers, to $20 per month.

The report (by Mr. MATSON) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 10515) granting an increase of pension to William Gallagher, have had the same under consideration, and now report:

The claimant is now receiving a pension of $10 per month for gunshot wound of left hip. He filed application for increase June 22, 1887, for original disability and resulting affection of both legs and rerating. The same was referred to a medical referee, who reported the claim for rejection on the ground of "rerating not warranted on medical grounds." The evidence in this case is purely medical, and the committee are of the opinion that the conclusion of the medical board making the examination under oath ought to be considered in preference to the opinion of the medical referee. The claimant was examined for increase by the examining board at South Bend, March 16, 1887, and they conclude as follows:

"He is, in our opinion, entitled to an $\frac{1}{2}$ rating for the disability caused by gunshot wound of left hip, and results."

Another examination was had by said board July 13, 1887, and after making a full report concluded as follows:

"He is, in our opinion, entitled to an $\frac{1}{2}$ rating for the disability caused by gunshot wound of left hip."

We therefore recommend that in line 6 strike out the word "twenty" and insert "eighteen," and, when so amended, we recommend the passage of the bill.

The amendment recommended by the committee was agreed to, and the bill as amended was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. YODER moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

LOUISA ROGERS.

Mr. CHEADLE. I ask unanimous consent to discharge the Committee of the Whole from the consideration of the bill (H. R. 8549) granting a pension to Louisa Rogers.

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and is hereby, authorized and directed to place the name of Louisa Rogers on the pension-roll, subject to the pension laws of the United States, she being the housekeeper and dependent daughter of Charles T. Bell, who was late captain in Company —, Seventy-sixth Regiment Indiana Volunteers.

The SPEAKER *pro tempore*. The Chair is of the opinion that that would not give any pension.

Mr. WHEELER. I move to amend by inserting "$12 a month."

Mr. KILGORE. How much is asked by the bill?

The SPEAKER *pro tempore*. The amount is blank.

Mr. CHEADLE. Well, just pass it blank, and the Senate will fill it in by way of amendment.

The SPEAKER *pro tempore*. The gentleman from Alabama [Mr. WHEELER] has offered as an amendment that she be pensioned at the rate of $12 per month.

Mr. CHEADLE. That is entirely satisfactory.

The bill as amended was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and is hereby, authorized and directed to place the name of Louisa Rogers on the pension-roll at the rate of $12 per month, she being the housekeeper and dependent daughter of Charles T. Bell, who was late a captain in Company —, Seventy-sixth Regiment Indiana Volunteers.

The amendment was agreed to; and the bill as amended was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. CHEADLE moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

MRS. ELIZABETH G. SCOTT.

Mr. WHEELER. I now ask unanimous consent to take up the bill (H. R. 7944) to increase the pension of Mrs. Elizabeth G. Scott.

Mr. CHEADLE. It will save time to announce now that I will antagonize that bill.

Mr. WHEELER. Mrs. Scott is a lady——

Mr. CHEADLE. I wish to give notice to you and to members present in this House that another bill shall not pass in violation of the ratings of law if I am present unless there be a quorum. I have stated that so many times that it does seem strange gentlemen should compel me to state it again and again, when I have so often set forth my reasons for objecting.

Mr. WHEELER. The gentleman objects sometimes and sometimes he does not object.

Mr. CHEADLE. If I ever call up a bill that violates the ratings of the law, I hope gentlemen will vote it down. I would rather resign my seat than ask the House to pass a bill which was in violation of the ratings of the law.

ADJOURNMENT.

The SPEAKER *pro tempore*. The hour of 10.30 having arrived, the House stands adjourned until Monday next, October 8, at 12 o'clock m.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. STONE, of Kentucky: A bill (H. R. 11568) for the relief of John A. Yandell—to the Committee on War Claims.

Also, a bill (H. R. 11569) for the relief of Sarah Millikan—to the Committee on War Claims.

By Mr. MCCREARY: A bill (H. R. 11570) granting arrears of pension to Peter J. Hiatt—to the Committee on Invalid Pensions.

By Mr. MCRAE: A bill (H. R. 11571) granting a pension to I. T. Houze—to the Committee on Invalid Pensions.

By Mr. WHEELER (by request): A bill (H. R. 11572) for the relief of Mrs. Fannie Moore—to the Committee on Invalid Pensions.

PETITION.

The following petition was laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. J. M. ALLEN: Petition of estate of Donald Street, deceased, late of Alcorn County, Mississippi, and also James Conn, of Alcorn County, Mississippi, for reference of their claim to the Court of Claims—to the Committee on War Claims.

SENATE.

MONDAY, *October* 8, 1888.

Prayer by Rev. C. B. RAMSDELL, of the city of Washington.

The Journal of the proceedings of Thursday last was read and approved.

DR. JOHN B. READ.

The PRESIDENT *pro tempore*. The Chair lays before the Senate a message from the House of Representatives, which will be read.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *October* 4, 1888.

Ordered, That the Clerk be directed to return to the Senate, in accordance with their request, the bill (H. R. 10633) for the relief of Dr. John B. Read, and also to inform the Senate that the Speaker had signed the above-enrolled bill before receiving the message of recall from the Senate.

Mr. EDMUNDS. I ask that my motion to reconsider the vote on the passage of the bill be taken up and acted upon, and that the order for the third reading be reconsidered and the bill placed on the Calendar. I do this in pursuance of an understanding with gentlemen interested affirmatively for the bill, that if that should be done it shall go on the Calendar and wait until December before it is again taken up.

The PRESIDENT *pro tempore*. If there be no objection, the vote by which the bill was passed and also the vote by which it was or-

dered to a third reading will be reconsidered, and the bill placed on the Calendar. The Chair hears no objection, and it is so ordered.

PETITIONS AND MEMORIALS.

Mr. SPOONER. I present the petition of William H. Prince and Henry Hoover, a committee appointed at a public meeting of the workingmen of the District of Columbia, held at Grand Army of the Republic Hall, corner of Seventh and L streets northwest, April 10, 1888, charging that grave wrongs and abuses involving moral turpitude and the integrity of numerous District officials in regard to their conduct of the public works, disbursement of public moneys, etc., and in relation to their dealings with the District workingmen, exist, consisting in part:

First. Of errors in payment to workingmen;

Second. Failure to pay workingmen (by exceeding appropriations);

Third. Permitting workingmen employed as foremen on District work to take private contracts and use District property and materials in the execution thereof;

Fourth. In allowing the use of teams employed and paid for by the District to plow up and otherwise improve the farm property of prominent real-estate agents;

Fifth. In allowing a gang of laborers employed on permit work to be borne and paid on the pay-rolls of the county middle district;

Sixth. Misapplying appropriations made by Congress for current repairs of county roads and diverting it to other uses wholly foreign;

Seventh. Wasting an appropriation of $20,000 made for repairs on Seventh street road;

Eighth. In sanctioning and employing at great loss to the District and District workingmen, imported contract Italian laborers on public works;

Ninth. In malicious persecutions of faithful foremen and inspectors employed on District works;

And praying that these charges be investigated, to the end that relief may be afforded.

I move the reference of the petition to the Committee on the District of Columbia.

The motion was agreed to.

Mr. MITCHELL presented resolutions adopted by the Board of Trade of Port Townsend, Wash., favoring changes in the boundaries of certain proposed new judicial districts provided for in the bill recently introduced by Mr. MITCHELL in the Senate, and now pending before the Committee on the Judiciary; which were referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. BLAIR, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 7344) granting a pension to Henrietta Waldron;

A bill (H. R. 9175) granting a pension to George Wallen;

A bill (H. R. 9296) granting a pension to Bridget Carroll;

A bill (H. R. 7877) to place Mary Karstetter on the pension-roll; and

A bill (H. R. 9791) for the relief of Charles W. Geddes.

Mr. JONES, of Arkansas, from the Committee on Indian Affairs, to whom was referred the bill (H. R. 7924) for the relief of A. J. McCreary, administrator of the estate of J. M. Hiatt, and for other purposes, reported it without amendment, and submitted a report thereon.

He also, from the Committee on Claims, to whom was referred the bill (H. R. 10481) for the relief of Rev. William Gregston, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (H. R. 6348) for the relief of Mrs. Ellen P. Malloy, submitted an adverse report thereon, which was agreed to, and the bill was postponed indefinitely.

PUBLIC BUILDING AT DETROIT, MICH.

Mr. VEST. From the Committee on Public Buildings and Grounds I report favorably, without amendment, the bill (H. R. 9447) to restore certain money to the fund for erecting a public building at the city of Detroit.

Mr. PALMER. I ask that the bill be considered at present. It will not lead to any debate nor take any time.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The preamble recites that two lots of land in the city of Detroit, Mich., contiguous to the present site of the post-office building in that city, were purchased by the Government as an addition to that site for the purpose of erecting a new public building thereon; that the purchase money paid for these lots was taken out of and deducted from the amount appropriated for the erection of the building, and that the project of erecting the building on these lots has been abandoned, and other lots of land purchased for that purpose. The bill therefore proposes that the Secretary of the Treasury shall sell these two lots of land for a sum at least equal to the purchase price paid by the Government therefor, and restore to the appropriation for the building the amount realized from the sale.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 338) to clear the military record of J. George Ruckstuhl;

A bill (H. R. 1156) for the relief of Miles F. West;

A bill (H. R. 2896) for the relief of the heirs of John R. Treutlen;

A bill (H. R. 3721) authorizing the President to appoint William English an officer in the regular Army of the United States;

A bill (H. R. 3765) for the relief of James Devine;

A bill (H. R. 4489) for the relief of J. M. Hogan;

A bill (H. R. 4648) granting a pension to Jemima Sterling;

A bill (H. R. 4887) granting a pension to Charles E. Scott.

A bill (H. R. 5043) for the relief of the Stockbridge and Munsee tribe of Indians, in the State of Wisconsin;

A bill (H. R. 5480) for the relief of James Iredell Meares;

A bill (H. R. 5751) for the relief of Margaret M. Hatch;

A bill (H. R. 7151) for the relief of A. N. Kimball and sureties, on his official bond as receiver of public moneys;

A bill (H. R. 8549) granting a pension to Louisa Rogers;

A bill (H. R. 9211) for the relief of Jesse Durnell;

A bill (H. R. 9297) for the relief of James Sims;

A bill (H. R. 10099) for the relief of Melchisedec Robinson;

A bill (H. R. 10515) to increase the pension of William Gallagher; and

A bill (H. R. 11165) for the relief of John Gray.

The message also announced that the House had passed the following bills:

A bill (S. 619) granting an increase of pension to Leopold Mayer;

A bill (S. 664) for the relief of William R. Wheaton and Charles H. Chamberlain, of California;

A bill (S. 741) for the relief of William Tabb;

A bill (S. 889) granting a pension to Mary O. Hall;

A bill (S. 1089) for the relief of Henrietta M. Sands, widow of the late Rear-Admiral Benjamin F. Sands, United States Navy;

A bill (S. 1219) granting a pension to David Heinbach;

A bill (S. 1614) granting a pension to Phillipe Ray;

A bill (S. 1671) for the relief of the heirs of Martin Kenofsky;

A bill (S. 1926) granting a pension to William Smith;

A bill (S. 2567) granting a pension to Nancy Polock;

A bill (S. 2593) granting a pension to Sarah E. McNamara;

A bill (S. 3018) granting an increase of pension to John N. Bovee;

A bill (S. 3030) granting a pension to Mary J. Foster;

A bill (S. 3083) restoring to the pension-roll the name of Florian Lischewsky;

A bill (S. 3175) granting a pension to Mrs. Caroline Taylor;

A bill (S. 3197) granting a pension to Abbie L. Ham;

A bill (S. 3230) granting a pension to Martha J. Cole; and

A bill (S. 3241) granting a pension to Easter A. Jackson.

The message further announced that the House had passed the following bills, each with an amendment, in which it requested the concurrence of the Senate:

A bill (S. 1190) for the relief of the estate of Joseph Fenno, deceased;

A bill (S. 1481) granting a pension to Ellen White Dowling;

A bill (S. 1482) granting a pension to Sarah C. Taylor; and

A bill (S. 2663) granting an increase of pension to Mary M. Ord.

The message also announced that the House had concurred in the amendments of the Senate to the bill (H. R. 7516) to increase the pension of Sylvester Stearns.

The message further announced that the House had passed a resolution for the appointment of a joint select committee composed of six members of the Senate and House of Representatives to investigate the facts and circumstances connected with the building of the Washington aqueduct tunnel, etc., in which it requested the concurrence of the Senate.

The message also announced that the House had directed the Clerk of the House to inform the Senate that the bill (S. 577) for the relief of the American Grocer Association of the city of New York has been mislaid and can not be found, and requested the Senate to furnish a duplicate of said bill.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bill and joint resolution; and they were thereupon signed by the President *pro tempore:*

A bill (H. R. 3300) to enable the State of Colorado to select indemnity lands, and for other purposes; and

Joint resolution (H. Res. 101) providing for the printing of decisions of the Department of the Interior regarding public lands and pensions, for sale.

BILLS INTRODUCED.

Mr. STEWART introduced a bill (S. 3616) to provide for the formation of co-operative business corporations in the District of Columbia; which was read twice by its title.

Mr. STEWART. I move the reference of the bill to the Committee

on Education and Labor, and I should like to be indulged in a remark concerning it.

I intended to make some remarks upon the bill introduced by the Senator from California [Mr. STANFORD] early in the session, having the same general objects in view. That bill, however, has not been reported from the committee, and I have had no opportunity to do so. I also intended to submit some amendments to that bill which I have incorporated in the bill now presented as an entire bill.

I believe that co-operation is the solution of the supposed conflict between capital and labor, and that what we want in this country is more proprietors and less wage-earners. In the progress of society we have reached a period when very little can be done by individual effort. Co-operation in almost every pursuit is required, and while capital co-operates and forms trusts, that is accumulated capital, productive capital is apparently, or is supposed to be, a servant of accumulated capital. That ought not to be.

The productive power of the country is its principal wealth. In a single year the productive power of this country could replace all the accumulated property, and could replace in a very few months all the accumulated property in the hands of rich men and rich corporations.

The only difficulty in the way of the laborers of this country uniting their efforts and combining their labor capital in industrial pursuits is the want of some simple, easy mode of organization. The laborers of this country are now sufficiently intelligent to conduct the most complicated business, and it seems to me that if a simple method is provided for them to unite their efforts, so that they can engage in all industrial pursuits, both productive and distributive, they will unite their capital and compel the accumulated capital of the country to become tributary to their enterprises or remain idle.

The Commissioner of Labor has written some very good works on this subject and collected much very valuable information. I should like very much to have his views upon the bill which I have introduced, and I will ask the Committee on Education and Labor to refer it to him for a report at the next session. It seems to me it is one of the most important subjects that can be considered, but I would hesitate to legislate without having the benefit of the mature views of our very able Commissioner of Labor.

Mr. BLAIR. If the bill should be referred to the Committee on Education and Labor, as chairman of the committee I shall take great pleasure in referring it to the Commissioner of Labor for his views and an early report.

The PRESIDENT *pro tempore*. The bill will be referred to the Committee on Education and Labor.

Mr. SPOONER introduced a bill (S. 3617) granting a pension to J. W. Boyd; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 3618) granting a pension to Meryah Watts; which was read twice by its title, and referred to the Committee on Pensions.

Mr. JONES, of Arkansas, introduced a bill (S. 3619) for the relief of Alice E. Robertson; which was read twice by its title, and referred to the Committee on Claims.

AMERICAN GROCER ASSOCIATION.

The PRESIDENT *pro tempore*. The Chair lays before the Senate a message from the House of Representatives, which will be read.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *October* 5, 1888.

Ordered, That the Clerk be directed to inform the Senate that the bill (S. 577) for the relief of the American Grocer Association, of the city of New York, has been mislaid and can not be found, and request the Senate to furnish a duplicate of said bill.

The PRESIDENT *pro tempore*. The request of the House of Representatives will be complied with, if there be no objection. The Chair hears none, and it is so ordered.

WASHINGTON AQUEDUCT TUNNEL.

Mr. HALE. I ask the Chair to lay before the Senate the message from the House of Representatives in relation to the Washington aqueduct tunnel.

The PRESIDENT *pro tempore*. The Chair lays before the Senate a concurrent resolution from the House of Representatives, which will be read.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *October* 5, 1888.

Resolved by the House of Representatives (the Senate concurring), That all work heretofore performed upon the Washington aqueduct tunnel, together with the provisions of any contract made for the same or any portion thereof, and all the facts and circumstances connected with the bidding for, the letting and making of said contracts, and all expenditure of moneys heretofore appropriated for said work, together with the extent of any force employed in said work by the Government, the nature of the same and the compensation paid therefor, shall forthwith be fully investigated by a joint select committee of six members, of whom three shall be members of the Senate, to be appointed by the President of the Senate, and three shall be members of the House of Representatives, to be appointed by the Speaker. Said committee shall have authority to employ a clerk and stenographer, and such experts as it may deem necessary for the investigation. It may sit during the sessions of Congress or in recess, and shall have full power, either in full committee or subcommittee, to administer oaths and send for persons and papers, and to conduct the investigations either in Washington or in such places as may be deemed necessary, and shall make full report of its proceedings and the conclusions arrived at, with such recommendations as it may deem proper, to Congress on or before January 1, 1889.

Mr. HALE. This is substantially the provision that the Senate embodied in the deficiency appropriation bill, and which afterwards was sent to conference. The conferees agreed upon the proposition, there being no objection whatever on the part of any member of the conference, but on reflection, and as suggested by the Senator from Vermont [Mr. EDMUNDS], it was thought doubtful whether a joint committee of the two Houses could legally be raised by the provisions of a statute, it being of course the constitutional privilege of the two Houses to conduct their own proceedings and make their own committees themselves, without regard to any outside statute or the approval of the President.

Therefore, to save that point, which it seemed to the conferees was well made, and in order that there might be no obstruction to this proposed investigation, the committee unanimously agreed that this concurrent resolution should be reported instead of the provision in the appropriation bill.

The resolution was drawn in conference, and was submitted first in the House of Representatives because that body was in session that day. It passed that body and has just come here.

In order that this investigation may be made most complete and searching, I desire that the Senate shall concur with the House in passing this resolution with only one amendment, which may be needed in order to perfect it. I send to the desk the amendment, which I ask the Senate to agree to.

The PRESIDENT *pro tempore*. If there be no objection to the present consideration of the resolution, it is before the Senate, and the amendment proposed by the Senator from Maine will be stated.

The SECRETARY. In line 8, after the word "contracts," it is proposed to insert the words:

And subcontracts.

Mr. HALE. That amendment is moved so that all the relations between one contractor and another or between the subcontractors and the original contractors may be investigated by this committee.

The amendment was agreed to.

The resolution as amended was concurred in.

LOUIS RIEL.

Mr. BLAIR submitted the following resolutions; which were read:

Resolved, That the President be requested to communicate to the Senate any knowledge or information in his possession or in the possession of the Department of State relating to the case of one Louis Riel, otherwise Louis David Riel, who was hanged for the alleged crime of treason by the authorities of the Dominion of Canada on or about the 16th day of November, 1885, notwithstanding that he was recommended to mercy by the jury who convicted him, doubts being alleged of his sanity, with other mitigating circumstances; and the same Louis Riel in whose favor judgment of naturalization is alleged to appear of record in the United States district court of the third judicial district of the Territory of Montana, of the March term 1883; and also to communicate to the Senate all information of any application made by one Edmund Mallett, now or lately president of the French Canadian League of the United States, or by any other persons, whether verbally or otherwise, to the President or to the Secretary of State in behalf of said Riel prior to his execution, requesting inquiry into the circumstances of his case, his alleged citizenship of the United States, and whether the proceedings in his case had been according to due process of law, and whether there had been a full, fair, and sufficient trial thereof, including the presentation of the fact of his citizenship, and especially of the proof of his insanity with which he had previously been afflicted, and for which he had been long confined, undergoing treatment therefor in an asylum for insane persons, and from which there was alleged to be strong proof of his being afflicted when the events occurred for which he was charged with treason as aforesaid; also what action, if any, was taken by this Government in the premises to secure a new trial or mitigation of the punishment of the said Riel, together with copies of all papers, letters, documents, and correspondence bearing upon the subject-matter; also to inform the Senate whether the said Mallett was at the time of his said alleged application in the employ of the Treasury Department of this Government, and if so, whether since the rejection of said application or the neglect and refusal of this Government to inquire into the case of said Riel (if said application was rejected and said inquiry was neglected and refused to be made), said Mallett has been promoted or appointed to other and more responsible and lucrative service under this Government; and, if so, to what service, together with any other facts relating to the subject-matter of the trial and execution of said alleged American citizen Riel by the authorities of the Dominion of Canada; and

Whereas the said Edmund Mallett, under his hand in a letter dated at Washington, D. C., August 24, 1885, and widely published in the press and supposed to have been communicated to the President and to the Secretary of State, alleged in reference to his interviews with the President and the Secretary of State that the Government refused to inquire into said cases except upon the condition following (among others), to-wit, the condition contained in these words: "First, The American Government will not take the initiative in examining into Riel's citizenship or the rights thereunder," with other matters, showing, if true, gross neglect and indifference to the rights of an American citizen when in extreme need of the protection of his Government, being without means, deprived of liberty, and about to be executed by a foreign nation: Therefore,

Resolved further, That the President be requested to inform the Senate whether the aforesaid allegation of the refusal of this Government to institute inquiry into the case of said Riel upon the statements and petitions of the said Edmund Mallett and others is true, and if the same be not true, whether the said Mallett has ever withdrawn or retracted the same, and if he still adheres to the same, for what reason the said Mallett, since making such public charges against this Government, has been appointed to a responsible and lucrative position in the public service requiring a high order of ability and of personal integrity for the proper discharge of the duties thereof; and if the above charge of the said Mallett be or be not true, whether the President or the Secretary of State had knowledge thereof and of the contents of a certain book entitled "The Blood of Abel," written by one Wilbur F. Bryant, and published in the year 1887, prior to the said appointment of said Mallett; which said book relates to the case of the said Riel, and contains the aforesaid and other letters and statements of the said Mallett, with much other like evidence and allegations of fact, charging this Government with gross and inexcusable negligence in the care and defense of the rights of an American citizen when in foreign parts and about to suffer an infamous death without cause.

Mr. BLAIR. I ask that the resolutions be now considered.

Mr. MORGAN. Let the resolutions go over and be printed.

The PRESIDENT *pro tempore*. The resolutions will lie over and be printed, under the rule.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. T. O. TOWLES, its Chief Clerk, announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 246) for the relief of J. W. Patterson;

A bill (H. R. 2025) to place William J. Sowell on the rolls of the Arkansas Volunteers;

A bill (H. R. 2236) granting a pension to Eli J. Yamgheim;

A bill (H. R. 2702) granting a pension to Mary Ann Shook;

A bill (H. R. 2707) granting a pension to Baker Saine;

A bill (H. R. 3608) to grant an increase of pension to William E. Prince;

A bill (H. R. 7887) granting an increase of pension to Jonathan C. Harrison;

A bill (H. R. 8521) for the relief of William A. Mathes;

A bill (H. R. 9718) for the relief of J. W. Parish & Co.;

A bill (H. R. 10199) for the relief of William E. Springstein; and

A bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

The message also announced that the House had concurred in the amendments of the Senate to the bill (H. R. 4601) to amend the naval record of Nickolas Lenschen, Peter Lenschen, and Loth Possum.

The message further announced that the House had concurred in the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8962) for the relief of Anthony L. Woodson.

The message further announced that the House had passed the following bills and joint resolution:

A bill (S. 45) for the relief of Col. James C. Duane;

A bill (S. 70) to provide for warehousing fruit brandy;

A bill (S. 1137) for the relief of Adam L. Epley;

A bill (S. 3433) authorizing the Secretary of the Interior to accept the surrender of and cancel land patents to Indians in certain cases;

A bill (S. 3597) to provide for the disposal of the Fort Wallace military reservation in Kansas;

Joint resolution (S. R. 59) authorizing Brig. Gen. Absalom Baird, United States Army, to accept from the President of the French Republic a diploma conferring the decoration of Commander of the National Order of the Legion of Honor; and

Joint resolution (S. R. 112) authorizing the Secretary of War to receive for instruction at the Military Academy at West Point Henry Lecomte, of Switzerland.

ANTHONY L. WOODSON.

Mr. JONES, of Arkansas, submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 8962) for the relief of Anthony L. Woodson, of Woodsonville, Ky., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment to said bill and agree to the same with the following amendments:

In line — strike out the amount $3,666.90 and insert $4,130.40.

Strike out all after the word "use," in line 9, in the following words: "And the further sum of $2,300, being the value of engineer stores taken in the same way for the construction of forts, stockades, etc., at or near Mumfordville, Ky."

To which the Senate agrees.

JOHN C. SPOONER,
JAMES K. JONES,
JOHN H. MITCHELL,
Managers on the part of the Senate.

W. J. STONE,
J. M. BROWER,
T. R. STOCKDALE,
Managers on the part of the House.

The report was concurred in.

THE NATIONAL MUSEUM.

Mr. WILSON, of Iowa. I offer the following resolution, and ask for its present consideration:

Resolved, That the Regents and Secretary of the Smithsonian Institution, and Director of the United States National Museum be, and hereby are, directed to formulate and transmit to the Senate, at their earliest convenience, a schedule of classified service of the officers and employés of the National Museum, arranged according to duty and salary, as the same is required for the proper working of the Museum.

Mr. HOAR. From what committee does that come?

Mr. WILSON, of Iowa. From none. It is a resolution that I introduced in order to get the information.

Mr. HOAR. I should like to inquire for information—I have no doubt it is all right—have we authority to impose directions on the Regents of the Smithsonian Institution and the Director of the National Museum?

Mr. WILSON, of Iowa. The resolution relates mainly to the National Museum, which, I suppose, we have a right to call upon for information. It might be different as to the Smithsonian Institution, but as the resolution relates to the Museum, I presume we have that authority. There is no reason why we should not have it.

Mr. HOAR. We have authority to give such directions to the heads of Departments, which rests on unbroken usage from the beginning of the Government, but I am not aware that one House of Congress has a right to order an executive officer of the Government to do anything for its convenience, especially that we have such control over the Regents of the Smithsonian Institution. It may be there is such authority reserved by statute. I shall not interpose an objection to the resolution, because I know personally the officers referred to would be anxious to communicate the information, and it is the desire of the Senator from Iowa.

The PRESIDENT *pro tempore*. If there be no objection to the present consideration of the resolution, the question is on agreeing to the same.

The resolution was agreed to.

VIOLATIONS OF CIVIL-SERVICE LAW.

The PRESIDENT *pro tempore*. If there be no further resolutions, the Chair lays before the Senate the concurrent resolution offered by the Senator from New Hampshire [Mr. CHANDLER] on a previous day requesting the Attorney-General to inform the Senate whether he has any information concerning violations of the civil-service law. The Senator who offered the resolution not being in his seat, if there be no objection the resolution will lie over, retaining its place on the Calendar of current business for to-morrow morning.

THE REVENUE LAWS.

Mr. ALLISON. I move that the Senate proceed to the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

The motion was agreed to.

The PRESIDENT *pro tempore*. The bill is before the Senate, as in Committee of the Whole, and will be read at length.

Mr. ALLISON. As this is a long bill and the Senate is familiar with its provisions, at least with those of the original House bill, I ask unanimous consent that the reading of the bill at length may be dispensed with, and that as the substitute is read it may be open to amendment; that is to say, that the formal reading of the bill may be dispensed with.

The PRESIDENT *pro tempore*. It will be so ordered, if there be no objection.

Mr. MORGAN. I ask the Senator from Iowa if there is any objection to having the measure printed in the RECORD?

Mr. HARRIS. It has been printed in the RECORD, I think.

Mr. ALLISON. No, it has not been printed in the RECORD.

Mr. MORGAN. Not the bill.

Mr. HARRIS. The reports were printed in the RECORD.

Mr. ALLISON. Is it proposed that both the bill and the substitute be printed in the RECORD?

Mr. HARRIS. I suppose there is no objection to so printing the bill and amendment, if the Senator suggests it.

Mr. MORGAN. Yes, I make that suggestion. My purpose, of course, is to get the amendment of the Senate Committee on Finance before the country. The bill itself has been before the country. It is a House bill, and has been printed, I believe, in various forms. I have no objection to the bill going in. My request, though, was as to the amendment.

Mr. ALLISON. I have no objection certainly to the amendment being printed in the RECORD.

The PRESIDENT *pro tempore*. If there be no objection, the amendment of the Committee on Finance will be printed in the RECORD.

Mr. HARRIS. If either is printed in the RECORD, let the bill and amendment both be printed.

Mr. BUTLER. I was about to suggest that, Mr. President.

The PRESIDENT *pro tempore*. If there be no objection, the bill and the amendment reported by the Committee on Finance will be printed in the RECORD. It is so ordered.

The bill is as follows:

A bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Be it enacted, etc., That on and after the 1st day of October, 1888, the following articles mentioned in this section, when imported, shall be exempt from duty:

Timber, hewn and sawed, and timber used for spars and in building wharves.

Timber, squared or sided.

Wood unmanufactured, not specially enumerated or provided for.

Sawed boards, planks, deals, and all other articles of sawed lumber.

Hubs for wheels, posts, last-blocks, wagon-blocks, oar-blocks, gun-blocks, heading-blocks, and all like blocks or sticks, rough, hewn, or sawed only.

Staves of wood.

Pickets and palings.

Laths.

Shingles.

Clapboards, pine or spruce.

Logs.

Provided, That if any export duty is laid upon the above-mentioned articles, or either of them, by any country whence imported, all said articles imported from said country shall be subject to duty as now provided by law.

Salt, in bags, sacks, barrels, or other packages, or in bulk, when imported from any country which does not charge an import duty upon salt exported from the United States.

Flax straw.

Flax, not hackled or dressed.

Tow of flax, or hemp.
Hemp, manila, and other like substitutes for hemp.
Jute-butts.
Jute.
Sunn, sisal-grass, and other vegetable fibers.
Burlaps, not exceeding 60 inches in width, of flax, jute, or hemp, or of which flax, jute, or hemp, or either of them, shall be the component material of chief value.
Bags of jute for grain.
Machinery designed for the conversion of jute or jute-butts into cotton bagging, to wit, cards, roving-frames, winding-frames, and softeners.
Iron or steel sheets, or plates, or taggers iron, coated with tin or lead, or with a mixture of which these metals is a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers tin.
Beeswax.
Glycerine, crude, brown, or yellow, of the specific gravity of 1.25 or less at a temperature of sixty degrees Fahrenheit, not purified by refining or distilling.
Phosphorus.
Soap-stocks, fit only for use as such.
Soap, hard and soft, all which are not otherwise specially enumerated or provided for.
Sheep-dip.
Extract of hemlock, and other bark used for tanning.
Indigo, extracts of, and carmined.
Iodine, resublimed.
Oil, croton.
Hemp-seed and rape-seed oil.
Petroleum.
Alumina—alum, patent alum, alum substitute, sulphate of alumina, and aluminous cake; and alum in crystals or ground.
All imitations of natural mineral waters, and all artificial mineral waters.
Baryta, sulphate of, or barytes, unmanufactured.
Boracic acid, borate of lime, and borax.
Copper, sulphate of, or blue vitriol.
Iron, sulphate of, or copperas.
Potash, crude, carbonate of, or fused, and caustic potash.
Chlorate of potash and nitrate of potash, or saltpeter crude.
Sulphate of potash.
Sulphate of soda, known as salt cake, crude or refined, or niter cake, crude or refined, and Glauber's salt.
Nitrate of soda.
Sulphur, refined, in rolls.
Wood-tar.
Coal-tar, crude.
Aniline oil and its homologues.
Coal-tar, products of, such as naphtha, benzine, benzole, dead oil, and pitch.
All preparations of coal-tar not colors or dyes, and not acids of colors and dyes.
Log-wood and other dyewoods, extracts and decoctions of.
Alizarine, natural or artificial.
Spirits of turpentine.
Ocher and ochery earths, umber and umber earths.
Olive-oil, salad oil, cottonseed oil, whale oil, seal oil and neats-foot oil.
All barks, beans, berries, balsams, buds, bulbs, bulbous roots, and excrescences, such as nut-galls, fruits, flowers, dried fibers, grains, gums, and gum resins, herbs, leaves, lichens, mosses, nuts, roots, and stems, vegetables, seeds, and seeds of morbid growth, weeds, woods used expressly for dyeing, and dried insects, any of the foregoing which are not edible and not specially enumerated or provided for.
All non-dutiable crude minerals, but which have been advanced in value or condition by refining or grinding, or by other process of manufacture, not specially enumerated or provided for.
All earths or clays unwrought or unmanufactured.
Glass plates or discs unwrought, for use in the manufacture of optical instruments, spectacles, and eye glasses.
Opium, crude and not adulterated, containing 9 per cent. and over of morphia, for medicinal purposes.
Iron and steel cotton ties or hoops, for baling or other purposes, not thinner than No. 20 wire gauge.
Needles, sewing, darning, knitting, and all others not specially enumerated or provided for in this act.
Copper, imported in the form of ores, regulus of; and black or coarse copper and copper cement, old copper fit only for remanufacture.
Antimony, as regulus or metal.
Quicksilver.
Chromate of iron or chromic ore.
Mineral substances in a crude state and metals unwrought not specially enumerated or provided for.
Brick, other than fire-brick.
German looking-glass plates, made of blown glass and silvered.
Vegetables in their natural state or in salt or brine, not specially enumerated or provided for.
Chicory root, ground or unground, burnt or prepared.
Acorns and dandelion root, raw or prepared, and all other articles used, or intended to be used, as coffee or substitutes therefor, not specially enumerated or provided for.
Cocoa, prepared or manufactured.
Dates.
Currants, Zante or other.
Figs.
Meats, game and poultry.
Milk, fresh.
Egg yelks.
Beans, pease, and split pease.
Bibles, books, and pamphlets, printed in other languages than English, and books and pamphlets and all publications of foreign governments, and publications of foreign societies, historical or scientific, printed for gratuitous distribution.
Bristles.
Bulbs and bulbous roots, not medicinal.
Feathers of all kinds, crude or not dressed, colored, or manufactured.
Finishing powder.
Grease.
Grindstones, finished or unfinished.
Curled hair, for beds or mattresses.
Human hair, raw, uncleaned and not drawn.
Hemp and rape seed, and other oil-seeds of like character.
Garden seeds.
Osier or willow, prepared for basket-makers' use.
Broom-corn.
Brush-wood.
Rags, of whatever material composed.
Rattans and reeds, manufactured but not made up into finished articles.
Stones, manufactured or undressed, freestone, granite, sandstone, and all building or monumental stone.
All strings of gut or any other like material.
Tallow.
Waste, all not specially enumerated or provided for.

SEC. 2. That on the 1st day of October, 1888, in lieu of the duties heretofore imposed on the articles hereinafter mentioned, there shall be levied, collected, and paid the following rates of duty on said articles severally:

Glycerine, refined, 3 cents per pound.
Acid, acetic, acetous, or pyroligneous acid, exceeding the specific gravity of 1.047, 5 cents per pound.
Castor beans or seeds, 25 cents per bushel of 50 pounds.
Castor oil, 40 cents per gallon.
Flaxseed or linseed oil, 15 cents per gallon.
Licorice, paste or rolls, 5 cents per pound.
Licorice juice, 35 per cent. ad valorem.
Baryta, sulphate of, or barytes, manufactured, one-eighth of 1 cent per pound.
Chromate of potash, 2½ cents per pound.
Bichromate of potash, 2½ cents per pound.
Acetate of lead, brown, 2 cents per pound.
Acetate of lead, white, 3 cents per pound,
White lead, when dry or in pulp, or when ground or mixed in oil, 2 cents per pound.
Orange, mineral, and read lead, 1½ cents per pound.
Litharge, 1½ cents per pound.
Nitrate of lead, 2 cents per pound.
Magnesia, medicinal, carbonate of, 3 cents per pound.
Magnesia, calcined, 7 cents per pound.
Magnesia, sulphate of, or Epsom salts, one-fourth of 1 cent per pound.
Prussiate of potash, red, 7 cents per pound.
Prussiate of potash, yellow, 3 cents per pound.
Nitrate of potash, refined, or refined saltpeter, 1 cent per pound.
Sal soda, or soda crystals, one-eighth of 1 cent per pound.
Bicarbonate of or super-carbonate of soda, and saleratus, calcined or pearl ash, three-fourths of 1 cent per pound.
Hydrate or caustic soda, one-half of 1 cent per pound.
Soda silicate or other alkaline silicate, one-fourth of 1 cent per pound.
Sulphur, sublimed or flowers of, $12 per ton.
Ultramarine, 3 cents per pound.
Paris green, 12½ per cent. ad valorem.
Colors and paints, including lakes, whether dry or mixed, or ground with water or oil, not specially enumerated or provided for, 20 per cent. ad valorem.
Zinc, oxide of, when dry, 1 cent per pound; when ground in oil, 1½ cents per pound.

All medicinal preparations known as cerates, conserves, decoctions, emulsions, extracts, solid or fluid, infusions, juices, liniments, lozenges, mixtures, mucilages, ointments, oleo-resins, pills, plasters, powders, resins, suppositories, sirups, vinegars, and waters, of any of which alcohol is not a component part, which are not specially enumerated or provided for, 20 per cent. ad valorem.

All ground or powdered spices not specially enumerated or provided for, 3 cents per pound.

Proprietary preparations, to wit: All cosmetics, pills, powders, troches or lozenges, sirups, cordials, bitters, anodynes, tonics, plasters, liniments, salves, ointments, pastes, drops, waters, essences, spirits, oils, or preparations or compositions recommended to the public as proprietary articles or prepared according to some private formula as remedies or specifics for any disease or diseases or affections affecting the human or animal body, including all toilet preparations whatever used as applications to the hair, mouth, teeth, or skin, not specially enumerated or provided for, 30 per cent. ad valorem.

Morphia or morphine and all salts thereof, 50 cents per ounce.
Acid, tannic or tannin, 50 cents per pound.
China, porcelain, parian, and bisque, earthen, stone, or crockery ware composed of earthy or mineral substance, including plaques, ornaments, charms, vases, and statuettes, painted, printed, enameled, or gilded, or otherwise decorated in any manner, 50 per cent. ad valorem.
China, porcelain, parian, and bisque ware not decorated in any manner, 40 per cent. ad valorem.
White granite, common ware, plain white or cream-colored, lustered or printed under glaze in a single color; sponged, dipped, or edged ware, 35 per per cent. ad valorem.
Brown earthenware, common stoneware, gas-retorts, and roofing tiles, not specially enumerated or provided for, and not decorated in any manner, 20 per cent. ad valorem.
All other earthen, stone, and crockery ware, white, colored, or bisque, composed of earthy or mineral substances, not specially enumerated or provided for in this act, and not decorated in any manner, 35 per cent. ad valorem.
Paving tiles, not encaustic, 20 per cent. ad valorem.
Encaustic tiles, not glazed or enameled, 30 per cent. ad valorem.
All glazed or enameled tiles, 40 per cent. ad valorem.
Slates, slate pencils, slate chimney-pieces, mantels, slabs for tables, and all other manufactures of slate, 20 per cent. ad valorem.

Green and colored glass bottles, vials, demijohns and carboys (covered or uncovered), pickle or preserve jars, and other plain, molded, or pressed green and colored bottle glass, not cut, engraved, or painted, and not specially enumerated or provided for, 1 cent per pound; if filled, and not otherwise provided for, and the contents are subject to an ad valorem duty, or to a rate of duty based on their value, the value of such bottles, vials, or other vessels shall be added to the value of the contents for the ascertainment of the dutiable value of the latter; but if filled and not otherwise provided for, and the contents are not subject to an ad valorem duty or to a rate of duty based on their value, they shall pay a duty of 1 cent per pound in addition to the duty, if any, on their contents.

Cylinder and crown glass, polished, above 24 by 30 inches square and not exceeding 24 by 60 inches square, 20 cents per square foot; all above that 30 cents per square foot.

Unpolished cylinder, crown, and common window-glass, not exceeding 10 by 15 inches square, 1½ cents per pound; above that, and not exceeding 16 by 24 inches square, 1½ cents per pound; above that, and not exceeding 24 by 30 inches square, 2 cents per pound; all above that 2½ cents per pound: *Provided*, That unpolished cylinder, crown, and common window-glass, imported in boxes containing 50 square feet as nearly as sizes will permit, now known and commercially designated as 50 feet of glass, single thick and weighing not to exceed 55 pounds of glass per box, shall be entered and computed as 50 pounds of glass only; and that said kinds of glass imported in boxes containing, as nearly as sizes will permit, 50 feet of glass, now known and commercially designated as 50 feet of glass, double thick and not exceeding 90 pounds in weight, shall be entered and computed as 80 pounds of glass only; but in all other cases the duty shall be computed according to the actual weight of glass.

Cast polished plate-glass, silvered, or looking-glass plates, above 24 by 30 inches square and not exceeding 24 by 60 inches square, 25 cents per square foot; all above that, 45 cents per square foot.

Porcelain and Bohemian glass, chemical glassware, painted glassware, stained glass, and all other manufactures of glass, or of which glass shall be the com-

ponent material of chief value, not specially enumerated or provided for, 40 per cent. ad valorem.

Iron in pigs, iron kentledge, $6 per ton.

Iron railway bars, weighing more than 25 pounds to the yard, $11 per ton.

Steel railway bars and railway bars made in part of steel, weighing more than 25 pounds to the yard, $11 per ton.

Bar-iron, rolled or hammered, comprising flats not less than 1 inch wide nor less than three-eighths of 1 inch thick, seven-tenths of 1 cent per pound; comprising round iron not less than three-fourths of 1 inch in diameter, and square iron not less than three-fourths of 1 inch square, and flats less than 1 inch wide or less than three-eighths of 1 inch thick, round iron less than three-fourths of 1 inch and not less than seven-sixteenths of 1 inch in diameter, and square iron less than three-fourths of 1 inch square, 1 cent per pound: *Provided*, That all iron in slabs, blooms, loops, or other forms less finished than iron in bars, and more advanced than pig-iron, except castings, shall be rated as iron in bars, and pay a duty accordingly; and none of the above iron shall pay a less rate of duty than 35 per cent. ad valorem: *Provided further*, That all iron bars, blooms, billets, or sizes or shapes of any kind, in the manufacture of which charcoal is used as fuel, shall be subject to a duty of not less than $20 per ton.

Iron or steel tee-rails, weighing not over 25 pounds to the yard $14 per ton; iron or steel flat rails, punched, $15 per ton.

Round iron, in coils or rods, less than seven-sixteenths of 1 inch in diameter, and bars or shapes of rolled iron, not specially enumerated or provided for, 1 cent per pound.

Iron or steel flat with longitudinal ribs, for the manufacture of fencing, four-tenths of a cent per pound.

Sheet-iron, common or black, thinner than 1 inch and not thinner than No. 20 wire gauge, 1 cent per pound; thinner than No. 20 wire gauge and not thinner than No. 25 wire gauge, one and one-tenth of 1 per cent. per pound; thinner than No. 25 wire gauge and not thinner than No. 29 wire gauge, one and one-fourth of 1 cent per pound; thinner than No. 29 wire gauge, and all iron commercially known as common or black taggers iron, whether put up in boxes or bundles or not, 30 per cent. ad valorem: *Provided*, That on all such iron and steel sheets or plates aforesaid excepting on what are known commercially as tin-plates, terne plates, and taggers tin, when galvanized or coated with zinc or spelter, or other metals, or any alloy of those metals, one-fourth of 1 cent per pound additional when not thinner than No. 20 wire gauge; thinner than No. 20 wire gauge and not thinner than No. 25 wire gauge, one-half cent per pound additional, and when thinner than 25 wire gauge, three-fourths of 1 cent per pound additional.

Hoop, or band, or scroll, or other iron, 8 inches or less in width, and not thinner than No. 10 wire gauge, 1 cent per pound; thinner than No. 10 wire gauge and not thinner than No. 20 wire gauge, 1.1 cents per pound; thinner than No. 20 wire gauge, 1.3 cents per pound: *Provided*, That all articles not specially enumerated or provided for, whether wholly or partly manufactured, made from sheet, plate, hoop, band, or scroll iron herein provided for, or of which such sheet, plate, hoop, band, or scroll iron shall be the material of chief value, shall pay one-fourth of 1 cent per pound more duty than that imposed on the iron from which they are made, or which shall be such material of chief value.

Cast-iron pipe of every description, six-tenths of 1 cent per pound.

Cut nails and spikes, of iron or steel, 1 cent per pound.

Cut tacks, brads, or sprigs, 35 per cent. ad valorem.

Iron or steel railway fish-plates or splice-bars, eight-tenths of 1 cent per pound.

Wrought-iron or steel spikes, nuts, and washers, and horse, mule, or ox shoes. 1½ cents per pound.

Anvils, anchors, or parts thereof, mill-irons and mill-cranks, of wrought-iron, and wrought-iron for ships, and forgings of iron and steel, for vessels, steam-engines and locomotives, or parts thereof, weighing each 25 pounds or more, 1½ cents per pound.

Iron or steel rivets, bolts, with or without threads or nuts, or bolt blanks, and finished hinges or hinge blanks, 1½ cents per pound.

Iron or steel blacksmiths' hammers and sledges, track-tools, wedges, and crowbars, 1½ cents per pound.

Iron or steel axles, parts thereof, axle bars, axle blanks, or forgings for axles, without reference to the stage or state of manufacture, 1½ cents per pound.

Horseshoe nails, hob-nails, and wire nails, and all other wrought-iron or steel nails, not specially enumerated or provided for, 2½ cents per pound.

Boiler-tubes, or other tubes, or flues, or stays, of wrought-iron or steel, 1½ cents per pound.

Chain or chains, of all kinds, made of iron or steel, less than three-fourths of 1 inch in diameter, 1½ cents per pound; less than three-fourths of 1 inch and not less than three-eighths of 1 inch in diameter, 1½ cents per pound; less than three-eighths of 1 inch in diameter, 2 cents per pound.

Hand, back, and all other saws, not specially enumerated or provided for, 30 per centum ad valorem.

Files, file-blanks, rasps, and floats of all cuts and kinds, 35 per cent. ad valorem.

Iron or steel beams, girders, joists, angles, channels, car-truck channels, TT columns and posts, or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all other structural shapes of iron or steel, six-tenths of 1 cent per pound.

Steel wheels and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, and other railway tires, or parts thereof, wholly or partly manufactured, 2 cents per pound; iron or steel ingots, cogged ingots, blooms or blanks for the same without regard to the degree of manufacture, 1½ cents per pound.

Iron and steel wire and iron and steel wire, galvanized, and all manufactures of iron and steel wire and of iron and steel wire galvanized shall pay the duties now provided by law: *Provided*, That no such duty shall be in excess of 60 per cent. ad valorem.

Clippings from new copper, fit only for manufacture, 1 cent per pound.

Copper in plates, bars, ingots, Chili or other pigs, and in other forms, not manufactured, 2 cents per pound; in rolled plates, called braziers' copper, sheets, rods, pipes, and copper bottoms, 30 per cent. ad valorem.

Lead ore and lead dross, three-fourths of 1 cent per pound.

Lead, in pigs and bars, molten and old refuse lead run into blocks, and bars and old scrap lead fit only to be remanufactured, 1½ cents per pound. Lead in sheets, pipes, or shot, 2½ cents per pound.

Sheathing or yellow metal, 30 per cent. ad valorem.

Nickel, in ore or matte, 10 cents per pound on the nickel contained therein.

Zinc ores, 20 per cent. ad valorem.

Zinc spelter, or tutenegue, in blocks or pigs, and old worn-out zinc fit only to be remanufactured, 1½ cents per pound; zinc, spelter or tutenegue, in sheets, 2 cents per pound.

Hollowware, coated, glazed, or tinned, 2½ cents per pound.

Needles for knitting and sewing-machines, 20 per cent. ad valorem.

Pens, metallic, 35 per cent. ad valorem.

Type metal, 15 per cent. ad valorem.

New type for printing, 15 per cent. ad valorem.

Manufactures, articles, or wares, not specially enumerated or provided for, composed wholly or in part of copper, 35 per cent. ad valorem; manufactures, articles, or wares, not specially enumerated or provided for, composed of iron, steel, lead, nickel, pewter, tin, zinc, gold, silver, platinum, or any other metal, or of which any of the foregoing metals may be the component material of chief value, and whether partly or wholly manufactured, 40 per cent. ad valorem.

Cabinet and house furniture of wood, finished, 30 per cent. ad valorem.

Manufactures of cedar wood, granadilla, ebony, mahogany, rosewood, and satinwood, 30 per cent. ad valorem.

Manufactures of wood, or of which wood is the chief component part, not specially enumerated or provided for, 30 per cent. ad valorem.

All sugars not above No. 13 Dutch standard in color shall pay duty on their polariscopic test as follows, namely:

All sugars not above No. 13 Dutch standard in color, all tank bottoms, sirups of cane-juice or of beet-juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above seventy-five degrees, shall pay a duty of 1.15 cents per pound, and for every additional degree or fraction of a degree shown by the polariscopic test they shall pay thirty-two thousandths of a cent per pound additional.

All sugars above No. 13 Dutch standard in color shall be classified by the Dutch standard of color and pay duty as follows, namely:

All sugars above No. 13 and not above No. 16 Dutch standard, 2.20 cents per pound.

All sugar above No. 16 and not above No. 20 Dutch standard, 2.40 cents per pound.

All sugars above No. 20 Dutch standard, 2.80 cents per pound.

Molasses testing not above fifty-six degrees by the polariscope, shall pay a duty of 2½ cents per gallon; molasses testing above fifty-six degrees shall pay a duty of 6 cents per gallon: *Provided*, That if an export duty shall hereafter be laid upon sugar or molasses by any country from whence the same may be imported, such sugar or molasses so imported shall be subject to duty as provided by law at the date of the passage of this act.

Sugar candy, not colored, 5 cents per pound.

All other confectionery, 40 per cent. ad valorem.

Potato or corn starch, rice-starch, and other starch, 1 cent per pound.

Rice, cleaned, 2 cents per pound; uncleaned, or rice free of the outer hull, and still having the inner cuticle on, 1½ cents per pound.

Rice-flour and rice-meal 15 per cent. ad valorem.

Paddy, or rice having the outer hull on, 1 cent per pound.

Raisins, 1½ cents per pound.

Peanuts or ground-beans, three-fourths of 1 cent per pound; shelled, 1 cent per pound.

Mustard, ground or preserved, in bottles or otherwise, 6 cents per pound.

Cotton thread, yarn, warps, or warp yarn, whether single or advanced beyond the condition of single by twisting two or more single yarns together, whether on beams or in bundles, skeins, or cops, or in any other form, valued at not exceeding 40 cents per pound, 35 per cent. ad valorem; valued at over 40 cents per pound, 40 per cent. ad valorem.

On all cotton cloth, 40 per cent. ad valorem.

Spool-thread of cotton, 40 per cent. ad valorem.

Flax, hackled, known as dressed line, $10 per ton.

Brown and bleached linens, ducks, canvas, paddings, cot bottoms, diapers, crash, huckabacks, handkerchiefs, lawns, or other manufactures of flax, jute, or hemp, or of which flax, jute, or hemp shall be the component material of chief value, not specially enumerated or provided for, 25 per cent. ad valorem: *Provided*, That cuffs, collars, shirts, and other manufactures of wearing apparel, made in whole or in part of linen, and not otherwise provided for, and hydraulic hose, 35 per cent. ad valorem.

Flax, hemp, and jute yarns, and all twines of hemp, jute, jute-butts, sunn, sisal grass, ramie, and China grass, 15 per cent. ad valorem.

Flax or linen thread, twine, and packed thread and all manufactures of flax, or of which flax shall be the component material of chief value, not specially enumerated or provided for, 25 per cent. ad valorem.

Oil-cloth foundations, or floor-cloth canvass, or burlaps, exceeding 60 inches in width, made of flax, jute, or hemp, or of which flax, jute, or hemp, or either of them, shall be the component material of chief value, 25 per cent. ad valorem.

Oil-cloths for floors, stamped, painted, or printed, and on all other oil-cloth (except silk oil-cloth), and on water-proof cloth, not otherwise provided for, 25 per cent. ad valorem.

Gunny-cloth, not bagging, 15 per cent. ad valorem.

Bags and bagging, and like manufactures, not specially enumerated or provided for, including bagging for cotton composed wholly or in part of flax, hemp, jute, gunny cloth, gunny bags, or other material, three-eighths cent per pound.

Tarred cables or cordage, 25 per cent. ad valorem.

Untarred manila cordage, 25 per cent. ad valorem.

All other untarred cordage, 25 per cent. ad valorem.

Seines and seine and gilling twine, 25 per cent. ad valorem.

Sail duck, or canvas for sails, 25 per cent. ad valorem.

Russia and other sheetings, of flax or hemp, brown or white, 25 per cent. ad valorem.

All other manufactures of hemp or manila, or of which hemp or manila shall be a component material of chief value, not specially enumerated or provided for, 25 per cent. ad valorem.

Grass-cloth, and other manufactures of jute, ramie, China, and sisal grass, not specially enumerated or provided for, 25 per cent. ad valorem: *Provided*, That as to jute, jute-butts, sunn, and sisal grass, and manufactures thereof, except burlaps, not exceeding 60 inches in width, this act shall take effect January 1, 1889; and as to flax, hemp, manila, and other like substitutes for hemp, and the manufactures thereof, upon July 1, 1889.

SEC. 3. On and after October 1, 1888, there shall be admitted, when imported, free of duty:

All wools, hair of the alpaca, goat, and other like animals.

Wools on the skin.

Woolen rags, shoddy, mungo, waste, and flocks.

And on and after January 1, 1889, in lieu of the duties heretofore imposed on the articles hereinafter mentioned in this section, there shall be levied, collected, and paid the following rates of duty on said articles severally:

Woolen and worsted cloths, shawls, and all manufactures of wool of every description, made wholly or in part of wool or worsted, not specially enumerated or provided for, 40 per cent. ad valorem.

Flannels, blankets, hats of wool, knit goods, and all goods made on knitting-frames, balmorals, woolen and worsted yarns, and all manufactures of every description, composed wholly or in part of wool or worsted, the hair of the alpaca, goat, or other animals, not specially enumerated or provided for, 40 per cent. ad valorem: *Provided*, That from and after the passage of this act, and until the 1st day of October, 1888, the Secretary of the Treasury be, and he is hereby, authorized and directed to classify as woolen cloth all imports of worsted cloth, whether known under the name of worsted cloth or under the names of "worsteds" or "diagonals," or otherwise.

Bunting, 40 per cent. ad valorem.

Women's and children's dress goods, coat linings, Italian cloths, and goods of like description, composed in part of wool, worsted, the hair of the alpaca, goat, or other animals, 40 per cent. ad valorem.

Clothing, ready-made, and wearing apparel of every description, not specially enumerated or provided for, and balmoral skirts and skirting and goods of similar description or used for like purposes, composed wholly or in part of

wool, worsted, the hair of the alpaca, goat, or other animals, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, except knit goods, 45 per cent. ad valorem.

Cloaks, dolmans, jackets, talmas, ulsters, or other outside garments for ladies' and children's apparel, and goods of similar description or used for like purposes, composed wholly or in part of wool, worsted, the hair of the alpaca, goat, or other animals, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer (except knit goods), 45 per cent. ad valorem.

Webbings, gorings, suspenders, braces, beltings, bindings, braids, galloons, fringes, gimps, cords, cords and tassels, dress trimmings, head nets, buttons, or barrel buttons, or buttons of other forms for tassels or ornaments wrought by hand or braided by machinery, made of wool, worsted, the hair of the alpaca, goat, or other animals, or of which wool, worsted, the hair of the alpaca, goat, or other animals is a component material, 50 per cent. ad valorem.

Hemp and jute carpeting 6 cents per square yard.

Floor matting and floor mats exclusively of vegetable substances 20 per cent. ad valorem.

"All other carpets and carpetings, druggets, bockings, mats, rugs, screens, covers, hassocks, bedsides of wool, flax, cotton or parts of either or other material, 40 per cent. ad valorem."

Endless belts or felts for paper or printing machines, 30 per cent. ad valorem.

SEC. 4. That on and after the 1st day of October, 1888, in lieu of the duties heretofore imposed on the articles hereinafter mentioned, there shall be levied, collected, and paid the following rates of duty on said articles severally:

Paper, sized or glued, suitable only for printing paper, 15 per cent. ad valorem.

Printing paper, unsized, used for books and newspapers exclusively, 12 per cent. ad valorem.

Paper boxes, and all other fancy boxes, not otherwise provided for, 25 per cent. ad valorem.

Paper envelopes, 20 per cent. ad valorem.

Paper hangings, and paper for screens or fire-boards, surface-coated paper, and all manufactures of which surface-coated paper is a component material not otherwise provided for, and card-board, paper antiquarian, demy, drawing, elephant, foolscap, imperial, letter, note, and all other paper not specially enumerated or provided for, 25 per cent. ad valorem.

Beads and bead ornaments of all kinds, except amber, 40 per cent. ad valorem.

Blacking of all kinds, 20 per cent. ad valorem.

Bonnets, hats, and hoods for men, women, and children, composed of hair, whalebone, or any vegetable material, and not specially enumerated or provided for, 30 per cent. ad valorem.

Brooms of all kinds, 20 per cent. ad valorem.

Brushes of all kinds, 20 per cent. ad valorem.

Canes and sticks, for walking, finished, 20 per cent. ad valorem.

Card clothing, 20 cents per square foot; when manufactured from tempered steel wire, 40 cents per square foot.

Carriages, and parts of, not specially enumerated or provided for, 30 per cent. ad valorem.

Dolls and toys, 30 per cent. ad valorem.

Fans of all kinds, except palm-leaf fans, of whatever material composed, 30 per cent. ad valorem.

Feathers of all kinds, when dressed, colored, or manufactured, including dressed and finished birds and artificial and ornamental feathers and flowers, or parts thereof, of whatever material composed, not specially enumerated or provided for, 35 per cent. ad valorem.

Friction and lucifer matches of all descriptions, 25 per cent. ad valorem.

Gloves of all descriptions, wholly or partially manufactured, 40 per cent. ad valorem: *Provided*, That gloves made of silk taffeta shall be taxed 50 per cent. ad valorem.

Gun wads of all descriptions, 25 per cent. ad valorem.

Gutta-percha, manufactured, and all articles of hard rubber not specially enumerated or provided for, 30 per cent. ad valorem.

Hair, human, if clean or drawn, but not manufactured, 20 per cent. ad valorem.

Bracelets, braids, chains, rings, curls, and ringlets composed of hair, or of which hair is the component material of chief value, and all manufactures of human hair, 25 per cent. ad valorem.

Hats, materials for: Braids, plaits, flats, willow sheets and squares, fit only for use in making or ornamenting hats, bonnets, and hoods, composed of straw, chip, grass, palm-leaf, willow, hair, whalebone, or any vegetable material, not specially enumerated or provided for, 20 per cent. ad valorem.

Hat bodies of cotton, 30 per cent. ad valorem.

Hatters' plush, composed of silk or of silk and cotton, 15 per cent. ad valorem.

Inks of all kinds, and ink powders, 20 per cent. ad valorem.

Japanned ware of all kinds not specially enumerated or provided for, 30 per cent ad valorem.

Kaolin crude, $1 per ton.

China clay or wrought kaolin, $2 per ton.

Marble of all kinds, in block rough or squared, 40 cents per cubic foot.

Marble, sawed, dressed, or otherwise, including marble slabs and marble paving-tiles, 85 cents per cubic foot.

All manufactures of marble not specially enumerated or provided for, 30 per cent. ad valorem.

Papier-maché, manufactures, articles, and wares of, 25 per cent. ad valorem.

Percussion caps, 30 per cent. ad valorem.

Philosophical apparatus and instruments, 25 per cent. ad valorem.

Umbrella and parasol ribs, and stretcher frames, tips, runners, handles, or other parts thereof, when made in whole or chief part of iron, steel, or any other metal, 30 per cent. ad valorem; umbrellas, parasols, and shades, when covered with silk or alpaca, 50 per cent. ad valorem; all other umbrellas, 30 per cent. ad valorem.

Watches, watch-cases, watch-movements, parts of watches, watch-glasses, and watch-keys, whether separately packed or otherwise, and watch materials not specially enumerated or provided for in this act, 25 per cent. ad valorem.

Webbing, composed of cotton, flax, or a mixture of these materials, not specially enumerated or provided for in this act, 30 per cent. ad valorem.

SEC. 5. That the following amendments to and provisions for existing laws shall take effect on and after the passage and approval of this act:

Section 6 of the act of March 3, 1883, entitled "An act to reduce internal revenue taxation, and for other purposes," providing a substitute for title 33 of the Revised Statutes of the United States, is hereby amended as to certain of the sections and parts of sections or schedules in such substituted title so that they shall be as follows, respectively:

"SEC. 2499. Each and every imported article not enumerated or provided for in any schedule in this title, which is similar, either in material, quality, textures or the use to which it may be applied, to any article enumerated in this title as chargeable with duty, shall pay the same rate of duty which is levied on the enumerated article which it most resembles in any of the particulars before mentioned; and if any non-enumerated article equally resembles two or more enumerated articles on which different rates of duty are chargeable, there shall be levied on such non-enumerated article the same rate of duty as is chargeable on the article which it resembles paying the highest rate of duty; and on articles, not otherwise provided for, manufactured from two or more materials, the duty shall be assessed at the rate at which the dutiable component material of chief value may be chargeable; and the words "component material of chief value," whenever used in this title, shall be held to mean that dutiable component material which shall exceed in value any other single component material found in the article; and the value of each component material shall be determined by the ascertained value of such material in its last form and condition before it became a component material of such article. If two or more rates of duty shall be applicable to any imported article, it shall pay duty at the highest of such rates: *Provided*, That any non-enumerated article similar in material, and quality, and texture, and the use to which it may be applied to any article on the free-list, and in the manufacture of which no dutiable materials are used, shall be free of duty."

SEC. 2502. Schedule A—Chemical products.—By striking out from this schedule the words "distilled spirits containing 50 per cent. of anhydrous alcohol, $1 per gallon;" also, by striking out the words "alcohol containing 94 per cent. anhydrous alcohol, $2 per gallon."

THE FREE-LIST.

SEC. 2503. By striking out the clause in this section commencing with the words "articles the growth, produce, and manufacture of the United States," and inserting in lieu thereof the following:

"Articles the growth, produce, and manufacture of the United States, when returned after having been exported without having been advanced in value by any process of manufacture or by labor thereon; casks, barrels, carboys, bags, and other vessels of American manufacture exported filled with American products, or exported empty and returned filled with foreign products, including shooks when returned as barrels or boxes; but proof of the identity of such articles shall be made under general regulations to be prescribed by the Secretary of the Treasury; and if any of such articles are subject to internal tax at the time of exportation, such tax shall be proved to have been paid before exportation, and not refunded: *Provided*, That this clause shall not include any article upon which an allowance of drawback has been made, the reimportation of which is hereby prohibited except upon payment of duties equal to the drawbacks allowed."

The clause relating to "wearing-apparel," etc. (tariff, paragraph 815), is hereby amended so that it shall read as follows:

"Wearing-apparel, implements, instruments, and tools of trade, occupation, or employment, professional books, and other personal effects (not merchandise) of persons arriving in the United States, not exceeding in value $500, and not intended for the use of any other person or persons, nor for sale; but this exemption shall not be construed to include machinery or other articles imported for use in any manufacturing establishment or for sale: *Provided, however*, That the limitation in value above specified shall not apply to wearing apparel and other personal effects which may have been taken from the United States to foreign countries by the persons returning therefrom; and such last-named articles shall, upon production of evidence satisfactory to the collector or officer acting as such that they have been previously exported from the United States by such persons, and have not been advanced in value or improved in condition by any process of manufacture or labor thereon since so exported, be exempt from the payment of duty: *And provided further*, That all articles of foreign production or manufacture which may have been once imported into the United States and subjected to the payment of duty shall, upon reimportation, if not improved in condition, except by repairs, by any means, since their exportation from the United States, be entitled to exemption from duty upon their identity being established, under such rules and regulations as may be prescribed by the Secretary of the Treasury."

"Theatrical scenery and actors' and actresses' wardrobes brought by theatrical managers and professional actors and actresses arriving from abroad for their temporary use in the United States; works of art, drawings, engravings, photographic pictures, and philosophical and scientific apparatus brought by professional artists, lecturers, or scientists arriving from abroad for use by them temporarily for exhibition and in illustration, promotion, and encouragement of art, science, or industry in the United States; and wearing apparel and other personal effects of tourists from abroad visiting the United States shall be admitted to free entry under such regulations as the Secretary of the Treasury may prescribe; and bonds shall be given, whenever required by the Secretary of the Treasury, for the payment to the United States of such duties as may be imposed by law upon any and all such articles as shall not be exported within six months after such importation: *Provided, however*, That the Secretary of the Treasury may, in his discretion, extend such period for a further term of six months in cases where application therefor shall be made."

"Wearing-apparel, old and worn, not exceeding $100 in value, upon production of evidence satisfactory to the collector and naval officer (if any) that the same has been donated and imported in good faith for the relief or aid of indigent or needy persons residing in the United States, and not for sale."

SEC. 6. That section 7 of the act approved March 3, 1883, entitled "An act to reduce internal-revenue taxation, and for other purposes," is hereby amended so that it shall read as follows:

"Whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value or wholesale price of such merchandise, at the time of exportation to the United States, in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought and sold for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition packed, ready for shipment to the United States: *Provided*, That if there be used for covering or holding imported merchandise, whether dutiable or free, any material or article, other than the ordinary, usual, and necessary coverings used for covering or holding such merchandise, duty shall be levied and collected thereon at the rate to which such material or article would be subject if imported separately:" *Provided, further*, That so much of the foregoing as relates to boxes, sacks, or coverings shall not apply to boxes, sacks, or such other boxing or covering as may be the usual and necessary covering for machinery or parts thereof.

SEC. 7. That section 8 of the act of March 3, 1883, entitled "An act to reduce internal-revenue taxation, and for other purposes," amending section 2841 of the Revised Statutes of the United States, is hereby further amended so that said section of the Revised Statutes shall be as follows:

"SEC. 2841. Whenever merchandise imported into the United States is entered by invoice, one of the following declarations, according to the nature of the case, shall be filed with the collector of the port, at the time of entry, by the owner, importer, consignee, or agent; which declaration so filed shall be duly signed by the owner, importer, consignee, or agent, before the collector, or before a notary public or other officer duly authorized by law to administer oaths and take acknowledgments, who may be designated by the Secretary of the Treasury to receive such declarations and to certify to the identity of the persons making them; and every officer so designated shall file with the collector of the port a copy of his official signature and seal: *Provided*, That if any of the invoices or bills of lading of any merchandise imported in any one vessel, which should otherwise be embraced in said entry, have not been received at the date of the entry, the declaration may state the fact, and thereupon such merchandise of which the invoices or bills of lading are not produced shall not be included in such entry, but may be entered subsequently."

"Declaration of consignee, importer, or agent.

"I, ——— ———, do solemnly and truly declare that the invoice and bill of lading now presented by me to the collector of ——— are the true and only invoice and bill of lading by me received of all the goods, wares, and merchandise imported in the ———, whereof ——— ——— is master, from ———, for account of any person whomsoever for whom I am authorized to enter the same; that the said invoice and bill of lading are in the state in which they were actually received by me, and that I do not know nor believe in the existence of any other invoice or bill of lading of the said goods, wares, and merchandise; that the entry now delivered to the collector contains a just and true account of the said goods, wares, and merchandise, according to the said invoice and bill of lading; that nothing has been, on my part, nor to my knowledge on the part of any other person, concealed or suppressed, whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; that the said invoice and the declaration therein are in all respects true, and were made by the person by whom the same purports to have been made; and that if at any time hereafter I discover any error in the said invoice, or in the account now rendered of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of this district. And I do further solemnly and truly declare that to the best of my knowledge and belief [insert the name and residence of the owner or owners] is [or are] the owner [or owners] of the goods, wares, and merchandise mentioned in the annexed entry; that the invoice now produced by me exhibits the actual cost [if purchased] or the actual market value or wholesale price [if otherwise obtained], at the time of exportation in the principal markets of the country where procured, of the said goods, wares, and merchandise, including the value of all cartons, cases, crates, boxes, sacks, and covering of any kind, and all other costs, charges, and expenses incident to placing said goods, wares, and merchandise in condition packed ready for shipment to the United States, and no other or different discount, bounty, or drawback but such as has been actually allowed on the same."

"Declaration of owner in cases where merchandise has been actually purchased.

"I, ——— ———, do solemnly and truly declare that the entry now delivered by me to the collector of ——— contains a just and true account of all the goods, wares, and merchandise imported by or consigned to me, in the ———, whereof ——— ——— is master, from ———; that the invoice and entry which I now produce contain a just and faithful account of the actual cost of the said goods, wares, and merchandise, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing said goods, wares, and merchandise in condition packed, ready for shipment to the United States, and no other discount, drawback, or bounty but such as has been actually allowed on the same; that I do not know nor believe in the existence of any invoice or bill of lading other than those now produced by me, and that they are in the state in which I actually received them. And I further solemnly and truly declare that I have not in the said entry or invoice concealed or suppressed anything whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; that the said invoice and the declaration thereon are in all respects true, and were made by the person by whom the same purports to have been made; and that if at any time hereafter I discover any error in the said invoice or in the account now produced of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of this district."

"Declaration of manufacturer or owner in cases where merchandise has not been actually purchased."

"I, ——— ———, do solemnly and truly declare that the entry now delivered by me to the collector of ——— contains a just and true account of all the goods, wares, and merchandise imported by or consigned to me in the ———, whereof ——— ——— is master, from ———; that the said goods, wares, and merchandise were not actually bought by me, or by my agent, in the ordinary mode of bargain and sale, but that nevertheless the invoice which I now produce contains a just and faithful valuation of the same, at their actual market value or wholesale price at the time of exportation, in the principal markets of the country where procured for my account [or for account of myself or partners]; that the said invoice contains also a just and faithful account of all the cost of finishing said goods, wares, and merchandise to their present condition, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs and charges incident to placing said goods, wares, and merchandise in condition packed, ready for shipment to the United States, and no other discount, drawback, or bounty but such as has been actually allowed on the said goods, wares, and merchandise; and the said invoice and the declaration thereon are in all respects true, and were made by the person by whom the same purports to have been made; that I do not know nor believe in the existence of any invoice or bill of lading other than those now produced by me, and that they are in the state in which I actually received them. And I do further solemnly and truly declare that I have not in the said entry or invoice concealed or suppressed anything whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; and that if at any time hereafter I discover any error in the said invoice, or in the account now produced of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of this district."

SEC. 8. That any person who shall knowingly make any false or untrue statement in the declarations provided for in the preceding section, or shall aid or procure the making of any such false statement as to any matter material thereto, shall, on conviction thereof, be punished by a fine of not exceeding $5,000, or by imprisonment at hard labor not more than three years, or both, within the discretion of the court: *Provided*, That nothing in this section shall be construed to relieve imported merchandise from forfeiture for any cause elsewhere provided by law.

SEC. 9. That sections 2970 and 2983 of the Revised Statutes of the United States are hereby amended so that the same shall be, respectively, as follows:

"SEC. 2970. Any merchandise deposited in bond in any public or private bonded warehouse may be withdrawn for consumption within three years from the date of original importation, on payment of the duties and charges to which it may be subject by law at the time of such withdrawal: *Provided*, That nothing herein shall affect or impair existing provisions of law in regard to the disposal of perishable or explosive articles."

"SEC. 2983. In no case shall there be any abatement of the duties or allowance made for any injury, damage, or deterioration sustained by any merchandise while deposited in any public or private bonded warehouse: *Provided*, That the duty assessed on merchandise withdrawn from any such warehouse shall be assessed on the quantity withdrawn therefrom at the time of such withdrawal; but no greater allowance for leakage or evaporation of wines, liquors, and distilled spirits shall be made than is or may be allowed by law on domestic spirits or wines in bond: *And provided further*, That nothing in this section as amended shall restrict or in any way affect the liability of the proprietors of bonded warehouses on their bonds: *And provided further*, That nothing herein shall restrain or limit the exercise of the authority conferred on the Secretary of the Treasury by section 2984 of the Revised Statutes."

SEC. 10. That sections 2803 and 3058 of the Revised Statutes be amended to read as follows:

"SEC. 2803. Any baggage or personal effects arriving in the United States in transit to any foreign country may be delivered by the parties having it in charge to the collector of the proper district, to be by him retained, without the payment or exaction of any import duty, or to be forwarded by such collector to the collector of the port of departure, and to be delivered to such parties on their departure for their foreign destination, under such rules, regulations, and fees as the Secretary of the Treasury may prescribe."

"SEC. 3058. All merchandise imported into the United States shall, for the purpose of this title, be deemed and held to be the property of the person to whom the merchandise may be consigned; but the holder of any bill of lading consigned to order and properly indorsed shall be deemed the consignee thereof; and in case of the abandonment of any merchandise to the underwriters, the latter may be recognized as the consignee."

SEC. 11. That authority is hereby given to the Secretary of the Treasury, in his discretion to dispense whenever expedient with the triplicate invoices and consular certificates now required by sections 2853, 2854, 2855 of the Revised Statutes of the United States; and triplicate invoices and consular certificates shall in no case be required when the value of the merchandise shipped by any one consignor, in any one vessel, at one and the same time does not exceed $100; and the Secretary of the Treasury, with the concurrence of the Secretary of State, is hereby authorized to make such general regulations in regard to invoices and consular certificates as in his judgment the public interest may require.

SEC. 12. That all fees exacted and oaths administered by officers of the customs, under or by virtue of existing laws of the United States, upon the entry of imported goods and the passing thereof through the customs, and also upon all entries of domestic goods, wares, and merchandise for exportation, be, and the same are hereby, abolished; and in case of entry of merchandise for exportation, a declaration, in lieu of an oath, shall be filed, in such form and under such regulations as may be prescribed by the Secretary of the Treasury; and the penalties for false statements in such declaration provided in the fourth section of this act shall be applicable to declarations made under this section: *Provided*, That where such fees, under existing laws, constitute, in whole or in part, the compensation of any officer, such officer shall receive, from and after the passage of this act, a fixed sum for each year equal to the amount which he would have been entitled to receive as fees for such services.

SEC. 13. That section 2900 of the Revised Statutes be, and hereby is, amended so as to read as follows:

"SEC. 2900. The owner, consignee, or agent of any imported merchandise which has been actually purchased may at the time, and not afterward, when he shall make and verify his written entry of his merchandise, make such addition in the entry to the cost or value given in the invoice, or *pro forma* invoice, or statement in form of an invoice, which he shall produce with his entry, as in his opinion may raise the same to the actual market value or wholesale price of such merchandise, at the period of exportation to the United States, in the principal markets of the country from which the same has been imported; and the collector within whose district any merchandise, whether the same has been actually purchased or procured otherwise than by purchase, may be imported or entered, shall cause such actual market value or wholesale price thereof to be appraised; and if such appraised value shall exceed by 10 per cent. or more the entered value, then, in addition to the duties imposed by law on the same, there shall be levied and collected a duty of 20 per cent. ad valorem on such appraised value. The duty shall not, however, be assessed upon an amount less than the invoice or entered value, except as elsewhere especially provided in this act."

SEC. 14. That all invoices of imported merchandise shall, at or before the shipment of the merchandise, be produced to the consul, vice-consul, or commercial agent of the United States of the consular district from which the merchandise is imported to the United States, and if there be no consul, vice-consul, or commercial agent for said district, then said invoices shall be produced to the consul, vice-consul, or commercial agent of the district nearest thereto, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true; that it contains, if the merchandise was obtained by purchase, a true and full statement of the time when, and the place where, the same was purchased, and the actual cost thereof and of all charges thereon; and that no discounts, bounties, or drawbacks are contained in the invoice but such as have actually been allowed thereon; and when obtained in any other manner than by purchase, the actual market value or wholesale price thereof at the time of exportation to the United States in the principal markets of the country from whence exported; and that no different invoice of the merchandise mentioned in the invoice so produced, has been or will be furnished to any one. If the merchandise was actually purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is the currency which was actually paid for the merchandise by the purchaser.

SEC. 15. That section 2931 of the Revised Statutes be, and hereby is, amended so as to read as follows:

"SEC. 2931. The decision of the collector of customs or officer acting as such at the port of importation and entry, as to the rate and amount of duties to be paid on any merchandise, and the dutiable costs and charges thereon, shall be final and conclusive against all persons interested in such merchandise, unless the owner, importer, consignee, or agent of the merchandise shall, within ten days after and not on any day before the ascertainment and liquidation of the duties by the proper officers of the customs, as well in cases of merchandise entered in bond as for consumption, give notice in writing to the collector if dissatisfied with the aforesaid decision, setting forth therein, distinctly and specifically, and in respect to each entry, the reasons of his objection thereto, and shall also, within thirty days after the date of such ascertainment and liquidation, appeal therefrom to the Secretary of the Treasury, who, on receiving such appeal, shall forthwith call upon the collector for a report thereon; and the collector shall thereupon, if he adheres to his decision, set forth, specifically and in detail, to the Secretary, the reasons therefor; and the decision of the Secretary on such appeal shall be final and conclusive, and such merchandise, or costs and charges, shall be liable to duty accordingly, unless suit shall be brought, within ninety days after the decision of the Secretary of the Treasury on such appeal, for any duties which shall have been paid before the date of such decision on such merchandise, or costs and charges, or within ninety days after the payment of duties paid after the decision of the Secretary. No suit shall be begun or maintained for the recovery of any duties alleged to have been erroneously or illegally exacted, until the decision of the Secretary of the Treasury shall have been first had on such appeal, unless the decision of the Secretary shall be delayed more than ninety days from the date of such appeal. And when a suit shall be brought by the United States to recover the additional duties found due on any ascertainment and liquidation thereof, and not paid, the defendant or defendants shall not be permitted to set up any plea or matter in defense excepting such as shall have been set forth in a protest and appeal made as herein prescribed."

SEC. 16. That the section of the Revised Statutes numbered 3012 shall be, and hereby is, amended by adding at the end of said section the following words:

"And there shall be attached to the said bill of particulars, when served as aforesaid, a copy of each and every such protest or notice of dissatisfaction, and of every appeal relied upon by the plaintiff or plaintiffs in said suit; and the said bill of particulars shall declare the date of liquidation; and a bill of particulars, having been served as aforesaid, shall not thereafter be amended by the plaintiff, or by the court on the plaintiff's motion, so as to increase the total sum claimed therein as having been exacted in excess."

SEC. 17. That no suit which by this act, or by any law of the United States, is

permitted to be begun against a collector of customs to recover money alleged to have been illegally exacted by him on imported merchandise, shall hereafter be begun or maintained in any court of any State of the United States, but each and every such suit shall be begun in the circuit court of the United States for the district in which such alleged illegal action shall have been made.

SEC. 18. That section 3012¼ of the Revised Statutes shall be, and hereby is, amended so as to read as follows:

"Whenever it shall be shown to the satisfaction of the Secretary of the Treasury (first) that, in any case of unascertained or estimated duties, more money has been paid to or deposited with a collector of customs than the law required to be paid or deposited; and also (second) whenever the Secretary of the Treasury shall have decided, on an appeal to him as herein provided, that more money has been paid to or deposited with a collector of customs than the law required; and also (third) whenever any judgment shall have been recovered and entered, in any court of the United States, against a collector of customs, for duties illegally exacted by him on imported merchandise, and a certificate of probable cause shall have been entered in said suit, in compliance with the provisions and requirements of section 989 of the Revised Statutes, from which judgment the Attorney-General shall certify, in conformity with the act of March 3, 1875 (chapter 136), that no appeal or writ of error will be taken by the United States, and from which judgment the Secretary of the Treasury shall also be satisfied that no such appeal or writ of error ought to be taken; and also (fourth) whenever any suit or suits have been begun against a collector of customs to recover money exacted by him and paid under protest, and an appeal, as required by law, and a bill of particulars has been served therein on the defendant or his attorney, as required by law, and when by the legal effect of any judgment of a court of the United States, satisfactory to the Attorney-General and the Secretary of the Treasury as aforesaid, the said exaction of such duties shall have been declared illegal, and protests, appeals, and bills of particulars have been made according to the law in force at the time of importation, and the proper officers of the customs shall, under the instructions of the Secretary of the Treasury, have reliquidated the entries covered, by said suit or suits, and bill or bills of particulars, according to the principles and rules of law prescribed by said judgment, and the district attorney appearing of record for the defendant shall certify that such suits have been discontinued, the Secretary of the Treasury shall, in each and all of the before-mentioned cases, always excepting judgments or 'judgment cases' in suits commonly known as 'charges and commission' suits, which last named shall only be paid in pursuance of a specific appropriation therefor, draw his warrant upon the Treasurer in favor of the person or persons entitled to the overpayment, or the sum expressed in said judgment, or the sum thus found due on reliquidation of the entries in discontinued suits, including costs payable by law, directing the Treasurer to refund and pay the same out of any money in the Treasury not otherwise appropriated. The necessary moneys therefor are hereby appropriated, and this appropriation shall be deemed a permanent indefinite appropriation."

SEC. 19. That section 2927 of the Revised Statutes is hereby amended by the addition of the following words thereto:

"No allowances for damages to goods, wares, and merchandise imported into the United States shall hereafter be made in the estimation and liquidation of duties thereon; but the importer thereof may abandon to the Government all or any portion of goods, wares, and merchandise included in any invoice, and be relieved from the payment of the duties on the portion so abandoned: *Provided*, That the portion so abandoned shall amount to 10 per cent. or over of the total value of the invoice."

SEC. 20. That any person who shall give or offer to give or promise to give, excepting for such duties or fees as have been levied or required according to the forms of law, any money or thing of value, directly or indirectly, to any officer or servant of the customs or of the United States, in connection with or pertaining to the importation, or appraisement, or entry, or examination, or inspection of good , wares, or merchandise, including herein any baggage, or of the liquidation of the entry thereof, shall, on conviction thereof, be fined not less than $100 nor more than $5,000, or be imprisoned at hard labor not more than two years, or both, at the discretion of the court; and evidence of such giving, or offering, or promising to give, satisfactory to the court in which such trial is had, shall be regarded as *prima facie* evidence that such giving, or offering, or promising was contrary to law, and shall put upon the accused the burden of proving that such act was innocent and not done with an unlawful intention.

SEC. 21. That any officer or servant of the customs or of the United States who shall, excepting for lawful duties or fees, demand, exact, or receive from any person, directly or indirectly, any money or thing of value in connection with or pertaining to the importation, appraisement, entry, examination, or inspection of goods, wares, or merchandise, including herein any baggage or liquidation of the entry thereof, shall, on conviction thereof, be fined not less than $100 nor more than $5,000, or be imprisoned at hard labor not more than two years, or both, at the discretion of the court; and evidence of such demanding, exacting, or receiving satisfactory to the court in which such trial is had, shall be *prima facie* evidence that such demanding, exacting, or receiving was contrary to law, and shall put upon the accused the burden of proving that such act was innocent and not with an unlawful intention.

SEC. 22. That section 2864 of the Revised Statutes be, and hereby is, amended so as to read as follows:

"SEC. 2864. That any owner, importer, consignee, agent, or other person who shall, with intent to defraud the revenue, make or attempt to make any entry of imported merchandise by means of any fraudulent or false invoice, affidavit, letter, or paper, or by means of any false statement, written or verbal, or who shall be guilty of any willful act or omission by means whereof the United States shall be deprived of the lawful duties, or any portion thereof, accruing upon the merchandise, or any portion thereof, embraced or referred to in such invoice, affidavit, letter, paper, or statement, or affected by such act or omission, shall for each offense be fined in any sum not exceeding $5,000 nor less than $50, or be imprisoned for any time not exceeding two years, or both; and, in addition to such fine, such merchandise, or the value thereof, shall be forfeited, which forfeiture shall only apply to the whole of the merchandise, or the value thereof, in the case or package containing the particular article or articles of merchandise to which such fraud or alleged fraud relates; and anything contained in any act which provides for the forfeiture or confiscation of an entire invoice in consequence of any item or items contained in the same being undervalued be, and the same is hereby, repealed."

SEC. 23. That all imported goods, wares, and merchandise which may be in the public stores or bonded warehouses or on shipboard within the limits of any port of entry, or remaining in the customs offices, on the day and year when this act, or any provision thereof, shall go into effect, except as otherwise provided in this act, shall be subject to no other duty, upon the entry thereof for consumption, than if the same were imported respectively after that day; and all goods, wares, and merchandise remaining in bonded warehouses on the day and year this act, or any provision thereof, shall take effect, and upon which the duties shall have been paid, shall be entitled to a refund of the difference between the amount of duties paid and the amount of duties said goods, wares, and merchandise would be subject to if the same were imported respectively after that date.

SEC. 24. That sections 3011 and 3013 of the Revised Statutes be, and hereby are, repealed as to all importations made after the date of this act.

SEC. 25. That on and after the 1st day of October, 1888, all taxes on manufactured chewing-tobacco, smoking-tobacco, and snuff, all special taxes upon manufacturers of and dealers in said articles, and all taxes upon wholesale and retail dealers in leaf-tobacco be, and are hereby, repealed: *Provided*, That there shall be allowed a drawback or rebate of the full amount of tax on all original and unbroken factory packages of smoking and manufactured tobacco and snuff held by manufacturers, factors, jobbers, or dealers on said 1st day of October, if claim therefor shall be presented to the Commissioner of Internal Revenue prior to the 1st day of January, 1889, and not otherwise. No claim shall be allowed and no drawback shall be paid for an amount less than $5, and all sums required to satisfy claims under this act shall be paid out of any money in the Treasury not otherwise appropriated. It shall be the duty of the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to adopt such rules and regulations, and to prescribe and furnish such blanks and forms as may be necessary to carry this section into effect.

SEC. 26. That on and after the 1st day of October, 1888, manufacturers of cigars shall each pay a special tax of $3 annually, and dealers in tobacco shall each pay a special tax of $1 annually. Every person whose business it is to sell or offer for sale cigars, cheroots, or cigarettes shall, on and after the 1st day of October, 1888, be regarded as a dealer in tobacco, and the payment of any other special tax shall not relieve any person who sells cigars, cheroots, or cigarettes from the payment of this tax: *Provided*, That no manufacturer of cigars, cheroots, or cigarettes shall be required to pay a special tax as a dealer in tobacco, as above defined, for selling his own products at the place of manufacture: *Provided*, That the bond required to be given in conformity with the provisions of Title XXXV of the Revised Statutes of the United States, by every person engaging in the manufacture of cigars in the internal-revenue districts of the United States, shall be in such penal sum as the collector of internal revenue may require, not less than $100, with an addition of $10 for each person proposed to be employed by such person in making cigars.

SEC. 27. That the sum of $20,000, or so much thereof as may be necessary, be, and the same is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the alteration of dies, plates, and stamps, for furnishing blanks and forms, and for such other expenses as shall be incident to the collection of special taxes at the reduced rates provided in this act.

SEC. 28. That section 3361 of the Revised Statutes of the United States, and all laws and parts of laws which impose restrictions upon the sale of leaf-tobacco, be, and are hereby, repealed.

SEC. 29. That whenever in any statute denouncing any violation of the internal-revenue laws as a felony, crime, or misdemeanor, there is prescribed in such statute a minimum punishment, less than which minimum no fine, penalty, imprisonment, or punishment is authorized to be imposed, every such minimum punishment is hereby abolished; and the court or judge in every such case shall have discretion to impose any fine, penalty, imprisonment, or punishment not exceeding the limit authorized by such statute, whether such fine, penalty, imprisonment, or punishment be less or greater than the said minimum so prescribed.

SEC. 30. That no warrant, in any case under the internal-revenue laws, shall be issued upon an affidavit making charges upon information and belief, unless such affidavit is made by a collector or deputy collector of internal revenue or by a revenue agent; and, with the exception aforesaid, no warrant shall be issued except upon a sworn complaint, setting forth the facts constituting the offense and alleging them to be within the personal knowledge of the affiant. And the United States shall not be liable to pay any fees to marshals, clerks, commissioners, or other officers for any warrant issued or arrest made in prosecutions under the internal-revenue laws, unless there be a conviction or the prosecution has been approved, either before or after such arrest, by the attorney of the United States for the district where the offense is alleged to have been committed, or unless the prosecution was commenced by information or indictment.

SEC. 31. That whenever a warrant shall be issued by a commissioner or other judicial officer having jurisdiction for the arrest of any person charged with a criminal offense, such warrant, accompanied by the affidavit on which the same was issued, shall be returnable before some judicial officer named in section 1014 of the Revised Statutes residing in the county of arrest, or if there be no such judicial officer in that county, before some such judicial officer residing in another county nearest to the place of arrest; and the judicial officer, before whom the warrant is made returnable as herein provided, shall have exclusive authority to make the preliminary examination of every person arrested as aforesaid, and to discharge him, admit him to bail, or commit him to prison, as the case may require: *Provided*, That this section shall not apply to the Indian Territory.

SEC. 32. That the circuit courts of the United States, and the district courts or judges thereof exercising circuit-court powers, and the district courts of the Territories, are authorized to appoint, in different parts of the several districts in which said courts are held, as many discreet persons to be commissioners of the circuit courts as may be deemed necessary; and said courts, or the judges thereof, shall have authority to remove at pleasure any commissioners heretofore or hereafter appointed in said districts.

SEC. 33. That the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may compromise any civil or criminal case, and may reduce or remit any fine, penalty, forfeiture, or assessment under the internal-revenue laws.

SEC. 34. That section 3176 of the Revised Statutes be amended so as to read as follows:

"SEC. 3176. The collector or any deputy collector in any district shall enter into and upon the premises, if it be necessary, of any person therein who has taxable property and who refuses or neglects to render any return or list required, or who renders a false or fraudulent return or list, and make, according to the best information which he can obtain, including that derived from the evidence elicited by the examination of the collector, and on his own view and information, such list or return, according to the form prescribed, of the objects liable to tax owned or possessed or under the care or management of such person, and the Commissioner of Internal Revenue shall assess the tax thereon, including the amount, if any, due for special tax, and a penalty of 25 per cent., and he may add to such tax interest at the rate of 10 per cent. per annum thereon from and after the date when such tax became due and payable. The interest so added to the tax shall be collected at the same time and in the same manner as the tax. And the list or return so made and subscribed by such collector or deputy collector shall be deemed good and sufficient for all legal purposes."

SEC. 35. That nothing in this act shall in any way change or impair the force or effect of any treaty between the United States and any other government, or any laws passed in pursuance of or for the execution of any such treaty, so long as such treaty shall remain in force in respect of the subjects embraced in this act; but whenever any such treaty, so far as the same respects said subjects, shall expire or be otherwise terminated, the provisions of this act shall be in force in all respects in the same manner and to the same extent as if no such treaty had existed at the time of the passage hereof.

SEC. 36. That section 3255 of the Revised Statutes of the United States be amended by striking out all after said number and substituting therefor the following:

"And the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may exempt distillers of brandy made exclusively from apples, peaches, grapes, or other fruits from any provision of this title relating to the manufacture of spirits, except as to the tax thereon, when in his judgment it may seem expedient to do so.

"The Secretary of the Treasury may exempt all distilleries which mash less than 25 bushels of grain per day from the operations of the provisions of this title relating to the manufacture of spirits, except as to the payment of the tax, which said tax shall then be levied and collected on the capacity of said distilleries; and said distilleries may, at the discretion of said Secretary, then be run and operated without storekeepers, or 'storekeepers and gaugers.' And the Commissioner of Internal Revenue, with the approval of said Secretary, may establish special warehouses in which he may authorize to be deposited the product of any number of said distilleries to be designated by him, and in which any distiller operating any such distillery may deposit his product, which, when so deposited, shall be subject to all the laws and regulations as to bonds, tax, removals, and otherwise as other warehouses. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby authorized and directed to make such rules and regulations as may be necessary to carry out the provisions of this section: *Provided*, That such regulations shall be adopted as will require that all the spirits manufactured shall be subject to the payment of the tax according to law."

SEC. 37. That the provisions of an act entitled "An act relating to the production of fruit brandy, and to punish frauds connected with the same," approved March 3, 1877, be extended and made applicable to brandy distilled from apples or peaches, or from any other fruit the brandy distilled from which is not now required, or hereafter shall not be required, to be deposited in a distillery warehouse: *Provided*, That each of the warehouses established under said act, or which may hereafter be established, shall be in charge either of a storekeeper or a storekeeper and gauger, at the discretion of the Commissioner of Internal Revenue.

SEC. 38. That section 3332 of the Revised Statutes, and the supplement thereto, shall be amended so that said section shall read as follows:

"When a judgment of forfeiture, in any case of seizure, is recovered against any distillery used or fit for use in the production of distilled spirits, because no bond has been given, or against any distillery used or fit for use in the production of spirits, having a registered producing capacity of less than 150 gallons a day, every still, doubler, worm, worm-tub, mash-tub, and fermenting-tub therein shall be sold, as in case of other forfeited property, without being mutilated or destroyed. And in case of seizure of a still, doubler, worm, worm-tub, fermenting-tub, mash-tub, or other distilling apparatus of any kind whatsoever, for any offense involving forfeiture of the same, it shall be the duty of the seizing officer to remove the same from the place where seized to a place of safe storage; and said property so seized shall be sold as provided by law, but without being mutilated or destroyed."

SEC. 39. That whenever it shall be made to appear to the United States court or judge having jurisdiction that the health or life of any person imprisoned for any offense, in a county jail or elsewhere, is endangered by close confinement, the said court or judge is hereby authorized to make such order and provision for the comfort and well-being of the person so imprisoned as shall be deemed reasonable and proper.

SEC. 40. That all clauses of section 3244 of the Revised Statutes, and all laws amendatory thereof, and all other laws which impose any special taxes upon manufacturers of stills, retail dealers in liquors, and retail dealers in malt liquors, are hereby repealed.

SEC. 41. That this act is intended and shall be construed as an act supplementary and amendatory to existing laws, and the rates of duty and modification of clauses, provisions, and sections as herein specifically made are intended and shall be construed as a repeal of all clauses, provisions, and sections in conflict herewith, but as to all clauses, provisions, and sections in existing laws not herein specifically changed, modified, or amended the rates of duty now existing shall be and remain in full force and effect. This act shall be in force from and after October 1, 1888, except as herein otherwise provided.

The amendment reported by the Committee on Finance is to strike out all after the enacting clause of the bill and to insert in lieu of the matter stricken out:

TOBACCO.

That on and after the 1st day of February, 1889, manufacturers of cigars shall each pay a special tax of $3 annually: *Provided*, That the bond required to be given in conformity with the provisions of Title XXXV of the Revised Statutes of the United States, by every person engaging in the manufacture of cigars in the internal-revenue districts of the United States, shall be in such penal sum as the collector of internal revenue may require, not less than $100, with an addition of $10 for each person proposed to be employed by such person in making cigars.

That on and after the 1st day of February, 1889, the internal-revenue taxes on cigars, cheroots, and on all cigarettes weighing more than 3 pounds per thousand, which shall be manufactured and sold or removed for consumption or sale after that date shall be $1.50 per thousand, and on cigarettes weighing less than 3 pounds to the thousand, 50 cents per thousand, and shall be paid by the manufacturer thereof.

That all laws now in force whereby farmers and producers of tobacco are restricted in the sale and disposition of the same, and all laws and parts of laws so far as the same relate to the internal-revenue taxes on the articles hereinafter specified, whether imported or manufactured in the United States, be, and the same are hereby, repealed, to take effect on the 1st day of February, 1889, namely: The taxes on manufactured tobacco and snuff, and the special taxes required by law to be paid by manufacturers of and dealers in leaf-tobacco, retail dealers in leaf-tobacco, dealers in manufactured tobacco, snuff, and cigars, peddlers of tobacco, snuff, and cigars, and manufacturers of snuff: *Provided*, That on all original and unbroken factory packages of smoking and manufactured tobacco, snuff, cigars, cheroots, and cigarettes, held by manufacturers, or dealers, at the time such repeal or reduction shall go into effect, upon which the tax has been paid, there shall be a rebate in favor of said manufacturer or dealer, to the full amount and extent of the tax so paid thereon or to the full amount of the tax so reduced, as the case may be; but the same shall not apply in any case where the claim has not been presented within ninety days following the date when such repeal shall take effect; and no claim shall be allowed for a less amount than $10; and any special-tax stamp covering taxes repealed by this act may be redeemed for the portion of the special-tax year unexpired at the time of the repeal, when the amount claimed for such stamp shall not be less than $10; and all sums required to satisfy claims under this act shall be paid out of any money in the Treasury not otherwise appropriated; and it shall be the duty of the Secretary of the Treasury to adopt such rules and regulations and to prescribe and furnish such blanks and forms as may be necessary to carry this section into effect.

The sum of $20,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the alteration of dies, plates, and stamps, for furnishing blanks and forms, and for such other expenses as shall be incident to the collection of special taxes at the reduced rates provided in this act.

SEC. 2. That all internal-revenue laws limiting, restricting, or regulating the manufacture, sale, or exportation of all tobacco and snuff, except as herein provided, are hereby repealed, to take effect on the 1st day of February, 1889; and that there shall be no drawback allowed upon any such articles which shall be entered for export on or after that date: *Provided*, That all laws now in force shall remain and have full force and effect in respect to all offenses committed, liabilities incurred, or rights accruing or accrued prior to the date when the repeal of the taxes specified in this act shall take effect.

ALCOHOL IN THE INDUSTRIAL ARTS.

SEC. 3. That the Commissioner of Internal Revenue be, and hereby is, authorized, with the approval of the Secretary of the Treasury, upon the filing of such bond as he may prescribe, to establish warehouses, to be designated as bonded alcohol warehouses, to be used exclusively for the storing of distilled spirits, of an alcoholic strength of not less than 180 per cent. of proof spirit as defined by section 3249 of the Revised Statutes of the United States, and in the distillers' original casks or packages, each of which warehouses shall be in the charge of a storekeeper, or storekeeper and gauger, to be appointed, assigned, transferred, and paid in the same manner that storekeepers and storekeepers and gaugers for distillery warehouses are now appointed, assigned, transferred, and paid. Every such warehouse shall be under the control of the collector of internal revenue of the district in which such warehouse is located, shall be in the joint custody of the storekeeper, or storekeeper and gauger, and the proprietor thereof, and kept securely locked, and shall at no time be unlocked or opened, or remain open, except in the presence of such storekeeper, or storekeeper and gauger, or other person who may be designated to act for him, as provided in the case of distillery warehouses. And such warehouses shall be under such further regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

SEC. 4. That distilled spirits of an alcoholic strength of not less than 180 per cent. of proof spirit as defined by section 3249 of the Revised Statutes of the United States may, after having been properly gauged, marked, stamped, and branded in distillery warehouses, under regulations to be prescribed by the Commissioner of Internal Revenue, and approved by the Secretary of the Treasury, and also stamped as hereinafter provided, be removed in bond from distillery bonded warehouses to a bonded alcohol warehouse, under such regulations and after making such entries, and executing and filing with the collector of the district in which such spirits were manufactured such bonds and bills of lading, and giving such other additional security as may be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury.

SEC. 5. That such distilled spirits, after being deposited in such bonded alcohol warehouse, may, under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, be removed to secure store-rooms, and used in manufacturing establishments, as hereinafter provided, without payment of the internal-revenue tax, in the industrial arts, and in the manufacture of articles, preparations, compounds, acetic and other acids, and medicinal drugs, or chemicals made according to the direction of the United States or other national pharmacopœia or according to formulas, as published in any of the dispensatories in common use among physicians or apothecaries in the United States. But nothing herein contained shall be held or construed as authorizing the use of any distilled spirits upon which the internal-revenue tax has not been paid, in the manufacture of tinctures, proprietary articles, wines, liquors, cordials, bitters, or other alcoholic compounds which are used or sold as beverages, or which, in the opinion of the Commissioner of Internal Revenue, may be so used or sold. All articles excluded from the provisions of this act, manufactured or stored on any premises to which distilled spirits have been removed free of tax under the provisions of this act, and all articles manufactured or stored in violation of this act shall be forfeited to the United States. Every person desiring to have a bonded alcohol warehouse or store-room established, intending to commence or continue business herein, shall file with the collector of internal revenue of the district in which the building or room to be used as such warehouse or store-room is located a notice in duplicate of his desire and intention, stating the location of the building or room, and such other information as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may require; and at the time of the filing of such notice shall execute a bond in duplicate in the form prescribed by the Commissioner of Internal Revenue, conditioned that he will comply with all the provisions of law and regulations made in pursuance thereof pertaining to the business to be carried on by him, and that he will not use, or allow to be used, any distilled spirits entered into or removed from his warehouse or store-room, by any person or persons whatsoever for any of the uses not authorized by this act, and that in case any such spirits shall be so used he shall pay, or cause to be paid, to the United States a sum double the amount of the tax on all such spirits so used, and shall pay all penalties incurred or fines imposed on him for violation of any of the provisions of this act. Said bonds shall each be with at least two sureties, approved by the collector of the district, and for the penal sum of not less than double the amount of the tax on the estimated quantity of such spirits that are intended to be entered in such warehouse or store-room as the case may be, during a period of sixty days, but in no case shall the penal sum of said warehouse bond be less than $100,000, nor that of the store-room bond be less than $5,000, and the said bonds shall be strengthened and renewed at such times, and shall contain such other conditions as the Commissioner of Internal Revenue may require. The collector may refuse to approve said bond when, in his judgment, the situation of the warehouse or store-room is such as will enable the warehouse proprietor or the manufacturer to defraud the United States; and in case of such refusal the proprietor or manufacturer may appeal to the Commissioner of Internal Revenue, whose decision in the matter shall be final. One copy of the notice and application and bond will be forwarded to the Commissioner of Internal Revenue and one of each will be retained by the collector.

SEC. 6. That all distilled spirits intended to be entered for deposit in a bonded alcohol warehouse, before being removed from the distillery warehouse, shall have affixed to each cask or package an engraved stamp indicative of such intention, to be provided and furnished to the several collectors as in the case of other stamps, and to be charged to them and accounted for in the same manner, and for the expense attending the providing and affixing such stamps 10 cents for each stamp shall be paid to the collector of the district on making the entry for such removal.

SEC. 7. That any manufacturer, after having provided, at his own expense, on the premises, and connected with his manufactory, a secure store-room, in which all spirits used in the manufactory shall be exclusively entered and stored, and to be separated by a secure wall from all other parts of such manufactory, and with one door only entering therein, and all other openings secured and fastened, and approved by the collector of the district and the Commissioner of Internal Revenue, after the filing of the notice and bond as required by this act, may, under such bonds and securities as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, remove distilled spirits of an alcoholic strength of not less than 180 per cent. of proof spirit as defined by section 3249 of the Revised Statutes of the United States, in distillers' original casks or packages, without payment of the internal-revenue tax, from a bonded alcohol warehouse, as defined in this act, to his store-room for use in his manufactory as hereinbefore provided. But such spirits shall remain in the original packages until withdrawn for immediate use. Every such store-room shall be under the control of the collector of internal revenue of the district in which such manufactory is located, and shall be in the charge of a storekeeper, or storekeeper and gauger, and in the joint custody of the storekeeper, or storekeeper and gauger, and the proprietor thereof, and kept securely locked, and shall at no time be unlocked or opened, or remain open, except in the presence of such storekeeper, or storekeeper and gauger, or other person who may be designated to act for him, as provided in the case of distillery warehouses, and such storekeeper, or storekeeper and gauger shall be appointed, assigned, transferred, and paid in the same manner that storekeepers or storekeepers and gaugers for distillery warehouses are now appointed, as signed, transferred, and paid. And in case the official bond of the storekeeper, or storekeeper and gauger has been approved before the passage

of this act, such officer shall file a new official bond, which must be approved by the Commissioner of Internal Revenue before he is assigned to duty under the provisions of this act.

SEC. 8. The storekeeper or storekeeper and gauger assigned to such store-room shall, in addition to keeping such books and making such reports, concerning spirits entered in, and delivered and removed from such store-room, as may be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, have access to every part of such manufactory in which such distilled spirits are used, and make a report each month to the Commissioner of Internal Revenue, stating the kind and quantity of distilled spirits used during the month, the purpose for which used, and furnish such other information as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may require and prescribe; and such store-rooms shall be under such further regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

SEC. 9. That under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, any proprietor of a bonded alcohol warehouse, who has filed with the collector a bond with at least two sureties, and in the form and sum specified in this act, may admix with the distilled spirits entered in his warehouse, in the presence of the storekeeper, methylic alcohol, wood alcohol, or wood naphtha, which shall cause such distilled spirits to be unfit for use as a beverage; and such distilled spirits, after being so methylated, and drawn off in the presence of the storekeeper, or storekeeper and gauger, and under the supervision of a gauger to be designated by the collector, into packages of a form and material to be prescribed by the Commissioner of Internal Revenue, and different from those of casks in which distilled spirits are usually contained, such packages to be gauged, marked, stamped, and branded by the gauger as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, may be sold and removed from such warehouse without the payment of the internal-revenue tax. But distilled spirits produced in different months shall not be drawn into the same package, and each package shall not be of less capacity than 5 wine gallons, nor of greater capacity than 25 wine gallons, nor contain more than 39 proof gallons of spirits. Methylated spirits may be used in the arts and manufactures, and for burning, and in the manufacture of articles and compounds, except wines, liquors, cordials, bitters, and other alcoholic compounds used and sold as beverages, or in the opinion of the Commissioner of Internal Revenue calculated or intended to be so used or sold. And the methylation of such spirits shall be by the addition of methylic alcohol, wood alcohol, or wood naptha in such quantities, and in such manner, in the presence of the storekeeper, or storekeeper and gauger, as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe. And no such methylated spirits shall be permitted on any premises in which the business of a distiller, rectifier, wholesale liquor dealer, or retail liquor dealer is carried on, or in premises connected therewith by any private or internal communication. Every person intending to withdraw methylated spirits from any bonded alcohol warehouse shall file with the collector of the district in which the spirits are to be used an application, under oath, setting forth the purpose for which the spirits are to be withdrawn, the estimated quantity to be so withdrawn and used during a period of one year; the place where the spirits are to be stored, and a full description of the premises on which the spirits are to be so used; also, the name and residence of every person interested, or to be interested, in the business to be carried on at said premises; and the application shall be in such form, and shall contain such further information as the Commissioner of Internal Revenue may by regulation require.

Upon the receipt of such application and after making such inquiries as will satisfy him that the statements therein contained are true, the collector shall, upon the applicant filing with him a bond with satisfactory sureties and in a penal sum of not less than double the amount of the tax on the spirits intended to be withdrawn during the period of one year, issue a permit, under seal, for the withdrawal of said spirits for the purpose or purposes to be therein specified; said bond and permit shall be in such form as the Commissioner of Internal Revenue may prescribe, and may be renewed, and shall be canceled, or revoked at his discretion.

And the Commissioner of Internal Revenue is authorized to have such permits printed from engraved plates and with serial numbers, as in the case of special tax stamps.

No methylated spirits shall be withdrawn from any bonded alcohol warehouse except upon a permit issued as aforesaid, which permit shall, at the time each withdrawal of spirits is made thereunder, be presented by the person to whom it is issued, or by his duly authorized agent, to the storekeeper in charge of the warehouse, who shall indorse upon the permit the quantity of spirits withdrawn, giving the number of packages, the serial numbers of packages and stamps, the number of proof gallons, the date when tax is due by three years' limit, and the date of withdrawal in each case. But in no case shall the quantity of spirits withdrawn under any permit during the period for which the permit is issued exceed the quantity of spirits specified therein. And the sale, removal, and use of such methylated spirits shall be under such regulations and restrictions as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe. And said Commissioner may, in his discretion, exact bonds and returns of persons who purchase or receive, use, or transport methylated spirits. And any internal-revenue officer shall, at all times, have right of access to all premises on which such methylated spirits are received, stored, or used. And the provisions of sections 3276 and 3277 of the Revised Statutes of the United States, so far as applicable, are hereby made to apply to such premises and to the proprietors or occupants thereof. And any person who shall demethylate, or separate methylic alcohol, wood alcohol, or wood naphtha from any such distilled spirits, or use, or by willful neglect, cause to be used, any such methylated spirits for any of the uses not authorized by this act, or who shall separate or recover, or cause the separation or recovery of any alcohol permitted to be used in the manufacture of any of the articles by the provisions of this act free of tax, shall on conviction pay a penalty of not less than $500 nor more than $5,000, and be imprisoned not less than six months nor more than three years.

SEC. 10. That every proprietor of any such bonded alcohol warehouse who shall have filed the application and bond, and every manufacturer who shall have provided a suitable store-room, which have been approved by the collector of the district and the Commissioner of Internal Revenue, shall provide a book to be prepared and kept in such form as the Commissioner of Internal Revenue may prescribe, and shall make daily entries therein of all spirits received, with the name of the person from whom the spirits were purchased, and the name of the distiller by whom and the district in which the spirits were produced, the serial number of each cask or package, and the actual contents of each when received by him. He shall also, in like manner, enter in said book the quantity of spirits removed each day, and the name, occupation, and address of the person to whom the spirits are sold; and if a manufacturer, he shall enter in said book the quantity removed from the store-room, and if less than a cask or package, the actual quantity removed from any cask or package; and he shall also enter the name of all articles in the manufacture of which such spirits have been used, as authorized in this act. And every person keeping the book herein required shall, on or before the 10th day of each month, make a full and accurate transcript of all entries made during the preceding month, and shall, after verifying the same by oath, forward the same, through the collector of the district, to the Commissioner of Internal Revenue. The book herein required shall be kept on the premises described in the application, and shall at all times be open for the inspection of any revenue officer; and such officer shall at all times have access to said premises for the purpose of inspecting the same, or any stock, utensil, apparatus, or appliances therein, where such spirits are used, and the owner or occupant of said premises shall, on demand of such officer, furnish needful assistance to enable the said officer to make such examination and report. And any person who shall willfully use, or by neglect cause to be used, any distilled spirits, entered in his bonded alcohol warehouse or store-room established under this act, in any manner except as expressly provided and permitted in this act, shall, on conviction, pay a penalty of not less than $1,000 nor more than $5,000, and be imprisoned not less than six months nor more than three years.

SEC. 11. That any person who, under the provisions of this act, or under any regulation issued in pursuance hereof, shall neglect or refuse to make or render any entry, bond, or account, or shall make or render any false or fraudulent entry, bond, or account, or shall, in qualifying as a surety to any bond required by this act, make any false or fraudulent statement or representation as to the property owned by him, and any person who shall fail to use any stamp, label, tag, mark, caution-notice, or any other device prescribed by this act, or by any regulation issued in pursuance of this act, or shall fraudulently use or re-use the same, shall for any such offense, on conviction had, be fined not less than $500, nor more than $5,000, and be imprisoned not less than six months, nor more than three years; and any vessel, package, or other inclosure not stamped, marked, or branded as required by law and this act, all spirits or other materials contained in such vessel, cask, or package, or inclosure, shall be forfeited to the United States. Nothing in this act shall be construed as extending the time within which the tax on distilled spirits shall be paid beyond the limit fixed by law within which such spirits must be withdrawn from distillery warehouses upon payment of the tax. And, in case any spirits withdrawn from a distillery warehouse under the provisions of this act are not used as authorized by this act within the time fixed by the distiller's warehousing bond for the payment of the tax, the Commissioner of Internal Revenue shall assess the tax against the person liable, under bond as warehouse proprietor or manufacturer at the time, for the proper use and custody of the spirits, and such tax shall be collected as in the case of other assessed taxes.

It shall not be lawful for any person to receive, use, or store any methylated distilled spirits free of internal-revenue tax under the provisions of this act on any premises within 600 feet in a direct line from any premises used as a distillery or for rectifying distilled spirits.

Any person who shall receive or use distilled spirits free of tax under the provisions of this act, and shall knowingly or willfully omit, neglect, or refuse to do, or cause to be done, any of the things required to be done by this act, or any regulation made pursuant thereto, or shall do anything by this act prohibited, or declared thereby to be unlawful, if there be no specific penalty or punishment imposed by this act for the neglecting, omitting, or refusing to do the thing required, or for the doing, or causing to be done, the thing prohibited, or declared unlawful, he shall, on conviction, pay a penalty at the discretion of the court, not exceeding $5,000. And the Commissioner of Internal Revenue is authorized to determine the quality and strength of the methylic alcohol, wood alcohol, or wood naphtha that may be used in methylating spirits. And the Commissioner of Internal Revenue may also, at his discretion, require the maker of methylated spirit to provide a separate store-room and vats, with suitable locks and fastenings, for keeping and storing methylic alcohol, wood alcohol, or wood naphtha, used in methylating and mixing, and may require samples to be furnished from such vats, or other receptacles, for chemical analysis and for his approval.

SEC. 12. That on and after the 1st day of February, 1889, the following sections shall constitute and be a substitute for Title XXXIII of the Revised Statutes of the United States.

TITLE XXXIII.

DUTIES UPON IMPORTS.

SEC. 2502. There shall be levied, collected, and paid upon all articles imported from foreign countries, and mentioned in the schedules herein contained, the rates of duty which are, by the schedules and paragraphs, respectively prescribed, namely:

SCHEDULE A.—CHEMICAL PRODUCTS.

1. Acids.—Acetic or pyroligneous acid, not exceeding the specific gravity of one and forty-seven one thousandths, 1½ cents per pound; exceeding the specific gravity of one and forty-seven one-thousandths, 4 cents per pound.
2. Boracic acid, 5 cents per pound.
3. Chromic acid, 10 cents per pound.
4. Citric acid, 10 cents per pound.
5. Tannic acid or tannin, 25 cents per pound.
6. Tartaric acid, 10 cents per pound.
7. Alcoholic perfumery, including cologne-water and other toilet waters and all alcoholic compounds not specially enumerated or provided for in this act, $2 per gallon and 25 per cent. ad valorem.
8. Alizarine assistant, or soluble oil, or oleate of soda, or Turkey-red oil, 8 cents per pound.
9. Alumina, alum, alum cake, patent alum, sulphate of alumina, and aluminous cake, and alum in crystals or ground, six-tenths of 1 cent per pound.
10. Ammonia.—Carbonate of ammonia, 1¾ cents per pound.
11. Muriate of ammonia, or sal-ammoniac, three-fourths of 1 cent per pound.
12. Sulphate of ammonia, one-half of 1 cent per pound.
13. Amylic alcohol, or fusel oil, 10 per cent. ad valorem.
14. Blacking of all kinds, 25 per cent. ad valorem.
15. Blue-vitriol, or sulphate of copper, 2 cents per pound.
16. Bone-char, suitable for use in decolorizing sugars, 25 per cent. ad valorem.
17. Borax.—Crude borax, or borate of soda or borate of lime, 3 cents per pound; refined borax, 5 cents per pound.
18. Camphor, refined, 4 cents per pound.
19. Cement.—Roman, Portland, and other hydraulic cement, in barrels, sacks, or other packages, 8 cents per 100 pounds; in bulk, 7 cents per 100 pounds; other cement, 20 per cent. ad valorem.
20. Chalk.—Prepared, precipitated, French, and red chalk, 1 cent per pound; all other chalk preparations not specially enumerated or provided for in this act, 20 per cent. ad valorem.
21. Clays or earths.—Unwrought or unmanufactured, not specially enumerated or provided for in this act, $1.50 per ton; wrought or manufactured, not specially enumerated or provided for in this act, $3 per ton; China clay, or kaolin, $3 per ton.
22. Chloroform, 30 cents per pound.
23. Cobalt, oxide of, 40 cents per pound.
24. Collodion and all compounds of pyroxyline, by whatever name known, 30 cents per pound; rolled or in sheets, but not made up into articles, 40 cents per pound; if in finished or partly finished articles, 40 cents per pound and 25 per cent. ad valorem.
25. Coloring for brandy, wine, beer, or other liquors, 50 per cent. ad valorem.
26. Copperas or sulphate of iron, three-tenths of 1 cent per pound.
27. Dextrine, burnt starch, gum substitute, or British gum, 1 cent per pound.
28. Drugs, such as barks, beans, berries, balsams, buds, bulbs, and bulbous roots, and excrescences, such as nutgalls, fruits, flowers, dried fibers, grains, gums, and gum resins, herbs, leaves, lichens, mosses, nuts, roots and stems, spices, vegetables, seeds (aromatic, not garden seeds), and seeds of morbid

growth, weeds, woods used expressly for dyeing, and dried insects, any of the foregoing which are not edible, but which have been advanced in value or condition by refining or grinding, or by other process of manufacture, and not specially enumerated or provided for in this act, 10 per cent. ad valorem.

29. Coal-tar preparations.—All coal-tar colors or dyes, by whatever name known, and not specially enumerated or provided for in this act, 35 per cent. ad valorem.

30. All preparations of coal-tar, not colors or dyes, not specially enumerated or provided for in this act, 20 per cent. ad valorem.

31. Ethers.—Sulphuric ether and spirits of nitrous ether, 30 cents per pound.

32. Butyric ether and other fruit ether, oils or essences, $1.25 per pound.

33. Ethers of all kinds not specially enumerated or provided for in this act, 75 cents per pound.

34. Extracts and decoctions of logwood and other dye-woods, extract of sumac, and extracts of hemlock and other barks, such as are commonly used for dyeing or tanning, not specially enumerated or provided for in this act, 1 cent per pound.

35. Gelatine, glue, and isinglass or fish-glue, valued at not above 7 cents per pound, 1½ cents per pound; valued above 7 cents per pound, 25 per cent. ad valorem.

36. Glycerine.—Unrefined, of the specific gravity of 1.25 or less at a temperature of 60° Fahrenheit, 1 cent per pound; refined, 4½ cents per pound.

37. Indigo.—Extracts of or pastes of, three-fourths of 1 cent per pound; carmined, 10 cents per pound.

38. Ink.—Writing-ink in casks, or in bottles or jugs holding 1 pint or more, 40 cents per gallon; in bottles or jugs holding less than 1 pint, 50 cents per gallon; otherwise than in casks, bottles, or jugs, 60 cents per gallon.

39. Ink-powders, printers' ink, and all other ink, not specially enumerated or provided for in this act, 30 per cent. ad valorem.

40. Iodine, resublimed, 30 cents per pound.

41. Iodoform, $1.20 per pound.

42. Lead products.—Acetate of lead, white, 5½ cents per pound; acetate of lead, brown, 3½ cents per pound.

43. Litharge, 3 cents per pound.

44. Nitrate of lead, 3 cents per pound.

45. Orange mineral, 3½ cents per pound.

46. Red lead, 3 cents per pound.

47. White lead, dry or in pulp, or ground or mixed with oil, 3 cents per pound.

48. Licorice, extracts of, in paste, rolls, or other forms, 5 cents per pound.

49. Magnesia.—Carbonate of magnesia, medicinal, 4 cents per pound.

50. Calcined magnesia, 8 cents per pound.

51. Sulphate of magnesia, or Epsom salts, one-half of 1 cent per pound.

52. Morphia, or morphine, and all salts thereof, 50 cents per ounce.

53. Oils.—Castor oil, 50 cents per gallon.

54. Cod-liver oil, 15 cents per gallon.

55. Croton oil, 30 cents per pound.

56. Flaxseed or linseed oil, 25 cents per gallon of 7½ pounds weight.

57. Cotton-seed oil, 10 cents per gallon of 7½ pounds weight.

58. Hemp-seed oil and rape-seed oil, 10 cents per gallon.

59. Olive oil, fit for salad purposes, 35 cents per gallon.

60. Seal, whale, and other fish oil not specially enumerated or provided for in this act, 8 cents per gallon.

61. Opium, aqueous extract of, for medicinal uses, and tincture of, as laudanum, and all other liquid preparations of opium, not specially enumerated or provided for in this act, 40 per cent. ad valorem.

62. Paints and colors.—Baryta, sulphate of, or barytes, manufactured, one-fourth of 1 cent per pound.

63. Blues, such as Berlin, Prussian, Chinese, and all others, containing ferrocyanide of iron, dry or ground in water or oil, 6 cents per pound.

64. Blanc-fixe, or satin white, or artificial sulphate of barytes, three-fourths of 1 cent per pound.

65. Black, made from bone, ivory, or vegetable, under whatever name known, including bone-black and lamp-black, dry or ground in oil or water, 25 per cent. ad valorem.

66. Chrome yellow, chrome green, and all other chromium colors in which lead and bichromate of potash or soda are component parts, dry, or ground in water or oil, 4½ cents per pound.

67. Ocher and ochery earths, sienna and sienna earths, umber and umber earths, not specially enumerated or provided for in this act, dry, one-fourth of 1 cent per pound; ground in oil, 1½ cents per pound.

68. Ultramarine blue, 4½ cents per pound.

69. Wash blue, containing ultramarine, 3 cents per pound.

70. Vermilion red, or colors containing quicksilver, dry or ground in oil or water, 12 cents per pound.

71. Whiting and Paris white, dry, one-half of 1 cent per pound; ground in oil, or putty, 1 cent per pound.

72. Zinc, *oxide of*, dry, 1½ cents per pound; ground in oil, 1¾ cents per pound.

73. All other paints and colors, whether dry or mixed, or ground with water or oil, including lakes, crayons, smalts, and frostings, not specially enumerated or provided for in this act, and artists' colors of all kinds, in tubes or otherwise, 25 per cent. ad valorem.

74. Phosphorus, 10 cents per pound.

75. Plaster of Paris, ground or calcined, $1.50 per ton.

76. Potash.—Bichromate and chromate of potash, 3 cents per pound.

77. Hydriodate, iodide, and iodate of potash, 50 cents per pound.

78. Nitrate of potash or saltpeter, refined, 1 cent per pound.

79. Prussiate of potash, red, 10 cents per pound; prussiate of potash, yellow, cents per pound.

80. Preparations.—All medical preparations, known as essences, ethers (solid or fluid extracts), mixtures, spirits, tinctures, and medicated wines, including medicinal proprietary preparations, of which alcohol is a component part, not specially enumerated or provided for in this act, 40 cents per pound.

81. All medicinal preparations, including medicinal proprietary preparations, such as anodynes, cerates, conserves, cordials, decoctions, drops, emulsions, essences, extracts (solid or fluid), infusions, juices, liniments, lozenges, mixtures, mucilages, oils, ointments, oleo-resins, pastes, pastilles, pills, plasters, powders, resins, salves, sirups, suppositories, tonics, troches, vinegars, wafers, or waters of any of which alcohol is not a component part, and not specially enumerated or provided for in this act, 25 per cent. ad valorem.

82. Preparations known as alkalies, alkaloids, distilled oils, essential oils, expressed oils, rendered oils, and all combinations of the foregoing, and all chemical compounds and salts, not specially enumerated or provided for in this act, 25 per cent. ad valorem.

83. Preparations used as applications to the hair, mouth, teeth, or skin, such as cosmetics, dentifrices, pastes, pomades, powders, and tonics, including all known as toilet preparations, not specially enumerated or provided for in this act, 50 per cent. ad valorem.

84. Santonine, $1 per pound.

85. Soap.—Castile-soap, 1½ cents per pound; fancy, perfumed, and all descriptions of toilet-soap, 15 cents per pound; all other soaps, not specially enumerated or provided for in this act, 20 per cent. ad valorem.

86. Soda.—Bicarbonate of soda or supercarbonate of soda or saleratus, 1½ cents per pound.

87. Hydrate or caustic soda, 1 cent per pound.

88. Bichromate and chromate of soda, 3 cents per pound.

89. Sal-soda, or soda crystals, and soda-ash, one-fourth of 1 cent. per pound.

90. Silicate of soda, or other alkaline silicate, one-half of 1 cent per pound.

91. Sulphate of soda, or salt cake or niter-cake, 20 per cent. ad valorem.

92. Strychnia, or strychnine, and all salts thereof, 50 cents per ounce.

93. Sulphur.—Refined, in rolls, $8 per ton; sublimed, or flowers of, $10 per ton.

94. Sumac, ground, three-tenths of 1 cent per pound.

95. Tartar, cream of, and patent tartar, 6 cents per pound.

96. Tartars and lees crystals, partly refined, 4 cents per pound.

97. Tartrate of soda and potassa, or Rochelle salts, 3 cents per pound.

98. Varnishes, including so-called gold size or japan, 40 per cent. ad valorem; and on spirit varnishes for the alcohol contained therein, $2 per gallon additional.

SCHEDULE B.—EARTHENWARE AND GLASSWARE.

99. Common brown earthenware, stoneware, and crucibles, not ornamented or decorated, 20 per cent. ad valorem.

100. China, porcelain, parian, and bisque, earthen, stone and crockery ware, including plaques, ornaments, charms, vases, and statuettes, painted, tinted, enameled, printed, or gilded, or otherwise decorated or ornamented in any manner, 55 per cent. ad valorem; if plain white and not ornamented or decorated in any manner, 50 per cent. ad valorem.

101. All other earthen, stone, and crockery ware, white, glazed, or edged, and other manufactures composed of earthy or mineral substances, not specially enumerated or provided for in this act, 50 per cent. ad valorem.

102. Tiles and brick, other than fire-brick, not glazed, ornamented, painted, enameled, or decorated, 20 per cent. ad valorem; ornamented, glazed, painted, enameled, or decorated and encaustic, 45 per cent ad valorem.

103. Fire-brick, not glazed, enameled, ornamented, or decorated in any manner, $1.25 per ton; glazed, enameled, ornamented, or decorated, 45 per cent. ad valorem.

104. Gas-retorts, $3 each.

105. Slate.—Slates, slate-pencils, slate chimney-pieces, mantels, slabs for tables, and all other manufactures of slate, not specially enumerated or provided for in this act, 30 per cent. ad valorem.

106. Roofing-slates, 25 per cent. ad valorem.

GLASS.

107. Plain green, and colored, molded or pressed, and plain flint, and lime glass bottles, holding not less than 1 pint, and demijohns, and carboys (covered or uncovered), and other plain molded or pressed green and colored and flint or lime glassware, not specially enumerated or provided for in this act, 1 cent per pound. Plain green, and colored, molded or pressed, and plain flint, and lime glass bottles, and vials holding less than 1 pint, 1½ cents per pound.

108. All articles enumerated in the preceding paragraph, if filled, and not otherwise provided for in this act, and the contents are subject to an ad valorem rate of duty, or to a rate of duty based upon the value, the value of such bottles, vials, or other vessels shall be added to the value of the contents for the ascertainment of the dutiable value of the latter; but if filled, and not otherwise provided for in this act, and the contents are not subject to an ad valorem rate of duty, or to rate of duty based on the value, or are free of duty, such bottles, vials, or other vessels shall pay, in addition to the duty, if any, on their contents, the rates of duty prescribed in the preceding paragraph: *Provided*, That no article manufactured from glass described in the preceding paragraph shall pay a less rate of duty than 40 per cent. ad valorem.

109. Glass and glassware of all kinds (not including plate-glass, silvered or looking-glass plates, or cylinder crown or common window-glass, hereinafter specially provided for), when cut, engraved, painted, colored, printed, stained, gilded, or otherwise ornamented or decorated, and hand, pocket, or table mirrors not exceeding in size 144 square inches, with frames or cases, of whatever material composed, or without frames or cases, 45 per cent. ad valorem.

110. All cut, engraved, painted, or otherwise ornamented or decorated glass bottles, decanters, or other vessels of glass shall, if filled, pay duty, in addition to any duty chargeable on the contents, as if not filled, unless otherwise specially provided for in this act.

111. Unpolished cylinder, crown, and common window-glass, not exceeding 10 by 15 inches square, 1½ cents per pound; above that, and not exceeding 16 by 24 inches square, 1¾ cents per pound; above that, and not exceeding 24 by 30 inches square, 2½ cents per pound; all above that, 2¾ cents per pound.

112. Cylinder and crown glass, polished, not exceeding 16 by 24 inches square, 4 cents per square foot; above that, and not exceeding 24 by 30 inches square, 6 cents per square foot; above that, and not exceeding 24 by 60 inches square, 20 cents per square foot; above that, 40 cents per square foot.

113. Fluted, rolled, or rough plate-glass, not including crown, cylinder, or common window-glass, not exceeding 10 by 15 inches square, three-fourths of 1 cent per square foot; above that, and not exceeding 16 by 24 inches square, 1 cent per square foot; above that, and not exceeding 24 by 30 inches square, 1½ cents per square foot; all above that, 2 cents per square foot; and all fluted, rolled, or rough plate-glass, weighing over 100 pounds per 100 square feet, shall pay an additional duty on the excess at the same rates herein imposed.

114. Cast polished plate-glass, unsilvered, not exceeding 10 by 15 inches square, 3 cents per square foot; above that, and not exceeding 16 by 24 inches square, 5 cents per square foot; above that, and not exceeding 24 by 30 inches square, 8 cents per square foot; above that, and not exceeding 24 by 60 inches square, 25 cents per square foot; all above that, 50 cents per square foot.

115. Cast polished plate-glass, silvered, or looking-glass plates, not exceeding 10 by 15 inches square, 4 cents per square foot; above that, and not exceeding 16 by 24 inches square, 6 cents per square foot; above that, and not exceeding 24 by 30 inches square, 10 cents per square foot; above that, and not exceeding 24 by 60 inches square, 35 cents per square foot; all above that, 60 cents per square foot.

116. But no looking-glass plates, or plate-glass silvered, when framed, shall pay a less rate of duty than that imposed upon similar glass of like description not framed, but shall pay in addition thereto 30 per cent. ad valorem upon such frames.

117. Plate-glass, silvered or unsilvered, and cylinder, crown, or common window-glass, when beveled, etched, engraved, stained, colored, or otherwise ornamented or decorated, shall be subject to a duty of 10 per cent. ad valorem in addition to the rates otherwise chargeable thereon.

118. All manufactures of glass, or of which glass shall be the component material of chief value, not especially enumerated or provided for in this act, 45 per cent. ad valorem.

SCHEDULE C.—METALS.

Iron and steel:

119. Iron ore, including manganiferous iron ore, also the dross or residuum from burnt pyrites, 75 cents per ton. Sulphur ore, as pyrites, or sulphuret of iron in its natural state, containing not more 3½ per cent. of copper, 75 cents per ton: *Provided*, That ore containing more than 2 per cent. of copper shall pay, in addition thereto, 1½ cents per pound for the copper contained therein: *And provided further*, That in levying and collecting the duty on iron ore no deduction shall be made from the weight of the ore on account of moisture which may be chemically or physically combined therewith.

120. Iron in pigs, iron kentledge, spiegeleisen, wrought and cast scrap iron, and scrap-steel, three-tenths of 1 cent per pound; but nothing shall be deemed

scrap-iron or scrap-steel except waste or refuse iron or steel that has been in actual use and is fit only to be remanufactured.

121. Bar-iron, rolled or hammered, comprising flats not less than 1 inch wide, nor less than three-eighths of 1 inch thick, eight-tenths of 1 cent per pound; round iron not less than three-fourths of 1 inch in diameter, and square iron not less than three-fourths of 1 inch square, nine-tenths of 1 cent per pound; flats less than 1 inch wide, or less than three-eighths of 1 inch thick; round iron less than three-fourths of 1 inch and not less than seven-sixteenths of 1 inch in diameter; and square iron less than three-fourths of 1 inch square, 1 cent per pound.

122. Round iron, in coils or rods, less than seven-sixteenths of 1 inch in diameter, and bars or shapes of rolled iron, not specially enumerated or provided for in this act, 1.1 cents per pound: *Provided*, That all iron in slabs, blooms, loops, or other forms less finished than iron in bars, and more advanced than pig-iron, except castings, shall be rated as iron in bars, and pay duty accordingly; and none of the above iron shall pay a less rate of duty than 35 per cent. ad valorem: *Provided further*, That all iron bars, blooms, billets, or sizes or shapes of any kind, in the manufacture of which charcoal is used as fuel, shall be subject to a duty of not less than $22 per ton.

123. Cast-iron pipe of every description, nine-tenths of 1 cent per pound.

124. Cast-iron vessels, plates, stove-plates, andirons, sadirons, tailors' irons, hatters' irons, and castings of iron, not specially enumerated or provided for in this act, 1.2 cents per pound.

125. Castings of malleable iron, not specially enumerated or provided for in this act, 1¾ cents per pound.

126. Anvils, or parts thereof, of iron or steel, 2 cents per pound.

127. Iron or steel anchors, or parts thereof of iron or steel, mill-irons and mill-cranks of wrought-iron, and wrought-iron for ships, and forgings of iron or steel, or of combined iron and steel, for vessels, steam-engines, and locomotives, or parts thereof, weighing each 25 pounds or more, 1.8 cents per pound.

128. Axles, parts thereof, axle bars, axle blanks, or forgings for axles, whether of iron or steel, without reference to the stage or state of manufacture, 2 cents per pound.

129. Blacksmiths' hammers and sledges, track tools, wedges, and crowbars, whether of iron or steel, 2½ cents per pound.

130. Beams, girders, joists, angles, channels, car-truck channels, TT columns and posts, or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all other structural shapes of iron or steel, 1.1 cents per pound.

131. Boiler or other plate, iron or steel, except saw-plates herein after provided for, not thinner than No. 10 wire gauge, sheared or unsheared, and skelp iron or steel, sheared or rolled in grooves, valued at 2 cents per pound or less, 1 cent per pound; valued above 2 cents and not above 3 cents per pound, 1.2 cents per pound; valued above 3 cents and not above 4 cents per pound, 1.6 cents per pound; valued above 4 cents and above 7 cents per pound, 2 cents per pound; valued above 7 cents and not above 10 cents per pound, 2.8 cents per pound; valued above 10 cents and not above 13 cents per pound, 3½ cents per pound: valued above 13 cents per pound, 45 per cent. ad valorem: *Provided*, That all plate-iron or steel thinner than No. 10 wire gauge shall pay duty as iron or steel sheets.

132. Boiler or other tubes or pipes, or flues, or stays of wrought-iron or steel, 2½ cents per pound.

133. Bolts, with or without threads or nuts, or bolt-blanks, and finished hinges or hinge-blanks, whether of iron or steel, 2½ cents per pound.

134. Chain or chains of all kinds, made of iron or steel, not less than three-fourths of 1 inch in diameter, 1.6 cents per pound; less than three-fourths of 1 inch and not less than three-eighths of 1 inch in diameter, 1.8 cents per pound; less than three-eighths of 1 inch in diameter, 3 cents per pound.

135. Forged shotgun barrels, rough-bored, 10 per cent. ad valorem.

136. Forging of iron or steel, or forged iron and steel combined of whatever shape, or in whatever stage of manufacture, not specially enumerated or provided for in this act, 2.3 cents per pound: *Provided*, That no forgings of iron or steel, or forgings of iron and steel combined, by whatever process made, shall pay a less rate of duty than 45 per cent. ad valorem.

137. Hoop, or band, or scroll, or other iron or steel, valued at 3 cents per pound or less, 8 inches or less in width, and less than three-eighths of 1 inch thick and not thinner than No. 10 wire gauge, 1 cent per pound; thinner than No. 10 wire gauge and not thinner than No. 20 wire gauge, 1.1 cents per pound; thinner than No. 20 wire gauge, 1.3 cents per pound: *Provided*, That hoop or band iron, or hoop or band steel, cut to length, or wholly or partially manufactured into hoops or ties, for baling purposes, barrel hoops of iron or steel, and hoop or band iron or hoop or band steel flared or splayed, shall pay two-tenths of 1 cent per pound more duty than that imposed on the hoop or band iron or steel from which they are made.

138. Nails.—Cut nails and cut spikes of iron or steel, 1 cent per pound.

139 Horseshoe nails, hob nails, and all other wrought iron or steel nails, not specially enumerated or provided for in this act, 4 cents per pound.

140. Wire nails made of wrought iron or steel, 2 inches and longer, not lighter than No. 12 wire gauge, 2 cents per pound; from 1 inch to 2 inches in length, and lighter than No. 12 and not lighter than No. 16 wire gauge, 2½ cents per pound; shorter than 1 inch and lighter than No. 16 wire gauge, 4 cents per pound.

141. Railway-bars, made of iron and steel, and railway-bars made in part of steel, T-rails, and punched iron or steel flat rails, seven-tenths of 1 cent per pound.

142. Railway fish-plates or splice-bars, made of iron or steel, 1 cent per pound.

143. Rivets of iron or steel, 2½ cents per pound.

144. Sheets, of iron or steel, common or black, including all iron or steel commercially known as common or black taggers iron or steel, and skelp iron or steel; valued at 3 cents per pound or less: Thinner than No. 10 and not thinner than No. 20 wire gauge, 1.1 cents per pound; thinner than No. 20 wire gauge and not thinner than No. 25 wire gauge, 1.2 cents per pound; thinner than No 25 wire gauge and not thinner than No. 29 wire gauge, 1.4 cents per pound; thinner than No. 29 wire gauge, 1.5 cents per pound: *Provided*, That all common or black sheet-iron or sheet-steel not thinner than No. 10 wire gauge shall pay a duty as plate-iron or plate-steel.

145. Sheets, of iron or steel, corrugated or crimped, 1.4 cents per pound: *Provided*, That on all iron or steel sheets or plates and on all hoop, band, or scroll iron or steel, excepting on what are known commercially as tin-plates, terne-plates, and taggers tin, and hereafter provided for, when galvanized or coated with zinc or spelter, or other metals, or any alloy of those metals, three-fourths of 1 cent per pound additional duty shall be paid.

146. Sheet-iron or sheet-steel, polished, planished, or glanced, by whatever name designated, 2½ cents per pound: *Provided*, That plate or sheet or taggers iron or steel, by whatever name designated, other than the polished, planished, or glanced herein provided for, which has been pickled or cleaned by acid, or by any other material or process, or which is cold rolled, shall pay one-quarter of 1 cent per pound more duty than the corresponding gauges of common or black sheet or taggers iron or steel.

147. Sheets or plates, of iron or steel, or taggers iron or steel coated with tin or lead, or with a mixture of which these metals, or either of them, is a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers tin, 1 cent per pound.

148. Spikes, nuts, and washers, and horse, mule, or ox shoes, of wrought iron or steel, 1.8 cents per pound.

149. Wheels, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires, or parts thereof, wholly or partly manufactured, 2½ cents per pound; and ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, 1¾ cents per pound.

150. Wire rods.—Rivet, screw, nail, fence, and other iron or steel wire rods, whether round, oval, flat, or square, in coils or loops or in any other shape, not smaller than No. 6 wire gauge, valued at 3 cents or less per pound, six-tenths of 1 cent per pound; and iron or steel flat, with longitudinal ribs for the manufacture of fencing, valued at 3 cents or less per pound, six-tenths of 1 cent per pound: *Provided*, That all iron or steel rods, whether rolled or drawn, smaller than No. 6 wire gauge, shall be classed and dutiable as wire.

151. Wire.—Wire made of iron or steel not smaller than No. 10 wire gauge, 1½ cents per pound; smaller than No. 10 and not smaller than No. 16 wire gauge, 1¾ cents per pound; smaller than No. 16 and not smaller than No. 26 wire gauge, 2½ cents per pound; smaller than No. 26 wire gauge, 3 cents per pound: *Provided*, That iron or steel wire covered with cotton, silk, or other material, and wire commonly known as crinoline, corset, and hat wire, shall pay 4 cents per pound in addition to the foregoing rates: *And provided further*, That no article made from iron or steel wire, or of which iron or steel wire is a component part of chief value, shall pay a less rate of duty than the iron or steel wire from which it is made either wholly or in part: *And provided further*, That iron or steel wire cloths, and iron or steel wire nettings made in meshes of any form, shall pay a duty equal in amount to that imposed on iron or steel wire of the same gauge and 2 cents per pound in addition thereto. There shall be paid on galvanized iron or steel wire (except fence-wire) one-half of 1 cent per pound in addition to the rate imposed on the wire of which it is made; on iron wire-rope and wire-strand, 1 cent per pound in addition to the rate imposed on the wire of which it is made; on steel wire-rope and wire-strand, 2 cents per pound in addition to the rates imposed on the wire of which it is made: *Provided further*, That all iron or steel wire valued at more than 10 cents per pound shall pay a duty of not less than 45 per cent. ad valorem.

152. Files, file-banks, rasps, and floats, of all cuts and kinds: Four inches in length and under, 35 cents per dozen; over 4 inches in length and under 9 inches, 75 cents per dozen; 9 inches in length and under 14 inches, $1.30 per dozen; 14 inches in length and over, $2 per dozen.

153. Steel ingots, cogged ingots, blooms, and slabs, by whatever process made; die blocks or blanks; billets and bars and tapered or beveled bars; steamer, crank, and other shafts; shafting; wrist or crank pins; connecting rods and piston rods; pressed, sheared, or stamped shapes; saw plates, wholly or partially manufactured; hammer molds or swaged steel; gun-barrel molds not in bars; alloys used as substitutes for steel tools; all descriptions and shapes of dry land, loam, or iron-molded steel castings; sheets and plates not specially enumerated or provided for in this act; steel in all forms and shapes not specially enumerated or provided for in this act; all of the above valued at 1 cent per pound or less, five-tenths of 1 cent per pound; valued above 1 cent and not above 1.4 cents per pound, six-tenths of 1 cent per pound; valued above 1.4 cents and not above 1.8 cents per pound, eight-tenths of 1 cent per pound; valued above 1.8 cents and not above 2.2 cents per pound, nine-tenths of 1 cent per pound; valued above 2.2 cents and not above 3 cents per pound, 1.2 cents per pound; valued above 3 cents and not above 4 cents per pound, 1.6 cents per pound; valued above 4 cents and not above 7 cents per pound, 2 cents per pound; valued above 7 cents and not above 10 cents per pound, 2.8 cents per pound; valued above 10 cents and not above 13 cents per pound, 3½ cents per pound; valued above 13 cents per pound, 45 per cent. ad valorem.

154. Plates.—Steel plates engraved, stereotype plates, electrotype plates, and plates of other materials, engraved or lithographed, for printing, 25 per cent. ad valorem.

155. Saws.—Cross-cut saws, 6 cents per linear foot; mill, pit, and drag saws, not over 9 inches wide, 8 cents per linear foot; over 9 inches wide, 13 cents per linear foot; circular saws, 30 per cent. ad valorem; hand, back, and all other saws, not especially enumerated or provided for in this act, 40 per cent. ad valorem.

GENERAL PROVISIONS.

156. No allowance or reduction of duties for partial loss or damage in consequence of rust or of discoloration shall be made upon any description of iron or steel, or upon any partly manufactured article of iron or steel, or upon any manufacture of iron and steel.

157. All metal produced from iron or its ores, which is cast and malleable, of whatever description or form, without regard to the percentage of carbon contained therein, whether produced by cementation, or converted, cast, or made from iron or its ores, by the crucible, Bessemer, Clapp-Griffiths, pneumatic, Thomas-Gilchrist, basic, Siemens-Martin, or open-hearth process, or by the equivalent of either, or by a combination of two or more of the processes, or their equivalents, or by any fusion or other process which produces from iron or its ores a metal either granular or fibrous in structure, which is cast and malleable, excepting what is known as malleable-iron castings, shall be classed and denominated as steel.

158. All articles not specially enumerated or provided for in this act, wholly or partly manufactured, made from sheet, plate, hoop, band, or scroll iron or steel herein provided for, or of which such sheet, plate, hoop, band, or scroll iron or steel shall be the material of chief value, shall not pay a lower rate of duty than that imposed on the sheet, plate, hoop, band or scroll iron or steel from which they are made, or which shall be the material of chief value.

159. On all iron or steel bars, rods, strips, or steel sheets, of whatever shape, other than the polished, planished, or glanced sheet-iron or sheet-steel hereinbefore provided for, and on all iron or steel bars of irregular shape or section, which are cold rolled, cold hammered, or polished in any way in addition to the ordinary process of hot rolling or hammering, there shall be paid one-fourth of 1 cent. per pound in addition to the rates provided in this act; and on steel circular saw plates there shall be paid 1 cent per pound in addition to the rate provided in this act.

Miscellaneous:

160. Antimony, as regulus or metal, three-fourths of 1 cent per pound.

161. Argentine, albata, or German silver, unmanufactured, 25 per cent. ad valorem.

162. Brass, in bars or pigs, old brass, clippings from brass or Dutch-metal, and old sheathing, or yellow metal, fit only for remanufacture, 1½ cents per pound.

163. Bronze powder, 15 cents per pound; bronze or Dutch metal, in leaf, 10 per cent. ad valorem.

164. Bouillons, or cannetille, metal thread, filé or gespinst, and epaulets, galloons, laces, knots, stars, tassels, and wings of gold, silver, or other metal, 25 per cent. ad valorem.

165. Chromate of iron, or chromic ore, 15 per cent. ad valorem.

166. Copper.—Copper imported in the form of ores, 1½ cents per pound on each pound of fine copper contained therein.

167. Regulus of copper and black or coarse copper and copper cement, 1¾ cents per pound on each pound of fine copper contained therein.

168. Old copper, fit only for remanufacture, clippings from new copper, and all composition metal of which copper is a component material of chief value, not specially enumerated or provided for in this act, 1¾ cents per pound.

169. Copper in plates, bars, ingots, Chili or other pigs, and in other forms, not manufactured, not specially enumerated or provided for in this act, 2 cents per pound.

170. Copper in rolled plates called braziers' copper, sheets, rods, pipes, and copper bottoms, and all manufactures of which copper shall be the component material of chief value, not specially enumerated or provided for in this act, also sheathing or yellow metal of which copper is not the component material of chief value, and not composed wholly or in part of iron ungalvanized, 35 per cent. ad valorem.
171. Cutlery.—Swords, sword-blades, and side-arms, 35 per cent. ad valorem.
172. Table knives, forks, steels, and all carving, butchers', cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, plumbers', painters', palette, and artists' knives of all sizes, finished or unfinished, valued at not more than $1 per dozen pieces, 20 cents per dozen; valued at more than $1 and not more than $3, 50 cents per dozen; valued at more than $3 and not more than $8, $1 per dozen; valued at more than $8, $2 per dozen; and in addition upon all the above named articles 30 per cent. ad valorem.
173. Penknives or pocket-knives of all kinds, knife-blades, razors, and razor-blades, 50 cents per dozen blades, and 25 per cent. ad valorem.
174. Gold-leaf, $2 per package of 500 leaves.
175. Hollow-ware, coated, glazed, or tinned, 2½ cents per pound.
176. Lead.—Lead ore and lead dross, 1½ cents per pound: *Provided*, That lead ore containing silver or silver ore containing lead shall pay a duty of 1½ cents per pound.
177. Lead in pigs and bars, glazier's lead, lead wire, molten and old refuse lead run into blocks and bars, and old scrap-lead fit only to be remanufactured, 2 cents per pound.
178. Lead in sheets, pipes, or shot, 2½ cents per pound.
179. Metallic mineral substances in a crude state and metals unwrought, not specially enumerated or provided for in this act, 20 per cent. ad valorem.
180. Muskets and sporting rifles, 25 per cent. ad valorem.
181. All double-barelled, sporting, breech-loading shot guns, $10 each, and 25 per cent. ad valorem.
182. Needles for knitting or sewing machines, and tape-needles and bodkins of metal, 35 per cent. ad valorem.
183. Needles, sewing, darning, knitting, and all other not specially enumerated or provided for in this act, 25 per cent. ad valorem.
184. Nickel.—Nickel in ore, 5 cents per pound for the nickel contained therein;
185. Nickel in matte, or other crude form not ready for consumption in the arts, 10 cents per pound on the nickel contained therein;
186. Nickel, nickel oxide, alloy of any kind in which nickel is the component material of chief value, 15 cents per pound.
187. Pens, metallic, except gold pens, 12 cents per gross.
188. Pen-holder tips, pen-holders or parts thereof, and gold pens, 30 per cent. ad valorem.
189. Pins, metallic, solid-head or other, including hair-pins, safety-pins, and hat, bonnet, shawl, and belt pins, 30 per cent. ad valorem.
190. Quicksilver, 6 cents per pound.
191. Screws, commonly called wood-screws, more than 2 inches in length, 5 cents per pound; over 1 inch and not more than 2 inches in length, 7 cents per pound; over one-half inch and not more than 1 inch in length, 10 cents per pound; one-half inch and less in length, 14 cents per pound.
192. Silver-leaf, 75 cents per package of five hundred leaves.
193. Cut tacks, brads, or sprigs, not exceeding 16 ounces to the thousand, 2½ cents per thousand; exceeding 16 ounces to the thousand, 2½ cents per pound.
194. Type-metal, 1½ cents per pound for the lead contained therein; new types, 25 per cent. ad valorem.
195. Zinc or spelter.—Zinc in blocks or pigs, 1½ cents per pound.
196. Zinc in sheets, 2½ cents per pound.
197. Zinc, old and worn out, fit only to be remanufactured, 1½ cents per pound.
198. Manufactures, articles, or wares, not specially enumerated or provided for in this act, composed wholly or in part of iron, steel, lead, copper, nickel, pewter, tin, zinc, gold, silver, platinum, or any other metal, and whether partly or wholly manufactured, 45 per cent. ad valorem.

SCHEDULE D.—WOOD AND WOODEN WARES.

199. Timber, hewn and sawed, and timber used for spars and in building wharves, 20 per cent. ad valorem.
200. Timber, squared or sided, not specially enumerated or provided for in this act, 1 cent per cubic foot.
201. Sawed boards, plank, deals, and other lumber of hemlock, white-wood, sycamore, and bass-wood, $1 per thousand feet board measure; sawed lumber, not specially enumerated or provided for in this act, $2 per thousand feet board measure; but when lumber of any sort is planed or finished, in addition to the rates herein provided, there shall be levied and paid for each side so planed or finished 50 cents per thousand feet board measure; and if planed on one side and tongued and grooved, $1 per thousand feet board measure; and if planed on two sides, and tongued and grooved, $1.50 per thousand feet, board measure.
202. Hubs for wheels, posts, last-blocks, wagon-blocks, oar-blocks, gun-blocks, heading-blocks, and all like blocks or sticks, rough-hewn or sawed only, 20 per cent. ad valorem.
203. Staves of wood of all kinds, 10 per cent. ad valorem.
204. Pickets and palings, 20 per cent. ad valorem.
205. Laths, 15 cents per 1,000 pieces.
206. Shingles, 25 cents per 1,000.
207. Pine clapboards, $2 per 1,000.
208. Spruce clapboards, $1.50 per 1,000.
209. House or cabinet furniture, of wood, in piece or rough, and not finished, 30 per cent. ad valorem.
210. Cabinet ware and house furniture, of wood, finished, 35 per cent. ad valorem.
211. Casks and barrels (empty), sugar-box shooks, and packing-boxes, and packing-box shooks, of wood, not specially enumerated or provided for in this act, 30 per cent. ad valorem.
212. Manufactures of cedar wood, granadilla, ebony, mahogany, rosewood, and satin-wood, 35 per cent. ad valorem.
213. Manufactures of wood, or of which wood is the component material of chief value, not specially enumerated or provided for in this act, 35 per cent. ad valorem.
214. Wood, unmanufactured, not specially enumerated or provided for in this act, 20 per cent. ad valorem.
215. Sawed boards, plank, deals, and blocks, or posts of mahogany, rosewood, satin-wood, granadilla, or other cabinet wood, 15 per cent. ad valorem.
216. Veneering, and briar-root or briar-wood, and similar wood, unmanufactured, or not further manufactured than cut into forms or shapes suitable for the articles into which they are intended to be converted, 20 per cent. ad valorem.

SCHEDULE E.—SUGAR.

All sugars not above No. 13 Dutch standard in color shall pay duty on their polariscopic test as follows, namely:
217. All sugars not above No. 13 Dutch standard in color, all tank bottoms, sirups of cane juice or of beet juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above 75 degrees, seven-tenths of 1 cent per pound; and for every additional degree or fraction of a degree shown by the polariscopic test, two-hundredths of 1 cent per pound additional.
218. All sugars above No. 13 Dutch standard in color shall be classified by the Dutch standard of color, and pay duty as follows, namely: All sugar above No. 13 and not above No. 16 Dutch standard of color, 1½ cents per pound.
219. All sugar above No. 16 and not above No. 20 Dutch standard of color, 1½ cents per pound.
220. All sugars above No. 20 Dutch standard of color, 2 cents per pound.
221. Molasses testing above 56 degrees, 4 cents per gallon: *Provided*, That if an export duty shall hereafter be laid upon sugar or molasses by any country from whence the same may be imported, such sugar or molasses so imported shall be subject to duty as provided by law prior to the passage of this act.
222. Sugar drainings and sugar sweepings shall be subject to duty either as molasses or sugar, as the case may be, according to polariscopic test.
223. Sugar candy and all confectionery, including chocolate confectionery, made wholly or in part of sugar, valued at 12 cents or less per pound, and on sugars after being refined, when tinctured, colored, or in any way adulterated, 5 cents per pound.
224. All other confectionery, including chocolate confectionery, not specially enumerated or provided for in this act, 50 per cent. ad valorem.
225. Glucose, or grape sugar, three-fourths of 1 cent per pound.

SCHEDULE F.—TOBACCO, CIGARS, ETC.

226. Cigars, cigarettes, and cheroots of all kinds, $3.50 per pound; but paper cigars and cigarettes, including wrappers, shall be subject to the same duties as are herein imposed upon cigars.
227. Leaf-tobacco suitable for wrappers: If not stemmed, 75 cents per pound; if stemmed, $1 per pound: *Provided*, That if any portion of any tobacco imported in any package or in bulk shall be suitable for wrappers, the entire quantity of tobacco contained in such importation shall be dutiable; if not stemmed, at 75 cents per pound; if stemmed, at $1 per pound.
228. All other tobacco in leaf, unmanufactured and not stemmed, 20 cents per pound; if stemmed, 25 cents per pound.
229. Tobacco stems, 15 cents per pound.
230. Tobacco, manufactured, of all descriptions, not specially enumerated or provided for in this act, 40 cents per pound.
231. Snuff and snuff flour, manufactured of tobacco, ground dry, or damp, and pickled, scented, or otherwise, of all descriptions, 50 cents per pound.

SCHEDULE G.—PROVISIONS, ETC.

232. Animals, live.—Horses and mules, $20 per head.
233. Cattle, more than one year old, $5 per head.
234. Hogs, 50 cents per head.
235. Sheep, 50 cents per head.
236. All other live animals, not specially enumerated or provided for in this act, 20 per cent. ad valorem.
237. Bacon and hams, 2 cents per pound.
238. Barley and rye, 10 cents per bushel.
239. Barley-malt, per bushel of 34 pounds, 20 cents.
240. Barley, pearled, patent, or hulled, one-half of 1 cent per pound.
241. Beans, per bushel of 60 pounds, 25 cents.
242. Beans, pease, and mushrooms, prepared or preserved, in tins, jars, bottles, or otherwise, 25 cents per gallon.
243. Beef, mutton, and pork, 1 cent per pound.
244. Butter, and substitutes thereof, 4 cents per pound.
245. Cabbages, 1 cent each.
246. Cheese, 4 cents per pound.
247. Chicory-root.—Burnt or roasted, 1 cent per pound; ground or granulated, or in rolls, or otherwise prepared, and not specially enumerated or provided for in this act, 2 cents per pound.
248. Chocolate, other than chocolate confectionery, 2 cents per pound.
249. Cocoa, prepared or manufactured, not specially enumerated or provided for in this act, 2 cents per pound.
250. Cocoa-butter or cocoa-butterine, 3½ cents per pound.
251. Comfits, sweetmeats, or fruits preserved in sugar, sirup, molasses, or spirits, not specially enumerated or provided for in this act, and jellies of all kinds, 35 per cent. ad valorem.
252. Corn-meal, per bushel of 48 pounds, 10 cents.
253. Dandelion-root and acorns, prepared, and other articles used as coffee, or as substitutes for coffee, not specially enumerated or provided for in this act, 1½ cents per pound.
254. Extract of meat, all not specially provided for in this act, 35 cents per pound; fluid extract of meat, 15 cents per pound; but the dutiable weight shall include the extract and the tins, jars, bottles, or other articles containing the same, and no separate or additional duty shall be collected on such coverings unless as such they are suitable and apparently designed for use other than in the importation of meat extracts.
255. Fruits.—Dates, grapes, plums, and prunes, 1 cent per pound.
256. Figs, 2 cents per pound.
257. Oranges, lemons, or limes, in packages of capacity of 1½ cubic feet or less, 10 cents per package; in packages of capacity exceeding 1½ cubic feet and not exceeding 2½ cubic feet, 20 cents per package; in packages of capacity exceeding 2½ cubic feet and not exceeding 5 cubic feet, 40 cents per package; in packages of capacity exceeding 5 cubic feet, for every additional cubic foot or fractional part thereof, 8 cents; in bulk, $1.50 per one thousand.
258. Raisins, 2 cents per pound.
259. Fruits preserved in their own juices, 20 per cent. ad valorem.
260. Ginger or ginger-root, preserved in sugar or otherwise, and citron preserved or candied, 4 cents per pound.
261. Orange-peel and lemon-peel, preserved or candied, 2 cents per pound.
262. Fish.—Mackerel, pickled or salted, 1 cent per pound.
263. Herrings, pickled or salted, one-half of 1 cent per pound.
264. Salmon, pickled, 1 cent per pound.
265. Other fish, pickled, in barrels, 1 cent per pound.
266. Anchovies and sardines, packed in oil or otherwise, in tin boxes measuring not more than 5 inches long, 4 inches wide, and 3½ inches deep, 10 cents per whole box; in half-boxes, measuring not more than 5 inches long, 4 inches wide, and 1½ inches deep, 5 cents each; in quarter-boxes, measuring not more than 4½ inches long, 3½ inches wide, and 1½ inches deep, 2½ cents each; when imported in any other form, 40 per cent. ad valorem.
267. Foreign-caught fish (imported otherwise than in barrels or half-barrels), smoked, dried, salted, pickled, frozen, packed in ice, or otherwise prepared for preservation, not specially enumerated or provided for in this act, one-half of 1 cent per pound.
268. Fish preserved in oil, except anchovies and sardines, 30 per cent. ad valorem.
269. Salmon and all other fish, prepared or preserved, and prepared meats of all kinds, not specially enumerated or provided for in this act, 25 per cent. ad valorem.
270. Cans or packages made of tin or other material containing fish or other kind admitted free of duty under any existing law or treaty, not exceeding 1 quart in contents, shall be subject to a duty on each can or package of 1½ cents; and when exceeding 1 quart, shall be subject to an additional duty, for each additional quart or fractional part thereof, of 1½ cents.
271. Hay, $2 per ton.
272. Honey, 20 cents per gallon.
273. Hops, 10 cents per pound.
274. Indian corn or maize, 10 cents per bushel.
275. Lard, 2 cents per pound.
276. Macaroni, vermicelli, and all similar preparations, 2 cents per pound.

277. Milk, preserved or condensed, including weight of packages, 3 cents per pound.
278. Mustard, ground or preserved, in bottles or otherwise, 10 cents per pound.
279. Spices, ground or powdered, not specially enumerated or provided for in this act, 4 cents per pound.
280. Nuts.—Almonds, not shelled, 5 cents per pound; clear almonds, shelled, 7½ cents per pound.
281. Filberts and walnuts of all kinds, 2 cents per pound.
282. Peanuts or ground beans, unshelled, 1 cent per pound; shelled, 1½ cents per pound.
283. Nuts of all kinds, shelled or unshelled, not specially enumerated or provided for in this act, 1½ cents per pound.
284. Oats, 10 cents per bushel.
285. Oatmeal, one-half of 1 cent per pound.
286. Pease, green or dried, in bulk or in barrels, sacks, or similar packages, per bushel of 60 pounds, 10 cents; split pease, per bushel of 60 pounds, 20 cents; pease in cartons, papers, or other small packages, one-half of 1 cent per pound.
287. Rice.—Cleaned, 1 cent per pound; uncleaned rice and rice flour and meal, one-half of 1 cent per pound; rice, broken, which will pass through a sieve known commercially as No. 12 wire sieve, and paddy, one-fourth of 1 cent per pound.
288. Rye-flour, one-half of 1 cent per pound.
289. Salt.—Salt in bags, sacks, barrels, or other packages, 12 cents per 100 pounds; in bulk, 8 cents per 100 pounds: *Provided*, That exporters of meats, whether packed or smoked, which have been cured in the United States with imported salt, shall, upon satisfactory proof, under such regulations as the Secretary of the Treasury shall prescribe, that such meats have been cured with imported salt, have refunded to them from the Treasury the duties paid on the salt so used in curing such exported meats, in amounts not less than $100: *And provided further*, That imported salt in bond may be used in curing fish taken by vessels licensed to engage in the fisheries, and in curing fish on the shores of the navigable waters of the United States, under such regulations as the Secretary of the Treasury shall prescribe; and upon proof that the salt has been used for either of the purposes stated in this proviso, the duties on the same shall be remitted.
290. Seeds.—Castor beans or seeds, 25 cents per bushel of 50 pounds.
291. Garden-seeds, agricultural seeds, and other seeds, not specially enumerated or provided for in this act, 20 per cent. ad valorem.
292. Flaxseed or linseed, and other oil seeds, not specially enumerated or provided for in this act, 20 cents per bushel of 56 pounds; but no drawback shall be allowed on oil-cake made from imported seed.
293. Starch, including all preparations, from whatever substance produced, fit for use as starch, 2 cents per pound.
294. Tallow, 1 cent per pound.
295. Vegetables of all kinds, prepared or preserved, including pickles and sauces of all kinds, not specially enumerated or provided for in this act, 35 per cent. ad valorem.
296. Vegetables in their natural state, not specially enumerated or provided for in this act, 10 per cent. ad valorem.
297. Potatoes, per bushel of 60 pounds, 15 cents.
298. Vinegar, 7½ cents per gallon. The standard for vinegar shall be taken to be that strength which requires 35 grains of bicarbonate of potash to neutralize 1 ounce Troy of vinegar.
299. Wheat, 20 cents per bushel.
300. Wheat-flour, 20 per cent. ad valorem.

SCHEDULE H.—WINES, LIQUORS, ETC.

301. Champagne and all other sparkling wines, in bottles containing each not more than 1 quart and more than 1 pint, $7 per dozen; containing not more than 1 pint each and more than one-half pint, $3.50 per dozen; containing one-half pint each or less, $1.75 per dozen; in bottles or other vessels containing more than 1 quart each, in addition to $7 per dozen bottles, on the quantity in excess of 1 quart, at the rate of $2.25 per gallon.
302. Still wines, including ginger wine or ginger cordial and vermuth, in casks, 60 cents per gallon; in bottles or jugs, per case of one dozen bottles or jugs, containing each not more than one quart and more than one pint, or twenty-four bottles or jugs containing each not more than one pint, $1.60 per case; and any excess beyond these quantities found in such bottles or jugs shall be subject to a duty of 5 cents per pint or fractional part thereof: *Provided*, That any wines, ginger cordial, or vermuth imported containing more than 24 per cent. of alcohol shall be forfeited to the United States: *And provided further*, That there shall be no constructive or other allowance for breakage, leakage, or damage on wines, liquors, cordials, or distilled spirits. Wines, cordials, brandy, and other spirituous liquors imported in bottles or jugs shall be packed in packages containing not less than one dozen bottles or jugs in each package; and all such bottles or jugs shall pay an additional duty of 3 cents for each bottle or jug.
303. Brandy and other spirits manufactured or distilled from grain or other materials, and not specially enumerated or provided for in this act, $2 per proof gallon.
304. Each and every gauge or wine-gallon of measurement shall be counted as at least one proof gallon, and the standard for determining the proof of brandy and other spirits or liquors of any kind imported shall be the same as that which is defined in the laws relating to internal revenue; but any brandy or other spirituous liquors imported in casks of less capacity than 14 gallons or in bottles of less capacity than 1 quart shall be forfeited to the United States: *Provided*, That it shall be lawful for the Secretary of the Treasury, in his discretion, to authorize the ascertainment of the proof of wines, cordials, or other liquors, by distillation or otherwise, in case where it is impracticable to ascertain such proof by the means prescribed by existing law or regulations.
305. On all compounds or preparations of which distilled spirits are a component part of chief value not specially enumerated or provided for in this act there shall be levied a duty not less than that imposed upon distilled spirits.
306. Cordials, liquors, arrack, absinthe, kirchwasser, ratafia, and other similar spirituous beverages or bitters containing spirits, and not specially enumerated or provided for in this act, $2 per proof gallon.
307. No lower rate or amount of duty shall be levied, collected, and paid on brandy, spirits, and other spirituous beverages than that fixed by law for the description of first proof; but it shall be increased in proportion for any greater strength than the strength of first proof, and all imitations of brandy or spirits or wines imported by any names whatever shall be subject to the highest rate of duty provided for the genuine articles respectively intended to be represented, and in no case less than $1 per gallon.
308. Bay-rum or bay-water, whether distilled or compounded, of first proof, and in proportion for any greater strength than first proof, $1 per gallon.
309. Ale, porter, and beer, in bottles or jugs, 35 cents per gallon; otherwise than in bottles or jugs, 20 cents per gallon.
310. Malt extract.—Fluid, in casks, 20 cents per gallon; in bottles or jugs, 40 cents per gallon; solid or condensed, 40 per cent. ad valorem.
311. Cherry juice and prune juice, or prune wine, and other fruit juice, not specially enumerated or provided for in this act, containing not more than 24 per cent. of alcohol, 60 cents per gallon; if containing more than 24 per cent. of alcohol, $2 per gallon.
312. Ginger-ale, ginger-beer, lemonade, soda-water, and other aerated waters in plain green or colored molded or pressed glass bottles, containing each not more than three-fourths of a pint, 25 cents per dozen; containing more than three-fourths of a pint each and not more than 1½ pints, 50 cents per dozen; but no separate or additional duty shall be assessed on the bottles; if imported otherwise than in plain green or colored molded or pressed glass bottles, or in such bottles containing more than 1½ pints each, 50 cents per gallon; and in addition thereto, duty shall be collected on the bottles, or other coverings, at the rates which would be chargeable thereon if imported empty.

SCHEDULE I.—COTTON MANUFACTURES.

313. Cotton thread, yarn, warps, or warp-yarn (not wound upon spools), whether single or advanced beyond the condition of single, by twisting two or more single yarns together, whether on beams or in bundles, skeins, or cops, or in any other form, valued at not exceeding 25 cents per pound, 10 cents per pound; valued at over 25 cents per pound and not exceeding 40 cents per pound, 18 cents per pound; valued at over 40 cents per pound and not exceeding 50 cents per pound, 23 cents per pound; valued at over 50 cents per pound and not exceeding 60 cents per pound, 28 cents per pound; valued at over 60 cents per pound and not exceeding 70 cents per pound, 33 cents per pound; valued at over 70 cents per pound and not exceeding 80 cents per pound, 38 cents per pound; valued at over 80 cents per pound and not exceeding $1 per pound, 48 cents per pound; valued at over $1 per pound, 50 per cent. ad valorem.
314. Spool-thread of cotton, containing on each spool not exceeding 100 yards of thread, 7 cents per dozen. Exceeding 100 yards on each spool, for every additional 100 yards of thread or fractional part thereof in excess of 100 yards, 7 cents per dozen spools.
315. Cotton cloth not bleached, dyed, colored, stained, painted, or printed, and not exceeding fifty threads to the square inch, counting the warp and filling, 2 cents per square yard; if bleached, 2½ cents per square yard; if dyed, colored, stained, painted, or printed, 4 cents per square yard.
316. Cotton cloth not bleached, dyed, colored, stained, painted, or printed, exceeding fifty and not exceeding one hundred threads to the square inch, counting the warp and filling, 2½ cents per square yard; if bleached, 3 cents per square yard; if dyed, colored, stained, painted, or printed, 4 cents per square yard: *Provided*, That on all cotton cloth not exceeding one hundred threads to the square inch, counting the warp and filling, not bleached, dyed, colored, stained, painted, or printed, valued at over 6½ cents per yard; bleached, valued at over 9 cents per square yard; and dyed, colored, stained, painted, or printed, valued at over 12 cents per square yard, there shall be levied, collected, and paid a duty of 35 per cent. ad valorem.
317. Cotton cloth, not bleached, dyed, colored, stained, painted, or printed, exceeding one hundred and not exceeding one hundred and fifty threads to the square inch, counting the warp and filling, 3 cents per square yard; if bleached, 4 cents per square yard; if dyed, colored, stained, painted, or printed, 5 cents per square yard: *Provided*, That on all cotton cloth exceeding one hundred and not exceeding one hundred and fifty threads to the square inch, counting the warp and filling, not bleached, dyed, colored, stained, painted, or printed, valued at over 7½ cents per square yard; bleached, valued at over 10 cents per square yard; dyed, colored, stained, painted, or printed, valued at over 12½ cents per square yard, there shall be levied, collected, and paid a duty of 40 per cent. ad valorem.
318. Cotton cloth, not bleached, dyed, colored, stained, painted, or printed, exceeding one hundred and fifty and not exceeding two hundred threads to the square inch, counting the warp and filling, 3½ cents per square yard; if bleached, 4½ cents per square yard; if dyed, colored, stained, painted, or printed, 5½ cents per square yard: *Provided*, That on all cotton cloth exceeding one hundred and fifty and not exceeding two hundred threads to the square inch, counting the warp and filling, not bleached, dyed, colored, stained, painted, or printed, valued at over 8 cents per square yard; bleached, valued at over 10 cents per square yard; dyed, colored, stained, painted, or printed, valued at over 12 cents per square yard, there shall be levied, collected, and paid a duty of 45 per cent. ad valorem.
319. Cotton cloth not bleached, dyed, colored, stained, painted, or printed, exceeding two hundred threads to the square inch, counting the warp and filling, 4½ cents per square yard; if bleached, 5½ cents per square yard; if dyed, colored, stained, painted, or printed, 6½ cents per square yard: *Provided*, That on all such cotton cloths not bleached, dyed, colored, stained, painted, or printed, valued at over 10 cents per square yard; bleached, valued at over 12 cents per square yard, and dyed, colored, stained, painted, or printed, valued at over 15 cents per yard, there shall be levied, collected, and paid a duty of 45 per cent. ad valorem.
320. On stockings, hose, half-hose, gloves, shirts, drawers, and other goods made on knitting machines or frames, composed of cotton or other vegetable fiber, and not otherwise specially enumerated or provided for in this act, 35 per cent. ad valorem.
321. On stockings, hose, and half-hose, fashioned, narrowed, or shaped wholly or in part by knitting machines or frames, or knit by hand, and composed of cotton or other vegetable fiber, valued at not exceeding $3 per dozen pairs, 60 cents per dozen pairs and 20 per cent. ad valorem; valued above $3 per dozen pairs, and on all shirts, drawers, gloves, and other articles composed of like materials, and made and fashioned in like manner, 40 per cent. ad valorem.
322. On cotton damask and on clothing ready made, and articles of wearing apparel of every description, composed of cotton or other vegetable fiber, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, including hemmed handkerchiefs, and not specially enumerated or provided for in this act, 40 per cent. ad valorem.
323. On goods heretofore known commercially as Hamburg edgings, embroideries, or insertings, and as Egyptian and Oriental laces, composed of cotton, and stitched or otherwise wrought by machines worked by hand or other power, 45 cents per pound and 15 per cent. ad valorem.
324. Plushes, velvets, velveteens, and all pile fabrics composed of cotton, or other vegetable fiber, 10 cents per square yard and 20 per cent. ad valorem.
325. Cotton cords, braids, gimps, galloons, webbing, goring, suspenders, and braces, any of the foregoing which are elastic or non-elastic, 35 per cent. ad valorem.
326. All manufactures of cotton not specially enumerated or provided for in this act, 35 per cent. ad valorem.

SCHEDULE J.—FLAX, HEMP, AND JUTE.

327. Flax straw, $5 per ton.
328. Flax, not hackled or dressed, $20 per ton.
329. Flax, hackled, known as "dressed line," $40 per ton.
330. Tow, of flax or hemp, $10 per ton.
331. Hemp, $20 per ton.
332. Cables or cordage, and twine, including binding twine, composed wholly of manila, or sisal grass, 1½ cents per pound.
333. All manufactures of flax, hemp, jute, or other vegetable fiber, except cotton, or of which flax, hemp, jute, or other vegetable fiber, except cotton, is the component material of chief value, not specially enumerated or provided for in this act, valued at 5 cents per pound or less, 2 cents per pound; valued above 5 cents per pound, 40 per cent. ad valorem.
334. Burlaps, not exceeding 60 inches in width, of flax, jute, or hemp, or of which flax, jute, or hemp, or either of them, shall be the component material of chief value (except such as may be suitable for bagging for cotton), 30 per cent. ad valorem.
335. Brown and bleached linen cloth containing not less than one hundred threads to the square inch, counting the warp and filling, 35 per cent. ad valorem.
336. On laces, embroideries, insertings, neck ruffling and ruchings, trim-

mings, lace window-curtains, and other completed articles of lace, and tamboured window curtains and other similar tamboured articles, composed of flax, jute, cotton, or other vegetable fiber, not specially enumerated or provided for in this act, 50 per cent. ad valorem.

337. On collars and cuffs for men's wear, composed entirely of cotton, 15 cents per dozen pieces and 35 per cent. ad valorem; composed in whole or in part of linen, 30 cents per dozen pieces and 35 per cent. ad valorem.

338. Hemp or jute carpeting, 6 cents per square yard.

339. Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed in whole or in part of hemp, jute, or jute butts valued at not more than 3 cents per pound, three-fourths of 1 cent per pound.

340. Oil-cloth for floors, stamped, painted, or printed, including linoleum, corticene, cork-carpets, figured or plain, and on all other oil-cloth (except silk oil-cloth), and on water-proof cloth not specially enumerated or provided for in this act, 10 cents per square yard and 15 per cent. ad valorem.

SCHEDULE K.—WOOL AND MANUFACTURES OF WOOL.

All wools, hair of the alpaca, goat, and other like animals, shall be divided, for the purpose of fixing the duties to be charged thereon, into the three following classes:

341. Class 1, clothing wools; that is to say, merino, mestiza, metz, or metis wools or other wools of merino blood, immediate or remote, Down clothing wools and wools of like character with any of the preceding, including such as have been heretofore usually imported into the United States from Buenos Ayres, New Zealand, Australia, Cape of Good Hope, Russia, Great Britain, Canada, and elsewhere, and also including all wools not hereinafter described or designated in classes 2 and 3.

342. Class 2, combing wools; that is to say, Leicester, Cotswold, Lincolnshire, Down combing wools, Canada long wools, or other like combing wools of English blood, and usually known by the terms herein used, and also all hair of the alpaca, goat, and other like animals.

343. Class 3, carpet wools and other similar wools: Such as Donskoi, native South American, Cordova, Valparaiso, native Smyrna, and including all such wools of like character as have been heretofore usually imported into the United States from Turkey, Greece, Egypt, Syria, and elsewhere.

344. The duty on wools of the first class which shall be imported washed shall be twice the amount of duty to which they would be subjected if imported unwashed; and the duty on wools of all classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.

345. The duty upon wool of the sheep or hair of the alpaca, goat, and other like animals, which shall be imported in any other than ordinary condition, as now and heretofore practiced, or which shall be changed in its character or condition for the purpose of evading the duty, or which shall be reduced in value by the admixture of dirt or any other foreign substance, shall be twice the duty to which it would be otherwise subject.

346. Wools of the first and second class and all hair of the alpaca, goat, and other like animals, 11 cents per pound.

347. Wools of the third class, the value whereof, at the last port or place whence exported to the United States, excluding charges in such port, shall be 12 cents or less per pound, 2½ cents per pound.

348. Wools of the same class, the value whereof, at the last port or place whence exported to the United States, excluding charges in such port, shall exceed 12 cents per pound, 6 cents per pound.

349. Wools on the skin, the same rates as other wools, the quantity and value to be ascertained under such rules as the Secretary of the Treasury may prescribe.

350. Top waste, slubbing waste, roving waste, ring waste, yarn waste, garnetted waste, and all other wastes similar to them in character or description, composed wholly or in part of wool or worsted, 30 cents per pound.

351. Woolen rags, shoddy, mungo, flocks, and wool waste not otherwise provided for in this act, 10 cents per pound.

352. Noils shall pay the same rate of duty as the washed wools or hair from which they are made.

353. All wools and hair of the alpaca, goat, or other animals, which have been advanced by any process of manufacture beyond the washed or scoured condition, not otherwise enumerated or provided for in this act, shall be subject to the same duties as are imposed upon manufactures of wool not specially enumerated or provided for in this act.

354. Woolen cloths, woolen shawls, and all manufactures of wool of every description, made wholly or in part of wool, worsted, the hair of the goat, alpaca, or other animals, not especially enumerated or provided for in this act, valued at not exceeding 40 cents per pound, 35 cents per pound, and in addition thereto 35 per cent. ad valorem; valued at above 40 cents per pound, and not exceeding 60 cents per pound, 35 cents per pound and 40 per cent. ad valorem; valued at 60 cents per pound, 40 cents per pound and in addition thereto 40 per cent. ad valorem.

355. Flannels, blankets, and hats of wool, composed wholly or in part of wool, worsted, the hair of the goat, alpaca, or other animals, valued at not exceeding 30 cents per pound, 10 cents per pound; valued at above 30 cents per pound, and not exceeding 40 cents per pound, 12 cents per pound; valued at above 40 cents per pound, and not exceeding 60 cents per pound, 18 cents per pound; and in addition thereto, upon all the above-named articles, 35 per cent. ad valorem; valued at above 60 cents per pound, 40 cents per pound and in addition thereto 40 per cent. ad valorem.

356. Women's and children's dress goods, coat-linings, Italian cloths, and goods of similar character or description, composed in part of wool, worsted, the hair of the goat, alpaca, or other animals, valued at not exceeding 15 cents per square yard, 6 cents per square yard, and in addition thereto 40 per cent. ad valorem; on all the above-named goods, valued at above 15 cents per square yard, 7 cents per square yard, and in addition thereto 40 per cent. ad valorem; but such goods as are composed in part of silk, or which contain an admixture of silk, and in which silk is not the component material of chief value, and not otherwise provided for in this act, shall be dutiable at 11 cents per square yard, and in addition thereto 40 per cent. ad valorem: *Provided*, That all goods of the character enumerated or described in this paragraph, weighing over 4 ounces per square yard, shall pay a duty of 40 cents per pound and in addition thereto 40 per cent. ad valorem.

357. Women's and children's dress goods, coat linings, Italian cloths, bunting, and goods of like description, composed wholly of wool, worsted, the hair of the goat, alpaca, or other animals, or of a mixture of them, 11 cents per square yard and in addition thereto 40 per cent. ad valorem; and all such goods with selvedges made wholly or in part of other materials, and all such goods in which threads made wholly or in part of other materials have been introduced either in the warp or in the filling for the purpose of changing the classification for duty, shall be dutiable at 11 cents per square yard and in addition thereto 40 per cent. ad valorem: *Provided*, That all such goods weighing over 4 ounces per square yard shall pay a duty of 40 cents per pound and in addition thereto 40 per cent. ad valorem.

358. Clothing ready-made, and wearing apparel of every description, not specially enumerated or provided for in this act, balmoral skirts, and skirting, and goods of similar description, or used for like purposes, knit goods, all goods made on knitting-frames, and plushes, and all pile fabrics, composed wholly or in part of wool, worsted, the hair of the alpaca, goat, or other animals, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, 40 cents per pound and in addition thereto 45 per cent. ad valorem.

359. Cloaks, dolmans, jackets, talmas, ulsters, or other outside garments for ladies' and children's apparel and goods of similar description, or used for like purposes (except knit goods), composed wholly or in part of wool, worsted, the hair of the alpaca, goat, or other animals, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, 45 cents per pound and in addition thereto 45 per cent. ad valorem.

360. Webbings, gorings, suspenders, braces, beltings, bindings, braids, galloons, fringes, gimps, cords, cords and tassels, dress trimmings, head-nets, any of the foregoing which are elastic or non-elastic, buttons, or barrel buttons, or buttons of other forms for tassels or ornaments, wrought by hand, or braided by machinery, made of wool, worsted, the hair of the goat, alpaca, or other animals, or of which wool, worsted, the hair of the goat, alpaca, or other animals is a component material, 30 cents per pound and in addition thereto 50 per cent. ad valorem.

361. Aubusson, Axminster, Moquette, and chenille carpets, figured or plain, carpets woven whole for rooms, and all carpets or carpeting of like character or description, 45 cents per square yard and in addition thereto 30 per cent. ad valorem.

362. Saxony, Wilton, and Tournay velvet carpets, figured or plain, and all carpets or carpeting of like character or description, 45 cents per square yard and in addition thereto 30 per cent. ad valorem.

363. Brussels carpets, figured or plain, and all carpets or carpeting of like character or description, 30 cents per square yard and in addition thereto 30 per cent. ad valorem.

364. Patent velvet and tapestry velvet carpets, figured or plain, printed on the warp or otherwise, and all carpets or carpeting of like character or description, 25 cents per square yard, and in addition thereto 30 per cent. ad valorem.

365. Tapestry Brussels carpets, figured or plain, and all carpets or carpeting of like character or description, printed on the warp or otherwise, 20 cents per square yard, and in addition thereto 30 per cent. ad valorem.

366. Treble ingrain, three-ply, and worsted chain Venetian carpets, 12 cents per square yard, and in addition thereto 30 per cent. ad valorem.

367. Yarn Venetian, and two-ply ingrain carpets, 8 cents per square yard, and in addition thereto 30 per cent. ad valorem.

368. Druggets and bockings, printed, colored, or otherwise, 15 cents per square yard, and in addition thereto 30 per cent. ad valorem.

369. Carpets and carpetings of wool, flax, or cotton, or parts of either, or other materials not otherwise specially enumerated or provided for in this act, 40 per cent. ad valorem.

370. And mats, rugs, screens, covers, hassocks, bedsides, and other portions of carpets or carpetings shall be subjected to the rate of duty herein imposed on carpets or carpetings of like character or description. And the duty on all other mats not exclusively of vegetable material, screens, hassocks, and rugs shall be 40 per cent. ad valorem.

371. Endless belts or felts for paper or printing-machines, 20 cents per pound and 30 per cent. ad valorem.

SCHEDULE L.—SILK AND SILK GOODS.

372. Silk partially manufactured from cocoons or from waste-silk, and not further advanced or manufactured than carded or combed silk, 50 cents per pound.

373. Thrown silk, not more advanced than singles, tram, organzine, sewing-silk, twist, floss, spun silk, and silk threads or yarns of every description, 30 per cent. ad valorem.

374. Goods in the piece, including ribbons, not otherwise specially provided for in this act, weighing not less than 1 ounce nor more than 8 ounces per square yard, containing less than 25 per cent. and not less than 10 per cent. in weight of silk, 75 cents per pound and 15 per cent. ad valorem; the same containing less than 50 per cent. and not less than 25 per cent. in weight of silk, $1.25 per pound and 15 per cent. ad valorem; the same, containing 50 per cent. or more in weight of silk, if black, $1.60 per pound and 15 per cent. ad valorem; if white or colored, or partly black or partly colored, $2.25 per pound and 15 per cent. ad valorem.

375. Velvets, plushes, or other pile fabrics in the piece (including ribbons), not otherwise specially provided for in this act, weighing not less than 1 ounce nor more than 8 ounces per square yard, containing less than 25 per cent. and not less than 10 per cent. in weight of silk, $1 per pound and 15 per cent. ad valorem; the same, containing less than 50 per cent. and not less than 25 per cent. in weight of silk, $1.50 per pound and 15 per cent. ad valorem; the same, containing 50 per cent. or more in weight of silk, $3.50 per pound and 15 per cent. ad valorem. In ascertaining the percentage of silk under this act the weight of silk shall be taken as found in the goods.

376. Webbings, gorings, suspenders, braces, beltings, bindings, braids, galloons, fringes, cords, and tassels, any of the foregoing which are elastic or non-elastic, buttons, and ornaments, made of silk, or of which silk is the component material of chief value, 50 per cent. ad valorem.

377. Laces and embroideries, neck-rufflings and ruchings, clothing ready made, and articles of wearing apparel of every description, made up or manufactured wholly or in part by the tailor, seamstress, or manufacturer, composed of silk, or of which silk is the component material of chief value, not specially enumerated or provided for in this act, 60 per cent. ad valorem.

378. All manufactures of silk, of which silk is the component material of chief value, not specially enumerated or provided for in this act, 50 per cent. ad valorem.

SCHEDULE M.—BOOKS, PAPERS, ETC.

379. Books, including blank-books of all kinds, pamphlets and engravings, bound or unbound, photographs, etchings, maps, charts, and all printed matter, not specially enumerated or provided for in this act, 25 per cent. ad valorem.

380. Paper envelopes, 25 cents per thousand.

381. Manufactures of paper, or of which paper is the component material of chief value, not specially enumerated or provided for in this act, 25 per cent. ad valorem.

382. Papers known commercially as surface-coated papers, and manufactures thereof, card-boards, albumenized and sensitized papers, lithographic prints from either stone or zinc, bound or unbound (except illustrations in printed books), and all articles produced either in whole or in part by lithographic process, 35 per cent. ad valorem.

383. Paper-hangings and paper for screens or fire-boards, writing paper, drawing paper, filtering-paper, letter-press copying paper, and all other paper not specially enumerated or provided for in this act, 25 per cent. ad valorem.

384. Printing paper, unsized, used for books and newspapers exclusively, 15 per cent. ad valorem.

385. Paper, sized or glued, suitable only for printing paper, 20 per cent. ad valorem.

386. Sheathing paper, 10 per cent. ad valorem.

387. Playing cards, 50 cents per pack.

388. Pulp, dried, for paper-makers' use, 10 per cent. ad valorem.

SCHEDULE N.—SUNDRIES.

389. Brushes, and brooms of all kinds, including feather dusters, 30 per cent. ad valorem; broom-corn, $4 per ton.

390. Button forms: Lastings, mohair cloth, silk twist, or other manufactures

of cloth, woven or made in patterns of such size, shape, or form, or cut in such manner as to be fit for buttons exclusively, 10 per cent. ad valorem.
391. Card-clothing: Manufactured from tempered steel wire, 45 cents per square foot; all other, 25 cents per square foot.
392. Chronometers, box or ship's, and parts thereof, 10 per cent. ad valorem.
393. Coal, bituminous, and shale, 75 cents per ton of 28 bushels, 80 pounds to the bushel.
394. Coke, 20 per cent. ad valorem.
395. Dice, draughts, chess-men, chess-balls, and billiard, pool, and bagatelle balls, of ivory, bone, or other materials, 50 per cent. ad valorem.
396. Dolls, 35 per cent. ad valorem.
397. Emery grains, and emery manufactured, ground, pulverized, or refined, 1 cent per pound.
398. Feathers and downs of all kinds, when dressed, colored, or manufactured, including quilts of down and other manufactures of down, and also including dressed and finished birds suitable for millinery ornaments, and artificial and ornamental feathers and flowers, or parts thereof, of whatever material composed, not specially enumerated or provided for in this act, 40 per cent. ad valorem.
399. Fire-crackers of all kinds, 8 cents per pound, but no allowance shall be made for tare or damage thereon.
400. Fulminates, fulminating powders, and like articles, not specially enumerated or provided for in this act, 30 per cent. ad valorem.
401. Furs, dressed on the skin but not made up into articles, and furs not on the skin, prepared for hatters' use, 25 per cent. ad valorem.
402. Gloves, kid or leather, of all descriptions, wholly or partially manufactured, 50 per cent. ad valorem.
403. Gunpowder, and all explosive substances used for mining, blasting, artillery, or sporting purposes, when valued at 20 cents or less per pound, 5 cents per pound, valued above 20 cents per pound, 8 cents per pound.
404. Gun-wads of all descriptions, 35 per cent. ad valorem.
405. Hair, human, if clean or drawn but not manufactured, 20 per cent. ad valorem.
406. Hair-cloth, known as "crinoline-cloth," and hair pencils, 30 per cent. ad valorem.
407. Hair-cloth, known as "hair-seating," 30 cents per square yard.
408. Hair, curled, suitable for beds or mattresses, 15 per cent. ad valorem.
409. Hats, for men's, women's, and children's wear, composed of the fur of the rabbit, beaver, or other animals or of which such fur is the component material of chief value, wholly or partially manufactured, including fur hat bodies, 50 per cent. ad valorem.
410. Jewelry: All articles, not elsewhere specially provided for in this act, composed of precious metals or imitations thereof, whether set with coral, jet, or pearls, or with diamonds, rubies, cameos, or other precious stones, or imitations thereof, or otherwise, and which shall be known commercially as "jewelry," 25 per cent. ad valorem.
411. Leather.—Bend or belting leather and sole-leather, and leather not specially enumerated or provided for in this act, 15 per cent. ad valorem.
412. Calf-skins, tanned, or tanned and dressed, dressed upper-leather, including patent enameled and Japanned leather, and skins of all kinds not specially enumerated or provided for in this act, and chamois-skins, dressed or undressed and finished, 25 cents per pound; sheep and goat skins, including lamb and kid skins, dressed and finished, 20 per cent. ad valorem; skins for morocco, tanned but unfinished, 10 per cent. ad valorem.
413. But leather cut into shoe uppers or vamps, or other forms, suitable for conversion into manufactured articles, shall be classified as manufactures of leather, and pay duty accordingly.
414. Lime, 5 cents per 100 pounds.
415. Manufactures of alabaster, amber, asbestos, bladders, coral, cork or cork bark, cat-gut or whip-gut or worm-gut, jet, paste, spar, or wax, or of which these substances or either of them is the component material of chief value, not specially enumerated or provided for in this act, 25 per cent. ad valorem.
416. Manufactures of bone, chip, fur, grass, horn, india-rubber, palm-leaf, straw, weeds, or whalebone, or of which these substances or either of them is the component material of chief value, not specially enumerated or provided for in this act, 30 per cent. ad valorem.
417. Manufactures of leather, gutta-percha, human hair, and papier-maché, or of which these substances or either of them is the component material of chief value, not specially enumerated or provided for in this act, 35 per cent. ad valorem.
418. Manufactures of ivory, vegetable ivory, mother-of-pearl, and shell, or of which these substances or either of them is the component material of chief value, not specially enumerated or provided for in this act, 40 per cent. ad valorem.
419. Marble of all kinds.—In block, rough or squared, 65 cents per cubic foot.
420. Veined marble, sawed, dressed, or otherwise, including marble slabs and marble paving-tiles, $1.10 per cubic foot (but in measurement no slab shall be computed at less than 1 inch in thickness).
421. Manufactures of marble not specially enumerated or provided for in this act, 50 per cent. ad valorem.
422. Matches.—Friction or lucifer, of all descriptions, per gross of one hundred and forty-four boxes, containing not more than one hundred matches per box, 10 cents per gross; when imported otherwise than in boxes containing not more than one hundred matches each, 1 cent per one thousand matches.
423. Cocoa matting and mats.—Matting, 10 cents per square yard; mats, 5 cents per square foot.
424. Paintings, in oil or water colors, and statuary, not otherwise provided for in this act, 30 per cent. ad valorem; but the term "statuary" as herein used shall be understood to include only such statuary as is cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and as is the professional production of a statuary or sculptor only.
425. Pearls, 25 per cent. ad valorem.
426. Pencils of wood filled with lead or other material, and pencils of lead, 50 cents per gross and 30 per cent. ad valorem.
427. Pencil-leads not in wood, 10 per cent. ad valorem.
428. Percussion-caps, 40 per cent. ad valorem.
429. Pipes, pipe-bowls, and cigar-holders of wood, one-half of 1 cent each and 70 per cent. ad valorem.
430. All smokers' articles whatsoever, not specially enumerated or provided for in this act, including cigarette-books, cigarette-book covers, and cigarette-paper in all forms, 70 per cent. ad valorem.
431. All common tobacco-pipes of clay, 35 per cent. ad valorem.
432. Pearl and shell buttons, 2 cents per line button measure of one-fortieth of 1 inch per gross and in addition thereto 25 per cent. ad valorem.
433. Plush, black, known commercially as hatters' plush, composed of silk, or of silk and cotton, and used exclusively for making men's hats, 10 per cent. ad valorem.
434. Precious stones of all kinds, cut but not set, 10 per cent. ad valorem; if set, and not specially enumerated or provided for in this act, 25 per cent. ad valorem.
435. Stone.—Freestone, granite, sandstone, and all building or monumental stone, except marble, unmanufactured or undressed, not specially enumerated or provided for in this act, 14 cents per cubic foot.
436. Freestone, granite, sandstone, and other building or monumental stone, except marble, not specially enumerated or provided for in this act, hewn, dressed, or polished, and burr-stones manufactured or bound up into mill-stones, 25 per cent. ad valorem.
437. Grindstones, finished or unfinished, $1.75 per ton.
438. Umbrellas, parasols, and sun-shades: Covered with silk, alpaca, or similar material, 50 per cent. ad valorem; if covered with other material, 40 per cent. ad valorem.
439. Waste, not specially enumerated or provided for in this act, 10 per cent. ad valorem.
440. Watches, watch-cases, watch-movements, parts of watches, watch-glasses, and watch-keys, whether separately packed or otherwise, 25 per cent. ad valorem.

FREE LIST.

SEC. 2503. The following articles when imported shall be exempt from duty:
441. Acids used for medicinal, chemical, or manufacturing purposes, not specially enumerated or provided for in this act.
442. Aconite.
443. Acorns, raw, dried or undried, but unground.
444. Agates, unmanufactured.
445. Albumen.
446. Alizarine, natural.
447. Alizarine, artificial.
448. Amber, unmanufactured, or crude gum.
449. Ambergris.
450. Aniline salts.
451. Animals brought into the United States temporarily for a period not exceeding six months, for the purpose of exhibition or competition for prizes offered by any agricultural or racing association; but a bond shall be given in accordance with regulations prescribed by the Secretary of the Treasury; also, teams of animals, including their harness and tackle and the wagons or other vehicles actually owned by persons emigrating from foreign countries to the United States with their families, and in actual use for the purpose of such emigration, under such regulations as the Secretary of the Treasury may prescribe.
452. Annatto, roucou, rocoa, or orleans, and all extract of.
453. Antimony ore, crude sulphide of.
454. Apatite.
455. Argal, or argol, or crude tartar.
456. Arrow-root, raw or unmanufactured.
457. Arsenic and sulphide of, or orpiment.
458. Arseniate of aniline.
459. Articles in a crude state used in dyeing or tanning not specially enumerated or provided for in this act.
460. Articles specially imported for the use of the United States, provided that the price of the same did not include the duty.
461. Articles the growth, produce, and manufacture of the United States, when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means; casks, barrels, carboys, bags, and other vessels of American manufacture exported filled with American products, or exported empty and returned filled with foreign products, including shooks when returned as barrels or boxes; but proof of the identity of such articles shall be made, under general regulations to be prescribed by the Secretary of the Treasury; and if any such articles are subject to internal tax at the time of exportation, such tax shall be proved to have been paid before exportation and not refunded: *Provided*, That this paragraph shall not apply to any article upon which an allowance of drawback has been made, the reimportation of which is hereby prohibited except upon payment of duties equal to the drawbacks allowed.
462. Asbestos, unmanufactured.
463. Ashes, wood and lye of, and beet-root ashes.
464. Asphaltum and bitumen, crude.
465. Asafetida.
466. Balm of Gilead.
467. Barks, cinchona or other.
468. Baryta, carbonite or witherite.
469. Baryta, sulphate of, or barytes, unmanufactured.
470. Bauxite, or beauxite.
471. Beeswax.
472. Bells, broken, and bell-metal, broken, and fit only to be remanufactured.
473. Birds, stuffed, not suitable for millinery ornaments.
474. Birds and land and water fowls.
475. Bismuth.
476. Bladders, including fish-bladders or fish-sounds, crude, and all integuments of animals not specially enumerated or provided for in this act.
477. Blood, dried,
478. Bologna sausages.
479. Bolting-cloths.
480. Bones, crude, or not burned, calcined, ground, steamed, or otherwise manufactured, and bone-dust or animal carbon, and bone-ash, fit only for fertilizing purposes.
481. Books, engravings, photographs, bound or unbound etchings, maps, and charts; which shall have been printed and bound or manufactured more than twenty years at the date of importation.
482. Books and pamphlets printed exclusively in languages other than English.
483. Books, engravings, photographs, etchings, bound or unbound, maps and charts imported by authority or for the use of the United States or for the use of the Library of Congress; but the duty shall not have been included in the contract or price paid.
484. Books, maps, and charts specially imported, not more than two copies in any one invoice, in good faith, for the use of any society incorporated or established for philosophical, literary, or religious purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States.
485. Books, or libraries, or parts of libraries, and other household effects of persons or families from foreign countries, if used abroad by them not less than one year, and not intended for any other person or persons, nor for sale.
486. Brazil paste.
487. Braids, plaits, flats, laces, and similar manufactures suitable for making or ornamenting hats, bonnets, and hoods, composed of straw, chip, grass, palm-leaf, willow, osier or rattan.
488. Brazilian pebbles, rough or unmanufactured.
489. Breccia, in blocks or slabs.
490. Bristles, raw or manufactured.
491. Bromine.
492. Bullion, gold or silver.
493. Bulbs and bulbous roots, not edible.
494. Burgundy pitch.
495. Cabinets of old coins and medals, and other collections of antiquities; but the term "antiquities" as used in this act shall include only such articles as are suitable for souvenirs or cabinet collections, and which shall have been produced at any period prior to the seventeenth century.
496. Cadmium.
497. Calamine.
498. Camphor, crude.
499. Castor or castoreum.

500. Cassia, cassia vera, and cassia-buds, unground.
501. Catgut, whip-gut, or worm-gut, unmanufactured, or not further manufactured than in strings or cord.
502. Cerium.
503. Chalk, unmanufactured.
504. Charcoal.
505. Chicory-root, raw, dried, or undried, but unground.
506. Cinnamon, and chips of, unground.
507. Civet, crude.
508. Cloves and clove-stems, unground.
509. Coal, anthracite.
510. Coal slack or culm, such as will pass through a half-inch screen.
511. Coal stores of American vessels; but none shall be unloaded.
512. Coal-tar, crude.
513. Cobalt and cobalt ore.
514. Cocculus indicus.
515. Cochineal.
516. Cocoa, or cacao, crude, and fiber, leaves and shells of.
517. Coffee.
518. Coins, gold, silver, and copper.
519. Coir, and coir yarn.
520. Copper, old, taken from the bottom of American vessels compelled by marine disaster to repair in foreign ports.
521. Copper, when imported for the United States Mint.
522. Coral, marine, uncut, and unmanufactured.
523. Cork-wood, or cork-bark, unmanufactured.
524. Cotton, and cotton-waste or flocks.
525. Cryolite, or kryolith.
526. Cudbear.
527. Curling-stones, or quoits, and curling-stone handles.
528. Currants, Zante, or other dried.
529. Curry and curry-powder.
530. Cutch.
531. Cuttle-fish bone.
532. Dandelion roots, raw, dried, or undried, but unground.
533. Diamonds and other precious stones, rough or uncut (not including pearls), and diamond dust or bort.
534. Diamonds set for glaziers' use, and diamonds set as pencils or drills for engravers' use.
535. Divi-divi.
536. Dragon's blood.
537. Drugs, such as: barks, beans, berries, balsams, buds, bulbs, and bulbous roots, excrescences such as nut-galls, fruits, flowers, dried fibers, and dried insects, grains, gums, and gum-resin, herbs, leaves, lichens, mosses, nuts, roots, and stems, spices, vegetables, seeds aromatic, and seeds of morbid growth, weeds, and woods used expressly for dyeing—any of the foregoing which are not edible and are in a crude state, and not advanced in value or condition by refining or grinding, or by other process of manufacture, and not specially enumerated or provided for in this act.
538. Eggs of birds and fowls, and of fish and insects, and egg-yelks, unmanufactured.
539. Emery ore.
540. Ergot.
541. Fans, common palm-leaf, and palm-leaf, unmanufactured.
542. Farina.
543. Fashion-plates, engraved on steel or copper or on wood, colored or plain.
544. Feathers and downs of all kinds, crude and unmanufactured.
545. Feldspar.
546. Felt, adhesive, for sheathing vessels.
547. Fibrin, in all forms.
548. Fibers and grasses: China-grass.
549. Istle or Tampico fiber.
550. Jute.
551. Jute-butts.
552. Manila.
553. Ramie.
554. Sisal-grass.
555. Sunn.
556. And all other textile grasses or fibrous vegetable substances, unmanufactured or undressed, not specially enumerated or provided for in this act.
557. Fish, fresh, except when frozen or packed in ice, or otherwise prepared by any process for preservation.
558. Fish for bait.
559. Fish-skins.
560. Flint, flints, and ground flint stones.
561. Floor-matting manufactured from round or split straw, including what is commercially known as Chinese matting.
562. Fossils.
563. Fruit-plants, tropical and semi-tropical, for the purpose of propagation or cultivation.
564. Fruits, green, ripe, or dried, not specially enumerated or provided for in this act.
565. Furs, undressed.
566. Fur-skins of all kinds not dressed in any manner.
567. Gambier.
568. Ginger-root, unground, and not preserved or candied.
569. Glass, broken pieces, and old glass, which can not be cut for use, and fit only to be remanufactured.
570. Glass plates or disks, rough-cut and unwrought, for use in the manufacture of optical instruments, spectacles, and eye-glasses, and suitable only for such use.
571. Gold-beaters' molds and gold-beaters' skins.
572. Grease and oils, such as are commonly used in soap-making or in wire-drawing or for stuffing or dressing leather, and as are fit only for such uses, not specially enumerated or provided for in this act.
573. Guano, manures, and all substances expressly used for manure.
574. Gunny bags and gunny cloths, old or refuse, fit only for remanufacture.
575. Guts, salted.
576. Gutta-percha, crude.
577. Hair of horse, cattle, and other animals, cleaned or uncleaned, drawn or undrawn, but unmanufactured, not specially enumerated or provided for in this act; and human hair, raw, uncleaned, and not drawn.
578. Hide-cuttings, raw, with or without hair, and all other glue-stock.
579. Hide rope.
580. Hides, raw or uncured, whether dry, salted, or pickled, and skins of all kinds, raw or dried, salted, or pickled, but unmanufactured, except sheep-skins with dutiable wool on.
581. Hones and whetstones.
582. Hoofs, unmanufactured.
583. Hop roots for cultivation.
584. Horns and parts of, including horn strips and tips, unmanufactured.
585. Ice.
586. India rubber, crude, and milk of, and old scrap or refuse India rubber which has been worn out by use and is fit only for remanufacture.
587. Indigo.
588. Iodine, crude.
589. Ipecac.
590. Iridium.
591. Ivory and vegetable ivory, not sawed, cut, or otherwise manufactured.
592. Jalap.
593. Jet, unmanufacted.
594. Joss-stick, or Joss-light.
595. Junk, old.
596. Kelp.
597. Kieserite.
598. Kyanite, or cyanite, and kainite.
599. Lac-dye, crude, seed, button, stick, and shell.
600. Lac spirits.
601. Lactarine.
602. Lava, unmanufactured.
603. Leather, old scraps.
604. Leeches.
605. Lemon-juice, lime-juice, and sour-orange juice.
606. Licorice-root, unground.
607. Life-boats and life-saving apparatus specially imported by societies incorporated or established to encourage the saving of human life.
608. Lime, citrate of.
609. Lime, chloride of, or bleaching-powder.
610. Lithographic stones not engraved.
611. Litmus, prepared or not prepared.
612. Loadstones.
613. Mace.
614. Madder and munjeet, or Indian madder, ground or prepared, and all extracts of.
615. Magnesite, or native mineral carbonate of magnesia.
616. Magnesium.
617. Magnets.
618. Manganese, oxide and ore of.
619. Manna.
620. Manuscripts.
621. Marrow, crude.
622. Marsh mallows.
623. Medals of gold.
624. Medals of silver or copper.
625. Meerschaum, crude or unmanufactured.
626. Mica and mica waste.
627. Mineral waters, all not otherwise specially provided for in this act.
628. Minerals, crude, or not advanced in value or condition by refining or grinding, or by other process of manufacture, not specially enumerated or provided for in this act.
629. Models of inventions and of other improvements in the arts, including patterns for machinery, but no article shall be deemed a model or pattern which can be fitted for use otherwise.
630. Molasses testing not above fifty-six degrees by the polariscope: *Provided*, That if an export duty shall hereafter be laid upon molasses by any country from whence the same may be imported, it shall be subject to duty as provided by law at the date of the passage of this act.
631. Moss, sea-weeds, and vegetable substances, crude or unmanufactured, not otherwise specially provided for in this act.
632. Musk, crude, in natural pods.
633. Myrobolan.
634. Newspapers and periodicals; but the term "periodicals" as herein used shall be understood to embrace only unbound or paper-covered publications, containing current literature of the day and issued regularly at stated periods, as weekly, monthly, or quarterly.
635. Nutmegs.
636. Nuts.—Cocoa.
637. Brazil.
638. Cream.
639. Palm.
640. Palm-nut kernels.
641. Nux vomica.
642. Oakum.
643. Oil-cake.
644. Oils.—Almond.
645. Amber, crude and rectified.
646. Ambergris.
647. Anise, or anise-seed.
648. Aniline.
649. Aspic, or spike-lavender.
650. Bergamot.
651. Cajeput.
652. Caraway.
653. Cassia and cinnamon.
654. Cedrat.
655. Chamomile.
656. Citronella, or lemon-grass.
657. Civet.
658. Fennel.
659. Jasmine, or jasimine.
660. Juglandium.
661. Juniper.
662. Lavender.
663. Lemon.
664. Limes.
665. Mace.
666. Neroli, or orange flower.
667. Nut oil, or oil of nuts not otherwise specially provided for in this act.
668. Orange.
669. Olive oil, for manufacturing or mechanical purposes, unfit for eating and not otherwise provided for in this act.
670. Ottar of roses.
671. Palm and cocoanut.
672. Rosemary or anthoss.
673. Sesame or sesamum-seed, or bean.
674. Thyme origanum, red or white.
675. Valerian.
676. Spermaceti, whale, and other fish oils of American fisheries, and all other articles the produce of such fisheries.
677. Olives, green or prepared.
678. Opium, crude or unmanufactured, and not adulterated, containing 9 per cent. and over of morphia.
679. Orange and lemon peel, not preserved, candied, or otherwise prepared.
680. Orchil, or orchil liquid.
681. Ores, of gold and silver.
682. Osmium.
683. Palladium.
684. Paper stock, crude, of every description, including all grasses and pulp of grasses, fibers, rags (other than wool), waste, shavings, clippings, old paper, rope ends, waste rope, waste bagging, old or refuse gunny bags or gunny cloth, and poplar or other woods, fit only to be converted into paper.
685. Paraffine.

686. Parchment and vellum.
687. Pearl, mother of, not sawed, cut, polished, or otherwise manufactured.
688. Peltries and other proper goods and effects of Indians passing or repassing the boundary line of the Territories of the United States: *Provided*, That this exemption shall not apply to goods in bales or other large packages unusual among Indians.
689. Pepper of all kinds, unground.
690. Personal and household effects, not merchandise, of citizens of the United States dying in foreign countries.
691. Pewter and britannia metal, old, and fit only to be remanufactured.
692. Philosophical and scientific apparatus, instruments, and preparations; statuary, casts of marbles, bronze, alabaster, or plaster of Paris; painting, drawings, and etchings, specially imported in good faith for the use of any society or institution incorporated or established for religious, philosophical, educational, scientific, or literary purposes, or for encouragement of the fine arts, and not intended for sale.
693. Phosphates, crude or native.
694. Pimento, unground.
695. Plants, trees, shrubs, and vines, of all kinds, not otherwise specially provided for in this act; and plants, trees, shrubs, roots, seed-cane, and seeds, imported by the Department of Agriculture or the United States Botanic Garden.
696. Plaster of Paris and sulphate of lime, unground.
697. Platina, in ingots, bars, sheets, and wire.
698. Platinum, unmanufactured, and vases, retorts, and other apparatus, vessels, and parts thereof composed of platinum, for chemical uses.
699. Plumbago.
700. Polishing-stones.
701. Potash.—Crude, carbonate of, or "black salts," or fused.
702. Caustic, or hydrate of, not including refined in sticks or rolls.
703. Nitrate of, or saltpeter, crude.
704. Sulphate of, crude or unrefined.
705. Chlorate of.
706. Muriate of.
707. Professional books, implements, instruments, and tools of trade, occupation, or employment, of persons arriving in the United States; but this exemption shall not be construed to include machinery or other articles imported for use in any manufacturing establishment, or for any other person or persons, or for sale.
708. Pulu.
709. Pumice.
710. Quills, prepared or unprepared, but not made up into complete articles.
711. Quinia, sulphate of, and all alkaloids or salts of cinchona-bark.
712. Rags, all not otherwise specially enumerated or provided for in this act.
713. Regalia and gems, statues, statuary, and specimens of sculpture, where specially imported in good faith for the use of any society incorporated or established for philosophical, literary, or religious purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, seminary of learning or public library in the United States; but the term "regalia" as herein used shall be held to embrace only such insignia of rank or office, or emblems, as may be worn upon the person or borne in the hand during public exercises of the society or institution, and shall not include articles of furniture or fixtures, or of regular wearing apparel, nor personal property of individuals.
714. Rennets, raw or prepared.
715. Saffron and safflower, and extract of, and saffron cake.
716. Sago, crude, and sago flower, not in condition suitable for use as starch.
717. Salacine.
718. Sauer-kraut.
719. Sausage skins.
720. Seeds.—Anise.
721. Canary.
722. Caraway.
723. Cardamom.
724. Coriander.
725. Cotton.
726. Cummin.
727. Fennel.
728. Fenugreek.
729. Hemp.
730. Hoarhound.
731. Mangel-wurzel.
732. Melon.
733. Mustard.
734. Poppy.
735. Pumpkin.
736. Rape.
737. St. John's bread or bean.
738. Sugar-beet.
739. Squash.
740. Turnip.
741. And all flower and grass seeds not otherwise specially provided for in this act.
742. Selep, or saloup.
743. Shells of all kinds, not cut, ground, or otherwise manufactured.
744. Shrimps, and other shell-fish.
745. Silk, raw, or as reeled from the cocoon, but not doubled, twisted, or advanced in manufacture in any way.
746. Silk cocoons and silk-waste.
747. Silk-worms' eggs.
748. Skeletons and other preparations of anatomy.
749. Snails.
750. Soda, nitrate of, or cubic nitrate, and chlorate of.
751. Sodium.
752. Sparterre, suitable for making or ornamenting hats.
753. Specimens of natural history, botany, and mineralogy, when imported for cabinets or as objects of science, and not for sale.
754. Sponges.
755. Spunk.
756. Spurs and stilts used in the manufacture of earthen, porcelain, and stone ware.
757. Stone and sand: Burr-stone in blocks, rough or unmanufactured, and not bound up into millstones; cliff-stone, unmanufactured; pumice-stone, rottenstone, and sand, crude or unmanufactured.
758. Storax, or styrax.
759. Straw, unmanufactured.
760. Strontia, oxide of, and protoxide of strontian, and strontianite, or mineral carbonate of strontia.
761. Sugar of milk.
762. Sulphur, lac or precipitated, and sulphur or brimstone, not specially enumerated or provided for in this act.
763. Sweepings of silver and gold.
764. Tamarinds.
765. Tapioca, cassava or cassada, provided the same is not fit for use as starch.
766. Tar and pitch of wood.
767. Tea and tea-plants.
768. Teasels.
769. Teeth, natural or unmanufactured.
770. Terra alba.
771. Terra japonica.
772. Tin ore, and tin in bars, blocks, pigs, or grain or granulated.
773. Tonquin, tonqua, or tonka beans.
774. Tripoli.
775. Turmeric.
776. Turpentine, Venice.
777. Turpentine, spirits of.
778. Turtles.
779. Types, old, and fit only to be remanufactured.
780. Uranium, oxide and salts of.
781. Vaccine virus.
782. Valonia.
783. Verdigris, or subacetate of copper.
784. Wafers, unmedicated.
785. Wax, vegetable or mineral.
786. Wearing apparel and other personal effects (not merchandise) of persons arriving in the United States; but this exemption shall not be held to include articles not actually in use and necessary and appropriate for the use of such persons for the purposes of their journey and present comfort and convenience, or which are intended for any other person or persons, or for sale: *Provided, however*, That all such wearing apparel and other personal effects as may have been once imported into the United States and subjected to the payment of duty, and which may have been actually used and taken or exported to foreign countries by the persons returning therewith to the United States, shall, if not advanced in value or improved in condition by any means since their exportation from the United States, be entitled to exemption from duty, upon their identity being established, under such rules and regulations as may be prescribed by the Secretary of the Treasury.
787. Whalebone, unmanufactured.
788. Wood.—Logs.
789. Fire-wood, handle-bolts, heading-bolts, or stave-bolts, and shingle-bolts, hop-poles, railroad ties, ship-timber, and ship-planking.
790. Cedar, lignum-vitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, and all other cabinet-woods, unmanufactured, not otherwise specially provided for in this act; bamboo, rattan, reeds, and osier or willow, unmanufactured; bamboo, reeds, and sticks of partridge, hairwood, pimento, orange, myrtle, and other woods, not otherwise specially provided for in this act, in the rough, or not further manufactured than cut into lengths suitable for umbrella, parasol, sun-shade, or whip-sticks, or walking-canes; and India malacca joints, not further manufactured than cut into suitable lengths for the manufactures into which they are intended to be converted.
791. Works of art, paintings, statuary, and other works of art the production of American artists residing temporarily abroad, and paintings, statuary, fountains, and other works of art, imported expressly for presentation to a national institution, or to any State or municipal corporation, or incorporated religious society, college, or other public institution; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.
792. Works of art, drawings, engravings, photographic pictures, and philosophical and scientific apparatus brought by professional artists, lecturers, or scientists arriving from abroad for use by them temporarily for exhibition and in illustration, promotion, and encouragement of art, science, or industry in the United States, and not for sale, and paintings, statuary, and photographic pictures imported for exhibition by any association duly authorized under the laws of the United States or of any State, for the promotion and encouragement of science, art, or industry, and not intended for sale, shall be admitted free of duty, under such regulations as the Secretary of the Treasury shall prescribe; but bonds shall be given for the payment to the United States of such duties as may be imposed by law upon any and all of such articles as shall not be exported within six months after such importation: *Provided, however*, That the Secretary of the Treasury may, in his discretion, extend such period for a further term of six months in cases where applications therefor shall be made.
793. Works of art, collections in illustration of the progress of the arts, science, or manufactures, photographs, works in terra-cotta, parian, pottery, or porcelain, and artistic copies of antiquities in metal or other material, hereafter imported in good faith for permanent exhibition at a fixed place by any society or institution established for the encouragement of the arts or science, and all like articles imported in good faith by any society or association for the purpose of erecting a public monument, and not intended for sale, nor for any other purpose than herein expressed; but the parties importing such articles shall give bonds, under such rules and regulations as the Secretary of the Treasury may prescribe, for the payment of lawful duties which may accrue should any of the articles aforesaid be so sold, transferred, or used contrary to this provision; and such articles shall be subject, at any time, to examination and inspection by the proper officers of the customs.
794. Yams.
795. Zaffer.

SEC. 2491. All persons are prohibited from importing into the United States from any foreign country any obscene book, pamphlet, paper, writing, advertisement, circular, print, picture, drawing, or other representation, figure, or image on or of paper or other material, or any cast, instrument, or other article of an immoral nature, or any drug or medicine, or any article whatever, for the prevention of conception, or for causing unlawful abortion. No invoice or package whatever, or any part of one, in which any such articles are contained shall be admitted to entry; and all invoices and packages whereof any such articles shall compose a part are liable to be proceeded against, seized, and forfeited by due course of law. All such prohibited articles in the course of importation shall be detained by the officer of customs, and proceedings taken against the same as prescribed in the following section: *Provided*, That the drugs hereinbefore mentioned, when imported in bulk and not put up for any of the purposes hereinbefore specified, are excepted from the operation of this section.

SEC. 2492. Whoever, being an officer, agent, or employé of the Government of the United States, shall knowingly aid or abet any person engaged in any violation of any of the provisions of law prohibiting importing, advertising, dealing in, exhibiting, or sending or receiving by mail obscene or indecent publications or representations, or means for preventing conception or procuring abortion, or other articles of indecent or immoral use or tendency, shall be deemed guilty of a misdemeanor, and shall for every offense be punishable by a fine of not more than $5,000, or by imprisonment at hard labor for not more than ten years, or both.

SEC. 2493. Any judge of any district or circuit court of the United States, within the proper district, before whom complaint in writing of any violation of the preceding sections is made, to the satisfaction of such judge, and founded on knowledge or belief, and if upon belief, setting forth the grounds of such belief, and supported by oath or affirmation of the complainant, may issue, conformably to the Constitution, a warrant directed to the marshal, or any deputy marshal, in the proper district, directing him to search for, seize, and take possession of any such article or thing hereinbefore mentioned, and to make due and immediate return thereof to the end that the same may be condemned and destroyed by proceedings, which shall be conducted in the same manner as other proceedings in the case of municipal seizure, and with the same right of appeal or writ of error.

SEC. 2494. The importation of neat cattle and the hides of neat cattle from any foreign country into the United States is prohibited: *Provided*, That the operation of this section shall be suspended as to any foreign country or countries, or any parts of such country or countries, whenever the Secretary of the Treasury shall officially determine, and give public notice thereof, that such importation will not tend to the introduction or spread of contagious or infectious diseases among the cattle of the United States; and the Secretary of the Treasury is hereby authorized and empowered, and it shall be his duty, to make all necessary orders and regulations to carry this law into effect, or to suspend the same as therein provided, and to send copies thereof to the proper officers in the United States, and to such officers or agents of the United States in foreign countries as he shall judge necessary.

SEC. 2495. Any person convicted of a willful violation of any of the provisions of the preceding section shall be fined not exceeding $500, or imprisoned not exceeding one year, or both, in the discretion of the court.

SEC. 2496. No watches, watch-cases, watch-movements, or parts of watch-movements, or any other articles of foreign manufacture, which shall copy or simulate the name or trade-mark of any domestic manufacture or manufacturer, shall be admitted to entry at the custom-house of the United States, unless such domestic manufacturer is the importer of the same. And in order to aid the officers of the customs in enforcing this prohibition, any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury, under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the Department fac-similes of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs.

SEC. 2497. No goods, wares, or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production, or manufacture; or from which such goods, wares, or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares, or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, together with her cargo, tackle, apparel, and furniture, shall be forfeited to the United States; and such goods, wares, or merchandise, ship, or vessel, and cargo shall be liable to be seized, prosecuted, and condemned, in like manner, and under the same regulations, restrictions, and provisions as have been heretofore established for the recovery, collection, distribution, and remission of forfeitures to the United States by the several revenue laws.

SEC. 2498. The preceding section shall not apply to vessels or goods, wares, or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

SEC. 2499. Each and every imported article, not enumerated in this act, which is similar, either in material, quality, texture, or the use to which it may be applied, to any article enumerated in this act as chargeable with duty, shall pay the same rate of duty which is levied on the enumerated article which it most resembles in any of the particulars before mentioned; and if any non-enumerated article equally resembles two or more enumerated articles on which different rates of duty are chargeable, there shall be levied on such non-enumerated article the same rate of duty as is chargeable on the article which it resembles paying the highest rate of duty; and on articles not enumerated, manufactured of two or more materials, the duty shall be assessed at the highest rate at which the same would be chargeable if composed wholly of the component material thereof of chief value; and the words "component material of chief value," wherever used in this act, shall be held to mean that component material which shall exceed in value any other single component material of the article; and the value of each component material shall be determined by the ascertained value of such material in its condition as found in the article. If two or more rates of duty shall be applicable to any imported article, it shall pay duty at the highest of such rates.

SEC. 2500. Upon the reimportation of articles once exported of the growth, product, or manufacture of the United States, upon which no internal tax has been assessed or paid, or upon which such tax has been paid and refunded by allowance or drawback, there shall be levied, collected, and paid a duty equal to the tax imposed by the internal-revenue laws upon such articles.

SEC. 2501. A discriminating duty of 10 per cent. ad valorem, in addition to the duties imposed by law, shall be levied, collected, and paid on all goods, wares, or merchandise which shall be imported in vessels not of the United States; but this discriminating duty shall not apply to goods, wares, and merchandise which shall be imported in vessels not of the United States, entitled, by treaty or any act of Congress, to be entered in the ports of the United States on payment of the same duties as shall then be paid on goods, wares, and merchandise imported in vessels of the United States.

SEC. 2504. Whenever any vessel laden with merchandise, in whole or in part subject to duty, has been sunk in any river, harbor, bay, or waters subject to the jurisdiction of the United States, and within its limits, for the period of two years, and is abandoned by the owner thereof, any person who may raise such vessel shall be permitted to bring any merchandise recovered therefrom into the port nearest to the place where such vessel was so raised, free from the payment of any duty thereupon, and without being obliged to enter the same at the custom-house; but under such regulations as the Secretary of the Treasury may prescribe.

SEC. 2505. The produce of the forests of the State of Maine upon the St. John River and its tributaries, owned by American citizens, and sawed or hewed in the province of New Brunswick by American citizens, the same being unmanufactured in whole or in part, which is now admitted into the ports of the United States free of duty, shall continue to be so admitted under such regulations as the Secretary of the Treasury shall from time to time prescribe.

SEC. 2506. The produce of the forests of the State of Maine upon the St. Croix River and its tributaries, owned by American citizens, and sawed in the province of New Brunswick by American citizens, the same being unmanufactured in whole or in part, and having paid the same taxes as other American lumber on that river, shall be admitted into the ports of the United States free of duty, under such regulations as the Secretary of the Treasury shall from time to time prescribe.

SEC. 2507. Machinery for repair may be imported into the United States without payment of duty, under bond, to be given in double the appraised value thereof, to be withdrawn and exported after said machinery shall have been repaired; and the Secretary of the Treasury is authorized and directed to prescribe such rules and regulations as may be necessary to protect the revenue against fraud, and secure the identity and character of all such importations when again withdrawn and exported, restricting and limiting the export and withdrawal to the same port of entry where imported, and also limiting all bonds to a period of time of not more than six months from the date of the importation.

SEC. 2508. That the importation of all articles of foreign manufacture, or of boxes or packages containing the same, when stamped, marked, branded, or labeled to represent that such articles were manufactured in the United States, is hereby prohibited, and all such articles shall be forfeited to the United States.

SEC. 2509. That the importation of opium, containing less than 9 per cent. of morphia, and of opium prepared for smoking be, and the same is hereby, prohibited: and all such opium shall, upon importation, be seized and proceeded against for forfeiture and condemnation. All opium containing less than 9 per cent. of morphia, and all opium prepared for smoking, wherever found in the United States, shall be subject to seizure, and shall be condemned and destroyed unless the claimant thereto shall show to the satisfaction of the court that the same was lawfully imported or was prepared from opium lawfully imported: *Provided*, That officers of the United States, by whom opium may be seized under the provisions of this section, and persons giving information leading to such seizure, shall receive such compensation, upon the condemnation of the opium so seized, as the Secretary of the Treasury may direct, to be paid from the appropriation for the prevention and detection of frauds upon the customs revenue. The whole amount of such compensation shall not, however, exceed, in any case, one-half of the appraised value of the opium seized and condemned: *Provided further*, That the Secretary of the Treasury may prescribe suitable regulations for the enforcement of this section.

SEC. 2510. All lumber, timber, hemp, manila, wire rope, and iron and steel rods, bars, spikes, nails, plates, angles, bars, and bolts, and copper, and composition metal which may be necessary for the construction and equipment of vessels built in the United States for foreign account and ownership or for the purpose of being employed in the foreign trade, including the trade between the Atlantic and Pacific ports of the United States, after the passage of this act, may be imported in bond, under such regulations as the Secretary of the Treasury may prescribe; and upon proof that such materials have been used for such purpose, no duties shall be paid thereon. But vessels receiving the benefit of this section shall not be allowed to engage in the coastwise trade of the United States more than two months in any one year, except upon the payment to the United States of the duties on which a rebate is herein allowed: *Provided*, That vessels built in the United States for foreign account and ownership shall not be allowed to engage in the coastwise trade of the United States.

SEC. 2511. All articles of foreign production needed for the repair of American vessels engaged exclusively in foreign trade may be withdrawn from bonded warehouses free of duty, under such regulations as the Secretary of the Treasury may prescribe.

SEC. 2512. That no duty shall be levied or collected on the importation of peltries brought into the Territories of the United States by Indians, nor on the proper goods and effects, of whatever nature, of Indians passing or repassing the boundary line aforesaid, unless the same be goods in bales or other large packages unusual among Indians, which shall not be considered as goods belonging to Indians, nor be entitled to the exemption from duty aforesaid.

SEC. 2513. There shall be levied, collected, and paid on the importation of all raw or unmanufactured articles, not enumerated or provided for in this title, a duty of 10 per cent. ad valorem; and all articles manufactured, in whole or in part, not enumerated or provided for in this title, a duty of 20 per cent. ad valorem.

COLLECTION OF DUTIES ON IMPORTS.

SEC. 13. All merchandise imported into the United States shall, for the purpose of this act, be deemed and held to be the property of the person to whom the merchandise may be consigned; but the holder of any bill of lading consigned to order and properly indorsed shall be deemed the consignee thereof, and in case of the abandonment of any merchandise to the underwriters the latter may be recognized as the consignee.

SEC. 14. That all invoices of imported merchandise shall be made out in the currency of the place or country from whence the importations shall be made, or if purchased, in the currency actually paid therefor, shall contain a correct description of such merchandise, and shall be made in triplicate and signed by the person owning or shipping the same, if the merchandise has been actually purchased, or by the manufacturer or owner thereof if the same has been procured otherwise than by purchase, or by the duly authorized agent of such purchaser, manufacturer, or owner.

SEC. 15. That all such invoices shall, at or before the shipment of the merchandise, be produced to the consul, vice-consul, or commercial agent of the United States of the consular district from which the merchandise is exported to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true, and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, and the actual cost thereof and of all charges thereon; and that no discounts, bounties, or drawbacks are contained in the invoice but such as have been actually allowed thereon; and when obtained in any other manner than by purchase, the actual market value or wholesale price thereof at the time of exportation to the United States in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandise sold in the ordinary course of trade, and if subject to specific duty the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced, has been or will be furnished to any one. If the merchandise was actually purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser.

SEC. 16. That, except in case of personal effects accompanying the passenger, no importation of any merchandise exceeding $100 in dutiable value shall be admitted to entry without the production of a duly-certified invoice thereof as required by law, or of an affidavit made by the owner, importer, or consignee, before the collector or his deputy, showing why it is impracticable to produce such invoice; and no entry shall be made in the absence of a certified invoice, upon affidavit as aforesaid, unless such affidavit be accompanied by a statement in the form of an invoice, or otherwise, showing the actual cost of such merchandise, if purchased, or if obtained otherwise than by purchase, the actual market value of wholesale price thereof at the time of exportation to the United States, in the principal markets of the country from which the same has been imported; which statement shall be verified by the oath of the owner, importer, consignee, or agent desiring to make entry of the merchandise, to be administered by the collector or his deputy, and it shall be lawful for the collector or his deputy to examine the deponent under oath touching the sources of his knowledge, information, or belief in the premises, and to require him to produce any letter, paper, or statement of account, in his possession, or under his control, which may assist the officers of customs in ascertaining the actual value of the importation or any part thereof; and in default of such production when so requested, such owner, importer, consignee, or agent shall be thereafter debarred from producing any such letter, paper, or statement, for the purpose of avoiding any additional duty, penalty, or forfeiture incurred under this act, unless he shall show to the satisfaction of the court or the officers of the customs, as the case may be, that it was not in his power to produce the same when so demanded; and no merchandise shall be admitted to entry under the provisions of this section unless the collector shall be satisfied that the failure to produce a duly-certified invoice is due to causes beyond the control of the owner, consignee, or agent thereof.

SEC. 17. That whenever merchandise imported into the United States is entered by invoice, one of the following declarations, according to the nature of the case, shall be filed with the collector of the port, at the time of entry, by the owner, importer, consignee, or agent; which declaration so filed shall be duly signed by the owner, importer, consignee, or agent, before the collector, or be-

fore a notary public or other officer duly authorized by law to administer oaths and take acknowledgments, who may be designated by the Secretary of the Treasury to receive such declarations and to certify to the identity of the persons making them; and every officer so designated shall file with the collector of the port a copy of his official signature and seal: *Provided*, That if any of the invoices or bills of lading of any merchandise imported in any one vessel, which should otherwise be embraced in said entry, have not been received at the date of the entry, the declaration may state the fact, and thereupon such merchandise of which the invoices or bills of lading are not produced shall not be included in such entry, but may be entered subsequently.

Declaration of consignee, importer, or agent.

I, —— ——, do solemnly and truly declare that the invoice and bill of lading now presented by me to the collector of —— are the true and only invoice and bill of lading by me received of all the goods, wares, and merchandise imported in the ——, whereof —— —— is master, from ——, for account of any person whomsoever for whom I am authorized to enter the same; that the said invoice and bill of lading are in the state in which they were actually received by me, and that I do not know or believe in the existence of any other invoice or bill of lading of the said goods, wares, and merchandise; that the entry now delivered to the collector contains a just and true account of the said goods, wares, and merchandise, according to the said invoice and bill of lading; that nothing has been, on my part, nor to my knowledge on the part of any other person, concealed or suppressed, whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; that the said invoice and the declaration therein are in all respects true, and were made by the person by whom the same purports to have been made; and that if at any time hereafter I discover any error in the said invoice, or in the account now rendered of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of this district. And I do further solemnly and truly declare that to the best of my knowledge and belief [insert the name and residence of the owner or owners] is [or are] the owner [or owners] of the goods, wares, and merchandise mentioned in the annexed entry; that the invoice now produced by me exhibits the actual cost [if purchased] or the actual market value or wholesale price [if otherwise obtained] at the time of exportation to the United States in the principal markets of the country from whence imported of the said goods, wares, and merchandise, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing said goods, wares, and merchandise in condition, packed ready for shipment to the United States, and no other or different discount, bounty, or drawback but such as has been actually allowed on the same.

Declaration of owner in cases where merchandise has been actually purchased.

I, —— ——, do solemnly and truly declare that the entry now delivered by me to the collector of —— contains a just and true account of all the goods, wares, and merchandise imported by or consigned to me, in the ——, whereof —— —— is master, from ——; that the invoice and entry which I now produce contain a just and faithful account of the actual cost of the said goods, wares, and merchandise, including the value of all cartons, cases, crates, boxes, sacks, and coverings, of any kind, and all other costs, charges, and expenses incident to placing said goods, wares, and merchandise in condition, packed ready for shipment to the United States, and no other discount, drawback, or bounty but such as has been actually allowed on the same; that I do not know nor believe in the existence of any invoice or bill of lading other than those now produced by me, and that they are in the state in which I actually received them. And I further solemnly and truly declare that I have not in the said entry or invoice concealed or suppressed anything whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; that the said invoice and the declaration thereon are in all respects true, and were made by the person by whom the same purports to have been made; and that if at any time hereafter I discover any error in the said invoice or in the account now produced of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of this district.

Declaration of manufacturer or owner in cases where merchandise has not been actually purchased.

I, —— ——, do solemnly and truly declare that the entry now delivered by me to the collector of —— contains a just and true account of all the goods, wares, and merchandise imported by or consigned to me in the ——, whereof —— —— is master, from ——; that the said goods, wares, and merchandise were not actually bought by me, or by my agent, in the ordinary mode of bargain and sale, but that nevertheless the invoice which I now produce contains a just and faithful valuation of the same, at their actual market value or wholesale price, at the time of exportation to the United States in the principal markets of the country from whence imported for my account [or for account of myself or partners]; that the said invoice contains also a just and faithful account of all the cost of finishing said goods, wares, and merchandise to their present condition, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs and charges incident to placing said goods, wares, and merchandise in condition, packed ready for shipment to the United States, and no other discount, drawback, or bounty but such as has been actually allowed on the said goods, wares, and merchandise; that the said invoice and the declaration thereon are in all respects true, and were made by the person by whom the same purports to have been made; that I do not know nor believe in the existence of any invoice or bill of lading other than those now produced by me, and that they are in the state in which I actually received them. And I do further solemnly and truly declare that I have not in the said entry or invoice concealed or suppressed anything whereby the United States may be defrauded of any part of the duty lawfully due on the said goods, wares, and merchandise; and that if at any time hereafter I discover any error in the said invoice, or in the account now produced of the said goods, wares, and merchandise, or receive any other invoice of the same, I will immediately make the same known to the collector of the district.

SEC. 18. That any person who shall knowingly make any false or untrue statement in the declarations provided for in the preceding section, or shall aid or procure the making of any such false statement as to any matter material thereto, shall, on conviction thereof, be punished by a fine not exceeding $5,000, or by imprisonment at hard labor not more than two years, or both, in the discretion of the court: *Provided*, That nothing in this section shall be construed to relieve imported merchandise from forfeiture for any cause elsewhere provided by law.

SEC. 19. That the owner, consignee, or agent of any imported merchandise which has been actually purchased, may, at the time when he shall make and verify his written entry of such merchandise, but not afterwards, make such addition in the entry to the cost or value given in the invoice, or *pro forma* invoice, or statement in form of an invoice, which he shall produce with his entry, as in his opinion may raise the same to the actual market value or wholesale price of such merchandise at the time of exportation to the United States, in the principal markets of the country from which the same has been imported; but no such addition shall be made upon entry to the invoice value of any imported merchandise obtained otherwise than by actual purchase; and the collector within whose district any merchandise may be imported or entered, whether the same has been actually purchased or procured otherwise than by purchase, shall cause the actual market value or wholesale price of such merchandise to be appraised; and if the appraised value of any article of imported merchandise shall exceed by more than 5 per cent., and not more than 20 per cent., the value declared in the entry, there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, a further sum equal to 2 per cent. of the total appraised value, for each 1 per cent. of the increased valuation as ascertained by the appraiser in excess of 5 per cent. above the entered value; and the additional duties shall only apply to the particular article or articles in each invoice which are undervalued; and if such appraised value shall exceed the value declared in the entry more than 20 per cent., such entry shall be held to be presumptively fraudulent, and the collector of customs shall seize such merchandise and proceed as in cases of forfeiture for violations of the customs laws; and in any legal proceedings which may result from such seizure the fact of such undervaluation shall be presumptive evidence of fraud, and the burden of proof shall be on the claimant to rebut the same, and forfeiture shall be adjudged unless he shall rebut said presumption of fraudulent intent by sufficient evidence: *Provided*, That the forfeitures provided for in this section shall apply to the whole of the merchandise or the value thereof in the case or package containing the particular article or articles in each invoice which are undervalued: *And provided further*, That all additional duties, penalties, or forfeitures, applicable to merchandise entered by a duly certified invoice shall be alike applicable to goods entered by a *pro forma* invoice or statement in form of an invoice. The duty shall not, however, be assessed upon an amount less than the invoice or entered value.

SEC. 20. That when merchandise entered for customs duty has been consigned for sale by or on account of the manufacturer thereof to a person, agent, partner, or consignee in the United States, such person, agent, partner, or consignee shall, at the time of the entry of such merchandise, present to the collector of customs at the port where such entry is made, as a part of such entry, and in addition to the certified invoice or statement in the form of an invoice required by law, a statement signed by such manufacturer declaring the cost of production of such merchandise, such cost to include all the elements of cost as stated in section 10 of this act. When merchandise entered for customs duty has been consigned for sale by or on account of a person other than the manufacturer of such merchandise to a person, agent, partner, or consignee in the United States, such person, agent, partner, or consignee shall, at the time of the entry of such merchandise, present to the collector of customs at the port where such entry is made, as a part of such entry, a statement signed by the consignor thereof, declaring that the merchandise was actually purchased by him or for his account, and showing the time when, the place where, and from whom he purchased the merchandise, and in detail the price he paid for the same: *Provided*, That the statements required by this section shall be made in triplicate, and shall bear the attestation of the consular officer of the United States resident within the consular district wherein the merchandise was manufactured, if consigned by the manufacturer or for his account, or from whence it was imported when consigned by a person other than the manufacturer, one copy thereof to be delivered to the person making the statement, one copy to be transmitted with the triplicate invoice of the merchandise to the collector of the port in the United States to which the merchandise is consigned, and the remaining copy to be filed in the consulate.

SEC. 21. That if any owner, importer, consignee, agent, or other person shall make or attempt to make any entry of imported merchandise by means of any fraudulent or false invoice, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or shall be guilty of any willful act or omission by means whereof the United States shall be deprived of the lawful duties, or any portion thereof, accruing upon the merchandise, or any portion thereof, embraced or referred to in such invoice, affidavit, letter, paper, or statement, or affected by such act or omission, such merchandise, or the value thereof, to be recovered from the person making the entry, shall be forfeited, which forfeiture shall only apply to the whole of the merchandise or the value thereof in the case or package containing the particular article or articles of merchandise to which such fraud or false paper or statement relates; and such person shall, upon conviction, be fined for each offense a sum not exceeding $5,000, or be imprisoned for a time not exceeding two years, or both, in the discretion of the court.

SEC. 22. That it shall be the duty of the appraisers of the United States, and every of them, and every person who shall act as such appraiser, or the collector and naval officer, as the case may be, by all reasonable ways and means in his or their power, to ascertain, estimate, and appraise (any invoice or affidavit thereto or statement of cost, or of cost of production to the contrary notwithstanding) the actual market value and wholesale price of the merchandise at the time of exportation to the United States in the principal markets of the country whence the same has been imported, and the number of yards, parcels, or quantities, and actual market value or wholesale price of every of them, as the case may require.

SEC. 23. That when the actual market value, as herein defined, of any article of imported merchandise wholly or partially manufactured and subject to ad valorem duty, or to duty based in whole or in part on value, can not be ascertained to the satisfaction of the appraising officer, and to assist in the ascertainment of such value, the appraiser or appraisers shall use all available means to ascertain the cost of production of such merchandise at the time of exportation to the United States, and at the place of manufacture; such cost of production to include cost of materials and of fabrication, all general expenses covering each and every outlay of whatsoever nature incident to such production, together with the expense of preparing and putting up such merchandise ready for shipment, and a profit of not less than 5 per cent. upon the total cost as thus ascertained; and in no such case shall the said actual market value of such merchandise be appraised upon original appraisal or reappraisement at less than the total cost of production as thus ascertained.

SEC. 24. That there shall be appointed by the President, by and with the advice and consent of the Senate, nine general appraisers of merchandise, each of whom shall receive a salary of $5,000 a year. Not more than five of such general appraisers shall be appointed from the same political party. They shall not be engaged in any other business, vocation, or employment, and may be removed from office at any time by the President for inefficiency, neglect of duty, or malfeasance in office. They shall be employed at such ports and within such territorial limits as the Secretary of the Treasury may from time to time prescribe, and are hereby authorized to exercise the powers and duties devolved upon them by this act and to exercise, under the general direction of the Secretary of the Treasury, such other supervision over appraisements, classifications, and rates of duty of imported merchandise as may be needful to secure lawful and uniform appraisements, classifications, and rates of duty at the several ports. Three of the general appraisers shall be on duty as a board of general appraisers daily during each day of the year (except Sunday and legal holidays) at least from 10 o'clock in the morning until 4 o'clock in the afternoon, at the port of New York, at which port a place for samples shall be provided, under such rules and regulations as the Secretary of the Treasury may from time to time prescribe, which shall include rules as to the classes of articles to be deposited, the time of their retention, and as to their disposition, which place of samples shall be under the immediate control and direction of the general appraisers.

SEC. 25. That the appraiser shall revise and correct the reports of the assistant appraisers as he may judge proper, and the appraiser, or, at ports where there is no appraiser, the person acting as such, shall report to the collector his decision as to the value of the merchandise appraised. If the collector shall deem

the appraisement of the merchandise by such appraiser too low, he may order a reappraisement, which shall be made by one of the general appraisers, or, if the importer, owner, agent, or consignee of such merchandise shall be dissatisfied with the appraisement thereof, and shall have complied with the requirements of law with respect to the entry and appraisement of merchandise, he may forthwith give notice to the collector, in writing, of such dissatisfaction, on the receipt of which the collector shall at once direct a reappraisement of such merchandise by one of the general appraisers. The decision of the appraiser, or the person acting as such (in cases where no objection is made thereto, as above authorized, either by the collector or by the importer, owner, consignee, or agent), or of the general appraiser in cases of reappraisement, shall be final and conclusive as to the dutiable value of such merchandise against all parties interested therein, unless the importer, owner, consignee, or agent of the merchandise shall be dissatisfied with such decision, and shall forthwith give notice to the collector, in writing, of such dissatisfaction, or unless the collector shall deem the appraisement of the merchandise too low; in either case the collector shall transmit the invoice and all the papers appertaining thereto to the board of general appraisers which shall be on duty at the port of New York, or of three general appraisers who may be designated by the Secretary of the Treasury for such duty at that port or at any other port, which board shall examine and decide the case thus submitted, and their decision, or that of a majority of them, shall be final and conclusive as to the dutiable value of such merchandise against all parties interested therein, and the collector shall ascertain, fix, and liquidate the rate and amount of duties to be paid on such merchandise, and the dutiable costs and charges thereon, according to law.

SEC. 26. The decision of the collector as to the classification of imported merchandise, and as to the rate and amount of duties chargeable thereon, including all dutiable costs and charges, and as to all fees, charges, and exactions of whatever character (excepting duties on the tonnage of vessels), shall be final and conclusive against all persons interested therein unless the owner, importer, consignee, or agent of such merchandise, or the person paying such fees, charges, and exactions other than duties, shall, not before, but within ten days after such ascertainment and liquidation of duties, as well in cases of merchandise entered in bond as for consumption, or within ten days after the payment of such fees, charges, and exactions, if dissatisfied with such decision, give notice in writing to the collector, setting forth therein distinctly and specifically, and in respect to each entry or payment, the reasons for his objections thereto, and if the merchandise is entered for consumption shall pay the full amount of the duties and charges ascertained to be due thereon. Upon such notice and payment the collector shall transmit the entry and all the papers and exhibits connected therewith to the board of general appraisers which shall be on duty at the port of New York, or of three general appraisers who may be designated by the Secretary of the Treasury for such duty at that port or at any other port, which board shall examine and decide the case thus submitted, and their decision, or that of a majority of them, shall be final and conclusive upon all persons interested therein (except in cases where an application shall be filed in the circuit court within the time and in the manner provided for in section 14 of this act), and the entry thereof shall be liquidated accordingly, including all dutiable costs and charges thereon, and all fees, charges, or exactions shall be paid in accordance with their decision.

SEC. 27. If the owner, importer, consignee, or agent of any imported merchandise, or the collector, or the Secretary of the Treasury, shall be dissatisfied with the decision of the board of general appraisers, as provided for in section 13 of this act, as to the construction of the law respecting the classification of such merchandise and the rate of duty imposed thereon under such classification, they, or either of them, may, within thirty days next after such decision and not afterwards, apply to the circuit court of the United States, within the district in which the matter arises, for a review of the questions of law involved in such decision. Such application shall be made by filing in the office of the clerk of said circuit court a concise statement of the errors of law complained of, and a copy of such statement shall be served on the collector, or on the importer, owner, consignee, or agent, as the case may be. Thereupon the court shall order the board of appraisers to transmit to said circuit court a certified statement of their findings of the facts involved in the case and their decision thereon; and the facts so found and certified shall be final and conclusive upon the court; which statement and certificate of the board of appraisers shall constitute the record in the circuit court, and said circuit court shall proceed to hear and determine the question of law involved in such decision, and the decision of such court shall be final, unless such court shall be of opinion that the question involved is of such importance as to require a review of such decision by the Supreme Court of the United States, in which case said circuit court, or the judge making the decision may, within thirty days thereafter, allow an appeal to said Supreme Court; but an appeal shall be allowed on the part of the United States whenever the Attorney-General shall apply for it within thirty days after the rendition of such decision. On such original application, and on any such appeal, security for damages and costs shall be given as in the case of other appeals in cases in which the United States is a party. Said Supreme Court shall have jurisdiction and power to review such decision, and may affirm, modify, or reverse such decision of such circuit court, and remand the case with such orders as may seem to it proper in the premises, which shall be executed accordingly. For the purposes of this section the circuit courts of the United States shall be deemed always open, and said circuit courts, respectively, may establish, and from time to time alter, rules and regulations not inconsistent herewith for the procedure in such cases as they shall deem proper.

SEC. 28. The general appraisers, or any of them, are hereby authorized to administer oaths, and said general appraisers, and boards of general appraisers, and collectors, as the case may be, may call before them, and examine upon oath, any owner, importer, agent, consignee, or other person, touching any matter or thing which they, or either of them, may deem material respecting any entry of imported merchandise in ascertaining the value or classification thereof; and they, or either of them, may require the production of any letters, accounts, or invoices relating to said merchandise, and may require such testimony to be reduced to writing, and when so taken it shall be filed in the office of the collector, and preserved for use or reference until the final decision of the collector or said board of appraisers shall be made respecting the valuation or classification of said merchandise, as the case may be.

SEC. 29. That all decisions of the general appraisers and of the boards of general appraisers, respecting values and rates of duty, shall be preserved and filed, and shall be open to inspection under proper regulations to be prescribed by the Secretary of the Treasury. All decisions of the general appraisers shall be reported forthwith to the Secretary of the Treasury and to the board of general appraisers in New York, and the report to the board shall be accompanied, whenever practicable, by samples of the merchandise in question, and it shall be the duty of the said board, under the direction of the Secretary of the Treasury, to cause an abstract to be made and published of such decisions of the appraisers as they may deem important, and the decisions of each of the general appraisers and boards of general appraisers, which abstract shall contain a general description of the merchandise in question and of the value and rate of duty fixed in each case, with reference, whenever practicable, by number or other designation, to samples deposited in the place of samples at New York, and such abstract shall be issued from time to time, at least once in each week, for the information of customs officers and the public.

SEC. 30. That whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value or wholesale price of such merchandise, at the time of exportation to the United States, in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought and sold for exportation to the United States, or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition packed ready for shipment to the United States, to which shall be added the cost of transportation, shipment, and transshipment, with all the expenses thereof from the place of manufacture or production to the vessel in which shipment is made to the United States; and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual material, article, or form, designated for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would have been subject if separately imported. That the words "value" or "actual market value" whenever used in this act or in any law relating to the appraisement of imported merchandise shall be construed to mean the actual market value or wholesale price as defined in this section.

SEC. 31. That in all suits or information brought, where any seizure has been made pursuant to any act providing for or regulating the collection of duties on imports or tonnage, if the property is claimed by any person, the burden of proof shall lie upon such claimant: *Provided*, That probable cause is shown for such prosecution, to be judged of by the court.

SEC. 32. That all fees exacted and oaths administered by officers of the customs, except as provided in this act, under or by virtue of existing laws of the United States, upon the entry of imported goods and the passing thereof through the customs, and also upon all entries of domestic goods, wares, and merchandise for exportation, be, and the same are hereby, abolished; and in case of entry of merchandise for exportation, a declaration, in lieu of an oath, shall be filed, in such form and under such regulations as may be prescribed by the Secretary of the Treasury; and the penalties provided in the fifth section of this act for false statements in such declaration shall be applicable to declarations made under this section: *Provided*, That where such fees, under existing laws, constitute, in whole or in part, the compensation of any officer, such officer shall receive, from and after the passage of this act, a fixed sum for each year equal to the amount which he would have been entitled to receive as fees for such services during said year.

SEC. 33. That no allowance for damage to goods, wares, and merchandise imported into the United States shall hereafter be made in the estimation and liquidation of duties thereon; but the importer thereof may, within ten days after entry, abandon to the Government all or any portion of goods, wares, and merchandise included in any invoice, and be relieved from the payment of the duties on the portion so abandoned: *Provided*, That the portion so abandoned shall amount to 10 per cent. or over of the total value or quantity of the invoice.

SEC. 34. That whenever it shall be shown to the satisfaction of the Secretary of the Treasury that, in any case of unascertained or estimated duties, more money has been paid to or deposited with a collector of customs than as has been ascertained by final liquidation thereof the law required to be paid or deposited, the Secretary of the Treasury shall direct the treasurer to refund and pay the same out of any money in the Treasury not otherwise appropriated. The necessary moneys therefor are hereby appropriated, and this appropriation shall be deemed a permanent indefinite appropriation; and the Secretary of the Treasury is hereby authorized to correct manifest clerical errors in any entry or liquidation, whether for or against the Government, at any time within one year of the date of such entry, but not afterwards.

SEC. 35. That from and after the taking effect of this act, no collector or other officer of the customs shall be in any way liable to any owner, importer, consignee, or agent of any merchandise, or any other person, for or on account of any rulings or decisions as to the classification of said merchandise or the duties charged thereon, or the collection of any dues, charges, or duties on or on account of said merchandise, or any other matter or thing as to which said owner, importer, consignee, or agent of such merchandise might, under this act, be entitled to appeal from the decision of said collector or other officer, or from any board of appraisers provided for in this act.

SEC. 36. That any person who shall give, or offer to give, or promise to give any money or thing of value, directly or indirectly, to any customs officer, in consideration of or for any act or omission contrary to law in connection with or pertaining to the importation, appraisement, entry, examination, or inspection of goods, wares, or merchandise, including herein any baggage, or of the liquidation of the entry thereof, shall, on conviction thereof, be fined not exceeding $2,000, or be imprisoned at hard labor not more than one year, or both, in the discretion of the court; and evidence of such giving, or offering, or promising to give, satisfactory to the court in which such trial is had, shall be regarded as *prima facie* evidence that such giving or offering or promising was contrary to law, and shall put upon the accused the burden of proving that such act was innocent, and not done with an unlawful intention.

SEC. 37. That any officer or servant of the customs or of the United States who shall, excepting for lawful duties or fees, demand, exact, or receive from any person, directly or indirectly, any money or thing of value, in connection with or pertaining to the importation, appraisement, entry, examination, or inspection of goods, wares, or merchandise, including herein any baggage, or liquidation of the entry thereof, on conviction thereof, shall be fined not exceeding $5,000, or be imprisoned at hard labor not more than two years, or both, in the discretion of the court. And evidence of such demanding, exacting, or receiving, satisfactory to the court in which such trial is had, shall be regarded as *prima facie* evidence that such demanding, exacting, or receiving was contrary to law, and shall put upon the accused the burden of proving that such act was innocent and not with an unlawful intention.

SEC. 38. That any baggage or personal effects arriving in the United States in transit to any foreign country may be delivered by the parties having it in charge to the collector of the proper district, to be by him retained, without the payment or exaction of any import duty, or to be forwarded by such collector to the collector of the port of departure, and to be delivered to such parties on their departure for their foreign destination, under such rules, regulations, and fees as the Secretary of the Treasury may prescribe.

DRAWBACKS ON EXPORTED MERCHANDISE.

SEC. 39. That on all articles exported manufactured of materials upon which duty has been paid, and entitled to drawback under any provision of law, there shall be allowed a drawback equal to the duty paid on such materials without retention of any part thereof, but such drawback shall be paid only to the manufacturer or actual owner of such merchandise, and in cases only where the identity of the articles exported with the imported materials upon which drawback is claimed shall be established under regulations to be prescribed by the Secretary of the Treasury: *Provided however*, That where the amount of drawback is less than $100, the fees of the United States consuls for certifying the foreign-landing certificate shall not exceed 50 cents: *And provided further*, That the duties refunded by way of drawback on imported sugar and molasses, or manufactures thereof, shall be ascertained by the same tests as are provided by law to be applied to sugar and molasses when imported.

SEC. 40. That all imported goods, wares, and merchandise which may be in the public stores or bonded warehouses on the day and year when this act shall go into effect, except as otherwise provided in this act, shall be subjected to no other duty upon the entry thereof for consumption than if the same were

imported respectively after that day; and all goods, wares, and merchandise remaining in bonded warehouses on the day and year this act shall take effect, and upon which the duties shall have been paid, shall be entitled to a refund of the difference between the amount of duties paid and the amount of duties said goods, wares, and merchandise would be subject to if the same were imported respectively after that date.

SEC. 41. That sections 2970 and 2983 of the Revised Statutes of the United States are hereby amended so that the same shall be, respectively, as follows:

"SEC. 2970. Any merchandise deposited in bond in any public or private bonded warehouse may be withdrawn for consumption within three years from the date of original importation, on payment of the duties and charges to which it may be subject by law at the time of such withdrawal: *Provided*, That nothing herein shall affect or impair existing provisions of law in regard to the disposal of perishable or explosive articles."

"2983. In no case shall there be any abatement of the duties or allowance made for any injury, damage, or deterioration by any merchandise while deposited in any public or private bonded warehouse: *Provided*, That the duty assessed on merchandise withdrawn from any such warehouse shall be assessed on the quantity withdrawn therefrom at the time of such withdrawal; but no allowance for leakage or evaporation of wines, liquors, and distilled spirits shall be made: *And provided further*, That nothing in this section as amended shall restrict or in way affect the liability of the proprietors of bonded warehouses on their bonds: *And provided further*, That nothing herein shall restrain or limit the exercise of the authority conferred on the Secretary of the Treasury by section 2984 of the Revised Statutes."

SEC. 42. That nothing in this act shall in any way change or impair the force or effect of any treaty between the United States and any other Government, or any laws passed in pursuance of or for the execution of any such treaty, so long as such treaty shall remain in force in respect of the subjects embraced in this act; but whenever any such treaty, so far as the same respects said subjects, shall expire or be otherwise terminated, the provisions of this act shall be in force in all respects in the same manner and to the same extent as if no such treaty had existed at the time of the passage hereof.

SEC. 43. That sections 2808, 2838, 2839, 2841, 2843, 2845, 2853, 2854, 2856, 2858, 2860, 2900, 2902, 2905, 2907, 2908, 2909, 2929, 2930, 2931, 2932, 2943, 2945, 2952, 3011, 3012, 3012½, 3013, 3090 of the Revised Statutes of the United States; and sections 9, 10, 11, 12, 14, and 16 of an act entitled "An act to amend the customs-revenue laws and to repeal moities," approved June 22, 1874; all of the act entitled "An act restricting the refunding of customs duties and prescribing certain regulations of the Treasury Department," approved March 3, 1875; and sections 7, 8, and 9 of the act entitled "An act to reduce internal-revenue taxation, and for other purposes," approved March 3, 1883, and all other acts and parts of acts inconsistent with the provisions of this act are hereby repealed, but the repeal of existing laws or modifications thereof embraced in this act shall not affect any act done, or any right accruing or accrued, or any suit or proceeding had or commenced in any civil cause, before the said repeal or modifications; but all rights and liabilities under said laws shall continue and may be enforced in the same manner as if said repeal or modifications had not been made, nor shall said repeal or modifications in any manner affect the right to any office, or change the term or tenure thereof. Any offenses committed, and all penalties or forfeitures or liabilities incurred under any statute embraced in or changed, modified, or repealed by this act may be prosecuted and punished in the same manner and with the same effect as if this act had not been passed. All acts of limitation, whether applicable to civil causes and proceedings, or to the prosecution of offenses, or for the recovery of penalties or forfeitures embraced in or modified, changed, or repealed by this act, shall not be affected thereby; and all suits, proceedings, or prosecutions, whether civil or criminal, for causes arising or acts done or committed prior to the passage of this act, may be commenced and prosecuted within the same time and with the same effect as if this act had not been passed.

Mr. HARRIS. Before the Senator from Iowa proceeds, I desire to ask him, and if he shall agree with me in opinion or desire, I then wish to ask the unanimous consent of the Senate to fix a time, and the shorter the time the better it will suit me, upon which general debate upon this bill shall be closed. I shall be glad, if such an agreement can be reached, that we then also agree to consider amendments under Rule VIII, or under the principles of Rule VIII; but I will first put the general proposition: Does it meet the approval of the Senator from Iowa to fix a reasonably short time within which general debate shall be closed upon the proposition?

Mr. ALLISON. What is called general debate in the Senate I think is a very different thing from general debate in any other body. It is impossible for me to say now when gentlemen will cease to desire to speak upon this subject. It is an important subject, as the Senator from Tennessee knows, affecting every interest and every industry and taking in the entire range of our domestic manufactures and products and our importations. So it would seem to me that I ought not to take any responsibility at this time respecting the closing of general debate.

I concur with the Senator from Tennessee in a desire that we shall go on with as much rapidity as possible in the consideration of the bill, and that we shall reach a vote as soon as it is practicable to reach it.

Mr. HARRIS. I quite agree with the Senator from Iowa in the fact that there is no more important question which addresses itself to the legislative department of the Government than the one which the bill proposes, but believing as I do that there is not a Senator upon this floor who has not well-defined and fixed opinions as to the principle that will control his vote in respect to every phase and feature of it, I think it is more important to the country that we come to a vote and have action upon it than to have extended debate upon the general principle.

If the Senator from Iowa agrees, I shall ascertain whether we can, by unanimous consent, fix a reasonable time at which the general debate shall close and we proceed, then, to have the bill read for amendment.

Mr. ALLISON. I do not know how it is possible for us at this time to agree that the debate shall close upon the bill as respects the independence of gentlemen who desire to speak on the subject. Therefore, for myself I would not be willing at this moment to fix any time when a Senator should be deprived of the right of expressing his views upon the bill.

Mr. HARRIS. Of course the Senator from Iowa knows that if it is done at all, it is an agreement that must be made by unanimous consent.

Mr. ALLISON. I understand that.

Mr. HARRIS. Every Senator will commit himself to it if the agreement can be reached at all. I simply desired to know what the wish of the Senator from Iowa was, and he agreeing with me, then I desired to consult the wishes of the Senate and see if we can fix a time at which we shall commence reading the bill paragraph by paragraph for amendment.

Mr. ALLISON. My own idea would be that at some time in the discussion it would be a wise thing to limit the debate on the details of the bill to five or ten minutes on amendments, but I will state, if the Senator will allow me, that it is rather premature to make any suggestion to-day, at any rate, upon that question.

Mr. HARRIS. Does the Senator think that ten days or two weeks would be sufficient for general debate?

Mr. ALLISON. I hope so.

Mr. HARRIS. Then, if the Senator will allow me, I will ask the unanimous consent of the Senate that we agree to close the general debate upon the bill in ten days from to-day, when the reading of the bill for amendment shall proceed.

Mr. ALLISON. I should not like to consent to that at the very beginning. It may be that we shall want eleven days, or we may want twelve.

Mr. PLATT. If I may, as a very humble member of the Senate, say a word, since this consent has been asked, it is quite possible, perhaps probable, that the general debate upon the bill may not consume ten days, but at the same time I think it is a little premature when the bill is first called up for discussion to attempt to fix any time when the debate shall cease. As a very humble member of the Senate I may want to say something myself after those who are more familiar with the subject shall have spoken upon it, and I do not want any agreement which will exclude myself or other humble members of the Senate from expressing their opinion.

Mr. VEST. I should like to ask the Senator from Iowa in regard to a matter which may much facilitate the discussion of the bill. I want to ask him if it is proposed that the clerk of the Committee on Finance or of the subcommittee shall prepare a comparative statement between the Mills bill, as it is called, and the amendment proposed? That has been the custom in the other branch of Congress and also in the Senate. The substitute is so long, so intricate, that in the brief time we have now for debate it is almost impossible to ascertain exactly the difference between the House bill and the substitute. Also, as suggested by the Senator from Texas [Mr. REAGAN], the ad valorem rates should be shown. For one who is not an expert and who has not devoted his life to the tariff question, it is almost impossible in the course of a few days to ascertain what are really the salient points of difference between these measures.

Mr. ALLISON. In response to the suggestion of the Senator from Missouri I will say that the clerk of the Committe on Finance, others aiding him, has already prepared what I think is a very valuable contribution in the direction indicated by the Senator from Missouri. It is a print of the bill with the ad valorem rates of the Mills bill and the present law, the quantity of importations for the year 1887, which is the last available fiscal year, the unit of value, the amount of duty collected, etc. The Senator by sending to the Finance Committee room or the document-room either, I think, can be furnished with a copy of it. It was printed on Saturday.

Mr. VEST. Do I understand the Senator to state that that is a comparative statement between the House bill and the substitute? Does it give the ad valorem rates in each bill?

Mr. ALLISON. It does not give the ad valorem rates of the substitute, because, of course, the substitute was only presented a few days ago, but it gives all other ad valorems.

Mr. VEST. I should be very glad if the Senator from Iowa, who is at the head of the committee, would have such a table prepared, as it would facilitate the matter very much with many of us.

Mr. ALLISON. I will state to the Senator that it is not an easy thing to do that.

Mr. REAGAN. If the Senator will allow me, I will suggest that it the table which he says was prepared yesterday was supplemented simply by stating the rates proposed in the Senate bill and the specific rates reduced to ad valorem, we should then have the information sought by the Senator from Missouri. Without that, if we take the mixed rates, specific and ad valorem, no one but an expert can understand what the real rates are. By giving the information asked for by the Senator from Missouri, we shall have before us the exact facts, so as to know what we are doing. I trust the Senator will allow the table to be supplemented by adding to it the rates under the Senate amendment, reducing them also to ad valorem.

Mr. ALDRICH. If the Senator from Iowa will allow me a moment, I will state that the table now printed and before the Senate, or which will be put in the hands of Senators in the course of the day, contains, wherever it is possible to obtain the information, the unit of value of present importations, and each Senator can make the application of

the rate for himself to that unit of value. It is of course to some extent a matter of estimate; it must be so; and a table prepared by one man perhaps would not meet the views of another man or another Senator as to what was a proper application. We give all the data which are obtainable in regard to the matter by printing the unit of value and the rates which we propose to fix upon importations.

Mr. REAGAN. If we are to take the mixed rates of duty of the Senate substitute, then I suggest that no one but an expert after making the calculations can know the difference of rate between the two bills. Certainly by adding to the table the rates under the Senate bill and reducing them to the ad valorem basis, it would give the whole information, and it would enable us to proceed without the trouble of undertaking to make the calculations and acting as experts, which very few Senators are qualified to do. It would facilitate matters if that course should be taken.

Mr. ALLISON. That matter can be looked into and prepared, if practicable, at an early day.

Mr. REAGAN. I hope it will be done.

Mr. ALLISON. Mr. President, in presenting this bill for consideration at this time it is perhaps unnecessary for me to go into any great detail. Especially is this true after the exhaustive report in explanation of the measure made to the Senate some days ago, and prepared largely, I will say, by the Senator from Rhode Island [Mr. ALDRICH], and also after the brief explanation made by the Senator from Ohio [Mr. SHERMAN]. But there are some things outside of the report that I think ought to be made clear in the very beginning of this discussion; and therefore I wish to refer to a few salient points which may come up in the debate.

The Senate bill proposes to reduce the revenue an amount ranging from $65,000,000 to $73,000,000.

I think I ought to state that this is the first opportunity the Senate has had to consider this great question of the reduction of the revenues since the revision of 1883. The first opportunity came to the Committee on Finance on the 25th day of July of this year, after the usual time of the adjournment of a long session of Congress, and at a time when, under the ordinary and customary proceedings of Congress, especially in a Presidential year, the two Houses should have adjourned. It came to this body after the House of Representatives had been in session upon and respecting this question for within a fraction of eight months. Within a period of a little over sixty days the Senate Committee on Finance prepared the pending substitute, and now present it to you for your consideration.

If the Senate had had an opportunity, it would have considered such a bill as this and the question of the surplus during the last Congress; but the House of Representatives, where these bills must originate under the Constitution, failed during that Congress to send us a bill looking to a reduction of the revenue.

It has been said that the Senate has delayed the consideration of this bill in committee. I speak for myself as well as for my colleagues on the committee when I say we have not had the time we should have had to carefully consider the bill in all its details. The House of Representatives took eight months to prepare a bill, not having the effect to invigorate and strengthen the industries of our country, but I will not say for the purpose, but having the effect, and in an irregular way, to greatly disturb those industries. It is an easy thing to tear down, but it is not so easy to build up. So the Senate Committee on Finance had one object in view, and the Committee on Ways and Means of the House and the House of Representatives, if we are to judge from the effect of their bill sent to us, intended another.

The first question that met the Committee on Finance at the threshold was how much revenue could be taken off safely with reference to all the obligations of the Government. We agreed that from $60,000,000 to $70,000,000 reduction would be safe. I think myself, and I only speak for myself now, that that is the highest possible sum we ought to go in the reduction of the revenue; and therefore whatever amendments may be proposed to this bill hereafter, I trust will not look to a greater reduction of the revenue than is proposed by the substitute.

I had occasion to say on the 28th of August in the discussion on the sundry civil bill, before all the great appropriation bills of the year had finally passed, that the revenues for this year would only exceed the appropriations about $19,000,000. I am able to say that that estimate then made with four appropriation bills undisposed of, has been verified now that they have all practically passed both Houses, with a variation of but $26,000; so that for the current year upon the estimate made by the Secretary of the Treasury, in his annual report of the revenues of this current fiscal year, and the appropriations made by the bills already passed for this current fiscal year, there will be a surplus of but $19,000,000 in round numbers. But the estimate of the Secretary of the Treasury, it must be borne in mind, was made last December. He estimated then that the revenues for this year from customs would be $228,000,000. As he estimated, the revenue from customs last year, the year ending June 30, 1888, would be $228,000,000. The actual revenues from customs during the fiscal year 1888 was $219,000,000—I am only speaking in round numbers, of course, in these statements—instead of $228,000,000 as estimated by him.

I have before me a statement for the first three months of this fiscal year of the revenues and from customs, and they fall behind the revenues from customs of last year for the first quarter, in round numbers, $2,000,000. If this should continue for the entire four quarters of the year, there will be a reduction of revenue from customs to the extent of $8,000,000; and instead of receiving $219,000,000, as we received last year, we shall only receive $211,000,000, making the receipts from customs this year $17,000,000 less than the estimate made by the Secretary of the Treasury in his annual report; and if we take into consideration all the revenues of the Government for the three months composing the first quarter of this year they have fallen off $5,000,000 as compared with the revenues for the same period last year, which, if continued through the year, would make the revenues for the year $20,000,000 less than the estimates of the Secretary and leave no surplus.

I make these statements for the purpose of showing that the enormous surplus which now remains in the Treasury is not likely to be accelerated or increased by anything that is to occur during the present fiscal year, if we take the appropriations as the basis of expenditure and the revenues as disclosed by the receipts of the first three months of this fiscal year. By the provisions of the pending bill there will be no surplus from these revenues unless we put out of consideration entirely the sinking fund of this year. Therefore it is that our Senate substitute contemplates—and we may as well understand it in the beginning of this debate—that for the current fiscal year, this being an exceptional one, as we have made appropriations this year which ought to have been made last year to the extent of $30,000,000 at least. We are not likely to have a surplus for the sinking fund beyond the amount necessary to retire the 4½ per cent. bonds due on the 1st day of October, 1891, including the accumulated surplus now in the Treasury, of $96,000,000, as shown by the Treasury statement on the 1st of October.

Having said this much as respects our current revenues, I wish, before I pass from this subject, to say a word as to the amount of money now in the Treasury, because that should be considered separate and apart from any question of the revenues that are to be derived from this bill or the current revenues from year to year.

We are not making a law here that is intended to in any manner affect the accumulated surplus of the Government. We are making provision for the permanent support of the Government, including every obligation that we are under. According to the report of the Secretary of the Treasury, on the 1st day of October, there were $96,000,000 of surplus in the Treasury—no, not in the Treasury; there were $57,000,000 of this money deposited in national banks throughout the country, as shown by the statement of the 1st day of October. So there are really but $39,000,000 of this $96,000,000 in the Treasury.

In this debate I do not wish to refer to the management of the Treasury as respects this accumulated surplus; but for the life of me, I can not understand why it is that this $96,000,000 is not used to retire the 4½ per cent. bonds that are presently to be paid off by the Government. There is no man here or in the country who does not know that every dollar of that surplus which now lies in the Treasury will be used for the purpose of paying off these 4½ per cent. bonds, and that it will lie in the Treasury or in the hands of the banks who hold it until the 1st day of October, 1891, unless in the mean time the Secretary of the Treasury shall purchase and cancel these bonds as he has ample authority to do. There has not been a time in the history of this surplus when the Government could not have purchased these bonds so as to have made more than 2 per cent. per annum interest upon the money invested.

By what process of financiering is it that this Administration, instead of purchasing the 4½ per cent. bonds due presently with the money that must be used for the purpose of redeeming them in 1891, allows certain national banks to take $57,000,000 without interest, the banks loaning it in turn to their customers at whatever the current rate of interest may be? This Government to-day is, therefore, losing 2 per cent. per annum at least on every dollar of the $96,000,000 that are in the Treasury and in the banks, as shown by the report of the Secretary of the Treasury, because there has not been a time, I repeat, since not only the 4½ percents of the Government but the 4 per cent. bonds could not have been bought by the Government so as to realize a higher rate of interest than 2 per cent. * Can the Administration justify the management of the Treasury in its policy of refraining from the purchase of the bonds which are presently payable, and loans the money to national banks without interest, with an understanding or expectation that these deposits shall be held there for an indefinite length of time? Is there any possible defense that can be made of this disposition of the public money? Can any one say that this $96,000,000 could not be presently employed by the saving of 2 per cent. per annum for three years or 6 per cent. on the amount.

Now, Mr. President, having said thus much respecting the situation of the Treasury at the present time, I wish to speak as briefly as I can in a general way respecting the features of the measure before us.

In the first place the substitute differs from the House bill in respect to the fact that it proposes to deal with all the schedules in the tariff. The House bill did not deal with the tobacco schedule, with the silk schedule, with the wines and liquors schedule, and dealt lightly with the sugar schedule. We have incorporated in this substitute every

schedule in the existing tariff law, including those I have named and including those also provided for in the House bill. This measure has been made up by the Committee on Finance upon an entirely different principle from that found in the House bill. It has been made up on the principle of protecting American labor and American industry. That is its aim and purpose. If that has not been accomplished in the details of the schedules which we propose the Committee on Finance will be glad to have any Senator point out this defect and propose amendments which will accomplish that purpose. We have sought to care for every industry in our country where we have the same facilities and opportunities of providing for the wants of our people that are enjoyed by other nations engaged in similar industries.

That is the principle of this scheme.

It may be and it is true that in almost every schedule we have increased here and there existing rates of duty. It was the purpose of the framers of this measure to examine with as much care as was possible in the limited time we had the various industries of our country, and if we found that a foreign producer had an advantage over a citizen of the United States, under the circumstances I have just indicated, we sought to put our own producer and manufacturer upon terms of equality with those who are producing the same things abroad. Therefore this measure is open to the criticism that we have advanced here and there rates of duty, but we have also in the aggregate largely reduced rates of duty. I will speak of these details later on. That is, the effect of the substitute is to reduce the revenue from customs on many of the schedules, and in the aggregate reduces the revenue from customs more than $30,000,000 on the basis of any computation that can be made.

But, before entering into such details I wish to say one or two things that ought to be said in response to the minority report, which I find printed with the majority report, or rather with one of the minority reports, because singularly enough the minority composed of five Senators found it necessary to make three reports upon this substitute.

Why it was that the three Senators who united in one report were not willing to adopt the report prepared with so much care apparently, and with so much diligence by the Senator from Kentucky [Mr. BECK], why they were not willing to put their names to his report, I do not know; but they seem to have used especial care that not one syllable uttered by the Senator from Kentucky should receive the *imprimatur* of their indorsement, therefore they left him in his solitude to make a report which would suit him upon this bill. The Senator from Tennessee [Mr. HARRIS] and the Senator from North Carolina [Mr. VANCE] and the Senator from Indiana [Mr. VOORHEES], it seems, were able to agree in their views upon this substitute, and therefore they make a separate and independent report, not very long, it is true, but containing a great deal of valuable misinformation, if such a thing is possible.

The Senator from New Jersey [Mr. MCPHERSON] it seems, also, like the Senator from Kentucky, stands in a situation of absolute isolation. He does not agree with the Senator from North Carolina and the Senator from Tennessee, nor with the Senator from Indiana. He stands alone also, not even with the Senator from Kentucky, because he submits also a separate and independent report, and as this is more brief than the others I will take the liberty of reading it to the Senate in full:

> I concur in the above report, indorsing the House bill in respect to articles placed upon the free-list, but desire some modifications in the dutiable-list.
> J. R. MCPHERSON.

So my friend from New Jersey finds that the only thing he can do with these minority reports is to indorse them so far as they place certain articles on the free-list, not an inch beyond, but so far as the dutiable articles are concerned in the House bill he wants to make amendments.

So, Mr. President, we are in the attitude here of finding a divided constituency as respects this great bill that comes to us from the House. Only three of the minority are able to agree to formulate a report which is satisfactory to a majority of the minority of the committee.

I am not surprised that the Senator from New Jersey, whom I do not see in his seat, should be satisfied with the free-list of the House bill. By some process five leading industries in New Jersey were put upon the dutiable-list in the House that were upon the free-list when the bill was originally reported to the House of Representatives. So it seems that the interests of New Jersey have been cared for in the House to a satisfactory degree so far as the free-list is concerned. I may have occasion later on to dwell somewhat upon the changes made in the bill in the House of Representatives, but it is enough for me to explain in the absence of the Senator from New Jersey that he finds the free-list satisfactory now, the provision as to New Jersey interests having been changed during the progress of the debate in the House of Representatives. But that is aside from the point to which I desired to call attention at this moment.

The minority—because of course the views of these three gentlemen constituting a majority of the minority of the Committee on Finance must be regarded as the views of the minority—say in the beginning of their report:

> In the preparation of this substitute no member of the minority of the committee was consulted or informed as to its provisions until it was reported to the full committee, on the 25th day of September, 1888.

That is true in a sense, but it is also true that this minority did not seek that information, and I deem the explanation I am about to make necessary and essential in view of the implication in that report. They notified the majority of the Committee on Finance the day this bill appeared in the Finance Committee that the minority of the committee intended to stand upon the Mills bill without the dotting of an "i" or the crossing of a "t," and that so far as any attitude of theirs was concerned they would agree upon no bill—I state the substance of their contention, which was that they would stand substantially by the House bill. It was, therefore, perfectly apparent in the very beginning that whatever bill was prepared by the committee and submitted to this body for consideration must be prepared by the Republican members of the Committee on Finance, and we proceeded with that understanding from the beginning of the preparation of the bill until the date given in this report, the 25th of September, when the subcommittee of the Committee on Finance having it under consideration reported it to the full Committee on Finance.

Mr. HARRIS. Will the Senator from Iowa allow me to ask him to state what member of the minority gave the assurance to which he refers?

Mr. ALLISON. I will answer the Senator by saying that the senior member of the minority stated that to every member of the majority over and over again, and I am very much mistaken if that statement of his was not concurred in by the Senator from Tennessee; at least I never heard anything from him to the reverse of the statement made by the one who had a right to speak for the minority.

Mr. HARRIS. I, of course, do not question the statement made by the Senator from Iowa, but I desire to say that I had no knowledge of any such declaration. Surely the Senator will not say that I ever informed the majority of the committee that I was going to stand unalterably upon the House bill. I have given utterance to such principles as would control my action.

Mr. ALLISON. That statement may have been made too broadly by me, but the substance was, "We intend to stand by the House bill, and you may make such a bill as you choose to make;" and I might go further as respects what was said in various ways relating to this bill, from which we all understood that the minority not only did not wish to take part in the preparation of a substitute, but that they did not even wish to see it until it was a finished production for their inspection. That was as I understood it. As the Senator from Tennessee perfectly well knows, we never withheld the testimony. The opportunity was given for every member to have copies of the testimony taken by the subcommittee as we progressed, and they were present, of course, most of the time, and had the opportunity of being present all the time.

Mr. FRYE. Will the Senator allow me to ask a question? Were the minority of the Committee on Finance at any time excluded from any hearings before the committee?

Mr. ALLISON. Never. Not only were they not excluded, but they always had an opportunity of being present, as the Senators will bear me out in saying.

Mr. VANCE. Will the Senator allow me to ask him if the minority were ever invited to those hearings?

Mr. ALLISON. Why, Mr. President, "invited?" There never was that formal invitation which is sent for one to come to an evening entertainment; but the Senator from Tennessee well knows that many times I have searched for him in the committee-rooms of this Chamber to notify him of hearings.

Mr. HARRIS. Will the Senator allow me? There ought not to be any misunderstanding about the matter of hearing.

Mr. ALLISON. Certainly not.

Mr. HARRIS. In May a subcommittee was appointed, of which the Senator from Iowa was chairman, for the purpose of hearing such persons as desired to be heard upon the revenue question. The Senator from Kentucky and the Senator from Indiana and myself were members of that subcommittee. So far as I know, the Democratic members of the subcomittee were notified of hearings, had the right, as they had the opportunity, to be present, and almost invariably, if not invariably, some one of them was present at the examination of all the persons who were examined by the subcommittee.

Mr. ALLISON. I am obliged to the Senator from Tennessee for making that statement. I am also able to state that the Senator from Tennessee was one of the most faithful and constant in his attendance at the sittings of the subcommittee, and gave diligent attention to every question connected with the hearings—I am glad to say that for him—as was also the Senator from Kentucky; and I am not seeking to exclude others by mentioning these two gentlemen. Of course the Senator from Indiana [Mr. VOORHEES], who was also a member of the subcommittee, was present from time to time, but often had engagements elsewhere which prevented him from appearing as frequently, perhaps, as he desired, but the Senator from Kentucky [Mr. BECK] and the Senator from Tennessee [Mr. HARRIS] were in constant attendance until the Senator from Kentucky unfortunately was obliged to leave the city on account of illness.

Mr. President, there is another thing which I ought to call attention to in this minority report so as to clear away the field. This minority report takes occasion not only to express its own views in the matter I have described, but to express the views of the House of Representatives by incorporating bodily and integrally the report of the House Committee on Ways and Means in their report, and in doing so they have made blunders, which I suppose were unintentional. This House report was made in April, if I remember aright.

Mr. HARRIS. The 2d of April.

Mr. ALLISON. Submitted on the 2d day of April, 1888. In that report is a statement of the results of the House bill as reported. They state how much the revenue would be reduced from customs and how much from internal revenue. I do not go into the question of the accuracy of their calculations at this moment, but they show—and this is now, according to the rules of the Senate, made a part of its archives—that they made a reduction by the House bill of $78,000,000, $24,000,000 on internal revenue and $54,000,000 by reduction of duties on imports, including the free-list; whereas this House bill was so changed in the course of its passage through the House of Representatives that instead of the reductions on the dutiable-list amounting to over $53,000,000 they amount only to a little over $49,000,000. New Jersey industries were taken care of. Some other industries that I might describe and mention were taken care of and removed from the free-list, thereby not only reducing the dutiable and free-lists to $49,000,000, but reducing the free-list to $19,000,000. The internal revenue part of the bill was made up on an estimate made by the Committee on Ways and Means in March. That estimate has not been verified by the report of the Commissioner of Internal Revenue made since the close of the fiscal year.

The internal revenue reduction as proposed in the bill is more than $2,000,000 less than that stated in what is found to be the minority report with this bill. Thus, instead of the House bill reducing the total revenues by $78,000,000 as is alleged by this minority report, the House bill reduces them by but $71,000,000 on its own calculations, making a difference of over $6,000,000.

That is a general statement as respects the reduction. The House bill on its face then, as it stands here, only reduces the revenues practically $71,000,000 in round numbers.

Now, Mr. President, I wish to say a few words as to the measure we have reported. Perhaps I ought to say in the beginning, that upon one computation made by experts the reduction of the revenue made by it will be $73,000,000. That computation is made up on the idea that where we have increased the duty there will be a corresponding or at least a partial reduction in the importations, and thus the revenue will be reduced in that way. That is the basis upon which this table is made up. But if the computation were made upon the basis of the House bill it would be different. It can not be made upon the basis of the House bill, for in no case have we reduced the duty, in my judgment, to such a point as to lead to an increase of importations, whilst the manifest purpose, or at least the manifest effect, of the House bill is to increase importations not only of the articles that are put upon the free-list but also of the articles where the duties are reduced. That being the manifest effect of the bill, of course it is a question merely of estimate whether or not the increased importation will not amount to a sufficient sum to prevent any reduction of revenue under the House bill. I believe in many instances that will be the absolute result. I have no doubt that where large reductions have been made upon certain imported articles the importations will increase so much that the revenue will not be reduced at all from those particular articles, and the general effect of the House bill will be, not to reduce the revenue at all, or if at all, to a very limited amount, so far as customs revenue is concerned.

But we believe that the increased duties which we propose will reduce importations in most cases of increase, but if we are mistaken in that, if the importations should be what they were in 1887, our bill will still reduce the revenues $61,000,000, so that there is no question but that the effect of the Senate substitute will be to reduce the revenue from $61,000,000 to $73,000,000, and in my judgment it is likely to be midway or substantially midway between those two points. That is the purpose and intent of the Senate amendment. But we have not only reduced the revenue from imports; we have also reduced the internal revenue as well; and I wish to make an observation or two upon the internal-revenue taxation in view of the minority report.

We have put provisions in this substitute very similar to the House bill on tobacco; and why the Senator from North Carolina [Mr. VANCE] could bring his mind to the point of criticising the tobacco provisions of this substitute I can not quite comprehend. The minority say that "practically the substitute offers to the people free whisky and free tobacco." I can not understand why the Senator from North Carolina should censure the majority of the Finance Committee for proposing a diminution of the internal revenue upon tobacco. I do not understand why it is that we should be criticised in one breath for reducing the tobacco tax, and the Mills bills, so called, extolled into the upper heavens for doing the same thing. In other words, they condemn us for dealing with the internal revenue upon tobacco, and then they indorse the Mills bill, which does practically the same thing.

Why did we put free tobacco in this bill? I will say frankly for myself that I have not been very vigorous and urgent as respects the reduction or repeal of the internal-revenue tax upon tobacco, but I have supposed that there was practically a universal sentiment in favor of taking off the tax on tobacco in both Houses of Congress. This certainly is true as shown by the votes in the two Houses. It has been reduced and reduced from year to year from 32 cents a pound until the last reduction was to 8 cents a pound. It is said to be an onerous imposition upon many of the agricultural States of the Union that produce tobacco, and I supposed that there was a general sentiment in favor of that reduction, and I yielded to it, and the Committee on Finance yielded to it; that is, wherever they were not originally in favor of taking off that tax.

The only difference between the House bill and the Senate bill in that respect is that we have made a reduction upon manufactured cigars of $1.50 a thousand, and we have also taken off the tax upon retail dealers in tobacco, which is retained in the House bill at $1 for each dealer. We did not believe that it was wise to have an army of revenue officers going in every cross-road and hamlet and village in our country collecting a dollar tax from every man who may sell a cigar. Therefore we wiped out that tax in our provision, which is retained in the Mills bill, so called, at $1 for each dealer.

Another provision of this substitute is a provision exempting from tax alcohol used in the arts. The minority say, speaking of this subject:

> But in view of the impossibility of preventing frauds upon the revenue that should be derived from distilled spirits used for purposes other than the arts, the loss of revenue may be safely estimated at many times $7,000,000.

Is there any Senator who would say that alcohol, if it can be safely allowed to be so used without disturbing the tax upon spirits used as beverages, should not be made free of tax? Why is it that all the men who are obliged to use alcohol as a solvent in the thousand varied chemical productions should not have that privilege, thereby cheapening their products, if it can be done safely? Who will say that all those who make varnishes or are engaged in similar mechanical industries, should not have the benefit of this solvent, alcohol, which is the best known for all these purposes, if it can be furnished free of tax safely without impairing the revenue?

Therefore, as a starting point, there is not any one that I know of who will say that the industries of our country should be burdened with a tax upon alcohol of 90 cents a gallon, unless it is absolutely necessary that that burden should come for the purpose of collecting the revenue which we derive now and which we are likely to derive for some time to come from distilled spirits used as a beverage. I take it, then, that the only possible objection to this is that it will disturb the revenue. Now, will it? I say in the beginning that if any Senator here, any of the lawyers of this body or those accustomed to draught or construe or criticise statutes, will declare that we have not put into this substitute provisions sufficiently stringent to prevent frauds upon the revenue as respects the use of alcohol in the arts, the Committee on Finance will accept any amendments he may propose to secure the safety of the revenue.

We intended to make, and have, I believe, made provision here that will absolutely make it impossible to defraud the revenue as respects alcohol used in the arts. I know that the Senator from Ohio [Mr. SHERMAN], in his brief debate the other day, expressed some doubt about these provisions. I am afraid the Senator from Ohio had not given these provisions that careful consideration which he generally gives to the subject he discusses, or else he would have modified that expression. There has been, I know, a prevailing opinion for several years that the ingenuity of chemistry would be so great under temptation as to provide some method whereby spirits infused and impregnated with wood alcohol could have that alcohol withdrawn and the spirits then used as a beverage. I have examined this question with care, and there is no part of the bill to which I have given more personal attention than to this question, and I want to say here and now that I have no hesitation in expressing the opinion that we can, under the provisions of this substitute, prevent fraud just as certainly as we can prevent fraud in the original distillation of spirits.

It is stated over and over again by chemists who have examined this subject that the only method whereby methylated spirits or wood alcohol can be entirely removed from alcohol proper is by distillation, and not by any crude method of distillation, but by the finer process of redistillation. Therefore it is that if we have machinery and power under existing law to prevent fraudulent distillation of alcohol, the same stringent and restrictive provisions which are here embodied will prevent the redistillation of methylated alcohol into alcohol suitable for beverages.

But we are not without absolute information upon this subject. Great Britain has had this principle in her statute system since 1854, and it is a part of her system to-day, and she has a tax upon spirits more than double, twice and a half, the tax upon spirits in this country. She raises $70,000,000 per annum now by her taxation upon distilled spirits, a greater amount in the aggregate than we raise, and yet methylated alcohol is permitted to be used in Great Britain free of tax.

Germany having double the tax upon distilled spirits that we have, also has a system of bonding and methylization which is perfect in its working.

Here, then, are two countries taxing distilled spirits much higher than we tax them, and yet having machinery in their laws whereby spirits can be withdrawn for industrial purposes without injury to the revenue. Therefore, it will not do to make a mere *ad captandum* statement that this can not be done. It has been done; it is being done under laws no more stringent than we propose here; and therefore there is no question of fraud involved in these provisions as respects alcohol used in the arts. I say this from absolute conviction that it can be done and will be done. My friend from Kentucky in his minority report virtually admits that, because he says that the effect of it will be to give the whisky ring an opportunity of securing an advance upon untaxed alcohol.

But this is only one method. As the Senator from Rhode Island [Mr. ALDRICH] very well reminds me—although I intended to speak of it before passing from the subject—we have in this measure a provision whereby chemists and other manufacturers may withdraw spirits in bond without the payment of the tax, and they may use these spirits in the production of such chemicals as the Secretary of the Treasury may from time to time authorize them to produce, without the payment of the tax, and they may do this in bonded warehouses. We have provided a system of bonding for domestic productions. It has been done in this way since 1866 by chemists for export, and I can seen no reason why it can not as well be done for domestic consumption.

It may be noted, as I pass, that at every internal revenue revision we have liberalized the law as respects the authority of chemists to manufacture articles for export. So, taking these provisions together, I regard them as wise provisions, and surely if they can be executed they are necessary provisions, for our producers come in competition at every turn with the great chemists of Germany, who have free alcohol, and with the chemists of Great Britain, the producers of a thousand articles in which alcohol is an essential element in these great countries, who are contesting severely with us for the industrial markets of the world, and particularly for the markets of our own country. So, proclaiming as both sides of this Chamber proclaim practically, that we do not intend to reduce the internal-revenue tax upon distilled spirits at this time, and with the indications at least that this tax is likely to remain for some time to come, are we to put gyves upon our wrists as respects our own great industries and allow Germany and Great Britain to have this enormous advantage of us in all these particulars, and are we to be intimidated in this effort to grant relief by the mere assertion, without a particle of proof to sustain it, that possibly there may be frauds committed under provisions we propose?

Mr. President, this is in curious contrast with the provisions of the bill which the minority of the committee indorse; and I want to say a word respecting that, although it is discussed in the report of the majority. The minority of the committee propose in reality to disturb, if not destroy, our internal-revenue system as respects the collection of the tax upon distilled spirits. What do they do? They open up to free distillation practically all distilleries having a capacity of less than 25 bushels of grain per diem. I will not discuss that question; it is discussed in the report in detail, and I invite criticism of the statements in that report as respects this free distillation proposed in this bill. Everybody knows that with the great temptation of 400 per cent. upon this article of distilled spirits, there are inducements to fraud, and this House bill proposes to open wide every avenue and every door leading in that direction.

But there is another thing that is curious in view of the criticism of the minority as respects the tobacco tax, and as respects the tax upon alcohol used in the arts, that this Mills bill, which they indorse, removes all taxes from retail dealers in spiritous liquors and retail dealers in malt liquors. I would like to have some Senator on the other side of the Chamber disclose why it is that they propose to withdraw from the revenue on whisky $5,000,000, or about one-fourteenth part of all the revenue, by allowing retail dealers to go scot free throughout the country. A tax yielding over four and a half million dollars is swept down by that provision, and yet the minority seem to think that we have opened wide this door and interfered with the collection of the tax on spirits by removing the internal tax from alcohol used in the arts.

So much, Mr. President, for the first two provisions found in the committee's bill. Now I come to the tariff schedules. The first schedule is the chemical schedule. I will say in respect to this schedule, which is a long one, that the committee gave it such attention and care as they were able.

Upon many articles we have reduced the rates below the provisions of the House bill, because wherever alcohol is used as a solvent or in the manufacture of chemical productions we have reduced the duty.

I may say that in the chemical schedule I do not know or remember now a single increase; there may be here and there an increase in that schedule, but certainly none of any prominence.

Then we come to the earthenware and glass schedule. There is practically no increase in the earthenware and glass schedule, but there is a diminution upon some articles, and perhaps I ought to say here—because I mean so far as I discuss these questions to discuss them as frankly as I can—we have provided for the inclusion of the dutiable value of packages and covers; so that under that provision there will necessarily be an increase of duty, as compared with the provisions of existing law. To cover that we have reduced the earthenware and glass schedule wherever there is an ad valorem duty to the extent of 5 per cent.; but with that exception, I think it can not be safely said that there is a reduction in the earthenware schedule.

Now we come to metals, and that seems to be a schedule that has troubled our friends in their minority report. Of course that is practically the most important schedule in the bill. It covers the entire range of our iron and steel and other metallic productions. We have increased the duty in some cases. We have made in this schedule duties specific that were formerly ad valorem, which will operate undoubtedly in some instances as an increase, but not in very many.

This metal schedule is based upon the idea that we should encourage the manufactures of iron and steel in our own country. If there is any one thing that this nation ought to do more than another, it is to build up every industry that is involved in the metals of our country. For every defensive purpose, as well as for every industrial purpose, this should be so. We have 150,000 miles of railway, more railway than there is in all Europe, and I do not know but in all the world beside. Are we to be dependent upon a hostile government possibly for the materials which are so essential to us in both war and peace? Our friends on the other side knew something of the difficulties in that particular twenty-five years ago. If the iron of Birmingham had been developed a quarter of a century ago, instead of under the beneficent laws which are now on our statute book, the tale might have been a very different one so far as the prolongation of the civil struggle in which we were engaged is concerned.

Therefore, aside from any question of our industries, it seems to me it is our duty to see to it that we so encourage the production of the metals in this country as to make us absolutely independent of all the nations of the world. In the minority report I find this metal schedule particularly criticized. It says:

> In no single instance is the policy upon which the substitute was framed more clearly demonstrated than in that of railway iron.

They give some illustrations and I want to accept the illustrations given by them.

> The cost to produce rails at a leading mill in the United States in 1887 was less than $27 per ton, of which less than $4.25 per ton was paid in wages.

I read now from the minority report:

> The present rate of duty on steel rails is $17, and by the substitute it is reduced to $15.68 per ton. The question arises whether this will reduce the wages of the operatives $1.32, or whether $11.43 bounty above the whole cost paid for labor will satisfy the manufacturers.
>
> The labor cost in a ton of steel rails being $4.25, on the pretense that this is so much higher than the former wages, the burden of $15.68 is thus laid upon every ton of steel rails imported into the United States, and thus governing the prices here in order to equalize the difference in domestic and foreign wages.

Is that a frank statement? If it is, is it an intelligent statement? Why, Mr. President, by a curious association of circumstances the Senator from Rhode Island [Mr. ALDRICH] and the Senators of the minority seem to have had the same illustrations in their minds. I would have supposed, if I did not know it to be otherwise, that they had met socially or in some other way and agreed upon what illustrations they should put in their reports respectively. The Senator from Rhode Island has absolutely annihilated this statement as respects the cost of producing steel rails. The testimony is so eminent that I desire to call the attention of the Senate to it expressly, although I have no doubt they have read it over and over again. I read now from page 31 of the majority report, in which appears a statement of Mr. Abram S. Hewitt. I need not state who Mr. Hewitt is. He was a distinguished member of the House of Representatives for many years. He is known to be a man of the highest intelligence as respects these very questions and of the highest integrity. He is now the Democratic candidate for mayor of the city of New York.

Mr. ALDRICH. One of the candidates.

Mr. ALLISON. I mean one of them. This is his statement as quoted by the Senator from Rhode Island in the majority report.

Mr. Hewitt said:

> The percentage of labor involved in the production of any given article depends upon where you begin to estimate the percentage. If you begin with a steel-rail mill, which uses pig-iron, the labor will be from 25 to 30 per cent. The actual wages paid by a wire-mill will amount to about 29 per cent. of the cost. If you include labor in the blast-furnace that would make it 60 per cent. But if you go on back to the ore bed, and put in everything which was paid out from the ore bed, the percentage of labor would have been about 90 per cent. I say this because the gentleman (Mr. Thomas G. Shearman, of Brooklyn, N. Y.) proposes to overthrow facts within my knowledge, and for which I pay. I say the amount which I pay out for labor, when I include every particle of raw material beginning at the ground—and I am a miner both of ore and coal—I have never, with all my anxiety to get it down, got it below 90 per cent. on the value of the finished product.
>
> Mr. MILLS. What is the finished product?
>
> Mr. HEWITT. Any finished product. I make bar-iron.
>
> Mr. MILLS. Is pig-iron a finished product?
>
> Mr. HEWITT. The labor in pig-iron will be 90 per cent. of the cost. It actually takes 90 per cent. of the cost of the article for labor, when you include everything from the beginning to the end.

Mr. Hewitt shows in this statement that 90 per cent. of the cost of manufacturing a steel rail is labor. We have in the committee-room abundant evidence of the same fact. I will not stop to illustrate from the testimony before the committee, but I will only add to Mr. Hewitt's complete and accurate statement a statement made by the Cleveland Rolling Mill Company, of Cleveland, Ohio, furnished by the honorable Senator from Ohio, who now sits opposite to me [Mr. PAYNE], at the request of the committee, in order that we might have accurate and intelligent information as to the actual labor cost of producing a ton of steel rails. The committee asked him to procure this information for us, and I have it here before me, and it will be embodied in our testimony taken from the books of the Cleveland Rolling Mill Company, and vouched for as to its accuracy by the Senator from Ohio.

STEEL RAILS.—STATEMENT OF CLEVELAND ROLLING-MILL COMPANY, OF CLEVELAND, OHIO.

[Presented by Senator H. B. PAYNE, of Ohio.]

Statement showing the cost of producing one ton of steel rails from Lake Superior iron ores, taken from the pay-rolls and expense account.

Paid for labor in mining one ton of ore	$2.32
Paid for labor in transportation of one ton of ore	1.15
Paid for labor in producing one ton of pig-iron from ore	8.85
Paid for labor in producing one ton of steel rails from pig-iron	9.51
Total amount for labor in the production of one ton of steel rails from Lake Superior ore	$21.83

The minority in its report states to us that it costs $4.25. This statement proceeds—

Paid for materials and transportation on same (less the cost of labor), such as ore, spiegel, coke, coal, oil, gas, ganister, clay, brick, etc. $7.67

And as the Senator from Nevada [Mr. JONES] very properly says, that is mostly labor, and it is.

Total cost of 1 ton of steel rails manufactured from Lake Superior ores, $29.50.

And yet the minority of the committee instruct the people of the United States that the labor cost of a ton of steel rails is only $4.25.

Now let me take another illustration——

Mr. HAWLEY. I beg the Senator to allow me. Perhaps they mean producing from pig-iron laid in the pig in their own grounds in Ohio.

Mr. ALLISON. They do not say so. You mean the minority report?

Mr. HAWLEY. Yes. If they do, I understand you to say the cost was $9.

Mr. ALLISON. I see the point of the Senator's interruption, and I thank him for it, and I will read again:

Paid for labor in producing 1 ton of steel rails from pig-iron, $9.51—

as against $4.25, according to the minority report. It is a valuable thing for the Senate to know that it only costs $4.25 to produce a ton of steel rails in our country, which sells now for $31.50. That is valuable information to impart to those whose duty it is and whose business it is to supply steel rails, because if the difference between $4.25, the cost of labor, and the price at which steel rails sell for now in the market, is what would thus appear, I want to invite my associates on the Finance Committee to join me in building a steel-rail mill, and we can sell our steel rails at a good deal less than $31.50 a ton.

Now, then, another illustration:

The rods—

Listen to this criticism of our bill by the minority of the committee—

The rods out of which the farmers' wire fence is made are not apparently changed in rate, but by various changes in classification actual and important additional burdens are imposed. A reduction in dutiable value from 3½ to 3 cents per pound weight accomplishes this. An additional size, No. 6, added without an apparent change of rate does adroitly increase the rate paid on wire rods of this size from 45 per cent. to about 54 per cent., and is an increased tax on this one size of wire rods of nearly $300,000, upon the basis of the importations of 1887,

therefore increasing the cost of wire fence to the farmers of the country. So says impliedly this minority report. In connection with this statement there are a few facts which I think should be placed on record. In the first place, this report states that we have reduced the unit of value or rather the dutiable value of rods from 3½ to 3 cents per pound upon this class of wire rods. That is to say, we have provided that this class of rods valued at 3 cents a pound, instead of 3½ cents per pound, shall come in at the lower rate of duty, which, under existing law, is six-tenths of a cent per pound.

When the law of 1883 was enacted we provided that all rods not less than No. 5, wire gauge, should pay six-tenths of a cent per pound when valued at 3½ cents a pound or less. At that time no wire rod was rolled thinner than No. 5, wire gauge. Then we provided that all wire thinner than No. 5 should pay another and a higher rate. That is, it was the intention of the law that all thinner than No. 5, wire gauge, should pay duty as wire; but it was held by the Treasury Department that all rolled iron or steel should be classed as rods, and drawn iron or steel should be classed as wire. The foreign manufacturers then rolled their rods thinner than No. 5 down to No. 6, and imported them under the blanket clause at 45 per cent. ad valorem, a plain and palpable evasion of the intent of the law.

I think there is no better illustration than this, and I will say to my friends on the other side that I want to point a moral here as respects ad valorem duties. Taking the importations of 1887, the duties on steel rods not lighter than No. 5 wire gauge, the unit of dutiable value was 1.6 cents a pound. No. 6 is a finer rod, and came in at 45 per cent. ad valorem, under this Treasury decision, and 201,000,000 pounds of No. 6 came in valued at 1.1 cents per pound.

There is not a man but knows that wire No. 6, being a thinner rod, costs more than a No. 5 wire rod, and yet under this system of ad valorem duties, which has been so often denounced by so many Secretaries of the Treasury, these men bring in these rods at a valuation of 1.1 cents per pound, or at a nominal value on the other side of $24.64 a ton. Does any man believe that they can manufacture wire rods of No. 6 wire gauge at the rate of $24.64 per ton? It is a clear and palpable undervaluation; and all the committee did in this regard was to put this one wire gauge in at the specific duty of six-tenths of a cent per pound, the rate provided for by existing law. It may be that the duties will be somewhat increased, but if they were now valued as they ought to be valued and as the true valuation is, there will be no increase of duty, but really a decrease of the ad valorem rate on a true valuation, as No. 5 wire rods now come in at 36 per cent. ad valorem, or a duty of six-tenths of a cent per pound.

In this connection, Mr. President, I want to call attention to some information that was before the Committee on Finance as respects these wire rods. It was shown before the Committee on Finance that up to the specific duty of 1883 no wire rods were manufactured in this country; but by the development of this wire-rod industry and the use of wire for fences there has been an enormous increase in the use of wire rods. Last year there were imported 149,000 tons, and the year before importations largely in excess of that, but last year we manufactured in the United States 188,000 tons of wire rods, and we shall probably in two years from this time manufacture every wire rod consumed in this country; and the price of wire rods has been greatly reduced from year to year.

When we commenced the manufacture of wire rods in this country two years ago the men who manufactured them in Germany sought to break the market, and they reduced the price to $35 a ton free in New York, duty paid, but when they found they could not induce our people to buy their rods and that our people manufactured their own, they made a close combination in Germany, a trust, whereby they put the price of wire rods up to $40.50 per ton, duty paid in New York, and they have remained there and have staid practically there for the last nine months. I will not read the testimony, but merely state the facts. It will be seen, therefore, that wire rods are being produced now in this country cheaper than they were ever produced before anywhere.

But our friends of the minority seem to think that fence-wire is a wire-rod. Fence-wire is a different thing. These wire-rods are the raw material for fence-wire. These rods are drawn out to No. 11 to 12 wire gauge, and thus become fence-wire. We have reduced the duty on fence-wire in our subsitute a quarter of a cent a pound. The Mills bill does not touch it. So the criticism as applied to this particular thing shows itself to be absolutely an error of fact. Taking our bill as it stands and comparing it with the bill that these gentlemen say they are willing to support, we have done more for the purpose of reducing the duty on fence-wire than has the House bill.

Wire for fencing is now so cheap that a man with $90 can fence a 160-acre field. I know of no boon to our people so great as that boon which has furnished them fence-wire at 2¾ cents a pound, and which affords an opportunity to fence a farm for $90.50, as shown by the present price of fence-wire in this country, at the place of manufacture, or 56 cents per acre. I see the Senator from Missouri shakes his head. That is the wholesale price of fence-wire to-day at every mill where wire for fencing is made. Mr. Oliver, of Pittsburgh, states the present cost of wire fencing under existing conditions which are not changed by the substitute.

The consumer certainly has no right to complain that his wire is costing too much under existing conditions. Barbed wire, which five years ago (with rods coming in at 30 per cent. duty) was worth 8 cents per pound, is to-day selling as low as 2¾ cents per pound at the factory. Allowing half of 1 cent per pound for middle-men's profits and freights (a very liberal estimate) the price to the consumer would be 3½ cents per pound. At this price it would cost just $90.72, or a little over 56 cents an acre, to fence a farm of 160 acres with barbed wire four strands high. Wire nails are sold at $2.30 per keg at the factory, which is less than the cost of rods in 1882. These two articles form the great outlet for the wire-rods that are manufactured and imported into this country—barbed-wire fence and wire nails. No better evidence is required of the fact that protection cheapens the protected article than the constant reduction in the price of wire and wire-rods since 1883 in the face of an advance of 50 per cent. in the rate of duty.

Prior to 1883 the duty on wire-rods was 30 per cent. ad valorem.

Mr. President, I have spent perhaps longer time on the subject of wire than I ought to have done. I do not know but that I should say something more as respects the metal schedule. I will simply add that we have reduced copper one-half, and there is no better refutation of what is said by many people, that the duty is added to the price, than what is disclosed in respect to the question of copper. The duty is a high duty now. We have reduced it one-half. Why? Because we have for the last two or three years exported largely of copper, so that the duty does not affect the price of copper one way or the other in this country. The testimony was clear before the Committee on

Finance that copper is cheaper in this country now than it is in Europe; and a further statement was made before us that a French trust has absolute control of the copper of the world, and they buy all the copper of the world as they have bought and are buying the copper from all the copper mines in the United States; they therefore control the price not only in this country but in Europe, and the duty has no effect upon the price, as the price is now less here or no more than in London, where it is free of duty.

Therefore I say for present purposes or at this time it is not necessary that we should retain the duty on copper for the protection of our own producers, and yet conditions may change. At the present time it is the enormous production of copper and its foreign control that controls the price of copper and not the duty.

The next schedule is wood and wooden-ware. I suppose I need not explain to the Senate that we have made no practical change in the wood schedule. We have corrected one or two incongruities in that schedule, or rather one or two difficulties that arise in the administration of that schedule under the present law. I have been in the past myself rather disposed to think that we ought to reduce the duty upon sawed lumber, but I think it is clear from what has been disclosed recently that any reduction of the duties upon sawed lumber would inure not to our people, but inure to the benefit of the Dominion of Canada; and I am not ready at this moment to pick out and select things which shall especially benefit the Dominion of Canada. We have many unsettled questions with that Government, and lumber should not now be excepted from any arrangements we may in the future make with them. Upon this point I beg to present what has been stated recently by Consul Hotchkiss upon this subject, which is found in the majority report:

I have been thus explicit in describing the systems of the two countries, for, to my mind, they are the key by which the situation and effect may be safely prejudged in case free lumber becomes a reality.

There is no dispute that the American manufacturer controls the making of prices. In doing this he is not influenced by the Canadian supply in any degree. If the duty of $2 is removed it will not affect the American price, because it has never been a factor, and will still be unfelt. No lower price will prevail in the United States than heretofore, and no different net results will be experienced by the manufacturer.

The Canadian, on the contrary, will lay his lumber down in the American market at $2 less per thousand, and will obtain for it the same as the American does, so that the net result to the Canadian manufacturer will be a clear gain of the $2 which the American Government has remitted. This additional net result to the Canadian manufacturer will, however, be of very brief duration.

Having shown how the governments in Canada continue their control of the timber land and their disposition to tax them to the utmost, I am confident that not a May pay-day will pass before a public notice will issue in effect that a further increase in annual and timber dues has been made an order in council, in sums sufficient to absorb the $2 per thousand into the provincial treasuries.

We know, in confirmation of this statement, that when we removed the duty of $1 a thousand on logs Canada straightway put an export duty of $2 a thousand on the same article.

I also wish to incorporate in the RECORD, in order that it may be convenient, a statement made by the Department of Agriculture respecting the effect of the tariff duty upon lumber:

At the present stage of development, however, it seems, so far as the saving of standing supplies is concerned, there need be no fear nor hope from foreign competition, for "the quantity of standing pine in the United States and Canada is reduced to a condition of absolute control; it is held in strong hands on both sides and will not be lightly frittered away." The stumpage price, which has lately advanced as never before, will necessitate the upholding of present values for manufactured lumber, and an advance of prices is as certain as a decrease of supplies.

The discussions of the tariff question in the "lumberman's" papers is naturally tinged by diverse personal interests, according as the manufacturer owns stumpage or relies upon supplied material. There are a number of American lumbermen who have invested millions of dollars and hold large timber-limits in Canada, and their interest would lead them to desire the removal of the incumbrance of $2, which the Canadian Government places on the unmanufactured, and the home Government on the manufactured article. The establishments on this side of the line do not wish to lose the margin of $2, although, as a lumber dealer expressed himself, "they can well afford it, for they control supplies, production, and price."

It is argued that whatever may be the temporary effects of a local or personal character that might result from the abolition of the tariff, such effects would not immediately be felt; they would not be great, and only short-lived. The range in which Canadian lumber, which has never been kept out by the duty, can compete with our own will be extended by so much as the amount of the present duty, if removed, would pay for extended transportation; meanwhile the Canadian stumpage will increase in value, and the distance from which Canadian supplies must be brought will increase so as to offset any temporary advantage.

An unbiased weighing of the arguments advanced on both sides leads to the conclusion that the removal of the tariff on lumber would have no appreciable effect upon the price to the consumer, nor be detrimental to the lumberman's or saw-mill business, nor in the least affect the laboring man; but at the same time no appreciable benefit towards preservation of forests and forest supplies need be expected at this date from such removal. Possibly positive local advantages may be gained, if by such competition local manufactures were encouraged and the shipping of raw material made less profitable.

With these statements, by officials now in office and familiar with the subject, and the additional statement that, in my judgment and belief, after as full an examination as I could make of the subject, the taking off of the duty on a particular article of lumber involved in the House bill would simply be so much of a bonus to the Dominion of Canada rather than a benefit to our own people, I leave the matter, only adding that the framers of the House bill do not touch but one or two classes in the lumber schedule. They do not reduce the duties upon the advanced manufactured lumber; they leave those open, and therefore it is that the effect of the House provision will be simply to put into the treasury of the Dominion of Canada $2 a thousand which it is proposed to take off lumber. That is all I have to say on the lumber question at this time.

Then we come to sugar, which is the next schedule. I want to run over these schedules briefly and state what are the salient points of them.

The House bill reduces the sugar duty 18 per cent.; our substitute reduces it 50 per cent., and with that reduction the ad valorem duty on sugar is higher than the duty upon any other article of a similar nature in the schedules, if we except perhaps a few classes of wool. The sugar duty remains at 41 per cent. and a little more ad valorem under the substitute. It was not an easy thing for the committee to deal with this sugar question as respects the different grades of sugar. I think we have reached a fair solution as between the consumers and refiners of sugar. There was a disposition to make such a readjustment of the duty as would carry the polariscope test to No. 16, Dutch standard, but the majority of the committee thought it unwise, without further information at least, to make that radical change in the law, and therefore we have left the polariscope test in the substitute as it is now, at No. 13, Dutch standard, and as is proposed in the House bill.

Sugar is as essential to every family in the United States as is bread. It enters as much into the consumption of every household, wherever that household may be, as does flour; and if there is any necessary of life that should have a low rate of duty it is sugar, as this duty is paid by the consumer, because we do not now, and can not under the most favorable circumstances for many years to come, produce one-half of what we consume, and I believe—I speak for myself—that reasonable encouragement is given in the substitute to test our power of producing sugar either from sorghum or beets, and also reasonable protection to those now engaged in this production from cane.

The consumption of sugar in our country is enormous. In 1850 we produced as much sugar as we imported. It was not until the decade between 1850 and 1860, I believe, that we reached a point where we imported more sugar than we produced. There was a large production of sugar between these years, and we produced about 384,000,000 pounds on an average, and we imported very little more than we produced. Each year after 1865 there was a gradual increase in the consumption of sugar not only in the aggregate but per capita. We have trebled the consumption of sugar in twenty years, and now consume in the United States more than 3,150,000,000 pounds of foreign sugar, whereas we only consumed twenty years ago 1,110,000,000 pounds; so that in twenty years the people of the United States have nearly trebled their consumption of sugar.

Is there any law of political economy which should require every family in the United States to pay the present high duty of 2 cents a pound upon sugar consumed in that family and in addition the cost paid to refiners of sugar? There is not a family in the United States but what pays more for sugar than it does for bread because of this enormous duty, and yet this House bill comes here to us reducing the duty upon sugar only 18 per cent., making it a nominal reduction, and why? It has been the boast of the Democratic party that they wanted to reduce the duties upon the necessaries of life. What necessary of life is greater than that of sugar? And yet, although it bears the highest rate of duty of any article upon the dutiable-list, liquors and wines not excepted——

Mr. DAWES. Rice.

Mr. ALLISON. Rice should be excepted. It pays the highest ad valorem rate of duty of any article upon the dutiable list, distilled spirits and wines not excepted, and yet this House bill reduces sugar only 18 per cent. Is it to be claimed here that we propose to reduce the duties upon the necessaries of life, and yet keep up this enormous duty upon this essential necessary?

Unless we can utilize beets and sorghum in the production of sugar in the future it is not probable that we shall ever produce one-tenth of the sugar that we consume in this country, and we are consuming year by year a greater number of pounds per capita. So if this measure shall become a law, and thereby reduce the cost of sugar to the consumers of the United States from 1 to 1⅜ cents a pound or $42,000,000 per annum to our people, the effect of this reduction will be undoubtedly to increase the consumption of sugar in our country from year to year. And hence I should say that, as respects this sugar duty, it is probable the revenue will be increased at the rate of $1,000,000 or $2,000,000 a year beyond one-half the amount we have received, and to that extent there will be an addition to the revenue.

Our sugar-producing territory, except of sorghum, is limited, and cane-sugar is produced under unfavorable conditions as compared with the great amount of the production of sugar throughout the world from cane. The Senator from Kentucky takes especial pains to criticise our action on the sugar question in his report, whereby he not only criticises this reduction severely, but he goes back to the legislation of 1883 and states that in the conference committee the duty on sugar between Nos. 13 and 16, Dutch standard, was raised from 2¼ cents to 2¼ cents a pound, and he says in his report that the Senate, by a yea-and-nay vote, had fixed the relation between what is known as raw sugars and sugars between 13 and 16 at 40 cents per hundred pounds or four-tenths of a cent per pound. He states, then, that after a further examination

we yielded finally to a difference of half a cent a pound between unrefined and sugars between 13 and 16 Dutch standard, and then he says the Republicans in the conference committee increased that difference to three-fourths of a cent per pound.

I do not see how it is possible for him to indorse this House bill after making that statement, because this House bill makes the distinction between sugars below 13 Dutch standard and sugars between 13 and 16 Dutch standard of fifty-seven one-hundredths per cent., or nearly the amount provided for in the existing law of which he complains.

The dividing line by this House bill, which we are considering here, provides as respects sugar that all sugars above No. 13 Dutch standard shall pay fifty-seven one-hundredths of a cent beyond the average of the sugar that comes in under the polariscopic test. This substitute, as proposed by your Senate committee, proposes a difference of three-eighths of a cent per pound or a difference of one-fifth of a cent a pound in favor of the substitute and the consumer of sugar and against the refiner as compared with the House bill, and yet the Senator from Kentucky criticises this substitute which reduces twenty one-hundredths of a cent below the bill which he supports between 13 and 16 Dutch standard, and says he is in favor of the House bill. This House bill makes a greater difference in favor of the refiner than the highest point he was willing to concede in 1883.

The difference between the substitute which we propose and the House bill as respects sugar is a difference of $6,000,000 in the aggregate per annum to the consumer. By the House bill the tax upon the people of the United States is $6,000,000 per annum more than the Senate substitute, as the duty is paid by the people who consume the sugar, and, in my judgment, it is practically the only case in all these dutiable-lists where the consumer pays the duty; and, as the Senator from Massachusetts [Mr. HOAR] very justly and very properly observes, it bears heavily upon the poor and upon those who have large families. Six million dollars to whom? Where will it go? It is between 13 and 16. Why is it that the refining interest insists all the time upon that relation of 13 and 16? It is that the centrifugal sugars can not come in between 13 and 16, and thus go into consumption without the intervention of the refiner. Therefore it is that they want to make the line of demarkation strongest between 13 and 16, in order that all sugars that come in may be raw sugars, and thus pass through the processes of refining in our country; and I repeat that the Senate substitute makes a difference of one-fifth of a cent, or $6,000,000 per annum in favor of the consumers of sugar.

What is the effect of that? Acccording to the census of 1880, there was twenty-seven and a half millions of capital invested in sugar refining in the United States. I have not been able to procure the accurate statistics between then and now, but I assume that there is certainly not more than $50,000,000 of capital engaged in that industry now. So this concession made to sugar refiners in the House bill as compared with the Senate bill is 12 per cent. upon all the capital of all the sugar refineries in the United States; and yet the Senators who have made the minority report upon this bill, including the separate and distinct report of the Senator from Kentucky, indorse these House provisions as respects the question of sugar, and then they denounce all trusts. They legislate by the provisions of this House bill $6,000,000 into the pockets of the sugar trust, 12 per cent. per annum upon their capital, and take it out of the pockets of the people of the United States and denounce the Republican party and this substitute for administering to and fostering trusts! Consistency is a jewel that is not found in this minority report any more than it is in the report of the Senator from Kentucky.

The next schedule is tobacco and cigars. We propose in this bill to somewhat modify the duties upon tobacco and cigars. I am not clear that the provisions as introduced are exactly what they ought to be. I say that for the benefit of all those who may be interested in this manufacture we have done the best we could with the information at hand; but, I repeat, in the great hurry of getting this bill with all its schedules properly before the Senate, we have had to report some provisions without the careful examination which should have been made.

We have changed the duty upon imported cigars from two and one-half dollars a thousand and 25 per cent. ad valorem to a specific duty of three and one-half dollars. The effect of that may be, I think, to increase the duty upon some kinds of imported cigars; but as they are a luxury I do not think that increase will be very much felt.

We have also made a change in the law as respects wrappers. We have taxed tobacco suitable for wrappers 75 cents a pound, unstemmed, and if stemmed, $1. In order to compensate for that increase on the wrappers we have reduced the duty on Cuban tobacco for fillers, which is the only tobacco practically imported, from 35 to 40 respectively to 25 and 20 cents. I do not know that this adjustment is just what it should be, and the committee desires the information that always comes from an open discussion of the details of a bill in the Senate and such further information as we can acquire from the trade before the details are finally adjusted.

The next schedule is provisions. We have made some changes in the provision schedule. So far as we could we have provided specific duties in lieu of the ad valorem duties.

There are some things that the committee have in contemplation that we have not yet done as respects the provisions schedule. The committee are considering the question of providing some rate of duty upon eggs imported into our country for the benefit of our own producers and farmers and for the protection of this great industry, which, as Edward Atkinson said, is equal to the iron industry; but we have not yet perfected that provision.

The flax, hemp, and jute schedule has been changed somewhat. It has been changed, first, by the removal of all duty upon the raw material. It has been changed, next, by making specific rates instead of ad valorem rates in many cases. We have reduced certain products of the manufacture of these grasses and fibers and we have increased some others. Notably we have reduced one-half the duty on binding-twine. I will mention that in the interest of farmers and for the benefit of those who joined in the minority report, so that there may be no mistake about it. The reduction is from 2½ to 3 cents a pound to 1½ cents a pound. We have reduced also the duty on cotton-bagging one-half. The duty on cotton-bagging is now 1½ to 2 cents a pound. All under 7 cents a pound is 1½, and all above is 2 cents. We have reduced that to three-fourths of a cent a pound, as our sympathies ran out somewhat with the extraordinary arrangement made by those who use cotton-bagging for consumption during the present year.

The next schedule is silk and silk goods. I will say, for the benefit of those who have not examined with care these schedules, that we have adopted specific duties in lieu of ad valorem duties as applied to this schedule because of the great undervaluations in it. Indeed, a great portion of the difficulty in the New York custom-house arises from the importation of silks, and we have adopted specific rates instead of ad valorem rates. We have done that upon the request of the Secretary of the Treasury, so that we can not, of course, be charged with anything extraordinary in that respect. Secretary Manning—I have his request before me—prepared a silk schedule, which we have adopted in the main, providing specific duties upon silk goods in lieu of ad valorem duties, and I believe the effect will be to increase somewhat the rate of duty upon silks as compared with the duty now collected, or which ought to be collected. It was the intention of the committee and the intention of the Secretary of the Treasury, as we understood it, to make these specific duties correspond exactly with the ad valorem duties, when honestly collected, now on the statute-book.

We have made no great changes in the three other schedules, sundries, books, and the free-list.

Thus, Mr. President, I have gone over the details of this bill, not with the expectation or intention of discussing the merits or demerits of protection or free trade. I did not intend and do not propose to do that in this debate at this moment. I intend to refrain from discussing the abstract question of free trade and protection. I only mean to say that from my examination of these bills—the House bill and the substitute—the one is a clear and distinct measure of protection to American industry and American producers, and the other is a step, and I may say a long step, in the direction of what is commonly known as free trade.

I am reminded by the Senator from Rhode Island [Mr. ALDRICH] that I have not touched upon wool and woolens. I have not, nor have I upon cotton. These are two of the great schedules in this bill. The woolen schedule is changed very much and the cotton schedule is considerably changed; but in the cotton schedule there has been only an increase of duty upon two or three items of rates upon the finer grades and an equal number of items of the lower grades have been reduced.

We have increased duties in the woolen schedule somewhat, but only in the higher classes of woolen goods. We have not touched the lower classes of woolen goods, except to correct what has been understood in the Treasury Department and by both Houses of Congress to be an injustice in respect to worsted goods. We have made that correction and classified worsted goods with woolen goods in every case, and in that sense, perhaps, the lower classes of worsted goods will be required to pay a somewhat increased duty. But with that exception every increase in the woolen schedule comes from an increase in the higher and finer grades of woolen manufactures, and they were made necessary because we increased the duty by 1 cent a pound upon the finer grades of wool.

I ought to say one word as respects the duty on wool, because, in my judgment, it is probable there will be a small increase of revenue arising from that.

Last year—I have not the exact figures before me, but will state them in general—there were imported last year of carpet wools about 63,000,000 pounds of the lower grades, which are now taxed at 2½ cents a pound, which we do not change. There were imported 21,000,000 pounds of the finer grades of carpet wools at a dutiable value of about 18 cents a pound. Upon that higher grade the bill as reported proposes to increase the duty 1 cent a pound upon clothing wool, of which there were imported over 20,000,000 pounds last year and re-exported, I believe, about 6,000,000 pounds; so that the total importation of clothing wool last year probably would not be more than 15,000,000 pounds that would pay duty; we add 1 cent, so that on these two classes there will be an increase of revenue. In the woolen schedule, taken as a whole, upon the basis that there will be as large importations under the new rates as under existing rates, there will be an increase; but I ven-

ture the statement that with this worsted provision corrected woolen manufactures will not be so largely imported in the future as they have been in the past. It is because of the injustice that has been done to the worsted manufactures that we have had such large importations.

Mr. President, I only desire to say in conclusion upon this bill, that it is my purpose, as I am glad to see it is the purpose of the Senator from Tennessee [Mr. HARRIS], and as I understand it to be the purpose of this side of the Chamber, to proceed as rapidly as we may with the discussion of the bill. At some future time I may have occasion to make some further observations respecting it, but I only desired this morning to state the general provisions and plan of the measure in order that it might be understood by Senators who have not had an opportunity of examining it carefully.

Mr. VANCE. Mr. President, during the excitement of civil war there was a class of our fellow-citizens whose thoughts were directed to the main chance. Whilst others fought and sacrificed to maintain the integrity of the Union this class improved the opportunity to secure a system of Federal taxation which made them participants in all of its results. During all the turmoil and confusion which followed in the wake of war they steadily improved the shining hours to enlarge their share in this taxation, whilst the attention of men more impulsive or patriotic was directed toward other things. In this way they finally succeeded in establishing a partnership with the Government in the great and lucrative business of taxing the people.

Unlike most modern business firms the amount of its capital was not fixed, being all that they could get; nor was its terms limited, being permitted to embrace every possible article known to human want. The terms of the partners *inter sese* were that the Government should enact the law subjecting the products in use by the people to a certain rate of taxation which come into our ports from foreign countries, and the other partners were to levy their taxes upon all domestic products of like character under the "protection" of the Government tax. By this means the Government mulcted everything that came from abroad and the other partners everything made at home, so that nothing escaped.

Inasmuch as the home products exceeded the foreign by at least six to one, these partners of the Government received in taxes about five dollars where the Government received but one. And it is noticeable that the zeal of the partners has from time to time stimulated the Government to increase the taxes upon all articles which contributed most to swell their gains, with little or no regard to the gains of the public Treasury. To such an extent was this carried that they and their friends came in time to forget altogether that there was a Government to be supported, and to regard the taxing power as having been created expressly for the purpose of contributing to their wealth. Their literature spoke of nothing else, remembered nothing else, strove for nothing else.

"But the best-laid schemes of mice and men" at length go astray.

As the country emerged slowly and laboriously from the extravagance and corrupt expenditure of a state of war, and economy and public virtue once more came back under the auspices of a Democratic administration; and as, in spite of all, the wealth of the people continued to grow with returning peace it finally appeared that the one-sixth dollar of this taxation became too much, and the Government found itself in possession of more money than it could properly and wisely use. The President of the United States announced this fact to the country, showing the injury which it did by locking up so great a sum of the people's money, thus withholding it from the necessities of trade and commerce, and portraying vividly the dangers which it threatened, not only to all financial interests, but to the public morals as well. So irresistible was the logic of the situation that the Republican party, the authors and advocates of this unholy and iniquitous system of taxation of the many for the benefit of the few, reluctantly admitted the necessity for reducing the taxes which produced this surplus.

Both parties then being agreed as to the necessity of reduction, the question arose how and upon what things that reduction should be made. Common sense and common honesty suggested that it should be made upon those things where the inequalities were greatest and where the relief to the people would be greatest, to wit, upon the necessaries of life in greatest use by the most people. To understand the situation it is necessary to consider, first, the chief sources of our federal taxation, and the proportion of revenue yielded by each. This revenue is derived as follows:

Custom duties (estimated for 1888)	$228,000,000
Internal taxes (estimated for 1888)	120,000,000
Miscellaneous sources	35,000,000
Total	383,000,000

Now let us analyze the first two. The internal taxes yield pure revenue to the Government minus about 3 per cent., the cost of collection. Of the customs taxes the greatest single item is that of sugar and molasses. The duty derived from these in the last fiscal year was in round numbers $58,000,000. As nine out of every ten pounds consumed in the United States comes from abroad, the duty received therefrom was nine-tenths pure revenue. That is to say that the Government received $9, whilst its partners in the taxing business received only $1. So it may be said of tin-plate, yielding $5,706,000, and of the few unimportant items which yet remain upon the dutiable-list, as Zante currants, manila, jute, and other textile substances, which are the exclusive growth or production of foreign countries. The duty on them is pure revenue.

On the contrary, the duty on the remaining portion of the customs schedules are for the greater part protection, the average being about $5 tax for the manufacturers and $1 revenue for the Government. Indeed, on many leading articles of common necessity the duty is pure protection, and all goes to the manufacturer and none or next to none to the Government. Now, in reducing the taxes which yield revenue to the Government, a decent regard for either the Government or the people who consume the articles and pay the tax would require that, to say the very least, one part of the reduction should come from those things which yield pure or nearly pure revenue, and the other part from those things which yield pure or nearly pure protection. Equity would everywhere prescribe that the contribution levied upon a firm should be upon each of the partners in proportion to his interest or the amount of his stock, as the case may be. No court of conscience upon earth would decree otherwise.

Therefore in accordance with this just and equitable principle the House of Representatives framed its bill, No. 9051, passed it, and sent it to us for our concurrence. It provides for a total reduction of $78,000,000, $24,500,000 of which comes from internal-revenue taxation, which is pure revenue, and $5,700,000 from the customs duty upon tin-plates, which is also pure revenue. When to this is added the remission of duty upon various unimportant articles wholly grown or produced abroad it will be seen that as near one-half as may be of the proposed reductions were made upon those things which exclusively yield revenue, and the other half upon the things which principally yield protection. In short, the Mills bill gave up half of the proposed reduction to come from the Government and called upon the beneficiaries of tariff taxation to give up the other half, whereas in justice it could have called upon these beneficiaries to surrender in proportion to their interest in the taxation, which, as I have before said, was about $5 to one.

To this fair and generous proposition how did this favored class respond? With the exception of three every Republican voted against its passage. When it arrived in the Senate and was acted upon in the Finance Committee it was rejected by the entire Republican vote and the substitute adopted in its place. Now, how does that substitute divide that reduction between the Government and the people on the one side and the favored classes on the other? In the first place, it takes from—

Internal taxes on tobacco, which is pure revenue	$24,371,000
By reduction on alcohol used in the arts	7,000,000
By additions to the free-list of articles which yield pure revenue	6,428,000
By reduction of sugar duties, nine-tenths pure revenue	27,759,000
Total	65,559,000

(Excluding fractions.)

They claim a total reduction of $73,668,000, and to make up the remainder they claim that they have reduced duties on manufactured goods proper to the extent of $8,109,000. So that if their statement of the effects of their bill be correct it shows that they propose to reduce revenue by very generously giving up $9 of the Government revenues and $1 of their own. But even this is not true. Selfishness necessarily takes refuge in fraud. The favored classes, at whose suggestion this substitute was framed, were enabled by their technical knowledge of their own business to impose, no doubt, upon the members of the Finance Committee, and to largely increase the duties in several schedules. By the best information which the Democratic members of the Finance Committee could obtain in the short time allowed them to examine the substitute this increase will amount to fully $10,000,000. In my own opinion its practical effect would far exceed this. So that it all amounts to this, that for the privilege of reducing its own revenues, those in which no favored manufacturer whomsoever is interested, the Government would be compelled by this bill to pay these pampered paupers a bonus of more than $2,000,000.

The method by which this increase is effected is not new. It was resorted to in the so-called revision of 1883. That, too, was heralded with the declaration that the country demanded reduction and that the bill proposed by the commission would effect a reduction of at least 25 per cent. Yet when that bill had passed the ordeal of this Chamber and through the dark mysterious manipulations of the conference committee, where no voice was heard but that of the friends of high duties, it was found that the alleged reduction of 25 per cent. had by this same process been converted into an increase of 12½ per cent., making the duties which were 42 per cent., 47 per cent. On this occasion that plan, which has been again tried, consists, first, in changing ad valorem to specific duties; to both specific and ad valorem duties; to specific duties based upon values and ad valorem duties added. And where this could not be conveniently done, or done with sufficient mystification to conceal it, changes of classification have been made.

It is almost impossible for any but an expert importer to ascertain precisely what these changes mean, but the intention is plain enough to the humblest understanding. Is not this the acme of pampered insolence; the very incarnation of human selfishness? I do not wonder at their thus using the power which they have acquired over the legislation of

their country; it is quite natural that they should go quite to the end of their tether, if there be any end to it, in their unhallowed pursuit of wealth; but I do wonder that any intelligent Christian man, outside of the favored circle, can be induced to support by his vote and influence this shameless iniquity.

These changes of classification and of rates of duty are justified, and always have been, under the pretense of simplification and of preventing fraud against the Government by importers. This is the old cry of "Stop thief," and must cause a broad smile on the faces of manufacturers when they mention it to each other. How a plain ad valorem duty could possibly be simplified by the addition of a specific duty thereto is one of the mysteries of the trade. And how it could be further simplified by basing a specific duty on a valuation of the article and adding both to the ad valorem is a still greater mystery; but when you add a half dozen different classifications of the same article, distinguishable only by an imperceptible shade of difference in material, fineness, or coarseness, and affix a different value, a different specific, and a different ad valorem rate of duty to each classification, the simplification to be found therein becomes the greatest mystery of all.

The same argument applies with even greater force to questions of fraudulent valuation.

Take the woolen schedule—paragraph 354—"cloth shawls," etc., valued at not exceeding 40 cents per pound, 35 cents per pound, and 35 per cent. ad valorem; valued at above 40 cents per pound and not exceeding 60 cents, 35 cents per pound, and 40 per cent. ad valorem; valued above 60 cents per pound, 40 cents per pound, and 40 per cent. ad valorem. Here there are three different estimations of value in the first place—three different specific duties and three different ad valorem duties on the same article. Surely this is simplification with a vengeance. The next section, 355, "flannel, blankets, and hats," is still worse, comprising four different estimates of value, four specific rates of duty, and four ad valorem rates of duty. The next paragraph, No. 356, "women's and children's dress goods," etc., is, if possible, still more complicated. So it is through the whole of the woolen and the cotton schedules. Proof of this is found in sections 316, 318, 319, 321, 323, and 324. In the metal schedule these tricks abound, and wherever it was practicable to do so specific duties have been added to or substituted for ad valorem, and classifications changed. In their view ad valorem duties, plain and simple as they are, are objectionable, because they will reduce the tax as the price is reduced, whereas specific duties tax the cheapest articles as much as the dearest, and maintain the duties at one figure, although the price goes down until, as often happens, the tax becomes more than the price of the goods.

The Senator from Ohio [Mr. SHERMAN] claims that the whole schedule is divided into 795 paragraphs, each one relating to a single article.

There are fifteen different schedules, each of which is separate and distinct. Besides that it divides the whole into 795 paragraphs, each paragraph relating to a single article, thus dissipating the idea, which is so common in this country, that the tariff affects three thousand or four thousand articles, because 795 paragraphs describe every article, not only on the dutiable, but on the free list as well.

Let us see if this is true. See section 358, woolen schedule, where are enumerated seven different articles; section 359 enumerated five different articles of three different materials in two different states of manufacture; section 360, where are enumerated fifteen different articles made of three different materials; section 370, where are enumerated six kind of articles made of two different kinds of material. Paragraphs 375, 376, and 377 of the silk schedule, 395, 412, 416, 417, 415, each embracing many articles. In addition to which, necessarily, each schedule has a comprehensive and residuary clause erected to the unknown, "not specially enumerated and provided for."

The report very frankly tells us how careful the majority was to consult all the parties interested in the money to be received from this taxation, and how very tender they had been in dealing with any item wherein their profits might be touched. They say "the time which has elapsed since the House bill reached the Senate has been diligently employed by your committee in a careful investigation of the diverse and important questions involved in a general tariff revision, and in hearing such repre-entatives of the vast number of interests affected by changes in the tariff schedules as could be heard in the limited time at their disposal. Other interested parties are desirous of being heard, and it is the intention of the committee, with the approval of the Senate, to give such time to further hearings as shall be possible during the period the bill may be under discussion, with a view of eliciting the fullest information in order that the provisions of the substitute and of such amendments as shall be suggested may be acted upon with the greatest degree of intelligence."

And with this view they reserve the privilege of suggesting further amendments. By this we are to understand that while the Senate of the United States sits in this Chamber in discharge of its high functions to legislate for the interest of the whole people, the congress of the "interested parties" who are to benefit by public taxation is sitting in the lobby to supervise our work and see that it conforms to their wishes. They are to be consulted whenever any Senator shall suggest an amendment. Surely the power of these protected classes could not be more humbly acknowledged than is done by this statement. With all the care which has been taken of their interests, with all the subserviency which American Senators have thus manifested to these "Barons of the exchequer" it is to be supposed, if not hoped, that their diligence in the guardianship of their own interests, even down to the consideration of the very last amendment which may be proposed, will meet with its reward.

People reading the report of the majority would naturally feel curious to know if that subcommittee "heard" anybody beside the interested manufacturers. Was there any consumer there? Was any complaint made by those who simply pay the taxes, and were there any suggestions made for their relief or to prevent their "injury" and their "disturbance?" Indeed in the difficult task of framing a bill "to secure the proper relation between the rates imposed upon the numerous articles produced in our related and interdependent industries, the most difficult problem of tariff adjustment," did it ever occur to those able financiers to try their hands upon a problem much more simple and important, the revenue duties which should best promote the interest of 60,000,000 people and equalize the burdens of the support of their Government on principles of justice and equality?

It seems to me they should have tried the simple problem first and secured the greatest good for the greatest number before they tested their great genius in solving the problem of how to divide an untold mass of plunder so as to give satisfaction to all the robbers and fry any quantitity of fat out of their spoils. I wonder, too, did the indecency of the spectacle ever occur to them, of permitting these "interested parties" to dictate the laws which were to tax their countrymen? A reputable citizen would not be permitted to sit upon a jury for the trial of a cause in which he had the least interest, directly or indirectly, or any of his kindred, by consanguinity or affinity. A decent judge would not sit in the trial of a cause in which he had once been retained or consulted nor in a suit for or against a corporation in which he had a single share of stock.

Yet in this great cause, wherein they petition the Government to levy taxes upon the people which are to go into their own pockets, they are permitted to control the method and the amount! They are summoned here for that purpose, they are retained in the lobbies until the last moment for that purpose, and the committee gravely tell us that should any amendment be suggested they reserve the right to consult the plaintiffs. *Curia advisari vult.*

I commend their care, but opine their fears are groundless. Judging by this report there would seem to be no danger whatever that the majority of the Finance Committee should at any time forget the welfare of the manufacturers and act as though they had a Government to support and sixty millions of countrymen to legislate for.

Their free-list is a fair indication of their regard for those neglected sixty millions. Acorns, baryta, bees-wax, braids, bristles, chickory, culm, coal-tar, curling-stone handles, Zante currants, Chinese matting, human hair, mineral waters, opium for smoking, rags, rape-seed, sponges, and sand show their respect for the comfort of the million. Books printed in foreign tongues, which our little children can not read, are also free. This, with free opium, is intended doubtless as a bonus to that peculiar American labor for which protection is invoked. With the exception of jute and jute-butts and textile grasses and cheap adulterated molasses there is little upon it worth anything to anybody except the manufacturers. Compare it with the blessings conferred on the poor by the free-list of the House bill—free wool, lumber, salt, cottonties, and tin-plates.

The proposed abolition of all taxes on spirits used in the arts is expressly announced to be for the benefit of the manufacturers. The report says "that this tax is attended with no corresponding benefit except the resulting revenue which is not unnecessary." The report says (on page 10127) that "tariff schedules have been thoroughly revised, rearranged, and greatly simplified. Reductions have been made wherever they have seemed desirable, and we have increased rates wherever it seemed necessary to preserve the workingmen engaged in any American industry requiring protection from ruinous or unequal competition.

You will observe that the usual phraseology is here changed. Up to this report it has usually been called the "American labor in our factories." Now it is "the workingmen engaged in any American industry"—that is to say, any Canadian, Hungarian, Italian, Chinaman, or what not who has taken the place of an American citizen and works for less wages must be protected from ruinous or unequal competition; that is to say, his employer must have more money.

The duty on tin-plate as at present existing is declared to be "anomalous and inadequate." There being no tin-plate produced in America which could be protected, "the inadequacy" of the present tax would be hard to determine; but the anomaly is easily understood. It is certainly rather anomalous, in the opinion of the committee, that this article of prime necessity should be permitted to the people with only a tax paid to the Government instead of the rightful owners, and the committee think that by offering a sufficient reward these distributees of public taxation might be induced to materialize and claim their share. At all events, they think that the pre-natal garments should be prepared and in readiness for the baby which may possibly be born, even though the children who are already in existence go naked and hungry.

In stating the object and intentions of the committee in framing the substitute it was admitted virtually that everything was considered except the interests of the public revenues. They say:

> The substitute is based upon the idea that tariff revision implies an equitable readjustment of duties in the interest and for the benefit of the people of the United States, and in the distribution of rates its framers have not hesitated to erect or to maintain defensive barriers which would carry confidence and comfort into American homes.

Into some of them it will carry this "confidence and comfort," no doubt. The committee did not venture to say all American homes. Into the home of Mr. Carnegie, Mr. Havemeyer, Mr. Ammidown, and every great manufacturer and every member of a trust it will no doubt be warmly received. These homes are found in the palaces.

But in the homes of the cabin and the cottage, in the farmsteads amid the blooming orchards, in the humble habitation of the widow and the orphan the continued tax on their salt, their childrens' books and slate pencils, their tin-cups and water-pails, the increased tax upon their woolen and cotton clothing, their table cutlery, plates, cups and saucers, their blankets and wool hats will carry neither confidence nor comfort. It will rather make the thoughtful among them wonder why in the name of a merciful Creator a free Christian government will thus lade them with this weight of taxation and scrimp their narrow means still more for the benefit of those who are already rich.

The fact that in order to maintain their unnatural profits the manufacturers should urge arguments and make protestations in the very face of human nature and of instinctive moral laws is not so strange as that anybody should be found to believe them. They constantly tell us that their desire for high tariffs is dictated solely by the wish to continue or increase the amount of wages paid to their workmen, and that as for themselves and their own interests it would do them no good, for high duties produce domestic competition and invariably cheapen their products to a point lower than they would be if open to the competition of the world. This is the constant theme of every protection orator, every subsidized paper, and of all the manufacturers themselves, or the great bulk of them, who from time to time for twenty years past have swarmed before committees of Congress eager to swear to these facts in proof of their disinterestedness. Yet all men know that when a man makes anything for sale he naturally and instinctively seeks to obtain the very highest price for it and to obtain the very cheapest material and lowest rate of wages in the manufacture of it.

For between the minimum of cost and the maximum of price lies all the profit there is in the transaction. The nearer these approach the less there is of profit. Therefore when manufacturers or their advocates tell us that they wish such laws passed as will increase the cost of manufacture and lessen the price of their products they simply pervert the truth, and so outrageously that if one did not see it and hear it every day it could scarcely be believed that men in their senses would venture it. In fact, we know that whilst they enhance the price of their products by procuring high duties to be levied on those of their foreign competitors they purchase their labor in the unrestricted labor markets of the world.

It is claimed that the average of American wages are 50 per cent. higher than English wages and 100 per cent. higher than those of the continent of Europe generally. That being so, the average labor cost of all American manufactured products, being about 20 per cent. of the entire cost, covers the difference between American wages and European.

The average rate of tariff duties on all imported products being 47 per cent. of the entire value of the product, there remains 27 per cent. on all goods imported into this country to be added to the cost of all similar goods manufactured in this country over and above the equalization of foreign and domestic labor. To this must be added that large but undefined sum arising from the superior machinery of American manufacturers and the superior skill, strength, and intelligence of the American worker as is evidenced by the output of his products. Now, where does this excess beyond 20 per cent. go? There is but one receptacle for it—the pockets of the manufacturers. If any proof of this were wanting it will be found in the reports of the census of 1880, compiled under high protection auspices, which show conclusively that the profits of manufacturing are greater than those of any other American industry and far exceed many times over that sum which would equalize labor between America and Europe.

So far does this excess go that the people of the United States could well afford to pay themselves through the public Treasury the wages of every workingman in every protected factory in the country and strike off the excess in the tariff on foreign goods which is put there in the workingman's name. Let me illustrate: The cost of making a ton of steel rails in the United States was last year $27, of which $4.25 was paid in wages. This sum covered the difference between American and English labor. The duty on that ton of rails was $17, leaving $12.75 for the manufacturer's profit. Now, suppose that the people of the United States through their treasury should pay that $4.25 themselves and by law abolish the duty on steel rails, that would enable them to buy a ton of English rails laid down in New York for $20.50. Now, as the manufacturer only claims the duty for the sake of his workingman, and as the workman has already been paid for making the ton of rails he could afford to sell the people a ton for the same price, or at most, just enough more duty to exclude his foreign competitor. The rails would then cost the people $24.75, whereas they now cost $31.50.

Again, let me illustrate with pig-iron. The price of American pig for the last several months has averaged about $16.69; the labor cost in that ton was $2.46, which compensates the American maker for his higher labor. The price of a ton of Scotch pig within the same period has averaged about $11.25 laid down in New York, making a difference between the foreign and domestic pig $5.44 with the difference in labor already equalized. Then comes the duty of $6.72 on the Scotch pig which brings it up to $17.97.

This shows that the American maker gets the whole amount of duty on his iron minus $1.28, or $5.44. Now, suppose, as with the steel rails, that we pay the workman his $2.46 from the Treasury for making the ton of pig-iron and repeal the duty, the people would make $5.44 on every ton that they consumed. And if they tell us the truth, that they ask for a tariff on pig-iron solely or mainly to enable them to pay these higher wages to their workmen, of course our manufacturers could compete successfully with the British. But I fancy that they prefer to hold on to that $5.44, which they say they collect as trustees for their workmen. In short, after the manufacturer is compensated for the high wages he is obliged to pay the tariff then becomes simply a question as to how much the public will agree to give him for his own profit. The question of American labor and its protection is then absolutely disposed of. Beyond that the tax is simple and unmitigated plunder.

The fallacies which cluster about this question of labor are numerous. They are so absurd that I doubt if there be an intelligent and impartial thinker in the world who believes them. It is an entire error in the first place to assume that tariffs were ever intended in former times, when our fathers instituted customs duties, to increase wages. High wages were here first, as they always are in new and sparsely settled countries, and when manufactures were beginning with us they asked for tariffs to enable them to compete with foreign manufactures because wages were so much higher in this country than in the Old World, not to make them so. Recognizing the reasonableness of this request, moderate duties were placed by the legislators of that day upon nearly all European products for the purpose of raising revenue and to afford incidental protection to our young manufactures.

There were those then and for many years afterwards who regarded this as a dangerous precedent, and who predicted that the infants would never be satisfied with the small aid afforded them in their struggling days, but would acquire from time to time the wealth and power which would enable them to increase taxation in their benefit to an extent ruinous to consumers and the general public. Henry Clay, who was the illustrious friend of these infant manufactures, met these charges by a positive denial. In his letter to S. F. Bronson, of Georgia, in September, 1843, he said:

> The sum and substance of what I conceive to be the true policy of the United States in respect to a tariff may be briefly stated. In conformity with the principle announced in the compromise act, I think that whatever revenue is necessary to an economical and honest administration of the General Government ought to be derived from duties imposed on foreign imports. And I believe that in establishing a tariff of those duties such a discrimination ought to be made as will incidentally afford reasonable protection to our national interests. I think there is no danger of a high tariff being ever established; that of 1828 was eminently deserving that denomination. I was not in Congress when it passed, and did not vote for it; but with its history and with the circumstances which gave it birth I am well acquainted. They were highly discreditable to American legislation, and I hope, for its honor, will never be repeated.
>
> My opinion that there is no danger hereafter of a high tariff is founded on the gratifying fact that our manufactures have now taken a deep root. In their infancy they needed a greater measure of protection; but as they grow and advance they acquire strength and stability, and consequently will require less protection. Even now some branches of them are able to maintain in distant markets successful competition with rival foreign manufactures.

Yet the tariff of 1828, which he says was "highly discreditable to American legislation," was only 39 per cent., whilst our tariff is 47 per cent.

There can be no doubt, if he spoke his honest sentiments, but that if he were alive to-day he would bitterly oppose this substitute of the Finance Committee, and denounce it with all the force of his impetuous eloquence. But he was mistaken when he supposed that our manufactures having taken deep root would be satisfied, and there was no longer danger of high tariffs becoming the rule in this country. Still his honored name is to this day invoked in behalf of every tariff steal which is laid upon the American people.

To attribute our prosperity as a people and the maintenance of the wages of labor to the fact that we have imposed heavy taxes upon ourselves, is a statement utterly destitute of truth or logic. Not only common sense, but the history of the world refutes it. It is a fact well known that in Europe, whose civilization being similar to our own is a country to which we always look for comparison and precedent, the rate of wages is found to be in the inverse ratio to the amount of tariff taxes. Russia, which is the most highly protected country of Europe, pays the very lowest wages in her industries.

Through Austria, Italy, Germany, Belgium, and France you will find a gradually reducing tariff to be accompanied by a gradually increasing wage rate, until England is reached. There you find no protective tariff at all and you find the highest rate of wages in Europe,

equaling in some of their industries the wages paid our own people. It is therefore sheer nonsense or worse on the part of those who know better, to assert it to be an economic law that high tariffs produce high wages. If it were so of course the operation of the law would be the same everywhere under approximately the same circumstances.

If it be said that the different institutions and material situation of the nations of Europe would make a difference, then let us turn to our own country where the same laws and institutions, and practically the same physical conditions attend each State in the Union. We shall find on examination, as has been shown again and again in this Chamber and elsewhere, that wages vary in every State, in various parts of the same State, and often in the same county or city.

But perhaps the most absurd, not to say idiotic, of all assertions is that free trade (which is now understood to be any duty below 47 per cent.) is correct in theory but false in fact. By this is meant that though the theory of a proposition is absolutely correct, all the processes by which it is worked out and demonstrated to be a theory show that the theory is false. But so long as the manufacturers of our country can force people by law to buy all things which they use from them, at prices fixed by them in the absence of competition, whilst they themselves buy their labor and their food in markets cheapened by the competition of the whole world, they may be expected to continue to make and adhere to these assertions in the face of truth and experience.

The committee in their report dissent altogether from the estimates of the labor cost of a product adopted by the great bulk of political economists all the world over. That is, to take the wages paid to the laborer who converted the product from what was raw material for that process of manufacture, and ascertain what proportion those wages bear to the entire cost of the product. They contend that the labor cost proper of a finished product in its last form ready for consumption should be estimated by the wages paid all the way through the entire processes, from the time when the raw material was taken in the state that nature originally furnished it, and should be compensated by tariff duties embracing the whole.

In one sense this is true, but the committee in making their argument for the purpose of showing that the real labor cost of a finished article is about 90 per cent. of its total value, instead of 20, fail to remember or omit to mention the fact that every sale of the article includes the price of all labor previously expended upon it, and that the final sale of the finished article includes all the labor in all the previous forms of the material of which the article is composed. If the labor of digging a ton of ore from the earth was paid protective wages sufficient to equalize the difference between American and English labor in ore digging, when that ore was sold to the man who smelts it those wages were included in the price and paid for.

When the ton of pig-iron was finished, if the workman who smelted it was paid protective wages sufficient to maintain the natural difference between his wages and those of the English smelter, the sale of that ton of pig-iron to the man who rolls it into bars includes those wages, and they can not require to be compensated by another tariff. When the man who rolls it into bars sells to another artificer to be converted into still another form the high protective wages which he paid to his workmen are again included in the price; and so on to the last form in which it is consumed. And therefore, if the manufacturer of the ultimate form of the iron gets a protection which equalizes the difference between the wages he pays and those which are paid to the English workman who makes the same article, it is all that in reason or logic he could ask. But according to the theory of the committee, it would seem that he ought to be compensated by a duty which would cover the cost of every stroke of human labor which had been expended upon the product in all its history, not remembering that this had all been paid for and that every sale of the article, at every stage of its manufacture, had extinguished the question of labor.

Perhaps, however, there is no greater error connected with this subject or one more persistently urged than that concerning the advantages of the home market. It is very true that if a man could sell readily at home for remunerative prices all that he could produce, it would be a happy and a prosperous state of things. Especially would this be so if it could be done naturally and without a violation of the established laws of economy; in other words, if the home market invites him by offering the best prices. But when he desires to go somewhere else to sell his products and to buy his supplies he does so because that other place invites him by offering him the best market. His interest prompts him to accept it.

Then when the law steps in and forbids him to follow the dictates of his interest and tells him that he shall both buy and sell in the home market, that law is in violation of all good economy and of the highest and dearest rights of the people. And when it is found that all these praises of the home market emanate from the home producer whose wares are for sale, and that the law which forbids a man from seeking the best market is instigated likewise by the home producer, then both the praises and the law become the proper objects of suspicion to every honest mind. The farmers of this country are the victims of this selfish and illogical policy, more perhaps than any other class of the community. If protective tariffs operated to raise the price of his products as it does those of the manufacturer, then the restraint upon his rights would not be any worse than upon other people.

But unfortunately for him, whilst the price of all his supplies is increased by tariffs, the price of all his productions is lowered by the free-trade markets of the world. For him the great maxim of political economy that men should be permitted to sell in the highest market and buy in the cheapest is precisely reversed, and he is compelled to sell in the cheapest market and buy in the dearest. This is not true alone of his surplus products but of all; for the price which he obtains in the home market is fixed by the price of his surplus which he sells abroad. The manufacturer takes advantage of this; forces the farmer to pay him protected prices for his cloth, blankets, and all implements of husbandry, and then buys the farmer's flour, meat, and cotton at free-trade prices. A Southern farmer makes cotton for sale. The price which he obtains for it is that for which it would sell in Liverpool, minus freight, insurance, and commissions.

That Liverpool price is cheapened by the competition of the cotton grown in every quarter of the globe. Being compelled then to take that price, common fairness should permit him to buy his supplies in a market cheapened likewise by the prices of the world. In Liverpool or London he could thus buy the bagging and the iron ties to envelope his new crop, but protection says no—you can not do that unless you pay 50 per cent. duty on your bagging and 35 per cent. on your ties—the House bill proposes to make these ties free and reduce the bagging to 15 per cent. But this protection substitute does worse than even the present law, for whilst it does reduce the duty on bagging to 25 per cent. it increases the duty on the cotton-ties to 75 or 100 per cent. And the history of the Southern farmer's cotton is the history of the Western farmer's wheat.

The reasonable amount of prosperity which the country has enjoyed since the war has not been participated in by the agricultural classes, and little wonder when we consider how they are fleeced on all sides for the benefit of the others. The records of mortgages, of declining prices, amply testify to this. Nowhere has the decay of agriculture been more marked and lamentable than in several of the New England States where manufactures most abound. The statistics of these States completely refute the idea that manufactures furnish a home market which enriches the farmer. An intelligent and painstaking gentleman of this city has carefully collaborated the figures which illustrate this subject, and show beyond all question that whilst the cities and towns of New England have grown and become wealthy by the protective policy it has been at the expense and decay of the country at large. Here are his figures and conclusions:

"The protective policy has built up a number of considerable towns in Massachusetts, Connecticut, and Rhode Island; and these towns have doubtless given encouragement to gardening in their immediate vicinities. But it is manifest that the incidental good has not reached beyond their immediate neighborhoods. It has been shown that the system, while enriching the capitalists and building the towns in these favored States, has at the same time depopulated and impoverished their northern neighbors. And not only are Maine, New Hampshire, and Vermont injured by the artificial stimulant given by protection to manufacturing in the three more southern New England States, but it appears from the census returns that it serves to rob the country in the favored States themselves of population, and thus to ruin agriculture, which fosters the best citizenship, for the purpose of enriching the towns.

"The tendency of population in all our Northern country to rush to the cities is one of the social evils of the times, which legislation should do nothing to encourage if it can do nothing to check. This tendency in New England is particularly noticeable. Massachusetts, the richest and most populous of those States, is undergoing this process of popular congestion—this rushing of the social blood to the head—at a galloping rate. The population of that State in 1870 was 1,457,351, and in 1880 it had risen to 1,783,085. The increase was, therefore, 326,734. A table of the census report of 1880 shows the population of cities and towns in the United States of 4,000 inhabitants and upwards. From this table it appears that in 1870 the towns and cities of Massachusetts, of this description, contained 1,004,000, or not far from three-fourths of the population of the State, and that in 1880 the towns and cities of the State had gained 356,000, or 29,000 more than the State at large. In other words, that the population of the country had diminished to that extent, besides having been stripped of its natural increase.

"The population of Connecticut in 1870 was 537,454, and in 1880 it was 622,700. The increase was, therefore, 85,246. During the same years the population of the towns and cities of Connecticut rose from 289,801 to 370,057. The increase of the city population was therefore 80,255, or only 5,000 less than the gain of the whole State. In other words, the cities absorbed all the natural increase of the country population, except the 5,000, together with what they drew from Maine, New Hampshire, and Vermont, and other sources.

"Rhode Island in 1870 contained 217,353 inhabitants, and in 1880 the population was 276,531. The increase was, therefore, 59,178. The city and town population of Rhode Island increased between those years from 159,900 to 236,200, or 76,300. The cities therefore gained

27,000 inhabitants more than the whole State, or, in other words, the fields and farms lost population to that extent. Instead of fostering agriculture and increasing the number of independent yeomanry, the effect of the protective system is to convert independent yeomanry into dependent factory operatives, liable to be 'locked out' at any moment from the factories and ejected from the tenements occupied by them.

"The depleting effect of protection upon the factory-hand 'breeding States,' is capable of further illustration. Thus the population of Maine in 1870 was 626,915, and in 1880 it was 648,936. The increase was therefore 22,021. The city and town population of Maine in 1870 was 150,630, and in 1880 it was 171,528. The increase was therefore 18,898. These figures show that the aggregate gain of the State was a trifle greater than that of the cities, but the proportionate gain was thirty-fold in favor of the cities. Indeed, if we deduct the increase of city population from that of the State at large the balance in favor of the country will be only 3,123.

"The natural increase of the country alone would be something like 100,000. The population of New Hampshire in 1870 was 318,300, and in 1880 it was 346,991. The increase therefore was 28,691. During the same period the towns and cities of New Hampshire increased from 83,456 to 104,105. The gain therefore was 20,649. This was 8,000 less than the aggregate increase of the State. But it must be remembered that the 8,000 represents the gain of the country, and that proportionate gain is vastly in favor of the cities.

"Vermont in 1870 had a population of 330,551, and in 1880 it was 332,286, showing a gain of 1,735 inhabitants. The towns and cities of Vermont increased in that period from 50,504 to 53,141. The gains of the towns was therefore 2,637, or 900 more than the State, and shows that the agricultural interests had been robbed by the protective policy of that number of citizens over and above the natural increase. The natural increase of population in America is at the rate of 25 per cent. in ten years, and the healthy vigorous population of Vermont at this rate would turn out 80,000 new-born Green Mountaineers in that time."

It thus appears that while protection does protect, and make nabobs of the capitalists engaged in manufacturing, it is destructive of agriculture, and that of all the people in America who support the protective policy, the last to give it aid should be the masses—that is to say, ninety-nine in a hundred of the people in New England—and especially the agricultural population.

These statistical statements, taken from the dry reports of the census, and the inferences necessarily deducible from them are amptly illustrated in a lively, descriptive magazine article of recent date. It is to be found in the April number of the Americam Magazine, and is entitled "The decay of rural New England." The article is both entertaining and instructive as well, although the light which it throws upon the effects of tariff legislation was doubtless never seen or thought of by the writer.

He begins as follows:

> The cultivation of the soil, we have been taught to believe, is the true foundation of national prosperity. If this theory is correct, the fact is, to say the least, startling that the population of the hill towns of New England is steadily declining, and its farming lands are gradually becoming unkempt wildernesses. Vast areas in Connecticut and Massachusetts, formerly covered with fruitful meadows and grain fields, are now "unprofitably gay" with tenacious sumac and odorous fern. The once-cultivated land is occupied by brush and brake, and the woodman plies his ax where seventy-five years ago were heard the ring of the scythe and the rustle of the sickle.

The writer describes many scenes of desolation where a few generations ago were fruitful fields and happy homes.

> For instance, there is a rural town in Connecticut, not 60 miles from New York by rail, and barely 12 from the busy sites of industry that dot the coast line of the Sound. From the windows of an old farm-house there on a June morning one may look down on a square mile of bush and forest, the rye and clover fields of a former generation. * * * The most casual observer must be impressed by the number of empty houses along the way. Count them. One on the corner where the road leaves the highway, another beneath the big elm on the hill, a third under the hill, a fourth on the next slope, four houses in five minutes' walk, and only one is inhabited. Opposite the occupied house is a deserted cellar with crumbling walls, and in the rear are rows of scrawny current bushes and beds of tansy and peppermint, defining what once was a garden plat. Octogenarians tell that in their day a little brown homestead was here, under whose roof Farmer Morgan and his wife reared a brood of ten children on the produce of the farm that stretched back yonder into what is now a waste. Walking further we count three similar ruins in adjoining fields, and across the brook a fourth, four vanished homes in a distance of a quarter of a mile.

There is much more of this melancholy description, but it must be passed over.

Assuming that it is not money, but lands, houses, and all kinds of personal property which constitute wealth, it is plain enough that whilst people are producing for their own supply that they are increasing in wealth. But when their powers of production become equal to their own supply, and a large surplus over and beyond that, then one of three things must happen: First, the production must stop at the home demand, in which case there is an enforced idleness to that extent which results in a loss of wealth; second, if the production continue, it can not result in an increase of wealth, because the excess or surplus of supply will reduce the value of all that is sold and no advance in wealth can be made; or, third, that surplus must be sold abroad to foreign nations. The protective policy forbids this selling abroad.

Its leaders openly proclaim that they intend to reserve the home market for their own people if they have to build a Chinese wall around the United States to exclude all foreign products. They have very nearly done so. The tariff reformers say that we must so modify our laws as to enable our producers to sell their surplus products in the markets of the world, and this can only be done by cheapening as much as possible all the material of production and by lowering the duties upon foreign products to a point that will reasonably permit foreigners to sell them in our markets. For one thing is certain, absolutely certain, we can not sell to them unless they can sell to us. Foreign trade is simply exchange. The idea that we can rigidly shut out the manufactured products of all the world and expect all the world to buy our surplus products is utterly absurd. Being out of our jurisdiction our laws can not force them to do it. Heretofore our vast area of public lands have brought to us annually a great concourse of immigrants constantly swelling our population and thereby enlarging the market for our productions. This to a great extent accounts for our past prosperity, but it is nearly at an end. Our public lands are rapidly passing into private hands—nearly all of the most desirable of them have been occupied. Naturally this vast swarm of immigrants will diminish, whilst the powers of production, constantly increasing, will make the surplus, day by day, far greater than the home demand. It is largely ahead of it now.

The South raises 7,000,000 bales of cotton per annum, 5,000,000 of which is surplus. What would she do with it in the home market? The surplus wheat of the West is rarely less than 150,000,000 bushels. Must it rot in the home market alongside of her vast surplus of meat and corn?

Then what will be done with it? Practically the manufacturers are answering the question every day. Whenever they find themselves with more on their hands than they can sell in the home market they shut down their works and turn their laborers into the streets. They stop production. To enable them to do this effectively all those engaged in the manufacture of the same article enter into combinations which they call "trusts," by which each one agrees under penalties to obey the orders of the "trust," to sell only at certain prescribed prices, to produce only so much or to stop production altogether, as may be decreed.

Meantime the consumer, finding prices at home put up on him, is not permitted to buy abroad by the tariff, must pay whatever prices are demanded of him for his supplies, and must sell his own productions in glutted markets at home. Thus is the American farmer situated by the beauties of this home-market theory which he is invited to support. Before him stands that high Chinese wall which excludes him from the outer world; behind him stand the trusts armed with corporate powers to inflict penalties upon any treacherous member who shall offer to sell him anything below the regulation price! The fact that any of them still hold the title deeds to their farms, still have decent clothing for their families and sufficient implements for their business, designate them as being special favorites of the gods, who have stamped them with the unmistakable marks of immortality.

In the matter of reduction of tax upon distilled spirits the tender mercies of the majority have only been awakened, as usual, for the benefit of the manufacturers. Alcohol used in the arts, as it is euphoniously expressed, is to be relieved of all tax. These "arts" are principally practiced by quacks, medical pretenders, and compounders of cosmetics, hair dyes, tinctures, and what are known to the world, especially undertakers, as patent medicines. The door for the entrance of fraud which is here opened is as much wider than that which they claim is opened by ad valorem duties on imports as is the Gulf of St. Lawrence than the Gut of Canso.

But it makes all the difference in the world who benefits by the fraud and who loses. Ad valorem frauds were supposed to benefit the importer to the loss of the home manufacturer, but when these were changed to compound duties and multiform classifications, by which the fraud was shifted and inured to the profit of the home manufacturer, the situation is pronounced satisfactory. So in this case the possibility of fraud is admitted, but inasmuch as it inures to the benefit of those "interested parties" who are waiting now to judge of our amendments, it was thought wise to remove the tax and risk the consequences. As to the provisions of the House bill which were intended to mitigate in some degree the harsh features of our internal-revenue laws, which are so much complained of by the small operators in distillation in many parts of our country, the stern regard of the majority for the rights of the Treasury has proven incorruptible.

Section 36 of the House bill provided that the Secretary of the Treasury might permit every farmer to distill his apples, peaches, and grapes free from all the regulations and exactions of the law except simply the payment of the tax. The substitute says no, let him comply with all the manifold and expensive red-tape of the law or let his fruit rot upon the ground, which it mostly does to his loss and that of the Government. The same section provides that the Secretary of the Treasury and the Commissioner of Internal Revenue may in their discretion permit all small distillers of grain, consuming less than 25 bushels per day, to operate free from all restrictions except the payment of the tax which shall be assessed on the capacity of their distilleries.

The substitute refuses to allow this, on the ground that it opens the

door to fraud. Between the lines, it is not intended for the benefit of manufactures. Section 37 of the House bill provides that fruit brandy may be placed in warehouses, and the tax paid thereon when taken out for removal just the same as other spirits. Why not? But the substitute says no—the farmer who distills his fruit shall pay the tax as the brandy comes from the worm. The professional distillers alone shall have the privileges of a Government warehouse. Section 38 of House bill provides that when the distillery apparatus of a small distiller is seized for any violation of law it shall not be destroyed, but shall be sold as provided by existing law. The substitute says No! The property shall be destroyed whenever seized, though there may have been no legal adjudication of the guilt of its owner.

Section 39 of House bill provides that whenever it shall be made to appear to the satisfaction of the judge having jurisdiction that the health or life of any person confined in prison for any offense against these laws is endangered by such close confinement, the judge may release him upon bail or make any order necessary for his comfort and well-being. The substitute says No, let him suffer or die.

In sections 29, 30, and 31 of House bill, it is humanely provided, respectively, that the minimum of punishments provided by statute for offenses shall be repealed, leaving it to the discretion of the judge who acquaints himself with all the circumstances to say what punishment shall be inflicted; and that no warrants of arrest shall be issued upon affidavit of charges upon mere information and belief except by the regular officers of the law, and further provide that no fees shall be paid except where the defendant is convicted or the prosecution shall have been approved by the district attorney of the United States. And further, that all warrants of arrest for offenses against the United States laws shall be returnable before some judicial officer residing in the county of arrest, or if there be none such in that county, then in the county nearest the place of arrest. And lastly it is provided by section 33 (House bill) that the Commissioner of Internal Revenue and the Secretary of the Treasury may compromise cases and reduce or remit any fines, penalties, forfeitures, or assessments under internal-revenue laws. All of which moderate and reasonable provisions in behalf of the small distillers and farmers of the country, the majority indignantly reject. They are too small and humble to secure the attention of those intellects who have been so long struggling to—

Secure the proper relation between the rates imposed upon the numerous articles produced in our related and interdependent industries.

But as they had no time to give to the poor and the humble in the solving of this great problem in customs duties, of course they had none to bestow upon the farmer who distills 100 bushels of apples, or to consult the interest of any of the small fry who are affected by internal-revenue laws. It is a pity; but let us hope there is still justice abroad in the land which will some day be felt.

The attempt to characterize the House bill as sectional in its character because more articles of Northern production are affected by its reductions than of Southern production, is, to say the least, ridiculous. A table is furnished by the committee to show this. Of course nine-tenths of the manufactured products of the United States being made in the northern portion, the duties on which are complained of, necessarily the reductions affected the North more than the South. How could it be otherwise? If it were possible to reduce tariff duties with any show of justice or propriety *sectionally*, it could still be shown that the House bill does not reduce upon articles of Northern production disproportionately. The very reverse would be the fact, and is the fact. Largely over one-half of the proposed reduction by the substitute is made upon sugar, which is a purely Southern product; and rice, also grown in the South, and tobacco, which is mainly a Southern product. And it will not be pretended for a moment that of the productions which are subjects of Federal taxation the South makes anything like near one-half.

I have an abiding hope and belief that our countrymen will not be deceived by any of these proceedings with reference to reducing taxes. For the last ten years the Democratic party has made an honest and persistent effort to reduce them to the necessities of the Government, at every step of which they have been thwarted by the Republican party. They have never at any time had the power to reduce these taxes, for they have not had the possession at any one time of both branches of the legislature and the Executive.

The committee acknowledge in their report the imperious necessity of this reduction, but blame first the President of the United States for the existence of the surplus. They say he could have spent it in paying premiums of $30 on the hundred to their friends the bondholders. It is very true he could, and so he could have squandered it as countless millions have been squandered under the administration of his predecessors, but he did not. They say in the second place that the responsibility rests upon the party in control of the House of Representatives, and that this is the first bill which the House has sent them for reducing revenue in five years.

Nobody will be deceived by this. It is as well known to the country as it is to those Senators who make this assertion, that almost the entire body of the Republican minority in the House have resisted every bill which the Democrats have tried to pass within that period, and that they were able by the help of a handful of Democrats to defeat every bill for reducing taxes, and they know further that these few Democrats who aided them to defeat tariff reduction were applauded to the skies by them and made brevet patriots and moral heroes. They know further, and so does the country, that for ten years past no Republican in the House of Representatives, certainly no considerable number of them, has so much as proposed a bill to reduce tariff taxes.

Many of them have indeed, there as well as here, admitted the necessity of reduction; there is no complaint of the liberality of their admissions in this respect, but during the time which I have been a member of this body I can safely say that no Republican in either House, so far as my recollection goes, has made a bona fide movement to reduce any taxes in the maintenance of which the manufacturers of this country were interested. I challenge a contradiction of this. The result of every step or movement toward a change in the schedules has been an increase, and if anything was lowered it was by accident or oversight.

Now, the moderate propositions of the House bill—which could become a law in twenty-four hours if this Senate would agree to it—are met by a counter proposition which, it is admitted, can not become a law at this session of Congress, which is intended for delay, and which, if adopted, would leave most of the taxes which are complained of in full force and increase many of them. The House bill, on the contrary, is framed not only to relieve the Treasury, but to relieve the people, whilst this substitute is framed so as to relieve the Treasury and increase the burdens of the people. That is the difference between the two.

Mr. ALDRICH. I do not intend to try to answer any portion of the argument of the Senator from North Carolina, but I wish merely to call his attention to a misstatement in regard to the provisions of the substitute reported by the Finance Committee, which he was inadvertently led into, I imagine, by a misprint in the list of articles placed on the free-list. He stated that we had placed opium for smoking upon the free-list. If he will examine the measure as printed, he will find that we have not only not placed it upon the free-list but we have absolutely prohibited its importation. We have not placed it upon the free-list.

Mr. VANCE. Was that in the draught as it was first submitted to the committee?

Mr. ALDRICH. Never has it been in the bill in any other form except as an absolute prohibition of its importation.

Mr. VANCE. It is possible I may have been mistaken.

Mr. ALDRICH. I just want to call attention to that one error of fact at the present moment.

Mr. VANCE. I do not believe it is an error. I shall look into it, and if I find I have made an error I shall correct it. I believe it is so placed on the free-list by omission.

Mr. HISCOCK obtained the floor.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. T. O. TOWLES, its Chief Clerk, announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 7788) to establish a new land district in the State of Mississippi; and

A bill (H. R. 11042) for the relief of Motier Howe.

The message also announced that the House had passed the bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President *pro tempore:*

A bill (S. 869) for the relief of the sufferers by the wrecks of the United States steamer Tallapoosa;

A bill (S. 1856) to establish a life-saving station on the Atlantic coast between Indian River Inlet, Delaware, and Ocean City, Md.;

A bill (S. 3234) to abolish circuit court powers of certain district courts of the United States, and for other purposes;

A bill (S. 3390) to create the Lincoln land district in the Territory of New Mexico;

A bill (S. 3573) granting the right of way to the Pensacola and Memphis Railroad Company over and through the public lands of the United States in the States of Florida, Alabama, Mississippi, and Tennessee, and granting the right of way to said railroad company over and through the United States naval and military reservations near Pensacola, in the State of Florida; and

A bill (H. R. 7516) to increase the pension of Sylvester Stearns.

MRS. MARY M. ORD.

The SPEAKER *pro tempore* laid before the Senate the amendment of the House of Representative to the bill (S. 2663) granting an increase of pension to Mrs. Mary M. Ord.

The amendment of the House of Representatives was in line 5, before the word "dollars," to strike out "one hundred" and insert "seventy-five."

Mr. DAVIS. I move that the Senate concur in the amendment of the House of Representatives.

The amendment was concurred in.

JOSEPH FENNO, DECEASED.

The PRESIDENT *pro tempore* laid before the Senate the amendment of the House of Representatives to the bill (S. 1190) for the relief of Joseph Fenno, deceased.

The amendment of the House of Representatives was, in line 9, to strike out "Busby" and insert "Fenno."

Mr. JONES, of Arkansas. I move that the Senate concur in the amendment of the House of Representatives.

The amendment was concurred in.

RAILROAD THROUGH HOT SPRINGS RESERVATION.

The PRESIDENT *pro tempore* laid before the Senate the amendments of the House of Representatives to the bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas.

The amendments of the House of Representatives were on page 2, line 26, before the word "years," to strike out "two" and insert "three;" and in page 2, line 27, after the word "act," to add:

Provided, That this condition as to construction within three years shall be construed as a condition precedent to the grant herein made, and in case of failure to so complete said road as provided, such failure shall of itself work a forfeiture of all rights hereunder.

Mr. BERRY. I move that the Senate concur in the amendments of the House of Representatives.

The amendments were concurred in.

HOUSE BILLS REFERRED.

The following bills, received from the House of Representatives, were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (H. R. 2236) granting a pension to Eli J. Yamgheim;
A bill (H. R. 2702) granting a pension to Mary Ann Shook;
A bill (H. R. 2707) granting a pension to Baker Saine;
A bill (H. R. 3608) to grant an increase of pension to William E. Prince;
A bill (H. R. 4648) granting a pension to Jemima Sterling;
A bill (H. R. 4887) granting a pension to Charles E. Scott;
A bill (H. R. 5751) for the relief of Margaret M. Hatch;
A bill (H. R. 7887) granting an increase of pension to Jonathan C. Harrison;
A bill (H. R. 8521) for the relief of William A. Mathes;
A bill (H. R. 8549) granting a pension to Louisa Rogers;
A bill (H. R. 10199) for the relief of William E. Springstein; and
A bill (H. R. 10515) to increase the pension of William Gallagher.

The following bills were severally read twice by their titles, and referred to the Committee on Claims:

A bill (H. R. 1156) for the relief of Miles F. West;
A bill (H. R. 2896) for the relief of the heirs of John R. Treutlen;
A bill (H. R. 3765) for the relief of James Devine;
A bill (H. R. 5480) for the relief of John Iredell Meares;
A bill (H. R. 7151) for the relief of A. N. Kimball and sureties on his official bond as receiver of public moneys;
A bill (H. R. 9211) for the relief of Jesse Durnell;
A bill (H. R. 9297) for the relief of James Sims; and
A bill (H. R. 10099) for the relief of Melchisedec Robinson.

The following bills were severally read twice by their titles, and referred to the Committee on Military Affairs:

A bill (H. R. 338) to clear the military record of J. George Ruckstuhl;
A bill (H. R. 2025) to place William J. Lowell on the rolls of the Arkansas Volunteers;
A bill (H. R. 3721) authorizing the President to appoint William English an officer in the regular Army of the United States; and
A bill (H. R. 11165) for the relief of John Gray.

The following bills were severally read twice by their titles, and referred to the Committee on Indian Affairs:

A bill (H. R. 4489) for the relief of J. M. Hogan; and
A bill (H. R. 5043) for the relief of the Stockbridge and Munsee tribe of Indians, in the State of Wisconsin.

The following bills were severally read twice by their titles, and referred to the Committee on Public Lands:

A bill (H. R. 7788) to establish a new land district in the State of Mississippi; and
A bill (H. R. 11042) for the relief of Motier Howe.

The bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln, was read twice by its title, and referred to the Committee on Commerce.

The bill (H. R. 246) for the relief of J. W. Patterson, was read twice by its title, and referred to the Committee on Post-Offices and Post-Roads.

J. W. PARISH & CO.

The bill (H. R. 9718) for the relief of J. W. Parish & Co. was read twice by its title.

Mr. MITCHELL. There is a similar Senate bill which was reported from the Committee on Claims. Unless there is objection, I suggest that the House bill lie on the table.

The PRESIDENT *pro tempore*. It will be so ordered, if there be no objection. The bill will lie on the table.

EXECUTIVE SESSION.

Mr. HISCOCK. Mr. President——

Mr. PLATT. I wish to inquire whether the Senator from New York desires to go on this evening?

Mr. HISCOCK. I should prefer to go on in the morning.

Mr. COKE. The Senator from New York having the floor, I ask him to yield to me for a motion to go into executive session.

Mr. HISCOCK. I yield for that purpose.

Mr. COKE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 12 minutes spent in executive session the doors were reopened, and (at 4 o'clock and 47 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, October 9, 1888, at 12 o'clock m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate October 8, 1888.

TERRITORIAL JUDGES.

Louis W. Crofoot, of Dakota Territory, to be associate justice of the supreme court of the Territory of Dakota for the seventh judicial district.

Charles F. Templeton, of Dakota Territory, to be associate justice of the supreme court of the Territory of Dakota for the eighth judicial district.

COMMISSIONER OF INDIAN AFFAIRS.

John H. Oberly to be Commissioner of Indian Affairs.

COLLECTOR OF CUSTOMS.

Edward D. Linn, of Texas, to be collector of customs for the district of Saluria, in the State of Texas.

HOUSE OF REPRESENTATIVES.

MONDAY, *October* 8, 1888.

The House met at 12 o'clock m. Prayer by Rev. J. H. CUTHBERT, D. D.

The Journal of Friday's proceedings was read and approved.

FORT WALLACE RESERVATION.

The SPEAKER laid before the House the bill (S. 3597) to provide for the disposal of the Fort Wallace military reservation in Kansas.

Mr. TURNER, of Kansas. I ask unanimous consent for the present consideration of the bill. If the House will hear me but a moment I do not think there will be any objection to its passage. A bill passed the House after consideration some time ago, passed the Senate also, and was indorsed at that time by the Secretary of the Interior, and went to the President. The President, however, found that the survey of a certain 40 acres that is provided for in this bill conflicted with the surveys that had been made, and therefore vetoed the bill. In consultation with the Secretary of the Interior he informed me that they were willing, in fact in favor of the passage of the bill, but wanted the second section amended, so as to allow the Secretary of the Interior to cause a resurvey of that 40 acres in order to overcome the difficulty that presented itself in the original bill. For that reason I ask for the present consideration of the bill. It has already passed the Senate without objection.

The bill was read at length.

The SPEAKER. Is there objection to the present consideration of the bill? The Chair hears none.

The bill was ordered to a third reading, and it was accordingly read the third time, and passed.

Mr. TURNER, of Kansas, moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:
To Mr. LAFFOON, indefinitely, on account of important business.
To Mr. MCCLAMMY, on account of important business.
To Mr. SMITH, of Wisconsin, on account of important business.
To Mr. BAYNE, for Monday and Tuesday, October 8 and 9.
To Mr. MORGAN, on account of important business.
To Mr. NEWTON, an indefinite extension of his leave.
To Mr. CLARK, indefinitely, on account of important business.

WAREHOUSING FRUIT BRANDY.

Mr. MCMILLIN. I ask unanimous consent to discharge the Committee on Ways and Means from the further consideration of the bill (S. 70) to provide for warehousing fruit brandy, and in doing so I will

make a statement concerning the subject. It is a bill, the substance of which is included in the bill that was passed by the House, and I believe that that portion of it is recommended by the Senate, granting authority for the bonding of spirits distilled from fruits, and it is approved by the Treasury Department. My reason for calling it up now is because if it is not passed now it will be of no benefit to those engaged in that industry this year, because there is no hope that general legislation on that subject can be passed in time to afford relief this year. I will state also that I submitted the proposition to the gentleman from Pennsylvania, Judge KELLEY, and the gentleman from Indiana, General BROWNE, who were the only members of the committee on the other side of the House in the city. I also have the authority of the Democratic members, and I think there is no objection to it from any source. It is but a matter of justice.

Mr. MCKENNA. I did not hear the gentleman's explanation.

Mr. MASON. I would like to ask what is the purport of the bill?

Mr. MCMILLIN. The bill is to extend the act entitled "An act relating to the production of fruit brandy and to punish frauds connected with the same."

Mr. MASON. I simply state that I will not raise any technical objection, but simply wish to reserve the right to vote and speak against the measure.

The bill was read, as follows:

Be it enacted, etc., That the provisions of an act entitled "An act relating to the production of fruit brandy, and to punish frauds in connection with the same," approved March 8, 1877, be extended and made applicable to brandy distilled from apples or peaches, or from any other fruit the brandy distilled from which is not now required or hereafter shall not be required to be deposited in a distillery warehouse: *Provided*, That each of the warehouses established under said act, or which may hereafter be established, shall be in charge either of a storekeeper or of a storekeeper and gauger, at the discretion of the Commissioner of Internal Revenue.

The SPEAKER. Is there objection to the Committee on Ways and Means being discharged from the further consideration of the bill, and to its consideration at this time? The Chair hears none.

Mr. HITT. I ask to have the bill reported again.

The bill was again reported.

Mr. MASON. It is a Senate bill.

Mr. MCMILLIN. It is a Senate bill and passed the Senate unanimously, I am informed.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. MCMILLIN moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

Mr. MCMILLIN. I ask to have printed in the RECORD the Senate report, which sets out more fully the reasons for the passage of the bill than I did in my statement.

There was no objection.

The report (by Mr. VANCE) is as follows:

The Committee on Finance, to whom was referred the bill (S. 70) to provide for warehousing fruit brandy, have had the same under consideration, and report:

The law relating to the warehousing of grape brandies was passed in order to grant privileges to producers whose necessities were identical at that time with those of the producers of brandies now derived from other fruits. The object of this law originally was to enable distillers of grape spirits to keep in bond, without paying tax, for three years, their products until they should be sufficiently matured for the market. Prior to the passage of this law the distillers of grape spirits were required to pay the internal-revenue tax on the same at the time of distillation. This requirement of law imposed such onerous duties upon producers that many were prevented from utilizing wines which were useful only for distillation, or which constituted surplusage in the market on account of the heavy burden imposed upon them. Only a few who commanded sufficient capital were able to pay this tax at that time, as they were compelled to hold such goods sometimes for a considerable period in order to mature them for consumption.

At that time vine-growers, especially in California, were much disheartened, and in some cases were uprooting their vines and in many cases also were throwing away or destroying their wine products which could not be otherwise utilized. The practical value of the law which was passed to enable them to place their brandies in special bonded warehouses was speedily demonstrated; the interests of vine-growers immediately revived; instead of uprooting vines more were planted; many distilleries were established, and the market now is well supplied with choice and well-matured products. Distillation of brandies from fruit enables the producer to utilize material which may fail to find profitable markets otherwise. It enables the vine-grower to obtain profit from inferior goods which are not equal in quality to standard articles, and also to derive some benefit from such waste substances as are left over after expressing grape-juice from skins, seeds, and other residuum of the wine-press.

Practically the same necessities now prevail in all fruit-growing districts. Large quantities of many kinds of fruit, more especially apples and peaches, are being utilized through distillation, but owing to the fact that no bonding privileges are extended to this class of products there is not only great hardship experienced from the levying of the internal-revenue tax upon the same, but also great incentive to fraud. It has been observed also that where the tax on spirits intended for consumption is levied and collected at the time the goods are first produced, the excessive cost of the same, owing to the imposition of the tax, causes holders to force them upon the market long before they are matured and fit for use as beverages. It is therefore greatly to the interest, not only of the producer and the Government, but also of the consumer, that this bill extending these bonding privileges to the producers of fruit brandies should be enacted into law. As a means to prevent fraud it would certainly result in an increase of public revenue, and is therefore, properly speaking, a revenue measure.

This measure passed the Senate in the last Congress (Forty-ninth), and your committee again recommend its passage.

COL. JAMES C. DUANE.

Mr. HERMANN. I ask unanimous consent for the present consideration of the bill (S. 45) for the relief of James C. Duane.

The bill was read, as follows:

Be it enacted, etc., That the sum of $648, lawful money, be, and is hereby, appropriated, out of any moneys in the Treasury not otherwise appropriated, to reimburse Col. James C. Duane, brevet brigadier-general, United States Army, for losses incurred in his office as engineer of the third light-house district through the forgeries committed by a clerk in his office, Henry J. Buete (who has fled the country), in raising his official checks to amounts greater than those for which they were drawn and signed, between the 1st day of January and the 23d day of June, 1879, without any negligence or fault on the part of said Col. James C. Duane.

There was no objection.

Mr. HERMANN. Mr. Speaker, this is a most worthy claim. It has been long delayed, but at last, I hope, justice will be done to one of the most conscientious, gallant, and laborious officers of the Army. The amount involved is only $648, and I call up this claim now, as I have frequently endeavored to do many times before, although the general is not a constituent of mine; and to do this I lay aside claims of my own constituents in order that this bill may be considered. As the report so fully shows, General Duane was detailed as engineer for the third light-house district on Staten Island, New York, in 1879, and during that service a clerk in his employ, with most systematic and remarkable cunning, forged and raised certain checks and vouchers for small amounts for laborers and material men's accounts for light-houses, and through which increased sums were fraudulently inserted, and General Duane was held responsible and actually paid the fraudulent sums in the settlement of his accounts. The Light-House Board recommended to the Treasury Department its repayment, and the Secretary of the Treasury recommended its payment to Congress, or rather submits the first recommendation to us, and I can assure gentlemen that, after a most careful and thorough examination, no blame attaches to the general; but every consideration of justice and equity warrants a return payment to him, and I trust the bill will pass.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. HERMANN moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

LINCOLN, NEBR., A PORT OF DELIVERY.

Mr. RICE. I ask unanimous consent to take from the House Calendar and put on its passage now the bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

The bill was read, as follows:

Be it enacted, etc., That Lincoln, in the State of Nebraska, be, and is hereby, constituted a port of delivery in the customs collection district of New Orleans, and that the privileges of the seventh section of the act approved June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," be, and the same are hereby, extended to said port. And that there shall be appointed at said port a surveyor with compensation at $250 per annum and the usual fees.

There being no objection, the House proceeded to the consideration of the bill, which was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. RICE moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ADAM L. EPLEY.

Mr. EZRA B. TAYLOR. I ask unanimous consent that the Committee on Claims be discharged from the further consideration of the bill (S. 1137) for the relief of Adam L. Epley, and that the bill be now considered.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to pay to Adam L. Epley, the son and only heir of John D. Epley, deceased, late a private in Company F, One hundred and fifty-third Regiment Ohio Volunteers, the arrears of pension due or allowable at the time of his death, and heretofore authorized to be paid the said John D. Epley, now deceased, under pension certificate No. 296437.

There being no objection, the Committee on Claims was discharged from the further consideration of the bill, and the House proceeded to its consideration.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. EZRA B. TAYLOR moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

HENRY LECOMTE.

Mr. TILLMAN. On behalf of the Committee on Military Affairs, I ask unanimous consent that the committee be discharged from the further consideration of joint resolution S. R. 112, and that the resolution be now taken up for immediate consideration.

The resolution was read, as follows:

Joint resolution (S. R. 112) authorizing the Secretary of War to receive for instruction at the Military Academy at West Point Henry Lecomte, of Switzerland.

Resolved by the Senate and House of Representatives of the United States of America

in Congress assembled, That the Secretary of War be, and he hereby is, authorized to permit Henry Lecomte, of Switzerland, to receive instruction at the Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby: *And provided further*, That in the case of the said Lecomte the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The SPEAKER. Is there objection to the present consideration of this joint resolution?

Mr. ROGERS. Reserving the right to object, I would like to hear some explanation of the matter.

Mr. TILLMAN. This is simply a matter of international courtesy which has been often practiced by our Government toward foreign countries, and by them toward us. The object of the resolution is simply to allow the son of a distinguished Swiss officer, who served with honor in our Federal Army during the civil war, and who is now a colonel in the Swiss army, to educate his son at the West Point Academy at his own expense.

Mr. ROGERS. That explanation is all that I care for.

Mr. FULLER. One word. What does the gentleman mean when he says, "at his own expense?" Will this young man pay for his own rations, clothing, and everything of that sort?

Mr. TILLMAN. Yes, sir. I hold in my hand a letter from the Secretary of State, transmitting a letter from the representative of the Swiss Government to this country asking this courtesy. Several times American youths have graduated at the great military academy of France, at St. Cyr; and only a short time ago an American cadet graduated with the highest honors at the English military academy at Woolwich. The granting of international courtesy in this way is, as I have remarked, a very common thing; but in order to satisfy gentlemen I will ask that the letter of the Secretary of State and that of the Swiss minister be read.

Mr. FULLER. All I wish to say is this: If there is to be any expense to the Government connected with this matter, I desire to object; for we have scores of American youths who would be very glad to receive education at the Military Academy.

Mr. TILLMAN. There will be no expense except the little that may arise from the fact of one more student receiving tuition and quarters, which amounts to practically nothing.

Mr. HITT. I will ask the gentleman whether there are not at West Point to-day several students from foreign countries whose admission has been authorized in this manner?

Mr. TILLMAN. Certainly; and I am astonished that any member should intimate an objection. These evidences of international courtesy are extended, I believe, by all civilized nations to each other; and there certainly should be no hesitation when it is proposed that the United States grant such a courtesy to the sister Republic of Switzerland, which has no military academy of its own.

There being no objection, the Committee on Military Affairs was discharged from the further consideration of the joint resolution, and the House proceeded to its consideration.

The joint resolution was ordered to a third reading, and it was accordingly read the third time, and passed.

Mr. TILLMAN moved to reconsider the vote by which the joint resolution was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

The SPEAKER. The gentleman from South Carolina [Mr. TILLMAN] will please obtain from the committee-room and furnish to the Clerks the original engrossed copy of the Senate bill.

Mr. TILLMAN. Certainly I will do so, Mr. Speaker, and would have sent it to your desk instead of the printed copy, but I had just entered the Hall when I heard a motion for the regular order called, and I resolved to push the consideration of even a printed copy of the resolution to-day, because I have been waiting patiently and begging for a week to bring this matter up and I determined to beg no longer, but to object to everything and call a quorum till I succeeded in passing it, as I have long since become convinced that while the best method of getting anything out of a woman is to beg, the best way to obtain a favor or even justice from a man is to fight. [Laughter.]

J. W. PATTERSON.

Mr. PETERS. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (H. R. 246) for the relief of J. W. Patterson, and put it upon its passage.

The bill was read, as follows:

Be it enacted, etc., That the proper accounting officers of the Treasury be, and they are hereby, authorized and required to pay to J. W. Patterson, late postmaster at Humboldt, Kans., the sum of $2,634.23, of which said Patterson was robbed on or about September 20, 1870, and which he has accounted for to the Government; said robbery having occurred without neglect or other fault on the part of said Patterson.

The committee recommend the adoption of the following amendment:

Strike out "$2,634.23" and insert "$617.73."

There being no objection the bill was considered, the amendment adopted, and the bill as amended ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. PETERS moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

NICKOLAS LEUSCHEN AND OTHERS.

Mr. BRECKINRIDGE, of Kentucky I demand the regular order.

Mr. SCOTT. I hope the gentleman will yield to me for a moment to ask consent to pass a bill.

Mr. BRECKINRIDGE, of Kentucky. I will hear the gentleman's request.

Mr. HAUGEN. I demand the regular order.

Mr. SCOTT. This bill is in the interest of a poor sailor; it carries no appropriation. The man served four years during the war——

Mr. HAUGEN. I withdraw the objection.

Mr. SCOTT. Then, Mr. Speaker, I ask unanimous consent to concur in the Senate amendments to the bill (H. R. 4601) to amend the naval record of Nickolas Leuschen, Peter Leuschen, and Loth Possum.

I will state that this bill passed the House of Representatives in this session by unanimous consent. It went to the Senate and was there verbally amended, which did not affect the bill. It passed the Senate with the amendment, and is now on the Speaker's table. I merely ask to concur in the Senate amendment.

There being no objection, the Senate amendment was considered and concurred in.

ANTHONY L. WOODSON.

Mr. STONE, of Kentucky, submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8962) for the relief of Anthony L. Woodson, of Woodsonville, Ky., having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment to said bill and agree to the same with an amendment as follows: Strike out the amount "$3,666.20" and insert "$1,130.40." Strike out all after the word "use," in line 9, the following words: "And the further sum of $2,300, being the value of engineer stores taken in the same way for the construction of forts, stockades, etc., at or near Mumfordsville, Ky.," to which the Senate agree.

W. J. STONE,
J. M. BROWER,
T. R. STOCKDALE,
Managers on the part of the House.

JOHN C. SPOONER,
JAMES K. JONES,
JOHN H. MITCHELL,
Managers on the part of the Senate.

The following statement by the House conferees accompanied the conference report:

The bill as it passed the House appropriated $3,666.20 for quartermaster's stores and $2,300 for material used in building fortifications. The Senate struck out the $2,300, thus declining to pay for the engineer stores. The committee of conference find that in addition to the amount allowed for quartermaster stores, fencing was used for fires by the troops to the amount of $434.20 in value, thus making $1,130.40 agreed on by the committee.

The report was agreed to.

Mr. STONE, of Kentucky, moved to reconsider the vote by which the report was agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

WILLIAM H. CAYCE.

Mr. WHEELER. I submit the following privileged report from the Committee on Public Lands. I am instructed to report back this resolution, and recommend its adoption.

The Clerk read as follows:

Resolved, That the Secretary of the Interior is hereby requested to transmit to this Congress all the papers and records in the case of St. Louis, Iron Mountain and Southern Railroad *vs.* William H. Cayce, in contest concerning 120 acres of land in Miller County, Arkansas, to the end that the action taken by the Forty-fifth Congress June, 1878, be called up and be reviewed by this Congress, wherein said land was declared to be public land of the United States and subject to pre-emption entry, and that pending said review by Congress the Secretary of the Interior be requested to take no further action in the case of said lands.

The SPEAKER. The gentleman from Alabama sends up the printed resolution. He will please furnish the clerks with the original engrossed resolution during the day.

Mr. WHEELER. I will do so.

The resolution was adopted.

Mr. WHEELER moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

BRIG. GEN. ABSALOM BAIRD.

Mr. HITT. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the joint resolution (S. R. 59) authorizing Brig. Gen. Absalom Baird, United States Army, to accept from the President of the French Republic a diploma conferring the decoration of Commander of the National Order of the Legion of Honor.

The SPEAKER. The joint resolution will be read, subject to objection.

The joint resolution is as follows:

Resolved, etc., That Brig. Gen. Absalom Baird, of the United States Army, is hereby authorized to accept from the President of the French Republic a diploma conferring upon him the decoration of Commander of the National Order of the Legion of Honor.

The report (by Mr. HITT) is as follows:

The Committee on Foreign Affairs, to whom was referred the joint resolution (S. R. 59) authorizing General Baird to accept from the President of the French Republic a diploma conferring the decoration of Commander of the Legion of Honor, beg leave to submit the following report, and recommend its adoption:

Last year the French Government invited the President of the United States to send two officers of our Army to France to witness certain maneuvers, on a grand scale, of the French army, to take place in the following September.

Similar invitations have been extended annually by France to this Government as to those in Europe; and it has been the custom of the great European powers to always send officers of distinguished reputation and abil ty, and also high rank, whose name and position naturally designated them as fit representatives of powerful countries.

With us the custom has been different, and our Government has restricted its selections to officers, without much regard to their rank, who happened to be on leave of absence in France at the time appointed for the grand maneuvers.

Our Government has therefore been represented by officers much inferior in age and rank to those representing other countries, which has sometimes caused embarrassment to the French Government in its desire to pay us the compliments that our position among nations warrants and the friendly disposition of the French Republic made it most willing to offer.

To remove this source of embarrassment, General Sheridan recommended the selection of officers of high rank, and the President appointed for this duty of representing our Army at the grand maneuvers in France, Brig. Gen. A. Baird, Inspector-General, and Maj. Henry C. Hasbrouck, Fourth Artillery, commandant Military Academy.

The gratification of the French Government at the action of our own, in designating a general officer of the rank and reputation of General Baird, was shown in many ways; by the marked and formal courtesy with which he was received and treated, and the facilities afforded him during the maneuvers, which were witnessed by about sixty representatives of different governments, eight of whom were general officers.

To a number of these representative officers, including General Baird, of high rank and distinguisned personal history, the French Government gave the diploma of a Commander of the Legion of Honor, as an expression of the friendly feeling of the French Government for our Republic, and its action in sending a general officer of such reputation and experience, and as a recognition of the achievements and character of General Baird.

This diploma is usually given by the French Government to encourage high endeavor in every honorable pursuit, but chiefly military. It is given to the man who writes a great book, or discovers a great invention, but especially to one who is distinguished as a soldier.

Your committee see no reason why this expression of friendship for the United States and its representative by the French Government should be refused by this Republic alone among all those governments to whose representatives similar diplomas were accorded, and therefore recommend that the resolution granting permission to General Baird to accept the diploma be adopted.

HEADQUARTERS ARMY OF THE UNITED STATES,
Washington, D. C., June 9, 1887.

SIR: In response to the polite and gratifying invitation of the French Government, conveyed by their minister in this country through the Secretary of State, for our Government to send two Army officers to witness certain maneuvers on a grand scale of the French Army, which are to take place in September next, I have the honor to recommend to the President that Brig. Gen. A. Baird, Inspector-General, and Maj. Henry C. Hasbrouck, Fourth Artillery, commandant of cadets at the Military Academy, be selected to represent our Army and sent to France for this purpose.

General Baird was not long ago appointed as Inspector-General of the Army in consequence of his eminent merit and the distinguished services he has rendered, both in the field during the war and in the more routine matters pertaining to his profession, and his worth as a man and efficiency as a soldier mark him as a fit representative of our Army.

Major Hasbrouck has also a fine record in the field, and for the past five years has rendered valued service as commandant of cadets at the Military Academy, and by virtue of that position and his professional abilities has been the officer to whom all questions upon tactics have been submitted and whose decisions have been adopted as the ruling for the Army. It is ultimately my intention to appoint him as president of a board to revise the tactics for our service, and the experience which he can, if detailed, now gain abroad in witnessing the maneuvers of very much larger bodies of men than can be brought together in this country would be of inestimable value in this connection.

The French Government has annually extended these invitations to this nation and to those of Europe. From the foreign countries it has always been the custom to send officers of distinguished reputation and ability and also of high rank, whose name and position naturally designated them as fit representatives of powerful contries.

With us the custom has been different, and, influenced by what has all the appearance of the melancholy attending great poverty, we have restricted our selections to some of those officers, without very much regard to their rank, who happened to be on leave of absence in France at the appointed time. This has resulted in causing our Government to be represented by officers much inferior in age and rank to those going from other countries, and the French Government, in its desire to pay to us the compliments that our position among nations warrants, has been much embarrassed in the entertainment of our chosen representatives. It is within our power to remove this source of embarrassment, and I think that courtesy to the French nation requires such action on our part, and we can reach this end by selecting officers of the rank I have recommended.

Our Army, it is true, numbers but 25,000 men, but it is the army of a nation of 60,000,000 people, and as good an army for its numbers as that of any other country on the globe, and its officers are especially distinguished for their ability and integrity.

The limited strength of our military force forms one of the most potent reasons for furthering every measure which will promote its efficiency, and in a time of peace I know no better method of reaching this object than is now offered us in the invitation of the French Government, provided we designate men whose rank, position, training, and powers of observation will enable them to obtain opportunities for the examination of the improved methods abroad and the ability to absorb and explain what they see.

With this object in view no better officers could be chosen than those I have recommended, and I strongly urge that their detail may be ordered.

Very respectfully, your obedient servant,

P. H. SHERIDAN,
Lieutenant-General, Commanding.

Hon. WILLIAM C. ENDICOTT,
Secretary of War.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
Washington, June 27, 1887.

SIR: I have the honor to transmit herewith an order designating you, under an invitation extended by the Government of France, as one of the officers of the United States Army to witness the maneuvers of the French army in September next.

The object in designating officers for this duty is not only to recognize an international compliment, but also to obtain information that will be useful to our own Army.

The Secretary of War desires you to give particular attention to such matters as are not usually given in text-books, and that, as soon as practicable after your return, you prepare and transmit to this office a report of your observations, embodying whatever may, in your judgment, be of value or interest to the military service of the United States.

Very respectfully, your obedient servant,

R. C. DRUM, *Adjutant-General.*

Brig. Gen. ABSALOM BAIRD,
Inspector-General Uni ed States Army, Washington, D. C.

There being no objection, the joint resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. HITT moved to reconsider the vote by which the joint resolution was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

CANCELLATION OF CERTAIN INDIAN PATENTS.

Mr. PEEL, by unanimous consent, from the Committee on Indian Affairs, reported back favorably the bill (S. 3433) authorizing the Secretary of the Interior to accept the surrender of and cancel land patents to Indians in certain cases.

Mr. PEEL. I ask unanimous consent that this report may be now considered, instead of being referred to the Calendar. It is a bill the Secretary feels much interest in.

The SPEAKER. The bill will be read, subject to the right of objection.

The bill was read at length.

There being no objection, the bill was considered, ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. PEEL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

Mr. BRECKINRIDGE, of Kentucky. I demand the regular order.

The SPEAKER. This being Monday, the regular order is the call of States and Territories for the introduction of bills and joint resolutions for reference.

BRIDGES ACROSS THE KENTUCKY RIVER.

Mr. BRECKINRIDGE, of Kentucky, introduced a bill (H. R. 11573) to authorize the construction of bridges across the Kentucky River; which was read a first and second time, referred to the Committee on Commerce, and ordered to be printed.

SUPPRESSION OF INFECTION IN UNITED STATES.

Mr. DOUGHERTY introduced a joint resolution (H. Res. 230) to suppress infection in the interstate commerce of the United States; which was read a first and second time, referred to the Committee on Commerce, and ordered to be printed.

INVESTIGATION OF CERTAIN NATIONAL BANKS.

Mr. MASON. Mr. Speaker, I desire to submit what I believe to be a question of privilege.

The SPEAKER. The gentleman will state it.

Mr. MASON. On the 27th day of August I introduced the following resolution:

Whereas a large sum of money belonging to the United States of America has been loaned to the national banks of this country by direction of the present Administration; and

Whereas said large sums of money have been so loaned to the said banks without interest, thereby giving advantage to such banks over other banks and private individuals not having the use of public funds without interest; and

Whereas, also, it is charged in the public press, upon information and belief, that those national banks are being called upon and requested to contribute to the campaign funds of the national Democratic committee representing the present Administration; and

Whereas it is also charged, upon information and belief, that said banks are contributing large sums of money to said committee in consideration of such deposits without interest, which said contributions should go to the United States Treasury instead of the national Democratic committee; and

Whereas such conduct, if true, on the part of the present Administration and the banks is detrimental to the best interests of the people of the United States and a dangerous practice to establish for the use of public moneys: Therefore,

Resolved, That a special committee of five members be appointed with full and complete power to send for persons and papers, and to investigate the subject-matter herein fully and completely, and ascertain and report to this House, first, the amount of money belonging to the Government of the United States held on special dep sit by the different banks of the country; second, the amount of interest, if any, paid by said banks; third, at whose instance such deposits are made and by what authority of law the same was done; and, fourth, what, if any, contributions have been asked, demanded, or received by the national committee representing the present Administration from the said banks, their agents, officers, directors, stockholders, or employés; the amount asked and received; by whom and to whom paid in each case, and to report the same at as early a date as practicable to this House.

Without caring particularly to discuss it, unless it is desired, I wish to state that under the rules of the House, as I understand it, this resolution should have been reported back within ten days. It was re-

ferred to the Committee on Banking and Currency on the day mentioned. I desire now——

The SPEAKER. Is it a resolution of inquiry?

Mr. MASON. It is a resolution of inquiry, and also asks the appointment of a special committee to investigate the subject-matter therein specified.

The SPEAKER. Under the rules of the House, resolutions of that character are not privileged. The only privileged resolutions are those calling upon the heads of Departments for information.

Mr. MCMILLIN. And I make the further point that the resolution embracing one subject-matter which is privileged and another that is not privileged loses its privileged character by reason of embodying the non privileged matter.

The SPEAKER. The Chair has so decided. If the gentleman desires to have a privileged resolution on the subject, he had better introduce one calling for information simply upon the head of the Department, and not asking an investigation by a special committee of the House.

The rule of the House is explicit upon the subject.

Mr. MASON. If the Chair will permit me a moment, I will state that when I introduced this resolution charging the deposit, for instance of $60,000,000 in national banks without interest, and charging upon information and belief that by reason of these deposits certain sums are being solicited to aid a certain campaign committee, as I understand the rule, I asked for information from the department, and at the same time asked for the appointment of a special committee to ascertain what, if any, contributions or solicitations are being made by the national banks by reason of these deposits. Now, if it is not a question of privilege, I desire to move that the committee be discharged from the further consideration of the resolution, and that it be put upon its passage.

Mr. MCMILLIN. That motion is not in order.

The SPEAKER. That can only be done by unanimous consent. The Chair thought the gentleman's motion was of a privileged character when he asked for recognition.

Mr. MASON. I understood so from other and older members of the House. I now ask unanimous consent [cries of "Regular order!"] that the committee be discharged from the further consideration of the resolution, and that the same be put upon its passage.

Mr. HEARD. Will the gentleman from Illinois yield for a question?

Mr. MASON. Certainly.

Mr. HEARD. Will the gentleman permit an amendment to his resolution in the same line of inquiry.

Mr. MASON. I will permit it.

Mr. MCMILLIN. I demand the regular order.

The SPEAKER. The regular order is demanded, which cuts off amendments and all debate.

Mr. MASON. I desire to know who objects?

The SPEAKER. The gentleman from Tennessee [Mr. MCMILLIN] demands the regular order. This being Monday——

CHANGE OF REFERENCE.

Mr. DOUGHERTY. Mr. Speaker, I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DOUGHERTY. A few moments since I introduced a resolution appropriating $200,000 for the suppression of yellow fever in the interstate commerce and the Chair referred that resolution to the Committee on Commerce; should it not be referred to the Committee on Appropriations?

The SPEAKER. The Committee on Appropriations is not authorized to consider any bills except those making appropriations for the support of the Government, and this resolution by its title proposes to suppress infection in the interstate commerce. But if the gentleman desires to refer it to the Committee on Appropriations the Chair will submit the motion to the House.

Mr. DOUGHERTY. I would state that this resolution, except in the amount to be appropriated, is identical with the one that had been referred to the Committee on Appropriations and reported to the House. Therefore I make the motion.

The SPEAKER. The gentleman from Florida moves to refer the resolution, which he introduced a moment ago to the Committee on Appropriations. If there be no objection, it will be so referred.

There was no objection, and it was so ordered.

ORDER OF BUSINESS.

The SPEAKER. This being the second Monday of the month, the remainder of the day is set apart for the consideration of business from the Committee on the District of Columbia if claimed by that Committee.

Mr. WHEELER. I ask unanimous consent that gentlemen having reports to make be permitted to file them with the Clerk.

There was no objection, and it was so ordered.

FILING OF REPORTS.

The following report was filed by being handed in at the Clerk's desk:

CAMPS FOR YELLOW-FEVER REFUGEES.

Mr. WHEELER, from the Committee on Expenditures in the Treasury Department, reported back favorably the bill (H. R. 11530) to provide camps for yellow-fever refugees; which was referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

DISTRICT BUSINESS.

Mr. HEMPHILL. I will state, Mr. Speaker, that the only business the Committee on the District of Columbia have is such as will invoke some opposition, and in view of the fact that the House is so thin the committee has determined not to ask for the consideration of that business.

ORDER OF BUSINESS.

The SPEAKER. The next business in order is the call of committees, but unanimous consent has just been given that gentlemen having reports to make can file them with the Clerk for reference to the appropriate calendars.

Mr. NELSON. I ask if the resolution of the gentleman from Maine [Mr. MILLIKEN] is not now the unfinished business.

The SPEAKER. There is an hour for the consideration of bills and resolutions. The hour begins at 2 minutes to 1 o'clock.

RAILROAD AT HOT SPRINGS, ARK.

Mr. MCRAE. I call up for consideration the bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservations in the State of Arkansas.

The SPEAKER. The Chair is informed that bill is in Committee of the Whole.

Mr. MCRAE. I move the House resolve itself into Committee of the Whole for the purpose of considering the bill.

The SPEAKER. Is this a private bill?

Mr. MCRAE. It is.

The SPEAKER. Then it is not in order. The rule confines the hour to the consideration of public bills which have been reported by committees on previous days.

YELLOWSTONE PARK.

Mr. MCRAE. Then I call up Senate bill 283.

The SPEAKER. That bill is in Committee of the Whole.

Mr. MCRAE. I move that the House resolve itself into Committee of the Whole for the purpose of considering this bill.

The motion was agreed to; and the House accordingly resolved itself into Committee of the Whole, Mr. RICHARDSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole for the purpose of considering the bill the title of which the Clerk will read.

The Clerk read the title of the bill, as follows:

To amend sections 2474 and 2475 of the Revised Statutes of the United States, setting apart a certain tract of land lying near the headwaters of the Yellowstone River as a public park.

Mr. MCRAE. I move to dispense with the first reading of the bill and that it be now considered by sections.

Mr. EZRA B. TAYLOR. I object. I want to know what the bill is.

The question was put on dispensing with the first reading of the bill; and the Chair announced that the "noes" seemed to have it.

Mr. WHEELER. The bill is very long, and there is but little change from existing law.

Mr. EZRA B. TAYLOR. I want to know what the bill is.

The CHAIRMAN. The Chair will announce that the gentleman has the right to have the bill read, and inasmuch as it is not waived by unanimous consent, the bill will have to be read.

The Clerk proceeded to read the bill.

Mr. EZRA B. TAYLOR (before the reading of the first section was concluded). Mr. Chairman, I wanted to know what change was made by this bill in the boundaries; and having learned that, I withdraw the demand for the further reading.

The CHAIRMAN. Does any member demand the further reading of the bill?

Mr. NELSON. I wish to inquire whether this bill has been before the Committee on Public Lands of the House?

Mr. MCRAE. It has been.

Mr. NELSON. Is it a unanimous report?

Mr. MCRAE. I think it is. There is no minority report; and I think the bill meets the approval of all the members of the committee.

Mr. NELSON. I wish the gentleman would state to what extent the bill changes the boundaries of the reservation.

Mr. MCRAE. It enlarges the reservation. I yield to the gentleman from Alabama [Mr. WHEELER], who will explain the matter.

Mr. WHEELER. This bill makes an enlargement in the reservation to the extent of about 1,600 square miles. It takes off a little strip in Montana Territory and another little strip in Idaho Territory——

Mr. NELSON. Does it enlarge or diminish the reservation?

Mr. WHEELER. It enlarges it, as I have said, about 1,600 square miles.

Mr. NELSON. Is it recommended by any of the Departments of the Government?

Mr. WHEELER. I think that the Department recommended the Senate bill; we have made some amendments in it, but nothing material in the way of additions, except the proviso regarding the railroad; with that exception this is substantially the bill as recommended by the Department.

The CHAIRMAN. The Clerk will finish the reading of the first section.

Mr. HATCH. Before the Clerk proceeds I desire to occupy the floor a few minutes. The gentleman from Arkansas [Mr. MCRAE] yields to me.

Mr. MCRAE. For a few minutes.

Mr. HATCH. I hope the gentleman will not limit me. I shall not occupy any more time than may be necessary.

The CHAIRMAN. The Clerk has not concluded the reading of the first section of the bill.

Mr. HATCH. I desire to occupy time in general debate before the reading of the bill by sections is begun.

The CHAIRMAN. The gentleman will proceed.

Mr. HATCH said: Mr. Chairman, I am sure that under the circumstances the Committee of the Whole will pardon me if I digress somewhat from a discussion of the features of this bill, as I have not had during the last few days an opportunity to be in the House to make a statement which I now desire to make.

A short time ago, in a speech which I delivered in my own district, in the State of Missouri, and repeated at Williams' Grove, Pennsylvania, I made the statement that farm implements and farm machinery manufactured in this country were exported and sold to foreign buyers, both in Canada, and in Mexico, as well as in Europe, at lower prices than they were sold to the American farmer. I said further that I had authority for the statement that the Oliver Chilled Plow Works, at South Bend, Ind., exported their plows to Canada and sold them there, or to Canadian dealers, at an average price $4 less than they are sold to the American farmer. I send to the Clerk's desk to be read a letter addressed to a gentleman in my State by the establishment referred to.

The Clerk read as follows:

SOUTH BEND, IND., *August* 31, 1888.

DEAR SIR: Your favor of the 29th ultimo is at hand and carefully noted. We do not suppose that Hon. W. H. HATCH, Congressman from your district, would willfully misrepresent us, but the statements made in his speech at your place on the 28th instant have no foundation in fact whatever. The truth is, we have little or no trade in Canada, as the 35 per cent. duty most effectually shuts us out from that market. There may be imitations of our plows, produced by Canadian manufacturers, but we know nothing of them and are in no wise responsible for them. We do not favor foreign trade in the least, and all reports that we do are false. We export our plows largely to Europe, Mexico, South America, and elsewhere, but buyers for those countries pay us exactly the same price that American dealers do. As to the retail price, take your number 40, which is our standard plow. It is retailed in this country, complete with wheel and jointer, for $14, while the same plow is sold in Great Britain for several dollars more. It is gratifying to us to have our plows so well thought of abroad, but we can say without egotism that their popularity is due solely to their merit.

The United States is the home of the plow and its manufacture has been brought nearer to perfection in this country than elsewhere on the face of the globe. Competition is brisk; factories are plenty, and not only do Americans produce the best plows made, but they are sold cheaper to the user here than in any foreign land. The statements made by Mr. HATCH are not new, and each Presidential year "bob up serenely" as a factor in politics, but we are somewhat surprised that a gentleman of his reputation should make such charges without satisfying himself of their truth. What we have said to you is the truth, pure and simple, and we are prepared to substantiate the same on any or all occasions.

Mr. P. M. Smith, of your place, writes us in regard to this same subject, and we reply to him as we do to you. Thanking you both for calling our attention to the matter, and hoping that we may be set right in your community, we beg to remain,

Yours, truly,

OLIVER CHILLED PLOW WORKS.

H. F. MILLAN, Esq., *Kirksville, Mo.*

Mr. HATCH. I ask the Clerk now to read my reply to that letter, as a foundation for official documents which I shall submit in a few moments.

The Clerk read as follows:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., October 8, 1888.

GENTLEMEN: Your letter, addressed to H. F. Millan, esq., Kirksville, Mo., dated August 31, and subsequently published in the Kirksville Journal and other Republican papers in Northeast Missouri, has just been brought to my attention, the delay having been caused by my unavoidable absence from this city from September 13 until Saturday last.

In a speech delivered by me in Kirksville, Mo., August 28, I stated that farm implements and machinery manufactured in this country and sold to American farmers were exported to foreign countries, notably Canada and Mexico, and after paying a duty to such countries were retailed at a less price than in this country, and, instancing the Oliver chilled plows, stated further that I was informed by good authority that these plows were shipped to Canada and sold at retail to the Canadian farmer at an average of $4 less than the same plows could be bought by the American farmer.

I certainly had no intention of "misrepresenting" the facts or doing your works or any other company in the United States the slightest injustice; on the contrary, I had the highest authority for the statements made, and now have abundant evidence to sustain them.

At the great Interstate Grange meeting at Williams' Grove, Pennsylvania, August 30, I reiterated these statements, without mentioning individual instances, in the presence of one of the largest, most intelligent, and well-informed assemblages of American farmers that has congregated this year, and also in the presence of the largest display of farm implements and machinery to be seen on this continent, with their respective owners or representatives in charge.

I invited, pressed for, and challenged a denial from any such owner or representative present but in vain. Not one of them dared, in such a presence and with the facts at hand, to venture a denial of the truth of these statements.

You are the only manufacturing company in the United States, so far as I know, whose goods have been, or are being, exported for sale, or sold to foreign buyers, that have ventured upon a denial of the facts stated.

In regard to the prices of sewing machines, reapers, mowers, and other high-priced farm machinery, in this country and Europe, as well as Canada and Mexico, no well informed person of respectability will question the oft-repeated and proven statement that such American manufactured articles are sold at greatly reduced prices abroad over those charged the American purchaser.

I am somewhat surprised at the character of your denial; it is evasive and unsatisfactory. You admit that you have some trade with Canada, but are careful to omit that country from the list of those enumerated to which you export your plows. But this will not avail you, nor will the insinuation that "imitations of our plows produced by Canadian manufacturers" may be sold for less money, or be the ones referred to, in the light of the facts so plainly stated in the official correspondence, copies of which I herewith submit to your careful consideration. My statements at Kirksville and elsewhere were made on the authority of Mr. Washington, and I now submit his own statement of the facts from which he derived his information.

I also invite your attention to the cumulative evidence contained in the accompanying correspondence, which fully explains itself without further comment. The statements made may not be "new" to the manufacturers, but they will prove "mighty interesting reading" to thousands of farmers throughout the United States.

Very respectfully, your obedient servant,

W. H. HATCH.

OLIVER CHILLED PLOW WORKS,
South Bend, Ind.

Mr. HATCH. I now ask the Clerk to read a letter from the Assistant Secretary of State, and the report accompanying it.

The Clerk read as follows:

DEPARTMENT OF STATE, *Washington, September* 18, 1888.

SIR: In pursuance of the verbal promise made to you by Assistant Secretary Rives a week or ten days ago, and confirmed by my personal note of last week, I have pleasure in transmitting to you herewith copy of a report by Mr. Washington, our commercial agent at London, Ontario, on the prices of American agricultural implements in his district.

I have the honor to be, sir, your obedient servant,

ALVEY A. ADEE,
Second Assistant Secretary.

Hon. WILLIAM H. HATCH, M. C.,
House of Representatives.

Inclosure: Consul Washington to Department of State, No. 67, London, Ontario, September 15, 1888.

Mr. Washington to Mr. Rives.

No. 67.] UNITED STATES CONSULAR AGENCY,
London, Ontario, September 15, 1888. (Received September 18.)

SIR: In reply to the circular of the Department of State, dated September 4, 1888, requesting information as to imports of agricultural machinery and tools from the United States into Canada, inquiry elicits the following facts:

I find that plows of American manufacture are among the most prominent of the imports in this line. The Oliver chilled plows (made at South Bend, Ind., and the one, I am told, that has the largest sale in the United States), the Syracuse plow, and the South Bend plow seem to be most in demand and to have the largest sale. I have before me on my desk an offer from an Ontario dealer in the Oliver plows to sell same in f. o. b. at this city in Canada for $10 each in quantities. The retail price here is $12, and numerous transactions take place at that figure.

The same plows, I understand, are sold in quantities at the factory (not for export) at $14 each, and cost the American farmer at retail $16.

The Syracuse plow retails at $11 or $12 here, and, I am informed, sells for from $14 to $16 in the United States at retail, and the South Bend at $11 here and and $14 at home.

It is pleasing to observe how cheaply our manufacturers must be able to turn out these goods, from the fact that the Canadian duty on this class of goods is 35 per cent. ad valorem. Even admitting that the manufacturer makes no profit on his sales in Canada, these figures are of interest:

	Per plow.	
Price at which plow is sold in Canada		$16.00
Duty at 35 per cent. ad valorem and freight	$3.50	
Profit to Canadian dealer probably	1.50	
		5.00
Leaving actual cost to manufacture		5.00
Retailed to American farmer at		16.00
Profit to manufacturer on all home sales		11.00

It would thus seem that the Canadian farmer has an advantage over his American neighbor in the purchase of necessary implements produced in his own country, and the latter before purchasing his plows might well figure as follows:

Price of plows at retail in United States		$16.00
Price of same in Canada	$12.00	
Freight to return same to United States (duty is free on American goods returned)	1.00	
		13.00
Profit to American farmer by purchasing American-made plow in Canada		3.00

Plows with tempered steel mold-boards and beams, which sell in the United States for $17 and upwards, are manufactured in Canada (from Pittsburgh steel on which duty has to be paid, and the wages of the workmen are substantially the same as in the United States), and are sold for $14 retail; thus showing excess of profit made by American manufacturing over Canadian manufacturing, $3 on each plow. When it is considered that the Canadian manufacturer has to pay a duty on his materials and freight upon same to Canada from Pittsburgh, it will be readily seen at a glance that the excess of profits to the American over the Canadian manufacturer is much greater than the sum named, $3.

I am credibly advised by a very prominent Canadian farmer that he has just bought an American self-binding reaper (Walter A. Woods) for $110. Laid down in an American city near the lines the price of same machine in same place to an American farmer would be from $150 to $170.

In addition to the larger implements mentioned, farmers' or agricultural hardware imported from the United States consists of light shelf goods, dry paints, whilst agricultural hand-tools (such as spades, shovels, forks, etc.), on which articles the duty varies from 35 to 70 per cent., although the printed tariff reads only from 30 to 35 per cent. This Government has, however, instructed its customs officers to advance prices on invoices in certain lines which brings the duty up to a very high rate. Thus, on scythes, for instance, by means of a specific and ad valorem duty they have to pay from 60 to 70 per cent.

Notwithstanding these tremendous charges, a careful comparison of the wholesale and retail prices of the above tools shows that in all cases American goods

can be bought in Canada as cheap, and in many cases cheaper, than in the United States.

It is conclusively proven by these facts that the American farmers are not receiving the full benefit of the low prices at which these goods can be produced in the United States. These benefits are apparently reserved for the Canadians and other foreigners to whose markets we export goods; but existing conditions enable the American manufacturer to compel the purchase of his goods by the American farmer at exorbitant profits.

So great has been this discrimination by American manufacturers in favor of foreign purchasers that the Canadian customs authorities have come to regard with suspicion the prices on nearly all American invoices, as they can not understand why these goods should be sold to Canadians at such great reductions from the prices at which they are sold at home at the point of manufacture. As a consequence they have, during the past two years, largely adopted the plan of appraising these goods for duty at the home figures in preference to the prices stated in the invoices. For instance, an American manufacturer may be willing to sell a certain article for $5 to the Canadian trade, the price for the same article at home being $8. The valuation is placed at the latter figure, and even though he sells for the former the purchaser has to pay duty on $3 more than the goods cost him. The result of this practice is that we are losing our export trade to this and probably other foreign countries.

The falling off of the American export trade to this port on dutiable articles in one year having been $211,058.

The shortsightedness of our manufacturers in this respect, no less than the development of manufacturing in Canada, is closing this (as it does other outside markets to our goods), and is driving us back to trade only within ourselves, to the injury of our great agricultural interests, to the reduction of the wages of our workingmen, and to the lessening of the products of our factories.

Replying thus to your circular by an enumeration of facts, I remain, sir,

Your obedient servant,

WM. DE H. WASHINGTON.
Commercial Agent.

Hon. GEO. L. RIVES,
Assistant Secretary of State, Washington, D. C.

Mr. HATCH. I have another letter which I would be glad to read and make a short comment upon it, but as I do not wish to take up further time I ask unanimous consent to print this letter, with additional remarks, in connection with the report which has just been read.

The CHAIRMAN. The gentleman from Missouri [Mr. HATCH] asks unanimous consent to extend his remarks in the RECORD. If there be no objection, that leave will be granted. The Chair hears no objection.

HOW THE HIGH TARIFF WORKS—MANUFACTURERS SELLING GOODS CHEAPER TO FOREIGNERS THAN TO HOME CUSTOMERS.

The Hagerstown (Md.) Mail gives the following striking instance of the practical operation of the protective tariff, showing the enormous bonus obtained by the monopolists and their perfect ability to compete on equal terms with foreign manufacturers:

The people of the United States have voluntarily taxed themselves to an enormous amount for the benefit of the manufacturers, and in return for making them wealthy they discriminate against their benefactors and sell to foreigners at a much lower price than they will sell to citizens of the United States.

A gentleman told us recently that he went to New York to buy certain machines to sell in South America. The regular price to American dealers was $12 apiece, but this foreigner, upon signing a pledge to sell none of them within the United States, got all he wanted at $7 each.

After getting them beyond our borders they could not be brought back again without paying the tariff tax, and that tax added to the $7 would bring the price up to $12.

The reason of this is apparent. In selling to South America our manufacturer is brought into direct competition, upon entirely equal terms, with European manufacturers, without even the cost of crossing the ocean in their favor.

The fact that under these terms they can compete successfully with Europe should satisfy all that they will not go to ruin while they are protected in this country with a revenue tariff and the freight across the ocean.

The only difference will be that their profits will not be quite so enormous.

The letter given below is a striking illustration of this point. The firm of Ladner & Brother has two stores, one at Eagle Pass, Tex., and the other immediately across the Rio Grande at Piedras Negras, Mexico. He buys his goods for both stores, apparently, from the United States.

Our manufacturers, who are so excited about the interests of our American labor, will sell the Mexican Greaser his shovel for less than one-half what he charges the American workman.

The shovels referred to are the Ames shovels, manufactured in New England.

The letter is as follows:

"OFFICINA DE L. LADNER Y HNO.,
"COMERCIANTES EN ESTUFAS, FERRETERIA Y OJALATERIA,
"*Piedras Negras, Mexico, August* 9, 1888.

"DEAR SIR: Yours of the 2d at hand. In reply take pleasure in giving you the figures asked for as nearly as possible. First, in regard to shovels. Our shovels bought for our Eagle Pass store cost us about $6 per dozen, exclusive of freight. Our shovels of the same class and material cost us laid down in Piedras Negras $2.91 per dozen. Another item: Agate ironware can not be bought for delivery anywhere in the United States at better than 35 per cent. discount. In Piedras Negras we can buy the same articles from the same houses at 60 per cent. discount. The list is the same in both cases. These are not the only articles. Disston's saws can be bought with an additional 20 per cent. discount, showing that the manufacturers could sell in home markets in competition with the outside producers. These figures are only a partial list. Every article known to the hardware trade can be bought from the American manufacturers for export cheaper than they can for home consumption. Hoping this will answer your purpose, we remain,

"Very truly, yours,

"A. J. LADNER & BRO.
"Per H.

"Mr. WALTER NEGLEY, *Hagerstown, Md.*"

Mr. Walter Negley, to whom this letter is addressed, is, as is well known to most of our readers, a son of the late Hon. Peter Negley, for many years United States subtreasurer at Baltimore and editor of the Herald and Torchlight. Mr. Walter Negley was raised a Republican, and for all we know may be one now, but is ardently in favor of reforming the present unequal and iniquitous tariff and of the Mills bill, notwithstanding the fact that he is an extensive wool-grower, having many thousand sheep in Texas, and is deeply interested in the wool industry, which Mr. Mills places on the free-list.

In a recent interview published in one of the Washington City papers, Mr. C. T. Campbell, of the city of Mexico, a native of Prince Edward Island, but a citizen of the State of New York, stated: "I have been in Mexico for twelve years. Mexico is forging ahead. Several new lines of railroad are being pushed through. There are wonderful natural resources, but it needs a stronger stream of immigration to develop them. The native peons are a hopeless lot for effective work. The educated classes are, on the other hand, bright and alert. They have sense enough to hold on to a good thing. They know what a good mine is, and rarely will sell one. They are now importing the most improved mining machinery and developing the mines fast. The silver mines of Mexico are undoubtedly the richest in the world. Mining machinery comes in duty free, which gives Mexican miners considerable advantage over American. One thing they get from the States, however, cheaper than anywhere else—that is blasting powder. In fact, the American companies will sell for export cheaper than they will sell at home. There is a trust in that, I suppose, about as there is in everything else."

Mr. HATCH. I have taken the opportunity to make this statement in the House of Representatives in order that it may go upon the record. In view of the fact that the company referred to has seen proper to call in question the truth of the statement made by me on several important public occasions, I have regarded it of importance to the agriculturists of the country that these statements should go upon record; and if any manufacturers of farm implements or machinery in the United States desire to furnish any additional testimony on this subject, I shall be glad to hear from them.

In reply to numerous inquiries I desire at this time to state officially, as chairman of the Committee on Agriculture, the present status of (H. R. 8191) a "bill to enlarge the powers and duties of the Department of Agriculture, and to create an executive department to be known as the Department of Agriculture."

Members interested in this bill will readily recall its history during the past ten years, but for the information of the people of the United States it may be well to repeat it:

In the third session of the Forty-sixth Congress, February 7, 1881, Mr. Aiken, from the Committee on Agriculture, moved to suspend the rules and pass House bill 4909, on which motion the yeas were 164, nays 83, not voting 45, failing by 1 vote to receive the necessary two-thirds.

Again in the first session of the Forty-seventh Congress, House bill 4429 was reported to the House by Mr. ANDERSON, from the Committee on Agriculture, made a special order, and after full consideration and discussion, on May 10, 1882, passed the House by the overwhelming vote of yeas 183, nays 7, not voting 101.

Again in the second session of the Forty-eighth Congress, December 15, 1884, Mr. Aiken, from the Committee on Agriculture, moved to suspend the rule and pass House bill 1457, which, after discussion under the rules, passed the House by the decisive vote of yeas 166, nays 69, not voting 88.

And again, in the Forty-ninth Congress, January 11, 1887, Mr. HATCH, from the Committee on Agriculture, having reported bill H. R. 5189, after mature deliberation and discussion by the House, the same was passed by the overwhelming vote of yeas 226, nays 26, not voting 67.

This bill passed the Senate February 23, 1887, with amendments, was returned to the House February 25, 1887, referred to the Committee on Agriculture, and, February 26, 1887, reported back to the House with the recommendation that said amendments be concurred in.

Owing to the short time intervening before the final adjournment of the Forty-ninth Congress, March 4, 1887, and the condition of the regular appropriation bills, it was impracticable to obtain consideration of the Senate amendments by the House, and this important measure again failed to become a law.

The principal amendment placed upon the bill by the Senate in the closing days of the Forty-ninth Congress, to wit, February 23, 1887, was an additional section, as follows:

SEC. 5. That the weather service of the United States Signal-Service Bureau is hereby transferred to the Department of Agriculture, to take effect July 1, 1888, and shall consist of one chief and such subordinate officers and employés as may be necessary to efficiently manage said bureau. Until otherwise provided by law, the present organization of the subordinate force of said bureau, including the second lieutenants now in service, shall continue as at present: *Provided*, That nothing in this act shall be construed as altering or affecting in any way the present status in the Army of the commissioned officers of the Signal Corps. The chief of said bureau shall receive an annual compensation of $4,500, and be appointed by the President, by and with the advice and consent of the Senate: *Provided*, That the Chief Signal Officer of the Army, in addition to his strictly military duties, may be assigned to the charge of the Weather Bureau until a chief shall be appointed by the President and confirmed by the Senate; and the compensation now paid to the employés and enlisted men of said service shall continue as now; and the moneys appropriated for said service and hereafter appropriated shall be disbursed under the direction of the Secretary of the Department of Agriculture.

The Secretary of War is authorized and directed, within thirty days after the passage of this act, to appoint a board of three Army officers, of which the Chief Signal Officer shall be a member. The duty of said board shall be to make an inventory of all property now in the control and possession of the Signal Service Bureau, and shall separate and turn over to the Department of Agriculture such portions of the property as the said board may determine to be suitable for the work of the Signal-Service Weather Bureau. The remainder of the property shall remain in the control of the Secretary of War.

This amendment was warmly approved by the Committee on Agriculture of the House of Representatives, and they unanimously reported to the House in favor of concurring therein.

That no further delay might occur in perfecting the bill and sending it to the President for his action, the Committee on Agriculture at the present session of Congress, March 7, 1888, reported the bill to the House with this section intact and without alteration.

Without alteration or amendment the bill passed the House May 21, 1888, and was sent to the Senate.

Although it had been before that body for its action repeatedly, as heretofore stated, it was not finally acted upon until September 21, 1888, when it was returned to the House with amendments, the only one of any importance being an amendment to strike from the bill the fifth section, which had originated in the Senate and had been accepted by the House.

This was done at a time when it was notorious that no quorum was present in the House and in all probability would not be until the next session, and when a single objection under the rules would de-

feat any action upon the Senate amendments, and thus defeat the final passage of the bill at this session.

Having kept the bill four months, and finding no other pretext for emasculating it and preventing its passage at this session, the Senate deliberately struck out the only section of the bill which had originated in the Senate at the last session and which was deemed of value and importance by the farmers of America, who will not be slow to comprehend the animus of such action or to fix the responsibility of these repeated delays where it properly belongs.

The CHAIRMAN. The Clerk will now proceed with the reading of the bill.

Mr. HATCH. I ask unanimous consent that the hour of the Committee on Public Lands may be prolonged to the extent of the time that I have occupied.

The CHAIRMAN. The gentleman has occupied thirty minutes.

Mr. HATCH. I ask unanimous consent that the time of the committee be extended to make up for the time I have occupied.

Mr. HENDERSON, of Iowa. I must object to that request.

Mr. HATCH. There is so much time now at command—we have more time now than anything else—that I hope the gentleman will not object to a courtesy of this kind.

Mr. HENDERSON, of Iowa. I am very much opposed to this bill, and I do not feel like giving it another moment. That is my reason for the objection.

Mr. McRAE. I will say to my friend from Iowa——

Mr. HATCH. As I have taken up the time of the Committee on Public Lands through the courtesy of that committee, I ask the gentleman from Indiana [Mr. HENDERSON], as a personal favor to me, to withdraw his objection to this request. The gentleman will have ample opportunity to oppose the bill.

Mr. HENDERSON, of Indiana. I never can withstand that sort of an appeal; I withdraw my objection.

The CHAIRMAN. Is there further objection to the request of the gentleman from Missouri? The Chair hears none.

Mr. McRAE. Mr. Chairman, I desire to ask leave to withdraw this Senate bill and to consider a few private bills. It was the purpose of the committee to call up these bills first, but under the ruling of the Speaker we were not permitted to do so, except by unanimous consent. If I can first get unanimous consent to take up a few private bills for the relief of individual homestead settlers and also a right-of-way bill, I will withdraw this bill, in view of the fact that it meets with opposition. We can not hope to pass it, and with the knowledge of this fact I do not desire to consume further time talking about it if I can get the consent I have asked.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to withdraw from further consideration the pending Senate bill. Is there objection?

Mr. HENDERSON, of Iowa. I think it just as well that that be done, for it will be impossible to pass the bill under the present circumstances.

The CHAIRMAN. The Chair hears no objection, and the bill is withdrawn.

RIGHT OF WAY THROUGH HOT SPRINGS RESERVATION, ARKANSAS.

Mr. McRAE. Mr. Chairman, I now call up the bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas. I ask unanimous consent to dispense with the first reading of the bill.

The CHAIRMAN. The Chair desires to inform the gentleman from Arkansas that this bill is on the Private Calendar, and the gentleman must ask unanimous consent for its consideration.

Mr. McRAE. I have asked consent; that was embodied in my request.

The CHAIRMAN. The Chair did not so understand the gentleman. The gentleman asks unanimous consent that this private bill be considered during the present hour. Is there objection?

Mr. KILGORE. I wish to know to what extent unanimous consent is proposed to be granted? My understanding was that the gentleman from Arkansas asked to withdraw the bill then pending before the Committee of the Whole House on the state of the Union.

Mr. McRAE. In order to call up these private bills.

Mr. KILGORE. I understand whenever a private bill is submitted the Chair should ask for unanimous consent.

The CHAIRMAN. That is what the Chair is doing. Is there objection to the consideration of the bill which has been indicated?

Mr. EZRA B. TAYLOR. Let the bill be reported.

The CHAIRMAN. The bill will be reported, after which the Chair will ask for objection.

The Clerk read the title of the bill, as follows:

A bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs reservation, State of Arkansas.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. ROGERS having taken the chair as Speaker *pro tempore*, a message from the Senate, by Mr. McCOOK, its Secretary, announced that that body had passed without amendment the bill (H. R. 9447) to restore certain money to the fund for erecting a public building at the city of Detroit.

It further announced that the Senate had agreed to the amendments of the House to the bill (S. 2742) to incorporate the Brightwood Railway Company of the District of Columbia.

It further announced that the Senate had directed its Secretary to furnish to the House, in compliance with its request, a duplicate engrossed copy of the bill (S. 577) for the relief of the American Grocer Association of the city of New York.

It further announced the passage of the bill (S. 577) for the relief of the American Grocer Association of the city of New York; in which concurrence was requested.

It further announced that the Senate had agreed to the House concurrent resolution providing for an investigation into the construction of the aqueduct tunnel, with an amendment in which concurrence was requested.

AQUEDUCT TUNNEL INVESTIGATION.

Mr. BURNES. Before the Committee resumes its session I desire to call up, by unanimous consent, the concurrent resolution just returned from the Senate with an amendment.

The SPEAKER *pro tempore*. The committee only rose informally to receive the message from the Senate.

Mr. BURNES. The amendment will not take a moment and the matter ought to be disposed of at once.

The SPEAKER *pro tempore*. If there is no objection, the resolution will be taken up for consideration.

There was no objection.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES, *October* 8, 1888.

Resolved by the House of Representatives (the Senate concurring), That all work heretofore performed upon the Washington Aqueduct tunnel, together with the provisions of any contract made for the same or any portion thereof, and all the facts and circumstances connected with the bidding for and letting and making of said contracts, and all expenditures of moneys heretofore appropriated for said work, together with the extent of any force employed in said work by the Government, the nature of the same and the compensation therefor, shall forthwith be fully investigated by a joint select committee of six members, of whom three shall be members of the Senate, to be appointed by the President of the Senate, and three shall be members of the House of Representatives, to be appointed by the Speaker. Said committee shall have authority to employ a clerk, a stenographer, and such experts as it may deem necessary for the investigation. It may sit during the sessions of Congress or in recess, and shall have full power, either in full committee or in subcommittee, to administer oaths and send for persons and papers, and to conduct its investigation either in Washington or in such places as may be deemed necessary, and shall make full report of its proceedings and the conclusions arrived at, with such recommendations as it may deem proper, to Congress on or before January 1, 1889.

The Senate agree to the foregoing resolution of the House of Representatives with the following amendment:

Page 1, line 8, after the word "contract," insert the words "and subcontracts."

Mr. BURNES. The amendment is agreed to by the conferees of the two Houses. I move it be concurred in.

The amendment of the Senate was agreed to.

Mr. BURNES moved to reconsider the vote by which the Senate amendment was agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

RIGHT OF WAY THROUGH HOT SPRINGS RESERVATION, ARK.

The committee resumed its session.

The CHAIRMAN. If there is no objection, the bill will be taken up for consideration.

Mr. EZRA B. TAYLOR. The reading of this bill was asked for, subject to objection after it was read. It has been read, however, only by its title, when the Speaker asked whether there was objection. I wish to reserve my right to object until the bill has been read in full.

The CHAIRMAN. The Chair directed the Clerk to proceed with the reading of the bill, when some other gentleman merely asked for the reading of the title, and the title was reported, when the Chair asked if there was objection to the consideration, and no objection was raised.

Mr. EZRA B. TAYLOR. I reserved the right to object until the bill was read in full, which has not yet been done.

The CHAIRMAN. If the gentleman says that he wished to reserve the right to object until the bill was read, of course the Chair will recognize him.

Mr. EZRA B. TAYLOR. My original request was to withdraw the other bill, and then to consider these private bills which have been reported from the Committee on the Public Lands.

The CHAIRMAN. The Chair will state that it will hardly be in order to ask unanimous consent for the consideration of bills without reporting them. The Chair did not submit that request to the committee.

Mr. McRAE. That was the request I made to the House, and as I understand it that was what was agreed to. There is no doubt about that.

The CHAIRMAN. The Chair did not so understand it. The Clerk will proceed to report the bill and amendments of the Committee on the Public Lands to the House.

The bill was read, as follows:

Be it enacted, etc., That the right of way is hereby granted to the Mountain View Railway Company, of Hot Springs, Ark., incorporated under the laws of

the State of Arkansas, beginning at such point east of the line of the bath-houses, between the Army and Navy Hospital and the Arlington Hotel, as the Secretary of the Interior may approve; thence by the most eligible route to the east line of Hot Springs Mountain; thence westerly down North Mountain and West Mountain to the west line of reservation.

SEC. 2. That the right of way hereby granted shall not exceed 30 feet in width, and no part of the right of way herein granted shall in any way interfere with or obstruct the full flow of the hot waters or be so located as to cause the United States Government or any citizen thereof any expense of any kind or character, save and except the projectors of said road, its heirs and assigns.

SEC. 3. That it shall be the duty of the United States Government's superintendent of the Hot Springs reservation to see that said railway to be constructed under this act shall not obstruct or in any manner interfere with the springs, hot-water pipes, roads, or paths, now existing or contemplated to be located upon said reservation; but it shall be made safe and secure for the pleasure, comfort, and edification of the patrons of the same, and used for the conveyance of passengers only.

SEC. 4. That nothing in this act shall be so construed as to abridge the right of the city government of Hot Springs to control and regulate the privileges of the Mountain View Railway where the same may cross Central avenue in said city.

SEC. 5. That the Mountain View Railway Company shall have the right to construct observatories at different eligible locations in the vicinity of the right of way hereby granted, at such points as the Secretary of the Interior may approve.

SEC. 6. That said observatories shall not exceed 30 feet square at foundation, and to be built in good and safe manner, and that no timber shall be cut upon the mountain, or earth or rock blasted or removed, or the surface of the ground in any way defaced, except upon the actual road-bed of the said way, and no blasting shall be done on Hot Springs Mountain except as authorized by the Secretary of the Interior; and that the right of way hereby granted shall be used for the purposes herein mentioned and none other: *Provided*, That this grant shall not be construed to abridge the authority of the Secretary of the Interior over the portion of the reservation included in the right of way.

SEC. 7. That said company shall cause a map showing the proposed route of its line through the reservation to be filed in the office of the Secretary of the Interior, and said location shall be approved by the Secretary of the Interior before any grading or construction on any part of the line shall be begun, and the right of way shall be lost and forfeited unless the road is completed and in running order within two years after the passage of this act.

SEC. 8. That the company or its assignees to whom this right of way is granted, shall annually pay to the Government of the United States for the improvement of the permanent reservation at Hot Springs, Ark., 3 per cent. of its gross earnings. And Congress hereby reserves the right at any time to amend, add to, alter, or repeal this act.

The amendments of the committee were read, as follows:

In section 7, line 8, strike out "two" and insert "three;" also in the same line, after the word "act," insert:

Provided, That this condition as to construction within three years shall be construed as a condition precedent to the grant herein made, and in case of failure to so complete said road as provided, such failure shall of itself work a forfeiture of all rights hereunder.

The CHAIRMAN. Is there objection to the consideration of this bill in the morning hour?

Mr. McMILLIN. Let the Clerk again report the title of the bill.

The Clerk read as follows:

A bill granting the right of way for the construction of a railroad through the Hot Springs reservation, in the State of Arkansas.

Mr. McMILLIN. Will it not suit the purpose of the gentleman from Arkansas to let this bill be considered in the House after the committee rises? I do not believe the rule which prohibits the consideration of private bills in this hour ought to be disregarded, as it is a good one and a wise one. If I did not so believe I would not ask the gentleman to let the bill go over.

The CHAIRMAN. The Chair will state that it requires unanimous consent to consider the bill in this hour, and the Chair has just asked if there is objection.

Mr. McMILLIN. I am not going to make any objection to the consideration of the bill in this hour, but simply desired to call the attention of the gentleman to the fact that this rule is one that under no circumstances should be broken. For my part I am very much opposed to the consideration of private bills in this hour. It is certainly a rule that should be adhered to. I do not, however, object if the gentleman desires to consider the bill now.

The CHAIRMAN. The Chairs hears no objection to the consideration of the bill.

Mr. WHEELER. I ask unanimous consent to be permitted to make some remarks now, which I had intended to submit on the deficiency bill, the time consumed not to be taken out of this hour.

Mr. McRAE. Let us pass this bill first, and then the gentleman will have ample time afterwards. This is a good bill, but so far as the House is concerned and the general public it is of little importance. It is of importance, however, to the people there.

Mr. WHEELER. I know that when the deficiency bill comes up I can occupy the time then, but I ask unanimous consent now to be heard, the time not to be taken out of the morning hour.

Mr. EZRA B. TAYLOR. I demand the regular order.

The CHAIRMAN. There being no objection, the bill is before the committee for consideration, and the first question is on the amendment recommended by the committee.

The amendment was adopted.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

MOTIER HOWE.

Mr. McRAE. I now ask consideration of the bill (H. R. 11042) for the relief of Motier Howe.

The CHAIRMAN. The Chair is informed that this bill is also on the Private Calendar. Is there objection to its consideration in this hour?

There was no objection.

The bill is as follows:

Be it enacted, etc., That there be, and is hereby, granted, relinquished, and confirmed unto Motier Howe, of Oregon, his heirs and assigns, the interest of the United States in and to the west half of the northwest quarter and northeast quarter of the northwest quarter, and northwest quarter of the northeast quarter of section 22, in township 12 south, of range 23 east, of Willamette meridian, in the State of Oregon.

SEC. 2. That in accordance herewith the Secretary of the Interior is hereby directed and authorized to issue to said Motier Howe a patent in due form to said lands.

Mr. McMILLIN. I understood the gentleman from Arkansas had withdrawn the preceding bill.

Mr. McRAE. No; I withdrew the Yellowstone Park bill. I have asked unanimous consent to consider some of these private bills, to which I supposed there would be no objection. They have been reported by the committee favorably, are on the Calendar; they are meritorious, and I hope there will be no objection to our passing these little measures when we have the hour now at our disposal.

Mr. McMILLIN. I do not feel like being captious in regard to these matters, but I hope my friend from Arkansas will not insist on overriding a rule which has operated so well heretofore and which will be entirely broken down if such action as he now proposes is taken with regard to private bills. Now, I am not going to obstruct this bill or make any objection to it. I should perhaps decline to offer objection to any bill the gentleman called up in this hour; but I hope, in view of the sentiment, as I believe, of the House, that he himself will see after this statement that the consideration of private bills in this hour will break down a rule that has the universal approbation of the House, and that he will not insist on asking consideration of private bills.

Mr. McRAE. Well, I will only call up this and one other private bill. [Laughter.]

Mr. STONE, of Kentucky. It occurs to me that this is an exceedingly unfair proceeding. This privilege has been denied to all the other committees, and especially to the Committee on War Claims.

Mr. McMILLIN. I agree with my friend from Kentucky fully.

Mr. STONE, of Kentucky. I represent a committee having bills upon the Calendar for eight months, a large number of them, and have not been able to get a day even set apart for their consideration. When the Committee on War Claims wanted to consider private bills we were informed that we could not do so under the rule.

Mr. McRAE. Did you not have other bills to consider?

Mr. STONE, of Kentucky. No, sir; we lost our hour because we had none but private bills prepared at that time.

The CHAIRMAN. The question is on laying aside the bill to be reported to the House.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MARY ALICE WHITE.

Mr. McRAE. I now call up the next bill, for the relief of Mary Alice White, House bill No. 10079.

The CHAIRMAN. The Chair is informed that this bill is also on the Private Calendar.

Is there objection to its consideration in this hour?

Mr. HERMANN. I ask unanimous consent that it may be now considered.

The CHAIRMAN. Is there objection?

Several MEMBERS. Regular order.

The CHAIRMAN. Objection is made.

LAND OFFICE, MISSISSIPPI.

Mr. McRAE. Then I call up for present consideration the bill (H. R. 7788) to establish a new land district in the State of Mississippi. This is a public bill, and I presume there can be no objection to its consideration.

The bill was read, as follows:

Be it enacted, etc., That all that portion of the State of Mississippi comprised in the counties of Hancock, Harrison, Jackson, Green, Perry, Marion, Lawrence, Covington, Jones, Greene, and Wayne be, and is hereby, constituted a new district, to be called the Gulf land district, the land office for which shall be located at the town of Hattiesburgh, Perry County, State of Mississippi.

SEC. 2. That the President, by and with the advice and consent of the Senate, shall appoint one man register and receiver for said land district hereby created, who shall receive such compensation as shall be prescribed by the Secretary of the Interior, who is hereby authorized to fix the same upon the establishment of the office; and said district shall be subject, as other land districts, to be changed or consolidated, and the land office changed to any other place by order of the President.

The committee recommend the following amendment:

Strike out the word "Greene," in the fifth line.

Mr. FULLER. I ask for the reading of the report in that case.

The report (by Mr. STOCKDALE) was read, as follows:

The counties named in this bill lie in a compact body and contain a large majority of all the public lands in the State, and two counties will likely be added, leaving but little public land outside of the new district.

There is but one land office in the State now, and that is located at Jackson, Miss., the capital of the State. There is no railroad communication with the city of Jackson and these counties except by a circuitous route of from 150 to 300

miles, whereas, if this district be established, the same people can reach the new office at Hattiesburgh at a distance of from 50 to 130 miles, and a very large number, perhaps a majority, can reach there by traveling less than 100 miles. The town of Hattiesburgh, the proposed site of the new land office, is on the New Orleans and Northeastern Railroad, nearly in the center of the new district.

This region is becoming settled rapidly, and settlers need homesteads, and ought to have facilities for entering them without going so great a distance. Your committee therefore report the bill back with the recommendation that it pass.

Mr. FULLER. I would like to ask if this is unanimously reported from the committee?

Mr. MCRAE. I do not think there is any minority report; but I am not so familiar with the subject as the gentleman from Mississippi, who made this report.

Mr. STOCKDALE. It is the unanimous report of the committee.

The amendment of the committee was agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Mr. MCRAE. I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. RICHARDSON reported that the Committee of the Whole, having had under consideration sundry bills, had directed him to report the same to the House with various recommendations.

BILLS PASSED.

The bill (S. 2110) granting the right of way for the construction of a railroad through the Hot Springs in the State of Arkansas, reported from the Committee of the Whole with an amendment, was considered, the amendment agreed to, and the bill as amended ordered to a third reading; and being read the third time was passed.

The bill (H. R. 11042) for the relief of Motier Howe, reported from the Committee of the Whole favorably, was considered, ordered to be engrossed and read the third time; and being engrossed, it was accordingly read the time, and passed.

The bill (H. R. 7788) to establish a new land district in the State of Mississippi, reported from the Committee of the Whole with an amendment, was considered, the amendment concurred in, and the bill as amended ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time. The question being on the passage of the bill—

Mr. EZRA B. TAYLOR. I demand a division on that vote.

The House divided; and there were—ayes 15, noes 2.

Mr. EZRA B. TAYLOR. No quorum.

The SPEAKER. The point of order being made that no quorum has voted, the Chair will order tellers.

Mr. EZRA B. TAYLOR and Mr. STOCKDALE were appointed tellers.

Mr. EZRA B. TAYLOR (one of the tellers). I will not insist on the demand for a quorum.

So, no further count being demanded, the bill was passed.

Mr. MCRAE moved to reconsider the several votes just taken; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

DANIEL T. WOOD.

The SPEAKER. The gentleman from Alabama [Mr. HERBERT] asks leave to withdraw from the files of the Forty-fourth Congress the papers in the case of Daniel T. Wood. If there is no objection, leave will be granted.

There was no objection.

YELLOWSTONE PARK.

Mr. MCRAE. I move that the House resolve itself into Committee of the Whole for the further consideration of the bill (S. 283) to amend sections 2474 and 2475 of the Revised Statutes of the United States, setting apart a certain tract of land lying near the headwaters of the Yellowstone River as a public park.

The motion was agreed to; and the House accordingly resolved itself into Committee of the Whole, Mr. RICHARDSON in the chair.

The CHAIRMAN. The House is now in Committee of the Whole for the consideration of the bill the title of which the Clerk will read.

The Clerk again reported the title of the bill.

Mr. HENDERSON, of Iowa. I would like to ask the gentleman from Arkansas [Mr. MCRAE] if that is not the bill we had up in the morning hour?

Mr. MCRAE. It is. How much of the time remains, Mr. Chairman?

The CHAIRMAN. There are twenty-eight minutes remaining.

Mr. MCRAE. I desire to yield twenty-five minutes to the gentleman from Alabama [Mr. WHEELER].

Mr. WHEELER. I would like to ask the gentleman from Iowa [Mr. HENDERSON] if he intends to make the point of no quorum on this bill?

Mr. HENDERSON, of Iowa. I shall make every point I can for its defeat.

Mr. WHEELER. Then it is useless for me to address the House any further this morning upon that measure. I have made a careful estimate of the members present, and it is quite clear there is less than a quorum in the House. On our last vote but 98 members answered to their names, and it is doubtful if there is now a quorum of the House in the city.

The Committee on Public Lands have finished all the bills which that committee has ready for consideration, and as the gentleman from Iowa [Mr. HENDERSON] asserts that the Yellowstone Park bill shall not be considered, and as I may not be able to occupy the floor again for some days, I will take this opportunity to make a few observations regarding the substitute for our tariff bill which has just been reported by the Senate Committee on Finance.

Mr. EZRA B. TAYLOR. This bill has been called up for the purpose, I suppose, of allowing some one to make a speech on the tariff.

Mr. WHEELER. The gentleman is taking up a part of my time. I am always willing to yield for questions, but I can not yield time to be used in discussion.

Mr. EZRA B. TAYLOR. I give notice that that kind of business will not be permitted to be repeated.

Mr. WHEELER. I know that the gentlemen on the other side of the House do not like to hear debates on this subject, and I would much prefer to occupy the time in explaining the features of the bill which is on the Speaker's desk, if they would permit us to do so; but if that is refused I shall use my time as indicated.

Mr. HENDERSON, of Iowa. I suppose there is further need for making remarks on that subject on that side of the House.

Mr. WHEELER. During the consideration of the tariff bill much more time was accorded in its debate to gentlemen on the other than on this side of the House, and now that public opinion has forced the Republican party to produce a tariff measure I insist that they should not object to its discussion.

The first business laid before this Congress was the message of the President recommending a revision of the revenue laws. The necessity for such revision was clearly shown by the unanswerable logic of that remarkable state paper, and the Democrats of the House at once addressed themselves to the task. The Republicans, after a long and fruitless search for faults or defects in the present Administration, seized upon this demand for a revision of the laws and reduction of the surplus as the keynote of their campaign, and misrepresentations of Democratic purposes were relied upon as effective party ammunition.

Denunciations came with the force of an avalanche from Republicans in all stations and from all sections.

The uncrowned king, Mr. Blaine, dispatched his famous message from the imperial courts where for nearly a year he had been seeking statecraft inspiration, and the cry was echoed by leaders of all grades down to the newest-fledged aspirant for political preferment until the chorus resounded through the Republican camps from the Atlantic to the Pacific.

From the editor of the New York Tribune to the printer of the smallest and least-known Republican weekly, from Maine to Texas and from Oregon to Florida, there came but one sound, as it were the echo of the slogan from across the Atlantic.

Tinkering with the tariff, as they chose to describe our efforts, was specially denounced, and they demanded that the customs laws should be left untouched.

Every intelligent man in the United States knew that this position was taken by Republicans because they felt the necessity of aggressive antagonism.

These purely political stratagems were not concurred in by the real statesmen and sagacious business men in the Republican party.

The charge so often made by Republicans that Democrats could not unite upon a tariff measure was exploded and rebuked by the almost unanimous Democratic vote upon the excellent bill passed by the House in July last.

The most astute and far-seeing Republican politicians insisted that their best policy was to criticise all Democratic measures, and though taunted to produce something better, they, by non-action, admitted their inability to do so.

When our bill reached the Senate the party leaders, who engineer the political campaigns of the Republicans, determined that their party should not be placed upon the defensive by putting in print their partisan substitute for the House bill.

Their position was most embarrassing.

To go before the people in November admitting their inability to devise any means of relief to the tax-payers was equivalent to signing their own political death-warrant, and to submit to the country a bill consistent with their platform would drive from them every voter who thought that the material interests of the country were more important than party success.

After hesitating for three months as to which horn of the dilemma they would accept, these party magnates have decided that any action was better than none, and the long-looked-for Senate tariff bill has been laid before the public.

THE SENATE TARIFF BILL.

Yes, Mr. Speaker, the Republican tariff bill has finally been laid before the people, and a remarkable production it is. These persons, who claim to be zealous guardians of the poor man's interests, propose to bring about a reduction of $73,750,000 in the revenues of the Govern-

ment, and of this amount $52,250,000 are taken from the products of agriculture, $7,000,000 from whisky, while the tariff tax is reduced by only $14,500,000, and scarcely any of that reduction is made upon the necessities of life.

This Republican tariff bill distinctly violates the party platform. In that document they demanded—

Such a revision of the tariff laws as will tend to check imports of articles such as are produced by our people, the production of which gives employment to our labor.

Farmers are not associated together in combinations and trusts. Most of them are men who labor upon their own land. They are our best and most industrious citizens, and yet Republicans propose to make nearly all of this reduction at their expense, while these zealous partisans are careful to make scarcely any reduction upon those articles the manufacturers of which are combined in trusts that oppress the people. This unjust proposition of the Republican Senate is in strict conformity with much of that party's legislation against the interest of the mass of the people, and is the logical outcome of the pledge in their party platform which declares that the Republican party will—

Favor the entire repeal of the internal taxes rather than the surrender of any part of our protective system.

This shows that General Harrison was nominated upon a platform which the Republican Senate interprets to mean that none of the privileges of the wealthy monopolists of the Northeast are to be surrendered, but that all changes in the revenue laws are to be effected almost entirely at the expense of the hard-working farmers of the West and South.

The difference between the purposes and objects of the Democratic party and the Republican party is very clearly indicated by the characteristics of the bills, designed to reform our revenue laws, which the two parties have submitted to the country.

The effect of the bill prepared and passed by the Democratic House of Representatives will be to lighten the burdens and increase the prosperity and happiness of 20,000,000 people who earn their living by daily toil. The effect of the bill prepared by the Republican Senate will be to perpetuate the privileges whereby a few favored monopolists and corporations have gained enormous individual fortunes at the expense of the comfort and happiness of those by whose toil the wealth of the country is created.

REPUBLICANS SUSTAIN MR. CLEVELAND.

The Republican members of the Senate committee are compelled to admit the correctness of Mr. Cleveland's views, so forcibly expressed in his message.

The report submitted by Senator ALLISON, in behalf of his party allies, asserts:

The demand for a careful and thorough revision of our revenue laws is imperative. This revision is necessary:

1. To reduce the national revenues, which are now excessive.

No valid reason can be given why we should, under existing circumstances, continue to collect annually a sum approximating $60,000,000 in excess of the amount required to administer the Government economically and keep the pledges of public faith.

2. To protect honest importers and domestic producers.

3. To remedy the defects, anomalies, and incongruities which have been from time to time discovered in the tariff schedules, or which have been created by erroneous decisions of the Treasury Department.

4. To secure the proper readjustment and equalization of tariff rates rendered necessary by modified business conditions, improvements in methods of production, radical changes in prices, or by new elements or sources of competition.

These are substantially the reasons given by President Cleveland in his message of last December in which revenue reform was demanded, which document has been so severely denounced by the Senator's party associates.

The Republican authors of the Senate bill give a fifth reason for the revision of the revenue laws, framed, I would suppose, to meet the party requirements of their platform and to induce money contributions from their carefully protected monopolistic pets. This reason is in the words I will now read:

5. To give relief and protection to many industries which are now suffering on account of the inadequate rates levied on competing products.

The bill submitted to the people by the Senate is the work of Republicans only.

It appears to have been prepared by the Republican members of the committee, and in conformity to the views and wishes of dominant members of their party, and that class of manufacturers who specially insist upon maintaining and if possible increasing the present exorbitant rates of taxation, and the Democratic members of the committee were not consulted or even informed as to the provisions of the Senate substitute bill until the subcommittee made a report of the measure to the full committee on the 25th of September.

Mr. O'NEILL, of Pennsylvania. The gentleman says they were not permitted to appear before that committee.

Mr. WHEELER. I say they did not appear, and I believe that they would have appeared had they been permitted to do so. It was certainly the wish of all advocates of that kind of revenue reform which would add to the prosperity of the country and lighten the burdens of the people to appear before that committee and endeavor to impress it with their views, but as near as I can learn, no one who is known to be favorable to such a reform as is demanded by the Democratic party was either invited, and I might say permitted, to go before the subcommittee which framed the bill.

Mr. O'NEILL, of Pennsylvania. It is a notorious fact that the people of the whole country were informed that the Senate Finance Committee were in session ready to hear all persons interested upon questions relating to the revision of the tariff, and whoever did not appear did not appear upon their own motion, not because they were not welcomed by the Committee on Finance. [Applause on the Republican side.]

Mr. WHEELER. In reply to the gentleman from Pennsylvania [Mr. O'NEILL], I beg to state that I learn for the first time that the people of the whole country were informed that the Senate Finance Committee were in session ready to hear all persons interested. The papers very generally stated that the Finance Committee would not report a bill. This statement was repeated day after day in dispatches from Washington and in the leading papers of the United States, and I am certainly correct that the impression of the people at large was that no bill would be reported, and as weeks and months rolled on and no bill emanated from the committee this view was accepted as the correct solution of the probable action of the Senate; and, as far as I can learn, it seemed that the only persons who knew that a bill was to be reported were those manufacturers who demand high, if not prohibitory, protection, and others who have confidential relations with the Republican party.

Mr. O'NEILL, of Pennsylvania. The gentleman never heard an official statement emanating from the committee that they were not going to report a bill. Every one knew that they were.

Mr. WHEELER. It was openly and repeatedly asserted, and I never saw it denied, that Mr. Blaine urged that the best policy for the Republican party to pursue was not to report a bill, and it was also stated that very many of your great leaders concurred with Mr. Blaine, and before we get through with discussing the Senate bill you will find they were right. The Senate bill is framed to benefit the few at the expense of the many.

Mr. O'NEILL, of Pennsylvania. Many members of this House appeared before that committee and took their constituents before that committee. They were not heard before the Ways and Means Committee.

Mr. WHEELER. I yielded to the gentleman from Pennsylvania for a question; but not for a speech. My time is limited, and if the gentleman wishes to make statements in the nature of a speech he must do it in his own time.

Mr. MCKENNA. Do I understand the gentleman from Alabama to say that the Democratic Senators were excluded from the consideration of the bill?

Mr. WHEELER. Their report says so. Senator HARRIS says so in his report, that they were not consulted or informed by the subcommittee of the provisions of the bill.

Mr. MCKENNA. Let me tell the gentleman from Alabama that Senator HARRIS has just said in the Senate Chamber that there is no truth in that.

Mr. WHEELER. Senator HARRIS says:

In the preparation of this substitute no member of the minority of the committee was consulted or informed as to its provisions until it was reported on the 25th day of September to the full committee.

The gentleman from California misunderstood Senator HARRIS. It is very probable that Senator HARRIS and possibly other members of the minority were admitted to certain discussions, but it is quite clear that the bill was framed without consulting with them.

Mr. MCKENNA. He has just declared in the Senate Chamber that he was present, or some member of the minority of the committee was present, during the time the testimony was taken and had ample opportunity to question witnesses during that time.

Mr. WHEELER. I yielded to the gentleman for a question, and not for a speech. I assert that the Senate bill and report has been before the country for nearly a week. It has been published in the papers of the United States, and up to this morning there has not been any denial, so far as I can learn, of the accuracy of the allegations contained in the report signed by the Democratic Senators. No member of the press has expressed a doubt as to the verity of the statement that the Democratic members were excluded from any participation in the preparation of the bill or in the preparation of the report.

Mr. FARQUHAR. Will the gentleman yield to me?

Mr. WHEELER. I do not yield for a speech; I will yield for a question.

Mr. FARQUHAR. I do not suppose that the assertion will meet with a contradiction, but I want to say that possibly a score of the members of this House have been present and been heard before that committee. I have been in the Senate Finance Committee when hearings were being had by the subcommittee, when Senator HARRIS himself was present or some other Senator of the minority; sometimes Senator BECK. I know that in the hearings at that time all interested parties were heard—manufacturers and employés or workingmen.

Mr. WHEELER. I have no doubt but that certain manufacturers and such workmen as they desired to go before the committee were given a full hearing. The interests of manufacturers of the South are not in all respects in harmony with those of the Northeast. I did not hear of Alabama manufacturers being invited before the committee, and certainly no one here heard of farmers being before the Republican members of the subcommittee.

Mr. HENDERSON, of Iowa. I wish to say to the gentleman from Alabama that I know personally that the committee in the preparation of that bill has not only been open to the minority of the Finance Committee, but that the doors of the room have been open and free to every Senator without reference to party.

Mr. WHEELER. I have not been in the Senate this morning and did not hear the discussion to which reference has been made, and I do not question the accuracy of the statement; they are not at all inconsistent with the position I have taken. No doubt Democratic Senators were permitted to be present at every open session of either the subcommittee or the full committee, but no gentleman will doubt but that the essential features of the bill were framed in a committee caucus to which no Democrats were invited. Of course there was no exclusion of members at the committee meetings, and I do not question but that they were open to all Senators.

Mr. FARQUHAR. And the members of any other committee, independent of party.

Mr. WHEELER. I have no doubt the doors were open at the time the evidence was taken. There is no dispute about that because that evidence was generally published in the papers; but the question is as to whether the doors were open during the consideration of the bill and preparation of the report. The minority say they were not, and the allegations of the minority report, which has been published throughout the country, has never been denied.

I will read the exact language of the minority of the committee. The report signed by the Democratic Senators says:

> In the preparation of this substitute no member of the minority of the committee was consulted, or informed as to its provisions until it was reported to the full committee on the 25th day of September, 1888.

The report further informs us that the time of the Republican members of the committee was consumed in—

> Arguments and appeals of manufacturers and others, who demand that the present high rate of tariff taxation shall be maintained, and in most instances increased, prompted not by any revenue necessities, but alone for the purpose of increasing their own profits at the expense of sixty millions of tax-payers.

It could hardly be expected that such a bill would be framed so as to merit the approval of the people, and a merely casual examination shows that the measure is designed to specially promote and protect the interests of capital, and against the interests of the people.

From the minority report of the Democratic Senators I read these words:

> It is safe to say that all the interests benefited by a high protective tariff have been fully heard and have had much influence in shaping this substitute, while the great body of the people, the tax-payers and victims of this policy, have not appeared and have not been heard.

But let us examine the features of this remarkable production which the Senate Finance Committee has submitted.

THE TWO BILLS COMPARED.

It is difficult to conceive of two measures more clearly indicative of the characteristics of the opposing parties.

The Republicans represent and endeavor to serve the aristocratic elements of our people, and the Senate bill is framed specially in their interests, while the House bill is framed in the interest of the Government and of the people.

The report on the Senate substitute bill submitted by the Democratic Senators states that the essential differences between the House bill and the Senate substitute bill are very great.

The report says:

> The one is framed in the interest of the public Treasury; the other in the interest of private pockets. The one is framed in the interest of the whole people; the other in the interest of a few thousand manufacturers. The one is designed to reduce both Government revenue and taxation, the taxation especially which bears heaviest on the necessaries of life; the other is intended to raise public revenue indeed, but to maintain private revenues by increasing and retaining taxation on all the necessaries of life.

From beginning to end the Senate bill seeks to cut down duties on sugar and other articles which produce revenue to the Government, but steadfastly declines to reduce duties on articles where the duty is now prohibitory, and therefore does not produce revenue to the Government, the only effect being to increase private fortunes. In their report the Democratic Senators say:

> The advocates of the substitute freely propose to reduce duties or abolish them on those things which yield only Government revenue, but refuse to reduce or abolish duties on those things which produce private revenue.

The principal reductions in the customs duties, as proposed by the Senate bill, are on sugar and rice, the saving on sugar being estimated at $27,759,783.95, while jute, jute-butts, currants, and molasses, and a few other articles which are not necessaries are put on the free-list.

The House bill places iron ties on the free-list. The Senate bill increases the tax from 35 per cent. ad valorem to a specific tax, equivalent to about 118 per cent. ad valorem.

SENATE BILL MAKES NECESSARIES DEARER.

The Senate bill increases the duties upon nearly all articles manufactured from the four great staples, cotton, wool, steel, and iron. These are articles used by every one, and the largest increases in many cases are upon those articles which must be used by the poor and needy classes of our citizens.

In keeping with the dominant idea of Republicanism, salt, which of necessity is used by every one, is taxed 80 per cent. by the Republican Senate bill and made absolutely free by the bill which passed the Democratic House.

Where the Senate does not openly increase the tax on articles used by the farmer, it in some instances accomplishes that result by indirect means. For instance, a change in the dutiable value of the rods from which the wire fence used by the farmer is made increases the tariff tax on those rods. In addition to this, one size of wire, No. 6, is so changed in classification as to increase the tariff rate on wire rods of this size from 45 to about 54 per cent., making an increase of tax, according to the estimates of the Senate committee, of over $300,000 on this one size of wire rods.

Again, a new proviso is added in the Senate bill by which rods smaller than No. 6 are classified as wire, thus effecting another increase in the tax upon an article used almost exclusively by the farmers.

The tariff tax on many articles is largely increased by changing the duties from an ad valorem to a specific duty, in every case the effect being to put the largest tax upon the cheapest articles, which are used by the poorer classes. For instance, knives and forks, which are found on the poor farmers' tables, are taxed from 200 to 300 per cent., and every article, with scarcely an exception, upon which a specific tax is imposed, is so arranged as to put the heaviest rate on the cheapest article.

Implements used by the farmer have also received the attention of the Senate committee, and in nearly every instance severely to his detriment.

Trace chains and all other chains less than three-eighths of an inch in thickness are raised equivalent to an ad valorem of from 10 to 20 per cent.

In fact, the entire bill is a strike at the farmer, and if it become the law would reduce his profits and increase his already onerous burdens.

The Senate bill takes off the internal-revenue tax from what is classed as non-necessary tobacco in all its forms except cigars, cheroots, and cigarettes.

The minority report, in referring to this part of the bill, says:

> Practically, the substitute offers to the people free whisky and free tobacco, leaving all the expensive machinery for the collection of the revenue and enforcement of the law in full force, while it increases taxation upon the actual and indispensable necessaries of life, and this, too, when there is a large surplus in the Treasury, and under existing laws that surplus is being increased at the rate of over $10,000,000 per month; thus withdrawing and withholding from the channels of trade, commerce, and business of the country money absolutely necessary to their successful operations.

TRUE DEMOCRATIC PRINCIPLES.

The entire measure, taking it all in all, furnishes additional proof that the principles which govern the Republican party are not the kind upon which our forefathers sought to establish a free republican government, and it admonishes us that the prosperity and happiness of the great mass of the people can only be secured by a rigid adherence to the principles of Democracy. The recent decision of the Supreme Court which asserts that the distinctive principles of that great party are those upon which our system of government is founded, should be a rebuke to those who still insist that the power of the people should be lessened and the power of the General Government increased.

Democratic principles always have been and always will be dear to the hearts of the American people who believe in equal privileges and equal rights to all mankind.

It was devotion to these principles which prompted our forefathers to brave the dangers of a tempestuous ocean, and plant a new government in the unpruned forests of the American continent.

The principles of our party, as expounded by the illustrious men who have made our system of government the envy and the wonder of the world, provide the only base upon which freedom of thought, freedom of action, and equality of rights can be surely founded.

BENEFITS OF DEMOCRATIC GOVERNMENT.

That government is most democratic which is nearest to the people, most directly responsible to the people, and most rigidly administered in the interest of and for the highest good and happiness of the great mass of its citizens.

Such a government affords equal protection to all sorts and conditions of men, and its strong arm sternly forbids the encroachment of any upon the rights of all.

These beneficent principles must ever command the approval of a virtuous and intelligent people, and the strength with which they have impressed our citizens assures us that the political organization which has always been governed by them and by which they have been reduced to practice will be kept in power by the American people, and enables those who advocate such a system of government to rejoice in the fact that the prospects of their party, and therefore of the country, were never brighter or more promising than at this time.

Under the wise and fearless administration of President Cleveland all of the numerous and diversified interests of our active, energetic, and enterprising population have been vigilantly guarded and zealously promoted; the public expenditures have been reduced; the different Departments have been rendered more efficient, while being purified of fraud and corruption, and have been converted from reckless and extravagant party agencies into model business establishments.

Notwithstanding the increase in the population of the country, and the consequent greater expense of carrying on their affairs, the Democratic administration has cost less than the Republican administration which preceded it.

DEMOCRATIC ECONOMY.

On the 30th of June last the Democratic administration had been in power during three fiscal years, and a comparison with the three fiscal years preceding establishes this fact beyond doubt. This comparison will show that the cost of the Indian service has been, in round numbers, $1,800,000 less under President Cleveland than under President Arthur. In the War Department the expenditures have been $19,604,000 less, and in the Navy Department the expenditures have been $2,622,000 less. And to this sum of $24,026,000 there should be added $5,300,000 which this Administration has had to pay for Alabama claims and expenses of commission, for refund of duties and drawbacks on exports, for the purchase of the Louisville and Portland Canal, and for the New Orleans Exposition, all of which were legacies from its predecessor.

In the Post-Office Department, comparing the fiscal years 1888 and 1885, there has been an increase of 6,124 in the number of post-offices established, an increase of 3,037 in the number of mail routes, and an increase of 15,128 miles in the length of routes on which mail service is performed. And yet, notwithstanding this increased service, there has been, relatively, a diminution in the expenditures of that Department. In 1885 the excess of expenditures over the receipts was $7,221,775.26, while in 1888 the expenditures were only $2,016,420.87 in excess of the receipts.

And then, too, the number of employés has been reduced in nearly all of the Departments and the interest on the public debt has been steadily diminished.

The admitted sectionalism which, during a period of twenty years, had disgraced the administration of every branch of the public service has disappeared, and the South now receives equal consideration with the North, the East, and the West; the constitutional duty of interposing the veto of the Executive to prevent improper legislation has been fearlessly exercised with the most salutary results; and the authority to prevent wrongful and injurious restrictions upon or discriminations against our citizens by Canada has been demanded from the Republican branch of the National Legislature, that the Executive may thereby effectually protect the honor and dignity of the Government and the interests of its citizens.

REDUCTION OF TAXATION.

The long-continued and steadily increasing oppressions of our present unequal and unjust tariff laws, under which the vast majority of our citizens are forced to pay tribute to a specially favored few, resulting in the accumulation of a large surplus in the Treasury to the detriment of every branch of industry and every character of enterprise, have been impressed upon the attention of the people more forcibly than ever before, with the result of the formulation and presentation to Congress of a careful, conservative, and judicious measure of tariff reform.

This wise and just effort to readjust our present iniquitous revenue laws is shown to be necessary by the President's terse and unanswerable statement, "unnecessary taxation is unjust taxation."

The tariff reforms insisted upon by the President and embodied in the measure submitted to the country by the House of Representatives are designed to relieve the great body of the people of oppressive and needless burdens, while carefully maintaining and preserving every interest of the manufacturer or capitalist, and promoting the welfare and prosperity of all of our citizens who must gain their livelihood by labor.

And it is gratifying to note that this necessary modification of our revenue laws is sought to be accomplished in a manner which will materially benefit all of our farming and most of the manufacturing industries of Alabama, while the method proposed to be adopted will not operate to the detriment of any of the great manufacturing or other interests of the country.

THE BENEFITS OF REVENUE REFORM.

If the experience of the past can be relied upon as a safe basis upon which to build expectations for the future, the reductions in the existing tariff now sought to be effected by the Democrats must inevitably result in giving more constant and more remunerative employment to those of our laborers who toil in the manufacturing industries, while the cost of their daily living will be materially lessened.

The tariff was lowered in 1846, and at the close of 1847 it was found that a larger number of operatives, mill-hands, etc., had been employed during the year than during any similar preceding period, and at higher wages. And this was shown to be the fact in every branch of manufacturing industry.

Under the present laws it is impossible for us to compete with other peoples in the markets of the world for the manufactured products of American skill, ingenuity, and industry—one reason for this inability being that we impose a heavy tax upon the products of other countries and practically prohibit international trade.

During that period of our history when our home market was able to consume all the products of our factories the arguments then made in advocacy of prohibitory protection, non-intercourse, and restriction of commercial relations with other countries had a certain plausibility which is in no manner warranted by the conditions with which we are now confronted.

I have laboriously compiled and carefully compared the statistics, and find that under existing conditions the aggregate value of our agricultural and manufactured products exceeds by $5,000,000,000 our capacity to purchase them. It is, therefore, as clear as any proposition can be that we must either find a foreign market for this surplus production or the producers must diminish the excessive production by reducing the hours of labor and the earnings of their laborers.

In his letter of acceptance President Cleveland refers to this important subject in this vigorous language:

> We know that, confined to a home market, our manufacturing operations are curtailed, their demand for labor irregular, and the rate of wages paid uncertain.

And, explaining the effect of the contemplated changes in the law, he says:

> We propose, too, by extending the markets for our manufacturers, to promote the steady employment of labor, while by cheapening the cost of the necessaries of life we increase the purchasing power of the workingman's wages and add to the comforts of his home.

THE PARTY PRINCIPLES AT ISSUE.

In the campaign now being waged for supremacy the two great political parties are asking the confidence and support of sixty million Americans who, on the 6th of November, by the mighty force of the freeman's ballot, are to decide under which party and by what political principles they are to be governed.

It is not a question of men so much as it is a question of measures. To quote the pithy utterance of our fearless leader, "It is a condition which confronts us—not a theory."

Go through our broad land and we find the rank and file, and most of the leaders of both parties, honest and fearless men, who desire nothing so much as the welfare of their country.

I trust, therefore, I may be pardoned if I allude to the cardinal, underlying, and controlling principles of the two great political organizations.

The Republican party contends for the establishment of a strong, consolidated government, in which the greatest power possible shall be centralized in one head.

The Democratic party demands that the least necessary power be given to the central Government and the largest power be reserved to the people.

Centralization generates classes giving a favored few unequal, unconstitutional, and un-American privileges; privileged classes speedily become powerful and arrogant; power and arrogance infallibly tend to foster and encourage pretentious display and lavish expenditure; unbridled extravagance—be it public or private—inevitably lowers the standard of public morals, and in all governments corruption in classes, parties, and individuals has ever preceded the decline of liberty; and it has been this tendency of Republican theories and Republican legislation to generate fraud that has driven so many of the purest and best Republicans into the ranks of their party opponents.

Alexander Hamilton, the ablest advocate of a strong centralized government this country ever produced, and who had devoted his life to the study of the effects of different systems, boldly and frankly admitted that such a government must necessarily be corrupt, but still contended it was the best, because if too much power were given to the people the government would be unstable and could not be durable.

That Hamilton failed to comprehend the ability of the people to govern themselves the history of our country abundantly proves.

THE FRUITS OF A VICIOUS SYSTEM.

We therefore make no reflection upon men, but only point out the evils of the system which an experience of twenty-four years has proved to be subversive of free institutions.

I shall not dwell upon the many wrongs suffered by the people during this long period of Republican supremacy. They are passed, and have often been rebuked.

I will only briefly mention the stupendous Credit Mobilier fraud which once disgraced the American Congress, the Whisky-Ring frauds which stained, as with blood, the steps and doors and inner portals of the mansion once occupied by Washington, by Jefferson, by Jackson, by Lincoln, and now by Grover Cleveland—frauds committed by trusted officials so near the Executive that his integrity might have been suspected had not his open, frank, and honest character precluded the pos-

sibility that he could have been cognizant of the crimes of those who abused his confidence.

I shall barely refer to the Naval frauds, whereby at least $100,000,000 were squandered to enrich a Secretary of the Navy and his favored friends. I shall only drop a tear over the atrocity by which the ermine of the Supreme Court was dragged from the lofty place it held in the estimation of Americans and the world when members of that tribunal consented to aid party purposes and deprived 45,000,000 people of their constitutionally and legally elected President, and placed in the Presidential chair a man who had no shadow of legal right or title to the position; and I shall revive for but a moment the unsavory memories of the post-tradership scandals, the unparalleled rascalities of the star routes, and the wholesale robberies of the carpet-bag governments, whose officials "thrust their larcenous fingers into the pockets of posterity and mortgaged the labor of children yet unborn."

All these are things of the past, but they are a part—an important and inseparable part—of the history of the party that was swept from power by an indignant people in 1884.

DEMOCRATS REDRESS REPUBLICAN WRONGS.

I will, however, venture to remind you that, in the interest of banks and accumulated wealth, the Republican party enacted laws to retire or destroy all the greenback circulation, and demonetized silver as a circulating medium, thus confining our money circulation to gold and national-bank currency.

The Democratic party, in the interest of the people, repealed one of these laws and preserved for them $346,000,000 of paper currency. That party also restored silver as money of exchange and required its continued coinage.

During the period from 1862 to 1866 the Republican party gave to corporations more than 185,000,000 acres of the public domain, nearly equal to the entire area of the original thirteen States of the Union.

The conditions upon which these lands were donated were not complied with, but nevertheless the donees were allowed to retain this empire of land until power was regained by the Democratic party.

During the last four years we have restored to the people 103,000,000 acres, and a Democratic House has enacted laws which restore 55,000,000 acres in addition, the total, 158,000,000, being an extent of territory exceeding the combined area of the twelve great States of New York, Pennsylvania, New Jersey, Maine, Ohio, Maryland, Delaware, Massachusetts, Rhode Island, Vermont, New Hampshire, and Connecticut; and in doing this we have declared that the public domain shall be retained as a sacred legacy for homesteads for the American people.

REPUBLICAN LAWS TO CHEAPEN LABOR.

The fallacy of the pretensions of the Republican party that they are, and have ever been, peculiarly solicitous for the welfare of the workingmen, is shown by the general tenor of nearly all the laws enacted by them which affect labor, and notably by the fact that the first and only law sanctioning and legalizing the importation of cheap foreign labor under contract was enacted when the Republicans had more than two-thirds majority in both Houses of Congress. The passage of this law was urged by Senator SHERMAN upon the ground that "labor is too high in this country."

Democrats rebuked this insult to Americans, repealed the law, and made it an indictable offense to import cheap contract labor. In the face of this General Harrison, the candidate of the Republican party, says the difference is little—

Whether the cheap laborer is across the street or over the sea.

If cheap contract labor is brought to America it enables Mr. Blaine and others who employ it to increase their gains by reducing the price of labor, while Democrats have demanded that cheap labor shall remain "over the sea," where it belongs.

The Republican party have built up, fostered, and encouraged all kinds of "combines," monopolies, and trusts, the exactions of which have developed great wealth and arrogance on the one side, and poverty, privation, and suffering on the other.

In a recent Washington paper I find a dispatch, which I will read:

BY ORDER OF THE SUGAR TRUST.

Pursuant to the order issued by President Havemeyer, of the sugar trust, the two large sugar refineries of the firm of DeCastro & Donner were closed down to-day at noon, and one thousand men were thrown out of work.

This illustrates the arbitrary manner in which the wrongly-acquired power of these trusts, created and protected by Republican legislation, is exercised to the great injury of the people. One thousand men are deprived of the opportunity of providing for themselves and families, and a necessity of life is made more costly. This is not an isolated case. Diminution of production, enforced idleness of working men and women are the natural, the inevitable, consequences of the partial Republican legislation, which the Democratic party is now striving to modify in the interest of the people.

For many months past orders of the same import as that of the sugar trust I have just read have appeared in the papers of the country almost daily.

UNJUST TAX LAWS.

The absolute falsity of the claim that the Republican party have protected the interests of the workingmen is further shown by the fact that while that party was in unrestricted control of the Government it abolished nearly every tax which fell upon the rich, but took no steps to lighten the burden of taxation laid upon the poor.

The tax on incomes, paid only by the wealthy or the comparatively well-to-do, was repealed; the railroad, express, and insurance companies were relieved of the taxes they had paid; the taxes on banks, bankers, bank circulation, bank deposits, and bank checks were abolished; and the Republican party, with an audacity almost inconceivable, claims credit for thus lightening the burdens of the people.

But the farmer, the mechanic, and the laboring man, whose "income" had been reduced by imported foreign cheap labor—imported because, as a prominent Republican leader asserted, "labor was too high in this country"—have still to pay exorbitant taxes on the implements he must use and on the tools he works with. They still pay taxes on plows, trace-chains, axes, hammers, files, nails, saws; on the shingles upon his roof, the panes of glass in his rooms, the wood in his infant's cradle, and on the shroud and coffin which cover his dead.

Then, too, as I have before stated, the Republican party alone is responsible for the laws which have fostered and protected all the trusts and combinations of capital by which, with the aid of tariff laws in the interest of accumulated capital, the price of almost every necessary of life has been enhanced and the cost of living to the poor man greatly increased.

THE EVILS AND WRONGS OF TRUSTS.

One trust adds 2 cents a pound to the price of sugar; another adds 1 cent a pound to the price of salt; another adds 30 per cent. to the price of slate pencils; another adds 40 per cent. to the price of oil-cloth; another adds 80 cents a gallon to castor-oil; another adds 25 per cent. to paper envelopes; another 100 per cent. to cotton bagging; another rests upon a tariff tax of $17 a ton on steel rails, and materially increases the cost of railroad travel and transportation; another adds 1¼ cents per pound to the price of nails; another adds 2 cents per pound to the cost of iron nuts and washers; another adds more than one-half a cent per pound to the cost of barbed fence wire; another adds 2½ cents a pound to the price of copper; another adds 1½ cents a pound to the price of lead; another rests upon a tax of 15 cents a pound on nickel; another adds 30 per cent. to the price of cordage; another rests upon a 35 per cent. tax on gutta-percha; another adds 25 cents per gallon to the price of linseed-oil; another adds 5 cents a pound to the price of borax and boracic acid, 3 cents a pound to the price of crude borax and borate of lime, and 4 cents a pound to the price of commercial boracic acid; and still another adds 2½ cents a pound to the price of zinc.

Every one of these trusts and "combines" is hostile to the interests of those who labor, and they have therefore been attacked by the Democratic party, and this character of legalized extortion has been defended against these attacks by the most influential and most prominent Republican leader, Mr. Blaine, who declared in one of his speeches—

They (trusts) are largely private affairs, with which neither President Cleveland nor any private citizen has any particular right to interfere.

To this dogmatic and authoritative exposition of the Republican party's attitude toward trusts an honored and able leader of the Democracy very pertinently replied:

Larceny is a private affair—a very private affair—and yet it is not supposed to be improper to interfere with it by law. The highwayman who demands your money or your life is engaged in a private enterprise, but still the law takes cognizance of his act and punishes it as a crime.

PARTY ATTITUDES ON TRUSTS.

And these two utterances forcibly indicate the striking difference in the views entertained by the Democratic and Republican parties regarding these combinations which have for their object to exact tribute from the great body of the people to satisfy individual greed and rapacity.

The Republicans say they must not be interfered with, because they violate no law. Democrats insist that the welfare and safety of the people is the highest law, and demand that all laws which render oppression of the people possible must be promptly modified or repealed. Witness the following ringing declaration of our platform:

Judged by Democratic principles the interests of the people are betrayed when, by unnecessary taxation, trusts and combinations are permitted and fostered, which, while unduly enriching the few that combine, rob the body of our citizens by depriving them as purchasers of the benefits of natural competition.

And upon this explicit declaration of Democratic principles President Cleveland in his letter of acceptance comments in this vigorous and unequivocal language:

Such combinations have always been condemned by the Democratic party. The declaration of its national convention is sincerely made, and no member of our party will be found excusing the existence or belittling the pernicious results of these devices to wrong the people. Under various names they have been punished by the common law for hundreds of years, and they have lost none of their hateful features because they have assumed the name of trusts instead of conspiracies.

We believe that these trusts are the natural offspring of a market artificially restricted; that an inordinately high tariff, beside furnishing the temptation for their existence, enlarges the limit within which they may operate against the people and thus increase the extent of their power for wrongdoing.

With an unalterable hatred of all such schemes we count the checking of the baleful operations among the good results promised by revenue reform.

Mr. Cleveland is by no means alone in this assertion that these combinations and trusts have always been condemned by the Democratic party. Mr. Blaine, in the speech I have before referred to, said:

When President Cleveland delivered his message he had something to say to the American people about the danger of "trusts." I think there have been since no Democratic papers in the country, whether they understood the meaning of the word or not, that have not been constantly warning the people of the horrible danger of trusts.

And as if in anticipation of the inevitable results of this system of centralization, a prominent Republican, nearly a quarter of a century ago, made this remarkable prediction:

As a result of the war corporations have been enthroned and an era of corruption in high places will follow, and the money power of the country will endeavor to prolong its reign by working upon the prejudices of the people until all wealth is aggregated in a few hands and the Republic is destroyed. I feel at this moment more anxiety for the safety of my country than ever before, even in the midst of the war. God grant that my suspicions may prove groundless.

MISSION OF THE DEMOCRATIC PARTY.

These are some of the wrongs which it is our duty to correct, and they bring to my mind reflections which the pending contest between the two parties has forced upon my consideration, and which I think should properly be laid before the people. Can there be any doubt as to the result? Principles dear to American freemen on the one side, and those abhorred by them on the other.

The mission of the Democratic party is a grand and lofty one. It seeks to bring our country back to the golden days of honest purity, when all industrious and frugal men could acquire a competence, and when the upward march of the prosperous was not upon the blighted hopes and broken fortunes of their fellow beings. Can any one whose breast retains a spark of love for his country and for humanity hesitate when the prize to be sought involves the welfare and happiness of over 20,000,000 American citizens who toil for the support of themselves and their families.

Some gentlemen have demanded that we cease the struggle, at least for a time, promising that it shall be renewed at another session or another Congress. I have opposed and will continue my opposition to a moment's truce or the surrender of an inch of the vantage ground gained by our party. I insist, and I believe a large majority of the Democratic party will insist, that the fight should be continued until the battle is won. As our ancestors at Runnymede wrung from King John the "Magna Charta"—that priceless grant of liberty and constitutional government—so we will wring from the Senate of the United States a concession as valuable to the people of this land of freedom as was the Magna Charta to the down-trodden subjects of the proud English monarch. [Applause.]

The CHAIRMAN (before Mr. WHEELER had concluded his remarks). The time of the gentleman from Alabama has expired.

Mr. WHEELER. Will the consideration of this bill be resumed to-morrow?

The CHAIRMAN. The gentleman from Arkansas [Mr. MCRAE] has three minutes remaining before the hour expires.

Mr. MCRAE. My purpose is to withdraw this bill and call up another which I hope will not meet with such objection.

The CHAIRMAN. Does the gentleman withdraw the bill?

Mr. MCRAE. Yes, sir.

The CHAIRMAN. The bill is withdrawn. There are two minutes of the hour remaining.

Mr. MCKENNA. Then the bill which was under consideration and to which the gentleman from Alabama addressed his remarks, is no longer before the House.

INDEMNIFICATION FOR SWAMP AND OVERFLOWED LANDS.

Mr. MCRAE. I desire to call up the bill (S. 758) to relieve purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, and for other purposes.

The Clerk proceeded to read the bill; but before the reading was concluded,

The CHAIRMAN said: The hour for the consideration of bills reported by committees has expired. The committee will rise.

The committee accordingly rose; and the Speaker having resumed the Chair, Mr. RICHARDSON reported that the Committee of the Whole on the state of the Union having had under consideration the bill (S. 758) to relieve purchasers of, and to indemnify certain States for, swamp and overflowed lands disposed of, and for other purposes, had come to no resolution thereon.

ENROLLED BILLS SIGNED.

Mr. KILGORE, from the Committee on Enrolled Bills, reported that the committee had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

A bill (S. 869) for the relief of the sufferers by the wreck of the United States steamer Tallapoosa;

A bill (S. 1856) to establish a life-saving station on the Atlantic coast between Indian River Inlet, Delaware, and Ocean City, Md.;

A bill (S. 3234) to abolish circuit-court powers of certain district courts of the United States and to provide for writs of error in capital cases, and for other purposes;

A bill (S. 3573) granting the right of way to the Pensacola and Memphis Railroad Company over and through the public lands of the United States in the States of Florida, Alabama, Mississippi, and Tennessee, and granting the right of way to said railroad company over and through the United States naval and military reservation near Pensacola, in the State of Florida;

A bill (S. 3390) to create the Lincoln land district in the Territory of New Mexico; and

A bill (H. R. 7516) to increase the pension of Sylvester Stearns.

LEAVE OF ABSENCE.

Mr. FRENCH, by unanimous consent, obtained indefinite leave of absence, on account of important business.

ORDER OF BUSINESS.

Mr. MCMILLIN. I move that the House now adjourn.

Mr. HIESTAND. I ask the privilege of presenting a proposition to print a document.

Mr. MCMILLIN. I believe, Mr. Speaker, that does not cut off the motion to adjourn.

The SPEAKER. It does not.

Mr. MCMILLIN. The gentleman can bring up that matter to-morrow.

The SPEAKER. The gentleman from Tennessee declines to yield.

The question being taken on the motion to adjourn, it was agreed to—ayes 36, noes 14.

The House accordingly (at 2 o'clock and 30 minutes p. m.) adjourned.

PRIVATE BILLS INTRODUCED AND REFERRED.

Under the rule private bills of the following titles were introduced and referred as indicated below:

By Mr. BINGHAM: A bill (H. R. 11574) authorizing the Secretary of the Navy to donate certain condemned arms to the Naval Post No. 400, Department of Pennsylvania, Grand Army of the Republic, located at Philadelphia—to the Committee on Naval Affairs.

By Mr. W. C. P. BRECKINRIDGE: A bill (H. R. 11575) granting a pension to Judith M. Springate—to the Committee on Invalid Pensions.

By Mr. HEARD: A bill (H. R. 11576) granting a pension to Thomas J. Meriott—to the Committee on Invalid Pensions.

By Mr. RYAN: A bill (H. R. 11577) granting a pension to Andrew M. Jackson—to the Committee on Invalid Pensions.

By Mr. SAWYER: A bill (H. R. 11578) to increase the pension of Rowland Ward—to the Committee on Invalid Pensions.

By Mr. SENEY: A bill (H. R. 11579) granting a pension to George F. Orwick—to the Committee on Invalid Pensions.

By Mr. STOCKDALE: A bill (H. R. 11580) for the relief of Julia A. Nutt—to the Committee on War Claims.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. BINGHAM: Memorial and other papers of the Naval Post No. 400, Grand Army of the Republic, for the passage of a bill to authorize the Secretary of the Navy to donate to that post certain condemned arms—to the Committee on Naval Affairs.

By Mr. MCCOMAS: Petition of Michael William Fout, for reference of his claim to the Court of Claims—to the Committee on War Claims.

By Mr. MARTIN: Petition of W. J. ——— and 86 other citizens of Anderson County, Texas, in favor of pure food and pure lard—to the Committee on Agriculture.

By Mr. MONTGOMERY: Petition of Elizabeth Landolt, of Joseph McDower, of Silas Jourdan, of John Keith, of John A. Rains, of Anthony McElvay, of Harvey Slaughter, of S. W. D. Stone, of James S. Stull, of William D. Wood, and of Pius Boothe, of Kentucky, for reference of their claims to the Court of Claims—to the Committee on War Claims.

By Mr. OSBORNE: Nine petitions of sundry citizens of the Twenty-fifth district of Pennsylvania, in favor of pure food and pure lard—to the Committee on Agriculture.

By Mr. RICHARDSON: Petition of heir of Samuel Smith, of Franklin County, Tennessee, for reference of his claim to the Court of Claims—to the Committee on War Claims.

By Mr. ROGERS: Petition of citizens of Arkansas, for the passage of House bill No. 11027—to the Committee on Agriculture.

By Mr. SCULL: Petition of John Lorrick and 42 others, of Blair County, and of G. W. Osler and 24 others, of Osterburgh, Pa., in favor of pure food and pure lard—to the Committee on Agriculture.

By Mr. STONE, of Kentucky: Petition of Mary A. Baker, of Joseph Spencer, of Daniel Rings, of John C. Lummis, of Scott Noel, of Samuel Goodwin, of William W. Edwards, and of W. Carlisle, of Kentucky, for reference of their claims to the Court of Claims—to the Committee on War Claims.

By Mr. WASHINGTON: Petition of N. J. Bradley and 43 others, of Humphrey County, Tennessee, in favor of the lard bill and pure food bill—to the Committee on Agriculture.

SENATE.

TUESDAY, *October* 9, 1888.

Prayer by Rev. C. B. RAMSDELL, of the city of Washington.

The Journal of yesterday's proceedings was read and approved.

DEFICIENCIES IN APPROPRIATIONS.

Mr. HALE. I present the report of the conference committee on the deficiency appropriation bill.

The PRESIDENT *pro tempore*. The report of the committee of conference will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10896) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1888, and prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 10, 13, 14, 19, 23, 26, 28, 34, 35, 36, 37, 38, 40, 43, 48, 49, 50, 51, 52, 64, 66, 67, 78, 79, 81, 82, 84, 85, 86, 90, 91, 93, 100, 103, 114, 116, 117, 137, and 231.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 15, 16, 17, 18, 20, 21, 22, 24, 25, 27, 30, 31, 32, 33, 39, 41, 44, 45, 46, 47, 53, 55, 56, 57, 58, 59, 60, 61, 62, 65, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 80, 83, 87, 88, 89, 92, 94, 95, 96, 97, 98, 99, 101, 102, 104, 105, 106, 108, 109, 110, 111, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 131, 132, 133, 134, 135, 136, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, and 229, and agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the sum proposed, insert "$1,000;" and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: In lieu of the sum proposed in said amendment, insert "$6,000;" and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: After the matter proposed to be inserted by said amendment insert the following:

"To refund to the heirs of C. A. J. Flemister the balance of the proceeds of a sale of certain real estate of said Flemister, covered into the Treasury over and above his indebtedness to the Government, $475."

And the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"Increase of water supply, Washington, D. C.: For expenses of the joint select committee appointed under a concurrent resolution of Congress to investigate the work upon and contracts and other matters relating to the Washington Aqueduct tunnel, $5,000, or so much thereof as may be necessary, to be disbursed by the Clerk of the House of Representatives on vouchers approved by said joint select committee."

And the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In line 7 of said amendment strike out the word "sixty-seven" and insert in lieu thereof the word "sixty-six;" and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: In lieu of the sum proposed in said amendment insert "$1,328.07;" and the Senate agree to the same.

Amendment numbered 107: That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment as follows: After the matter proposed to be inserted by said amendment insert the following:

"To provide for the payment of the claims enumerated in Senate Executive Document No. 270, Fiftieth Congress, first session, for fees of district attorneys, as follows, namely: Fiscal year 1886, $320; for fiscal year 1887, except the claim numbered 103949 in said Senate Executive Document, $3,833.70; in all, $4,153.70."

And the Senate agree to the same.

Amendments numbered 112 and 113: That the House recede from its disagreement to the amendments of the Senate numbered 112 and 113, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendments insert the following:

"Industrial Home in Utah Territory: The Secretary of the Treasury is hereby authorized and directed to cause all of the unexpended balances of appropriations made by two acts of Congress, one approved August 4, 1886, to aid in the establishment of an industrial home in the Territory of Utah and to provide employment and means of self-support for the dependent women who renounce polygamy and the children of such women of tender age in said Territory, with a view to aid in the suppression of polygamy therein; and the other act approved February 1, 1888, to aid the Industrial Christian Home Association of Utah in carrying on, under its articles of incorporation, the work of providing employment and means of self-support for the dependent women who shall have renounced polygamy and their children of tender age, now in the hands of Caleb W. West, or any other person or corporation, to be immediately paid over and delivered to a properly qualified disbursing officer of the United States, to be appointed by the Secretary of the Treasury. And said Secretary of the Treasury is further directed to cause a valid title to the lot or lots of ground in the city of Salt Lake in said Territory that were purchased and paid for with money of the United States appropriated in the acts before cited to be immediately vested absolutely and unconditionally in the United States forever. When said balances are fully paid over to said disbursing officer, the Utah commission shall be and become the board of management and control thereof and of all expenditures of said money, and of such as may be hereinafter appropriated, and the said board of management and control shall proceed at once, on plans and specifications to be made or approved by said board, to erect or complete on said lot or lots a building adapted and designed to carry out the purposes of this act, and which when entirely completed and finished, including the approaches and the fencing and grading of said lot or lots, shall not in cost exceed the sum of $50,000; and for these purposes the money appropriated under the two acts of Congress above recited and unexpended is hereby appropriated, and a further sum is hereby appropriated to complete the work above mentioned, not exceeding the sum of $24,000.

"There is also hereby appropriated the further sum of $4,000, or so much thereof as may be necessary, to suitably furnish said building when the same shall have been completed.

"When said building shall have been completed and furnished it shall be placed in the custody of the Industrial Christian Home Association of Utah Territory to be used and occupied by it for the purpose of aiding in the suppression of polygamy and of furnishing an industrial home and providing employment and means of self-support for the dependent women who renounce polygamy, and the children of such women of tender age in said Territory; and for the purpose of extinguishing polygamy the following classes may also be received, to wit:

"First. First or legal wives.

"Second. Women and girls with polygamous surroundings in danger of being coerced into polygamy.

"Third. Girls of polygamous parentage anxious to escape from polygamous influences.

"Fourth. Women and girls who have been proselyted elsewhere and remove into the Territory in ignorance of the existence there of polygamy.

"For aiding in the work of said association for the present fiscal year, including the transportation of inmates of the institution who desire to permanently remove from said Territory, $4,000.

"Said Utah Commission shall hereafter act as the board of control over said association, both in the erection of said building and in the conduct of the work of the association hereafter.

"Said Utah Commission shall audit all expenditures of said association under any appropriations herein or hereafter made, and shall make an annual report to Congress covering their expenditures and work hereunder, together with that of said association.

"Said Industrial Christian Home Association of Utah Territory for the work herein defined shall have the use and occupation of said building and grounds, free of rent or charge, until such time as said work shall be accomplished, or Congress shall otherwise direct, when possession and occupation of the same shall revert to the United States."

And the Senate agree to the same.

Amendment numbered 115: That the House recede from its disagreement to the amendment of the Senate numbered 115, and agree to the same with an amendment as follows: Strike out the matter proposed to be inserted by said amendment and insert, after line 2, page 2, of the bill, the following:

"To pay out of humane consideration, and without reference to the question of liability therefor, the sum of $276,619.75 to the Chinese Government as full indemnity for all losses and injuries sustained by Chinese subjects within the United States at the hands of residents thereof."

And the Senate agree to the same.

Amendment numbered 130: That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment as follows: After the matter proposed to be inserted by said amendment insert the following:

"To reimburse the Official Reporter of the Senate for moneys paid for clerical hire during the first session of the Fiftieth Congress, and for extra clerical services and expenses occasioned by the prolongation of the session, $5,000."

And the Senate agree to the same.

Amendment numbered 138: That the House recede from its disagreement to the amendment of the Senate numbered 138, and agree to the same with an amendment as follows: After the matter proposed to be inserted by said amendment insert the following:

"To pay all session employés of the House of Representatives authorized by the 'Act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1888, and for other purposes,' approved March 3, 1887, to the end of the present session of Congress, $45,000.

"To pay M. H. Clark for services as additional clerk to Committee on Enrolled Bills, from September 27 to October 7, 1888, $66."

And the Senate agree to the same.

Amendment numbered 230: That the House recede from its disagreement to the amendment of the Senate numbered 230, and agree to the same with an amendment as follows: After the matter proposed to be inserted by said amendment, insert the following:

"SEC. 7. That for the payment of the following claims certified to be due by the several accounting officers of the Treasury Department under appropriations the balance of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1885 and prior years, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in House Executive Document No. 455, Fiftieth Congress, first session, there is appropriated as follows:

"WAR DEPARTMENT CLAIMS ALLOWED BY THE SECOND AUDITOR AND SECOND COMPTROLLER.

"For pay of two and three year volunteers, 1871 and prior years, $27,708.15.

"For bounty to volunteers and their widows and legal heirs, 1871 and prior years, $20,069.46.

"For bounty, act of July 28, 1866, 1880, and prior years, $4,525.89.

"For pay, and so forth, of the Army, 1886 and prior years, $369.47.

"For pay, and so forth, of the Army, 1887, $606.20.

"For pay, and so forth, of the Army, 1888, $225.75.

"INTERIOR DEPARTMENT CLAIMS ALLOWED BY THE SECOND AUDITOR AND SECOND COMPTROLLER.

"For pay of Indian agents, 1886 and prior years, $206.75.

"WAR DEPARTMENT—CLAIMS ALLOWED BY THE THIRD AUDITOR AND SECOND COMPTROLLER.

"For transportation of the Army and its supplies, 1886 and prior years, $64.81.

"For regular supplies, Quartermaster's Department, 1886 and prior years, $59.25.

"For incidental expenses, Quartermaster's Department, 1886 and prior years, $164.62.

"For clothing and camp and garrison equipage, 1886 and prior years, $88.

"For 50 per cent. of arrears of Army transportation due certain land grant railroads 1886 and prior years, $5.68.

"For commutation of rations to prisoners of war in rebel States and to soldiers on furlough prior to July 1, 1886, $435.

"For contingencies of fortifications, $49.33.

"For pay, transportation, services, and supplies of Oregon and Washington Volunteers in 1855 and 1856, 1871, and prior years, $23.67.

"For horses and other property lost in the military service prior to July 1, 1886, $5,415.16.

"NAVY DEPARTMENT—CLAIMS ALLOWED BY THE FOURTH AUDITOR AND SECOND COMPTROLLER.

"For pay of the Navy prior to July 1, 1886, $18,798.40.

"For pay, Marine Corps, prior to July 1, 1886, $11.40.
"For provisions, Navy, Bureau of Provisions and Clothing, 1886 and prior years, $2,327.93.
"For enlistment bounties to seamen, prior to July 1, 1886, $100.
"For the payment of claims for difference between actual expenses and mileage allowed under the decision of the United States Supreme Court in the case of Graham *vs.* United States, $135.50."
And the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

JAS. N. BURNES,
JOSEPH D. SAYERS,
THOS. RYAN,
Managers on the part of the House.

The PRESIDENT *pro tempore*. The question is upon concurring in the report of the committee of conference.

Mr. EDMUNDS. I should like to have the Senator from Maine explain, if he will, why it is that the action of the Senate in making provision for the balance of a year's salary to the widow of the late Chief-Justice appears to have fallen out of the bill.

Mr. HALE. The only explanation of that is that, try as hard as we could and did, we were unable to make any impression upon the House conferees on that matter. The subject was fully discussed over and over again. The House conferees from the beginning took the ground that they could not assent to an item of this kind, which, as they claimed, had no precedent on which it could be based, being put upon an appropriation bill.

It was intimated that if a separate bill, standing upon its own merits, providing a year's salary or the balance of it for the widow of the late Chief-Justice, should at any time be introduced and passed by the Senate, the objections, so far as those gentlemen, the members of the conference on the part of the House, were concerned, might not be as strong. My impression is that a bill of that kind, standing by itself, not put on an appropriation bill, could be passed by the other House, from what I have learned; but we have found it impossible to retain the provision of that Senate amendment in the bill.

The nearest approach to a precedent we could find was a statute which was cited to us by the Senator from Vermont [Mr. EDMUNDS], which provided for such a gratuity as this, the balance of a year's salary, or an entire year's salary, to a United States judge in Florida who died at his post from yellow fever contracted there; but that was not done on an appropriation bill.

Mr. HOAR. May I ask the Senator from Maine whether there are not abundant precedents for granting the balance of a year's salary to the widows of members of the House of Representatives and members of the Senate who die in office? In that particular did the House conferees point out any distinction in principle between the two cases, the two officers?

Mr. HALE. That has always been done and recognized, but it has not been done in the case of the family of a Chief-Justice.

Mr. HOAR. I so understand, and I was not poking the question at the Senator to indicate any want of fidelity or any inconsistency, but in order to call attention to the precedent.

Mr. HALE. There are plenty of precedents not only of that kind, but with reference to the foreign service on the death of ministers; but the answer of the other House was that the circumstances there are peculiar, that the ministers die abroad, and that is a matter which has passed into acceptance.

What they claimed was (and I had forgotten myself that the record was such) that we had not intervened in this way even in the case of Chief-Justices who have died poor and left their families under the constraint of narrow affairs. In short, we were not able to persuade the conferees on the part of the House to assent to the Senate amendment under any condition on this bill, and so rather than that the bill should fail we yielded. I am sorry we had to do so.

Mr. EDMUNDS. I have no doubt the Senate conferees did their best to carry out the expressed opinion of the Senate. It is, of course, impossible to distinguish this case from the allowances that we make to the widows of members of the House of Representatives and of the Senate and the widows of the employés of both branches. If any possible distinction could be suggested, it would be in favor of making an allowance in this case rather than in the others, for all members of Congress who have any possible means of earning money, either at farming or at the law, or in manufactures or in trade, or whatever, are authorized by the Constitution and the laws to continue those employments while they are still in the Government service, and make by their labor and industry what they can besides, while the justices of the Supreme Court of the United States, as well, I think it safe to say, as all the inferior judges of the courts of the United States, are by law prohibited from engaging in their profession of the law; and while they are not prohibited by law from engaging in business they feel it to be a bounden duty in respect of the sacredness and impartiality of their offices that they shall not engage in any active business. Of course if they have any property which is invested, that goes on, but in respect of carrying on affairs they are set aside entirely.

Therefore when Chief-Justice Waite came to this office all his practice and all his worldly affairs were set aside, and he devoted himself to the office. For two years after he might have retired and received his full salary, and when the Treasury of the United States would have paid an equal salary to another judge, he continued to do his duty well and faithfully and saved double the amount of money that this appropriation proposed to give his widow.

I am sorry that the House of Representatives could not see how proper this provision was. I am sorry that they could not see that the suitable place for it should be in an appropriation bill, as it is not a claim of the widow. It is no business contract or engagement; it relates to no private affair; but it proceeds upon the public sense of propriety and justice.

The fact that there is no precedent in respect of Chief-Justices is accounted for from the fact that there is no precedent of a case of this kind that is within my recollection. Perhaps I am mistaken, but I am confident that Chief-Justice Marshall died without leaving a widow; I am confident that Chief-Justice Taney died without leaving a widow; I am confident that Chief-Justice Chase died without leaving a widow; and so certainly for a period of more than half the life of this nation and of a century no instance of this kind has occurred where a Chief-Justice of the United States, after a long, faithful, honorable, and useful career has suddenly left the service of the country by death, leaving a widow in circumstances that make it delicate and gracious and right for Congress to make some suitable provision for and recognition of her, not as a pension, but as, once for all, a substantial gratuity in view of the services her husband had performed.

There is only one precedent that I know of in the case of a judge. It is true we provide for ourselves and our employés in both Houses and the executive branches of the Government in foreign countries, and so on; but when it comes to the judiciary we have not made such provision in so far as I know except in one instance, that of a district judge of the United States who, after a career not a quarter as long as that of the late Chief-Justice, died in Florida at his post in his field of duty of a disease peculiar to that climate, yellow fever, when Congress, without any division of parties, and only a few years ago, gave to his widow the full amount of a whole year's salary—not the balance of it. In this instance the late Chief-Justice died at his post in Washington of pneumonia, a disease incident to this climate, and the House of Representatives can not find it in their heart to make provision for his widow.

I shall try the experiment to-day or to-morrow of introducing a special bill, which was referred to, and see if the Senate will pass it, and if it will we will try it at the other end.

Mr. HALE. I hope the Senator will do that. The conferees on the part of the Senate were, so far as their action goes, fully persuaded of the justice and merit of this appropriation, and recognized fully the great services which had been rendered by the late Chief-Justice who died at his post, and that his family are in a condition where such a grant or benefaction would be most fit and appropriate. We were met by the strong and unrelenting nay of the House of Representatives, and we were unable of course to get it.

The PRESIDENT *pro tempore*. Is the Senate ready for the question on agreeing to the report of the committee of conference?

The report was concurred in.

EXECUTIVE COMMUNICATIONS.

The PRESIDENT *pro tempore* laid before the Senate a communication from the Secretary of the Treasury, recommending an appropriation for the purpose of carrying into effect the provisions of the recent Chinese-exclusion act, approved October 1, 1888, and transmitting a provision for insertion in an appropriation bill to accomplish that end; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

DR. JOHN B. READ.

The PRESIDENT *pro tempore* laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of October 4, 1888, calling for papers in the claim of Dr. John B. Read, a copy of Department letter of June 4, 1888, communicating, in response to a similar resolution, all the papers on record in that case to the Speaker of the House of Representatives.

The PRESIDENT *pro tempore*. The communication, with the accompanying papers, will be referred to the Committee on Military Affairs and printed, if there be no objection.

Mr. EDMUNDS. I wish to suggest in this connection that the papers I saw bearing upon this subject (which is a very extraordinary one in point of principle, I think, but I do not wish to go into the merits of it now) purported to be and were undoubtedly the report of the board organized by the Secretary of War, consisting of a major, a captain, and a lieutenant in the Army, stating their findings upon the subject.

The joint resolution of Congress upon which the inquiry was had, required, if I interpret it correctly, that the evidence, and all the evidence, on which the board acted, should also be returned to Congress for consideration. I could not find in the papers that I saw—they appear now to have been original—any report of what the evidence was which was submitted or any copies of it, but only a statement of what it tended to show apparently, as a lawyer would express it.

I do not wish to delay the Senate now with any further motion, but at some time I hope the Committee on Military Affairs (as it will have ample time, now that the matter is understood to go over until December) will endeavor to obtain from the War Department all the documents and all the evidence in detail of whatever kind that was laid before that board, so that we may know exactly what the case is. With that observation, I have nothing further to say.

The PRESIDENT *pro tempore*. Petitions and memorials are now in order.

PETITIONS AND MEMORIALS.

Mr. HOAR presented the petition of Elizabeth McHugh, of Worcester, Mass., praying to be allowed a pension; which was referred to the Committee on Pensions.

PERSONAL EXPLANATION.

Mr. VANCE. I ask consent to be permitted to make a statement in correction of something that occurred yesterday.

The PRESIDENT *pro tempore*. The Senator from North Carolina will proceed.

Mr. VANCE. At the conclusion of my remarks yesterday the Senator from Rhode Island [Mr. ALDRICH] rose and said that I had made a mistake in stating that opium prepared for smoking was placed upon the free-list by the bill of the Committee on Finance. Upon examining the bill I find that he is correct and that I did make a mistake in so stating; but I desire to state that I followed the report of the committee, which states in its appendix C, published in the RECORD, that opium for smoking is placed upon the free-list, and also that the report of the committee published in pamphlet form for general distribution contains the same statement, that opium is placed upon the free-list when prepared for smoking. So I made the mistake by following the report of the committee, and I hope that will serve as a warning to my countrymen at large not to take for granted that all that is stated by that committee concerning the bill is correct.

Mr. ALDRICH. What the Senator from North Carolina says is perhaps technically correct. In one sense the appendix is a portion of the report. The clerical error referred to was made in transcribing the list of articles named in one of the appendices as placed by the bill on the free-list. The error was not brought to the attention of any member of the committee until after it was printed. The statement was no essential part of the report of the committee, as the Senator from North Carolina understands, as well as myself. I stated last night that it was printed through inadvertence, and I have now explained the manner in which the mistake occurred. An examination of the bill by the Senator from North Carolina would have disclosed the error.

Mr. VANCE. The Senator did not say that it crept in through inadvertence, but that it was a misprint, the printer being the scapegoat.

Mr. ALLISON. I think it ought to be well understood, in view of the fact that the Senator from North Carolina says he followed the committee, that the committee, in the text of the bill from the beginning, as was stated by the Senator from Rhode Island, had prohibited the importation of opium for smoking. There never was a time in the consideration of the bill when that provision was not in it, nor was there ever a time when it was not one of the provisions that was fully discussed, for the reason that there is some legal question respecting it. I supposed at least that the Senator from North Carolina, being a member of the Committee on Finance, had read the bill.

Mr. ALDRICH. I wish to say further that that provision of the bill was read in the hearing of the Senator from North Carolina, and it is a warning to him that hereafter he should get his knowledge from the bill itself, and not from newspaper reports as to what it contains.

Mr. VANCE. I beg the pardon of the Senator from Rhode Island as well as the Senator from Iowa. That portion of the bill relative to the administrative branch of the subject was not read to the committee. Nothing but the schedules of taxation were read to the committee; and I very inadvertently and unwisely took the word of the committee as to this matter. I promise never to do so again, Mr. President, if I can be excused.

HOMESTEAD ENTRIES.

Mr. DOLPH submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3559) to amend section 2304 of the Revised Statutes of the United States to allow persons who have abandoned their homestead entries to make another entry, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

Amendment numbered 1: That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same with an amendment as follows: In line 6 strike out the word "them" and insert the words "him or her upon the lands settled upon;" in line 8 strike out the words "they have" and insert "he or she has;" and the House agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment, as follows: Strike out all of section 3 of said proposed amendment and insert in lieu thereof as follows:

"SEC. 3. That the price of all sections and parts of sections of the public lands within the limits of the portions of the several grants of lands to aid in the construction of railroads which have been heretofore and which may hereafter be forfeited, which were by the act making such grants, or have since been, increased to the double minimum price, and also of all lands within the limits of any such railroad grant and not embraced in the grant lying adjacent to and coterminous with the portions of the line of any such railroad which shall not be completed at the date of this act, is hereby fixed at $1.25 per acre."

And the House agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: Strike out all after the word "acres," in line 5, and insert as follows:

"Without proof of residence upon and cultivation of the additional entry, and if final proof of settlement and cultivation has been made for the original entry when the additional entry is made, then the patent shall issue without further proof."

Add as an additional section as follows:

"SEC. 5. That every person entitled under the provisions of the homestead laws to enter a homestead, who has heretofore complied with or who shall hereafter comply with the conditions of said laws, and who shall have made his final proof thereunder, for a quantity of land less than 160 acres, and received the receiver's final receipt therefor, shall be entitled under said laws to enter, by legal subdivisions of the public lands of the United States, subject to homestead entry, so much additional lands as, added to the quantity previously so entered by him, shall not exceed 160 acres: *Provided*, That in no case shall patent issue until the person making such additional homestead entry shall have actually and in conformity with the homestead laws resided upon and cultivated the land embraced therein, and otherwise complied with such laws."

And the House agree to the same.

Amend the title as follows:

Strike out the following words: "Amend section 2304 of the Revised Statutes of the United States to," and add, after the word "entry," the words "and for other purposes;" and the House agree to the same.

J. N. DOLPH,
J. H. BERRY,
Managers on the part of the Senate.

THOS. C. McRAE,
BINGER HERMANN,
JOS. WHEELER,
Managers on the part of the House.

The report was concurred in.

ELECTORAL MESSENGERS.

Mr. HOAR. I am directed by the Committee on Privileges and Elections to report the bill (S. 3609) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President, and to provide for and regulate the counting of the votes for President and Vice-President, and the decision of questions arising thereon."

I wish to say that this bill was not referred to the committee, but it was placed upon the Calendar for the reason which I stated when it was introduced. It has been examined by the members of the committee separately without a formal reference, and they instruct me (and I suppose it comes within the general authority of the committee on the subject) to report the bill. I ask that the bill may be put on its passage.

The PRESIDENT *pro tempore*. The Chair thinks that under the statement of the Senator from Massachusetts, the bill being on the Calendar and not having been referred to the committee, it can hardly be reported from the committee except as an original bill.

Mr. HOAR. I ask unanimous consent that the bill may be treated as a report of the committee, and that it be put on its passage.

The PRESIDENT *pro tempore*. It may be treated as an original bill. The bill just reported will be read the first time by its title.

The bill (S. 3620) supplementary to the act approved February 3, 1887, entitled "An act to fix the day for the meeting of the electors of President and Vice-President, and to provide for and regulate the counting of the votes for President and Vice-President, and the decision of questions arising thereon," was read the first time by its title.

Mr. HOAR. I ask that the bill may be now considered.

The PRESIDENT *pro tempore*. The second reading of the bill will be at length, if there be no objection.

The bill was read the second time at length, as follows:

Be it enacted, etc., That the certificates and lists of votes for President and Vice-President of the United States, mentioned in chapter 1 of Title III of the Revised Statutes of the United States, and in the act to which this is a supplement, shall be forwarded, in the manner therein provided, to the President of the Senate forthwith after the second Monday in January, on which the electors shall give their votes.

SEC. 2. That section 141 of the Revised Statutes of the United States is hereby so amended as to read as follows:

"SEC. 141. Whenever a certificate of votes from any State has not been received at the seat of Government on the fourth Monday of the month of January in which their meeting shall have been held, the Secretary of State shall send a special messenger to the district judge in whose custody one certificate of the votes from that State has been lodged, and such judge shall forthwith transmit that list to the seat of Government."

Mr. HOAR. The bill merely changes the time at which the messenger is directed to bring the vote to Washington, to conform to the new law. I ask that the bill may be put upon its passage.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PREVENTION OF YELLOW FEVER.

Mr. HARRIS. The Committee on Epidemic Diseases, to which was referred the joint resolution (S. R. 111) relating to yellow fever and epidemic diseases, direct me to report a substitute. I report Senate joint resolution 111 back adversely and I shall ask that it be postponed indefinitely.

Mr. CALL. I hope the Senator from Tennessee will agree that the

joint resolution which has been adversely reported may be placed on the Calendar.

Mr. HARRIS. There is no objection to that.

The PRESIDENT *pro tempore*. It will be so ordered.

Mr. HARRIS. The substitute is reported in the form of a separate joint resolution.

The joint resolution (S. R. 113) concerning the conference to be held in Washington, December next, to consider the best means of preventing the introduction of yellow fever and other epidemic diseases into this country, was read twice by its title.

Mr. HARRIS. I ask the unanimous consent of the Senate that the joint resolution now reported be at this time considered.

The PRESIDENT *pro tempore*. The joint resolution will be read at length for information, subject to objection.

The Secretary read the joint resolution.

The PRESIDENT *pro tempore*. Is there objection to the present consideration of the joint resolution?

Mr. CALL. If we are to have the present consideration of the pending joint resolution, I should like to have both joint resolutions taken up. I have no objection to the matter being considered at this time.

Mr. BLAIR. I object to its consideration at this time, until the morning business is through, if there is to be debate.

The PRESIDENT *pro tempore*. Are there further reports of committees?

PORT OF DELIVERY AT LINCOLN, NEBR.

Mr. FRYE. From the Committee on Commerce I report favorably without amendment the bill (H. R. 10606) to constitute Lincoln, Nebr., a port of delivery, and to extend the provisions of the act of June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," to the said port of Lincoln.

Mr. MANDERSON. I ask the unanimous consent of the Senate that the bill, which is of local importance, may be now considered. There can be no possible objection to it.

Mr. COCKRELL. Let the bill be read for information.

The PRESIDENT *pro tempore*. The bill will be read at length, subject to objection.

The Secretary read the bill, as follows:

Be it enacted, etc., That Lincoln, in the State of Nebraska, be, and is hereby, constituted a port of delivery in customs collection district of New Orleans, and that the privileges of the seventh section of the act approved June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," be, and the same are hereby, extended to said port. And that there shall be appointed at said port a surveyor with compensation at $250 per annum and the usual fees.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. EDMUNDS. I am under the impression, but I am possibly wrong, as the committee has probably looked into it, that there is a later provision than the act of 1880 upon this subject, and in order that all the present laws may apply I move to amend. If the clerks will send me the bill I can state exactly where the amendment will come in.

Mr. BLAIR. I desire to reserve the right to object if the bill leads to debate.

Mr. EDMUNDS. It will not lead to any debate.

Mr. MANDERSON. This is a House bill, and I should regret very much to see an amendment made unless in the opinion of the Senator from Vermont it is an absolute necessity. I think the act of 1880 as to the immediate transportation of dutiable goods is the last general act on the subject.

Mr. DOLPH. I think that act has been amended a great many times, but the amendments are of the same character as the pending bill, simply inserting certain ports in that act as entitled to its privileges.

Mr. EDMUNDS. I am under the impression (though as I say I am not speaking by the book, but it is only safe to amend it) that whatever law is in force now regarding other ports should be in force as to Lincoln. Nobody would question that; and as the bill names that specific act and that only, any later amendment to that act would not fall under this description technically. Of course there will be no trouble about its passage, and I move to amend by inserting after the word "purposes," in line 9, the words "and all other laws in force on the subject," so as to put it in exactly the category of the existing law as to other places.

Mr. DOLPH. I should like to call the attention of the Senator from Vermont to the fact that the act of 1880 contains two important sections. The first section provides that at certain ports goods may be brought in bond and transshipped on the payment of duty. The seventh section provides as to certain other ports to which goods may be shipped. I do not think there has been any amendment that has changed the provisions of those two sections; but if there has been, I suggest whether the amendment proposed by the Senator from Vermont would not be broader than the act. By the bill the port of Lincoln, in Nebraska, would be entitled to the privileges provided in the seventh section of the act of 1880; but if there has been any general amendment of the act of 1880 since, the amendment proposed by the Senator from Vermont would confer all the privileges of the amendatory act as a port to which goods might be entered and from which they might be shipped in bond, as well as the privileges of ports to which they may be shipped in bond.

Mr. MANDERSON. I ask the Senator from Oregon if it is not a fact that the amendments to the act of 1880 have simply been the insertion of additional ports.

Mr. DOLPH. I have never known of any other amendments of that act.

Mr. MANDERSON. I do not think there has been any other change.

Mr. FRYE. We have examined a great many of those cases. We never report such a bill any different from this in its terms. It seems to me it is all that is necessary for the purposes sought.

Mr. EVARTS. Mr. President——

Mr. EDMUNDS. I will relieve the situation of my friend from New York [Mr. EVARTS] a little, if he will allow me. Under a constraint that I can not resist, but against my judgment, to save legislation I withdraw the amendment.

The PRESIDENT *pro tempore*. The amendment is withdrawn.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

KILLING OF JOSEPH HOFFMAN, WASHINGTON COUNTY, TEXAS.

Mr. MANDERSON. On behalf of my colleague who is absent [Mr. PADDOCK], I report the following resolution favorably from the Committee to Audit and Control the Contingent Expenses of the Senate. It is favorably reported with a proposed amendment. I ask for the present consideration of the resolution.

The PRESIDENT *pro tempore*. The resolution will be read.

The Secretary read as follows:

Whereas Joseph Hoffman, of Brenham, Washington County, Texas, a prominent German Republican of that county, and a witness before the subcommittee of the Committee on Privileges and Elections of the Senate, was recently shot down, apparently in cold blood, in said city of Brenham; and

Whereas there is some reason to believe that the taking of his life was directly attributable to his political views and activity and to the fact that he had given strong testimony before the Senate committee upon the investigation, which is still pending, under order of the Senate, into alleged election outrages perpetrated in said Washington County, Texas; and

Whereas it is of the utmost importance that witnesses before Congressional investigating committees may, without danger to their lives, freely and fully testify concerning matters under investigation: Now, therefore,

Resolved, That the Committee on Privileges and Elections be, and it is hereby, instructed to investigate, either by the subcommittee in charge of the investigation of alleged outrages in Washington County, Texas, or by another subcommittee or otherwise, the circumstances attending the killing of said Joseph Hoffman, with especial reference to ascertaining whether said killing was in any sense due to the testimony given by said Hoffman before the Senate investigating committee as aforesaid, and the said committee, or its subcommittee as aforesaid, is hereby empowered, in pursuing said investigation, to send for persons and papers, and to employ a stenographer; and said committee is directed to report at the earliest practicable day to the Senate, the testimony, with their views thereon, and such recommendation, if any, as to the committee shall seem best, and the said committee may sit during the recess.

The PRESIDENT *pro tempore*. The proposed amendment will be read.

The SECRETARY. The amendment proposed by the Committee to Audit and Control the Contingent Expenses of the Senate is to add:

The necessary expenses of such investigation to be paid out of the contingent fund of the Senate on vouchers duly approved.

The PRESIDENT *pro tempore*. Is there objection to the present consideration of this resolution?

By unanimous consent, the Senate proceeded to consider the resolution.

The amendment was agreed to.

The resolution as amended was agreed to.

WIDOW OF CHIEF-JUSTICE WAITE.

Mr. EDMUNDS. I introduce a bill which I ask may be read at length the first time, as I shall ask for its present consideration.

The PRESIDENT *pro tempore*. The bill will be read the first time at length.

The Secretary read as follows:

A bill (S. 3621) for the payment to the widow of the late Chief-Justice Morrison R. Waite the balance of a year's salary.

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, directed to pay to the widow of the late Chief-Justice Morrison R. Waite the sum of $8,745, being a sum equal to the balance of his salary for the year in which he died.

The bill was read the second time by its title.

Mr. EDMUNDS. I venture to ask, contrary to my practice in the ordinary routine of the Senate, that this bill be now considered. I feel justified in doing so from the fact that the Committee on the Judiciary within a few weeks reported an amendment to the deficiency bill providing this very thing; it was considered by the Senate and agreed to; and under the circumstances which have been stated this morning has failed on that bill. I think therefore I am justified in asking the Senate without a reference to consider the bill at this time.

The PRESIDENT *pro tempore*. The Senator from Vermont asks that the bill may be now considered. Is there objection?

Mr. BERRY. Mr. President, I heard the statement made by the Senator from Vermont this morning of the obligations that rested upon Congress to give this money to Mrs. Waite, to none of which I agree.

I can not see that Mrs. Waite, more than the widow of any other civil officer of the United States, is entitled to receive a donation from Congress.

The Senator from Vermont said that we provided for the widows of Senators and Members of Congress, and paid them a year's salary. If that be true it ought not to be true. I do not believe that the Congress of the United States has a right to take money out of the Treasury that belongs to the whole people of this country and give it to the widows of Senators and the widows of members or the widow of any one else. When Chief-Justice Waite took his office he knew the salary attached to it. Practically it was part and parcel of his contract and understanding that he should serve for that; and we have no right, as I conceive, to give his widow or the widow of a Senator or Member of Congress or any one else money out of the Treasury of the United States. There are thousands of widows over all this land who are not widows of Senators or members or Chief-Justices, and they have the same right that the widow of the Chief-Justice of the United States has.

It is upon this principle that I oppose the bill. I believe it is building up that legislation of which I have heretofore spoken, called class legislation. I believe it is selecting a few favored individuals and taking the money that belongs to the people and providing that they shall live in luxury and ease, while thousands of others are obliged to toil from day to day. I can not vote for the bill, and I will not give my consent that it be now considered if unanimous consent be required.

The PRESIDENT *pro tempore*. Does the Senator from Arkansas object?

Mr. BERRY. I object.

Mr. EDMUNDS. Let the bill be referred to the Committee on the Judiciary. There will be a meeting of the Judiciary Committee in about ten minutes.

The PRESIDENT *pro tempore*. The bill will be referred to the Committee on the Judiciary.

BILLS INTRODUCED.

Mr. ALLISON introduced a bill (S. 3622) granting a pension to Henry Heuer; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. CULLOM introduced a joint resolution (S. R. 114) to quiet title in the United States to certain land in Miller County, Arkansas; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. SAWYER introduced a bill (S. 3623) granting a pension to Maria Gribbon; which was read twice by its title, and referred to the Committee on Pensions.

REVENUE-BILL TESTIMONY.

Mr. ALDRICH submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That in addition to the usual number, there be printed 750 copies of the testimony accompanying Senate Report No. 2332, for the use of the Senate.

ELLEN P. MALLOY.

Mr. HARRIS. A day or two ago the bill (H. R. 6348) for the relief of Mrs. Ellen P. Malloy was adversely reported and indefinitely postponed. I ask that the vote by which the indefinite postponement was had may be reconsidered and the bill placed upon the Calendar.

The PRESIDENT *pro tempore*. It will be so ordered, if there be no objection.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had directed him to return to the Senate in compliance with its request the bill (S. 577) for the relief of the American Grocer Association, of the city of New York.

The message also announced that the House had agreed to the amendment of the Senate to the concurrent resolution providing for a joint committee to investigate the work on the Washington Aqueduct tunnel.

LOUIS RIEL.

The PRESIDENT *pro tempore*. The Chair lays before the Senate resolutions coming over from yesterday, offered by the Senator from New Hampshire [Mr. BLAIR], the title of which will be read.

The SECRETARY. Resolutions calling for information in relation to Louis Riel, who was hanged for the alleged crime of treason by the authorities of Canada.

Mr. BLAIR. These resolutions were offered by me yesterday in consequence of information that had been brought to my knowledge from various sources, particularly through the public press and the publication of a book of apparently considerable merit and written with care and ability, bearing upon the case of Louis Riel. I may say further that private information in the way of correspondence from at least one responsible party has also induced me, with these other considerations, to offer the resolutions. The resolutions were read at length yesterday. They are in print and before the Senate.

I will state that, in substance, they assert that Riel, who was tried and convicted of treason and executed for that crime or alleged crime on the 16th of November, 1885, by the authorities of the Dominion of Canada, was an American citizen; that his trial was without due form and process of law; that, among other causes of defense, he was an insane person, which defense failed to be made with proper force and effect; that the verdict of the jury was, to be sure, guilty, but that it was with a recommendation to mercy; that mercy was not extended, and that he was executed for the crime, somewhat differently from the manner in which we treated the rebellion which occurred in this country but a few years ago, which was upon the most tremendous proportions, and which resulted in the death of no American citizen under the accusation of crime, or, at least, crime in consequence of participation in the rebellion; that a prominent French Canadian brought the circumstances of this man's case and his American citizenship to the attention of the President and Secretary of State, urgently asking for their interference, representing the helpless condition of the man, these mitigating circumstances, and that he was entitled to at least inquiry on the part of his Government into the circumstances under which he was awaiting death; that the Government declined absolutely to interfere, or to make inquiry, or to concern itself about the man's case in any wise whatsoever.

These allegations, the resolutions set forth, were made by one Edmund Mallett, who, I believe, ordinarily has the title of major, and is said to be a gentleman of high character and responsibility, who was at the time these occurrences took place in the employ of the Government, having some function in the Treasury Department; that he, being unable to obtain the attention of his Government to the case of Louis Riel, made much complaint with great publicity and published letters giving the circumstances in regard to the alleged dereliction and reluctance of the Government in the case of Louis Riel; that since these charges were made by Mr. Mallett and since the publication of the book to which I have alluded, and which has been brought, as I understand, to the attention of the President and the Secretary of State, this gentleman has been promoted to a still higher and more responsible position under the Government with increased compensation.

The resolutions do not assume that any of these charges are true, and call for such information as the Government may be able to give us in the premises. I will read to the Senate some of the additional proof, which has, I think, justified my offering, in fact made it an imperative duty to offer the resolutions. I have in my hand a letter from one Wilbur F. Bryant, of Nebraska, which is dated Hartington, Nebr., September 25, 1888, addressed to myself, and is in reply to a letter which I sent to Mr. Bryant after reading the book, "The Blood of Abel," of which he is author, and after reading an article in a prominent New York journal in which he reiterated these charges of negligence on the part of the Government and the unfortunate circumstances of the case of Mr. Riel, and in response to that letter I received this and also the book, which the letter states to be a compilation of facts. He says:

> In regard to Louis Riel my book, mailed yesterday, furnishes an authentic account of the Riel affair. The appendix shows some of the authorities consulted. I have these documents now.

Further on he says:

> The written matter I received from him—

That is, Major Mallett—

> would make a large book of itself. He was the personal and confidential friend of Riel, and, as such, made an appeal, first, to Secretary Bayard, and next to Grover Cleveland, on behalf of the unfortunate half-breed, both of which were unsuccessful.

Further on he says:

> Major Mallett a year ago was an unfortunate applicant for promotion. After the publication of my book, I sent three copies to the White House, and one to Secretary Bayard. Major Mallett has since then been promoted and removed to the Indian service.

He further says:

> Congressman GEORGE W. E. DORSEY, from this district, knows me, also Senator CHARLES F. MANDERSON. General MANDERSON is my personal friend of ten years' standing. I refer you to these gentlemen. Go on, and meet the gratitude of Riel's countrymen all over the land.

The letter is written urging that an investigation be called for, and I have made personal inquiry of the Senator from Nebraska, who informs me that this gentleman is a lawyer of high ability. In fact, his book demonstrates that he is an accomplished gentleman, and certainly well skilled in the matter of authorship. I understand him to be an entirely responsible gentleman, and a good lawyer, and I judge from the contents of the book that he is from my own State originally. I think I know his family connections, and, in fact, there can be no doubt that these allegations come from an entirely responsible source.

It seems that Riel was the son of a French Canadian and an Indian mother. He was a half-breed and belongs to the class of inhabitants known as the Metis in Canada. He lived in Manitoba at the time when the Hudson Bay Company transferred its title, or quasi title, to the soil of Canada to the English Government, about 1869. Difficulties arose in regard to the position of the half-breeds who had become partially civilized, and this man Riel, I ought to say, was, as everything shows, an educated gentleman of great capacity, and vigor, and intelligence. The difficulties in reference to the soil arose in this way: The squatters were in occupation. They had made great improvements on their lands, which had become valuable. They had, after the fashion of the French occupants or habitans of Canada, laid out their lands with a narrow

frontage on the street, the social character of the habitans leading them to establish themselves as far as possible, even when engaged in agricultural occupations, in little villages fronting upon the streets, while the land in long narrow strips passed to the rear to the extent of their holdings. The Government, acquiring the Hudson Bay Company's title, proceeded to survey the lands in different forms, largely disregarding the occupation and the improvements of the settlers, or wholly, perhaps, and laid them out after the fashion of our own country in quarter sections, square portions of land.

If the half-breeds, many of whom were ignorant and unable to follow their titles, had made seasonable application, they might perhaps have succeeded in getting the whole of the land which they had improved; but, as a rule, they were not informed, they failed to do this, and their occupation came to be disturbed by speculators and new settlers coming into the country. Disturbances arose in which these people felt that they were fighting for their homes, and, as we all remember, the sympathy of this whole country and, I think, of the whole world was with these unfortunate people.

An insurrection resulted. Of course it was suppressed. Mr. Riel left the country. A sentence of banishment, I think, was passed upon him. He came to the United States and located in Montana, where he lived for a long time. Finally, difficulties again culminated about the year 1882 or 1883 in the same portion of Canada, Manitoba; and as he had formerly been a leader of his people, Louis Riel was, at the request of a deputation of his people, induced to go again to his former residence in Manitoba; and he undertook the management of this agitation, which was designed to be a constitutional agitation for the establishment of their rights, entirely loyal to the Government of Great Britain, though, of course, bringing them into collision with the authorities of Canada; and with that purpose the agitation proceeded.

There was an entire failure to secure the equitable recognition, as these people claimed, of their rights by the Government of Canada, and force was made use of. General Middleton was sent into the territory with an overpowering force, and the resistance, which had assumed a forcible shape, was suppressed. Riel was captured. He was accused of high treason. He was executed on the 16th day of November, 1885.

I should have stated that after Riel's banishment and his retirement to Montana, in this country, and after the expiration of the period or term of his banishment, he applied for naturalization in one of the courts of Montana, and the decree of naturalization was made in due form. He appears to have been a naturalized American citizen, if we ever had one, and I will call more specific attention to that matter a little further on. If I remember correctly, the decree of naturalization is dated in the year 1883.

During the interim between the first and second insurrections Mr. Riel became insane. He was insane on the subject of the wrongs of his people. He came to conceive that he had a mission to perform for their liberation and a project in that direction which he was charged to carry out regardless of all opposition. Various hardships and sufferings came to be inflicted upon him in the prosecution of his design, until finally his mind became deranged and by the good offices of Major Mallett he was returned to the province of Quebec and for some nineteen or twenty months was under treatment in an asylum there for his insanity. He was afterwards discharged, supposed to have been cured, but when the call to head the second agitation was made upon him and during the excitement which resulted his mind was supposed to have become again disturbed, and Major Mallett says, in several statements, that he has no doubt and believes that Louis Riel was insane at the time of his trial and of his execution.

Something induced the jury to recommend him to mercy. None was extended, no interference was made on the part of our Government, although the American citizenship of this man seems to have been fully established, and it appears to me that, under all the peculiar circumstances of this case, it is a proper subject-matter for calling upon the Department for some sort of a reply.

From the book I read the following, on page 38:

Louis Riel was born October 22, 1844, at St. Boniface, Rupert's Land, on the western bank of a small creek which runs into the Red River from the east, a little north of the site of the present city of Winnipeg. This stream is called after that historic river the Seine. The subject of this sketch was the son of Louis Riel, sr., and Julie de Lagimaudiere. The house in which the child was born was a small, one-story, straw-thatched, log structure, containing but a single room. A saw-mill now stands about 3 rods north the historic spot. Louis was the eldest of eleven children, five of whom, with the mother, survive him.

Louis Riel belonged to the "Metis" or half-breed race. He was what they call in northern New England a French Indian.

I read these extracts without that logical arrangement, which perhaps should be made with reference to their subject-matter, but as I found them in the book. On page 64, speaking of Riel's trial, conviction, and execution, I find this:

Excessive toil, bitter disappointment, and galling poverty so wrought upon his sensitive nature that reason was dethroned. He had come to Washington with $1,000, the donation of a wealthy Canadian. In the space of several months he had given this, piecemeal, to a blind Italian beggar who sat daily in front of the Presbyterian Church on Ninth street. Thus was this high-minded and generous patriot reduced at once to madness and penury in a strange city. But God provided a friend. Riel was possessed of the delusion that he must die for the salvation of his race. Major Mallett took forcible possession of his person. But finding him moneyless, he was compelled to borrow cash from Father Keane, now Bishop of Richmond, to move the unfortunate North. Riel remained for nineteen months at the Beauport lunatic asylum in the province of Quebec.

His ailment was megalomania. This word is not found in the dictionaries. It is derived from two Greek words, *megale*, great, and *mania*, madness. It is a most peculiar and deceptive form of insanity. Its victim might easily pass for a sane person amongst the unobservant. The person afflicted with this mental disorder imagines himself charged with some great mission and altogether a most important person.

Riel was incarcerated under the name of La Rochelle. He remained under the treatment of the medical superintendent, Dr. Francis Ray, until he had recovered. He was discharged from the asylum January 21, 1878. Dr. Ray found his case a most peculiar one, and one requiring careful treatment. To this gentleman Riel confessed his true name.

* * * * * * *

Afterwards he declared his intention to become an American citizen. In the month of March, 1883, he applied to the district court of the United States at Helena, Mont., and on the 16th day of that month he became a citizen. Levi Jerome and E. L. Merrill (full Christian name unknown) appeared as witnesses.

The author goes on to say later in his book on the seventy third page:

This is no party pamphlet. The writer speaks as an American to Americans. On the 16th day of November of the year 1885, Louis Riel, an American citizen, was hanged at Regina, in the Northwest Territories, within the realm of Her Britannic Majesty, for high treason against the crown and dignity of the Queen of Great Britain and Ireland. The attention of President Cleveland and Secretary Bayard was called to the facts, but they refused to act in the matter. The Secretary of State did not consider the matter of sufficient importance to be mentioned in his annual report. Was this inaction of the United States Government justified by the facts in the case? The solution of this problem is the subject before us.

For the purpose of this volume it boots little that Louis Riel was Catholic or Protestant; that he was of French or Germanic, or of Indian, or of Irish, or of Swedish extraction; that he was a patriot, fanatic, impostor, or madman. For such purpose, it matters not whether he be considered a John Brown, a Count Cagliostro, an Anacharsis Clootz, a Don Quixote, a George Francis Train, or a William Tell. One proposition is beyond cavil: He was at his death an American citizen. That undisputed fact stamped upon him a dignity which neither race, religion, character, or condition could obliterate. *Civis Americanus fuit.* Forget all beside.

Various irregularities in the progress of the trial are pointed out at length in the book. If they are true, several of them are such, in my judgment, as would have led to the setting aside of the proceedings by an American court and would have given this man a new trial. On page 111 the author says:

After the condemnation of Riel, an appeal was taken to the court of Queen's bench of Manitoba.

The errors assigned were, in substance:

"I. That the law giving a stipendiary magistrate, with a justice of the peace and a jury of six, power to try the prisoner was contrary to Magna Charta.

"II. That the law required the information to be taken before a stipendiary magistrate and a justice of the peace, instead of the stipendiary alone.

"III. That the law required the magistrate to take the testimony in writing; and a short-hand reporter's notes were not in compliance with the statute.

"IV. That the evidence was insufficient.

"V. That the powers of the Dominion Parliament were delegated, not plenary; and their act was *ultra vires*."

The evidence and its alleged insufficiency are discussed at considerable length. In the book, on the one hundred and fifteenth page, is a citation from another author, one Rambaut, who wrote another book, it seems, on the subject, and this writer devotes several pages to Riel's case considered from an international standpoint. He says—I read now the quotation from the other book, which contains the matter from the same Maj. Edmund Mallett, of whom I have already spoken:

Taking up now the features of the case that have most interest for the student of political science, we notice, in the first place, that although the affidavit of indictment was evidently prepared to meet the objection that Riel was a naturalized American citizen, and therefore no subject of the Queen, the counsel on both sides omitted all reference to this fact. It seems to be generally believed that Riel was naturalized during his residence in the United States. If this be true, there can be no doubt that he ceased to be a British subject. The effect of naturalization, long a mooted question between the English and American governments, was definitely settled by the treaty of 1870. Riel was accordingly entitled to the same protection which would be due in like case to a native citizen of the United States. When it became evident that Riel was about to be executed under sentence of the Canadian court, the United States Government was asked to interfere in his behalf on account of his American citizenship acquired during his residence in Montana. In this matter, Maj. Edmund Mallet, of Washington, D. C., acted for Riel. He has very kindly written me a letter, in which he succinctly narrates his efforts in Riel's behalf, and the position taken by our Government. He says: "I first consulted Mr. Bayard, and he took this position substantially:

"1. That it was not the duty of the Government to inquire into the fact of Riel's American citizenship; and

"2. That the Government could not interfere even if he was an American citizen, either natural or adopted. If a case was brought to the attention of his Department it would be examined into, but under no circumstances could the Government, he thought, interfere unless it was shown conclusively that he had been discriminated against during his trial by reason of his American citizenship.

"When it became apparent to me that the Canadian Government had committed itself to the execution of Riel, under the pressure brought to bear upon it by the Orange lodges of Ontario, I went to the President and appealed to him to prevent this judicial murder. I based my appeal on the following [grounds]:

"1. That Riel was an American citizen; that he had been indicted as a British citizen, his American citizenship having been entirely ignored, although offer had been made to prove the fact by documents captured at the battle of Batoche and then in the Canadian Government's hands; and that he had been tried by a half jury of six men selected by the judge, and that judge was a mere justice of the peace;

"2. That Riel was insane, and I offered testimony to that effect; and

"3. That the authority to put a human being to death for any cause whatsoever is not inherent in the Government, but is delegated from God, and that such delegated power can be exercised only in certain conditions, such as sound mind, etc.

"The President seemed much interested in the case; expressed himself in sympathy with what I told him; but he considered it a very grave matter to interfere. At last I asked that he send for Mr. Bayard and the British minis-

ter, and see if an amicable understanding could be made to save Riel. The President then said that he would consult with the Secretary of State and see what could be done.

"During the night of the same day the Associated Press announced that the President had been constrained to decline interfering in the matter.

"The position taken by Secretary Bayard rests on sound international law. Our Government would not have been justified in interfering in the matter on the basis of the case presented to the Department of State. Although Riel was a naturalized American, he owed the Queen of Great Britain temporary allegiance while living within the borders of her realm, and he made himself liable for breach of the criminal law of the land. * * *

"Not only had the United States no right to interfere in Riel's behalf, but the Canadian court was in the right in ignoring Riel's citizenship. It was absolutely immaterial."

These are the comments of this other author, who falls to the other view that although Riel was an American citizen, the American Government had no right even to inquire, but must be approached with affirmative effort on the part of the person who needs the interference of his Government, that no matter how helpless he may be he must be able to set in motion the necessary machinery to reach the Department of State and the ear of the President and the executive power of this country, although he may be incarcerated and in a condition of the utmost helplessness by reason of the undertaking to subject him to wrongs in defiance of his American citizenship. That is the gist of the resolutions, the position alleged to be taken by the Government and justified by this author, who is quoted in the book I cite from, that there must be this affirmative power on the part of the helpless and defenseless American citizen to reach his Government before that Government will even open its eye or listen to the complaint of the American citizen about to suffer death, and, as it is alleged, unjustly.

This author goes on to say, in reference to the proposition laid down here of the interest of the party being sufficiently powerful to take care of himself and secure the intervention of his government:

If this proposition was ever even the subject of serious debate since the foundation of the world, the writer is not aware of it.

Further on in the book is a statement that eight years after his banishment, and after the expiration of his five years' term of banishment, he became an American citizen in March, 1883, by regular naturalization.

This author goes on to say:

It will be contended herein that the Government should have interfered in the case of Riel.

In describing the duty of the Government in a case like Riel's the language of President Cleveland himself will be employed:

"The watchful care and interest of this Government over its citizens are not relinquished because they are gone abroad, and if charged with a crime committed in the foreign land, a fair and open trial, conducted with a decent regard for justice and humanity, will be demanded for them."

"Out of thy own mouth I judge thee."

Under this rule laid down by the President it was the duty of his Administration to interfere, for the following reasons:

First. Riel was not guilty of any act which could be considered treason, when laying the question of citizenship entirely aside.

Second. Riel was tried upon the theory that he was a citizen of Great Britain, and not of the United States.

Third. The question of the prisoner's sanity or insanity was never fairly submitted to the jury.

Fourth. There was misconduct of the court in instructing the jury.

Fifth. There was a variance between the indictment and the proof.

These points are discussed at considerable length and with apparent proof that they may have been well founded.

Mr. REAGAN. Will the Senator allow me to make a suggestion?

Mr. BLAIR. Certainly.

Mr. REAGAN. I ask whether it has ever been known that this Government or any other government in the world has interposed to protect one of its citizens who has been or is being tried abroad without that question being raised by the person on trial, and without that person having applied to his government for its interposition?

Mr. BLAIR. I think it has. I do not remember anybody making application to the United States Government in the Koszta case, for instance; and the Senator must see, I think, that the greater the helplessness and the need of an American citizen, the less likely and the less competent and able he is to make application for relief from his government.

I think it is the business of the American Government, as it has always been the business of the British Government, to pay attention to complaints, to hold itself open to inquiry, and to make inquiry upon the slightest suggestion that American citizenship in its rights is being violated either at home or abroad.

I do not say that this is a true charge, but the point of all this charge is that this man being an American citizen, and the proof being offered of his American citizenship, of the irregularities attending his trial, of his innocence, his insanity, and all these allegations being offered from responsible sources to the President and the Secretary of State, they refused to inquire, refused to listen, and said the case must be made affirmatively by the party in need, or nothing could be done.

The author says, on page 130:

II. Next Riel was tried upon the theory that he was a citizen of Great Britain and not of the United States. As before stated, the question of his citizenship was totally ignored after the motion for a continuance was disposed of.

The indictment seemed to indicate that the court was prepared for either horn of the dilemma, either his being an American citizen temporarily in the British dominions, and so subject to British law, or a British subject in full.

The author proceeds:

It may be contended—

And I call the attention of the Senator from Texas [Mr. REAGAN] to this, which I read from page 132—

It may be contended on behalf of President Cleveland that, as Riel's counsel never urged the question of his citizenship at the trial, and as he never himself petitioned the United States Government, the Government was justified in refusing to even examine into the question of his naturalization. This is too absurd for serious refutation. Such a rule would have left Martin Koszta to imprisonment and death. If the Greeks of Homer had acted upon such a theory they would have been deaf to the "groans and cries of Helen."

Then he goes on to cite many cases which may be of interest to those who care to pursue this subject further.

Mr. REAGAN. I will say, as reference was made by the Senator to the case of Martin Koszta, that it is hardly a case, as I remember it, to be cited in support of the theory presented here. He certainly made known the fact of his American citizenship and asked the interposition of the American officers.

Mr. BLAIR. No; Koszta was a Hungarian rebel, as I remember the circumstances, and in consequence of his participation in the insurrection of 1848, to save his life he fled from Austria to America, and made declaration of his purpose to be naturalized. He was not naturalized, but he declared his purpose to become a naturalized citizen, and found his way back to European waters again, not Austrian, but I think it was in the port of Smyrna, and there an Austrian man-of-war undertook his recapture and did secure his person and convey him on board an Austrian ship; but the American captain, Ingraham, who was lying with his vessel in those waters at that time, learned of the circumstance and demanded the release of Koszta, without direct authority from his Government; but by virtue of the fact that he was an American and in command of an American ship he undertook himself to interfere, without any formal application, when he found that the rights of one who had undertaken to become an American citizen were being endangered, and he demanded the delivery of Koszta to himself; which was refused. He immediately cleared his decks for action, and Austria surrendered him, and the whole world applauded his conduct. There was no application there, no contact with the Government at all.

On page 149 will be found the record of Riel's naturalization in the United States district court of the third judicial district of Montana:

In the United States district court of the third judicial district of the Territory of Montana.

Present: Hon. D. S. Wade, judge.

In the matter of the application of Louis David Riel, an alien, to become a citizen of the United States of America. In open court, March term, A. D. 1883, this 16th day of March, A. D. 1883, as yet of said term.

This name David, Riel adopted after he came to America. There is no question of the man's identity.

It appearing to the satisfaction of this court, by the oaths of E. L. Merrill and Levi Jerome, citizens of the United States of America, witnesses for that purpose, first duly sworn and examined, that Louis David Riel, a native of Canada, has resided within the limits and under the jurisdiction of the United States five years at least last past, and within the Territory of Montana for one year last past, and that during all of said five years' time he has behaved as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same; and it also appearing to the court by competent evidence that the said applicant has heretofore, and more than two years since, and in due form of law, declared his intention to become a citizen of the United States, and having now here, before this court, taken an oath that he will support the Constitution of the United States of America, and that he doth absolutely and entirely renounce and abjure all allegiance and fidelity to every foreign prince, potentate, state, or sovereignty whatever, and particularly to Victoria, Queen of Great Britain, it is therefore ordered, adjudged, and decreed that the said Louis David Riel be, and he is hereby, admitted and declared to be a citizen of the United States of America.

D. S. WADE, *Judge.*

Signature: LOUIS DAVID RIEL.

Office of the clerk of the United States district court of the third judicial district of the Territory of Montana, *ss:*

I, B. K. Tatem, clerk of the United States district court of the third judicial district of the Territory of Montana, said court being a court of record, having a common-law jurisdiction, and a clerk and seal, do certify that the above is a true copy of the act of naturalization of Louis David Riel, as the same appears upon the records of said court now in my office.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court this 9th day of October, in the year of our Lord 1885, and in the year of our Independence the 111th.

[SEAL.] B. K. TATEM, *Clerk.*
By C. G. REYNOLDS, *Dep'y Clerk.*

Mr. MORGAN. What is the date of the decree?

Mr. BLAIR. It is the 16th day of March, 1883.

On page 151 of the appendix is the information or indictment upon which Riel was tried. I will not read it.

The first count describes him as a subject of our lady, the queen, not regarding the duty of his allegiance, etc. The second count describes him in the same way. The fourth count opens as follows:

4. And the said Alexander David Stuart further sayeth: That the said Louis Riel, then living within the Dominion of Canada, and under the protection of our sovereign lady, the queen, not regarding the duty of his allegiance, etc.—

Evidently looking or squinting to the defense of his American citizenship, the phraseology in the other indictment speaking of him as the subject of our lady the queen, then as living in the Dominion of Canada and under the protection of our sovereign lady, the queen, and, of course, entitled to that protection, although an American citizen so long as he resided there temporarily and behaved himself as a citizen.

On the one hundred and sixty second page is a letter from Major Mallet himself, addressed to the editor of the Traveller, a translation:

WASHINGTON, D. C., *August* 24, 1885.

DEAR FRIEND GAGNON: The journals which I have received during the past two days indicate that there is great diversity of views among our Canadian journalists in the United States in regard to the rights which American citizenship confers upon Louis Riel in his present unfortunate situation. I notice, too, that the public meetings are being held and petitions signed, and that these meetings and petitions are not agreed upon the best method to proceed to arrest the execution. Evidently there is danger that the generous, humane action of our people may be devoid of influence, by reason of the diversity of views expressed or the poverty of the arguments advanced in the memorials addressed to our Government asking its interference in Riel's case.

Being desirous to ascertain the views of the Department of State in regard to this matter, so as to satisfy myself, and, if opportunity afforded, be of service to my compatriots, I called on Secretary Bayard this afternoon to talk over the matter with him. We discussed the subject together at considerable length. From our interview I can say that the following is substantially the views of the Department of State. Of course the form in which it is expressed is my own:

First. The American Government will not take the initiative in examining into Riel's citizenship or the rights thereunder.

Second. The Government has so far done nothing in the matter, except to inquire of the War Department as to the truth or falsity of a statement to the effect that Riel was captured on American soil. This information was asked for to reply to a New York correspondent who inquired concerning the matter. The Secretary read me his reply, which is unimportant.

Third. The Government will take no action in the case, unless the matter is presented to its attention in a formal manner, the facts and arguments upon which the interference of the Government is invoked to be properly stated in writing.

Fourth. The Government would not be disposed to inquire into or review the proceedings of the court which tried Riel, unless it was shown that he was discriminated against, *i. e.*, that he was tried by harsher methods than a Canadian citizen would have been tried by.

Here is a note which will save me the trouble of making a remark of my own. The author says:

It is presumed, that if Canadian courts were in the habit of using tortures in the trial of Canucks, Secretary Bayard would not object to their using it upon American citizens resident in Canada.

I do not assume that the Secretary of State took this position. I read from the statement of the president of the Canadian League of the United States, who has since this all happened been promoted to a high position under this Government.

Mr. MORGAN. The Senator will allow me to say that I do not understand that to be a quotation from anything Mr. Bayard said or wrote.

Mr. BLAIR. No. This man undertakes to state what Mr. Bayard said. I do not undertake to say that he quotes Mr. Bayard correctly.

Mr. PAYNE. Who is he?

Mr. BLAIR. This is Major Mallet, who has been appointed to a prominent position in the Indian Department after charging the Government, and the Government's attention being called to it, with the utmost negligence and dereliction in its duty in not making inquiry into the alleged wrong suffered by an American citizen.

Mr. MORGAN. What office was he appointed to?

Mr. BLAIR. It is a prominent position; superintendent of Indian schools, or inspector of Indian schools.

Mr. MORGAN. Was he confirmed by the Senate?

Mr. BLAIR. I presume he was confirmed by the Senate. He formerly held a responsible position in the Treasury Department, and I have never heard anything against him. I understand he is a gentleman of the very highest character, and I should like to know whether he tells the truth, and that is why these resolutions were offered. The Government undertake, after having had these matters brought to their attention, and three copies of this book being sent to the President and the Secretary of State, containing all these statements—after all this had been developed and brought to their attention—these accusations made, these charges made by this man, they indorse in the very highest and most significant manner possible the witness who is making these serious and venomous charges against them, if they be untrue—and I must not be misunderstood—and I wish to be explicit upon that point, as in any way impeaching the testimony of Maj. Edmond Mallet. He is the head of the French-Canadian societies of this country and is supposed to be, and in fact this author who brings these matters to our attention speaks of him in high terms as a very accomplished, truthful, Christian gentleman. I take it he is, or he would not be holding this office.

Mr. PAYNE. You say he has been appointed to office?

Mr. BLAIR. Yes, sir. There are about a million of French Canadian citizens in the United States; and I submit we are not going to permit those men, after they become naturalized, to be hanged for nothing in Canada, without inquiring of foreign powers, when it is brought to the attention of the Government of the United States that they have been wrongfully accused; that they are in a condition of mind incapable of committing crime, and that even due process of law has been violated in trying their case. I know those people have not had all the advantages of American citizenship, but there are a great many intelligent, cultivated, and eminent gentlemen among them; and as a whole population, I believe there is as much of hope in the French-Canadian population as in any of the immigration which seeks our shores.

But to proceed at the point where I was interrupted:

Fourth. The Government would not be disposed to inquire into or review the proceedings of the court which tried Riel unless it was shown that he was discriminated against—*i. e.*, that he was tried by harsher methods than a Canadian citizen would have been tried by.

Fifth. The Government recognizes the principle that every country has a right to determine for itself what constitutes treason, and it would not be disposed to question Canada's right to try Riel for treason even though he be a native or naturalized citizen of the United States.

I understand the Secretary to say that Riel's case was like some of the Irish so-called revolutionists, so far as it regards this Government, and that the American Government would do all that was proper for Riel, as it had done for the others.

With these views of the Department of State before us, it seems to me that our duty is traced more clearly.

You are aware that I knew Riel intimately, both before and after his becoming insane, knowing the material he is made of, as well as his intimate views and aspirations, I believe that when he gave himself up (when he could have escaped with Dumont) he did so with the determined purpose of having himself put to death as the best means of serving his people and country. I am of the opinion that in madness he acted with an extreme sagacity, which he might have been devoid of with his wits. If Riel is executed, mark me! the children of his executors in the not distant future will erect monuments to his memory. You know the history of Pontiac. Riel is the Pontiac of the nineteenth century

Yours, truly,

EDMOND MALLET.

Here is a copy of another letter dated February 9, 1886, in which he goes over the same ground:

FEBRUARY 9, 1886.

DEAR SIR: Your note finds me on the eve of my departure from the city for a few days, and in the midst of such occupations that is really impossible for me to find the newspaper articles which appeared relative to my efforts to have the United States Government interfere in the Riel case. I will now give you the substance of what was done, and if that does not quite answer your purpose, let me know, and I will give you fuller indications next week.

I first consulted Mr. Bayard, and he took this position substantially:

"1. That it was not the duty of the Government to inquire into the fact of Riel's American citizenship; and

"2. That the Government could not interfere even if he was an American citizen, either natural or adopted. If the case was brought to the attention of his Department it would be examined into, but under no circumstances could the Government, he thought, interfere, unless it was shown conclusively that he had been discriminated against during his trial by reason of his American citizenship."

When it became apparent to me that the Canadian Government had committed itself to the execution of Riel, under the pressure brought to bear upon it by the Orange lodges of Ontario, I went to the President and appealed to him to prevent this judicial murder. I based my appeal on the following: (1) That Riel was an American citizen, that he had been indicted as a British citizen, his American citizenship having been entirely ignored, although offer had been made to prove the fact by documents captured at the battle of Batoche, and then in the Canadian Government's hands, and that he had been tried by a half jury of six men selected by the judge, and that judge was a mere justice of the peace; (2) that Riel was insane; and I offered testimony to that effect; and (3) that the authority to put a human being to death for any cause whatsoever is not inherent in government, but is delegated from God, and that such delegated power can be exercised only in certain conditions, such as sound mind, etc. The President seemed much interested in the case, expressed himself in sympathy with what I told him; but he considered it a very grave matter to interfere. At last I asked that he send for Mr. Bayard and the British minister, and see if an amicable understanding could be made to save Riel. The President then said he would consult with the Secretary of State and see what could be done. During the night of the same day the Associated Press announced that, to my appeal, the President had been constrained to decline interfering in the matter.

Respectfully, yours,

EDMUND MALLETT.

THOMAS D. RAMBAUT, Esq., *New York, N. Y.*

I next present the letter on page 167, by J. Damiens, S. J., a Jesuit father:

ST. PETER'S MISSION,
St. Peter Post-Office, Mont., January 14, 1887.

DEAR SIR: Your favor at hand, and in reply I would say that Louis Riel was here just prior to the Northwest rebellion, and he left this place at the request of a delegation composed of three half-breed men who came after him from their northern country. He lived here about six months. He was married to a half-breed girl called Marguerite Monete, from whom he had two children, John, born 9th May, 1882, and Mary Angelia, born 11th September, 1883. The girl was born here, and the boy somewhere down the Missouri or Musselshell, while Riel was living on the prairie among the half-breeds. Politics was his principal thought [you] might say, and in the last years from the Democratic [he] passed to the Republican party. Sun River is a small place, and he lived not in town, but here around the mission, which is about 20 miles from Sun River. He was making his living teaching school, and [it] would have been better for him as he was told to stick at it and retire entirely from all politics, but his mind was changed there, and this brought the unfortunate man to such a frightful end. With kindest regards, I remain,

Yours, respectfully,

J. DAMIENS, S. J.

Mr. WILBUR F. BRYANT,
Judge, West Point, Nebr.

I do not know that there is any other matter in the book that I need to call attention to at the present time. I read from it to show that these charges are of a serious character, and, as it seems to me, they should be investigated. I have introduced these resolutions as what appeared to me the proper method of commencing an investigation. Before the taking of evidence, it seemed to me that the President and the Secretary of State should be heard to give their account of the matter, and therefore the resolutions were offered in these words:

Resolved, That the President be requested to communicate to the Senate any knowledge or information in his possession or in the possession of the Department of State relating to the case of one Louis Riel, otherwise Louis David Riel, who was hanged for the alleged crime of treason by the authorities of the Dominion of Canada on or about the 16th day of November, 1885, notwithstanding that he was recommended to mercy by the jury who convicted him, doubts being alleged of his sanity, with other mitigating circumstances; and the same Louis Riel, in whose favor judgment of naturalization is alleged to appear or record in the United States district court of the third judicial district of the Territory of Montana of the March term, 1883; and also to communicate to the Senate all information of any application made by one Edmund Mallett, now or lately president of the French-Canadian League of the United States, or by any other persons, whether verbally or otherwise, to the President or to the Secretary

of State in behalf of said Riel, prior to his execution, requesting inquiry into the circumstances of his case, his alleged citizenship of the United States, and whether the proceedings in his case had been according to due process of law, and whether there had been a full, fair, and sufficient trial thereof, including the presentation of the fact of his citizenship, and especially of the proof of his insanity, with which he had previously been afflicted, and for which he had been long confined, undergoing treatment therefor in an asylum for insane persons, and from which there was alleged to be strong proof of his being afflicted when the events occurred for which he was charged with treason, as aforesaid; also what action, if any, was taken by this Government in the premises to secure a new trial or mitigation of the punishment of the said Riel, together with copies of all papers, letters, documents, and correspondence bearing upon the subject-matter; also to inform the Senate whether the said Mallett was at the time of his said alleged application in the employ of the Treasury Department of this Government, and if so, whether since the rejection of said application, or the neglect and refusal of this Government to inquire into the case of said Riel (if said application was rejected and said inquiry was neglected and refused to be made), said Mallett has been promoted or appointed to other and more responsible and lucrative service under this Government, and if so, to what service, together with any other facts relating to the subject-matter of the trial and execution of said alleged American citizen Riel by the authorities of the Dominion of Canada.

And whereas the said Edmund Mallett, under his hand, in a letter dated at Washington, D. C., August 24, 1885, and widely published in the press and supposed to have been communicated to the President and to the Secretary of State, alleged in reference to his interviews with the President and the Secretary of State that the Government refused to inquire into said case, except upon the condition following (among others), to wit, the condition contained in these words: "First. The American Government will not take the initiative in examining into Riel's citizenship or the rights thereunder," with other matter, showing, if true, gross neglect and indifference to the rights of an American citizen when in extreme need of the protection of his Government, being without means, deprived of liberty, and about to be executed by a foreign nation: Therefore,

Resolved, further, That the President be requested to inform the Senate whether the aforesaid allegation of the refusal of this Government to institute inquiry into the case of said Riel upon the statements and petitions of the said Edmund Mallett and others is true, and if the same be not true, whether the said Mallett has ever withdrawn or retracted the same, and, if he still adheres to the same, for what reason the said Mallett, since making such public charges against this Government, has been appointed to a responsible and lucrative position in the public service, requiring a high order of ability and of personal integrity for the proper discharge of the duties thereof; and if the above charge of the said Mallett be or be not true, whether the President or the Secretary of State had knowledge thereof and of the contents of a certain book entitled "The Blood of Abel," written by one Wilbur F. Bryant, and published in the year 1887, prior to the said appointment of said Mallett, which said book relates to the case of the said Riel, and contains the aforesaid and other letters and statements of the said Mallett, with much other like evidence and allegations of fact charging this Government with gross and inexcusable negligence in the care and defense of the rights of an American citizen when in foreign parts and about to suffer an infamous death without cause.

The PRESIDING OFFICER (Mr. PASCO in the chair). The hour of 2 o'clock having arrived, it is the duty of the Chair to lay before the Senate the unfinished business, being the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. BLAIR. I will just say, if permitted, in regard to this matter that, as the resolutions are long, I do not ask that they go direct to the President without being considered by the Committee on Foreign Relations if that be thought to be the more judicious way. I only wish the matter to be inquired into in that way which to the committee may seem to be the most appropriate and the most thorough, for it concerns deeply the honor of the Government and it ought not to be, and I do not wish it to be, considered as a partisan matter at all.

The PRESIDING OFFICER. It is the duty of the Chair to lay before the Senate the unfinished business.

Mr. BLAIR. I will move to refer the resolutions to the Committee on Foreign Relations.

The PRESIDING OFFICER. The Senator from New York [Mr. HISCOCK] is entitled to the floor. Does the Senator from New York yield to the Senator from New Hampshire?

Mr. BLAIR. I do not know whether there is any desire on the part of any one to say anything. I think in a matter of this complexity it will be better that the resolutions should go to the Committee on Foreign Relations for examination before proceeding further; but, of course, it is a matter in the hands of the Senate. I am personally indifferent as to what course is taken with them.

Mr. MORGAN. Let the resolutions go to the committee.

The PRESIDING OFFICER. If there be no objection, as suggested by the Senator from Alabama, the resolutions will be referred to the Committee on Foreign Relations. The Chair hears no objection, and it is so ordered.

Mr. EDMUNDS. I ask my friend from New York to yield to me.

Mr. BLAIR. May I be indulged to say one thing? I suggest that the Committee on Foreign Relations, if they have any doubt at all on the subject, be empowered to send for persons and papers. I can give them some information if it shall become necessary.

Mr. EDMUNDS. The committee will consider that.

WIDOW OF CHIEF-JUSTICE WAITE.

Mr. EDMUNDS. I am authorized and instructed by the Committee on the Judiciary to report without amendment the bill (S. 3621) for the payment to the widow of the late Chief-Justice Morrison R. Waite the balance of a year's salary; and I ask for its present consideration.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. BERRY. I object.

The PRESIDING OFFICER. The Senator from Arkansas objects. The bill will go to the Calendar.

Mr. COKE subsequently said: I desire to say that I was out of the Chamber when the bill was reported by the chairman of the Judiciary Committee for the relief of Mrs. Waite. I wish to make the statement now that I would have made then had I been here. I voted against that bill in committee, and shall vote against it in the Senate.

The PRESIDING OFFICER. The Chair informs the Senator that the bill has gone to the Calendar.

Mr. COKE. The Senator from Mississippi [Mr. GEORGE], who is seated just behind me, also voted against the bill in committee.

LIGHT-HOUSES, LIGHT-SHIPS, ETC.

Mr. PALMER. The Senator from New York kindly gives way that I may make some reports. I am instructed by the Committee on Commerce to report back the bill (H. R. 1239) to extend the jurisdiction of the Light-House Board to the Sacramento and San Joaquin Rivers, California, and ask that the Senate conferees be discharged from the further consideration thereof.

The PRESIDING OFFICER. It will be so ordered, if there be no objection.

Mr. PALMER. I now move that the Senate recede from its amendment to that bill, which will leave it just as it came from the House of Representatives.

The PRESIDING OFFICER. It will be so ordered in the absence of objection. The Chair hears none, and it is so ordered.

Mr. PALMER. As there are several of these bills, for the information of the Senate I will state that the amendments refer to the appropriation. The bills came over here from the House of Representatives with a limit fixed. The Senate merely made the appropriation with each bill. The conferees can not be gotten together now after a conference has been asked, and on that ground I am instructed to report the bill back and move that the Senate recede from its amendments so that bills can be passed as they come from the House. I now report the several bills which are in the position I have indicated.

The PRESIDING OFFICER. The same order will be made in each case in the absence of objection. The titles of the bills will be reported by the Secretary.

The SECRETARY. A bill (H. R. 1249) for establishing a light-house and fog-signal on Roe Island, Suisun Bay, California.

Mr. DOLPH. I suggest whether it ought to appear that these bills are reported from the Committee on Commerce or reported by the Senate conferees.

The PRESIDING OFFICER. The Chair understands this comes in as a report from the Committee on Commerce.

Mr. DOLPH. I think the record will show that these bills are in the hands of a conference committee. I do not profess to be so well informed as to know precisely how the bills got before the Senate.

Mr. PALMER. I consulted with the President of the Senate in regard to this, and he regarded the *modus operandi* as being perfectly proper. The conferees have consulted with other members of the Committee on Commerce.

The PRESIDING OFFICER. The conferees will be discharged from the further consideration of the bill.

Mr. DAWES. Nothing is clearer than that any motion which brings the two Houses together takes precedence of all other motions in reference to any bill pending.

Mr. DOLPH. The Senator did not understand my proposition. I think the RECORD shows that the House has non-concurred in the amendments and asked a conference, or that the Senate asked a conference and it was granted by the House? Those bills were sent to a conference committee. Now the Senator from Michigan says he reports them from the Committee on Commerce.

Mr. DAWES. As I understand the parliamentary law, no matter where a bill is, any motion that brings the two Houses together takes precedence of all other motions.

Mr. DOLPH. I am not raising a question as to precedence. I am raising the question as to whether the record should show that these bills are reported back from the Committee on Commerce or whether it should not be by a motion, without any report, by the chairman of the Senate conferees to discharge the conferees from the further consideration of the bills. It was only to get the record straight, so as not to show that the bills were reported by the Committee on Commerce when they are not before that committee, that I ventured to interpose.

Mr. PALMER. Under the circumstances of the case, I imagine, as long as the conferees of the Senate are included in those who recommend this course, there can be no doubt as to its practical operation, whatever may be the technical distinction to be observed.

The PRESIDING OFFICER. The order is on the motion of the Senator from Michigan that the conferees be discharged, and that the Senate recede from its amendments to each bill. That order will be entered in each case. The titles of the bills will be reported.

The Secretary read as follows:

A bill (H. R. 10183) to establish a light-ship off Grand Round Shoal, near Nantucket, Mass.;

A bill (H. R. 8855) for the establishment of a light-ship with a steam fog-signal at Sandy Hook, New York Harbor;

A bill (H. R. 7604) for the establishment of a light-house and fog-signal at or near Gull Shoal, Pamlico Sound, North Carolina;

A bill (H. R. 7421) for establishing a light off Pamlico Point, North Carolina;

A bill (H. R. 5700) to facilitate the transportation of life-saving and light-house supplies at Hog Island, Virginia; and

A bill (H. R. 1641) for the erection of a light-house at or near a point about midway between Barnegat and Navesink lights, in the State of New Jersey.

The PRESIDING OFFICER. The same order will be entered in each case.

ALIEN MINING CORPORATIONS IN THE TERRITORIES.

Mr. JONES, of Nevada, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the following resolution, submitted by Mr. STEWART, October 3, 1888, reported it without amendment, and it was considered by unanimous consent, and agreed to:

Resolved, That the Committee on Mines and Mining be instructed to ascertain and report to the Senate at the beginning of the next session of Congress the number of aliens, foreign companies, and corporations owning or working mines in the Territories of the United States, together with the length of time they have been so engaged, the amount of capital invested by them in mining operations, as near as practicable, the amount of dividends paid, and the amount of money expended by them in such mining operations, and what effect the owning and operating of mines by aliens, foreign companies, and corporations has had upon the growth and prosperity of the Territories; and for that purpose the committee, or any subcommittee thereof, may hold its sessions at such times and places as it may deem proper, and employ such clerical assistance as may be necessary. The expenses of such investigation shall be paid out of the contingent fund of the Senate.

PURCHASE OF SEEDS.

Mr. JONES, of Nevada, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by Mr. HAWLEY September 20, 1888, reported it with an amendment, after the word "oaths," to insert "also to employ a stenographer;" so as to make the resolution read:

Resolved, That the Committee on Agriculture is instructed to inquire and report concerning the purchase of seeds for distribution by the seeds division of the Department of Agriculture, and for that purpose it shall have power to send for persons and papers and administer oaths, also to employ a stenographer. The expenses of said inquiry shall be paid out of the contingent fund of the Senate upon vouchers approved by the chairman of said committee.

By unanimous consent, the Senate proceeded to consider the resolution.

The amendment was agreed to.

The resolution as amended was agreed to.

MRS. FANNIE PEARSON.

Mr. JONES, of Nevada, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the following resolution, submitted by Mr. DAVIS September 25, 1888, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay, out of the "miscellaneous items of the contingent fund of the Senate," to Mrs. Fannie Pearson, widow of Granville L. Pearson, deceased, late a session laborer of the Senate, the sum of $360, being an amount equal to six months' salary at the rate per annum allowed by law to the laborer aforesaid; said sum to be considered as including funeral expenses and all other allowances.

COMMITTEE ON ADDITIONAL LIBRARY ACCOMMODATIONS.

Mr. JONES, of Nevada, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the following resolution, submitted by Mr. VOORHEES October 3, 1888, reported it without amendment:

Resolved, That the Select Committee on Additional Accommodations for the Library of Congress be, and it is hereby, authorized to sit during the coming recess of Congress, and any necessary expenses shall be paid out of the contingent fund of the Senate, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. COCKRELL. Let that go over.

The PRESIDING OFFICER. The resolution will go to the Calendar.

MISSISSIPPI RIVER BRIDGE AT LA CROSSE, WIS.

Mr. SPOONER. The Senator from New York kindly yields to me to allow me to ask unanimous consent that the Senate proceed to the consideration of the bill (H. R. 11139) to authorize the building of a bridge or bridges across the Mississippi River at La Crosse, Wis.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, after the word "built," at the end of line 16, to insert:

And there shall be submitted to the Secretary of War for his examination and approval a design and drawing of the bridge, and a map of the location, giving, for the space of 1 mile above and 1 mile below the proposed location, the topography of the banks of the river, the shore-lines at high and low water, the direction and strength of the currents at all stages, and the soundings, accurately showing the bed of the stream, the location of any other bridge or bridges, and all other information required.

The amendment was agreed to.

The next amendment was, in section 2, line 4, after the word "Wisconsin," to insert "and approved by the Secretary of War;" so as to make the section read:

SEC. 2. That said La Crosse and Minnesota Bridge and Ferry Company shall have the right to charge and collect a reasonable rate of toll, not exceeding the amount limited by the laws of Minnesota or Wisconsin, and approved by the Secretary of War.

The amendment was agreed to.

The next amendment was to strike out section 6, in the following words:

SEC. 6. That this act shall take effect and be in force from and after its passage.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

THE REVENUE LAWS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9051) to reduce taxation and simplify the laws in relation to the collection of the revenue.

Mr. HISCOCK. Mr. President, in view of the policy outlined in the President's message and the professions in his letter of acceptance in connection with the provisions of House bill 9051, known as the "Mills bill," it is just to criticise him and the recent attempts of his party to explain away and misrepresent the effect and purpose of the bill which they claim is calculated to benefit rather than injure American labor and capital.

Our people have always imported largely of those goods produced here, but in quantities insufficient for their consumption, and from the first agitation of a tariff for protection to the present time the opponents of that system have urged that the customs duties were added not only to the cost of the goods imported, but also the price of the corresponding articles we produced.

That has been peculiarly the sophism of the American free-trader, and though successfully disproved by Hamilton and by writers and statisticians since his time it nevertheless occasionally transpires that a new or fresh champion will rush into the arena of debate and parade the dogma with all the airs and consequence of a discoverer of some new and startling truth, destined to solve a great economic question; and the President, the latest of all, indorses to the people of the country this old American free-trade argument.

Were this exploded fallacy true, the President should not only urge but resort to every constitutional method to remove the oppression. Revolutionary methods, if necessary, would be approved by the people for the destruction of the system. If this sophism were true, the protective system would never have been adopted, or if adopted, after a brief period the people without distinction of party would have demanded its abandonment.

Mr. ROGER Q. MILLS, in a late magazine article discussing protection, declares:

And the time will come when all the people will rejoice to see this business relation—a darker evil than that of slavery—eliminated from the land. It is a darker evil, for while the Southern system of unrequited toil enslaved the blacks, this system is reducing white labor to slavery, and we revenue reformers or free-traders, if we may be so called, are making our fight for our own race, whose misery keeps pace with our prosperity, and we can measure our present progress, not only by the palaces of millionaires, but by the huts and hovels of oppressed labor.

If Mr. MILLS was right—if it were a darker evil than that of slavery—we would not now be discussing the merits of his bill; the oppressed country would not have waited the slow progress of his party for the last twenty years, but would have contested the question with the "barons" by the heroic and patriotic methods which "eliminated slavery from the land."

I can not consume time in computing the cost in treasure to the American consumers were it a fact that the percentage of duty upon the goods we import are added as well to the price of the similar goods produced here. The amount, I assume, which would have been exacted under the system, were that true, as has been boldly asserted by Mr. Thurman, would be far greater than the present aggregate wealth of all our people. Why, then, has not that wealth been exhausted and our people become beggars and bankrupts, instead of having been made by it the wealthiest upon the globe; and where is the misery and where the hovels and huts described by the distinguished gentleman from Texas?

I assume the President was not so disingenuous as to refer to an hour, a day, or even a year in speaking of the effect of a long approved economic system, but of its defects as a policy for the country, and was warning the people against its exactions and burdens. If he is correct, our protective system is a criminal injustice, and unless he is mistaken it would long before this have impoverished our people and made them the poorest and most degraded upon the earth. Our villages and cities would now be but aggregations of the "huts and hovels" that Mr. MILLS sees only in imagination, and our agricultural area would have been unreclaimed, unsubdued, and unpeopled by civilized man. There must be either some error in the doctrine they indorse, or else

there are countervailing benefits they have not discovered or imparted to us.

But the President says he does not mention the fact "to discredit the system." If he thoroughly believed the old fallacy he indorsed, he should have made his statement to discredit the system of protection and should continue to sound the alarm until (were he right) the burden should be removed from a long-suffering and long-enduring people; and a great national evil should be remedied; when he would be hailed as a deliverer divinely ordained—one after death to be canonized.

For nearly a century we have practically demonstrated that the effect of protection upon national industries by a country possessed of the raw material sufficient for the finished product which its people consume (or if grown upon the earth then adapted to the climate and the soil), to the extent of equalization with more favored conditions elsewhere in respect to cheaper labor or cheaper capital, has been and will be to increase the volume of the product in the market and to depress and cheapen its price; it is a stimulation to, and increases the competition which forces prices downward.

Price depends upon consumption and supply, and protection increases supply to so marked a degree and forces the price so low that it would be ruinous to producers, except for the increase in consumption. If the goods are a necessity, convenience or luxury to man, a lower price enables him to increase their uses, thus adding to his comfort or pleasure. Again the product of the mechanical industries are applied to new uses when made possible on account of their cheapened cost. Especially is this true with respect to iron and steel for building and fencing, resulting in a great saving to farmers and builders.

The facts need not be fortified by statistics. I have a right to appeal to observation. Sugar illustrates the argument. The protection afforded by the German and French Governments to the beet-sugar industries of those countries has doubled the product of the world, forcing the price to the lowest point known. This is also true not only as to iron and steel goods, but equally so with respect to cotton and woolen fabrics, manufactures of wood, chemicals, and confectionery. There is not, I believe, an exceptional line of manufactured articles in use by man that is not to-day at the lowest price in the history of the market.

In these "latter days" political writers and economists have searched for the cause of the great depression in prices which all have recognized, and they have found it largely due to the increased production in the "protected countries," and it has also resulted, as they have learned, that other countries have cheapened the cost of production, correspondingly increasing their volume, and doubtless the smaller percentage of profit upon the larger volume of business has equaled, if not exceeded, the profits upon the smaller but more expensive product.

The last ten or fifteen years have been remarkable for the constantly decreasing cost of production, and our Republican administrations enforcing the policy and system of protection have been the chief and most important force in this successful war upon high prices.

The President and our Democratic friends must have observed this. Possibly partisanship may have impaired the mental vision of the friends, but some other reason should be found for the President proclaiming and indorsing in a campaign document the old worn-threadbare fallacy.

I am quite aware that I have been thrashing old straw—I believe nothing new can be suggested on the tariff question—but the letter of acceptance justified me.

We are all aware of the reasons which vindicate the protection to our industries, even though there follow temporarily an advance in the price of foreign goods we import. They are the rapid decline in the values of both foreign and domestic goods; the diversification of labor, affording opportunity for all to apply themselves to those industries best suited to their physical conditions and mental capacities; the distribution of labor so that too many workers are not compelled to follow a single industry, overburdening it and so increasing the product as to render it unremunerative; the increased mental activity and higher education rendered necessary to engage in mechanical industries, mining and transportation, and their business management and administration; the enhanced value of our raw materials, and the development of our National resources.

Against a possible temporary increase in the price of imported goods to consumers—if advanced at all—I point to our forests made valuable by the mechanical industries that shape their wood into form for a thousand uses; to the iron ore which would be worthless if the American mechanic did not and could not adapt it to the wants of man; to our coal deposits, indispensable for supplying fuel for our manufacturing industries and transportation, practically valueless without them; to our vast system of railroads which are supported from the transportation of our natural products; but above all, to the increased value of our otherwise unproductive territory, transformed into great States by agriculture and the mechanic arts.

Against these totals place the occasional temporarily increased cost to the consumers, which the President exaggerates and deplores, and we will find to the credit of the Republican system of protection that grand sum which defrayed the expenses of our civil war, which has nearly extinguished the public debt, which has maintained and extended our system of internal commerce, has paid the pensions to our soldiers, and which has given a more general and higher education to our people, and increased beyond that of any other era or stage of our National existence the comforts and luxuries of life, and has contributed in a greater degree to individual wealth and earnings. There has been no complaint of burdensome taxation or excessive prices except in Democratic speeches, messages, and letters of acceptance.

We have become a self-supporting, self-defending Nation, with a population of 60,000,000 people, possessed of the resources, education, and skill requisite for their happiness and for the promotion of continued national progress and prosperity. The welfare and advancement of each individual is limited only by his energy and mental and physical capacity. Our Government with its protective policy has and will accomplish for each citizen all that any human Government ever has or can.

No wonder the President supplements his statement of belief in the old sophism that protection so greatly increases prices by the remark that his statement was not made "to discredit the system." But here we have the peculiarity of Democratic argument. An assertion that, were it true, would prove protection a monstrosity in government—made for effect in the November election—is followed by a disclaimer of hostility to it. This is equaled by the professions of a desire to make our labor more remunerative, and at the same time advocating the abandonment of the best market in the world for a competitive share in the poorest as the surest way to accomplish the object.

The issue is fairly joined by the two great political parties, and free trade or protection will be the American policy after March, 1889. Neither subterfuge nor new confessions of faith will conceal or obscure the real question.

Democratic orators in the manufacturing States are attempting to shift their ground and conceal the purpose of their party; but the official utterances of the President, the reports of the Secretary of the Treasury, emphasized by the Mills bill, which was indorsed by the Democratic national convention and passed the House of Representatives by a strict party vote, leave no doubt whatever as to the true position of the Democratic party upon the great economic question.

The history of the Republican party, its platforms, and, above all, the bill reported to the Senate as a substitute for the Mills bill, leaves no doubt as to the position of that party. The Democracy has declared for free trade and for the destruction of our National industries. We have a home market composed of 60,000,000 consumers of the products of our agriculture, and the goods made by our manufacturing industries. The Republican party has resolved to preserve that market for our people, and Democracy with equal resolution proposes free competition with foreign capital and foreign workmen.

It is the same question that divided the North and South, and incited a bloody and expensive war, and the division is on the same agricultural and geographical lines. It is another great struggle on the part of our Southern friends for cheap and degraded labor and against the industrial system of our Northern States; as Mr. MILLS said, "a darker evil than that of slavery."

There are several causes which have tended to increase the value of labor for the last twenty years in this country. The two most prominent are the manufacturing industries of the North and the abolition of slavery in the South. Democracy acquiesced in the latter, but is now making its final struggle for the destruction of the former.

We have a country extending over nearly one hundred degrees of longitude and from the frozen north to the borders of the tropics, rising in altitude from the shores of two oceans to pastures 7,000 feet above the sea, suited to the production of nearly everything necessary to feed and clothe human beings. Its fruits, grains, vegetables, and textile fibers supply the raw material for the necessities and luxuries of life. Our forests abound in those woods adapted to and that can be easily fashioned for all the uses of man, and are so distributed in great abundance over the whole area that with our facilities for transportation the cost when fashioned is a labor cost alone.

Nearly every chemical product required either for its medicinal qualities, for use in manufacturing, or for decoration, is found in our country and scattered throughout our States and Territories so profusely that competition as to price is assured. We are supplied with iron ore and coal from our own mines in an abundance that insures competitive prices in both; the farming area of our country has a capacity over and above the needs of our home consumption more than sufficient to supply the deficiencies in Europe. Our nation of 60,000,000 people with its boundless resources the Democratic party insist shall not be self-supporting or self-sustaining, but shall depend on other nations and the people of other countries to weave the fabrics our people wear and to grow the wool in them, to manufacture the furniture and otherwise fashion the woods they use, and to produce the iron and steel they consume in its various manufactured forms, leaving hidden, undeveloped, and valueless our vast beds of ore. More than this, our agriculture is now encountering sharp competition with the products of India, Australia, the Argentine Republic, and other South American countries, and Democracy threatens in its crusade for cheap labor to impoverish our home market.

There are about five hundred paragraphs in the Mills bill relating to

enumerated articles in the dutiable schedule of our present tariff. The Mills bill transfers to the free-list about one hundred of the paragraphs. Sixty-six relate to manufactured articles and twenty-six to the products of the farm, garden, or mine. The Mills bill reduces the duty on articles in nearly two hundred paragraphs of the present law. By it three-fifths of the products of our country are either thrown open to absolute free trade or the protection is reduced to so meager a scale as to give our market to foreign capital and foreign labor unless our labor be reduced to the foreign rates for wages.

It is cheap labor the other side is fighting for. They have as little sympathy with well-paid labor now as before the war. Their laboring class now, as then, is the colored population, and those who deny them their political rights naturally would cheapen the value of their labor, an equally effective step for their degradation and quite likely necessary to maintain supremacy over them. Well paid men are well fed, well clothed, strong, and become educated, and will not remain in political servitude.

I know the excuse is the reduction of our revenues. On that point there is no particular difference between the two parties. The substitute reported by the Senate Finance Committee provides the more surely and for a larger reduction than the Mills bill, and the necessity for reducing taxation, therefore, is not involved in this controversy.

Democracy is not distressed over the surplus question now. "One hundred million dollars wrung from the tax-payers annually to be squandered in improvident appropriations" was the party cry four years ago. This year we have but little surplus over their appropriations. The Democratic leaders have coined another phrase, and but little has been said in the present discussion about the surplus. The hungry crowd in possession of the Departments has nearly exhausted it, and for the meager amount remaining in the Treasury a hungry expectant crowd is clamoring. "Reduction of surplus" is not so industriously used to conjure with as four years ago. The Mills bill illustrates this. The most that can be claimed for the measure is reduction in our revenues of about $70,000,000. Two and four years ago we were assured by our Democratic friends that they could be reduced $100,000,000 or more.

Both sides concede that a reduction can be made and in about the same amount, still leaving a sufficient revenue to pay the interest on the public debt, the pensions to soldiers, and for the administration of the Government; therefore the question of the amount of taxation is not involved in the discussion, but that of lessening the burdens to consumers and the manner in which the reduction shall be made is involved in the controversy.

Both parties propose to raise a large proportion of our revenues from customs levied upon imports; and I maintain that independent of the incidental benefits claimed for protection it is a matter of no consequence to the American consumer or tax-payer whether the customs duties are levied and collected on four hundred articles which enter equally into general use here and that will be produced in this country (if the labor cost is equalized with that of Europe and India) in sufficient quantities to supply our wants, or upon one-half of that four hundred, the other half being placed on the free-list. The burden of taxation is not lightened by either policy.

My argument is that, independent of the incidental protection which the tariff may afford, it is not of the slightest benefit to the consumers or tax-payers whether our revenues are raised by a protective tariff upon one-half of the dutiable goods now in general use and so low rates imposed upon the other half as to surrender our market to the importers altogether.

The Southern cotton-planter, I assume, uses both the agricultural implements and the cotton-ties. How is his burden increased if the duty is distributed upon the steel of both or placed wholly upon one, and why would the burden of taxation alone be increased if his share of the duty should all be placed upon one and a prohibitory tariff imposed upon the other? Manufactures of iron and steel are consumed generally by the American people, and it is fair to say that outside of cutlery and a few other articles for personal use, from the steam engine and the steel rail to the sewing-needle, directly or indirectly, the taxation imposed is borne by the tax-payers and consumers of the country, and in about the proportion they use them or depend upon the industries in which they are employed.

How then is the tax increased or made more oppressive if levied upon all steel goods in popular or general use than only upon one-half, and the others added to the free-list? The free-list half may, of course, be so arranged as to insure an unequal distribution of taxation upon localities; if there are any articles used exclusively in one portion of the country, as cotton-ties in the cotton States, then to place them upon the free-list would be a dishonest discrimination in favor of that section and not an equalization of taxation. To further illustrate this point take the article soap. It is made from agricultural products and animal fats, largely utilizing and making valuable waste products and materials that would be worthless and become pestilential except for that industry. Of this article we make $20,000,000 worth annually. The ad valorem duty is 20 per cent., and wherein is it more burdensome than the duty upon sugar equally in use by all classes and equally a necessity? Is the tax to the consumer lightened because 67 per cent. ad valorem is placed on sugar and soap is added to the free-list rather than 50 per cent. upon sugar and 20 per cent. upon soap, or has the location of the industries something to do with it?

What I have just said illustrates the sectional character of the Mills bill, and also equally disposes of the pretense that it is not a free-trade measure.

The House bill adds one hundred and three articles to the free-list, including wool, certain manufactures of wood, salt, cotton-ties, tin-plate, soap and glycerine (both practically agricultural industries), vegetables, meats, milk, certain machinery, etc. The American products competing with foreign goods added to the free-list aggregate in value at least $600,000,000 annually. They are as generally consumed by those classes who should carry the burden of taxation as those on the dutiable-list, and no reason can be given for the line drawn between the two, and none can be imagined, unless it was to strike down a portion of our protected industries now and the remainder later. The letter of the distinguished Senator from Missouri advertises the intention equally with the magazine article by Mr. MILLS to which I have referred. I could weary the Senate with quotations from the speeches of the sponsors for and friends of the monstrosity declaring the purpose as I have indicated, but it is unnecessary, for the bill advertises rather than disguises it.

The old free-trade doctrine was to raise the revenues from those goods consumed but not produced here. That has been abandoned by modern free-traders for an equally vicious and fatal one to our industries, which, instead of distributing the import duties so as to protect the whole line of domestic goods, makes so general additions to the free-list that the many hundred millions of dollars in capital employed in our home industries would be wasted or diminished and the labor engaged therein scattered and impoverished, and the now nicely adjusted proportions of labor to our various industries disturbed to the injury of all.

In this connection I refer to a startling feature of the Mills bill. I have before me a list of the principal products of the manufactories of the United States. The value and places of manufacture are taken from the census report of 1880, and doubtless there has been some increase since, but there has been little or no change in respect to the location or percentage of product in the respective States, I am assured. The list contains about one hundred lines of goods, all now protected. The aggregate value of the product for the last census year, 1879, was nearly two thousand million dollars. Of this amount less than 5 per cent. was manufactured in those States which composed the late Southern Confederacy, and a little more than 95 per cent. was manufactured and made chiefly outside of the States which contributed their quota to the Confederate service. This is a startling fact, but I have something still to add more remarkable. The Mills bill envelopes them all within its cuttle-fish folds and provides a 38 per cent. reduction in the protection now afforded them by law.

I have a table before me from which I desire to quote:

Soap and candles—$26,260,792 worth made in the Northern States and only $291,935 in value made in the Confederate States—placed on the free-list.

Bags, other than paper, $9,635,300 worth made in the Northern States; $91,300 made in the Confederate States.

Glass manufactures, $21,154,571 in value made in the Northern States; none in the Confederate States, and there is a reduction upon some of the grades or classes.

Stone and earthen ware, $7,814,027 in value made in the Northern States; $129,702 made in the late Confederate States.

Confectionery, a luxury, $23,880,672 in value made in the Northern States; $1,756,361 made in the late Confederate States, and a reduction of 20 per cent. of the duties or in the protection.

Brushes and brooms, $10,272,527, the value of the products made in the Northern States; $288,328 made in the Confederate States; and a reduction from 20 to 33 per cent. in the protection.

Iron-work, architectural (structural), $2,084,287 worth made in the Northern States, and $25,250 made in the Confederate States, and 11 per cent. reduction made by the Mills bill.

Files, $2,486,533 worth made in the Northern States, and none made in the Confederate States, and a reduction of duty of 40 per cent. by the Mills bill.

Nails and spikes, $5,629,240 worth made in the Northern States, none made in the Confederate States, and a 20 per cent. reduction made by our Confederate friends.

Carriages and wagons, $100,463,044 worth made in the Northern States, and $4,278,292 made in the Confederate States, and a reduction of 14 per cent. made by their representatives.

Furniture, $75,885,045 worth made in the Northern States, and $1,960,680 worth made in the Confederate States, and the Mills bill reduces the protective duties nearly one-half.

Hardware as classified in the census report, $22,644,793 worth made in the Northern States and $8,900 worth made in the Confederate States, and a reduction of 11 per cent. is made by the Mills bill.

But, Mr. President, I will not weary the Senate with calling attention to these various items.

Mr. HAWLEY. Will the Senator allow me to make a statement

right there so that it may go in in this place? I perceive that the majority of the Committee on Ways and Means which made up that bill is composed of Democrats from Confederate States in the proportion of six Democrats from Confederate States to two from Northern States.

Mr. REAGAN. If the Senator from New York will allow me, I desire to inquire in which class he puts the States of Maryland, West Virginia, Kentucky, and Missouri?

Mr. HISCOCK. I will say in reference to that that these products are largely in the North outside of those States. The comparison I speak of here, however, is between the Confederate States and the others.

Mr. REAGAN. The aggregate, then, will embrace the States of Maryland, West Virginia, Kentucky, and Missouri?

Mr. HISCOCK. Yes, sir.

A word in reference to Texas. Perhaps it is proper that I should make this statement in view of the expression I shall quote from the remarks of the Senator from Texas [Mr. COKE]. We will take the products of Texas on this list. They are:

Brick and tile	$448,418
Carriages and wagons	301,800
Lumber, planed	456,600
Lumber, sawed	2,673,449
Oil, cotton-seed, and cake	276,450
Sash, doors, and blinds	416,500
Foundry and machine-shop products	532,778
Tin-ware, copper-ware, and sheet-iron ware	491,420

Of the products of those industries I have indicated Texas contributed $5,597,415 in value only.

Something has been said in respect to the constitution of the committee that reported the House bill. Texas was most prominently represented there, and the share she has had in the formulation of the bill it is unnecessary for me to refer to.

I think Arkansas, as one of her Representatives was so prominent in the formation of the bill, should be mentioned. That State manifestly should indicate the policy that should control or shape this country in respect to manufactures and protection. I have searched through this list and I find that Arkansas contributed of those products in sawed lumber $1,793,848 worth, and oil, cotton-seed, and cake, $590,000 worth, making $2,383,848 in value as her total manufacture of the products I have indicated. And Arkansas will be potential in shaping the financial or the economic policies of the Government if the House bill is accepted by the country.

A representative of Tennessee has had something to do with the House bill. Tennessee made of brick and tile a little more than half a million dollars' worth; of carriages and wagons a little more than a million dollars in value; of foundry and machine-shop products a little more than a million dollars' worth. She furnished some lumber, some cotton goods, and the aggregate of her contribution to the volume which I have given is valued at $12,068,481.

West Virginia speaks through this same bill. The Senator from Texas has inquired whether she was represented in the list to which I have called attention. She is to the extent of having contributed $5,385,296 in manufactured goods.

Georgia, I think, has done better than the others, for her people make some cotton goods, and with her cotton manufactures the aggregate is $15,083,046.

Kentucky contributed to more items upon the list than any other of the Southern States, and the total of her manufactures in these lines of goods (I do not speak of her whisky) amounts to $18,156,335. I have them aggregated together, so that I can give the figures here. The measure which was forced through the House and in favor of which the Democracy pronounce in the Senate was formulated by gentlemen who represent the States named, and by those gentlemen alone, I may say, for they had the control of the Committee on Ways and Means.

They aggregate as follows:

Texas	$5,597,415
Georgia	15,083,046
Kentucky	18,156,335
Tennessee	12,068,481
West Virginia	5,385,296
Arkansas	2,383,848
Total	58,674,461

These States contributed of the manufactured goods enumerated in the schedule to which I have referred the value of $58,674,461 out of an aggregate of $1,867,857,392, and these Representatives assume to speak for the industries of the country, to shape our economical policy and to provide the markets for the wage-army employed by the capital invested in manufacture.

We have heard it stated in this Chamber, and it has been shouted all over the country, that the Mills bill was not a free-trade measure, that it only reduced the present protection 6 or 7 per cent. That statement is untrue, and unless made by one ignorant of the facts, was intended to deceive. It is easy enough to make a bill—the House of Representatives has made one—which will show an average reduction of only 6 or 7 per cent. in the duties upon those articles as to which duties are reduced, but which will in effect practically open our market to free foreign commerce.

The average reduction of the ad valorem rate of duty under the Mills bill is ascertained by finding what per cent. the amount collected under the present law on certain dutiable goods would be on their foreign value, and the per cent. the less amount collected under the rates of the Mills bill would be on the foreign value, assuming that importations would not be increased. The differences, Mr. MILLS claims, would be the average reduction. Therefore if the difference in the two rates upon one article is small, its importations large—as in the case of sugar—and the importations of the others comparatively small, with a large reduction of rates, still the sugar will hold up the average reduction; and this trick (I withdraw the word "trick") has been perpetrated. The high ad valorem rate upon sugar with its large importations makes the average percentage of reduction upon all to appear small; but the protection upon the other articles would be practically removed, for the purpose of protection.

But omit sugar and the liquors, wines, tobacco, and silks (upon which the rates are not changed) imported from the calculations and the average reduction of the present duties upon American manufactured articles in the dutiable-list in the Mills bill will be from 40 per cent. to 50 per cent.

In sugar, above all other importations, the duty is added to the price and without any compensatory benefits, for the reason that we do not have a competitive production here to force the foreign price down; and it is not the desire of the people, the tax-payers, the farmers, mechanics, and merchants that this burden should be levied upon a necessity in every home to the end that the American market may be opened to foreign goods, rivals of those of American manufacture. The sugar industry, however, was available to hold up the per cent. of average protection to American industries, but the fatal reduction proposed can not be concealed or escape scrutiny.

I will not refer to the gentlemen responsible for the Mills bill or to the States they represent, but I have a right to complain that sectionalism inspired them, and I denounce the National Convention that indorsed the measure and the candidates who approved the platform and accepted its nomination as committed to a monstrosity in sectional legislation.

I would prefer that the issues between the two parties should not be sectional, but that can not now be avoided. It has been forced upon Republican speakers to warn and organize the people against the sectional measure these new masters would impose upon the country. We are justified in referring to the conditions that would largely follow their attainment of the object, end, and purpose they are striving for, and to invite a comparison between the South and the North and contrast the economic policies of the two sections.

I recognize the fact that the South emerged from a civil war devastated and prostrated by it, and compelled to adapt herself to another and better civilization, and to build upon free and paid labor as the foundation for wealth and prosperity. Her laboring class now, as before the war, as I have said, is the negro, and it is most unfortunate that Southern labor is denied political rights. Contempt for, and essentially a proprietorship in, the black man are at the bottom of it all. In a condition of political servitude, the negro has no power to compel deference or respect, and therefore we see a solid South—solid at least as to that portion of it which votes—making, I hope, its last great struggle to degrade labor.

We occasionally hear that the new South would welcome Northern capital and Northern enterprise, but I confess that in the present situation I recognize hostility to both, and a sullen determination from the South to continue a prosecution of undiversified agriculture; to hold the labor in a state of political servitude and in a condition of peonage; and if they are successful the immigration which seeks cheap land to build homes upon and add to its value by improvements will be checked, if not entirely turned backed. Villages and cities will not be vitalized or made prosperous by mechanical industries promoted by Northern capital or enterprise.

The gentlemen who are responsible for and guiding this most unwise policy have again invaded the North and witness her growth and wealth and advancing prosperity, but without profit. They seem to be imbued with the spirit of a generation or two before them, which retreated before the advancement of civilization.

They are now North addressing political meetings largely composed of our highest type of manhood, the mechanics and farmers who govern our Commonwealth. Those audiences should create in patriotic hearts a desire to multiply the constituencies which compose them, and extend into and over the New South our Northern industries, I might properly say Northern civilization.

The policy of proscription and war on wages may continue for a period, but never again will be aided, in my opinion, by Northern electoral votes.

The President claims that his policy, as illustrated by the Mills bill, would increase our foreign trade. With whom, pray, and in what? In the agricultural products? Of many of those I grant we now produce a surplus and have the capacity to largely increase. It has been claimed that its price is established by the foreign market, but that is not true as to our home consumption. Its price is made in a large and valuable home market, in the cities and manufacturing centers that are supplied and fed by the country adjacent to them. These home-market prices are protected naturally by the cost of transportation from

more remote neighborhoods, and largely by reason of the perishable character of the products, while the foreign market controls the price of the surplus we send to it. Of our edible products we export less than 6 per cent. of our production; and let me briefly trace the history of the prices of that exportation for the last few years.

The average export price of wheat for 1886 was 43 per cent. lower than the average price from 1870 to 1886; the decrease from 1870 to 1875 was 13 per cent.; from 1875 to 1885 it was 20 per cent., and from 1870 to 1887 the decrease was 31 per cent.

Corn decreased in its export price from 1870 to 1875, 8 per cent.; and from 1875 to 1880 the additional increase was 33 per cent., and from 1880 to 1887 there was a further decrease of 7 per cent., making a total of 43 per cent. from 1870 to 1887.

The fine brands of wheat-flour exported have decreased in their export value in the last ten years about one quarter.

Bacon and ham from 1870 to 1875 decreased 27 per cent. in value per pound; from 1875 to 1880, 30 per cent. additional. They have a little more than held their own since 1880, but the decline from 1870 to 1887 was 50 per cent.

Cheese declined from 1870 to 1875, 13 per cent. in its pound value; from 1875 to 1880, 26 per cent., and from 1870 to 1887 we find a reduction of 40 per cent.

The foreign prices of agricultural products have been constantly falling, and it is unnecessary for me to more than briefly mention the cause. Increased facilities for transportation the world over has developed new grain-fields and vast pasturage for cattle; has cheapened the cost of transit to those markets where the supply is not equal to the demand, and the price has year by year been forced downward. The limit of capacity for production in the agricultural countries now competing with us has not been more nearly reached than with us, and confronting this fact these Democratic law-makers talk about the advantage of a foreign market for the products of our farms.

Something over one-half of our agricultural product is consumed by those engaged in that industry, excluding cotton. Two-thirds of the surplus and at least three times the amount which is exported is consumed by those engaged in manufacturing and dependent upon it. The best market in the world for the fruits of American agriculture is at home. Not exceeding 8 or 10 per cent. of its fruits, including cotton, ever finds a foreign market. To preserve our home market and extend it should be the policy of every American farmer, and this only can be done by extending and developing the other industries.

Transportation is now the important question in the West. Railroads have opened up there new States and Territories, and the Western people claim with good reason that the cost of transportation to the Eastern States and seaboard makes their land unremunerative. Grant it, and what relief have they in the foreign market to which I have referred, which involves to reach it a further carrying cost? There is a certain remedy—in developing manufacturing which will build cities with populations like those of the older States, in fostering the mechanical arts, and inviting to citizenship those outside of agricultural employment. Why should the West pay for transportation to the Eastern or to the foreign market? They would better build one at home. This the Republican party invites the West to do. On the other hand, the Democracy propose the transportation from Kansas and Minnesota of their products to Europe by rail and water at a cost that will well-nigh consume their value, and then propose the transportation back to them of their manufactured supplies. The transportation charges in a short time will add to their cost far more than the tariff required to insure home manufacture and home consumption of the agricultural products.

This question has been discussed generally with reference to its destruction of the American manufacturer, but there is equally involved the home market of 90 per cent. of the products of our agriculture, the pittance of 10 per cent. (6 per cent. excluding cotton) should not be considered except by the cotton growers, and the contest is with them. Of the cotton crop 70 per cent. is exported, and the balance is manufactured here. Of the other agricultural products 94 or 95 per cent. finds a market here, and 5 or 6 per cent. only is exported.

The chief argument made by the opponents of a protective tariff is that it is oppressive upon agriculture, but to this great industry it is as nourishing and protective as to cotton or woolen fabrics or iron or steel goods.

In this connection I beg to refer to a few of the manufacturing industries which are practically agricultural or tributary to her.

First, take paper—and we have all been amused, and many doubtless have been prejudiced against that industry by the cry of "wood-pulp." Paper is an article of necessity in one form or another in business and domestic life, and its manufacture is an absolute support of agriculture.

In the year of 1887 the value of the product of the paper manufactories of the country was $95,000,000. Paper is made from vegetable fiber, rags, old paper, straw, corn-stalks, wood, and grasses, amounting in value in 1887 to about $50,000,000, and in addition to this, $20,000,000 worth of chemicals and other materials were used in its manufacture. It is fair to say that more than one-half the value of all the paper we use is a contribution of waste material or fibrous products which would be of little or no value except to manufacture into paper.

Woolen goods also illustrate the benefit of protection to agriculture. In the last census year the value of our woolen fabrics was about $267,000,000; and last year $100,000,000 in value of American wool was purchased and manufactured into them.

The product of the starch industry amounted in 1880 to about $7,500,000. Its manufacture afforded a market for $5,000,000 worth of corn and potatoes, and I have been assured that the product for the last year has required 4,000,000 bushels of potatoes and 15,000,000 bushels of corn.

In the census year of 1880 agriculture contributed twenty-nine and a half million pounds of broom-corn to the broom industry. The amount contributed to the manufacture of glue in 1880 was nearly $3,000,000, largely a waste product from slaughtered domestic animals.

In the manufacture of linseed-oil $15,000,000 worth is made annually; purely an agricultural product.

Soap, which the Mill's bill puts on the free-list, in its manufacture consumes from $12,000,000 to $15,000,000 worth of animal grease, a large proportion of which would be waste except for that great industry and the manufacture of crude glycerine, of which 9,000,000 pounds were made in the year 1887, all from the same agricultural products.

The curled-hair industry, which furnishes us with mattresses and goods of like character, utilizes an absolutely waste agricultural product—except for it—the hair of slaughtered domestic animals, cattle, hogs, and horses. The value of the raw material is not less than $1,750,000 yearly.

Seventeen million dollars' worth of glucose is manufactured annually in this country, consuming 20,000,000 bushels of corn.

There are other equally important industries to which I might refer; but those I have mentioned illustrate the direct connection between agriculture and manufacture.

Each individual farmer may not contribute to the quantity of hair or fat of domestic animals that is utilized, nor to the immense amount of straw made into paper; his potatoes may not be disposed of to the starch factory or his corn to the glucose factory, but the total consumption of those agricultural products by the various industries increases the price and every farmer receives his proportion of benefit from the increase.

I propose now to invite your attention to that part of the President's letter of acceptance especially devoted to the manufacturing industries of our country.

I understand the letter to indorse the Mills bill, not by the title, but by referring to the consideration of that measure in the House of Representatives. He says:

> When the Democratic majority were attempting with extreme moderation to redeem the pledge common to both parties, they were met by determined opposition and obstruction, and the minority (the Republicans) refused to co-operate.

Certainly this is an unqualified approval of the House bill, and an emphatic denunciation of the Republican opposition. For the latter he has our thanks.

I have already described the extreme moderation of the proposed legislation. Earlier in the letter, the President says:

> We propose, too, by extending the market for our manufacturers to promote the steady employment of labor.

Repeatedly the President has said his policy would extend our markets; he has offered to the manufacturers free wool and free lumber as a bribe for their support. To the first, as a business proposition, they have replied that the wool product of the United States is indispensable to their success and they would prefer to have its production stimulated. To the other, that it is inconsequential in view both of meager Canadian supply and the probabilities of a Canadian export duty; and his overtures have been spurned with contempt.

Whoever has investigated protection and consulted with gentlemen administering the manufacturing industries has been convinced that it is not in Congress or places of "public trust" that we find the greater mental capacity and more intelligent comprehension of economic questions and industrial progress. I admit that, as a class, the men directing the business interests of our country are superior to any other, and they are far more capable than the President even in the ways and means to extend their markets, and almost without exception have rejected his policy as unwise and sure to prove unprofitable; and my arguments against the "policy" will not be addressed to the directors of the industries, but rather to their employés, the wage workers or earners.

The declared theory of the President is that goods are manufactured in other countries at a less cost than here; that the amount of customs duties we impose upon foreign goods exactly equals the difference between the foreign and American cost at that time. At that low foreign cost, then, we must compete in foreign markets, and that can only be successfully accomplished by a reduction of the present profit of the manufacturers or a reduction in labor cost. Labor is as perfectly organized in this as in any other country for its protection; here it is the more intelligent, and the trade and labor organizations know whether as a rule capital receives more than its due proportion of the price of the goods made. It may, at an exceptional establishment, on account of unusual facilities for procuring raw material or an advantageous market,

receive an unequal share, but as a rule labor has been successful in its struggle with capital and established an equitable division between the two. The Government can now borrow money at 2½ per cent. per annum, and railroad securities earning 4 per cent. per annum are sold at par. Our Eastern and New York savings-banks, many of them at least, pay only 4 per cent. The rates of interest do not actually measure the profits of capital in the industries, on account of the unequal risks and hazards, but when the volume of capital seeking investment at remunerative rates is large the rates of interest are not far below the business profits, if the industries are thriving. It is also true that competition has forced prices down to the lowest point remunerative to capital and consistent with the present value of labor or wages paid.

I have referred to the downward tendency of prices, but the subject will bear further mention. The highest authority furnishes twenty-two articles, combining agricultural products and manufactured goods—leading articles in common use—and the average reduction in the prices from 1865 to 1875 was 22 per cent., and from 1875 to 1885 it was 36 per cent., but the most certain proof of the decrease is the custom-house appraisal of the goods imported in 1880 compared with the importations for the last fiscal year, goods which directly compete with the American manufactures.

The average import price of woolen manufactures entered for consumption in the United States for the years 1880 and 1887 were:

Blankets:	Per pound.
1880	$0.619
1887	.513

A fall of 8.6 cents per pound, or 13.89 per cent.

Clothing, ready-made, for both sexes:	Per pound.
1880	$3.008
1887	1.812

A fall of $1.196 per pound, or 39.76 per cent.

Dress goods:	Per square yard.
1880	$0.232
1887	.209

A fall of 2.3 cents per square yard, or 9.91 per cent.

All flannels, blankets, hats of wool, knit goods, balmorals, woolen and worsted yarns, and manufactures not otherwise specified:	Per pound.
1880	$1.264
1887	.789

A fall of 47.5 cents per pound, or 37.58 per cent.

The decline in price of the goods I have mentioned is not greater or less than upon other lines, but in connection with the important fact that our people in 1887 imported more than $200,000,000 in value of goods that directly compete with the American manufactures demonstrate the small margin of profit. They would not permit importation of that which they could profitably make here; and the cost of the production of American goods, then, must be reduced to successfully compete in a foreign market, and that reduction must inevitably be in the labor cost; so then the wage-earners are invited to open the American markets or share them at the expense of a reduction in their own wages. It can only be accomplished in that way—by surrendering a market of sixty million people to obtain a competitive share in the inferior markets elsewhere.

Where are the markets of the world—the foreign markets the President invites our people to share? Russia, Italy, Austria-Hungary, Germany, France, Roumania, Belgium—all the European nations except England and Holland—Holland is moving in that direction—preserve their markets to their own industries. So do Canada and Brazil. All the European nations I have mentioned place their surplus here and in all the markets that subsidized transportation can reach or colonial possessions provide, at prices we can not compete with. It is said by the advocates of the Mills bill that the conditions for manufacturing in this country compare with those of her European or India rivals, except that labor is more costly here. To this I agree. They also admit in public that the protective duties should equalize the labor cost of manufacturing, so as to give that protection which will compensate for our high wages; and I agree to that. But it is claimed by its advocates that the Mills bill does that, and this I most emphatically deny.

It is remarkable that reputable gentlemen should go upon the record making that claim which, like the one that the bill only reduces the protection of the present law 6 or 7 per cent., is viciously false and intended to deceive.

First, where is the compensatory duty for the labor cost in those products added to the free-list wool, lumber, certain manufactures of wood, salt, cotton-ties, soap, specified machinery, tin-plate, glycerine, extract of hemlock, needles, brick, vegetables, curled hair, beans, pease, split pease, broom-corn, fresh meats, game and poultry, milk, tallow, building and monumental stone, etc., one hundred and three articles, I think, in all. It must be remembered that the labor cost, however expended, whether in one branch of manufacture or another, or in agriculture, is equalized where mechanical industries are established.

The free-list aims practically at Northern industries. Labor on the products I have indicated is equally well paid with that engaged in the industries the Mills bill professes to protect. The American labor cost in the manufactured articles added to the free-list and in those left upon the dutiable-list is based upon the same rates of wages. Then what protection is afforded for the wage-workers here employed in their production? It amounted in 1880, according to the census report, to about $500,000,000. Last year their value is variously estimated at from $600,000,000 to $800,000,000.

I pass to the dutiable-list and their claim that in the principal dutiable schedules not less than 35 per cent. ad valorem has been given to imported articles and that that rate more than equals their labor cost.

The Senator from Texas [Mr. COKE], who declared from his seat that "if there is one thing in this world that the average Texan would go any number of miles out of his way to kick and kill and destroy it was a protective tariff," stated in debate that the percentage of labor in the cost of cotton goods is less than 23 per cent.; in glass, 50 per cent.; in iron and steel a fraction less than 19 per cent.; and he undertakes to give the percentage of labor cost and that of the material in those products, respectively; doubtless all taken from the census report, "Statistics of Manufacture," and entirely worthless as evidence of what he stated, for the reason that the labor cost of the materials used or manufactured by the various establishments is not given. The statistics do not furnish the labor cost of woolen clothing, commencing with the sheep farming, or of the other materials used, dyes, etc., and commencing with their raw material before chemical processes had been applied to them, or the cost of cotton goods, commencing with the planter who raised the cotton. Cotton is the material for the spinner, the yarn for the weaver, each furnishing a finished product, and often produced by separate establishments. Iron ore and limestone and fuel constitute the raw material for pig-iron. Iron for steel bars, blooms, or ingots, which are manufactured into wire, tools, etc. Commencing with the mine, half a dozen separate industries advance the manufacture each a stage, until the highest finished product is reached; and the Census Report does not attempt to give the labor cost in the separate stages of advancement upward.

Gentlemen who have discussed this question upon the theory that the Mills bill gives protection to the value of the labor cost in goods have drawn their facts and figures from the "Statistics of Manufacture" and the report of the Commissioner of Labor, Mr. Wright, and I will briefly refer to his table, "The Boot and Shoe Industry." He states the labor cost at varying percentages, according to the character of the goods, from a little less than 19 per cent. up to a little more than 52 per cent. That of the material used at from less than 46 per cent. to above 76 per cent. Material is principally leather; and turning to his table of "Manufactures of Leather" we find its labor cost to be at varying percentages, from less than 12 per cent. to nearly 25 per cent., and the cost of material from 71 per cent. to over 82 per cent. Hides are the principal raw material for leather, and the labor cost and the growth of the animal and the bark and materials used to manufacture the leather, the transportation, etc., are not stated. Here we have three stages of manufacture, in the first of which the labor cost is not given, and in the second only a part of the raw material used, but a careful analysis of the table with other well-established data prove that the labor cost in the boot and shoe industry would not be less than 90 per cent.

Mr. Wright's table on glass also illustrates the point. His percentage of labor cost runs from 38 per cent. to 72 per cent., depending on the quality, etc.; the cost of the material from 11 per cent. to over 60 per cent. These materials are fuel, sand, clay, lime, lumber, and soda, their price in the market being little more than their labor cost, as we well know, but Mr. Wright does not give that.

In pig-iron he states the labor cost at about an average of 12 per cent., varying at the furnaces; and of the material from 65 per cent. to 85 per cent. The labor cost of iron-ore and coal is given and runs from 50 per cent. to 65 per cent., but that of limestone, its labor cost, is not stated. We know its value is principally labor.

The Mills bill proposes to give an equivalent of an average of 50 per cent. ad valorem duty on the foreign price of a part of iron and steel manufactures, but so distributed as to destroy the industry here, and adds a part to the free-list. Mr. Wright's tables demonstrate that, considered with other verified data, their labor value is 90 per cent. of the finished product; but in respect to all his tables the labor cost is so incompletely stated in the materials used that it is impossible to arrive at it in any specified finished product.

I believe I have sufficiently illustrated the fallacy of the argument that the labor cost is covered by the protection afforded in the Mills bill.

Cotton is a raw material and free of duty, as cheap here as to the foreign manufacturer; therefore it was practicable for the gentlemen to obtain correctly the labor cost in all lines of cotton goods; but that they did not do, and in the light of their legerdemain by tables I am justified in charging that the omission was for the reason that the truth would defeat or expose them.

We have the authority of Mr. Edward Atkinson, who is interested in cotton manufacturing and a distinguished statistician, that the actual labor cost in cotton goods is upward of 90 per cent.; that the profit divided to the manufacturer of cotton goods is only 6 per cent. annually. For a production of cotton goods valued at $1,100,000 he demonstrates that $940,000 was expended for labor, commencing with growing the cotton.

To demonstrate the value added to cotton by its manufacture into

articles for use, I have been furnished the following statement by a manufacturer:

Shirtings worth 7 cents per yard are worth 30 cents per pound.
Shirtings worth 10 cents per yard are worth 36 cents per pound.
Shirtings worth 11 cents per yard are worth 40 cents per pound.
Muslin worth 11 cents per yard is worth 44 cents per pound.
Muslin worth 12 cents per yard is worth 50 cents per pound.
Muslin worth 15 cents per yard is worth 70 cents per pound.
Bleached mull worth 10 cents per yard, worth $1 a pound.
Yarns from 18 cents per pound to $1.25 a pound.

The cotton costing for each pound of goods from 12 to 16 cents, according to their value per yard and per pound, and the increase or added value above that is labor.

Labor increased the cotton in value from 250 per cent. to 600 and 700 per cent., and the average ad valorem rate of duty upon the foreign price of cotton manufactures imported in 1887 was 40.17 per cent.

Hon. Abram S. Hewitt, a leading Democratic statesman, speaking with reference to iron and steel goods—he is a manufacturer of both—asserted before the Ways and Means Committee of the House of Representatives that 90 per cent. of their value is their labor cost. And so falls the claim of the President and of the framers of the Mills bill that it gives protection to the labor employed in the industries.

Mr. President, the pretense for the Mills bill is that our protective duties are a burden upon our country, that the rich grow richer and the poor grow poorer under them. That is untrue, sir, and is proved by the increase in the rates of wages and consumption per capita of those food products and cloth fabrics that contribute to the pleasure and comfort of man. By the extended facilities for a more general education for all, but more especially for the poor; by the increase in the number of savings-bank depositors and owners of land; by the greater production of labor as now applied to new mechanical inventions and scientific discoveries in all our industries, including agriculture; it is far above the increase in the cost of the manual labor employed and 25 per cent., 50 per cent., 75 per cent., 100 per cent., and in many cases 200 per cent. and 300 per cent. more than compensatory for the higher wages paid.

Important inventions have been made in the mechanic arts and equally important discoveries in the sciences. Class distinctions and lines are undefined and in no sense are barriers to advancement; the various industries and employments contribute professional men, politicians, statesmen, merchants, manufacturers, bankers—the good, bad, rich, and poor—in their proper proportions. There has been a general improvement in condition. The poor are not growing poorer, but the protection policy has resulted in a constantly increasing prosperity of all.

Mr. President, I believe I have demonstrated the absurdity of the proposition that we can obtain foreign markets except by the equalization of the labor cost of our goods with the cost of those we must compete with and that it can only be done by lowering the wages here.

I believe I have demonstrated that we can not compete with foreign goods in our own market without protection, and that the present labor cost under the protection system, as an economic question, is more than compensated for in the prosperity of the people.

The Democratic measure was approved by that party in national convention, indorsed by the President in his letter of acceptance, and it proposes to open wide our markets to the competition of foreign goods, without their taxation, for the support of the Government, payment of the public debt, and pensions to the soldiers. Democracy maintains that American producers alone should bear the burden of taxation, and weighted by it contest with England, Germany, Belgium, and India and other markets. The effect of the Mills bill can not be disguised and should not be. The substitute reported to the Senate by the Committee on Finance is equally pronounced in character and purpose. I believe it fairly illustrates the Republican policy of protection, and when its provisions are the law they will defend the American market against foreign competition and importations, and quicken, strengthen, and extend it for the consumption of the fruits of our farms and the products of our mines and factories.

The substitute is not sectional in the protection it would afford. The industries North, South, East, and West are equally provided for. The reductions proposed in the duties on sugars and rice are large, but under the substitute they will remain higher than upon other agricultural products. The committee has not discriminated against any American industry. We did investigate to determine whether, by an equalization of their labor cost with the labor cost elsewhere, certain industries would sustain themselves here, and I do not know of any instance in which protection was refused if the committee concluded prosperity would follow. I do not believe the reduction of duties upon the goods manufactured here will reduce revenues. The experience of the past proves it otherwise, and the substitute under consideration will, in my judgment, in all instances reduce the revenues where larger duties or increased protection is proposed. In its preparation that policy was pursued if manifestly the American product might be enlarged to the demands of our home market and American competition in the manufacture could be assured.

It is probable we have not provided the requisite protection in every instance, but the omissions, I believe, will be found to be very few, and for myself—I speak only for myself—until the substitute with such amendments as may be adopted is the law, I will be willing to correct those errors; I believe it to be the purpose of the committee to continue investigation.

Mr. President, the substitute which has been presented is the opposite of the Mills bill. No comparison of their schedules in respect to the relative reduction of rates by the two bills will be tolerated by its authors; they understand that it stands for protection, and if faulty anywhere in that respect that it should be amended; and that the other stands for free trade.

I have not attempted to discuss the many paragraphs of the Senate substitute. Full tables will be prepared and submitted, and there is not a citizen in the country who will not be able to learn how it affects him and each industry.

Democracy has tendered the issue, and every effort should be made to meet it fairly, and I trust it will not be claimed that the Senate substitute avoids or obscures it. The substitute has pointed the way for the proper reduction of our national revenues (without interfering with the tax on alcohol or spirits which may be manufactured into or used as beverages) and to continue and further enlarge and strengthen the protective system and policy.

Products of manufacture of the late Confederate States and of the other States (Schedule A).

Articles.	Other States.	Southern, late Confederate States.	Reduction by Mills bill from present rates of duty.	Present rates of duty.
			Per cent.	
Jute manufactures	$396,982	None.	28	35 per cent.
